PRESIDENT HOLMES' ADDRESS.

a distinctive honor to extend to you, the
s of the New England Manufacturing Jew-
nd Silversmiths' Association and to your individual guests, an earnest welcome to this our annual exhibition of gastronomic forces, in which host and guest seem to vie with each other in the display of pre-eminent skill and prodigious endurance derived from a thorough familiarity with the demands of such an event.

Never before on such an occasion have you been permitted to sit under such a canopy of radiant splendor, nor under such bewitching and alluring glances. To the gracious representatives of that sex, whose existence furnishes the excuse, as well as the stimulation for so many branches of our industry, I extend our gratitude for their attendance, by which, and through the natural charms attached thereto, the decorative features of this occasion are so highly embellished. May the softening influence of your presence extend to the threshold of the home-coming which awaits these gentlemen later in the evening.

On account of the nature and greater importance of that part of the post prandial that is to follow, I must refrain from making use of this opportunity for reviewing with you the benefits that have accrued to our business during the past year through the efforts of this organization. Neither should the brevity of my remarks measure in any degree the cordiality which is extended to all on this occasion.

Another year of commercial activity has claimed your attention since my predecessor in this position extended to you his official welcome, and in offering you that same wholesome greeting to-night I am proud to know that whatever social successes may have attended this organization in the past, all former events are only achievements in the strife to maintain the prestige of the industry we represent, when compared to the culminating glory which surrounds this grand tribute. A tribute extended not only to our organization and our industry, but also to our city, represented by its Chief Executive; to our State, represented by its able administrator; to our nation, represented by its loyal, energetic, official national legislators, and by its fearless, resolute, yet genial Executive. A testimonial of esteem for a loyal, honest character and of confidence in the wisdom and justice of the head of this grand nation, whose presence honors us to-night.

Let me congratulate you that in presenting our greetings to these distinguished representatives of city, State and nation, I am representing an industry that, in this jurisdiction comprising Providence and the Attleboros, enjoys the unique distinction of possessing freedom from those debilitating forces which encourage labor to organize and capital to amalgamate. An industry which utilizes about 20,000 employes, who create an output in excess of $50,000,000 per year.

In extending a welcome to His Honor, the Mayor of our municipality, he can be reminded that our progressive city gave birth to the production of jewelry in America and from its inception the enterprise received such nourishment and stimulation that Providence has for a number of years outranked all other cities of the United States in the amount of jewelry and silverware produced, as well as in the number of persons employed in creating the product.

And to our honored guest, who administers the affairs of this State so graciously and satisfactorily, we can offer the record of an industry in which perhaps more than in many others the "laborer is worthy of his hire," which condition is manifested from the fact, that while the average wage cost in jewelry manufacturing in the United States is 25.1 per cent., in this compact little State, that is the pride of His Excellency, the average wage is much higher. And furthermore, there are many branches of the industry in which the labor employed forms from 70 to 90 per cent. of the cost of production, thereby assuring to the working people their full share in the productive powers of his State.

To our Representatives in Congress we extend our appreciation of their recognition of the just requirements of an industry that leans upon the protecting arm of judicious legislation. It is unfortunate that I am not permitted, through lack of time, to convince them by facts and figures that their constituents endeavor to realize what great responsibilities are theirs, in defending administration policies against invidious insurgent attacks, or in supporting laws that are essential to the preservation of New England's productive interests.

And to you, Mr. President, whose policies when

enacted into laws offer hope and comfort to the wage earner in New England and to the country as well, to you we extend a cordial hand of welcome and congratulation. We to a State whose record in national politics serves commendation and reiterates our congratulations to the administration whose wise judicial guidance will insure to us and our walls and prosperity within our borders.

And now, gentlemen, to me falls the pleasure of introducing to you one who, during remaining exercises of this eventful evening needs no encomiums from me, but whose introduction to any gathering of citizens is with great pleasure that I surrender on this occasion to the toastmaster Mr. Cutler.

Mr. Cutler in assuming the duties of toastmaster, in response to the introduction of President Holmes, said:

SPEECH OF HARRY CUTLER.

From the earliest days history has craft famous above all others in its decorations and adornments of princes and the titled nobility of many orders. The handicraft of our art attained illustrious renown in the days of archs and sovereigns of all times. The part in the embellishment of regal imperial beauty appears in the annals realm, and the symbolic majesty has been emblematically enhanced by tistic adjuncts which were produced sourceful minds and the skilled fellow craftsmen.

To all of these sovereigns and man of surpassing skill and art paid servile homage. In this age seems incomprehensible. We, of understand it, and reasonably so, ment, our institutions and our upon the firm and fast rock of men. It is the aim and the work as of every other in this age and adorn and embellish impartially great American individual, who in combination with his millions of given and will ever continue to and to the world the absolute people can rule safely and wisely creed of this American organization craftsmen, whose preamble and the gem of greatest intrinsic value of men," recognizing only in the "survival of the fittest." It is that our best settings—respect, love —surround the resplendent jewel wit, wisdom and counsel will humble abode this evening.

In the brilliant cluster of own beautiful municipality its head, the proper guardian one of the best artisans in our has wrought with implements and truthful scale. I am happy for the first speaker, His Honor, Fletcher, a member in good organization.

Mayor Fletcher responded briefly.

MAYOR FLETCHER'S REMARKS.

The first notable visitor to tions with his presence received welcome from the inhabitants that further, but remained to spend the days in peace and contentment. inherited through a long line of spirit of hospitality with which it of Providence to greet this eve guished guest, the President of the

The City of Providence is a great composed of many branches and it, for the city has made for itself a to none in the land. The jewelry our industrial plant is an important march of progress, for it develops element of our natures and brings nence characteristics that tend to place upon a high plane of citizenship.

We have long since come to regard them as among the best citizens of our they not only appreciate and emulate the best in craftsmanship and art, but they are imbued with high ideals in glory in the traditions of their city, those principles whereon it was founded.

PRESIDENT TAFT'S ADDRESS.

President Taft spoke for more than half an hour and discussed all the national issues that are now and have been before the country since the beginning of his administration. Before entering upon a discussion of these topics, however, he paid a very flattering tribute to the persistency and persuasiveness of Henry G. Thresher and told about meeting him everywhere and under all occasions. He said that he was born in the near vicinity to Rhode Island and there was one name that was more familiar to him than even that of Roger Williams. This was Henry G. Thresher.

No matter whether I was plunged in the depths of national questions or looking over fortifications on the coast, Thresher appeared. No matter whether I was preparing to begin a political campaign or was just returning from one—there was Thresher. It was Thresher everywhere. It has been Thresher at every turn. With my knowledge of his persistency I can easily conceive that he might control $50,000,000 and have 20,000 employes at his beck and call

We passed a tariff bill at an extra session of Congress. That bill bore the name of the Payne-Aldrich bill, and it has been made the subject, I may say, of considerable discussion. But, gentlemen, the proof of the pudding is in the eating. We have had seven months of that bill, and it has proved a number of things. It has proved, first, that it is the best revenue getter that we have ever had. It has proved, second, that by the returns that it is the largest free trade list of any revenue bill that we have had. It has proved, third, that the rates from the Dingley bill have been materially reduced. Fourth, it has provided a system of administration, through commerce court and otherwise, which will make it more expeditious and therefore much more just an administration of the customs revenue law.

Again, the tariff bill furnished to the Executive, by means of a maximum and minimum, a leverage to secure from the foreign countries that fair treatment that undue discrimination against this country, evidences of which were cropping up in many of the customs systems of foreign countries. We are almost through exercising the power under the maximum and minimum section. I am very hopeful that we shall be able to go through without the use of the maximum section at all.

Then, there is provided in the tariff bill a tariff board which, as soon as it discharges the duties imposed upon it with reference to the maximum and minimum section of the law, I expect to ask Congress for $200,000 or $250,000 to enable that board to proceed to get at the truth with respect to all the protected industries of this country, and when we come again to have a tariff bill we may refer to their record impartially and with respect to the fact upon which a new tariff should be adopted when that becomes ancient.

Under this tariff this country has proceeded to great prosperity, so that now I think everybody is making money; wage earners have all the work that they can do. Wages are at the highest point, and while there is some complaint about high prices, and high prices do exist, I don't think that their presence is of such a character as to cause suffering.

After discussing all of the national issues at considerable length and telling of the policies which he hoped would be pursued in regard to them, he thanked the jewelers for the great interest that they have shown in the tariff matters, and of the excellent support always given the administration.

As he took his seat, Past President Henry G. Thresher of the association rose and, addressing the President, said:

We have given banquets of more or less importance for nearly 30 years, but some six or seven years ago, when this association was incorporated, we resolved to obtain speakers of national repute for our annual banquets.

The first year we secured a member of the cabinet, the next year a United States Senator. For the following year our attention was called to a gentleman in public life, who a few years before resigned as judge of the Sixth Judicial Circuit of the State of Ohio, to accept the Presidency of the United States Philippine Commission. He was appointed the first Civil Governor of the Philippine Islands. Was sent to Rome to confer with Pope Leo XIII. concerning the purchase of agricultural lands of religious orders in the Philippines. Resumed his duties as Civil Governor. Became Secretary of War, visited Panama to confer with the authorities in regard to the government of the Canal Zone, and as Secretary of War visited the Philippine Islands on a tour of inspection.

Certainly here was a man to address the New England Manufacturing Jewelers' and Silversmiths' Association. Our respect and love for this man, our admiration for the deeds he accomplished, were born at this time and have continued until this day.

Armed with what we considered proper credentials, we presented ourselves to the Secretary of War and invited him to come to Providence to address us only to learn that it was impossible for him to do so. Next year we tried again, with the same result. The third year—our courage did not fail—in fact we hoped that by some magic our third effort would be successful. We had a jolly good visit, the Secretary would be very glad indeed to come to Providence, etc., etc., but it was utterly impossible for him to do so.

A year later our friend was very much in the limelight, having been elected to the highest office in the gift of this great nation. We loved and admired him as Secretary of War, and we loved him no less because he was President-elect.

On our fourth visit, which was to the Hot Springs of Virginia, we received the usual cordial greeting, the ever-present and fascinating "Taft Smile" and an invitation to play golf, hut, as usual, had to look elsewhere for a speaker; and in this connection I wish to say the Secretary of War could say "No" the easiest, say "No" the quickest, stick to it the firmest and turn you away in defeat the happiest of any man I have known.

However, when the New England Manufacturing Jewelers' and Silversmiths' Association is after a good thing it cannot be turned from its course any more than you can change the laws of gravitation.

Consequently, this year, *for the fifth consecutive time,* we tried again, and *our efforts were crowned with success.* The President promised to come, the President has come and our happiness is complete. For, "When your possessions equal your desires, you have perfect happiness."

"Make new friends, but keep the old,
The first are silver and the latter gold."

With a golden friendship, Mr. President, and in behalf of the New England Manufacturing Jewelers' and Silversmiths' Association, I have the pleasure and the very great honor to present to you this solid gold casket. Accept it, not because of its intrinsic value, even though it he made of precious metal, neither because it was made in this city, in the heart of the jewelry industry, in the factory of a prominent member of this association; not because of its workmanship, which is of a very high order, but, my dear Mr. President, I would have you accept it as a token of our great love and esteem for you as an upright and true man, untiring in your efforts for the welfare of this great people, unflinching in your devotion to duty and to the right, as God gives you to see the right; accept it as a mark of our appreciation of the illustrious services you have rendered our country as judge, Governor, diplomat, Secretary of War and in the high office you now occupy.

May this casket remind you of the great pleasure your visit has given us, and may you ever be conscious of the warm and loving hearts, the constant and loyal followers which you have in this association, in this city and in this State, who wish you long life, good health and a successful administration.

Mr. Thresher then handed President Taft a beautiful solid gold traveling jewel casket, which was a fine piece of the goldsmiths' art. It was five inches in length by three and one-half in width and an inch and one-half in depth. The cover was burnished to a mirror-like surface, upon which was inscribed the President's name and the date and occasion of the gift. It was lined with heavy dark red velvet. The casket was made by Theodore W. Foster & Bro. Co., of this city of 14-karat gold from a special

Although true Black Opal is scarce, we have a notable stock in all grades received by us in a rough state direct from the mines and cut in our lapidary shop in New York.

Our prices are necessarily less than those obtaining in Europe and the fact that no two stones are alike makes this gem very attractive as a profit getter.

WE ARE SPECIALISTS IN BLACK OPALS

All the wonderful changing colors of the Solar Spectrum vibrate through "Black Opal," some in small pin point markings, others in harlequin, peacock and formal designs.

Some stones exhibit broad flashes of red, blue, green and purple while others exhibit cloud effects and sunsets such as Turner painted and only a Ruskin could describe.

[The souvenirs given to the members guests were exact replicas of the except that they were in leather and made by Rueckert Mfg. Co.]

President Taft in accepting the gift said:

Gentlemen of the New England Jewelers' and Silversmiths' Association to say that I value most highly your generosity and confidence. is not an easy burden. And times lag, and one's hopefulness appears. It is at such times that of which this is evidence, of your the fact that however much you whatever I may do, you do not motives. This will relieve me of couragement under those conditions.

Frank T. Pearce, past president N. E. M. J. & S. Association,

SENATOR WETMORE.

personal care the President's gar given, presented the President with gold pencil, hand engraved six inches in length and bore William H. Taft, March 21, 1910. a beautiful memento of the

In introducing the next speaker Cutler paid a glowing tribute to of Rhode Island who have stood in the affairs of the nation, saying

Gentlemen, if we must, perforce of Rhode Island are in a ca smallest State in the Union, we sailed, we may indeed feel States in other respects. From the formative period of Washington supporting arm of Greene, down time, Rhode Island has ever been aiding and guiding the Ship of State or war, with pen or sword, she has and helpful supporter of the nation.

Among our honored guests Senator of Rhode Island, known for integrity in life and loyalty State, respected and admired by proud, indeed, and rightly too, at the helm as leader of that law-making body, the United States Senate, public financier, whose crowning achievement is the development of our national stability it may ever endure. In your name and my own I thank him most sincerely for his address here to-night. It is my distinguished honor and extreme pleasure to present to you the

land Senator at Washington, the Hon. . Aldrich.

e tleboro contingent was on hand in goodly e and arrived early.

* * *

an 15,000 pieces of crockery were neces- t up and serve the banquet.

* * *

"Bill" Lecder still retains the honor of e big man" in the association.

* * *

yons was another who said "he stayed use he didn't want to miss it."

* * *

g the banquet President Holmes enter- out 50 guests at the West Side Club.

* * *

Fontneau and Cook, prominent as jew- prominent as "consumers," were promi- esent.

* * *

Saart arrived at the hall long before his d, Fred Platt. Suppose Fred was tieing e alone again.

* * *

cutive ability of the committee in charge n at every hand in the thoughtfulness arrangements.

* * *

Cutler made the ideal toastmaster, his troductory of the several speakers be- ularly apropos:

* * *

Heller enjoyed President Holmes' re- marks, especially when he referred to the "alluring glances from the balcony."

* * *

George C. Rueckert gazed with admiration upon the souvenirs of the evening. Rueckert's original ideas are good, the souvenirs showed it.

* * *

While awaiting the President's coming, every- one sat in the balcony. After 20 minutes of wait- ing the steam heat wasn't necessary.

* * *

There were two ex-Governors of Rhode Island among the diners—George H. Utter, of Westerly, and James H. Higgins, of Pawtucket.

* * *

tico A. Cahoone, resplendent, genial and smiling as ever, gave a good account of himself as a participant in every course at his table.

* * *

E. E. Hale made a dead set rush for his souvenir as soon as he came in. The doctor believes in doing things slowly and immediately.

* * *

George W. Hutchinson made all the disturbance, and Harvey Huestis did all of the listening. It was ever thus with Hutchinson and Huestis.

* * *

Fred C. Wilmarth was never at a loss for some- one to talk to, and needless to mention to those who know him, at a loss for something to say.

* * *

A detail of 10 men from the Providence Fire Department were on duty under command of Lieut. Leonard, of Truck 1, all in full uniform.

* * *

Harold E. Sweet and Capt. Archibald Butt, U. S. A., A. D. C., who who sat in the chair next to him, held a repartee contest. Harold won.

* * *

The Manufacturing Jewelers' Board of Trade was represented by President Fred D. Carr, Sec- retary Marcus W. Morton and Manager Horace M. Peck.

* * *

W. H. Blake entertained in the reception room on the fourth floor before being entertained in the banquet hall himself later. There was al- ways a crowd around Henry.

* * *

E. E. Weller drank in every word of the ad- dress of the Chief Executive, and no doubt he will practice elocution on the salesmen who call upon him for some time to come.

* * *

J. A. Straight assisted F. M. and J. L. Cobb to find their seats in the seating directory. Some- one had a sneaking suspicion he was after infor- mation in order to find his own.

* * *

The balconies were opened to the ladies, and each one equipped with a miniature silk American flag, which they energetically waved when Presi- dent Taft was introduced and received.

* * *

Henry Thresher's descendants can look back with pride on the remarks of President Taft con- cerning their ancestor. There's no doubt now but that "Thresher" deserves all the credit.

* * *

L. H. Carpenter always does something at every banquet that causes comment. At this one he was noticeably quiet and reserved, and that is something to comment upon in his case.

* * *

E. B. Hough tried to be a "pusher," too. He did his best but found himself a little short in stature; however, not to be beaten, he stood on a seat and then shoved with a vengeance.

* * *

After the banquet President Taft was the guest of Robert I. Gamnell at his home on Benefit St. until the departure of the midnight express at 1.20 A. M. Covers were laid for 25 guests.

* * *

C. B. Shepard said he was on his way to Chi- cago. The banquet must have been a stop-off sta- tion. Many trips were delayed until Tuesday, and there are no regrets you may rest assured.

* * *

C. H. Eden is famous for his appetitie, and is famous for turning a good dinner into a man, and Charley Eden is every inch a man, which means a great deal when you measure him 'round about.

* * *

Sidney Nordlinger assisted in giving out the souvenirs and tearing off the coupons. He worked as hard as the other boys part of the time, but he was strong on warming the bench, too, we no iced.

* * *

Henry Lederer was one of the last to shake hands with President Taft, and also on the ban- quet floor, but we didn't notice his plate filled with anything but emptiness every time the waiter came to take it away.

* * *

S. K. Merrill, chaperon; R. E. Budlong, R. E. Budlong, Jr., and S. M. Budlong, had a small banquet, a sort of family affair, all by them- selves—a proud grandfather, great grandfather and father is S. K. Merrill.

* * *

The press tables were alongside of the speakers' table. Another testimonial to the good sense, fore- thought and originality of those who had the as- signments in hand, and something that future banquets can do well to copy.

* * *

John F. Brady never does kick up much fuss, and we wouldn't have known he was on hand if it hadn't been for his applause when the orches- tra played "The Silver Lining." Brady has a soft spot in his heart for silver these days.

* * *

W. B. Ballou was one of the "pusher" at a north entrance to the dining hall. To him was allotted to shove the slow ones in line out of the way. They made no mistake in selecting Ballou for the work. He's a pusher—always was.

* * *

Wm. P. Chapin, Jr., was the policeman of the occasion and even went so far as to order the press representatives from the dining hall while they were in quest of information. The press has no terrors for Chapin, when he sees his duty he does it.

* * *

"Billy" Penfold reminded one or two present, and especially one, that they were down for an ap- pointment at his factory Tuesday morning. No one would suspect anything cruel in Penfold to gaze into his countenance, but facts talk louder than his countenance.

* * *

Many of the banking and business houses on the route taken from the Union Station to In- fantry Hall were decorated with flags and bunting. Among these were the following jewelry con- cerns: George R. Alexander, E. T. Arnold and George H. Taylor & Co.

* * *

The President's coat and hat were intrusted to the care of A. K. Potter to take to the check room for safe keeping. On the way to the window he slipped the hat on his head and remarked, "How would I look as president." If comparison has anything to do with the answer—well.

* * *

Harry Mays was much in evidence from the balcony acting in a head waiter's capacity, pre- ceding the President's arrival. More power to Harry and the rest of the committee of workers, and that included every one of them. The success of the banquet speaks eloquently for them.

* * *

The President's personal flag, which was so prominently displayed everywhere, was a new one to many of the residents of Providence. It was last displayed eight years ago when President Roosevelt was here. It is the seal of the United States on a sky-blue field and is a neat device.

* * *

President Taft's visit to Providence adds the seventh to the list of Chief Magistrates who have visited the city during their terms of office. The others were Washington, in 1789 and 1790; Mon- roe, in 1817; John Quincy Adams, in 1827; Jack- son, in 1833; Hayes, in 1877; McKinley, in 1899, and Roosevelt, in 1902.

* * *

A pretty tribute was paid to Toastmaster Harry Cutler, who is captain of Co. E of the First Light Infantry, the aristocratic independent military organization. More than 60 of the members in the full picturesque uniform of scarlet coats and tall black bearskin bonnets, with muskets, did guard duty in the balconies and on the main floor. They were commanded by Lieut. C. R. Leonard.

* * *

The large gathering were shown to their re- spective tables by a corps of ushers under William P. Chapin, Jr. These were Aldridge G. Pearce, Allen Buffinton, William Otis, James O. Otis, W. H. Bill, A. Morris, W. B. Ballou, Frank P. Daughaday, E. L. Gowen, M. L. Carter, R. M.

Creditors of Edelhoff Bros. & Co. Meet at New York to Arrange Final Settlement.

A meeting of the creditors of Edelhoff Bros. & Co., who were formerly in the retail business on Fifth Ave., New York, and who failed some time ago, was held at noon yesterday at the offices of Mackenzie & Burr, 34 Nassau St., at which time the complicated affairs of the corporation of Edelhoff Bros. & Co. and Schickerling Bros. & Co. were discussed at some length. The meeting was called for the purpose of asking creditors of Edelhoff Bros. & Co. to authorize a settlement of claims against Edelhoff Bros. & Co. aggregating $120,000 for $6,000. A large percentage in amount of the claims involved were represented at the meeting, and a vote in favor of the proposition was recorded.

Among the claims against Edelhoff Bros. & Co. were some on Edelhoff Bros. & Co.'s notes amounting to about $50,000. The trustee of Schickerling Bros. & Co. filed his claim for the same amount, claiming that he had a secondary lien, as Schickerling Bros. & Co. were indorsers on these notes. Schickerling Bros. & Co. also filed claims against Edelhoff Bros. & Co. on an open account and for memorandum goods to the amount of over $20,000. All these claims were disputed by Rawson Wood, as trustee in bankruptcy for Edelhoff Bros. & Co., and have been in litigation for some time.

These claimants have agreed to settle all claims against Edelhoff Bros. & Co. for $6,000, and the trustee in bankruptcy will be authorized to do so.

Mr. Mackenzie explained to the creditors that the conditions of the litigation were such that it would probably cost $6,000 to fight the matter in court, and the result would be uncertain. He recommended the settlement.

One of those present brought up the matter of letters recently sent out by Conrad Schickerling, over which there has been considerable comment. Mr. Mackenzie said that the statements made in the letter by Schickerling, in so far as they related to himself and to Mr. Wood in regard to accounts, were untrue. Mr. Mackenzie told the creditors he had received about $3,000 for his services, and that Mr. Wood had gone so far as to turn back the fees to which he was entitled as trustee in bankruptcy.

Canada Notes.

The firm of H. Woodley & Co., has registered this week at Montreal.

W. E. Kelly, Goderich, Ont., has sold his business to W. H. Harrison.

Among the callers on the trade in Montreal, during the past week, were Mr. Stern, of Stern Bros.

R. L. McGill, Galt, Ont., has renewed the chattel mortgage he gave to T. A. Fowler for $3,130.

Clifford G. Kearns, Dundalk, Ont., has renewed the chattel mortgage he gave to D. Campbell, of the same city for $1,433.

Henry Birks & Sons, Ltd., Montreal, have very recently made in their ecclesiastical department a beautiful communion set in sterling silver gilt, elaborately chased and engraved and set with precious stones, in memory of the late Rev. Canon Rogers, D.D., of St. Matthew's Church, Brandon, Ont.

Between midnight and four o'clock, Monday morning of last week, burglars forced an entrance to the store kept by O. Vezina, 813 Mount Royal Ave., Montreal, and stole $300 worth of jewelry, including a number of necklaces. The rear door of the jeweler's store had been broken open with a jimmy. The police have not yet made any arrest.

A 12-year-old school boy robbed the store of Tiscus & Riblett, at Youngwood, Pa., recently, of jewelry, etc., and has not been apprehended as yet.

Chas. W. Hackbarth, St. Ansgar, Ia., has sold out his business to Otto Rosel, of the same place.

Chantecler Jewelry

It has been a long time since a radical innovation in styles has been so quickly and generally taken up as the Chantecler idea.

Like every other popular craze, it has been carried to extremes. We may not all admire some of its adaptations, but it is generally admitted to be "*the*" feature of the season's styles — and a very pleasing one at that.

We are offering the trade a line of Chantecler jewelry novelties in which the popular idea appears at its best.

Our Chantecler hat pins, stick pins, sash pins, collar pins and buckles are not only new, but particularly attractive.

Your line isn't complete without them.

Ask your Jobber — or send us a postal and we will tell you where you can get a supply

Job Solinger has returned home much m ved in health after a long southern i Mr. Solinger had an attack of pneu- o early in the Winter, and first went to Cuba with his wife, and later took a tour of the south.

Among those who attended the annual dinner of the Yale Alumni Association of Rhode Island, at the University Club last week, were Erling C. Ostby and Walter R. Callender.

W. Louis Frost was re-elected Secretary-Treasurer of the Narragansett Bay Yacht Racing Association at the annual meeting. Among the delegates present were Harvey J. Flint and Fred B. Thurber.

While cranking an automobile a few days ago C. Frederick Munroe, traveler for Geo. M. Baker, had his wrist badly sprained by the handle flying back and striking him. Fortunately no bones were broken.

A second and final dividend of 3.8 per cent. has been declared by the Referee in Bankruptcy, Chester W. Barrows, in the case of the National Manufacturing and Metal Co. of this city. This makes a total of 8.8 per cent. paid.

In the civil session of the Sixth District Court, before Judge Gorham, on Tuesday of last week, the case of Charles E. Hancock & Co. against Harry Taylor *et al.*, for recovery of a note, judgment was given for the plaintiff for $65 and costs.

The American Seamless Wire Co., which has been in the business of manufacturing seamless wire in the Metcalf building for several years, has discontinued business. The E. A. Eddy Machinery Co. is offering the machinery of the plant for sale.

Sidney Williams, president of the Williams & Anderson Co., and Horace M. Peck, manager of the Manufacturing Jewelers' Board of Trade, are being considered as possible candidates for first mayor of the newly incorporated city of Cranston.

The first dividend of 5 per cent. in the case of Charles H. Ballou & Co., manufacturing jewelers of this city, has been declared by Referee in Bankruptcy, Chester W. Barrows, and was payable on and after March 17 by the trustee, Walter J. Ladd.

Harry Avakian has given a chattel mortgage of $250 on one-half interest in the machinery, tools and other personal property of the Standard Nickel Plating Co., 9 Calender St. He has also discharged a mortgage of $150, held by Avedisian Mgrdich.

John C. L. Shabeck has purchased the three-story brick building at 245 W. Exchange St., from Edward T. Davis, and given a mortgage to Mr. Davis thereon for $49,000. The property has a frontage of 75 feet on the northerly side of W. Exchange St., and runs back 150 feet.

The National Exchange Bank of this city, of which Theodore W. Foster, Arthur Henius and Walter Callender of this city, and Samuel M. Einstein, Joseph L. Sweet and Clarence L. Watson of Attleboro, are directors, has been elected to associate membership in the Jewelers' Board of Trade.

John M. Waterhouse, an employe of the American Enamel Co., 29 years of age, died at the Rhode Island Hospital, Saturday night, of injuries sustained at the company's plant in Thornton a few days previously. A packing case fell from a wagon, landing on the young man's back, which was broken.

John Perry of this city has sued James C. Doran & Sons for $3,000, the plaintiff alleging that while employed by the defendants, Nov. 29, 1909, operating a stamping press machine, he was directed to do some work on another machine, which was started by a boy and by which one of his fingers was cut off.

At the annual banquet of Wannamoisett Country Club, at the West Side Club, on Monday evening, among those present were George Briggs, Walter A. Griffith, Ralph S. Hamilton, George H. Kettlety, Benjamin B. Manchester, Ellis W. MacAllister, Frederick A. Otis, William A. Schofield, Edward N. Slade and Henry G. Thresher.

A permit was issued the past week to A. T. Wall & Co. to erect a four-story, reinforced, concrete building, 133 feet long by 59 feet wide, at the southeast corner of Claverick and Clifford Sts. The foundation walls will be three and a half feet in thickness, in order to permit at some future time of the erection of four additional stories.

William Jackson, for many years connected with the Callender, McAuslan & Troup Co., died at his home, 835 Broad St., this city, last Sunday, after an illness covering a period of nearly four years. He was a native of England and once entered the employ of the Boston Store, and was for many years in charge of the shipping department. He was 56 years of age.

The following representatives were callers upon the trade in this city last week: William Froehlich, Sterling Silver Mfg. Co.; F. M. Drisco, Globe Optical Co.; F. H. Elliott, Smith, Patterson Co.; Mr. Buck, Rogers & Hamilton Co.; E. P. Leonard, Boston Optical Co.; George A. Jochum, C. Cornehlsen; Morris Lewkowitz, David Ullman & Co., and D. M. Lane, E. Kirstein Sons Co.

Thomas W. Victor, 39 years of age, was arrested Thursday evening by Inspectors Monahan, McGann and McGuire, of headquarters, and later locked up charged with passing a check for $20 on the Baird-North Co., when he had no funds in the bank. In the Sixth District Court the next morning, before Judge Gorham, he pleaded *nolo* and was held under $700 bonds for the grand jury.

A burglar visited the home of Wade W. Williams, of Warren & Williams, at 62 Patterson St., last week, and after getting through a window in the cellar, bored a hole through the cellar door, turned the latch and went into the house. He first stopped at the refrigerator and partook liberally of the food there. He went upstairs and found three overcoats and two suits of clothing which he took away with him, but he evidently became frightened, as nothing else was missed.

A dinner in honor of Charles Nightingale, superintendent of the Clark & Coombs Co., was tendered by 35 employes of that concern Saturday evening at Taft's Hotel, Mr. Nightingale being about to sever his connection with the concern. He was presented with a traveling bag and a silver loving cup, the presentation being made by Albert Martin. At the conclusion of the dinner a number of complimentary addresses were made and a musical programme enjoyed, James B. Toher acting as toastmaster.

The children of Mr. and Mrs. Stephen Patterson gave them a surprise on Thursday evening, on the occasion of the 50th anniversary of their marriage, at their home on Pleasant St., this city. Guests were present from Brockton, New Bedford, Paw-

ting of the New England creditors & Flershem, of Chicago, was held ms of the Manufacturing Jewel- rd of Trade, in the Wilcox building, 18, at which there were present Messrs. Lapp & Flershem and their attorney, Mr. McKeever, also 28 creditors, representing claims aggregating $88,152.95. Frederick D. Carr, secretary of the Ostby & Barton Co., and president of the Board, was chosen as chairman, and Marcus W. Morton, secretary of the Board, acted as secretary of the meeting. Messrs. Lapp and Flershem, as well as their attorney, explained the entire situation and gave detailed statements concerning the various offers for settlement that have already been announced. No important information developed, and after listening to the arguments of the firm's attorney and the opinions expressed by the various creditors, it was resolved that it was the sentiment of the meeting that it would be advisable to accept the best offer of cash that has been presented.

North Attleboro.

Ira Barrows, of the H. F. Barrows Co., was a local visitor last week.

Fred A. Howard returned last week from a western trip for the F. M. Whiting Co.

F. S. Gilbert was elected to the school board on Monday at the annual town election.

A. G. Schawb, Cincinnati, O., was in town last week, placing orders with the local firms.

W. C. Sherman returned last week from a New York trip for the Estate of O. M. Draper.

Louis Blackinton has returned from a western trip, taken for the W. & S. Blackinton Co.

St. Elma Coombs returned Saturday from a trip in the interests of Payne & Baker Mfg Co.

A number of the manufacturers closed their shops on Monday, on account of the annual town election.

G. Percy Clap entertained Percy Savory, representative of the Wadsworth Watch Case Co., at his home in town, last week.

D. M. Chisholm has resigned his position as salesman for the Bugbee & Niles Co., to take the western route for Sturtevant & Whiting.

After three years of faithful service, W. H. Bell, of W. H. Bell & Co., retired from the Board of Selectmen last Wednesday evening.

The wedding of Miss Helen Barrows, daughter of H. F. Barrows, to John Payson Grosvenor, of Pomfret, Conn., took place last Monday evening.

George A. Chisholm, son of Alpin Chisholm, a local manufacturer, secured third place in the hurdle race at the big New York meet last week. Chisholm is a member of the Yale team.

Henry G. Thresher, a manufacturing jeweler of Providence, who was one of the leaders in securing favorable legislation relative to the jewelry part of the tariff bill, delivered an interesting address before the Mens' club, of the Baptist church, on Tuesday evening.

Several additions are being planned to the factory of the T. I. Smith Co., which, when completed, will make this one of the most up-to-date factories in the Attleboros. A large dip room is being constructed and in a few days work will be started on additional addition for the packing room and offices.

Among the jewelers who attended the hearing given by the Boston-Providence Interurban Railroad Co., at Boston last week, were W. H. Bell, Frank Waite, George C. Wheeler, C. T. Paye, Herbert Straker, M. I. Furbish and Donald Barrows. A protest was lodged against the road striking the extreme boundary of the town. The jewelers desire it to come through the center.

Attleboro.

John Garrett, the new salesman for the Shepard Findings Co., was in town, last week.

The new post office building on S. Main St. will be ready for occupancy within another fortnight.

The Oulton Engraving Co. is removing its factory from the first floor to the second floor in the Ingraham building.

D. E. Makepeace was re-elected chairman of the Water Commissioners of Attleboro at the organization of the board, last week.

"Chantecler" jewelry consisting of pheasants, roosters, game cocks, owls and rabbits made up in pins and brooches is being rushed out of Attleboro as the latest novelty.

S. O. Bigney was one of the speakers at the large Repblican rally held in Attleboro, last Friday, in the interests of William R. Buchanan, who is a candidate for Congress from the 14th district.

The Bates & Bacon Co. has started plans for adding another addition to its factory on County St. The new floor will be 225 feet long and 40 feet wide, and will be used for renting purposes.

Announcement was made, last Thursday, that J. M. Fisher & Co. will move into the new Leach & Garner factory on Pearl and James Sts., occupying the top floor. The firm will commence to move in about a fortnight. The announcement was pleasing to Attleboro people, as there was some talk of the concern moving out of town. Offers of free land and taxes were made, but were of no avail.

Jacob Castelberg, founder of the Castelberg National Jewelry Co., and one of Baltimore's most prominent jewelers, celebrated his 80th birthday, March 15, at his home, 2039 Madison Ave., by keeping "open house" from eight in the morning until 10 at night. In the afternoon a dinner was served for his entire family, at which all of his children, grandchildren and great-grandchildren were present. Mr. Castelberg can be seen at his place of business every day, notwithstanding his advanced age, enjoys the best of health, and is very active. He came to Baltimore about 60 years ago and established a store on N. Gay St. In 1888 he first included the instalment idea into his business and he has made such rapid strides since then that he claims the distinction of having one of the largest instalment houses in this country. He has established branches in Washington, Norfolk, Va., and Danville, Va. Mr. Castelberg has living seven children, 15 grandchildren and five great-grandchildren. He celebrated his golden wedding anniversary in 1905. His wife died in 1908.

GORHAM SILVER

WHAT EVERY WOMAN KNOWS

That the Gorham trade-mark is a certificate for Sterling Silver $^{925}/_{1000}$ fine, and needs no explanation to the recipient when sent as a gift; therefore, when a dealer offers solid silver bearing this mark the sale is readily made. How much better this is than trying to explain that some other make is "just as good."

Busy Convention Season Coming.

WITH next month the convention season of the associations in the retail jewelry trade practically begins, but it will not be in earnest until May and will then continue right up to the annual convention of the American National Retail Jewelers' Association in Detroit, Mich., July 26, 27, 28 and 29. A few States have already held their annual meetings, but among the first of those to come are those of the West Virginia association, which will meet in the McClure Hotel, April 5, 6 and 7, at Wheeling, and the New Jersey association, which will meet in Newark, April 13.

During May the Ohio association begins the month with its convention at Columbus on the 2d, 3d and 4th; the Oklahoma association at Oklahoma City convenes on the 9th; the Arkansas association at Little Rock, May 10 and 11; the Oregon association at Portland on the same dates; the Pennsylvania association at Philadelphia, May 19 and 20; the Illinois association at Springfield, May 24, 25 and 26, and the New York at Rochester, May 26 and 27. During June the Missouri and Kansas associations will have a joint meeting in Kansas City, Mo., June 20, 21 and 22, while the Iowa association will meet in the last week at Des Moines. Other association meetings in the same months will be the Virginia association, June 15, and the South Dakota association (the date of which has not yet been settled).

Among the organizations holding meetings in July is the Wisconsin association, whose members will convene in Milwaukee on the 12th, 13th and 14th, and the only association thus far recorded to meet after the National association is that the Maryland association, which will meet in Baltimore, Sept 14.

While there are other State conventions not enumerated above, it will be readily seen that the greater number of conventions will be held in May. From the apparent interest in association work there is little doubt that all the conventions will be well attended and will prove entertaining and profitable to all jewelers who participate.

Competition with Those Who do Not Pay.

DOES it ever occur to the enterprising and honest merchant who pays his debts that the interests of the manufacturer and jobber in the questions relating to credit are to a certain extent identical with his own? Does he realize fully that the dishonest or incompetent merchant does more harm in the end to the retail trade than to the wholesale trade from which he buys? If not, a slight consideration of the subject will show merchants that these propositions are self-evident.

The incompetent and dishonest dealer who fails to pay his debts produces the worst competition which the retail jeweler has to meet. The jeweler readily understands that a catalogue or department store which buys its stock from five to 20 per cent. below the cost to him has the opportunity of playing havoc with his trade. But how about the merchant who settles his debts at from 10 to 50 per cent. Does he not pay from 90 to 50 per cent. less (for a part of his stock at least) than does the man who meets his obligations, and in addition does not the loss which the failure entails to the jobber and manufacturer tend to increase the price of goods to the rest of the trade? Did ever a department store or catalogue house do as much harm to a community as some of the bankruptcy sales of the stocks of its local dealers? Has the jeweler ever to meet worse competition than from the auction sale, or receiver's sale, that results from the future of his incompetent or dishonest competitor?

With these facts in mind, does not the retailer realize that it is to his interest to aid the manufacturer and jobber in establishing a proper basis of credit, and as much as possible discourage the incompetent or dishonest merchant to continue in the jewelry business.

New and profitable business will come to you through an intelligent use of our advertising columns.

Protection Afforded by Trade-Marks.

IN an editorial last week attention was called to the value of a trade-mark as a means of identification, and the time it saves both to manufacturers and jewelers who make and sell articles with these marks of identification. Another feature of the trade-mark subject which can be studied with interest and profit both by manufacturer and retailer lies in the protection which the trade-mark alike affords to both maker and seller. In fact, one of the most effective means that the manufacturer can use to protect his customers from competitors among department stores, catalogue houses, etc., is by the use of a trade-mark on the product which he sells to the retail jewelers, and seeing to it that none of the lines so marked go into illegitimate channels. It is not necessary that the public be familiar with the trade-mark and know the manufacturer which it represents in order to insure protection by its use. The mere fact that it is there gives the line a distinguishing feature that is sufficient to accomplish the object.

No jeweler can get along without handling certain lines which, in style, size, shape and general appearance are similar to the lines carried by department stores and catalogue houses, and even by the novelty stores. The jeweler knows clearly the difference between the lines he carries and those that are sold in other stores at lower prices, but sometimes it is hard to educate the customer so that he can see this difference himself easily or understand it except after a long explanation. However, when a jeweler handles a standard article made by a manufacturer of reputation who sells to the jewelry trade alone it is easy for him to assure

He had been ailing s wife was killed at his side in the i the Brewster Express at Wood- n, eb. 16, 1907. The deceased is sur- d eight small children.

reditors of Robert Corn, formerly a le jeweler at 37 Maiden Lane, who was adjudicated a bankrupt Feb. 11, are notified that the first meeting of the creditors will be held at the office of Nathaniel A. Prentice, referee in bankruptcy, 120 Broadway, on April 5 at 12 M., at which time the creditors may prove their claims and appoint a trustee and transact such other business as may come before the meeting.

One of the finest town clocks on Long Island, the gift of Miss Cornelia Prime, will surmount the top of the town hall now in the course of construction at Huntington, L. I. Barr & Willis, local jewelers, have placed the order with the Seth Thomas Clock Co. It is intended to have the clock in place by June. The clock will be illuminated. The bell, which will weigh 800 pounds, will be of the best quality copper and block tin and the clock throughout of fine construction.

Through the efforts of the Fifth Ave. Association, whose membership includes a number of prominent jewelers, the brilliant illumination of all the shop windows between 38th and 29th Sts., was tried one night last week. The specially designed reflectors made that part of the avenue much more attractive than usual. The association has in view the making of the avenue as popular a boulevard by night as by day. The windows in both the first and second stories of the shops were brilliantly lighted.

Theodore Schisgall, importer of clocks, 116 Chambers St., who returned from Europe recently, as noted in the last issue of THE JEWELERS' CIRCULAR-WEEKLY, was presented, upon his return, with a large floral horseshoe five feet high, and when he reached his office he was welcomed by the ringing of 500 alarm clocks. He was also the guest at a dinner at the Hotel Astor, which was attended by 35 people, among whom were Godfried Kensler, foreign representative of the firm, and A. Goodman, president of the Lane Clock Co.

Edward R. Cohn, who has been in business at 41 Maiden Lane, for a number of years, gives up that business May 1. Louis H. Gura will succeed to the business, which will be conducted after that date under the firm name of L. H. Gura & Co. Mr. Gura has been with Mr. Cohn for 12 years past. Mr. Cohn has been elected president of the Universal Operating Co., which controls warehouses in the Bronx. He will also devote some of his time to the real estate business in which he has also previously been engaged. He has just returned from Florida.

Maurice C. Dreshfield, who was implicated in transactions with George H. Carpenter, by which diamonds amounting to nearly $200,000 in value were obtained from Rudolph A. Breidenbach, 51 Maiden Lane, under circumstances which did not meet with Mr. Breidenbach's approval, has filed his petition, verified Jan. 13, 1910, praying for a discharge from his debts in bankruptcy, and a hearing on the petition will come up before the United States District Court Monday, March 28, at 10.30 A. M., when the creditors will be given a chance to show cause, if any, why the petition of the bankrupt should not be granted.

The Metropolitan Museum of Art issued, last week, a supplement to its March *Bulletin*, in celebration of the opening of the new wing of decorative arts. The opening of the new addition celebrates the 40th anniversary of the founding of the museum. Charles F. McKim, who died too soon to see the full efforts of his labor, designed the new addition to the museum. This is the first part of the museum building which has been planned with a definite knowledge of, and with a direct reference to the collections it was to contain. The two most important groups in the sculpture section are the works of the Italian Renaissance placed at the south end of the hall and the French works of the middle ages at the north end of the hall. With the Italian sculptors are placed Spanish, and with the French are those of Germany and the Netherlands.

Small medals commemorative of the Alaska-Yukon Exposition were decided by the Board of United States General Appraisers, last Wednesday, to be dutiable as manufactures in chief value of metal and dutiable at 45 per cent. and not as "jewelry" at 60 per cent. The claim for the lower duty was made by the Asiatic Export & Import Co. The merchandise consists of so-called antimony, brooches and scarf pins intended for distribution for advertising purposes. The articles are not to be worn as ornaments, but as badges. In sustaining the importer's contention General Appraiser Sharretts said that the articles are local in character and designed for use for a limited period, after which they will no doubt be cast aside as worthless. Neither commonly nor commercially would the merchandise be known as jewelry, says the decision.

At the regular monthly meeting of the Jewelers 24-Karat Club, of New York city, held at the rooms of the club in the Silversmiths' building, 15 Maiden Lane, last Wednesday, the recommendation of the directors that the club should hold its annual beefsteak dinner on Tuesday, April 12, was adopted. It has now been decided that the dinner will be held at Castle Cave on Seventh Ave., between 25th and 26th Sts. The dinner, which will begin at 6:30 P. M., will be complimentary to members of the club and members only. The committee appointed to have charge of the dinner includes Leo Wormser, chairman; Charles L. Power, Wm. I. Rosenfeld, Charles Jung, Percy H. Savory. The dinner will be held in conjunction with the regular April meeting. At the meeting last Wednesday it was also decided to hold the annual outing and clam bake of the club, which is one of the chief social events of the Summer season, at the Hotel Port-au-Peck, Long Branch, N. J., Saturday, July 23. The following committee has been appointed to take charge of the outing: William T. Gough, chairman; E. R. Crippin, George R. Whitehead, George R. Stebbins, L. H. Carpenter. The athletic committee is made up as follows: J. Warren Alford, chairman; Harry C. Larter, T. Allen Power, Prosper Clust and Jerry Milleman. One of the principal athletic events will be the baseball game by teams representing the 24-Karat Club and the Philadelphia Jewelers Club. The date for the next annual banquet of the club has been decided on as Jan. 19.

F. Robbins, Springfield, Mass., and J. F. Kahl, of the F. A. Robbins Co., Pittsfield, Mass., were visitors at the offices of THE JEWELERS' CIRCULAR-WEEKLY last week. F. A. Robbins, who conducts his own store at Springfield, is the head of the F. A. Robbins Co., Pittsfield.

Arthur Silberfeld, a diamond importer, 129 Second Ave., returned from Europe last week on the *Kronprinzessin Cecilie* from a business trip. While abroad he became engaged to Miss Regine Silberfeld, of Antwerp, Belgium, daughter of John Silberfeld, a diamond dealer. He will return in June to be married.

The L. Witsenhausen Co. has been taken over by the Wm. Purnell Co., and in the future the concern will be known by that name. The Wm. Purnell Co. is composed of Wm. Purnell, who for the past 16 years was associated with the Wm. Penfold Co., and E. Webber and T. D. Politzer, both having been with the L. Witsenhausen Co.

An involuntary petition in bankruptcy was filed in the United States District Court of New York Friday against Benjamin Hebald, a jeweler's and pawnbroker's sales store at 206 Bowery, by three creditors: Goldmuntz Bros., $500; Rubin Samuels, $250, and Charles E. Bodker, $250. It is alleged that the jeweler is insolvent and made preferential payments of about $1,000 and transferred outstanding accounts of about $1,500. Judge Hough appointed Harry Osterman receiver of the assets, which are estimated at about $1,000. The jeweler has been in business about seven years.

A voluntary petition was filed last Thursday in the United States District Court by Edward Bueb, a watchmaker and jeweler, at 382 Willis Ave., the Bronx, with schedules showing liabilities of $1,513 in unsecured claims and assets of $900, in stock and tools. Among the unsecured creditors named in the petition are: Laubheim Bros., $784; R. L. & M. Friedlander, $220; L. S. Meyer & Bro., $140; John Keller, $106; Joseph Goetz, $240, and the American Swiss Watch Co., $22. Mr. Bueb was originally employed at the bench and in 1890 opened up at his present address on his own account.

Articles of commerce included in the jewelry trade which were exported from and imported into the United States during the month of January, 1910, as compared with the same period in 1909, are given as follows from a recent report: Imports—Watches and clocks, $140,348 in January, 1909, and $164,272 in January, 1910; gems and precious stones for January, 1909, $2,175,505, and January, 1910, $4,308,498; diamonds for January 1909, $274,209, and for January, 1910, $915,193; jewelry for January, 1909, $88,983, and for January, 1910, $129,674. The list of domestic exports include the following figures: Jewelry in January, 1909, $1,035,743, and for a corresponding period in 1910, $1,395,393.

A voluntary petition in bankruptcy was filed Saturday in the United States District Court for the Eastern District, Brooklyn, by Meyer Brown, a jeweler of 676 Manhattan Ave., Brooklyn, showing liabilities of $1,252 and nominal assets of $229 in book accounts. The unsecured creditors named in the schedule are: J. R. Wood & Sons, $41; Henry Schade, $31; Sabsevitz, $37; Stern & Corn, $61; Saffir Bros., $140; A. Sunderof, $29; Pimsler Bros., $28; Lenox Watch Case Co., $34; Korones Bros., $46; Kahn & Bernslein, $21; Leon Hirsch, $67; Freudenheim Bros. & Levy, $309; Fine Bros., $94; Berland & Nadler, $42; Aisenstein & Woronock, $56; L. Dolgin, $73; Fromm Bros. & Statsinger, $50; Jacob L. Goldberg, $85. The matter has been referred to Robert F. Tilney, referee in bankruptcy.

J. L. Gonard, Coytesville, N. J., who has a place of business at 2784 Broadway, has been granted a patent for concave cut diamonds. The object of the invention is to secure increased brilliancy in the cut stone. The invention consists in a new form of cutting with a concave table or facet whereby the surface of the table or facet is increased over the plain surface heretofore used, and a better reflection obtained. The concave table shown in the form of a hyperboloid may be of any other suitable concavity, which enlarges the superficial surface of the table or facet and increase the reflecting surface thereof. The concave table or facet is formed by grinding with diamond dust, oil and a suitable tool. The patent, which was granted Jan. 18, 1910, under No. 946,939, was noted in THE JEWELERS' CIRCULAR-WEEKLY, a short time ago.

An argument was heard last Friday in the United States Circuit Court of Appeals in the case of the Dey Time Register Co. against the W. H. Bundy Recording Co. The argument was the complainant's appeal from a final decree of the Circuit Court for the Northern District Court of New York, which dismissed the bill of complaint in the patent infringement suit. The ground for dismissal was non-infringement. The bill of complaint charged infringement of certain claims out of a total of 66 claims of the patent. The patent under litigation is for a time recorder and was issued March 28, 1905, and was assigned to the complainant later. The chief object of the patent is to register different classes of impressions in distinguishing colors, that is to say, it is designed that workmen coming or going at prescribed hours shall have cards or record sheets printed in one color, but those who come late or leave early shall have theirs printed in another color. Decision was reserved by the court.

The Appellate Division of the Supreme Court in Brooklyn recently handed down a decision affirming the judgment for the defendant in the case of Loveland and another, trading as the Moline Jewelry Co., against John Hess, Port Jervis, N. Y. Mr. Hess was an agent of the jewelry company and in December, 1904, entered into an agreement by which the company was to place a quantity of its jewelry in the former's store for the purpose of sale. The goods, not proving satisfactory to Mr. Hess, he returned them, whereupon action was brought to recover the purchase price. The jewelry company claimed that there was an actual sale and delivery of the goods to Mr. Hess, which he denied, claiming that the goods were to be placed in his store simply on a commission basis. The case was tried before Justice Tompkins and a jury, who rendered a verdict in favor of the

(*New York Notes continued on page 88.*)

New York Notes.

(*Continued from page 87.*)

defendant. The jewelry company took an appeal to the Appellate Division, which affirmed the judgment appealed from.

L. & B. Lehr are offering to settle at 25 cents on the dollar.

David Hartsilver has been succeeded by Hartsilver & Silverberg.

Schedules in the assignment of Rein & Green, manufacturers of umbrella handles and walking sticks at 416 W. Broadway, show liabilities of $2,231 and nominal assets of $2,171.

The Acme Plating Works, which were burned out last week at 17 John St., have opened temporary quarters at 1838 Madison Ave., where the business will be conducted until a permanent location is secured.

Arrangements are completed for the first annual beefsteak dinner of the Jewelers' 14-Karat Club of New York, which will be held Saturday evening, April 9, at Reisenweber's, Columbus Circle. It is expected that the affair will be well attended.

Judge Hough, in the United States District Court on Monday, confirmed a composition of E. Alter & Son, pawnbrokers, 309 Third Ave., with their creditors on application of Lesser Bros., who said that the compromise was 25 cents on the dollar, half cash and half notes. The liabilities were $26,033.

A settlement at 20 cents on the dollar in cash, which was made by the Union Watch Co., formerly at 47 Maiden Lane, was confirmed Monday by Judge Hough in the United States District Court. The schedules in bankruptcy showed liabilities of $23,746, of which $9,970 was secured, and nominal assets of $5,033.

Raymond Jacobs, the clerk who left the employ of Barr & Willis, Huntington, L. I., very suddenly on Aug. 31 last, taking with him diamonds valued at $175 and $125 in cash, which he had been entrusted with to deposit in bank, was taken into custody last Wednesday by a local officer at his parents' home in Bayside. Young Jacobs and his companions were long since given up for dead. They went out in a sailboat one very windy night, and it was supposed they were lost on the Sound. At the hearing last Friday Jacobs waived examination, and was held for the Grand Jury, but was released under bonds furnished by his mother.

The Hope diamond came into the limelight again last week when a New York paper pubished a silly story cabled to the effect that attempts to recover the stone, made by divers who visited the wreck of the French liner *La Seyne*, which sunk in Rhim Straits, about 10 miles from Singapore, had failed. Another cable under date of last Saturday, stated that the diamond was bought by a Paris jeweler named Rosenau when the Habib collection was sold. The report also said that the gem had been sold to an American collector. The diamond was sold to Rosenau, the Paris jeweler, and an offer was later made for its purchase from him, but those in this city who are closely in touch with the matter doubt that the diamond has as yet been sold.

Newark.

Frank Holt, who spent several weeks in Florida, has returned.

C. Rech & Son, 481 Washington St., who previously have confined themselves to the manufacture of gold chains, are now adding pendants and La Vallieres to their stock.

The W. C. Edge Jewelry Co. has moved from its old factory at 46 Green St. to 480 Washington St. As soon as the machinery can be installed work will begin with 35 workmen.

Otto Schaunbacher, who has been installing new works at 32 Marshall St., has already started a few men and will gradually add others until the plant is running at its full capacity.

Fred T. Long, representing Allsopp & Long, 473 Washington St., has just returned from a short trip to Baltimore, Washington, Wilmington and Philadelphia. F. C. Allan, of the same firm, is visiting nearby towns.

George S. Weiss, of the firm of Frederick B. Weiss, Inc., 473 Washington St., has just returned from a trip through the middle west, where he found business rather slow. J. N. Beckwith, of the same firm, who recently made a tour of the New England States, is now covering Ohio.

Articles of incorporation for William Harris & Sons, Dover, N. J., have been filed in the County Clerk's office. The company intends to conduct a jewelry store in Blackwell St., Dover. The incorporators are: William Harris, William C. Harris, Annie Harris, Kate Harris and Alfred T. Harris, all of Dover.

Because the store occupied by S. Seff, 119 Market St., has been leased to another and he cannot secure suitable quarters elsewhere, he is going out of business. The stock will all be sold at auction by Harry J. Fischer. The sale began last Saturday and will continue until the stock is all sold. The store must be vacated by May 1.

Harry Durand, one of the leading jewelry manufacturers of this city, is among those whose names are signed to the amended certificate of incorporation of the Newark Museum Association which has just been filed in the office of the county clerk. The purpose of the amendment was to change two paragraphs of the original papers. The certificate calls for the election of 50 trustees.

Schmitz, Moore & Co. are moving from 18-20 Columbia St. to 101 Mulberry St., where they will have four times as much space as at the Columbia St. situation. New machinery is being installed and when the new factory is in full operation twice as many hands will be employed as in the old place. Eli Soloman, representing the firm, will start about April 1 for a trip to Chicago and the middle west.

The store of S. Neubarth, a retail jeweler at 72 Springfield Ave., has been closed for over two weeks because of an explosion and fire in an adjoining building. The explosion caused the building next to the one occupied by the jeweler to collapse and the fire spread to the building in which Mr. Neubarth was situated. Although the damage to this building was not great it was found necessary to close until after an adjustment by the insurance companies.

Leo Marks, who recently sold the business that he conducted at 170 Mark St. Ronaldo & Tigner, New York, ha[ve] a new store at 80 Market St. He [con]ducted business at the former stan[d] past four years. Ronaldo & Tig[ner] have purchased Mr. Marks' [two] stores in New York city at 42d [St.], Fifth Ave., 52 E. 23d St. and at 51 St., Brooklyn. William Sma[ll] secured to take charge of the N[ew]

Leo Slonim, who keeps a jew[elry] on West Front St., Plainfield, N. [J.], closing his safe door on Satur[day] March 12, noticed six holes dr[illed] side of the safe. The police [were] but no trace of the thieves w[as] them could be found. It is [be]lieved they escaped through a tr[ap] the floor and the adjoining c[ellar]. was more than $10,000 worth of jewelry in the safe and $1,000 in checks.

John Bach, 216 Washington St. and clock maker, has taken the agency for a new clock which [is] on the market by P. G. Gr[ee]n of St. The new invention, which [it] is a cathedral wall clock. The scroll work and is made of ebo[ny] in black. The figures on the [dial] hands are finished in gold. The an American movement, runs eight has a cathedral bell. The [clock] inches and it is 11 inches wide six inches in diameter.

Albert Auschutz, a jeweler who raigned in the Court of Q[ue]r[ies] No. 1, several weeks ago [on a] of embezzlement, was sentenced Ten Eyck, March 14, to serve [in] the Caldwell penitentiary. He was dered to pay a fine of $1[00]. pleaded guilty, but asked for cl[e]m the ground that he was under the of liquor when he committed t[he] The man obtained jewelry from manufacturers for the purpose of but after disposing of it found the proceeds. Some of the jewelry pawned.

Twelve games were played [on] the 12 which will be played to close the first annual competition Jewelers' Bowling League. On March 14, the Crescent Watch won four games straight, the team senting Kohn & Co. won two [and] and the team representing Allsopp lost four straight. On Tuesday ing, March 15, the team represen[ting] Howe & Co. won four games s[traight] team from J. A. & S. W. Gr[ee]n two and lost two and the first Bippart, Griscom & Osborn straight.

The Board of Supervisors [of] County, Ia., have just awarded for a new clock to be placed in House at Newton. The clock $1,800.

A large electrically-operated just been installed in the Wilkes posit and Savings Bank, Wilkes The clock was made by the Se[th] Clock Co., of Brooklyn. The inches in diameter and will be at night.

Bailey, Natick, who was sen- a few days ago for some clever jew- ing in Boston, Lowell and Cam- was identified in connection with of the transactions as having sold his Lowell loot for old gold in a jewelry store.

rd Jackson, salesman for E. A. with the aid of his father and a has just completed the building of oter cabin power boat, which will be commission this Spring. It will be a 20-horsepower motor. The craft he unique name of *Pop & Us*.

Waltham Watch Co. shut down 22. The annual stock-taking will be way during this period, it is an- d, although it is understood that nent of production, as in the previous e, is responsible for the length of until April 4—that the establishment closed.

ams Evans, alias Frank Lewis, who rested two weeks ago on the charge mpted larceny of a watch in the store ph A. Williams, 333 Washington St., s subsequently released on $300 bail, faulted last Thursday in the Munici- rt, and a default warrant issued. He ed to answer other charges.

New England Jewelers, B. S. Gains- manager, remove this week from the floor in the Jewelers' building to 54 and 55 on the fifth floor, form- a part of the quarters occupied Waltham Watch Co. and Rob- Appleton & Co. This is the third al by Mr. Gainsborg since he located building, each change being necessi- y the growth of the business and its ds for more room. In his new place have considerable more floor space, the interior having been remodeled especial- ly for his occupancy.

There is a romance in connection with the relinquishment of her position as steno- grapher with the Smith-Patterson Co. by Miss Georgia E. Messinger, which interests her numerous fellow employes greatly. Miss Messinger, who resides in Everett, is to wed, in June, the Rev. Donald C. McCallum of that suburban city, and go with him to the Philippines to engage in missionary work. They will visit Australia, Mr. McCallum's native country, en route, and re- main there a few months before proceeding to Manila. Miss Messinger has gone to New York for a preparatory course of study in mission duties. Her associates in the store presented to her a handsome black seal travel bag, with silver toilet acessories, and the firm gave her a folding-case trav- elers' timepiece.

Traveling men in town during the week included: John L. Shepherd, Keystone Watch Case Co.; Percy H. Savory, Wads- worth Case Co.; Joseph Mayer, Marchand Freres; Louis Nordlinger, L. & M. Kahn & Co.; John W. Sherwood, Solidarity Watch Case Co.; Charles Conant, Conant & Kellar; V. L. Burgesser, Krementz & Co., Julius G. Hall, Carrington & Co.; L. F. Clark, Cory, Clark & Noon; Harry C. Ward, Durand & Co.; S. A. Lynch, W. B. Kerr & Co., George A. Jochum, C. Cornehl- sen; Frank F Keller, Keller Mfg. Co.; Wil- liam Kirtland, Howard & Cockshaw; Mr. Lee, Lee, Dodd & Co.; H. W. Anderson, Bride & Tinckler; Ed. Colby, Towle Mfg. Co.; Mr. Perley, Perley Bros.; John Cur- ran, A. J. Hedges & Co.; Mr. Dreher, King & Dreher; Jean Bowles, Edward Van Dam.

Buffalo, N. Y.

Among the jewelers who recently visited the Buffalo market were: A. M. Thomas, Niagara Falls, and C. D. Barnes, Gowanda.

A. B. Warner, of White, Wile & Warner, is covering western territory for that firm. At present he is in Washington. H. H. Wile is in North Carolina.

A bronze tablet in memory of Calista Selina Jones, who was employed as a teacher for nearly 60 years in the public schools of Chautauqua County, was recently unveiled in the Jamestown, N. Y., high school.

A complete description of the process of engraving and the historical development of the art was recently given by Willis O. Chapin at St. Margaret's School. The talk was illustrated by lantern slides. Mr. Chapin spoke also of the great engravers themselves and of the influence they had upon the history of art.

Among the travelers who recently visited the Buffalo jewelers were: A. B. Barnes, H. M. Quackenbush; Mr. Lintoy, E. H. H. Smith Silver Co.; Clayton Shep- perd, Krementz & Co.; Henry E. Hart, Albert Lorsch & Co.; H. C. Schneider, Edward Todd & Co.; A. T. Teague, Link & Angell; W. H. Young, Simpson, Hall, Miller & Co.; and C. Morgan, Rogers & Bro.

Albert Weisenburg and Edward Hoefler have formed the firm of Weisenburg & Hoefler, manufacturing jewelers. They have equipped a factory in the Realty building, Main and South Division Sts. Mr. Weisenburg, who has been in the jewelry business for 20 years, was formerly em- ployed by White, Wile & Warner. Mr. Hoefler, who has had 12 years' experi- ence, recently worked for Heintz Bros.

Byron G. Richards, New York, has taken charge of C. F. Chouffet's optical depart- ment, which has been considerably en- larged. Mr. Chouffet's show window, which contains attractive jewelry and deco- rations for Easter, is drawing much at- tention this week. Light purple silks and velvets, smilax and the miniature figure of a woman dressed in the height of Parisian fashions are among the features of the display. There is also a large sign: "Easter, 1910."

Harry S. Palmer, a jeweler of Seneca Falls, recently filed a bankruptcy petition in the United States Court, this city. His debts amounted to $1,131.86, and his assets are scheduled at $2,350.20, which includes a $1,300 insurance policy. Among his credi- tors are King & Eisele and the Queen City Ring Mfg. Co., Buffalo; Arnstine Bros. Co., Cleveland, and W. P. Hitchcock Co., Syracuse. The amount of their claims are not heavy. The personal property of the bankrupt includes jewelry in stock valued at $500. In his petition Palmer says he kept no books in connection with his business, conducted his transactions on a cash basis and made a loose memoranda of bills payable.

Buffalo optometrists and jewelers who have optical departments in connection with their places of business are interested in a resolution recently introduced at a meet- ing of the Board of Aldermen by Alderman Burley, of this city. The resolution directs the health commissioner to prepare an ordi- nance to provide for inspection of children in the public schools with a view to de- termine whether or not there is a pre- valence of defective eyesight and to pro- viding the necessary treatment for the pre- vention or removal of such defects. The ordinance probably will eventually contem- plate the employment by the city of an oculist and the treatment of school children whose sight is impaired or defective.

A burglar recently broke into the front window of the jewelry store of S. S. Pren- tiss, of Lockport, N. Y., and stole jewelry valued at about $100. The stolen articles consist of six gold bracelets, one ladies' gold necklace and one ladies' gold watch chain. The burglar escaped. The burglary occurred on Main St., under one of the city's electric arc lamps and within a block of police headquarters, shortly after 5 o'clock. The burglar kicked in the window, reached his hand in through the hole and secured the jewelry. Mr. and Mrs. Prentiss who were asleep in a room at the rear of the store at the time, heard the crash of glass and the jeweler went to the door leading into the store, and saw a man running down through the alley. Listo Catardi, an Italian, was later put un- der arrest, a piece of jewelry found on the fellow having been identified by Dr. Prentiss as one of the articles stolen from the place. Catardi, however, denies the charge of burglary and claims that he bought the piece from a man on the street. He was held for the grand jury.

About Choosing Your Own Stock

THE INTEREST the manufacturer has in the jobber is simply because it is through him that the Retailer is reached. Any attempt, therefore, to restrict the jobber, to limit him, to tie him down to certain lines, is really aimed at *you.*

¶ The reputation of your store has been mainly due to the nice discrimination you have shown in the choice of stock. In a sense, your *personality* has expressed itself in the nature of your displays; and the store has been essentially *your* store. Will this continue to be true if outsiders, strangers to you and to your interests, be allowed to control the primary markets and arbitrarily dictate what shall and what shall not be sold?

¶ The principle is the same whether it is applied to Watch Cases or to anything else. Your welfare lies in maintaining free choice in an open market. Suppose—just for argument—that a clique of ring makers undertook to *compel* you to sell only *their* products, good, bad or indifferent. You would resent the idea. Uphold the right to *choose your own stock* by dealing with an independent source of supply.

F. Elsenhans, one of the oldest
f Riggs & Bro., died at his home,
Mr Elsenhans was in his 57th

lisard, with John F. Blisard &
nsom St., will leave, next week,
for a three weeks' trip through Pennsylvania.

David Gutekunst, an old employe of Joseph B. Bechtel & Co., has started out with a sample line and will cover nearby towns.

Andrew L. Smith, traveling for L. P. White, has returned from a successful business trip through Baltimore and Washington.

Judgment was entered, last week, in the local courts by Annie and Max Hamberg against the Manufacturing Jewelry Co. for $273.58.

Philip Jacoby, well-known jeweler of Montana, will be here, next week, on a purchasing trip. Mr. Jacoby will also visit New York.

E. P. Percival, retail jeweler, is recovering from a serious sick spell, and hopes soon to again start in the jewelry business at 8th and Race Sts.

H. M. Fitton, for many years associated in the jewelry business at Atlantic City, has the sympathy of the trade owing to the death of his wife, March 13.

The Albertson-Cook Co., Bridgeton, N. J., which succeeds Edward C. Albertson, has been incorporated with a capital of $25,000, of which $10,000 is paid in.

John S. Cunningham, representing the E. L. Spencer Co., Providence, R. I., is in this city for a brief stay, and will shortly start on his regular trip through the west.

Maxwell & Berlet, Walnut and 16th Sts., are the designers and manufacturers of the Michell and Kleinhenig cups made for the National Association of Gardeners convention.

Preparations are being made for the first annual banquet for the Wholesale Jewelers' Association, of this city, which is to take place Monday evening, March 28, at the Union League.

Richard M. Cooper, 721 Sansom St., who has been visiting his daughter at Joliet, Ill., is convalescent from a recent sick spell. Mr. Cooper is one of the oldest Odd Fellows in the State.

E. J. Berlet, president of the Walnut St. Business Association, declined, last week, to serve on the committee appointed by the United Business Men's Association to work for arbitration of the trolley strike.

The stock and fixtures of E. Jaschik, retail jeweler, 2137 N. Front St., who was recently declared a bankrupt, were sold at public sale, Thursday, March 17. It is Mr. Jaschik's intention to start again in the same location.

In the fire, Saturday, which destroyed $12,500 worth of Boardwalk property at Atlantic City, N. J., police reserves placed a heavy guard upon a nearby jewelry establishment, said to contain jewelry to the amount of $75,000.

Charles M. Marks, well known to the police of this city as the Fagin of a gang of boy thieves, was sentenced, last Friday, by Judge Barrett to two years' imprisonment for receiving stolen goods. Four of the youthful gang testified that Marks put them up to stealing and was the fence for all the articles they stole.

Harold Strayer, employed as a salesman by the Bailey, Banks & Biddle Co., was recently held under $800 bail, charged with the larceny of a diamond ring, gold watch and chain, valued at $350, belonging to the firm. The detective who arrested Strayer said the salesman had made a confession of his guilt to a member of the firm and had surrendered the stolen property.

The Bailey, Banks & Biddle Co. has on display in its window, this week, the solid gold loving cup, known as the Penton Trophy, made and designed by this house for John A. Penton, and which is to be presented to the winner of the Niagara Rapids contest for power boats. On the face of the cup is the inscription, "Shooting the Whirlpool Rapids at Niagara." The crossed flags of the United States, beautifully enameled in colors, is an attractive feature.

The following jewelers were visitors to this city during the week: M. E. Hunter, Beverly, N. J.; Vernon L. Phillips, Smyrna, Del.; R. W. Quicksall, Mount Holly, N. J.; Roland Oliver, Burlington, N. J.; D. H. Krause, North Wales, Pa.; E. K. Bean, Lansdale, Pa.; H. B. McFarlan, East Downingtown, Pa.; G. Diener, Harrisburg, Pa.; E. Kerper, Pottstown, Pa.; B. B. Topping, Milford, Del.; E. W. Carter, Glassboro, N. J.; Thomas Trapp, Trenton, N. J.; John Kirschnek, Media, Pa.; B. C. Foster, Bristol, Pa.; H. Frank Freeman, West Chester, Pa., and E. L. Thomas, Phoenixville, Pa.

Washington, D. C.

Bradley S. Dixon, 717 8th St., S. E., has been presented by his wife with a bouncing boy.

John Hanson, representing the firm of Schmedtie Bros., has been admitted to the local Chamber of Commerce.

Among the traveling men here last week were: Charles Mittlekauf, Bawo & Dotter; Mr. Leopold, H. O. Hurlburt & Son.

Mrs. S. W. Bolling, mother of Mrs. Norman Galt, was badly hurt by her automobile, which turned turtle after running into a street car, recently Mrs. Galt, who had been driving the auto, left it to go into the store (Galt & Bros.), leaving the car at the curb. Shortly after, some freak of the mechanism caused the car, with no one at the steering gear, to jump forward, and the accident followed. The auto was completely demolished. Mrs. Balling was taken to the home of Mrs. Galt in a semi-conscious condition.

Victor E. Desio & Co., 1107 F St., N. W., recently put on exhibition in their show window several hundred carats of semi-precious stones, including malachite, azurite-malachite, variscite, labradorite, turquoise matrix, etc., in the rough and in various shapes and sizes. This attracted considerable attention by the public and also excited the interest of Douglas B. Sterrett, who prepares the precious stone reports of the Geological Survey, and he found among the specimens exhibited several that he had not heretofore seen in his travels.

The Detroit police have been zealously seeking Wm. Schmidt, or Kleinschmidt, an itinerant clock mender, whose brother died in Chicago, Feb. 24, and left him a store and business in Grand Ave., that city. The establishment is valued at $10,000. The missing man, according to late reports, has been located.

NEVER before in the history of our Company has there been such a large demand for Railroad grade movements of our manufacture. The reputation they have established among Railroad Men as being the "Supreme Railroad Watch" is due entirely to the careful attention given to every detail of their manufacture.

We suggest the advisability of having in stock a few of each of these grades in order to meet the demand that is constantly increasing for them.

The following jobbers carry a complete line of Illinois Movements and can promptly supply your wants:

nas Singleton, Chicago manager for D. Bergen Co., has been confined to ne the past week by illness.

h Bros., Newark, N. J., have opened ce here in room 1016 Silversmiths' g, in charge of R. V. Jones.

r Coe, 74 State St., will open a optical store at 7 E. Jackson Boulethe Railway Exchange building.

ng the diamond men here, last week, Sig" Stern, Stern Bros. & Co.; "Cy" nd Harry Adler, Chas. Adler's Sons.

Hammond, jewelry buyer for the an Bros Co., San Francisco, Cal., d over in this city, last week, on his st.

n Bros., retail jewelers at 1574 Mile Ave., will soon remove to their new quarters on the same street, near California Ave.

R. F. Prochnow, of the Fort Dearborn Watch & Clock Co., accompanied by Mrs. Prochnow, is spending a week at Eureka Springs, Ark.

George W. Cureton, of the Newall Mfg. Co., returned from the Pacific Coast, last week, and is now on a trip to the factory at Newark, N. J.

John Braunde, with the Keller Mfg. Co., returned from a western trip, last week. Frank Shinn, with the same concern, is on a southwestern trip.

Leon D. Weiss, said to be a jewelry dealer, living at 846 Barry Ave., has reported to the police the loss of a wallet of loose and mounted diamonds.

Chas. T. Manahan, manager for S. C. McKnight, has bought the stock and fixtures of H. W. Gilmore & Co., W. 63d St., and will close out the business.

Thomas O'Neil, charged by Emil Noel with larceny by bailee of a diamond brooch valued at $78, was acquitted by a jury in Judge Barnes' court, last week.

Glenn L. Seitz has returned from the east, where he secured the line of the Chapin & Hollister Co., which he will represent in Chicago and the middle west.

H. Mass, with the Chicago office of Stern Bros. & Co., has resigned his position to go with Mass, Oppenheimer & Diamond, of which firm his father is the senior member.

Word was received here that Fred M. Doan has bought out F. B. Tibbets, Hopkinton, Ia. The latter is postmaster of the town and also conducts a dry goods store.

The business of Egermann & Son, Aurora, Ill., will be closed out at auction and the firm will retire from the jewelry business to give their entire attention to the piano and music business.

Paul Korshak, charged with receiving diamonds alleged to have been stolen from Mrs. John W. Jenkins, of New York, was discharged by Judge Crowe, last week. The cases of Rosenthal and Harris, arrested with Korshak, are to come up this week.

John Burke, head of the optical department of Norris, Alister & Co., has resigned his position to become manager of the Pacific Optical Co., Seattle, Wash. He will be succeeded by Fred Maier, formerly with the Chicago branch of the Julius King Optical Co.

Isadore W. Wiggenhorn, son of August Wiggenhorn, retail jeweler of Watertown, Wis., was arrested here, last week, after an attempt to pass a $1 note which had been raised to $10. Wiggenhorn claims to be entirely innocent in this matter, and that he accepted the bill in good faith.

Alex. H. Revell & Co. have secured the contract for refitting the Chicago offices of the Alvin Mfg. Co. Not a piece of the old furniture will be used. All of the new fixtures will be of solid mahogany, and when completed the new showroom will be among the handsomest in the country.

G. J. Hansen, formerly in business at Council Bluffs, Ia., and lately traveler for the R. Wallace & Sons Mfg. Co., has opened a new jewelry store at 410 Broadway, Council Bluffs. Mr. Hansen will continue to sell for R. Wallace & Sons Mfg. Co., and will also carry a general line of jewelry on the road.

Schedules in bankruptcy of the Trinity Electric Clock Co. show liabilities of $30,085 and assets estimated as follows: Stock, $10,000; fixtures, $2,500; other personal property, $300; due on open account, $4,500, a total of $17,300. Very little is owing the wholesale jewelry trade, the exception being the Waterbury Clock Co., a creditor for $1,364.

Among the buyers in town, last week, were: R P. Kiep, Joliet, Ill.; E. Werder, Charles City, Ia.; Otto Zedler, C. Preusser Jewelry Co., Milwaukee, Wis.; E. L. Kling, Dixon, Ill.; Miss Ernst, K. Ernst, Danville, Ill.; A. Brown, Lincoln, Ill.; T. J. Dale, Kenosha, Wis.; J. H. Neds, Elkhart, Ind.; F. S. Ulery, Hoopeston, Ill.; Fred Overstreet, Paxton, Ill., and A. J. Munson, Tuscola, Ill.

Theodore Even, retail jeweler at 3209 N. Clark St., was robbed last week of three diamond rings valued respectively at $125, $80 and $75. The thief, who had been in the store before, entered at 7.45 on the night in question and told Mr. Even he was ready to make a purchase. A tray of diamond rings was set before him, and the stranger helped himself to three rings, ran out of the store and escaped.

Herbert W. Allen & Co. have distributed to their customers in the diamond trade in general a diamond figuring table entitled "The Allen Price Calculator," containing tables of diamond and other precious stone values in all fractional weights, from $1 up to $500. It is a perfectly printed book of 128 pages in a handy pocket size. Each fractional weight of a carat from 1/64 to 7/8 1/16 3/64 has a page of its own, and it is only the work of a second to find the

value of any stone from $1 to $500 per carat. The calculator has by this method improved on the old-style process, which reversed this order and necessitated taking more time looking up prices.

R. V. Jones, manufacturers' representative, is now settled in his quarters, room 1016 Silversmiths' building, where he carries the lines of Frisch Bros., Weizenegger Bros. and Otto Fessler & Co. Mr. Jones was formerly with C. L. Trout & Co., New York.

Jonathan William Brooks, founder and former vice-president of Pitkin & Brooks, died at Corpus Christi, Tex., last week, and was buried here Sunday. Of late Mr. Brooks had not been actively identified with the concern he helped to make one of the largest of its kind in the west. Funeral services were held at the Kenwood Evangelical Church, the Rev. John R. Crosser officiating. Deceased is survived by a widow and seven children.

Asserting that 50 per cent. of the cases of bankruptcy in the United States have in them at least a suspicion of fraud, D. L. Sawyer, of St. Paul, in an address before the Chicago Credit Men's Association, last week, advocated the establishment of a national fund to prosecute "professional debtors and bankrupts." Mr. Sawyer is a member of the National Association of Credit Men appointed to formulate plans for the investigation of suspicious bankruptcy cases with the object of prosecution. A national fund of at least $1,000,000 to be used by the credit men's associations in the investigation of such cases, he says, is needed, and suggests that every concern represented in the national body be assessed $10 a year for a period of 10 years. Each bankruptcy case having in it a suspicion of fraud can be investigated by the nearest local organization, thus removing the burden from the suffering creditors, who, in most cases, are unwilling to prosecute if they can reach a satisfactory financial settlement.

Detroit.

W. F. King, Jr., Adrian, was a buyer in this city, last week.

W. W. Bridges, Marine City, visited the wholesale houses, last week.

E. S. Barnes, Rochester, was in the city a few days ago to purchase stock.

A. H. Higgins has purchased the stock of the late J. F. Hendrick, Cass City.

F. J. Irwin, Marlette, brought his wife to Detroit, last week, for an operation at one of the local hospitals.

Charles W. Henry, who has been associated with W. A. Sturgeon, will likewise leave the jewelry business.

C. H. Keller, salesman for Noack & Gorenflo, returned to this city on Saturday, after a trip through the northwest.

F. A. Mathauer, of Mathauer & Koster, returned to this city on Saturday, suffering from a severe attack of the Grippe.

Wallace Kay has been at the John Kay & Co. store in the Majestic building since the first of the month. He has almost entirely recovered his health.

The Jewelers Board of Trade and Detroit Retail Jewelers' Club were entertained at luncheon last Wednesday by the Michigan State Telephone Co. After luncheon the members were taken through the central office, where they were shown the immense switchboard in operation.

Charles H. Reynolds, for many years the leading jeweler in Alpena, Mich., died suddenly, last week, of pneumonia. Of recent years he was engaged extensively in other lines of business, having acquired large timber interests. He was also a director of the First National Bank, president of the Alpena Telephone Co. and secretary of the Alpena Portland Cement Co.

W. A. Sturgeon, who has been in the jewelry trade in Detroit since boyhood, has left the business, and will go into the manufacture of automobile accessories. He has disposed of the stock of his "Parisian" shop in the Majestic building, selling the fixtures to James H. Garlick. As his business was largely a consignment one, Mr. Sturgeon has little difficulty in closing it out.

The Benfield Jewelry Co., 71 Woodward Ave., will shortly expand its business considerably. The adjoining store at 73 Woodward Ave., has been leased, and alterations will be made as soon as possible after May 1, so that the firm may occupy the entire three floors of the two stores as one mercantile establishment. The company will go more largely into the wholesale branch of the business than has been the case in the past.

J. H. Garlick has completed arrangements to open a store at 168 Grsiwold St. He will have to vacate his present place as soon as plans are completed for a new hotel and bank building, which is to be erected on that site. It is not yet determined at just what time the new store will be opened, but it will not be later than July 1. From that time until the Walker block, in which he is now located, is razed Mr. Garlick will operate two stores.

Claude Wheeler, secretary of the National Association of Retail Jewelers, was here this month to look after details with regard to the exhibition space in the Hotel Cadillac and to consult with the officers of the Detroit Retail Jewelers' Club in regard to convention arrangements. He found things satisfactory and to his liking. The Detroit Retail Jewelers' Club will hold its next meeting at Harmonie Hall, April 7, the formal meeting being preceded by a dinner.

Mrs. V. C. Morse, Ithaca, wife of the secretary-treasurer of the Michigan Retail Jewelers' Association, died, last week. Mr. Morse is receiving the sympathy of the trade in his loss. At recent conventions of the retail jewelers Mrs. Morse had always taken an active part in helping her husband with association affairs, and her ability and courtesy had won her the lasting respect and friendship of the members of the association. She had assisted Mr. Morse in the conduct of his store, being thoroughly familiar with the details of the trade.

Charles H. Blume is making extensive improvements in his store at 278 Front St., Marietta, O. The safe has been raised several feet from the floor and securely encased in a brick fireproof vault. A new system of electric wiring has also been installed.

Toledo.

The George Kapp Co. is co reorganization sale prior to instal marked with the new firm name signs of the company are amon attractive in the city.

The residence of M. Judd the Judd-Gross Co., and wh several months in Europe, w several hundred dollars' wor and silverware this week.

A. J. Heesen, who, May 1, w his new location at 315 Summ ducting a reduction sale C remodeling and fixing up he room have been let and work very nicely.

The jewelry and second-hand Boudrie, 619 Cherry St., was cently. The stolen goods c watches, rings and other art elry, valued at several hund Entrance was gained by forcing door.

Mr. and Mrs. B. H. Broer c 40th wedding anniversary durin week by entertaining about 40 f dinner. Numerous congratul and gifts were received from Br Y., friends, where Mr. and Mrs married.

The remains of Joseph Ise Toledo jeweler who died in Germ a month ago, reached this city past week. The funeral was hel late home on Glenwood avenue, ing made in Eagle Point Cemeter

I. Kopelman, probably the old broker in the city, has moved his is now located at 308 Summit furniture has been installed, a of new stock has been added, after the firm will do a regular s ness as well as a brokerage busin

The Toledo Council, headed b man Englehardt, who is interest project, is going to make an eff force its pawnbroker license law, recently been sustained by the preme Court. Now that the cit decision of the court on its side t to be no question but that the pa in this city will be obliged to license.

The Toledo police are on th for one of the shrewdest diamond elry thieves who has ever work vicinity. This is a woman wh both here and in Detroit. She ceeded in getting away with from $1,500 worth of jewelry in each a week. Coming to Toledo after had been notified by the Detroit d to be on the lookout for her, s ately rented a room in the dow trict and then secured employ home of E. L. Camp, known as and connoisseur of fine jewelry, 24 hours after being employed with $1,500 worth of diamond articles. After securing her calmly went to her room, secured gage and left, after telling the that she had been suddenly call home in Columbus, O., on acco serious illness of a sister

Cincinnati.

Andrews, of Richter & Phillips, from a six weeks' trip in West

Thoma, Piqua, O., Grand King of Kus, was calling on friends here

Albert, of Albert Bros., has re- rom a visit to his customers in and Ohio.

Gutmann, of L. Gutmann & Sons, rned from a six weeks' trip Nebr., Oklahoma and Texas.

Brumbaugh has moved from Mil- t Goshen, Ind., and expects to f the finest stores in that section.

Lockhorn, of the Clemens, O., has returned from Mt. Carmel, re he attended the funeral of Rush of Rush & Smith, last week.

Brasch, formerly with Ed. Cohen, of the Burma Diamond Co., has sub-jobbing business and has his ith W. F. Willman at 4th and

Northrop was here last week ock for the new store he is about in Lima, O., as he is contemplating al to that place from North Balti- about April 1.

Allenstem, of Wallenstein, Mayer & his wife, March 16 celebrated their ding anniversary by giving an enjoy- er to their immediate families and It was a small but brilliant affair gifts to the couple were many and The employes of the concern were dered a luncheon in honor of the on the following day.

rd J Fox, of the Gustave Fox Co., considerably bruised, is attending to as usual. Mr. Fox while motor- a high rate of speed on Gilbert shed into the wheel of an auto- The automobile was not in the maged, but the motorcycle was a wreck and Mr. Fox thinks he had culous escape as he was thrown et into the air. He is just at pres- eling on the street cars to and from ness.

ng his fortune in the far northwest, Bogaert, Jr., son of the well-known of Lexington, Ky., is on his way B sh Columbia. Mr. Bogaert will go Kamloops, B. C., where he will in- e lands with a view of purchasing a th fruit ranch. He is a lover of out- e and thinks that the prospects for in this line are better in the country he has gone than any other place. gaert, although only 23 years of age, eled extensively.

t-town jewelers in this city last kuying stock included: Herman A. ynthiana, Ky.; J. Anderton, Dayton, O. Ward, Rising Sun, Ind.; R. Tim- . Batesville, Ind.; I. N. Biddle, taine, O.; Frank Fullilove, Owen- .; M. B. Golden, New Castle, Ind.; d Mrs. J. W. Jones, Mt. Sterling, C. Diefenbaugh, Lewisburg, O.; Carroll, Lebanon, Ky.; A. H. Uhrig F Bryan, Gallipolis, O., and Mr. of Marlett & Baker, Middle- r).

Perea, Washington, D. C., is mak- ing a week's exhibition of a collection of artistic jewelry, including scarabs, amulets and talismans at the Frank Herschede Co. store. This collection is the result of many years of careful and discriminating selection by Signor Perea in Egypt and it has received the endorsement of the director of the Egyptian Museum of Lurin and of other eminent Egyptologists in America and abroad. Signor Perea does all of his mounting himself. He leaves here on March 26 for St. Louis, Mo.

Traveling representatives who called on the Cincinnati, O., trade during the past week included: F. E. Treibs, Treibs Bros.; Jules Franklin; R. B. Carr, Allsopp, Bliss Co.; C. Glander, J. D. Dalzell & Co.; J. W. McClannin, Wilcox Silver Plate Co.; William J. Anton, Durand & Co.; William Roman, Manasseh Levy & Co.; Abel King, Emrich, King & Schorsch; William J. McQuillin, Mount & Woodhull; Mr. Kelley, Tilden, Thurber Co.; J. F. Dean, Reed & Barton Corporation; Frank E. Delano, Van Dusen & Stokes Co.; A. H. Oakley, Thornton Bros. Co.; L. A. Rogers, Irons & Russell Co.; Mr. Kellsey, Harris & Harrington; John A. Abel, Abel Bros. & Co.

The opening of the Oskamp Jewelry Co.'s new store at 7th and Race Sts., March 15, was in every way a success. The store, so rich and beautiful in appearance, was made especially attractive by magnificent floral decorations. Aside from the regular display of flowers quantities of handsome pieces and loose flowers were sent the company by friends, all of which made the place look like a June garden. The employes furnished a large horseshoe in American beauties which occupied a very conspicuous place. The event was marked by the presentation of souvenirs to all those purchasing $2 worth and over. A sterling spoon was given each one purchasing $5 worth and over, while every one received a flower. Clemens Hellebush, well known to the trade, has accepted a permanent position with this company.

At the recent creditors' meeting held before Referee Charles T. Greve, it was arranged that the entire balance of the stock of set and unset diamonds and other precious stones, jewelry, silverware, safes, store, office and factory fixtures, manufacturing machinery, materials, etc., of the Duhme Jewelry Co. and the Herman Keck Mfg. Co. should be sold at public auction to the highest bidders without reserve, in separate lots by catalogue, commencing Tuesday, April 19, and in furtherance thereof Trustee Robert deV. Carroll has contracted with the Ezekiel & Bernheim Co. to arrange, inventory, catalogue, advertise, sell and deliver all of the said property at the before mentioned time, continuing from day to day until all is sold. A complete descriptive catalogue of all of this valuable property is now being prepared by the auctioneers, and when finished will be issued to all manufacturers, dealers and private individuals interested in the purchase of such things as are to be offered for sale.

One of the large plate glass windows in the Michie Bros. jewelry store at 212 W. 4th St. was smashed at about 5.20 A. M. March 14 and about $200 worth of jewelry stolen. This is the second robbery of this kind that has happened on 4th St. within a month. The other robbery being that of George H. Newstedt's window. It is thought that the work was done by an amateur who used a brick to break the window, which was protected with the burglar alarm system, otherwise the thief would have secured more plunder. As soon as the crash came the alarm was turned in at the Western Union office and two messengers answered the call. One stood guard at the window while the other started in search of a policeman who had been called from his beat owing to a fire nearby. The thief evidently knowing of the officer's absence took advantage of the opportunity to rob the window. This is Mr Michie's third robbery. The first time, several years ago, the thieves got in through the cellar and secured considerable plunder, the second robbery was committed by Varney and Tiller in daylight. Varney went into the store, grabbed a tray of jewelry and fled, while Tiller stood at the door to let him out. Varney was captured and sent to prison where he died. Tiller escaped, but was caught later and is now serving a term in prison. There is as yet no clew to the last thief.

Denver.

Joseph I. Schwartz, 918 16th St., has just closed a lease on the corner store in the Tabor Opera House. This is one of the most prominent and desirable locations in the city.

As a result of the arrest, Feb. 3, of Bertha Libbe, on a charge of theft by Morris Cohn, a jeweler at 704 15th St., Mrs. Libbe has brought suit for $5,000 damages against the jeweler, alleging that the charge was false and greatly injured her reputation.

Morris Mayer, son of the jeweler who was in charge of the automobile at the time of the accident which resulted in the death of James A. Baker, a well-known jewelry traveler, and Mrs. M. H. T. Keating, daughter of J. A. Hamilton, of the W. W. Hamilton Jewelry Co., will probably not be tried on the charges growing out of the accident until the April term of the court. The case would have been up about a week ago, but Mr. Mayer's attorney secured a postponement on the claim that his client was physically unable to go to trial this month.

After an honorable career in the jewelry trade in Denver for the past 48 years, the business of the Boyd Park Jewelry Co., the oldest in that line in this city, is being sold out and the announcement is made that the Parks will confine themselves to the Salt Lake and tributary trade exclusively in the future. Samuel C. Park, who is in active management of the Park concern, has gone to Salt Lake City after making arrangements for the sale of the $200,000 stock of the store here. The decision to sell out the stock of the firm was made at a recent meeting of the board of directors, and was based on the belief that Salt Lake was the best city in the west in which to confine their efforts. The sale will continue for the next two months.

W. O. Long, Wooster, O., has sold his business to Charles Long and W. Flory.

Los Angeles.

A. E. Morro, 400 S. Broadway, is taking a short recreation trip in the mountains beyond Lang, Cal.

Almon G Stone, 330 S. Broadway, has been confined to his home by illness, for a week past, but is convalescent now.

J. Wiesenberger, who has been confined to his home for a week past, by an attack of Grippe, is again able to be at his store.

The Montgomery Bros.' bowling team defeated the H. F. Wallace team in a series of five straight games, a few evenings ago.

Brock & Feagans have just sold two fine loving cups to be given as trophies for races under the auspices of the South Coast Yacht Club.

A. L. Palis, Upland, Cal., and Carl G. Strock, Santa Ana, were among the jewelers from neighboring towns who visited here, recently.

H. F. Wallace is now practically settled in his new location on W. 7th St. He says his business in his new quarters has exceeded his expectations.

G. V. Lippold, 410 W. 7th St., has ordered entirely new fixtures for his store. The woodwork is to be of quarter-sawed golden oak and the glasswork all plate.

F. A. Burlingame, who came here recently from Kansas City, where he was with the Jaccard Jewelry Co., has taken a position as watchmaker with Newton Moore, 354 S. Broadway.

J. Wiesenberger, 453 S. Broadway, has just sold a fine chest of silver and a punch bowl and glasses to be presented to the matron and patron, respectively, of a local lodge of the Eastern Star.

Geo. F. Miller, representative of the Gorham Co., has been in the California Hospital in this city for a number of days suffering from sciatic rheumatism. He is recovering, however, and expects to be on duty again soon.

The Whitley Jewelry Co. has just sold three handsome loving cups to be given as trophies in the heavy, middle and light weight amateur wrestling championship contests under the auspices of the Los Angeles Athletic Club.

E. W. Reynolds, of the E. W. Reynolds Co., and Carl Entenmann, of the Carl Entenmann Jewelry Co., have gone to Arizona with an excursion given by the Chamber of Commerce. They expect to be absent about a week.

Julius Wiesenberger and his wife expect to start for Europe in April. They will be absent about four months. Mr. Wiesenberger's brother, David Wiesenberger, New York, will come here to have charge of the store during their absence.

Traveling representatives in Los Angeles, recently, include: Mortimer C. Adler, Chas. Adler's Sons; Joseph Guntzburger, I. Guntzburger & Son; Thos. H. Ryland, American Watch Case Co.; Mr. May, Moskowitz Bros.; Mr. Levy, Fox & Co.

Clarence Jacobson, of the Whitley Jewelry Co., was married a few days ago to Miss Lulu Kendall, of this city. The salesroom and shop force united in presenting the bride with a handsome set of silver tableware. The young couple are spending their honeymoon in San Diego.

The Pearlin Bros., Simon and Samuel, who were arrested in New Haven, Conn., some time ago, and brought back to this city on a charge of embezzlement of diamond rings valued at $447 belonging to J. Rosenkranz, were promptly convicted on their trial a few days ago. When they were brought up for sentences they presented a petition for probation. The court set their hearing for March 28. When doing so the judge told them that if they would come before him and tell him the exact truth he would listen to their petition, but if they did not do so he would not even read the petition.

Troubles have been multiplying for Albert Fink and his wife in connection with the loss of jewelry from the trunk shipped from this city to San Francisco by the Southern Pacific. They were arraigned before Justice Summerfield, a few days ago, on a charge of having made false claims on the Southern Pacific Co. for the lost jewelry. They were released under bonds of $2,000 each for appearance for examination, March 23. As stated last week, they are awaiting a hearing on a similar charge which was preferred by the Hartford Fire Insurance Co. Allegations are made that they "switched" trunk checks and robbed the trunk given in charge of Harry Adams, a salesman in their employ.

San Francisco.

The Crown Jewelry Co., 747 Market St., is holding an auction sale of its stock preparatory to vacating the premises, as the building is to be razed shortly.

Practically all of the local wholesale houses in San Francisco now close on Saturdays at noon, this rule being better observed this season than ever before.

George Holden, representing Joseph Fahys & Co. and the Alvin Mfg Co., has just completed a business trip to Los Angeles and vicinity. He is much gratified with the results.

The new building on Market St., opposite 3d St., that is to be the new home of T. Lundy, is rapidly nearing completion and the move into it will probably be made during the month of May.

Elston Bros. are still taking on new lines and this firm promises to be quite a factor in the trade during the coming season. James Elston is still out on the road and his first trip is proving to be a very successful one.

George A. Desenfant, a manufacturing jeweler located in the Pacific building, has made a large number of cups and trophies during the past month, to be awarded as prizes in the Pure Food Exhibit that is to be held in this city shortly. While these prizes were on exhibition in a local store, a thief made away with a large number of them.

A burglar entered the store of O'Hara & Livermore, 1366 Sutter St., March 11, after the place had been closed for the night and 30 pieces of jewelry were taken, valued at $1,000. Detectives have been working on the case since that time, but have found no trace of the missing goods. It has been ascertained that the front door of the store was not locked that night and the thief had an easy time in making away with all of the loot.

Pacific Coast Note

S. P. Johnston, Glendora, Cal. ing to larger quarters in the H.

H. Latsky is conducting an at at Oroville, Cal., for Harry Jacol place.

es W. Lauer, of Charles W. Lauer & Co., was in Terre Haute last week for the purpose of filing a petition in the Circuit Court to have about $700 worth of the jewelry stock of the late William Helman set aside from invoice. Helman commited suicide, recently, and the local concern asserts that the jewelry it seeks to have set aside was shipped on consignment, to be returned if not sold.

Milwaukee.

Gross & Saxe are removing to larger quarters in the Metropolitan building. New fixtures are being installed and a larger stock will be carried.

News has been received in Milwaukee that T. Bruhy, West Bend, Wis., has placed an order for a seven-passenger, six-cylinder, 50-horsepower Mitchell automobile.

Out-of-town jewelers who were Milwaukee visitors, last week, included Henry Bayer, Whitewater; J. B. Kimball, Waukesha, and John Henninger, Markesan.

Robert Rank, salesman at the New York office of the Bunde & Upmeyer Co., will arrive in Milwaukee soon, where, on March 29, he will be married to Miss Agnes Zellman.

T. S. Arthur, Fond du Lac, Wis., has made various improvements in his repair department, and expects to enlarge this phase of his business to a considerable extent.

News has been received here that F. E. Williams, Janesville, Wis., has sold his stock of jewelry and has moved to Ione, Wash., where he will engage in the jewelry business.

On suspicion that he is the expert cracksman who recently blew open the safe in Frank G. Peterson's store, River Falls, Wis., a man has been arrested at Hudson, Wis., and sent to River Falls.

Milwaukee wholesale jewelers have been notified that R. T. O'Neil, Prairie du Chien, Wis., has disposed of his business to Mr. Bull, Chicago, who is now in possession. Mr. O'Neil will remove to his farm in the town of Clayton.

The assets of Gustave C. Vahl have been appraised at $2,063. At the first meeting of the creditors, held recently, it was decided to hold a sale at the place of business, 677 3d St., at once. George W. Wilson was appointed trustee. The second meeting of the creditors will be held March 26.

Maurice Strelitz, a diamond merchant at 401 Majestic building, was married, March 14, to Miss Gertrude Ederheimer, Chicago. The ceremony was performed at the home of the bride's parents, 3926 Grand Boulevard. Mr. and Mrs. Strelitz are now on a wedding tour of about a month's duration. They will then make their home at Milwaukee.

Interesting developments are taking place in regard to the settling up of the affairs of F. W. Teschner, who went into personal bankruptcy some months ago. Following the decision of the court to set aside the transfer of Teschner's property to his wife and to annul his action in organizing the F. W. Teschner Jewelry Co. just before he went into bankruptcy, an appraisal of the stock on hand at the store has been made. A conservative estimate of the appraisers placed the value of the stock on hand at about $2,000. The custodian who was appointed by the court to remain at the store and guard the interests of the creditors was ejected from the establishment recently.

The recent semi-annual meeting of the Fox River Valley Jewelers' Association, held at the Palmer House at Fond du Lac, Wis., was one of the most successful in the history of the organization. Thirty-five members were present. At 6.15 o'clock the members of the association were served a six-course banquet. This was followed by the business meeting. Several addresses were made upon matters of interest to the trade, and an animated discussion followed. T. S. Arthur, Fond du Lac, spoke at some length upon the many changes that have taken place in the jewelry business in the past few years, and pointed out many improvements that could be made. The next meeting of the association will be held at Appleton, June 29. Nine new members were admitted.

Kansas City.

T. S. Simrall, representing D. B. Ward & Co. in Missouri, is in from a successful trip. As soon as his cases are replenished he will return to his territory.

Kelley Bros., Greensburg, Kans., recently dissolved partnership, and one of the firm is now carrying on business in Meade Kans., under the name of the Kelley Optical Co.

The Kansas City Polytechnic Institute has just issued a very neat and attractive engraving catalogue. A catalogue of the watch making department will be issued later.

The Oklahoma Jewelers' and Optical Association will meet in annual convention in Oklahoma City, May 9, 10, 11 and 12, the place of meeting having been changed from Enid to that city.

The Greene Jewelry Co. has completed an order for 125 watch fobs, composed, besides a broad black ribbon, of silver, gold and brouze, the latter being an artistic relief medallion about an inch in diameter. The principal figure represents a runner in the act of passing the winning line.

Ernest Powles, recently a student at the Kansas City Polytechnic Institute, has accepted a position with the Ryer Jewelry Co., 109 E. 12th St. Bruce Gates, another student, has gone to Texas to accept a position, and Charles Rice, also from the same school, has secured a position with George W. Katis, Newton, Kans.

The following traveling representatives called on the trade here last week: E. L. Imhoff, R. & G. Co.; B. Hyman, B. Hyman & Co.; A. W. Levy, Louis Strasburger's Son & Co.; E. H. Moore, Sykes & Strandberg; H. F. Tourtillot, Wait, Thresher Co.; William J. McQuillan, Mount & McQuillan; Louis Jaskow, Bordenheim & Jaskow.

C. D. Bender recently opened a store at 21 N. Potomac St., Hagerstown, Md. Mr. Bender started in business in E. Franklin St., some time ago.

Louis Abrahams, Port Deposit, Md., was among the merchants in that place who recently sustained considerable inconvenience by a flood caused by ice gorges.

St. Louis.

L. A. Fassett, of Weiss & Fassett, has gone to Chicago on a business trip.

M. Schneider, with M. Stiffelmann & Co., has returned from a trip through southern Illinois.

E. A. Dearing and wife, Mexico, Mo., were in St. Louis during the week on a pleasure trip.

The Wick Jewelry Co., Belleville, Ill., has added an optical department, in charge of Charles E. Betts.

Joseph Auer, of the Bauman-Massa Jewelry Co., has returned from a six weeks' trip through the south.

The Rapid Watch & Jewelry Co. is selling out preliminary to removal from the present location, at 705 Pine St.

J. E. Riley, of the Gutfreund-Kemper Supply Co., has returned from a successful trip through eastern Illinois and Indiana.

The Smith's Credit Jewelry Co. has filed suit in Justice Moore's court against Harry Lipstadt, for a balance of $65 on an account.

E. Massa, of the Bauman-Massa Jewelry Co., is making a three weeks' trip through Kansas and Oklahoma on exclusive diamond business.

Robert Tetley, Farmington, Mo., was in town during the week on a pleasure trip. While here Mr. Tetley bought some new fixtures for his store.

A merchants' license has been granted to the M. Bonn Jewelry Co. to do a jewelry business at 823 Washington Ave. The value of the stock is given as $10,000.

Walter I. Grob, Belleville, Ill., furnished three gold watches which are to be given away in connection with a popularity contest conducted by a local newspaper.

George J. Hess, president of the Hess & Culbertson Jewelry Co., returned, last week, from his eastern trip. He placed large orders for art goods for Fall delivery.

George Hess, Jr., son of George J. Hess, president of the Hess & Culbertson Jewelry Co., has returned home for the Easter holidays from the Culver Military Academy, in Indiana.

Fred Bross, of the L. Bauman Jewelry Co., started out Monday of last week on a trip through Arkansas. Clarence Heyman returned from a trip through the south and has gone to Iowa.

J. J. Burke, president of the Brooks Jewelry & Optical Co., who returned, last week, from a trip to Old Mexico, on which he was accompanied by Mrs. Burke, was greatly benefited by the trip.

M. J. Cummings, formerly with the St. Louis Clock & Silverware Co., now with the Seth Thomas Clock Co., is in St. Louis and reports an excellent business on a recent trip through Illinois and Missouri.

Louis Ebeling, of the Ebeling Jewelry Co., was elected a director of the North St. Louis Business Men's Association at the annual meeting of the association at Northwestern Turner Hall, Thursday night.

The American Jewelry Co. has sued out an attachment for a wireless apparatus owned by C. L. Crosby. Constable Schoenbien seized it, and it is being held for the company for a debt of $120 owed by Crosby.

In the bankruptcy proceedings pending before Referee-in-Bankruptcy Coles against Ernest A. Niehaus, the trustee has filed his final report and application for discharge and a hearing on it has been set for March 28 at 11 A. M.

A meeting of the Retail Jewelers' Association of St. Louis was to have been held Thursday evening, but on account of it being Easter week a postponement has been announced by President Joseph Ebeling to the Thursday night following.

Ben Yoch, Belleville, Ill., bought a big punch set last week from the St. Louis Clock & Silverware Co., which is to be presented by the employes of a brewing company to the president of the company, Bernhard Hartmann, on his next birthday.

A suit brought by Circuit Attorney Jones in the Circuit Court against the Gauen Jewelry Co. to require the filing of an affidavit under the anti-trust laws has been dismissed. The failure of the company to file the affidavit was due to a misapprehension.

The stock of Mannie Levy, bankrupt, sold at auction last week at his former place of business at 205 N. 7th St., by Chase Morsey, receiver, brought $905. The appraised value was $735. The creditors are to have their first meeting March 25, at 11 A. M., at the office of Referee-in-Bankruptcy Coles, when claims will be presented and a trustee selected.

Information has been received in St. Louis of the robbery of the jewelry store of J. M. Cox, Halls, Tenn. Entrance was effected by breaking a plate glass in the front of the building. A tray of watches and several rings and other jewelry was taken. Mr. Cox was sleeping in the rear of the store and was awakened by the breaking of the glass and took a shot at the robbers but did not hit them. Bloodhounds were put on the trail, but to no avail.

W. A. Gill has taken out a building permit for the erection of a four-story building at the southeast corner of 7th and Olive Sts., to cost $50,000. The building is to be of steel skeleton frame, the outside all plate glass and terra-cotta. The lot is one of the smallest and most valuable in the downtown sections of the city. It fronts 22 feet 3 inches on Olive St., by 54 feet on 7th St. Mr. Gill is now in business on 6th St. He has not announced whether he will occupy a part of the building.

Isadore Kosminsky, doing business as the Rose Jewelry Co., at 612 Franklin St., who recently underwent bankruptcy proceedings and whose stock was sold at auction by A. C. Wilson, trustee, last week, for the benefit of creditors, has started in business again at the old stand. The stock was sold piece by piece and brought $2,400. Trustee Wilson says a dividend will be declared in about 30 days, but he cannot tell yet how much it will be. When Kosminsky failed he gave his assets as $10,105.30 and his liabilities at $11,738.46.

The Associated Retailers of St. Louis, in which organization are included the retail jewelers, is making an effort, with the cooperation of License Commissioner Alt, to restrain the operations of the "fly-by-night" merchants who take a great deal of business from legitimate merchants without rendering the license return to the city which the regular merchant renders. License Commissioner Alt has been trying to keep these people out, but all that he has been able to do, under the laws as they exist, is to compel them to pay a small license. He is in favor of getting the legislature to pass a law requiring them to pay such a license that they will not have an advantage of the regular merchants in the city.

Among the out-of-town jewelers in St. Louis, during the past week, were: Stewart, Albion, Ill.; Robert Tevington, Mo.; E. H. Gould[illegible], C. F. Gardner, Sorento, Ill.; W. of the Krug-White Jewelry Co., Ill.; W. K. Urbani, Vandalia, Ill.; Tetley, Farmington, Mo.; J. F. Chaffee, Mo.; L. M. Fey, [illegible]; Roy G. Rutherford, Mount Vernon; A. Dearing, Mexico, Mo.; Louis, of Barnett Bros., Edwardsville, Ill.; Bone, Bonne Terre, Mo.; M. Beckson, Ill.; S. Siegel, Minton, Ok.; Simon, Collinsville, Ill.; F. W. Donnellson, Ill.; Ben Yoch, Belleville, Ill.

Among the traveling representatives in St. Louis, Mo., during the past week were: Walter Boss, Boss & Baldwin, Belleville, Ill.; Hedresser, Eastern Jewelry Co.; Frifen, J. A. & S. W. Granbery, Harrison; Hutchison & Heustis; M. S. Gutman; William I. Rosenfeld; D. Skaggs, Haven Clock Co.; J. S. Brauler Jewelry Mfg. Co.; Frederick ter, Flint, Blood & Co.; E. A. Wood; A. Jerauld; L. A. Knobel, Louis & Sons; Mr. King, Ostby & Barton; William J. McQuillin, Mount & Wood; E. D. Weston, C. Dorflinger & Sons; erick Keim; B. Hyman, B. Hyman; F. E. Leimbach; A. I. Duval, Louis Glass Co.; B. J. Meyer, Meyer; Henry C. Maybaum, Charles Adler; J. C. Bigalke, Bigalke & Eckert Co.; D. Smith, Hagerstrom Co., C. G. D. Dalzell & Co.; Alvan T. Hafacturers' Agent; R. B. Carr, Davison, Kohn & Co.; H. R. Black, Richardson & Co.; A. M. Brinch, Monroe Co.; Mr. Vaslett, Flatrows Co.; C. L. Smith, Baer & Wilson; J. Walter Boyden, Ostby & Barton; W. Battey, Schofield, Battey & Co.; Dorrance; Harry H. Miller, Huntington; Huestis; E. L. Imhoff, R. & G. Wilkinson, J. J. Sommer & Co.; Cummings, Seth Thomas Clock Co.

F. G. Cooper, partner of Schuyler & Robbins, Moorcsville, Ind., whose trade was announced in THE JEWELERS' WEEKLY, March 2, is offering to sell the entire business of the firm and pay all liabilities before Jan. 1 next. The firm of Cooper & Robbins succeeds the house of A. R. Cooper & Son, of which present Mr. Cooper was formerly a member.

A fine display of precious stones is made at John G. Barr Co.'s store, Ore., some of the stones being of more than ordinary interest. Among the several Oriental imitation pearls Detailed information as to the which these pearls are made is given the exhibit of popular interest. ber of fine Australian opals are as well as a large number of stones made stones with the real stone display.

Connecticut.

C. D. Morris, Wallingford, has returned home after a five weeks' trip to California.

Chas. H. Tibbetts, Wallingford, has returned from a six weeks' trip through California.

Charles H. Rogers, Danbury, is about to move into larger quarters at 5 West St., at that place.

George Ruppey has resigned his position as paymaster with the Wm. L. Gilbert Clock Co., in Winsted.

Walter A. Ingraham, accompanied by his family, has returned home after spending the Winter at Bermuda.

Mrs. Clifford W. Leavenworth, accompanied by her father, left Wallingford recently for Albuquerque, N. Mex.

Matthew Darwent, a member of the Landers, Frary & Clark Mutual Aid Association, died recently at Berlin, aged 67 years.

The New Haven Optical Co. has leased a new store on Chapel St., two doors from Church St., and will occupy it in a few days.

Wm. J. Wessenberg died at his home in Meriden, last week, of typhoid fever. The deceased worked under his father in the Parker Clock Co.

E. Hart has assigned to the New England Watch Co., Waterbury, a patent recently granted to him on a novel case for watches and watch clocks.

Wm. L. Wecks, 67 years of age, and for many years a resident of Bristol, died recently at his home there of pneumonia. The deceased was an expert horologist.

George E. Gillette, for several years an employe of the E. Ingraham Co., Bristol, died, last week, at his home in Bristol, of pulmonary trouble. Mr. Gillette came from Thomaston and was 67 years of age. He is survived by a widow.

The New Haven Clock Co., New Haven, is about to erect a $25,000 addition to its present plant. The addition will face on Hamilton St. near Grand Ave. and will be built of brick. It will extend 61 feet on Hamilton St. and will have a depth of 33½ feet.

The building occupied by the C. Howard Daley Co., Danbury, has been sold, while C. F. Daley has purchased the business property occupied by the Danbury Novelty Store. These changes in ownership do not mean any immediate change in the business concerns which occupy the buildings.

Mrs. Helen Atkins McKay, a woman very prominent in Bristol and widow of Andrew F. Atkins, at one time secretary and later president of the Bristol Brass & Clock Co., died early Thursday morning at her home in Prospect St., Bristol. The deceased was 78 years of age. She was the daughter of ex-Senator Elisha N. Welsh, who died in 1887.

Sarah Parmett, who, with I. N. Parmett, conducted a jewelry store at 49 Albany St., Hartford, has filed a petition in the district court of the United States, asking that the co-partnership be adjudged bankrupt. I. N. Parmett, it is averred, has disappeared, and it is also said that his present whereabouts are unknown. The liabilities of the co-partnership have been given as $1,191 and the assets as $850.

The wheels have begun to turn in the handsome new plant which the Whiting Mfg. Co. has built on the railroad, at Bishop Ave., in the East End, Bridgeport. H. H. Hamilton, the resident member of the company, said that the finishing, oxidizing and gilding departments would be started March 21, and that it is hoped to have all of the departments in operation by April 1. At least 350 hands will be employed. The average wage, it is said, will be $19 per week. The company's clock, which has a dial seven feet in diameter, will be started soon. The company is one of the largest manufacturers of solid silver hollow ware and flat ware in the country.

A banquet was given to the commercial and cost departments of factory "C," International Silver Co., Bridgeport, one evening last week, by George C. Edwards, president of the company. S. W. Davis was toastmaster, and several interesting speeches were made and business of the concern with its attending success was discussed. Those present included George C. Edwards, E. T. Abbott, M Milnor, H. S. Bigely, Ralph Chaffee, J. H. Hinckley, G. F. Keating, Carol Hogue, Harold Hallsworth, W. B. Griffin, J. G. Ludlum, G. H. Edwards, W. A. Kinsman, J. T. Rose, L. E. Boyd, W. R. Davis, C. B. Crane, R. H. Townsend, R. I. Thompson, A. R. Smith, Jacob Cohen, Clarence Goodrich, DeWitt Miles, G. W. Osborn, S. W. Davis.

John Burnett, charged with robbing C. Cedarstrum, a jewelers' traveler, of $950, was found guilty in the Court of Special Sessions at Montreal, on March 9, and sentenced by Judge Choquet to five years in the penitentiary. Burnett was an accomplice in the robbery with a cab driver named Leblanc, who was sentenced some weeks ago to four years in the penitentiary for the part he took in the theft. Mr. Cedarstrum was spending a few days in Montreal in the latter part of last year. He hired Leblanc to drive him to the Grand Union Hotel. Leblanc said he had another "fare" who was going in the same direction and asked Mr. Cedarstrum if he would mind having company in the cab. The other "fare" was Burnett, and as Mr. Cedarstrum was pressed for time he made no objection to a companion, but instead of driving him to his hotel Leblanc conveyed him into a back lane and there he was attacked by Burnett, who, with the aid of Leblanc, robbed him of $950. Leblanc was traced by the police and his conviction followed.

Pittsburg.

Charles Roberts was on the sick list, last week, for a few days.

H. M. Conrath, formerly engaged in business at Lovejoy, is opening up a store at Indiana, Pa.

H. E. Smith, formerly of Smithfield, W. Va., and who retired from the trade to go into the oil business, will again open a jewelry store there.

T. H. McNary, Washington, Pa., is said to be threatened with pneumonia, and Mr. McKinley, of the same town, also is reported as being very ill.

P. C. Gillespie, of Gillespie Bros., and Mrs. Gillespie, who have been in Florida for several weeks, returned this week from a delightful trip to the south.

Sam F. Sipe has succeeded in putting his store in good condition and repairing all damage done to his establishment, because of a recent fire in the building.

A. M. Dueber, president, and M. Loeb, secretary of the Dueber Watch Case Mfg. Co., were in Pittsburg, recently, visiting W. J. Johnston, of the W. J. Johnston Co., and transacting business here.

Among the out-of-town jewelers in Pittsburg, last week, were: Frank Bloser, New Kensington; H. R. Brown, Donora; B. E. Brown, Monessen; S. S. Snyder, Dayton, and Henry Zilliken, Wellsburg.

J. P. Archibald, Blairsville, has been coming to Pittsburg recently to "ride the goat," the president of the American National Retail Jewelers' Association having been admitted to the Masonic order.

The John M. Roberts & Son Co. donated a handsome cup to the bench show of the Duquesne Kennel Club, which closed Saturday night. Quite a number of cups were sold by the local jewelers for this event.

S. & B. C. Weinhaus have let a contract for the construction of an addition to their establishment and adjoining the rear of the building at present occupied by this house. It is to be a two-story structure and work is to be begun in a few days.

A man locked up in the West End police station early last week on a charge of drunkenness, claimed to be a representative of a silver firm, making specialty knives, forks and spoons. On this person was found $61 in money, three gold watches, a gold bracelet, ruby ring and other articles, and a sample case of knives and spoons.

Members of the Jewelers' Duckpin Bowling League, at its regular weekly meet early last week, rolled some interesting games, the Wattles winning three out of four from the Lochs, the Roberts and Vilsacks splitting even, the Diamonds winning three from the Terheydens. The Wattles broke the high score record, 342 from 327, and also made a new record for four games, 1,225 pins, the former score being 1,202.

Miss Emma Bott, a clerk in the store of the John M. Roberts & Son Co., is a heroine, and had an exciting experience Saturday night, March 12. She was held up at 10:30 o'clock on her way home, when at Gross and Liberty Aves. The highwayman, who struck her in the chest, grabbed her purse and ran. The woman screamed and three policemen soon put in their appearance.. The little woman gave chase and the culprit, observing the police and Miss Bott in pursuit, threw the pocketbook over the fence into a nearby yard and made good his escape. The police could get no trace of the man.

The Arsenal Installment Co. has changed its name to the I. Harrison Co. and has added a stock of bicycles, graphophones and pianos to the diamond, watch, jewelry and other lines which it has carried. I. Harrison remains at the head of the company as heretofore. The company is now installed in its new quarters, 219 6th St., on the second floor of the Pittsburg Life building.

Announcement is made that Ralph Heeren, a son of Otto Heeren, of Heeren Bros. & Co., will be married March 28 to Miss Drake, of Cleveland, at Havana, Cuba, Mr. Heeren, with his parents, now being in the Isle of Pines, where Mr. Heeren is raising fruits and vegetables. The employes of the Heeren house will present him with a handsome silver flat ware set. He will live in the Isle of Pines. Otto Heeren recently bought 30 or 40 acres there and likes the country very much.

Among the traveling representatives who called on the trade here last week were the following: A. E. Hayward, Seth Thomas Clock Co.; Eugent A. Cory, Ford & Carpenter; William J. Anton, Durand & Co., J. F. Sullivan, Hensen-Bennett Co.; Charles T. Dougherty, Osmers-Dougherty Co.; Henry C. Woods, Dominick & Haaf; Louis Hirsch, Hirsch & Flashner; E. A. Reed, Reed & Barton; Charles G. Clark, W. G. Clark & Co.; S. S. Vaderland, Levinson & Friedlander; Hubert Somborn, Bawo & Dotter; P. H. Smith, Roger Williams Silver Co.; Mr. Crane, Mandeville, Carrow & Crane; S. C. Corbin, Waterbury Clock Co.; G. W. Bleecker, Martin-Copeland Co.; John A. Abel, Abel Bros. & Co.

True bills charging Stephen J. Austin, the man who at first confessed that he robbed the jewelry store of John Studer, Federal St., North Side, by throwing a brick through the window, have been returned against the accused. Austin must answer three charges—of entering a building, one of carrying concealed weapons, and one of robbery. The young man, according to his attorney now denies that he robbed the Studer store. His attorney asserts that Austin told the police that he had committed it for the reason that the officers had made certain promises to him and that in saying he committed it was to be regarded in his favor. But he now avers that he had nothing to do with it and will fight this charge.

Sol Seleznick, doing business at 976 Liberty Ave., was fined $25, or 30 days in the workhouse by Magistrate J. J. Brady at Central Police Station, on a charge of selling jewelry on Sunday, which in Pennsylvania is a violation of the old "blue laws." Detectives Patton and Policeman Dorsey testified that they saw a boy selling different articles at the jewelry store. Seleznick did not deny that the boy worked for him, but said that he had only gone to the store to do some work. He asserted that the boy told him that while he was in the store several persons called and wanted to buy, and he accommodated them. Seleznick told the magistrate that the boy did not know it was a violation of the law or of a city ordinance to sell on Sunday.

...wi... to the growth of their watch re...department, L. Huber & Son have ...d necessary to add another work-...

... Wolf reports that there is an in... call for vanity bags this season. ...e ...ntaining powder books, coin purses ...brow pencils are in great favor ...he fair sex, it appears.

...w Irion has completed a year under ... partnership arrangement which he ...re into with his sons, William and ...t has worked well. The style of ... is now M. Irion & Sons.

...n C Kendrick, of William Ken... Sons, is contemplating a handsome ...ne on 1st St., near Ormsby St. It ...e cost $20,000 and is three stories ... brick. One of its features is a ...lor on the third floor.

...Southern Optical Co.'s quarters at ... Chestnut Sts. now contain the ...of the Kentucky Optical Co., which ...merly located on Chestnut St., be... St. The concerns are associated. ...olesale business of the institution ...ted to be growing.

...h rebate period of the Retail Mer...nt Association, of which all the retail ...e are members, will be from April ...y 14. During that period purchas... jewelry above a certain amount will ...eir railroad fares refunded. The ...rks well in the Spring, and even ...e during the Fall season.

...a Wiseman, head of the Southern Op...lo., who was dangerously injured in ...omobile accident many months ago, ...al to be about as usual, although he ...mps. His leg was crushed badly ...s broken in eight places. The news ...M. Wiseman's complete recovery will ...ived with pleasure by his friends.

...Wd has been received here of an acci...t hich befell T. A. Anderson, a jew... Bedford, Ind., who was terribly ...m by a gas explosion. The gas was ...d operating a furnace and he was ...wk when the explosion occurred. His ...r nd eyebrows were singed off and ...e n burned from his hands. His sight ...l e saved, however, and his recovery ...ected.

...Rogers & Krull are now settled in their ...tore, adjoining the Sellbach Hotel. ...onsidered one of the handsomest in ...uth. Its feature is a set of three ...s chandeliers, imported from Austria. ...of the chandeliers contains 48 incan...sct lamps, and when they are lighted ...ect is brilliant. All of the furniture ...olid mahogany, the cases being made ... Empire style. The store has a ...d of 25 feet, allowing fine display.

...According to the custom of the Ken... Legislature, which adjourned at ...fort, March 15, at midnight, the of...s of the two bodies were presented ...handsome jewelry. President W. H. ...of the Senate, was given a cut glass ...Clerk George H. Peters, of the Sen..., was the recipient of a diamond pin, ... his assistant, Jesse Alverson, was given a pair of diamond set cuff buttons. In the House Speaker George Wilson received a massive silver service, while Chief Clerk James E. Stone was given a silver pitcher, and his assistant, C. W. Longmire, a gold watch.

The Jewelers' Association, an organization within the Retail Merchants' Association, is preparing for renewed activity after a lethargy of several months. The organization is largely social, but it has done some excellent work along trade lines. Its officers are: George Rieger, president; Leonard Huber, Sr., vice-president; R. Baude, treasurer; J. V. Beckmann (manager of the R. M. A.), secretary. The directors are: G. W. Plinke, George P. Kendrick, Matt. Irion, W. J. Martin and C. W. Rompel. An outing on the river or in one of the parks is held every Summer.

Among the traveling men who have visited Louisville jewelers recently are: J. T. Griffith, Jr., Carter, Howe & Co.; H. R. Blackman, Enos Richardson & Co.; Rufus Holbrook, Sloan & Co.; J. B. Reed, the Shepard Mfg. Co.; Mr. Buffum, of J. A. & S. W. Granbery; Albert E. Motteram, Frank M. Whiting & Co.; Mr. Good, S. Cottle & Co.; Will Maclear, F. A. Hardy & Co.; H. A. Tiballs, of Mandeville, Carrow & Crane; Mr. Anton, Durand & Co.; Harry Osborn, R. Wallace & Sons Mfg. Co.; St. Elmo Coombs, the Paye & Baker Mfg. Co.; Charles L. Murphy, D. Lisner & Co.; Mr. Engellan, Krantz, Smith & Co.; Thomas E. Rogers, Riker Bros.; R. M. Sawyer, Shafer & Douglas; C. B. Bartlett, Whiting Mfg. Co.; William Roman, Manasseh Levy & Co.; D. E. De Voss, Meriden Cutlery Co.; C. H. Davison, Kohn & Co.; T. J. Hoefer, M. A. Mead & Co.; Mr. Veith, Henry Froehlich & Co.

Harrisburg, Pa.

P. G. Diener transacted business in Philadelphia, last week.

Herman Tausig is a member of the House Committee and treasurer of the Suburban Club, which gave a dance at the Metropolitan Hotel, last week.

The annual banquet of the Harrisburg Merchants' Association will be held in the Japanese room of the Metropolitan Hotel, March 24. P. G. Diener is treasurer of the association.

Three foreigners under the influence of liquor wrecked a $40 show case at the pawnshop of Cohen & Sons, last week, because the proprietor refused to sell them a revolver. One of the men was subsequently arrested.

This is the week of March Criminal Court. Among the defendants listed for trial is Myer Baturin, now a bankrupt, who will have to answer to two indictments—one charging receipt of stolen goods and one charging the secretion of property.

Permission having been obtained from the School Board for the placing of a public clock in the tower of the Camp Curtin building, the promoters, who have a fund of about $300 to start with, held a meeting, last week, and received bids from two clockmakers, each calling for about $1,000 expenditure. It was decided to call it the Camp Curtain memorial clock in honor of the famous mobilization camp of that name during the Civil War. No decision was reached as to the illumination of the clock. Another meeting of the promoters will be held March 30.

Lancaster, Pa.

J. Fred. Crane, of Mandeville, Carrow & Crane, spent several days in Lancaster last week.

Willis B. Trusser, Philadelphia, was here, last week, attending a meeting of the directors of the Non-Retailing Co.

Dr. C. A. Lichtenstein, a New York eye specialist, was at the Watt & Shaud store all last week, examining eyes.

Harrison Lippy and E. Harvey, watchmakers, late of Lancaster, have taken position at the Columbia Auto Speedometer Works at Sunbury, Pa.

Jacob Ziegler, late with George L. Parker, Rocky Mount, N. C., has taken a position with the Douglas Jewelry Co., Brenton, Ala., and will manage a store of that firm near Brenton.

A. K. Brubaker, Columbia, is enlarging his store by the addition of a room in the rear. He will add an electric polisher, magnetizer and electric plating machinery. He will also manufacture rings.

After April 1 the Kern jewelry store, Mt. Joy, which has been in existence for over half a century, will be closed out. It was first conducted by Herman A. Kern, and later by his son, Clarence Kern.

Charles E. Bowman, of Ezra F. Bowman's Sons, returned home March 15 from a three weeks' trip to Porto Rico. He is of the opinion that there are good openings for skilled watchmakers in Ponce and San Juan.

Ira Booz, a young man sentenced to the Huntingdon Reformatory, last week, for several robberies, admitted robbing Groff & Wolf's store some months ago of about $500 worth of stock, which included a lot of jewelry.

W. W. Appel & Son, jewelers and opticians, have taken possession of their fine new store at 131 N. Queen St. The junior member of the firm, Percy Appel, after returning from a business trip to Chicago, was in New York, last week, buying stock. The firm was burned out in the big fire on N. Queen St., early in February.

The following were among the jewelers who were recent visitors to Lancaster: E. P. Zane, Christiana, Pa.; Edward D. Gensens, Toledo; S. H. Miller, Mt. Joy, Pa.; Levi J. Miller, Ephrata, Pa.; Harry R. Wertsch, Lititz, Pa.; N. W. Pinkerton, Manheim, Pa.; Fred Kaufhold, Columbia, Pa.; Dennison P. Baden, Alegheny, Pa.; P. W. Morrison, Detroit, Mich.

The following traveling representatives visited Lancaster, recently: E. W. Allen, Day, Clark & Co.; C. G. Cushman, Reed & Barton; J. P. Lane, the Keller Jewelry Mfg. Co.; J. Fred Crane, Mandeville, Carrow & Crane; Mr. Stecker, Rosenweig Bros.; M. Bauman, M. Bauman & Co.; E. T. Miles, Biggins-Rodgers Co.; Ferd. Levy, Korones Bros.; H. C. Kionka, H. C. Kionka & Co.; J. Edward Barth, Depasse Mfg. Co.; H. A. Wintermute, the William Bens Co.; B. J. Cooke, B. J. Cooke's Sons; H. G. Payne, International Silver Co.

Glaziers' Diamonds Wanted.

Washington, D. C., March 16.—The General Supply Committee is calling for proposals until April 5 for 38 glaziers' diamonds, of which a sample will be required.

The two lectures recently delivered by Mr. Duncan, of the Waltham Watch Co., before the Colorado Horological Society in Denver, were listened to with much interest. The first lecture was largely historical, and treated of the development and evolution of watch construction. This portion of the lecture showed the development of the timepiece from its crudest form up to the present perfected watch. The illustrations of machinery used to turn out the modern watch were particularly interesting. The lecture on the second evening dwelt upon timing and adjusting. About 200 watchmakers attended each meeting, many coming from adjacent towns. A banquet was given in honor of Mr. Duncan, after the last lecture. About 30 plates were served and several speeches of timely interest to watchmakers followed. Mr. Duncan told the society that it was the fourth organization of its kind in the United States and that in point of membership it ranked second out of the four.

WE have recently issued a supplement to our 1904 material catalog which will be forwarded to you on application. This supplement used in connection with our 1904 catalog you will find a great help in getting correct repairs for our movements. Material for all new grades manufactured since the issue of our 1904 catalog is listed. Serial numbers showing grades of movements to 15394000 are given; table showing numbers and strengths of Hair Springs for different grades will be found a great convenience. We especially call your attention to the introduction in the supplement which explains how to get the part you want for any particular movement. A postal card request will bring one of the supplements.

BALANCE TRUING.

ou ever consider what great im-rtance it is to have the balance rue in flat and round?" he began. a pity that every repairer could ght to realize how essential is a rue balance, especially now, when s h a valuable factor. It should be ch repairer's aim to regulate his s accurately as possible, and the f a watch can only be obtained scrupulous attention to the bal-hairspring."

ce that is out of true appeals to same light and affects the watch tionately the same manner as an nb affects a human being. A per-be in a perfectly healthy condi-yet a single toe on his foot, if in-l deprive him of his natural gait. ith a watch; it may be thoroughly d, the end-shake and depthing put ass condition, the escapement and ivots in tip-top shape, and yet if e operation of the balance truing ed the watch will be deprived of ons as an accurate time recorder, he labor heretofore put into the h the object of affecting such re-be fruitless.

truing a balance it should be as-whether the balance is not too er to the pallet bridge or to the ock; after determining this true e in the most specious direction. circumspection will often save less labor. How often does it a hasty practitioner that he must balance several times in order to requisite height?"

re right," nodded Milthau, em-. "I also have great difficulty operations, especially on thin tches, where the space for the limited."

uickest method known to me of the exact height for the balance," kins, "is the following:

the balance in the watch and ad-eight of one balance arm so that ot strike the pallet bridge; put nce into the truing calipers and balance according to the sample arm. The balance should not be removed from the calipers for bending purposes, as is the custom of many repairers, for that procedure is only a waste of time and confuses the operator, making him doubtful as to which part of the balance to bend. A balance may be bent into shape in the calipers without the slightest danger to the

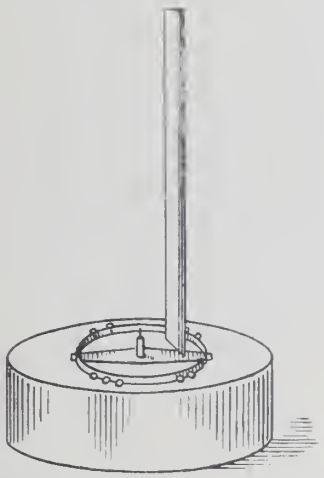

FIG. 3.
Stretching a balance arm.

staff. Precaution, however, must be taken to have the holes in the caliper points large enough to receive the cones of the balance staff so that the pivots may be protected. The difficulty in truing a balance in the round is somewhat different from that which besets us when truing in the flat. No matter how poor a balance may be in quality it can invariably be trued perfectly flat, but a balance with unsymmetrical arms will puzzle even the best of workmen.

"This error often occurs when a new balance staff is fitted. If the repairer is not very careful in selecting a staff with a shoulder to fit friction tight into the balance this defect will become unavoidable, as the punch with which the undercut of the shoulder is burnished over will force the balance to one side of the staff. In such cases the operator must stretch the shorter arm in order to make it conform with the other.

"This may be done by placing the balance on a steel block, as shown in Fig. 3. Put a tapered punch on the balance arm close to the rim and tap it slightly with a hammer. The stretching should be done very slowly, and frequent trials in the calipers will lessen the risk of stretching the arm more than is necessary. It would be of great benefit to repairers to practice such operations on old balances, and after the eye has been inured to notice little defects in balances it will be an easy matter to correct them. The result in the timekeeping of the watch will more than compensate for the time given to the operation."

"Well said, indeed," remarked Milthau. "It is only too bad that you cannot convey your ideas to the trade at large so that more of the watch will more than compensate some of your experiments."

It always seemed very curious to me that young watchmakers do not strive more eagerly to become experts in their profession, and fail to realize that to be only one of the average in our trade means a continuous and monotonous grind, whereas for the man above the average the work is more pleasant and the opportunities for advancement are numerous.

(THE END.)

From Old Subscribers.

GENEVA, Switzerland, March 9, 1910.

Editor THE JEWELERS' CIRCULAR-WEEKLY:

DEAR SIR:—We have read with much interest the article concerning the "Development of Watches from Ancient to Modern Times," published in your Anniversary Number, Feb. 2, and we take this opportunity to compliment you upon your publication, which may be classed among the most interesting and most handsome issued in the interest of the watch trade.

We would like to add a point to your description and to rectify a slight error. Speaking of the invention of the lever escapement by Mudge, about 1765, we would point out that this escapement would only have remained theoretical had it not been improved and made practical by our Georges Leschot, who, in 1825, introduced the "tirage," or locking of the pallets on the lever.

The manufacture of watches was facilitated by the introduction at the factory of Vacheron & Constantin in 1835 to 1837 of a complete series of mechanical tools. This factory turned out in 1838 the first watches ever made mechanically.

Yours very faithfully,
VACHERON & CONSTANTIN.

WALTHAM WATCHES

COLONIAL SERIES
Riverside Maximus
Enamel Dial

COLONIAL SERIES

Gold and Gold Filled Watches

These watches are a noteworthy addition to the Waltham line. They are exceptionally thin and may be had with Enamel, Silver Finish or Gilded Metal dials of artistic design. Colonial Series watches appeal to the most critical buyers. Equip your stock with these goods for Spring trade.

Colonial Series watches are to be had in five grades of movements as follows:

Riverside Maximus—23 jewels, adjusted to temperature, isochronism and five positions.

Riverside—19 jewels, adjusted to temperature and five positions.

Royal—17 jewels, adjusted to temperature and three positions.

No. 1425—17 jewels.

No. 1420—15 jewels.

All Colonial Series watches are cased and timed at the factory. They are delivered to the trade in display boxes. The retail selling price on these watches is fixed and plainly printed on the contract notice which is placed in the box with each watch before leaving the factory.

or standing at his post in peril of imminent death.

Touching episodes in the lives of men and women connected with their watches are often made public. One of the latest of these is told of our present pope, who has but recently emerged from local obscurity to become in a way one of the foremost men of the age.

A man of modest mien and desires, he has the burden of greatness absolutely thrust upon him. As the story goes, not long after the papal coronation, Mgr. Scalabrini, Bishop of Piacenza, was received in audience by his holiness. Just before the close of the interview, Pius X. drew from the folds of his mantle an old, discolored nickel watch. The wily bishop noticed it and smiled. No doubt it struck him as rather singular to see the head of the church so poorly provided in the way of a timepiece. Being a friend of long standing with the quondam Cardinal Sarto, he ventured the offer to exchange his splendid gold chronometer for the insignificant watch of the holy father. "We shall both be the gainers thereby," he asserted. "Hardly both of us," responded the pontiff in his mild and condescending way. Then with a passionate fire in his eye, he asked: "Would you separate me from my old watch? Never! It is more to me than all else beside. It is a memento of my darling mother and told the hour of her death.

WATCH MADE ABOUT 1700.
Has a movable scene, showing a tournament with gold enameled knights on horseback. Masterpiece of goldsmithing.

It is of incalculable value to me, nor would I part with it for any earthly thing!"

There are a good many collections of antique watches, and almost every museum of note has some specimens on exhibition,

n returning to his hotel, and while g for his dinner, he suddenly thought purchase and drew the dial from his to examine it more closely. Seated same table was a gentleman who him and inquired where he had the antique, offering at the same ve marks for it. Taking it as a joke, arfels was about to accept the profit- ffer when the proprietor of the hotel upon the scene and increased the offer marks. After some further bidding ch of the contestants Mr. Marfels asked them what they intended to do t if he should part with it. The first answered evasively, while the hotel- acknowledged frankly that he de- to make a present of it to one of his , who was a director of a trade mu- Such a worthy disposition of it in- ed the lucky possessor of the find to with it for 20 marks offered. Later he ered that it was practically worth- ut this little scene impressed upon his the fact that anything, however in- cant, may find a lover.

hout any knowledge of art at the he endeavored by patient study and ted visits to museums to enlarge his ledge and educate his taste. In this then, he learned, little by little, to dis- sh between a merely old watch and an old watch of really artistic value, and slowly gathered together the marvelous collection of old timepieces, every one of which is a work of art par excellence, and which received the gold medal at the horological exhibition held at Nurnberg in honor of Peter Henlein, the inventor of the pocket watch, to whose memory a monument has been erected there.

We are aware, of course, that these watches are not notably exact time keepers, for precision in timekeeping was at that time only expected of the stationary pendulum clock. Indeed, it was not until the 19th century that any serious and successful effort was made to compensate the balance of a watch so that it would rival its staid old competitor, the wall clock, in precisely ticking off the seconds.

Made entirely by hand, they did all that was expected of them and were in every way worthy of the exquisitely embellished cases which covered them. In a word, they were made for display, and if they incidentally told off the fleeting hours of the day and night with a reasonable approach to exactitude, so much the better.

The race for wealth, paramount above all other aims in life, has become so much hotter during the past century without extending the time of reaching the goal that the seconds of the day are now important. The time and labor formerly expended during those easy-going years upon the decorations of the case, the dial and the cocks, have been transferred to the moving parts, and we are pleased to state that astonishing progress has been made in the accuracy with which our ordinary watches keep time. Nowadays the most expensive men's chronometers are housed in the plainest of cases. They no longer appeal to the eye but to the sensitive system of the active business man, whose minutes may mean fortunes won or lost.

We find it hardly necessary to expatiate *in extenso* upon the artistic ornamentation of each piece of this wonderful collection. We have but to consider the decorative effects with pearls, gems and jewels, the enamel work, the repoussè and embossing technics, the use of gold in four colors, the Neubert and filagree work, the vernis Martin and other styles and modes of embellishment that were applied to these little masterpieces, to form an idea of the beauty of them and at the same time of the high perfection of the decorative arts in former centuries. Then each man worked only with one aim in view, that is, to create a chef d'oeuvre, regardless of the time and labor it required, which might have been entirely out of proportion to the emolument. We have old watches with enamel paintings bequeathed from the 17th century that are marvels of beauty never since approached, and it may be truly said that the artistic skill displayed during the 16th and 17th and 18th centuries in the ornamentation of the cases cannot now be excelled.

Every specimen of this rare collection is deserving of special mention and a thorough description, but lack of space forbids such an undertaking. They must be seen and appreciated with one's eyes to be able to appreciate what miracles have been worked in this branch of art. Some of them are of the greatest variety on account of their size, construction and shape, such queer forms as guitar, harp, mandolin, tulip, drum, sea shell, book, lantern, balloon, pen-holder, butterfly, cross, pyramid etc., being represented, while others are notable for the material used, as smoky topaz, agate, jasper, ivory, porcelain, etc., outside of gold, silver, enamel. A number have movable figures or scenes and musical attachments, gongs, etc.

In the early days every visible part of the movement also received its mede of ornamentation, but particular care was devoted to the balance cock, which was the most prominent stationary figure in the watch. One cannot fail to be enchanted when one sees with what care the filing and graving was done, when one mis-stroke would have ruined the labor of weeks and months.

We present herewith to our readers some

NECK WATCH IN ROSE AGATE CASE.

Mounted in gold with relief enamel. Signed, Charles Bobinet. Time, about 1650.

illustrations of handsome specimens of this collection. It need hardly be stated that a picture can but give a feeble idea of the beauty of the originals. But since so many valuable and interesting art objects are passing into the possession of rich American art lovers, it is possible that at some future date the American public may be able to admire these creations of a by-gone period in some museum on this side of the Atlantic.

As a matter of fact, a portion of the original Marfels collection has already been in New York for some time. One of the cases in the Gold Room at the Metropolitan Museum contains an interesting exhibit of fine antique watches loaned by Mr. Sternberger, the banker. Some of the finest specimens were acquired from Mr. Marfels prior to the aforementioned sale of watches to Mr. Seligman.

The fourth annual entertainment and reception of the Standard Watch Factory Relief Association was held one evening, recently, at Columbia Hall, Jersey City, N. J. The Marlowe Dramatic Club presented a two-act play in which J. Buettner, foreman of the pinion department, who is president of the club, played the leading part and proved to his friends that he fully deserved the title which he held for many years as the "actor watchmaker." The dance which followed the entertainment was well attended.

Mr. Jobber:

We do not take you by the throat and say, "take this dose or get off the Earth."

We want your business, but if we cannot get it without humiliating you before your customers, the Retailers, without forcing you to lose your self respect and business dignity, we do not want your business. Such methods to get your business cannot help but be nauseating to you.

"Must" is a hard word to make an American Citizen swallow. When a Trust says "You must," that is the time for you to say "I won't." If a Trust succeeds in making you swallow one dose what will the next dose be? Surely something more unpleasant.

ZENITH

A Wonderful Watch

Movements fit all sizes of American Cases, besides a number of Swiss Sizes; there are six grades, from 7 to 21 Jewels, adjusted to heat, cold and positions.

The ZENITH watch has taken prizes at Expositions and Observatory Contests, and occupies a prominent position in the horological world. At the last Observatory Contest, held at the Observatory at Neuchatel (Switzerland), the ZENITH watch excelled all records made at that Observatory prior to January 1st, 1909.

SOLE AGENT FOR THE UNITED STATES

EDMOND E. ROBERT

3 MAIDEN LANE NEW YORK

No. 181. Dial 231. Domestic Mahogany Case. 16¼ in. high, 12¼ in. wide, 8¼ in. deep. List, $55.

You Can Sell These Clocks.

The "Excelsior" fills the demand for a high-class chi mantel clock at a moderate price and sets a new standar clock construction. Our progressive policy and unu manufacturing facilities permit us to offer these superior cl ing mantel clocks at prices that mean more sales for you.

The movement retains all the desirable features of famous English clocks combined with new ideas of our experts. These clocks are guaranteed to keep time—and come to you ready to run.

The chimes are made of special bell metal, long rods s a heavy block and controlled by a movement of proved w striking every quarter hour the Westminster chimes in sweetest tones. A feature of the movement is the qua striking mechanism. A very important point is the Dial W —which distinguish the "Excelsior" movement from all ot makes of same character.

The illustration shows one of our many attractive models. Note the quiet dignity and ele simplicity of the case design. The classic lines are unusual in clocks at these prices. We d especial attention to the excellence of the dials which are beautifully etched. The finish giv decided rich gold appearance. The hour rim is raised and silvered and the numerals are in in black. The glass of door is of good plate, not bevelled.

The Excelsior will please your customers and the attractive prices are advantageous to you

A NEW ERA IN Lighting

The perfection of the G-E MAZDA Lamp marks the "greatest advance in electric lighting since Edison's invention of the incandescent lamp."

This new lamp more than cuts in two the former cost of electric lighting, making it possible for every jeweler to flood his store with a wealth of light of real sunlight quality.

MAZDA LAMPS

To produce the same amount of light as the electric bulb commonly in use, the G-E MAZDA Lamp requires only ⅓ the current. The 32 candle power carbon filament lamp and the 32 candle power G-E MAZDA require 112 watts and 40 watts of electric current respectively.

Be sure you see the famous G-E monogram on all these lamps, which are supplied by lighting companies and electrical supply dealers everywhere.

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

Store Service—Its Influence as a Business Builder.

Written expressly for The Jewelers' Circular-Weekly.

THIS is emphatically an era of progressive methods. The demand of the day is for superlative quality in service as well as in material. An up-to-date equipment is of greater importance than location, in the commercial world, for demand is everywhere. People have learned the difference between garret and parlor service, and they expect the retailer to supply the difference without being required to.

There is an æsthetic influence in moderate luxury that often renders it the best salesmanship of all for the retailer of high-class goods. One enters a jewelry store, as a rule, in a season of comparative leisure, when the ideals of refined taste are uppermost. There is time to appreciate little touches of elegance that would ordinarily not appeal, and a disposition to expect them. The imaginative faculties are in a receptive humor wherein surprise is hardly possible, but the most elaborate luxury is none the less enjoyed. It is the time of all others for making use of the suggestive element in advertising and for making it the most successful medium of all. The artistic atmosphere, the scheme of elegant arrangement, produces a similar condition in the human mind and renders the customer less willing to permit any lack of harmony between his luxurious surroundings and the purchases he takes away with him.

Convenience must, of course, be a first consideration in the arrangement of any store, and this does not refer to the convenience of the employes only. Every customer has a right to expect comfortable arrangements for his own use. He is entitled to the privilege of good light, the best that can be obtained; of convenient mirrors, etc., but all this is not enough.

Somewhere the customer has seen a store wherein the luxury of the most artistic home is introduced, and it appeals to him. He likes to drop in where he finds it. If his own home has accustomed him to it he imbibes a special feeling of attachment for the establishment that supplies him with home comforts in the midst of commercial woes. If his usual surroundings are of a more meager pattern he likes to see how well he fits into this higher type of life, and it puts new ideas of increased elegance into his mind at the very time he is making his purchase.

It is, of course, possible to bring the store beyond the capacities of its management in the matter of modern fittings. Methods, equipments, all lack effectiveness unless there are the proper men to go with them. There are doubtless many stores where $500 equipments are giving $5 service because of the 50-cent men who are back of them. It is useless to put the fine engraver's tools into the hands of the stone mason, and it is well, before expensive equipments are installed, to ask the question, "Am I getting the best there is out of what I have?"

But even if there has to be a negative answer (and there surely will be, if it is a truthful one), it should rather be a spur to the man than a curb to his equipment. No one can ever hope to get all that is possible out of life or any of its parts, and the man who refuses to advance until he has exhausted all the possibilities of his present condition will never advance.

There must always be a certain amount of unused reserve force. The man who uses this to the most profitable point is the one who does not cavil at the waste of a few unexhausted possibilities in an equipment that is falling behind the times, but who labors to keep his place of business up to the minute in its luxuries as well as in its necessities, and who then bends every energy to the task of fitting himself to the full capacity of his equipment.

A contest was recently held at Aberdeen, Wash., by Samuel J. Steiglitz, the jeweler, in which a diamond ring was presented to the person writing "Steiglitz, Reliable Jeweler" the greatest number of times on a post card. The ring was secured by Miss Nellie Sargent, who wrote the three words 1,570 times.

Exhibited in the show window in the store of Albert Kamp, Ossining, N. Y., is a saber and scabbard of fine workmanship which was presented to Capt. Jenkins of Company C, 71st Regiment, N. G. N. Y., at the armory in New York, a short time ago. Displayed with the saber is a photograph of the members of Company C in their service uniforms.

No One "On the Job."

(From *System.*)

"IS my watch ready?" asked . of a large jewelry st re i phia, as he stood at the r p ir c

The clerk fumbled his card then he spent several minute rack on which a hundred wat s hanging.

"It isn't here," he said. "I'l to the workroom."

A moment later he hung up th "Our foreman is at lunch," he s you drop in again?"

"I suppose I'll have to. But l could tell me when the watc ready. This is the third t here."

"I'm sorry," returned the c there's nobody upstairs who k thing about it. The foreman, y tends to all that."

So the customer depart d. temper and promising him self ever got the watch back he'd the store permanently.

Most persons have had s l ences. "Out at lunch" ties u transaction, when a proper organ a right record system would ma nite answer possible. Foremen tendents or managers carry rou heads the details that ought to where any clerk could se it at The little prejudices that ris annoyances do a business incalc

of the New York Bar.

ntinued from issue of March 9.)

Holding Oneself Out as a Partner.

rson, though not a partner, may in
as third persons—creditors of the
e concerned—render himself liable
tner by so conducting himself as
nably induce third persons to rely
s representations and believe that
partner in fact. Certainly one can
plain if he is taken at his word.
re one will be held to such liability
wing elements must be present:
The alleged holding out or mis-
tion must have been made by
by his consent.
d—The misrepresentation must have
ended or be calculated to induce
plainant to rely on it.
.—The complainant to hold the per-
holding himself out to be a partner
ve relied on it.
—The complainant must have sus-
loss by reason of such representa-
d reliance.

Estopped From Denying.

arations made by a person that he
rested in a certain business, not only
him from denying his partnership
as against those who have sold
to the alleged firm on the faith of
arations, but are also competent evi-
of the existence of a partnership in
of others as to whom there may
een no estoppel. Griffin *vs.* Carr, 21
Div. 51.

rticular Holding Out is Necessary.

holding out must antedate the con-
and the plaintiff's knowledge of and
e upon his alleged connection must
oved as of that time, for otherwise
laintiff was not misled.
particular mode of holding out is
q'ed. If he knowingly consents to be-
epresented as a partner, he is liable;
is knowledge and consent may be in-
rl from acts and circumstances sur-
ing the transaction.

Lending One's Name.

e who for a valuable consideration au-
es the use of his name in a partner-
as if he was a partner therein, is lia-
les a partner to a subsequent creditor
e firm, and this although the creditor
gnorant of the arrangement and did
ive credit on the faith of his apparent
ction with the firm.
ie is held out by his own negligence
he should be held only to a creditor
has been actually misled thereby.
on *vs.* Secor, 61 N. Y. 456.

Power to Borrow Money.

partner as such has the power to bor-
money for the firm and pledge its
t. The firm is held liable for its re-
ent irrespective of the question
her or not it received the money. The
of course, must have been made for
rm and with that understanding, and
o the individual partner.

Effect of Partnership Note.

A note given by one of several partners in the name of the firm is of itself presumptive evidence of a partnership debt; and if the other partners seek to avoid its payment the burden is upon them to show that the note was given in a matter not relating to the partnership business, and that with the *knowledge of the payee.*

All members of a firm are liable for money lent to the firm upon the application of one of the partners, and it is not necessary to show the actual application of the money to the use of the firm, or the assent of the other members to such application thereof. Whittaker *vs.* Brown, 16 Wendel 550.

Personal Obligation of Partner

Where money is loaned upon the promissory note of one member of a partnership and upon his personal credit, the fact that the money is later applied to the use of the firm does not constitute the lender the creditor of the firm. It is only when the name used and to which credit is given as that adopted by the firm and used to designate the partnership that it is held liable. Nat. Bank *vs.* Thomas, 47 N. Y. 15.

If money is borrowed or goods purchased for the firm, and upon its credit, the subsequent misappropriation by the partner who procured the loan or purchased the goods for the firm does not relieve the firm of its liability therefore.

Partners are all responsible for goods furnished for the benefit of the firm, and though the creditor supposed himself dealing with and giving credit to the individual partner by charging him alone in his book. The doctrine of undisclosed principal applies, each partner being the agent for his co partner. Reynolds *vs.* Cleveland, 4 Cowen 282.

The Attractively Furnished Store of Hughes & Woodall, Baltimore, Md.

ONE of the attractive retail jewelry establishments of Baltimore, Md., is that of Hughes & Woodall, located at 322 N. Charles St., in that city. The firm, by the way, is the successor to Wm. H. Saxton. The fixtures are of solid mahogany and present a very beautiful appearance. Every interval of open wall space is covered with mirrors. The flooring is of white tiles with a Grecian border, while the ceiling is of metal, the pattern being six-inch blocks, finished in white.

The show window is 10 feet long, six feet high and two feet six inches deep. The base of this display window is only about two feet from the sidewalk, the effect being unique and attractive. The outside is finished in mahogany and the inside in white enamel. The contrast is a very pleasing one.

INTERIOR VIEW OF THE STORE OF HUGHES & WOODALL, BALTIMORE, MD.

A recently added optical department is equipped with every modern device for the scientific examination of the eyes and the furnishings, like those of the jewelry store, are of mahogany. The carpet, wall paper and portieres in this room are green, making a pleasing and restful tone for the tired vision of those who seek eyeglasses.

Idleness is the master key to poverty.

We are apt to look upon candid friends as enemies.

Trouble never tries to dodge people who are looking for it.

The younger a man is the more he knows about women—he thinks.—*Iron Age-Hardware.*

culture. The use of powdered tea died out in China, and a commentator of the Ming Dynasty could not recall the form of the tea-whisk mentioned in a Sung classic The Sung ideal of tea was not lost, however, for in 1191 the powdered tea had reached Japan with the return of a Buddhist monk from China where he had studied the Southern Zen Sect.

The tea ritual of the Zen spread rapidly in Japan and created a demand for the special Chinese pottery used in the service. As this was costly the Japanese strove to reproduce the nearly inimitable ware. Finally in 1223 Yoshiro, known as the father of Japanese pottery, went to China, where for six years he sought knowledge of the secrets of the Chinese potters. He returned not only with a supply of rare examples but brought clay and glazing material, thus preserving in Japan "the most admirable of the Chinese glazes: the famous speckled black cups like the plumage of the gray partridge, the leveret-streaked or hare's-fur, and other glazes of the kilns of Chin-chou."*

The Japanese successfully resisted the Mongol invasion in 1281, and the tea ideal which was lost to China was upheld by the practice of the Zen ritual in Japan and

*Morse's Catalogue

"Shunko was the first tea-master, the first to adapt the ritual to secular and æsthetic use. He invited a few chosen friends to his cottage, and over the tea, in lyric quietude, conversed at leisure, with elegance and culture passing vulgar understanding."* Although smiling and genial, they never lost sight of the most subtle refinement which means far more than formal politeness. The fame of this rare friendship spread in the highest circles and Shunko was invited to the Palace of the Shogun. He told the Shogun that the Soul of the cult could be put into four words: purity, elegance, politeness, harmony, whereupon the wise prince became a disciple and encouraged his people to cultivate this beautiful ceremony. He appointed gentlemen as tea-masters and discussed with artists and potters the designs of the utensils. Many tea-masters became amateur potters, and many potters devoted themselves solely to manufacture of tea wares; of bowls and the tiny tea jars for the powdered tea; of incense burners, water jars and other articles. Perhaps the most important pieces were the bowls and tea jars. Certain potters devoted themselves to the making of one article. Such an one was Ameya, a Korean potter who came to Kioto late in the 15th century. His bowls had great charm of form and glaze. When he died, leaving three young sons, his widow, Keirin, a Kioto woman, shaved her head and as a nun consecrated her life to the kilns. Her bowls were highly valued and

TEA JARS IN THE SAMUEL COLEMAN COLLECTION.

called "Nun's ware." When her eldest son took charge of the kilns, his bowls had the dull black glaze like that used by Ameya, but the shapes were even more pleasing to the people for they desired grace combined with the simplicity of the Zen ideal. The second son, Chojiro, continued to make the lusterless black glaze, but his brownish-red glaze was like a flow of foam† So beautiful was his ware that the prince presented him with a golden seal

The Ameya and Keirin and their sons more than a century and it is said he Raku ware gave the tea cere- s hyacinthine days."

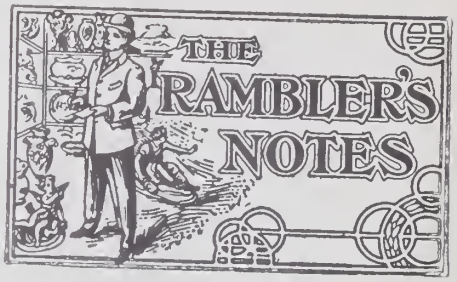
museum there are modern bowls to the Sung bowl, some of which led Chinese, while others bear the noted Japanese potters. There l black and brownish-red bowls the Raku seal; there are bowls at- to Ninsei, and bowls by unnamed all having the common quality of ty and an individual charm which to every artist temperament.

he late 16th century two potters rom Korea and built an oven in k ri village in the province of Chiku- During a trip to Kioto these Korean came under the influence of a great ster, Kobori Enshu, and by his ad- rried back to Takatori either verit- jects or suggestions of the kinds ery and forms of utensils most de- in the tea ceremony, and the early tions of Takatori took the high rank has been maintained by succeeding tions. Of the tea jars produced in llage, the museum posseses several les. Mr. Morse insists that the ri tea jars are the most beautiful; ey make such modest array that sual observer may pass them. Once arrest the eye, however, their charm quent. Their beauty and simplicity is ltimate refinement of form, perfect ony of color, and glaze so tender in and subdued in luster as to recall the atina of bronze. Each piece possesses ction and is an individual triumph. must realize that this marked sim- is not the limited expression of tive art but the sane restraint of cul- and high ideal persistently sustained. xtraordinary thing is the originality ch one of the jars, although all of on size and utility. The character- glaze of the Takatori jars is a rich brown of subdued luster, the shades own of infinite variety. A splash of overglazes is frequently found on one and there are green and black and overglazes in great variety. Some- the glaze pouring over the surface short of the base with the varied un- ions of sea surge on the shore. The thickens as it stops and its color is ned along the wavering flow, with and there a tear, as the running drop is called. The stopping of the glaze e it reaches the base leaves the clay he pottery exposed. There are two tori jars in the E. C. Moore collection g overglaze splashing like the kled partridge" glaze of the Sung d. The potters had mastered the ery of the admired glaze, but did not nercialize it. A cultured patronage controlled the craftsmen, and the Sung ideals of art and religion were sustained in the potter. It is perhaps an unparalleled circumstance in modern art history, this continued restraint of the facile craftsman from commercialism or convention. It is a proof that true simplicity is not the limited expression of primitive peoples, but the fine reserve of the highly cultured.

Reproductions of Metal Work Acquired by the Metropolitan Museum of Art.

IN a recent issue of the *Bulletin of the Metropolitan Museum of Art* J. H. Buck, the curator of metal work, gives some interesting information as to some of the reproductions that have been recently obtained by the museum. He says:

"A number of new pieces have been added to the collection of metal work presented to the museum by the late Henry G. Marquand. Among these accessions is a large cast of a Saracenic, 13th century door plating, formerly in the Mosque of Beybars I., and now in the Victoria and Albert Museum. In the center is a boss with a lion rampant, the insignia of Beybars I., surrounded by plaques of geometric design, and above and below this a boss similarly surrounded. On the upper part, in black, is a knocker; on the right, a number of arabesques, and at the bottom a portion of an Arabic inscription.



Of Italian workmanship is a bronze bust of Henry VII. from the statue in Westminster Abbey—one of the earliest Renaissance tombs there—modeled by the Italian sculptor, Torrigiano.

Copies of Danish metal work are: a silver-gilt tea set of six pieces, made for Christian VI. of Denmark, at Ausburg, 1730, and similar to that made for Hedwig Sophia, sister of Charles XII. of Sweden and wife of Frederick IV.—now in the Rosenborg Palace; a bucket with a cover and two handles, made in 1577; a large plate warmer, 1673; a guéridon, 1670; a "toby" jug; candlesticks, etc.

Representing German workmanship there is a silver "Jamnitzer" cup, supposed to have been made by Wenzel Jamnitzer, a celebrated goldsmith of Nuremburg, formerly the property of the Goldsmiths' Guild of that city and now in the South Kensington Museum; a crystal-gilt cup and cover, mounted; and a cup with chased ornaments and medallions of mythological subjects, also from the Nuremburg Town Collection.

Three silver salvers—one in the possession of the King of Portugal—a monstrance, a pax, a sand-glass stand, a coffret, and a tazza, the originals the property of the Academy of Fine Arts, Lisbon, show Portuguese craftsmanship, while a repoussé tankard with a cover, embossed in foliage and flowers, supported on three foliated ball feet and having a medal of Gustavus Adolphus, King of Sweden, inserted in the cover, exhibits the work of Sweden in the 17th century.

The Hoffmann Jewelry Case Co., 17 Arapahoe St., Denver, Colo., has more than doubled its floor space since it started in business 20 months ago, and owing to the increase in the business the concern has opened a store at Los Angeles, Cal.

NEW EFFECTS IN CAULDON CHINA

THE jeweler who is desirous of obtaining an addition to his stock which will at once appeal to the discriminating taste of his customers will find much to interest him in the 1910 line of Cauldron china now on exhibition at the salesrooms of Edward Boote, 46 West Broadway, New York. The display includes a noteworthy series of signed plates in scenic subjects by Birbeck, the famous Cauldron artist. Among these are plates showing Venetian scenes with a wide acid etched border. The line of attractively decorated flower and fruit design plates, with and without heavy borders, is shown. The plain plates with acid gold borders are still popular, and the assortment this year includes many choice examples of this plain but effective treatment. A very thin bone china finger bowl with desert plate to match in a number of dainty decorations in wreath and other pattern designs are included in the present display. The line is one of the most comprehensive seen in the New York district this season.

*

SMOKERS' ARTICLES N MANY METALS

AN acceptable adjunct to the retail jeweler's stock is found in the product of S. Sternau & Co., who have on exhibition at the New York salesrooms, Broadway and Park Pl., a large line of articles which fit in nicely with the jeweler's regular stocks. Among the articles exhibited is an extensive line of chafing dishes in a variety of patterns and sizes. Brass and copper ash receivers in novel forms are also exhibited, among which is one with two shutters forming an upper bowl into which the refuse is thrown. When a small handle is turned the ashes fall to the bottom of the receiver and are thus kept out of sight all the time. Smoking sets, consisting of cigar and cigarette holders, ash receiver, cigar lighter and round tray trimmed in beaded edges are made by the same firm in brass, copper and silver plate.

*

ATTRACTIVE SERVICE PLATES

THERE is now on exhibition at the salesrooms of the Ceramic Importing Co., 39 Murray St., New York, an extensive line of service plates. Floral designs with a lace gold background are included in the decorative effects shown on some of the plates, while others are more conventional in treatment. A line of old-time shapes in unique designs, combining the Colonial day style with the brush work of the modern artist, appear in various sizes. A large variety of other treatments are shown which will be sure to meet with approval.

The Law of Averages

The value recovered from the Manufacturer's Sweepings and Waste should bear a definite relation, governed by the "Law of Averages," to the amount of metal that passes through the shop.

Have you determined in your own mind the percentage of value you should recover, and is that value represented by the check you receive at the end of each quarter?

If you want to work this out perhaps we can be of assistance to you.

WORKSHOP NOTES AND QUERIES

ers are also solicited from our readers to the questions published on this page.]
ention paid to communications unless accompanied by full name and address of the writer.

STION No. 2441.—**Yellow Matt Finish Brass.**—*How can a yellow matt finish made on smooth cast candelabra* *Y. M.*

SWER:—The matt is already on the castings, and all that is required is to it out Do this by pickling the cast- a solution of hydrofluoric acid, one water, three parts. When the casting rs clean then put into bright dip of parts of nitric and sulphuric acid, one tablespoonful of salt to the gal-

STION No. 2442.—**Grease Separator.** *are the small diamonds separated other minerals at the mines?* *G. S.*

SWER:—The grease separator is used ther the small diamonds. This is an ed table greased with tallow; the mass washed runs over this with the water. Diamonds will adhere and all other passes over.

STION No. 2443.—**Rapid Soft Solder.** *use give me proportions of lead and or what is known as safe, or rapid, r of special fluidity.* *S. S.*

SWER:—The soft solder known some- as safe soft solder consists of the ving proportions: Tin, 63 parts; lead, arts. To make this solder out of half- half soft solder, melt it in a ladle or ble and allow it to cool slowly. A will arrive before the mixture entirely ens when one part congeals to a granu- pulp while another part is still liquid. latter can consequently be poured off e right moment. This poured-out mass e soft solder in the same proportion as n above This is very fluid and can be to soft-solder the most delicate objects.

ESTION No. 2444.—**Cleaning Pewter Before Plating.**—*Kindly tell me how to pewter, lead, etc., before coating with er for the purpose of subsequent gild- r silvering.* *R. S.*

NSWER:—In order to gild or silver-plate per, etc, it must, as is well known, first ated with copper. On the durability e copper deposit depends the excellence e subsequent work. The simple cleans- of pewter by scratching with a brass sh is entirely inadequate; it is much r and more reliable to place it in a phuric acid pickle (somewhat stronger t is made for boiling off) and then to b it thoroughly with powdered pumice- e and a hard, brittle brush so that the is perfectly bright. Then we again b it with clean water and powdered ice-stone thoroughly, rinse it in clean r, transfer it to a well-warmed copper bath and work with a weak current. The metal must not be placed in a bath without current, but the anode is first suspended in it and the current turned on, and then we suspend the object for a quarter of an hour in the bath. So treated, the copper coating will withstand the subsequent scratch-brushing

QUESTION No. 2445.—**Producing Metal Leaf.**—*Can you give me a process by which I can produce metal leaf, leaf gold, leaf silver and platinum in thin form for decorative purposes?* *P. & P.*

ANSWER:—In *Edelmetal Industries* the following new method of producing precious metal leaf is described: In the manufacture of leaf proceed as follows: A solution of luster preparation, which is resinate of a metallic oxide, dissolved in essential oil, is applied on a smooth surface which neither heat nor acids will affect, and burned in. In this burned-in luster surface the solution of a bright precious metal preparation is applied and likewise burned in, *i.e.*, the non-oxidizable bright metals, like gold, platinum, etc., are put in ordinary fire, the oxidizable osmium, for instance, in a closed muffle, which is filled with a reducing or neutral gas, such as illuminating gas, hydrogen gas or carbonic acid. A thin film of precious metal is thus produced which can then readily be detached by eating away the luster layer by treatment with acids. In the most complete manner the detachment of the little film is effected by coating the thin layer of precious metal before etching away the ground with a thin covering of collodion or varnish. One can also obtain an electrolytic or reinforced metal layer in the same manner by coating with collodion and eating away the background, which is soluble in acids. If, then, the eating off of the luster background is attempted the film of precious metal will be in faultless condition, because the collodion coating perfectly protects it. The collodion skin may be removed by acetic acid, may be burned off or may remain, where in many cases it will strengthen the metal leaf. The precious metal films are of absolute uniformity, which is never the case with those produced by the gold beater. The luster preparation of all metallic oxides, which, after burning in, are soluble in acid, can be used for this process. The same effect as with the lusters is obtained by the employment of fluxes, readily soluble in acids, such as borosilicates, phosphates, etc., which are applied and burned in in the same manner. To eat away the background use mineral or strong organic acids—acetic acid, for instance. By this manner one can obtain every desired combination or alloy and consequently every shade of color from one or more precious metals in leaf form by suitable combination of the solutions of the precious metal preparation. This is of immeasurable importance for the precious metal industry. Effects may be obtained that are quite impossible by any other method, and in the production of inlaid work and similar decorations the process offers particular advantages. Leaf osmium cannot be produced in any other manner because osmium is non-fusible, and by reason of this fact and its brittleness it cannot be adapted to the gold beater's processes. By the method just described leaf osmium can be produced as easily as any other leaf metal. By applying the solution of the precious metal preparations in any desired figures decorations of any description may be obtained, which can be applied to innumerable objects. Even entirely novel decorative systems are possible, because these thin pattern films can be modeled on to plastic foundations, and by this means relief work can be made with less trouble than could otherwise be obtained only by stamping or repoussé work.

QUESTION No. 2446.—**Brass Lacquer.**—*Can you give me through your columns the formula or name of a liquid preparation which, when applied to brass, will cover soldering streaks and also prevent the brass from turning black during handling?* *S. T.*

ANSWER:—A lacquer suitable for brass would partly cover streaks and prevent the brass from tarnishing. The brass articles must be polished and finished in the usual way, then wiped clean from all dust or anything that may adhere. The lacquer is then brushed on with a camel's-hair brush and let dry in a warm place. The room where this is done should be clean and free from dust. The lacquer and brush can be purchased from any platers' supply house.

Coloring of Aluminum.

(From the *Brass World.*)

ALUMINUM is a difficult metal to color. Practically all of its compounds are white so that, in order to produce a black or dark shade on it, electroplating with another metal must be done, and this in itself is difficult. Even though a satisfactory deposit may be produced, the oxidizing or color may remove it or cause it to blister or peel.

For coloring aluminum, colored lacquers will be found the best as they can be obtained dead or glossy and of any desired color. They are readily applied and are quite durable. After much experimenting and unsatisfactory experience in attempts to color aluminum in other ways, many manufacturers have now arrived at the conclusion that the use of lacquers is by far the best for coloring it, and are now using them with good results. Excellent examples of such work are found in aluminum optical goods made in France and Germany.

The quarters occupied for several years past by the W. F. Longmate Co., Elmira, N. Y., have been rented to another concern, and the jewelers have been obliged to seek a new location.

The First Watchmaker

WHO BOUGHT

Fulcrum Watch and Clock Oil

was Geo. W. Chritzman, of Gettysburg, Pa. Hearing of it from a traveling man he ordered a bottle each of Watch and Clock Oil from the factory before it was ever shown to a jobber.

READ WHAT HE SAYS

in an unsolicited letter:

Gettysburg, Pa., March 2, 1910.

Fulcrum Oil Co.,

Gentlemen: You may be interested to know that I have been using your Watch and Clock Oil for nearly two years now, and in my thirty years' experience at the beach, it is the first time I have been free from oil troubles. I have tried all kinds of Watch and Clock Oils and I must say that yours is the only one that has ever been entirely satisfactory. It would seem the same as going back to a key-winding watch to use any oil but yours now.

Yours respectfully,
(Signed) GEO. W. CHRITZMAN.

Don't you think that an oil that is spoken of, as in the above letter, is worth a trial?

35c. a bottle—For Sale By All Jobbers—$3.75 per dozen

FULCRUM OIL COMPANY, Franklin, Pa., U. S. A.

New Spring Needle

T. A. S. Fountain Watch Oiler

No. H, 1036. Price, $1.00

No Danger of Injuring Needle as with Others!

When not in use, needle springs back into case and may be placed among tools without danger of damaging point. It has a coil spring inside, which, when pin is pushed out of notch, carries the oiling needle automatically back into use, thereby protecting it.

The outer case is made of polished hard rubber with nickel plated front cap.

Cap or collar on glass tube is removed by unscrewing, and easily cleaned by pushing out cork valve and drawing fine wire entirely through needle tube.

By its use oil is kept absolutely clean and practically air-tight, and watchmakers will admit this is the most potent factor in the repairing of a watch.

Full directions with every oiler.

WHY

we are able to pay more for your old gold, silver, plated jewelry and platinum, sweeps, etc., than you have been accustomed to receive — we don't

GAMBLE

on valuations — we have been in the smelting and refining business for over fifty years, and stand to-day with practically no competition. We pay the highest market prices

ON

Gold, Silver and Platinum found in your waste as ascertained by the most expert corps of assayers in the United States, and in addition make a special allowance for so-called by-products for which you have never heretofore been paid. Our

RESULTS

have always been greater than expected, as our splendid record shows, and if you fail to label your next shipment

GOLDSMITH BROS. S. & R. CO.

20 JOHN STREET - - NEW YORK

we will both be losing money. Our profits are contained in the moderate charge we make for working the material, which our wonderful facilities bring down to a very small percentage. We

GUARANTEE

that you will be more than agreeably surprised by our offer if given a trial, but if by the most remote possibility it should not be quite to your

SATISFACTION

we will gladly return your shipment in same condition as received with all charges prepaid.

The Keller Jewelry Mfg. Co.

TO THE TRADE:

"A principle which we have always fought for has been to keep the market open for all watch cases, no matter of what manufacture, believing it to be for the best interests of the trade to allow them to buy the watch cases which they consider the best on the market and by so doing stimulate all manufacturers to their best efforts, with a view of establishing a high standard of excellence. The Dueber Watch Case Mfg. Co. in all its many years of existence has never sought to dictate to any jobber what watch cases he should use. It has never used, directly or indirectly, any method of coercion or force to either restrict the product of any watch case manufacturer, or to force the production of its cases upon any wholesale or retail jeweler to the detriment of any other manufacturer of watch cases. It employs the 'open door' policy in selling merchandise and believes that the trade should be open to all manufacturers and jewelers alike and to that end will bring all its energy to bear for the good of the entire trade."

SEAMLESS GOLD-FILLED RINGS

RESENT SLEDGE HAMMER METHODS

BLACKSMITHS should have a monopoly of the Sledge Hammer; it is out of place in the jewelry trade.

The hammer is a good instrument for driving a spike, but a poor one for driving a Man. In fact men—real MEN—refuse to be driven at all. They *resent coercion.*

This Company approaches the trade in a totally different attitude. In selling

Wadsworth Watch Cases

the appeal is made simply to the Good Judgment, the Natural Requirements and the Best Interests of dealers. In a word, the Keynote is MERIT. And it is the trade's appreciation of this that spells Success!

Such being the case, the business enjoys a HEALTHY growth, an HONORABLE growth and a STEADY growth—without the Sledge Hammer.

CABLE ADDRESS "ON TOP," LONDON

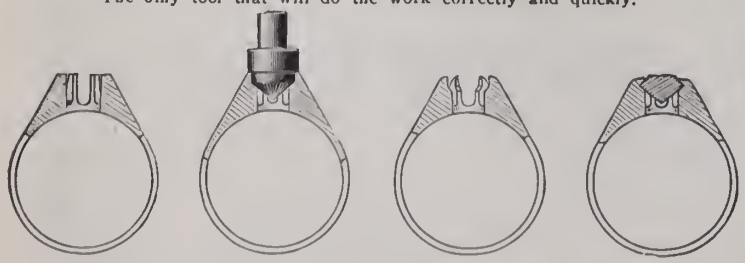
ECHARCO IMPROVED WATCH GLASS CABINET, No. 35

The NEW FEATURES of this Cabinet are the SKELETON DRAWERS, making an accumulation of dust and chips impossible, and the very easily read LABELS of white celluloid on the drawer fronts. The Cabinet has nine drawers, giving 1,632 spaces, 29½" high, 24" wide and 13" deep. The construction of drawers, arrangement of partitions to economize space and weight, a novel method of showing contents on the drawer pulls are all new and practical ideas and very well carried out. The Cabinet is made of oak and finely finished, and is the lightest and strongest Cabinet on the market. Spaces are provided for the small sizes of Lancashires and Genevas, and for Antiques, which no other Cabinet provides for, making it the most complete and convenient Cabinet ever offered to the trade.

Price, $16.00

PEGWOOD SHARPENER, No.

A new attachment, designed for use on a watchmaker's lathe, which sharpens pegwood to a hair point without breaking. At the same time gives the point the proper concave shape. The tool is held in the lathe by an arbor fitting into a regular wire chuck, as shown in the illustration, being steadied by the rest shown. The stick of pegwood is rotated by hand while the tool is revolved in the lathe, producing a fine, long, flexible point. With this tool the watchmaker can prepare enough pegwood for a day's or a week's work in a few moments, and have every piece uniformly and properly sharpened.



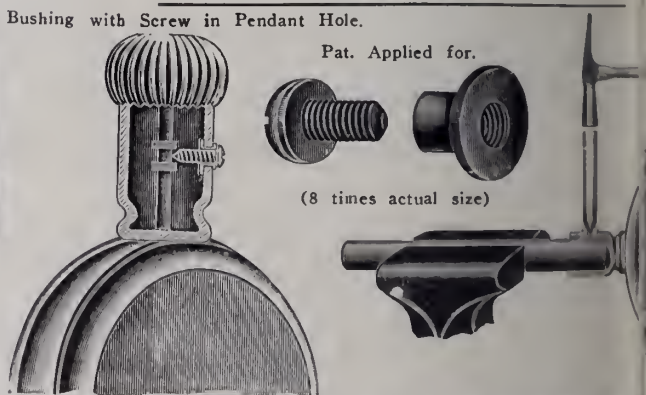
The tool is mechanically perfect, made of the best materials, durable and cannot get out of order. For sharpening the cutters the use of a fine Arkansas oil stone slip is necessary. Coarser abrasives should not be used.

Price, each, $2.00

DIAMOND AND STONE SETTING TOOL No. 85 (Pat. Applied for)

The only tool that will do the work correctly and quickly.

These tools, invented by a stone setter of many years' experience, will do the work they are intended for with absolute perfection, whether in the hands of an experienced or inexperienced workman. In eight seconds after adjustment in lathe will cut a smooth seat for any stone from 1/16 to 2 carats.



Tools are made of polished and hardened steel and are indestructible. Will fit in chucks Nos. 30 and 44.

The greatest labor saving device ever invented in the line of stone setting cutters. Put up in neat block and box.

Price, Per Set, $5.50

Bushing with Screw in Pendant Hole.

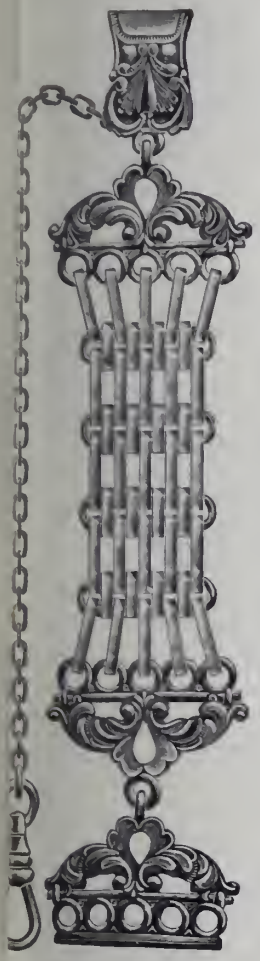
Pat. Applied for.

(8 times actual size)

THREADED PENDANT SCREW HOLE BUSHING, No.

Made in Brass for 18, 16, 6 and Os Lever Set Cases, and in German Silver for 2, 3, 4 and 5 oz. cases

Cut shows watch case pendant with pendant screw hole bushed, inserted and also screw, and shows repair as it looks when completed.



DIRECTIONS.—Ream hole to size of bushing, then place pendant screw bushing in hole and place pendant with bushing on it as illustrated above, and with a centering punch force over edge of bushing and then put in screw and repair is made.

No need of soldering up or plugging up of damaged pendant screw holes and damaging the pendant and case as well.

Every watchmaker knows how difficult it is to repair a pendant screw hole after the screw is pulled out, due to bending and rusting of the screws. This outfit makes a quick and good job.

Put up 1 dozen assorted Bushings and 1 dozen assorted Screws to match in a Brass Box.....

OUR APRIL CATALOGUE

IMPROVED IN STYLE

A Jeweler's Companion

THE SUCCESS of our Sheet Circulars has led us to change the style of publication to BOOK FORM. The details incidental to this change have caused a delay in issuing the March Bulletin, which will appear early in April to serve for April and May.

Our April Catalogue, therefore, in its new dress, will prove particularly interesting. Among other things, a full description of the ELDRIDGE MOVEMENT will be given. An exceptional line of CLOCKS will be listed, and much new matter added. Quotations present unusual values. Write for this catalogue—now, while you think about it. There's business in it.

AISENSTEIN & WORONOCK

Diamonds, Jewelry, Silverware, Watches, Clocks, Novelties, Watchmakers' and Jewelers' Tools and Materials

22 Eldridge Street = = = NEW YORK

1000 BAGS DAILY

It is estimated that there are fifty million women in the United States. Not over two million ave mesh bags. **We** must supply the other forty-eight million with machine-made mesh bags.

The reason why machine-made Mesh Bags are better than hand-made Mesh Bags is

at we use **much harder wire** than used on hand-made bags, and machines harden it still ore in working, making wire **stiff and strong, no rough joints to catch,** and wear the dress. ronger and better than soldered mesh.

We also make the only **ABSOLUTELY SOLDERLESS FRAME EVER MADE,** other **-called solderless** frames have joints or some parts soldered.

We are the **sole** manufacturers of machine-made mesh with **solderless** frames.

How Factory Cost Prices Benefit You

We have made a radical change from the usual manner of determining the price you pay for Silverware that is distinctly to your advantage. You don't have to pay the extra percentage ordinarily added to the factory cost to cover the railroad fares, hotel bills, etc., of salesmen. We sell you direct by mail from the home office—and the mail has no expense account. You can be sure that the actual value is in every piece of goods you buy and that the price is based on the manufacturing cost alone. On account of this change in policy and owing to the elimination of selling expenses we have revised the listing on our entire line and offer you Woodside Standard Deposit Ware and Sterling Silver at prices that allow you to

Make 15% to 20% More Profit

Our reputation for quality is your guarantee of worth. Every piece of Woodside Standard Deposit Ware reflects the skill of expert workmen, and the creative genius of our artists is well shown in the attractive individuality of our Sterling Silver designs.

The Sterling Silver vase illustrated combines a slender, graceful shape, so much desired with a maximum water capacity, while the heavy weighted base and felt covered bottom assure steadiness. This line comes in varied sizes from 4 to 20 inches high either plain, as in the illustration, or beautifully engraved. We have made our prices so low on this series of vases that they can't fail to be of interest to you.

The violet holder is a new idea in this country and is patterned after a design that is a ruling craze in all the European centers. The spreading top displays the violets to the best advantage and the design fills a distinct want in vase construction. The deposit shows pure white inside and is guaranteed not to come off.

Never before has high quality Silverware been sold at such attractive prices. A glance at our catalogue is convincing. Get your name on our mailing list—write to-day.

Our regular Spoons and Forks receive a triple silver deposit at the points of wear (marked XII) which enables us to guarantee that our product will outlast any and all other brands of silverware plated by the old method of a uniform silver deposit.

Your Reputation

and

Our Reputation

depend upon the goods we sell

To retain your trade and to add to it you must sell the best goods obtainable. For the same reasons we make and sell only the best.

We are not relying alone upon our past reputation to sell our goods. Dealers know that our strong hold upon their trade is obtained by our constant effort to produce the best silverware.

Our Sectional Process has proved our ability to produce the most durable silver-plated ware made. Our long experience and success insure to the dealer handling our line a quality that will enable him to secure the cream of the retail trade in his locality.

The low prices which we quote on these exceptionally fine goods make our plated ware the most attractive proposition on the market as a money maker.

Send for our Catalog and give us a trial order. It will add to your reputation as a dealer in very fine silver-plated ware

"The Case That Courts Comparison"

Mr. Retailer:

It required a quarter of a century to bring SOLIDARITY GOLD WATCH CASES up to their present point of perfection.
Merely stamping "SOLIDARITY" on the *inside* of our cases did not do it.
It is the SOLIDARITY **Individuality** on the **outside** of our cases that did it. Individuality is the hardest thing to buy and the easiest thing to sell. SOLIDARITY CASES have it.

SOLD ONLY THROUGH THE WATCH JOBBERS

SOLIDARITY WATCH CASE CO.

Krementz Bodkin Dress Sets

Enters Like a Needle

Closed

Set No. 2422 P.

Holds Like an Anchor

Open

COMMEND themselves to fastidious and careful dressers by their beauty of design and perfection of workmanship The

Krementz Bodkin Back

is the greatest improvement in Studs and Vest Buttons for evening wear ever introduced. There are no loose parts to get lost; no hinges nor springs to break. Positively non-breakable. Pierce the eyelet or buttonhole as easily as a needle; no danger of soiling or mussing the stiffest shirt bosom. Can be worn equally well with coat front or open back shirts. Prices for complete sets—including Cuff-links—range from $9.75 to $175.00. Studs, buttons or links sold separately.

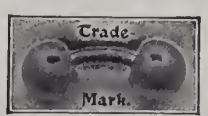
for the

Neck



Exceptionally Beautiful

THE SIGHT of these Neck Pendants arouses instant admiration of their beauty. It is difficult to find the right adjectives to express them. Perhaps it may suffice to say that they possess just the qualities to delight the feminine heart.

¶ The charming designs and the very pleasing way in which gems are employed, produce effects of the richest character. The Pendant being the decorative feature of importance, the dainty Chain is finished to harmonize. The results must be seen.

Why do Steiner's Festoons Sell Better tha... the Numerous Imitations?

First—Because the Steiner Mfg. Co. originated white stone festoons at popular prices.

Second—Because white stones in brass mountings cost very little, but artistic designs are scarce and we have them.

Write us for information regarding our new goods—if your jobber hasn't them in stock.

THE HUMMER NEW MONOGRAM SAW MACHINE

SPEED
ACCURACY
TIME-SAVER

Price, $16.50

Can be used in every case instead of the hand saw. Permits both hands to handle the work with ten-fold speed and absolute accuracy.

For making all sizes and kinds of monograms, belt pins, buckles and fobs; for cutting away superfluous solder, and for watchmakers in sawing plate or wire, where often a file is used.

Size 9″ x 9″ x 3″. Well made and finished. All joints, spindles and wearing parts are case-hardened and guaranteed.

Run by $\frac{1}{8}$ twist belt connected with any small foot or motive power, requiring no more power than an ordinary watchmaker's lathe.

...t Silver Gilt Altar of Pistoia ...hedral Showing Work of Many Artists.

...ue of May 19, 1909, some space ... to the "*Pala d'oro*," or ... rs of Venice and Milan ... illustrated a similar altar ... considerable renown, but con... of silver gilt, namely, that at the ... l of Pistoia, executed by various ... of the 14th and 15th centuries. To ... r chasing are added niello enamel ... ptured ornaments. The entire ... occupied a number of eminent ... om the year 1314 until 1466.

The center compartment of this altar was, after years of labor, finished by Andrea di Puccio di Ognibene. It contains figures of the prophets and apostles, richly enameled and colored and 15 gospel and apocryphal histories; the ornaments are in the usual fine and florid Gothic styles.

...R GILT ALTAR FRONT. PISTOIA CATHEDRAL, STARTED 1314, COMPLETED 1466.

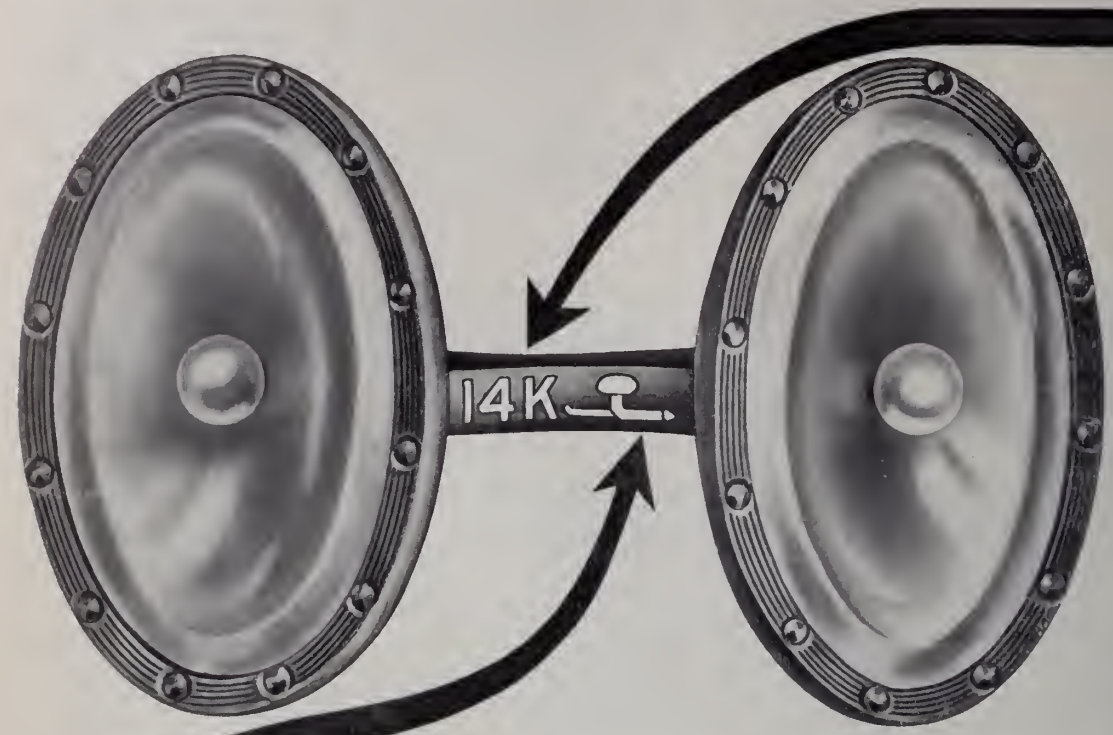
Another portion, the lateral compartment on the right, is probably by Maestro Pietro di San Lionardo, of Florence, between 1355 and 1364. These are histories from the Old Testament. The bosses are enameled with rich colors also and in an elaborate style.

The third portion on the left is by Lionardo de Ser Giovanni, a scholar of Orgagna, finished between 1366 and 1371, and represents events from the life of St. James, the last tablet the translation of his life to Compostella.

The shrine of St. Otho and the several statues are partly by Pietro di Arrigo, a German, who settled at Pistoia between 1387 and 1390; partly by Brunelleschi, whose bust of the prophets is of great beauty, and the last figures, angels and saints with tabernacles, are the production of Nofri di Buto, a Florentine, and Atto di Pietro Braccini, of Pistoia, who worked at them till 1398.

These were the principal artists, but many others contributed to the work. They, of course, exhibit a great variety of styles. As to the designs, after those of Brunelleschi, Lionardo's are the best. Some parts are chased, others chiseled out of the solid silver. The altar front is one of the foremost works of the period.

C. A. B.



Magnificent Bacchus Basin Made by an Old Augsburg Silversmith.

THE gorgeous repoussé basin in silver gilt shown on the front cover is the work of the Augsburg goldsmith, Joh. Andr. Thelot (1654-1734). This artist is famous for his repoussé figure reliefs, excellent specimens of his work being preserved in the Vienna treasure chamber in the Dresden Green Vaults, in the Frankfort Rothschild collection and in other places.

The basin illustrated to-day is a most exquisite work of art. In the center we see Ariadne on Naxos. Ariadne was the daughter of Minos, King of Crete, and the wife of Bacchus. She is supposed to have given to Theseus the thread which enabled him to get out of the labyrinth of Minos. On the broad space around the center is a representation of a Baccahanalian festival, with Bacchus and the young goddess in its midst and all around them Bacchic dances and erotic scenes.

The pitcher belonging to this basin, which bears the date 1714, is no longer in existence.

The safe of F. G. Peterson, River Falls, Wis., was blown open early one morning recently and robbed of its contents, estimated to be worth more than $1,500. The safe-blowers also carried away about $150 worth of stock belonging to Dunn Bros., hardware dealers, in the same building. The police as yet have not received the slightest clue to the yeggmen. This is the first safe cracking which has taken place in the vicinity of River Falls during the past 12 years. Mr. Peterson has been engaged in the jewelry business at River Falls for the past 30 years.

TALKS ABOUT TRADE-MARKS

NUMBER FOUR

IDENTIFICATION

A big word with a big meaning when applied to gold jewelry. How important it is to the Retail Jeweler for him to know just what he is talking about when selling a piece of gold jewelry. It is also just as important for his salesman to know.

When you are selling a Ring, Locket, Sleeve Button, Vest Button or Shirt Stud and notice the TRADE-MARK, like that stamped in this illustration, you can say to your customer "There is a piece of jewelry of unquestioned quality, strong construction and is fully guaranteed by the Manufacturer."

A TRADE-MARK is the means of IDENTIFICATION, therefore get ours thoroughly fixed in your mind. It stands for something.

Next week's Talk, Number Five, will be entitled "THE VALUE OF OUR TRADE-MARK"

The Crown Jewels of Various Nations.

By Charles A. Brassler.

(Continued from issue of March 23.)

The powerful Russian empire has at its disposal a crown treasure that is marvelously rich in the rarest and most costly gems and pieces of jewelry, for the lords of the Russians have always been great lovers of costly gems and goldsmith work, and there seldom occurred a halt in the increase of the crown treasures. In addition to the many important relations with foreign nations and the numerous visits made by Russian sovereigns to other crowned heads were often the means of bringing valuable presents into the imperial treasury. The enormous wealth of jewels, etc., is stored in the Kremlin, at Moscow, and in the Winter palace at St. Petersburg, the value of the two collections being estimated at $26,000,000. The chief interest in the Russian crown treasures centers, of course, in the two imperial crowns made for the Emperor and Empress. The exceedingly costly crown of the Czar was made in 1883 by a Swiss goldsmith for the coronation of the Empress Catherine II., the most splendid and the most extravagant of all the female rulers. Twenty-eight magnificent dazzling diamonds of selected purity decorate the golden frontal band and numerous genuine pearls, rubies and other precious stones are effectively mounted on the heavy gold rims and bands of the crown, which is said to have a value of $625,000.

The crown intended for the Czarina, which is of more recent date, is of considerably smaller size, and although it has many costly precious stones and pearls, is however much less valuable than the crown of the Autocrat of all the Russians.

Dazzling and bewildering are the incalculable treasures belonging to the Russian imperial house, that are stored in the historical old Kremlin at Moscow, to which, after all the valuables had been removed, the torch was applied under Napoleon's eyes, to be later rebuilt with added splendor. Here, together with an inestimable wealth of gems, including among others the famous Orloff diamond, once the eye of an Indian idol, that weighed 900 carats in the rough and now after various cuttings, in its egg-shape weighs 102 carats and which bears the names of the famous

THE JEWELS AND SACRED RELICS OF THE OLD EMPIRE OF GERMANY.

nobles of the empire, superb gold and silver vessels, we find also the valuable regal insignia and costly golden throne of Russia's great past from Ivan the Terrible to the present day. Of course, Dame Rumor does not neglect to inform us that much of the valuable treasure in precious articles, jewels and gold and silver vessels are neither more nor less than the plunder of the savage wars with the Orient and neighboring powers.

Of notable value is an old golden throne of Ivan III. of Russia, a gift from the Turkish Sultan, that contains no less than 10,200 precious stones. Of the imperial Russian orb, it may be noted that its surface bears 38 valuable diamonds, while the apex is crowned by a dull glittering sapphire, flanked by two brilliant stars; furthermore, the chain of the Order of St. Andrew, that belongs with the Russian Orb, is also richly set with gems and diamonds.

Austria-Hungary cannot compete with Russia or with the wealthy pomp-loving insular kingdom, and compared with them has but a modest treasure of jewels and royal insignia, although it excels the frugal house of Hohenzollern. Of great value in the possession of the house of Hapsburg are the orbs, new and old crowns and richly patterned table vessels; there is likewise a considerable store of rare, costly diamonds and other precious stones. Remarkable and conspicuous in the Austro-Hungarian crown treasures is a diamond of 135 Austrian carats, on which history has bestowed the title for not plainly stated reasons of "The Grand Duke of Tuscany." In Vienna are also preserved the crown jewels of the former German empire.

The jewels and sacred relics of the Holy Roman Empire (late Empire of Germany) consist of the imperial crown, the imperial orb, two scepters, the sword of Charlemagne, the imperial sword of ceremony, the sword of St. Maurice, the book of the Holy Gospels or Evangelisterium, the imperial cross, a golden reliquary and various minor articles. It is needless to say that Germany is extremely anxious to have these interesting mementos of the old German Empire in Berlin, but the house of the Hapsburgs, the ancient rulers, are equally determined not to part with them, and although Austria is not a part of the present Germany these regalia of the Germany of old are jealously guarded in the "Schatzkammer" of the Hofburg at Vienna.

The present Emperor of Germany has no crown. Designs were made for it, but it

a never executed. The proper distinc- must, however, be made between Ger- a and Prussia, and the reader must not nde that the Kaiser has no crown as of Prussia.

l nce sold her magnificent crown jewels 87, as a republic is not supposed to any, but retained some fine pieces, which figures a large diamond, to more than ordinary historical inter- tached. It is known as the Regent, or iamond, weighs in its cut state 136¾ , and is unrivaled for its limpid clear- and perfect form, its diameter and being nearly equal. It was found in mous diamond mines of Golconda, bad, British India. It was brought India by an English gentleman by the of Pitt, grandfather of the first Earl tham, the famous British statesman, as by him sold to the Duke of Orleans 50,000, whence its name the Regent. ately it found its way into the pos- n of Napoleon I. and was set in the f his sword of state, and it is now a cuous feature of the remnants of rench crown jewels preserved in the o gallery of the Louvre.

central case in the gallery contains last remains of a once wonderful col- n, the chief pieces being, besides the t, valued at 12,000,000 francs, the t Mazarin," a large rose diamond, a cut in the form of a dragon, which led the "Coté de Bretagne," the cle- of Denmark, the coronation sword of les X., the crown of Napoleon I., a n, wrongly styled the crown of Char- gne, ornamented with antique cameos, that of the coronation of Louis XV., hich last named all the stones are imi- ns.

e closing chapter of recitals of the gems e possession of the prominent sover- s may be devoted to the Hohenzollern sty. The Brandenburgh-Prussian rul- ave shown notably but little regard for y beautiful, glittering precious stones brilliants, although Saxony, Bavaria, t have quite a few. The Great Elector, Frederick Wilhelm I., and his son, Fred- s II., made but modest purchases among court jewelers of Berlin and Potsdam, rikingly beautiful and valuable brilliants pearls we may seek in vain in the enzollern crown treasure. Frederick Great certainly found a great hobby in f boxes of the most costly make and gn, and at his decease left no less than of these snuff boxes, but to-day, thanks e liberality of his successors, there are about a dozen of them left. The ious and costly materials entering into e Frederican tobacco boxes (of agate chrysoprase, set with precious stones diamonds) may be gathered from the e of 8,000 to 9,000 thalers placed upon n by connoisseurs and experts. To r of Frederick the Great there was also le in 1739 by David Lieberkuhe, the then known and highly esteemed Berlin lsmith, a massive golden table service, the Prussian crown treasure, that cost ut 129,000 thalers, a very respectable sum n we consider the value of the thaler hose days. Of this costly table service fragments remain in existence. Of erb golden and enameled neck chains, brooches, bracelets, souvenirs and the like, the royal treasure of the Hohenzollerns, who do not even possess an imperial crown, has quite a respectable collection.

While in some instances the notable pieces in the crown jewels of various nations may have been gifts or purchases, by far the larger portion of them were acquired by battle or rapine, and the history that attaches to these sparkling treasures is dark and sanguinary, out of all keeping with their beautiful appearances and the use to which they are put in gracing the pacific and gorgeous pageants and ceremonies of their royal owners.

(THE END.)

The Jewelry Industry of Hanau.

IN a recent issue of the *Feuilleton*, a German newspaper, appeared an article by the well-known expert, Dr. Heinrich Pudor, of Leipsic. It is entitled "Two Localities of the German Metal Industry." The first part is dedicated to Hanau. He says:

The German precious metal industry is chiefly represented in the localities of Pforzheim, Hanau and Shwabisch Gmünd; Pforzheim is supreme for quantity, its quality improving, but machine-made duplication being the aim. But in Hanau hand-work and genuineness rules, costly work for Germany's best jewelers and foreigners coming mostly from Hanau. Mostly pieces are not duplicated, at most two of a kind; chains perhaps six times, never by the dozen or gross. Hanau looks like a city of artisans, not a factory town. The products are chiefly jewels, some silverware and chains being made.

Diamond cutting and platinum work are strongly represented. "Really high-priced jewels, of course, come from Paris," says he, "but with us the chief thing is to get material value, melting value. In the cause of art this is to be regretted, and it holds back the art of the jeweler," etc. He shows the uselessness, from a financial point, of truly high art in jewelry by instancing that during the Cologne Exposition, 1906, but few of the Olbrich pieces were sold. Only Paris can get high prices.

He says his recent visit to Hanau showed him that there were produced really artistic work—"quality-craftsmen" and spirited artists doing daily work. "We have here, beyond doubt, handwork of a high degree. That precious stones and metals valued in the thousands daily passes through their hands is easily understood." The jewelry workers earn on an average 1,200 marks a year with 200 to 270 days' work. Designers, painters and "cabinet-masters" make 2,000 marks or more. They distinguish between jewelers, chainmakers, fitters, goldworkers, engravers and chasers, mounters, hammerworkers, grinders, polishers and female chainworkers.

Hanau is at present great on platinum work, which in the last 10 years has taken the place of gold and silver. As to gems, sapphires and emeralds are preferred, garnets, rubies, opals and less known gems are less considered. "No doubt the fashion for diamonds, since the discovery of German diamond fields, will grow. This fashion that has injured the taste for the purer beauty of the gem and the semi-precious stones," he bemoans. But the Hanauer must continue the diamond industry while the public demands are there.

The writer gives a description of what he saw of the great chain industry of Hanau, of the lovely gold color obtained by dissolving out the base metal from the surface in a saltpeter bath. The silverware made in Hanau is mostly in historic styles, though table plate is produced.

Dr. Pudor visited the diamond cutters working on East African stones. In one establishment he found no less than between 40 and 50 cutters. He also describes the machines used in the jewelry factories, but space forbids a translation here. A machine that, with one attendant, turns out chains entire, 120 metres a day, and in all styles, excites his surprise.

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., March 23.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the port of New York for the week just ended:

Bangkok: 3 cases clocks, $102.

Barcelona: 2 cases optical goods, $572; 4 cases optical machinery, $205.

Bombay: 68 cases clocks, $1,159.

Bremen: 7 cases watches, $4,686; 1 case jewelry, $310; 1 case optical goods, $110.

Buenos Aires: 5 cases clocks, $404; 4 cases jewelry, $484; 20 cases plated ware, $1,751.

Calabar: 1 case watches, $125.

Colombo: 18 cases clocks, $293.

Colon: 3 cases jewelry, $191.

Demerara: 2 cases optical goods, $133.

Dominica: 3 cases optical goods, $104.

Frankfort: 3 cases optical goods, $265.

Glasgow: 1 case jewelers' findings, $133.

Hamburg: 15 cases optical goods, $1,011; 2 cases optical goods, $400.

Havana: 87 cases clocks, $1,495; 1 case jewelry, $127.

Havre: 2 cases silverware, $1,578; 4 cases plated ware, $504; 6 cases jewelry, $182; 1 case watches, $190; 2 cases optical goods, $346; 6 cases clocks, $270.

Karachi: 46 cases clocks, $750.

Liverpool: 96 cases clocks, $2,159; 2 cases plated ware, $548; 43 cases silverware, $1,175; 43 cases watches, $3,458; 3 cases thermometers, $571; 1 case optical goods, $160.

London: 3 cases sapphires, $900; 5 cases watch oil, $160; 2 cases clocks, $130; 14 cases watches, $2,115; 1 case thermometers, $187; 1 case optical goods, $450; 3 cases optical goods, $669; 6 cases clocks, $316; 113 cases clocks, $2,698; 1 case watches, $460; 10 cases optical goods, $5,349.

Manila: 9 cases plated ware, $1,470; 10 cases silverware, $5,219.

Melbourne: 7 cases plated ware, $239; 1 case optical goods, $488; 69 cases clocks, $1,160.

Montevideo: 12 cases plated ware, $1,771; 3 cases optical goods, $175

Nuevitas: 1 case plated ware, $334.

Munich: 1 case silverware, $200.

Port Natal: 32 cases clocks, $702.

Rotterdam: 6 cases watches, $920; 5,042 nickel plates, $86,250.

San Miguel: 17 cases clocks, $156.

Singapore: 23 cases clocks, $318.

St. John, N. F.: 17 cases clocks, $197.

Soerabaya: 1 case silverware, $500.

Trinidad: 9 cases clocks, $106.

Valata: 8 cases clocks, $120.

Vienna: 4 cases clocks, $320.

Wellington: 18 cases clocks, $556.

Zanzibar: 21 cases clocks, $269.

The retail jewelry store of W. E. Witter, Des Arc, Ark., was visited by burglars recently and a large amount of jewelry was stolen. Entrance was gained through the front window of the building.

Involuntary Bankruptcy Proceedings Begun Against C. W. Morgan, Missing Pittsburg Jeweler.

ersburg, Pa., March 24.—An involun- petition in bankruptcy was yesterday m the United States District Court st Charles W. Morgan, a jeweler at Butler St., who has been mysteriously ing from Pittsburg for three months. petitioners are Morgan's brother, J. Morgan, and other creditors, whose s aggregate $2,204.72. It is alleged March 19, Howard Q. Turner ob- d an execution and judgment in the of $7,875, and had a writ of execu- issued, causing the sheriff of Alle- y County to levy on the missing jew- s goods and advertise them for sale l A. M., March 26. A petition filed the bankruptcy papers asks the court rant an injunction restraining the ff from selling the fixtures and stock ublic sale, and the injunction was ted

hen the matter was called to the at- on of Judge Orr he appointed the h Side Trust Co., Fifth Ave., Pitts- , trustee, and issued also a writ of nction against Turner, restraining him well as the sheriff from seizing the ing jeweler's property.

eorge T. Kroesen, who was receiver the missing man, this week filed his and final account in Common Pleas rt No. 4, Kroesen having been ap- ted receiver at the request of Mor- s wife Kroesen has accepted a posi- in Chicago, and told the court that it ld be to his disadvantage to remain receiver. He charges himself with 49, and claims credits of $944. The bal- e on hand when the report was filed was 04.

lorgan has never been located since a coat and battered hat were picked up he river bank at Natrona, although the was traced several days after he dis- cared, having been seen alive following recovery of the clothing.

he police are not satisfied that Morgan dead. The man's affairs have occupied attention of the local courts here for e time. The action of Kroesen filing account further complicates matters, ce the bankruptcy petition has been filed. editors have 21 days in which to file ex- tions to Kroesen's petition. As the tter, however, has reached the United tes Courts the man's affairs now will wound up through this channel.

t the time of Morgan's disappearance it s reported that his liabilities were about 00

Thief Accused of Pittsburg Jewelry Robberies Pleads Guilty to Some Charges and Denies Others.

Pittsburg, Pa., March 24.—Stephen J stin, the man who is alleged to have own a brick through the window of m Studer's store, Federal St., North le, last November, and made away with ods valued at over $400, and who played e rôle of a lone highwayman at several ces in the East End, pleaded guilty to number of charges this week in Criminal urt. Austin also confessed to the police that he watched the store of the Hardy & Hayes Co one Saturday afternoon for three hours, intending to smash the firm's window and make away with diamonds valued in excess of $40,000.

Austin in court denied the Studer robbery, and said that he did not have anything to do with it, and no evidence was introduced to show that he had, although at first he told the police he had committed this theft

In view of the fact that Austin had previously borne a good reputation and comes from a good family, Judge Cohen gave him a sentence under the new parole act. Austin must serve at least two years and not more than 10 years for his crimes. At the end of two years he can apply to the prison board to be released on parole, and if the prison board so elects it can release him on parole. But if Austin lives to get this advantage he must make monthly reports of what he has been doing, where he works, what he earns, and all about himself. If he does not "walk in the straight and narrow way," he can be returned to prison any time to serve the full 10 years.

The sentence of the young man was satisfactory to the trade.

Diamond Market of Amsterdam Still Quiet, but Prices Remain Firm.

Amsterdam, March 20.—Business has been fairly quiet here for the last two weeks; only a few important buyers have visited this market, and those who did were very careful and only bought what they needed. Nevertheless prices are very firm and show not the least tendency to go lower. As noted in a previous report, the manufacturers here are not afraid of the future; they are patiently holding their stocks for better times.

The London Syndicate does not feel much effect from the quiet market, as it continues showing new shipments every week, most of which are sold at sight. This week two big manufacturers, one of Antwerp and one of this city, did not buy the goods they applied for on account of the assortment being too poor. Notwithstanding that business is quiet the Syndicate does not give any inducement to purchase either in price or quality. On the contrary, it is constantly making the price higher by giving less value in the way of assortment for the same price.

Buyers who visited this market in the last fortnight include representatives of: Abrahams & Cooper, Birmingham; Saril & Kohn, Antwerp; Ryrie Bros., Toronto; Backes & Strauss, London; Scharcher & Strom, Berlin; M. Nadaner, Paris; Lambert Bros., New York; Bozenhardt, Hamburg: E. Neubauer, Antwerp; Marchand Fréres, Paris: E. Boutelye & S. Cigaar, Paris; Y. Citroen, London; L. & M. Kahn & Co., New York; M. Kahn, Stuttgart; M. Nourat & Y. Slang, Paris; Ludovic Strauss, Paris.

Wm. H. Becken, Beaver Dam, Wis., has admitted a partner and purchased an interest in a general store in that town.

Lambert Neuburg has purchased a site at 355 Main St., Oshkosh, Wis., and will erect a two-story building in which he will conduct his jewelry business.

Secretary Wheeler Gives Interesting Information to the Members of the American National Retail Jewelers' Association.

Columbia, Mo., March 23, 1910.

Editor The Jewelers' Circular-Weekly:

Last week we sent out a circular about the official door plate, and have had many responses from the members, but nothing like as many as we should. Every member should have one of the plates, and as the cost of the plate delivered to the jeweler is only $1, we should have orders for 2,000 instead of a few hundred. I sincerely hope the jewelers who have put off ordering one will do so at once. We will begin to send out the plates which have been ordered in about a week.

Blue prints of the exhibition space at the Cadillac Hotel in Detroit are now ready for manufacturers and wholesalers who desire to make an exhibition. While we have not as much space as desired, I believe all will agree that it is the best located and arranged we have ever had at a meeting. As this will undoubtedly be the largest gathering of jewelers ever assembled in this county, the opportunity for publicity will be the best ever offered to those who want to reach the retail jeweler. I will send a copy of the floor space and all information to any who is sufficiently interested and will write me. Already we have had many applications, and the limited number of spaces will not last long. There are no bad locations, but, of course, some are better than others, and the first to apply will be first to have an opporunity to select.

Every State which has reported dues reports many new members, and altogether the prospects are for a very large membership this year and an unusual interest in the affairs of the association. Jewelers everywhere are awakening to the importance of the association work and joining with us in the work. All State secretaries and presidents should take advantage of this feeling and renew their efforts to get new members of the several State associations. And secretaries should make prompt reports to this office of dues paid and new members added. Nearly every day we receive letters from members asking why they do not receive renewal seals or a certificate, and requesting one. We cannot issue these until the secretary reports to this office. If you have paid your 1910 dues and have not received a renewal seal, write to your secretary, and ask him if he has sent your dues to the national association.

Retail jewelers shou'd begin to plan to attend the national convention at Detroit this year. An excellent programme is being arranged, and the entertainment which will be offered at Detroit will surpass anything ever attempted at one of our meetings. In addition to the entertainment which we offer the natural facilities of Detroit are wonderful. Every jeweler owes it to himself and his wife to go and take her to Detroit the last week in July.

Any information desired either by retail jewelers or manufacturers will be gladly furnished by this office.

Yours very truly, Claude Wheeler,
Sec. Amer. Nat'l Retail Jewelers' Assoc.

DIAMONDS

Recent importations have added largely to our stock. We can now, as always give you stones of any size or quality at reasonable prices. No matter what you want, we can serve you.

LA VALLIERES

Ass ees of G. W. T. Case, New Bedfo , Mass., Give Detailed State- ent of Assets and Liabilities.

BEDFORD, Mass., March 26.—The rs of George W. T. Case, of this whose assignment was noted in the ssue of THE JEWELERS' CIRCULAR-LY, have been given a statement of sets and liabilities by assignees Henry tterson, of Boston, and Gerrett Geils, New Bedford.

inventory is as follows: Assets—andise at cost price, $6,292.12; fix- safe, tools, etc., $1,300; accounts, cash on hand, $246.56; total, $8,338.68. ties—Owing for merchandise, as far rtained, $6,339.05; borrowed money, total, $14,589.05.

assignees state that they "hope to a good offer of compromise from Case," but if the same cannot be t about they advise "seeking a re- ble purchaser for the stock and store, t the business may be continued as re customer for the creditors."

assets in detail are figured as fol- Watches $917.22, rings $830.64, dia- and mountings $1,100.38, gold jew- 071.06, clocks $282.64, umbrellas $172, novelties and toilet ware $263.57, sil- ated ware and brass goods $822.41, ass $77.20, solid silver $296, plated $487, opera glasses and leather $72.

Death of Thomas J. Fox.

, Mass., March 28.—Thomas J. head clockmaker for Bigelow, Ken- & Co., died March 25 at his home in ester after a long illness, following ck early in the Winter, accompanied art complications.

Fox was born in England 68 years nd came to this country in his youth e as a civil war veteran, serving in the on the flagship of Admiral Farragut. the war he learned the trade of a maker and clockmaker, and for the 42 years had been in the employ of ouse, for a number of years being in e of the clock regulating, setting up epairing department.

was a man of sterling character, and much esteemed by the firm and his ciates. The funeral, Sunday, was largely ded by his fellow workers, and the ow, Kennard & Co. quartet sang at ervices, which took place at his resi- . He left a widow and three sons.

Mysterious Disappearance of Gems from Store of Jeweler of Los Angeles, Cal.

LOS ANGELES, Cal., March 23.—Mystery rounds the disappearance of a number solitaire diamonds from the store of J. nson, 404 S. Broadway. They disap- d some time between Friday morning aturday night. At the suggestion of the ives Mr. Abramson is reticent about g out information. It is reported, how- that the goods were of the value of , that they were contained in a small nd that while a stranger was negotiat- e purchase of other goods of the value a confederate managed to seize, con- nd get away with the gems.

Abramson does not deny that the robbery took place. In fact, he expressed surprise that the fact had been learned. He says he has no suspicion of anyone in his store being concerned in the robbery, as all his employes have been with him for a long time and he has entire confidence in their integrity.

New York Jewelry Salesman Sentenced to Prison for Not Less Than Two Years or More Than Five Years.

Herman F. Marschner, the jewelry salesman who pleaded guilty to a number of counts charging him with grand larceny, was sentenced last Thursday by Justice Davis in the trial term, part 1, of the Supreme Court, New York, to not less than two and not more than five years at Sing Sing. Marschner received jewelry from a number of dealers on memorandum, which he finally pawned. He pleaded guilty to a number of different counts, but was sentenced on the charge of havig stolen a jeweled pin from the Ben Spier Co., as there was no question as to the actual theft of the jewelry in this case. The jewelry in some of the other cases was obtained on memorandum and pawned, and the property is still in the possession of the court, the matter not having been settled as to its return.

When Marschner appeared to plead to the charge against him a large number of pawnbrokers and creditors were in court to learn the disposition of the goods, and, if possible, to obtain their property.

Marschner was arrested on Jan. 8 on a warrant sworn out by Louis Marx, 37 Maiden Lane, which charged him with grand larceny. The case went on to the calendar, but was delayed and did not reach trial until recently. The jewelry obtained all told amounted to about $4,000.

Boston, Mass., Jeweler Charged with Larceny of Diamonds Obtained on Memorandum.

BOSTON, Mass., March 26.—Arthur R. Grover, of the Jewelers building, formerly of Adams Sq., where he had a retail store, but met with financial reverses, was arrested to-day on a charge of larceny preferred by S. B. Kantor, also of the Jewelers building.

Mr. Kantor entered complaint with the police to the effect that Grover obtained from him some time ago diamonds valued at $1,640, on the plea that he had a customer to whom he wished to show them, and was allowed to take them out on memorandum, with the understanding that they should be returned in half an hour if not wanted by the customer. Kantor states that the stones were not returned, and no payment thereon has been made.

Grover was arraigned in the Municipal Court and was held in $3,000 bail for further examination March 31. He could not get bail to-day, and was taken to Charles St. jail. A large number of pawn tickets was found in his possession.

Arthur H. Grange, Toulon, Ill., has admitted a partner, the firm style becoming Grange & Farley.

Death of E. C. Stahn.

CHESTER, S. C., March 23.—E. C. Stahn, a well-known jeweler and business man, died at his home on York St., Monday morning, following a short illness from acute meningitis. The deceased had been in gradually failing health for two years, but at times seemed much better and had been able to be at his post even as late as Saturday, so that family and friends were totally unprepared for the suddenness of his taking off.

Mr. Stahn was born in Breslau, Germany, Sept. 3, 1852. He was trained for his life's work in the best schools and training shops in his native land and in 1870 came to this country to make his home. He resided in New York for four years and in 1874 came to Chester to take a position with the late R. Brandt, Sr. In 1877 he went into business for himself and had been unusually successful. In addition to being master of his trade he was possessed of splendid business acumen and had the happy faculty of being able to make friends.

In December, 1875, Mr. Stahn was married to Miss Victoria A. Nail, eldest daughter of Mr. and Mrs. Pinkston Nail, of which union two children were born, Miss Bertha Stahn, of Chester, and Carl Stahn, of New York, who survive their parents.

During his career of 36 years in Chester Mr. Stahn did much to help the town and community. In addition to founding and organizing a number of enterprises, he was financially interested in others and was a citizen who could be counted on in any endeavor that looked to the city's growth and prosperity. He was always ready to help the suffering or distressed and performed numberless acts of charity and kindness that were not generally known. He was a member of the Lutheran Church.

The funeral services were held at the home yesterday morning at 11 o'clock.

Death of Mark Hammerschlag.

Mark Hammerschlag, a gold and silver refiner at 151 Park Row, New York, died, Tuesday of last week, at his home, 1411 Avenue P, Brooklyn. He was born in New York City Dec. 10, 1858, and had been a resident of Brooklyn for more than 20 years. He had been in business over 30 years. He also dealt in diamonds and was interested in real estate.

Mr. Hammerschlag was a member of the Brooklyn Lodge No. 22, B. P. O. Elks, and for a number of years was a prominent parishioner of St. Augustine's R. C. Church, Sixth Ave. and Sterling Pl., Brooklyn. For several years past he had been affiliated with St. Brenden's Church, E. 12th St. and Avenue O.

Deceased is survived by two daughters, Retta, wife of Dr. David S. Feets, and Mamie, wife of James W. Hilbert, and a son, Joseph. The funeral services were held last Wednesday evening under the auspices of the Elks. The burial took place the following day in Holy Cross Cemetery.

James W. Kalbach, Reading, Pa., moved recently from 15 to 13 N. 9th St., after having been engaged in business in the former location for about 15 years. In his new quarters he has much more space.

THE SYNTHETIC SAPPHIRE

thanks to its high merits, acknowledged by scientists the world over and given the widest possible publicity by the press, at once takes its place among the class of gems most popularly known and appreciated

The real Synthetic Sapphire is produced exclusively by us and is the only sapphire that is the exact counterpart of the natural.

None but those sold under the name of

"HOPE SAPPHIRES"

Registered United States Patent Office

are the genuine Synthetics.

To distinguish an ordinary Scientific Sapphire from the natural or our Hope Sapphire, apply the Hydrofluoric acid test. This acid reacts on glass, but has no effect on either the natural or our Hope Sapphire.

Meyer Baturin, Bankrupt Harrisburg, Pa. Jeweler, Convicted of Defrauding Creditors.

...SBURG, Pa., March 26.—Meyer Ba... bankrupt jeweler and pawnbroker, ...Market St., whose stock will be sold ...e in Bankruptcy J. J. Conklin on ...o was convicted in the Crimi... ...before Judge Kunkel on a ... preferred by Harry Garfinkle, ...his numerous creditors, of vio... ...Act of 1903, prohibiting the ...t property with the intention ...ding creditors. There is an addi... ...rge of receiving stolen goods upon ...turin will be tried next week.

...ry was out three minutes after be... ...the charge of violating the Act of ...ring a verdict of guilty. The ...or conviction imposed by the act ...yment of a sum equal to the value ...perty concealed and imprisonment ...iod not exceeding one year.

...Berkheiman, Esq., private counsel for ...itors, in his address to the jury ...substance that early in September ...defendant, Baturin, had heavily ...ns store with watches, diamonds, ...brass and silverware to the value ...0 to $20,000. On the strength of ...mber of jewelry concerns had sold ...e holiday season orders. Later in ...r the stock in Baturin's store be... ...uced to about $3,000. At that time ...stated that he had done absolutely ...ss in two years. In the middle of ...r he had sent out letters to his ... giving his liabilities at $25,000 and ...s at $4,000, at the same time offer... ...lement of 25 per cent.

...n. 12, according to the attorney, ...told one of his creditors, it was al... ...at he had about $12,000 worth of ...den in his safe and that he would ...ith this creditor on a 50 per cent. ...he would use his influence with the ...phia creditors to accept a 25 per ...lement. In February Baturin went ...luntary bankruptcy, and an ap... ...nt of his store showed stock valued ...3,000.

...rosecutor contended that the stock ...n taken out and hidden in order to ...t the creditors and perpetrate a big ...

...arfinkel, the first witness, testified ...g Baturin several hundred dollars ...f jewelry on Dec. 4, 1909, on the ...s of his stock showing, he estimating ...s stock of watches alone at about ... that time. Dec. 31, when he next ...Baturin's store he was amazed to ...almost depleted stock, there being ...ngle diamond of any value, and ...ver and nickel watches in place of ...tock of gold and silver timepieces. ...proved an excellent witness, com... ...of several tilts with the defendant's ...with flying colors. He stated on ...amination that he had never failed ...ness and denied carrying $10,000 ...diamonds with him.

...min Abrahamson, of Philadelphia, ...witness, who made two sales to ...r before the holiday season, told of ...ily stocked condition of the store ...Baturin's attempt to bribe him to ... a basis of 50 per cent., provided he would use his influence with the other Philadelphia creditors to settle on a 25 per cent. basis.

Other witnesses called were M. Sperling, of Philadelphia; Julius Schoenberg, of this city; J. J. Conkling, Esq., and Thomas Sykes, of this city, for the prosecution, and Louis Baturin and L. Adelstine for the defense. Messrs. Conklin & Sykes testified to finding the cellar so full of excelsior and packing paper upon taking charge of the establishment that they were compelled to have the cellar cleaned out to avert danger of a fire.

Baturin's defense was that he had lost much of his money in gambling in the hope of retrieving his fortune. He became considerably entangled in his stories of how he lost his money, and that his defense carried no weight was evident from the speedy agreement upon a verdict by the jury. On one occasion Baturin testified that he went to Baltimore without any money, sold a bill of goods to the value of $1,200, but that he had lost over $1,300 that same night in a gambling den in Baltimore. Baturin was a very poor witness in his own behalf, and became badly mixed at times in his story of how he conducted his business and lost his money.

Bank Intervenes in Bankruptcy Proceedings Against Herman Keck Mfg. Co.

CINCINNATI, O., March 28.—Friday, March 25, the Western German Bank of Cincinnati filed an intervening petition in the United States District Court in the involuntary bankruptcy proceedings against the Herman Keck Mfg. Co. The bank seeks to secure some 56 diamonds that it is claimed were set aside by the company for the payment of four notes aggregating $975, signed by the H. Graham Jewelry Co., Hattiesburg, Miss., to secure an indebtedness for that amount due the Keck company. The bank purchased the notes from the latter. The Mississippi concern, believing that the Keck company was the owner of the notes, paid the money to the latter instead of to the bank.

A second cause of action states that the Lawrence Jewelry Co., Claborne, Tex., was indebted to the Keck company for $2,894.42 shown by notes. It is alleged that the Keck company assigned four of them, amounting to $861.90, to the bank. Since then the Texas firm went into bankruptcy. A claim was put in by the Keck company for the full amount and it then received two dividends, one for 10 per cent. and the other for 6.7 per cent. The bank got its share of the first dividend but not of the second, which, it is claimed, was paid to the receiver of the Keck company.

An effort is now being made to secure a payment from the second dividend.

Death of H. T. Higgins.

DENVER, Colo., March 23.—H. T. Higgins died at his home here, Wednesday night, March 16, at 11 o'clock, of pneumonia. He was taken sick Sunday night. Mr. Higgins had been in the jewelry business on the North Side for 13 years.

The deceased was much respected and honored by all with whom he came in contact, both in business and social affairs. He was 59 years of age and came to Denver from Augusta, Ky.

Meeting of the Retail Jewelers' Association of the District of Columbia.

WASHINGTON, D. C., March 23.—The Retail Jewelers' Association of the District of Columbia held their regular monthly meeting in the rooms of the Washington Chamber of Commerce on F St., N. W., last night and had as their guests Messrs. R. B. Smith and J. J. Bartholomee, Baltimore, representing the Maryland Retail Jewelers' Association, Inc.

Vice-President Hutterly acted as chairman in the absence of the president and in opening the meeting introduced the guests and spoke of the friendly feeling of the local society toward their friends in Baltimore and hoped that these relations would long continue. His few remarks were replied to in kind and the meeting then took up the regular routine of business.

Messrs. Hansen, Kettler and Edwards were appointed a committee to assist the legal committee (Messrs. Darr, Peyser and Curtin) to finish the matter of incorporation. The membership committee presented the application of Charles Plitt, 1337 7th St., N. W., which was accepted, and Mr. Plitt duly elected. It was with sincere regret that the members present acted on the resignation of O. B. Bestor, whom business will require to stay at Lake Toxaway, N. C., for some time.

Certain correspondence between the Maryland Retail Jewelers' Association, Inc., and various manufacturers relative to the sale by the latter of their wares to individuals and firms doing business under unfair conditions were read by the secretary. These matters are receiving much attention by the various associations throughout the country and the referred-to correspondence shows that their united efforts are bearing fruit.

After the close of business Messrs. Smith and Bartholomee spoke on the progress of the Maryland association and gave those present some valuable hints on their system of credit and on the evils of appraising goods bought from other jewelers.

S. Desio followed with an interesting account of his recent sale by auction, much to the amusement of all.

Among those present were: Vice-President Hutterly, Secretary J. H. Duehring, Treasurer Prince, John Hansen, Carl Peterson, W. J. Kettley, Charles Zanner, S. Desio, M. B. Korman, Max Greenberg, B. Greenberg, J. R. Fearno, M. H. Fearnow, I. Saks, Charles Schwartz, Louis Baum, R. B. Smith and J. J. Bartholomee, of Baltimore.

Death of Gus Ehert.

DENVER, Colo., March 23.—A sad surprise to his friends was the death of Gus. Ehert, a manufacturing jeweler of this city. Mr. Ehert died Tuesday, March 15, at the County Hospital of pleural pneumonia after a brief illness.

He had been in Denver for the past 20 years, working for most every large shop and store in the city. He was 48 years of age and came originally from Boston, Mass.

The store of A. Schmidt, McKeesport, Pa., was damaged during a fire at that place. The store is located at 826 Braddock Ave.

the vacancy in the office of fifth ent of the New York State Retail Association, caused by the death B. M'Clelland, Syracuse, Presi- s has appointed Albert Zilliox, of who has been a member of the committee since the organization ociation. Mr. Zilliox is succeeded s J Routledge, of Elmira, who is of the membership committee of the association, and who has been quite active in the affairs of the association Plans are being actively carried out, which promise to make the convention at Rochester on Thursday and Friday, May 26 and 27, the most successful of any of its kind yet held. Jewelers of the Empire State who believe that there are certain trade abuses which can be lessened or eliminated by united action should write to President C. T. Evans, at Utica, N. Y., or Secretary C. E. Sunderlin at Rochester, N. Y., and request information how to become a member of the New York association.

As recently noted in THE JEWELERS' CIRCULAR-WEEKLY, the officers of the Ohio Retail Jewelers' Association have decided to hold the 1910 convention at Columbus, O., three days—May 2, 3 and 4—at the well-known Southern Hotel. It was the unanimous opinion of all that Ohio should have one of the best, if not the best, of all State conventions of retail jewelers held this year. To that end they are preparing a high class program consisting of talks by jewelers of national prominence, including such men as National President J. P. Archibald, A. L. Sackett, H. C. Carpenter and many others. Men who are prominent in Ohio will also prepare most interesting papers, and some lectures on technical subjects will also be delivered. Added to this many social and entertaining features will assist in making it worth the while of any jeweler in the State to attend and assist us in the effort to improve conditions in the retail jewelry trade. Every Ohio jeweler who is not now a member is requested to join and should send at once his application to the secretary, A. L. Thoma, Piqua, O. A circular letter calling attention to the benefit of joining has been sent to the entire trade of Ohio by Secretary Thoma and President Ausman.

BLACK OPALS

An ideal gem for artistic jewelry is the opal. The artistic possibilities are without number.

We have been very fortunate in securing another lot of the rough stones, which are getting scarcer, and are cutting them ourselves as usual, in our own shop, each gem to the best advantage.

Frackman Held on Ne Exeat
Creditors Doubt His Story of Robbery in Chicago.

Frackman, who was in business Liden Lane, New York, when a bankruptcy was filed against y and who claims to have lost rth of diamonds in Chicago on west a few days ago, was be- missioner Alexander in the ttes District Court Monday after- his creditors how he came to iamonds. The court room was nterested spectators who were ear the jeweler's story. He taken into custody by United rshal Henkel on a writ of *ne* eep him within the jurisdiction rt, issued by Judge Hough at t of William Blau, receiver in , and bonds were fixed at $10,-

ckman at this examination said t New York about March 7 and Cleveland, O., where he stayed He then went on to St. Louis, wo days, where he met his son, there to Chicago. He arrived in city Saturday, March 12 and re- til the next Wednesday. He said he registered at the Palmer Chicago he had with him a trunk two cases of jewelry and a wal- contained his diamonds. Sunday ay he saw several people in Chi-

morning, the day on which he lost the diamonds, he got up clock and after breakfast visited aces and returned to the hotel clock in the afternoon and had hat night about 8 o'clock he vis- er's saloon, where he had a num- inks and met a man who wanted vellow diamond. He said he told hat it would be best to wait until lay for him to look at the stones, finally he opened a few packages on but did not make a sale. Later ed to his room at the hotel, but and went for a walk to get some He got another drink and uite a distance—so far, in fact, n he started back he became . He inquired his way and took k to the Palmer House. When to undress he discovered the loss allet.

tness said it was then about 2 the morning and, being much e didn't know what to do. Finally to sleep and the next morning d to a friend, named Weiss, whom l in a saloon on W. Madison St. e to the saloon and, finding Weiss, of his loss after first getting him e not to tell that the wallet was is friend suggested that they re- loss to the police, and after se- letter to the chief of police they and told him of the loss, but did any name.

arranged to put an advertisement ewspapers and after that Mr. went to Cleveland on the next r the occurrence. From there he to New York, arriving in the s on Friday morning, March 18.

When he reached New York he went to his office and explained to his son that he didn't feel well, so he came home sooner than he expected. He testified that in about two hours he visited his lawyers and explained in detail the entire situation to them.

A meeting of the creditors was called and the story told them soon afterward.

Mr. Frackman was first questioned in regard to his business career and as to financial statements made by him to agencies. He said that he continued to make money from the time he started in business down to 1909 and that if a statement shown him, dated Jan. 1, 1909, was signed by him he was worth $40,000 on that date. He said his liabilities were between $130,000 and $140,000 when the receiver took possession of his business.

Morton Frackman, a son, was called to testify in regard to a ledger which was shown him. He said that he made the entries in the book kept in the business, but would not commit himself as to the exact time when any entry was made. He explained that some of the entries in the ledger were copied from slips and that he didn't know how long a time after they were made they were entered in the ledger. He said the slips were torn up after being copied.

To most of the questions asked him about the book he answered, "I don't know." The lawyers were unable to learn anything very definite from his answers.

He told the story of the loss of the diamonds as he had heard it. His version was substantially the same as the story told by his father.

The hearing was adjourned until tomorrow.

A stormy meeting of Mr. Frackman's creditors was held Thursday afternoon at the Astor House, but, aside from an offer of 35 per cent. in settlement of claims against the alleged bankrupt, nothing developed. The offer was not accepted.

The same afternoon a meeting of creditors was held at the rooms of the Jewelers Board of Trade in New York. A committee of creditors was appointed to investigate the case. It is said that the jeweler's assets consist of $12,000 worth of stock; accounts, $7,000; notes, $2,500; cash, $3,800, and fixtures estimated at $300. A trunk has been received from Denver, Colo., from Mr. Frackman's son, who was on the road selling jewelry, and is said to contain goods valued at $15,000, but a lower estimate is placed upon these goods by the receiver in bankruptcy.

The story of the loss of the $50,000 worth of diamonds is not generally believed in the trade.

A man giving his name as Ralph Pierce was brought before Magistrate Stockman recently on the charge of having tried to break into the jewelry store of A. N. Peoples, Chester, Pa., one morning shortly after midnight. After breaking one of the windows on the Edgmont Ave. side of the store, the fellow was captured before he had time to gain entrance to the store. He will be held for a further hearing of the court.

Diamonds Worth Nearly $1,000 Stolen from Jewelry Store in Baltimore, Md.

BALTIMORE, Md., March 27.—The success met with by a professional window smasher, last week, when M. Koenigsberg's plate glass was smashed in a clever manner and the thief managed to get away with about $300 worth of lockets induced an amateur to smash the window in the store of John W. Mealy & Sons Co., 18 W. Lexington St., early Friday morning. The fact that he, too, was successful may have a bad effect. His work was done in a much bolder manner, as he threw a large paving block through the glass, that caused a loud crash.

The stone went through the window and upset a tray of diamonds so that only three remained within reach. The three, however, were worth nearly $1,000. The thief then dashed down the street and made his escape. The three rings were all of single stone settings, and were valued at $385, $350 and $220, respectively.

Some are inclined to believe that the same thief did both jobs, but this is not substantiated by the facts in the case, as both were done in an entirely different manner. The first crime was carefully planned and done without unnecessary noise, while the second was apparently without forethought, as the window was smashed without regard to the noise that would follow, the man depending on his nerve and fleetness to get away. The thief selected six o'clock in the morning for the job, and was only seen by one person. This was Harry Creamer, a private watchman in a department store across the street. Creamer, hearing the crash, ran to the front in time to see a youth running down the street. He described the robber as being about 19 or 20 years old, five feet seven inches tall, with smooth face and wearing a suit of dark material.

Mr. Creamer was taken to the rogues' gallery and picked out a picture of a man he said greatly resembled the robber. The calmness of the youth in breaking the window in the shopping district just when the sun was beginning to rise surprised the police and has aroused them to a decided effort to check the spread of these daring methods and to apprehend the culprits.

Marshal Farnan has requested the jewelers not to leave valuables on display at night, as it is an invitation to any of the desperate characters in the city to take a chance. John W. Mealy, president of the firm, stated that diamonds are not usually left in their windows, but that they were overlooked by a clerk on Thursday night when the window was cleared and the jewelry placed in a safe. Mr. Mealy does not believe that the thief is a professional crook.

Three Men Arrested in New York Have Jewelry Stolen from Safe of Boston, Mass., Jeweler.

The three men describing themselves as Jacob Goldberg, a peddler, Harris Rothstein, a blacksmith, and Joseph Goldstein, an umbrella maker, who were arrested early last Saturday morning in New York on suspicion that they are the men who robbed the jewelry store of Samuel E. Ullian, Boston, Feb. 28, were arraigned in the Jefferson Market Police Court Monday morning and held in $10,000 for examination today.

After the robbery in Boston, by which over $12,000 worth of jewelry was obtained by cutting into the safe, Superintendent Pierce, of the Boston police, sent out a list of the missing jewelry and a general alarm for the arrest of any persons in whose possession the goods might be found. Detectives Kinsler and Duggan, of the New York Central Office force, were assigned to the case in the metropolis. They arrested the three suspects at the corner of Goerck and Delancey Sts.

When taken into custody the men had in their possession, according to the police, a quantity of watches and other jewelry valued at $1,000. One of the watches bore the number of a watch stolen from the Boston store, the police say, but the case and dial seemed to have been changed. The number of the watch case was 7,178,750 and of the movement 357,512.

The numbers are given together as belonging to the same watch in the list, but it is described as an open-faced Waltham watch. These works are now in a hunting case and the dial bore the name of the Broadway American Watch Co. A good deal of the jewelry corresponded to the goods on the list furnished the police and it is understood that the Boston jeweler who came to New York has identified a quantity of the jewelry as belonging to him.

Inspector McCafferty, of the New York detective bureau, is of the opinion that the three men may be able to throw light on a series of jewelry store robberies. On Jan. 15 the jewelry store of Benjamin Saronsen, in New Haven, Conn., was robbed. The burglars took $9,000 worth of jewelry. They left behind a peculiar device with which they had forced Saronsen's safe. A little later the jewelry store of M. Mayer, Philadelphia, was robbed of $9,000 worth of valuables. The burglars left behind a tool identical with that which had been abandoned in New Haven. About three weeks ago the Boston robbery occurred and later a similar attempt to break a safe was made in Plainfield, N. J.

Inspector McCafferty sent his sleuths out to look for the burglars. They knew that Rothstein recently got out of prison and

Although true Black Opal is scarce, we have a notable stock in all grades received by us in a rough state direct from the mines and cut in our lapidary shop in New York.

Our prices are necessarily less than those obtaining in Europe and the fact that no two stones are alike makes this gem very attractive as a profit getter.

WE ARE SPECIALISTS IN BLACK OPALS

All the wonderful changing colors of the Solar Spectrum vibrate through "Black Opal," some in small pin point markings, others in harlequin, peacock and formal designs.

Some stones exhibit broad flashes of red, blue, green and purple while others exhibit cloud effects and sunsets such as Turner painted and only a Ruskin could describe.

Gorham Mfg. Co. Brings Suit Against Antique Dealer Alleging Infringement of Trade-Mark

Action was started Monday in the United States Circuit Court, at New York, by the Gorham Mfg. Co against Di Salvo & Co., dealers in antiques and Sheffield plate, 855 Fourth Ave., New York, alleging infringement of the complainant's trade-mark of a lion, an anchor and the letter "G" in old English type.

The allegations in the complaint are substantially similar to those in the case of the Gorham Mfg. Co. *vs.* F. & M. Weintraub; that the complaint sets forth its undisputed title to the mark for over 50 years, and the use of same in its business, and states that the defendants have fraudulently sold wares bearing a lion, an anchor and a letter G in imitation of complainant's mark, and have also used a variety of symbols the principal feature of the imitating marks being the alleged use of the old English letter "G."

In an interview with the attorneys for the Gorham Mfg. Co. it was stated that it had been found after several months of investigation in the principal cities of the United States that the sale of articles with marks such as the company claims infringe its trade-mark had been much more widespread than was thought possible, and that further actions would be no doubt found necessary against various dealers over such infringing silverware, since all dealers had been put on notice that the company would protect its mark and every opportunity had been given the legitimate jewelry trade to dispose of any infringing goods innocently acquired.

Voluntary Bankruptcy Petition Filed Against Anton S. Borg, New York.

An involuntary petition in bankruptcy was filed yesterday in the United States District Court, New York, against Anton S. Borg, a retail jeweler at 119 West St., New York, by these creditors: Arctic Freezing Co., $230 (rent); Nathan Blume, $100; Charles Eulhardt, $136, and Robt. H. Ingersoll & Bro., $62. It is stated that the jeweler admitted in writing his inability to pay his debts and prepared to file a voluntary petition in bankruptcy, but because of the fee of $30 refused to do so. It is alleged that he removed property with intent to defraud his creditors.

Judge Hough appointed C. L. Cohn receiver under a bond of $500. The liabilities are said to be about $1,100 and the assets about $600.

The petition asking for the appointment of a receiver states that it is believed that the alleged bankrupt has reduced his assets from $3,000 to about $700 without applying the proceeds to the payment of creditors.

It is said that the jeweler's place of business is now closed and that he is outside the jurisdiction of the court.

Henry Held, Pittsburg, Pa., Goes Into Voluntary Bankruptcy.

PITTSBURG, March 28.—Henry Held, doing business at 1118 Carson St., South Side, last week, filed a petition in bankruptcy in the United States Court here. His liabilities are about $4,500 and assets about $2,500. The store was still open last Saturday. There are quite a number of Pittsburg creditors.

Held, who is noted as a watchmaker, started in business here in 1896. For many years he was at 1112 Carson St., but for the past four years has been at his present address. He handles a cheap line and had little capital.

News Gleanings.

A. O. Wold, Langdon, N. Dak., has moved his stock into the First National Bank building, where he has more space and better facilities.

Willis H. Booth, Sioux Falls, S. Dak., has removed from his present quarters, where he has been located for 30 years, to the Emerson Block.

Mrs. Hannie Guthman, wife of E. L. Guthman, jeweler at Youngstown, O., died on March 23 after a long illness of a complication of diseases.

Michael T. White, who was for several years employed in the factory of the Benedict Mfg. Co., East Syracuse, N. Y., died in that town, March 22.

F. W. Harper, Dawson, Minn., has become the owner of the jewelry store at Clarkfield, Minn. It will be conducted under the management of Guy Harper.

Dillon Rogers, a jeweler of Madisonville, Tenn., died at the home of his son, Wm. H. Rogers, Knoxville, Wednesday morning, and the remains were shipped to Madisonville, where the funeral was held Thursday.

It is believed the police will soon locate young Leslie Tooley, who recently left New York with $1,100 in diamonds belonging to H. W. Radder. Tooley has been writing to people in town, and his arrest is soon expected.

The police of Cleveland, O., last week were notified that burglars had robbed the jewelry store of Aaron Bergman, 530 Superior St., getting away with 29 watches valued at $150. Entrance was gained by forcing a transom over the door.

Charles P. Buskirk, bankrupt jeweler, Corning, N. Y., and his wife, were examined, last week, before Referee Darrin as to claims made by Mrs. Buskirk that the trustee had four rings in his possession which belonged to her personally. Mrs. Buskirk identified three rings.

A. Ross, in the employ of Wm. A. Hubbard, Le Roy, N. Y., while engaged in cleaning a watch with gasoline recently allowed the liquid to catch fire and for a moment the establishment was threatened with destruction. Prompt work, however, on the part of both Mr. Ross and Mr. Hubbard soon extinguished the flames, no damage being done.

The Geo. L. Kerr Co., Cornish, Me., is offering to settle with its creditors on a basis of 25 cents on the dollar. A meeting of the creditors was held early last week. The concern is a corporation, of which Nellie R. Kerr is secretary and treasurer and George L. Kerr is president. The latter has been in business a long time and was formerly at Chelsea and Malden, but was unsuccessful. He finally went to Cornish in 1905 and succeeded Geo. C. Allen, and later incorporated with a capital of $10,000, of which $1,200 was paid in.

Pursuant to the formal order of Judge Noyes of the United States Circuit Court, the Gorham Mfg. Co. announces in another column of this issue a correction as to the text of the preliminary injunction granted by Judge Lacombe to the Gorham Mfg. Co. against F. & M. Weintraub. As noted in the last issue the injunction was suspended for 30 days by Judge Noyes until the complainants corrected the previous report of the injunction. A formal order, in accordance with Judge Noyes' opinion as published last week, was entered Friday, and the text of the corrections to be sent out by the complainant in the various trade papers and in circular form was settled by the court.

Pacific Coast Notes.

H. R. Berger has moved from Douglas, Ariz., to El Paso, Tex.

J. J. Wilson, Dunsmuir, Cal., has returned from New York.

Peter Engel, Marysville, Cal., is preparing to move to a new store.

James G. Guard, Maricopa, has just installed a large burglar-proof safe in his store.

R. Van Buren is moving his stock in Ontario, Cal., to a store leased by him in the Slater block.

Harry O. Ball, Sonora, Cal., has been showing in his window a set of officer's jewels for Camp Sonora, W. O. W., given for securing new members.

Gold and plated jewelry valued at nearly $100 was stolen from the store of D. C. Moore, San Leandro, March 18. Entrance was effected by lifting out a window at the rear of the store.

The Arizona Turquoise Mines Co. has sent out from its Mineral Park mine the largest shipments of turquoises ever sent from this district at one time. The shipment consisted of 1,600 pounds of rich gem stone.

The Ernsting Jewelry Co., San Diego, is having plans drawn for a four-story building to be erected on its newly acquired properly on 5th St. The building will cost about $75,000 and will be fireproof. The entire ground floor will be occupied by the jewelry company.

The Coalinga Jewelry Co. has moved into a new store in the newly completed Any building, at Coalinga, Cal., and has just installed new fixtures throughout, making the store one of the finest in that part of the San Joaquin Valley. While moving, a team drawing a truckload of stock and some show cases ran away and one of the cases fell from the wagon, utterly destroying it. Luckily the runaway was stopped before any of the jewelry was lost.

At the annual meeting of the stockholders of the United States Diamond Mining Co., Oroville, Cal., held in that city March 14, it was formally decided to suspend operations indefinitely. The company has become involved in litigation over the title to certain of its mining grounds and it is desired to have this settled before anything further is done. The following directors were elected at the meeting: F. J. Stoers and J. H. Hampel, Oakland; Henry Vail, George P. Morse and M. J. Cooney, Oroville. Mr. Cooney was elected president and treasurer and J. V. Parks secretary.

Joseph Samuels has just added a big 40-horsepower roadster to his garage and intends making long runs about this section of the country during the coming Summer and Fall.

Robert E. Budlong, Jr., superintendent for the S. K. Merrill Co., has joined the ranks of the automobilists, and during the past week has had his new 16-horsepower touring car registered.

Harris & Mowry Co., Woonsocket, has installed in its jewelry department on the street floor a number of handsome jewelry cases of the latest type. They are of mahogany base and plate glass.

O. W. Miller has purchased the coloring and electroplating business of Frank Stead, at 220 Eddy St., which he will continue at the same place. Mr. Stead has commenced the manufacturing of jewelry at 85 Sprague St

William R. Dutemple is one of the residents of the new city of Cranston selected for membership in the City Council. He is a member of the manufacturing jewelry concern of William R. Dutemple & Co., of this city.

Among the traveling representatives in the city the past week were the following: W. H. Galloupe, Crescent Watch Case Works; E. D. Cole, D. C. Percival & Co., Inc.; C. F. Sweasy, Champenois & Co., and S. Woolf.

Edward B. Hough, of Wightman & Hough Co., and Dutee Wilcox, of D. Wilcox & Co., left Wednesday for a cruise of 18 days, during which they will visit Nassau, Havana, Jamaica, Santiabo de Cuba and Bermuda.

Marcus W. Morton, secretary-treasurer of the Manufacturing Jewelers' Board of Trade, has been confined to his house for several days with a complication following an attack of grippe. He expects to be about again in a few days.

Miles L. Carter, of Carter, Qvarnstrom & Remington, of Attleboro, launched his new power boat, *Yankee II.*, at East Greenwich on Saturday. It is expected that it will prove one of the speediest boats on Narragansett Bay this season.

The first society to take advantage of the law enacted in 1909 giving such bodies the right to file with the Secretary of State their emblems, and thus prevent their use by unauthorized persons, is the Providence Lodge, Loyal Order of Moose.

The Guinti & Pike Co., which will manufacture, sell and deal in leather and jewelry novelties in this city, has been incorporated with a capital of $25,000. The incorporators are Sidney O. Bigney, Hallie A. Pike, Augustus C. Guinti and Harold O. Bigney.

Robert M. Hamilton has been elected chairman of the committee on employment at the annual meeting of the Rhode Island division, Travelers' Protective Association of America. Isaac B. Lawton, a former jobbing jeweler, was chosen as attorney for the association.

A fine memorial in the form of a heavy bronze sign with raised gold-plated letters has been presented to the Mathewson St. Methodist Church of this city. It was made by the Gorham Mfg. Co., and is a splendid piece of work. It is very heavy, weighing 350 pounds. With the bracket, it measures six feet six inches each way.

A permit was issued the past week to the Baird-North Co. to add a new story to its present two-story structure on Lexington Ave. and Ontario St. The dimensions of the addition will be the same as the present building, 75 by 200 feet, and will be of brick and provided with fire escapes and other means of protection prescribed by law.

John M. Hickey, 27 years of age, for a long time employed by the Ostby & Barton Co., and for several years previously in charge of various jewelry shops, was found drowned in a small pond in East Providence Saturday afternoon. His family fear he was the victim of foul play, as he had a large sum of money when he left home, which is missing.

Newport people are wondering what has become of George W. Miller, a watch and clock repairer, who has kept a small place on Charles St., that city, for a number of years. About a fortnight ago he placed a sign in his window which read, "I will be back Tuesday." He has failed to return, and one night the past week the police, fearing that Miller might have been sick inside, made an investigation, but failed to find any trace of him.

Among those present at the banquet of the Commercial Club on Saturday night were Henry G. Thresher, president; Mayor Henry Fletcher, E. Frank Aldrich, John J. Butler, Walter R. Callender, William P. Chapin, Theodore W. Foster, Ralph S. Holmes, George H. Holmes, Fred C. Lawton, William F. Lythgoe, Frank T. Pearce, Alfred K. Potter, Albert Remington, Everett L. Spencer, Albert E. Stevens, Frederick B. Thurber and William H. Thurber.

William Fisher, for 20 years a sawyer for the Gorham Mfg. Co., died at his home, 15 Rounds St., this city, Thursday afternoon, after an illness of only about a week. Death was caused by bronchial pneumonia, Mr. Fisher sinking very rapidly after the first attack. He was a native of England and was born at Uley, near Dursley, in Gloucestershire, in 1842. He came to this city in 1887. He is survived by his widow and two sons, and was a member of the Gorham Beneficial Association and the British Club.

Among the foreign importations received through the Providence customs house during the past week were the following: From Bremen, one package of manufactures of metal, one of jewelry and 25 of imitation precious stones; from Hamburg, one package of silverware, two of glassware, one of imitation precious stones; from Havre, one package of manufactures of metal; from Liverpool, three packages of manufactures of metal; from Toronto, one package of gold wire, and from Yokohama, 24 packages of porcelain.

George H. Holmes, president of the New England Manufacturing Jewelers' and Silversmiths' Association, has sent a letter to Chairman William H. Luther of the Board of Police Commissioners, in which the thanks of the organization were trans-

mitted to the police department for their efficient services in protecting President Taft while in this city on the ocasion of the midwinter banquet of the association. Special mention was made of the work of the men at the Union Station under Chief Egan and of the inspectors and plain clothes men under Chief Inspector Horton.

Sidney A. Williams, of Edgewood, was arraigned at a special session of the Sixth District Court last week on two charges. First, he was charged with an assault on Lloyd D. Knowlton, of 28 Niagara St., whom, it is alleged, Williams hit with his automobile. Mr. Williams pleaded not guilty and was held in $500 for a hearing before the Sixth District Court on April 1. On the charge of operating an automobile on Broad St. while under the influence of liquor he also pleaded not guilty and was required to furnish bail in the sum of $300. Knowlton, who was struck by the automobile and dragged 20 feet, was not seriously hurt, it is believed.

George Augustus Wall, formerly a well-known business man of this city, died a few days ago at San Juan, Porto Rico, in his 53d year. He removed with his family to Porto Rico about a year ago for the purpose of engaging in the business of preserving native fruits for export. Mr. Wall was born in this city Nov. 22, 1857, and in 1884 went to Chicago as the representative of the American Screw Co., of this city. There he remained about three years, when he returned to this city and united with his brother, A. Tingley Wall, who had already established the business of manufacturing plated wire and flat stock for jewelers' use. The firm was then located at 118 Orange St., but the business expanded so that it became necessary to remove to larger quarters, which were found at 101 Sabine St., in the Manufacturers' building, where it is at the present time, the firm style being A. T. Wall & Co. In 1897 he withdrew from this concern and entered the automatic fire alarm business, with which he was connected until 1906. The funeral was held at San Juan, and the body will probably be brought here for burial.

Harrisburg, Pa.

The large Telegraph building clock on Federal Sq. is in position.

The National Optical Co. has opened for business at 210 N. 3rd St.

Frank C. Sites, of the C. Ross Boas store, is on the committee of arrangements for the Jefferson banquet to be given April 13 under the auspices of the Central Democratic Club.

Improvements are being made to the City Loan office which will hereafter be managed by Charles Krause & Co. Mr. Krause has been identified with H. C. Claster's jewelry store.

Two colored boys, who were arrested recently for robbing a local store, have subsequently been accused of robbing the Aronson pawnshop on the night of Feb. 10. They have been held for court in $2,000 bail each.

The principal speakers at last week's annual banquet of the Harrisburg Merchants' Association at the Metropolitan Hotel were: President D. P. Jerauld and Postmaster E. J. Stackpole. The association bids fair to be a much stronger factor than heretofore in the business life of Harrisburg.

Another meeting of the subscribers and others interested in the new Camp Curtin memorial clock, which it is proposed to install in the tower of the Camp Curtin school building, will be held to-day. This clock will keep time on the site of what was the longest mobilization camp in the north for volunteers at the outbreak of the Civil War.

Attleboro.

Robert Hunter has resigned his position as salesman for George L. Brown & Co.

Sadler Bros., South Attleboro, have purchased the old fire house at South Attleboro.

Frank H. Sadler, of the F. H. Sadler Co., arrived home last week from Atlantic City.

H. A. Allen & Co. have enlarged their shop and installed considerable new machinery.

Amos Blackinton, of Bates & Bacon, returned last week from a short trip to New York.

George W. Allen, Jr., is back home from a successful trip in the interests of the Bristol Jewelry Co.

Ernest M. Bliss, of the Bliss Bros. Co., left last week with his wife on the steamer *Avon* for the West Indies, where they will enjoy a vacation.

The Electric Chain Co. and the Hansen-Bennett Co., which are managed by Thomas Bennett of this town, are making plans for the removal of their plants from the Bigney factory on County St. to the old Mossberg building on Railroad Ave.

Increased business has demanded that the W. E. Hayward Co. build a substantial addition to the factory on Union St. The contracts have already been given out for the building of a one-story addition to the Union and Capron St. sides.

The jewelers' bowling league came to a close last week with the team representing Austin & Stone in the lead. It is probable that the team will be banqueted by the members of the firm who have followed the team's success with much interest.

The Horton, Angell & Co. Athletic Association organized last week as follows: Joseph Heywood, president; Joseph M. Brohen, vice-president; John J. Hickey, secretary; Henry A. Novack, treasurer; R. M. Churchill, Joseph J. Heywood and Charles Reese, field committee.

H. E. Sweet, treasurer of the R. F. Simmons Co., has filed the following corporation report: Real estate, $27,897; machinery, $31,250; cash and debts receivable, $561,371; merchandise, $185,000; furniture and fixtures, $1,000; total, $806,518. Capital, $300,000; accounts payable, $406; reserves, $506,112; total, $806,518.

The Guinti & Pike Co. has been organized under the laws of Rhode Island for the manufacture of jewelry and leather goods and has its office in the Bigney building on County St. The officers of the concern are: Augustus C. Guinti, president; Hallie A. Pike, vice-president; S. O. Bigney, treasurer, and Harold O. Bigney, clerk.

W. J. Luther, Harold E. Sweet and David Makepeace have been appointed members of a committee to inquire into plans for a change in the town government. Attleboro has pushed ahead so rapidly during the past few years that in the opinion of many it has outgrown its present form of government, although the people have no desire to adopt for a city form of government.

Ten members of the legislative committee on labor visited Attleboro last Wednesday in regard to the amendment the jewelers ask to the 56 hour law. The legislators arrived in town and were escorted to the R. F. Simmons factory by S. O. Bigney, Joseph L. Sweet, Charles Tappan and S. M. Holman. They also visited the factories of S. O. Bigney & Co., D. F. Bliss & Co. and W. H. Wilmarth & Co.

North Attleboro.

The H. F. Barrows Co. was closed several days this week for stock taking.

The Mason Box Co. is planning to build in the near future an extensive addition.

The Paye & Baker Mfg. Co. is closed this week for the annual taking of stock.

S. G. Mandalian returned last week from a successful trip in the interests of his concern.

Frank Kennedy, New York salesman for the Paye & Baker Mfg. Co., was at the factory this week.

A special electric car conveyed home the jewelers who attended the banquet at Providence last week.

Clarence Fisher, of E. I. Franklin & Co., has returned from an extended vacation enjoyed in the south.

Rufus King, with the Bugbee & Co., has been elected chairman of the Plainville board of selectmen.

While operating a heavy stamp last week at the factory of Scofield, Melcher & Scofield, Edward Entwistle had his fingers mangled.

J. Frank Mason, of the Mason Box Co., was elected to the board of director of the Mirimichi building association at a meeting held last week.

George K. Webster, of the Webster Co., and Fred E. Sturdy, of the J. F. Sturdy Sons Co., are expected home from a pleasure trip this week.

R. Blackinton & Co. have added an office room to their suite of offices at 15 Mason Lane. The concern is working its plant full to catch up with orders.

Mrs. Rhoda W. Riley, the mother of William Riley, of Riley & French, died last week at the age of 90 years. The shops in the Riley building were closed Wednesday afternoon out of respect for the deceased venerable lady.

At the annual election and town meeting held last Monday John Devlin, John Bugbee and George Bugbee were elected to the Board of Selectmen. Mr. Bugbee takes the place of W. H. Bell, who declined to run. John Tweedy was elected park commissioner and John L. Thompson a member of the sinking fund, electric light and water commissions.

The show window in the store of Max Berkowitz & Co., 1032 N. Collins St., Joliet, Ill., was broken one morning recently and 75 watches were stolen. There is no clue.

Notice to the Trade

Pursuant to an order of Honorable Walter C. Noyes, United States Circuit Judge for the Second Circuit, entered in the office of the Clerk of said Court on the 25th day of March, 1910, we hereby announce to the trade that the words: "or any combination of a lion, anchor and letter G," after the words "articles bearing the trade-mark complained of in said bill of complaint" which appear in an advertisement of an order of United States Circuit Judge, Hon. E. Henry Lacombe, inserted by us in the issue of the "Jewelers' Circular-Weekly," dated February 23rd, 1910, were erroneously inserted, said words having been stricken out by his Honor, Judge Lacombe, from the order assigned by him on February 4th, 1910, before appending his signature thereto.

GORHAM MANUFACTURING COMPANY,
By Edward Holbrook,
President.

GORHAM SILVER

WHAT EVERY WOMAN KNOWS

That the Gorham trade-mark is a certificate for Sterling Silver $^{925}/_{1000}$ fine, and needs no explanation to the recipient when sent as a gift; therefore, when a dealer offers solid silver bearing this mark the sale is readily made. How much better this is than trying to explain that some other make is "just as good."

One of the Trade's Greatest Banquets.

IT can truthfully be said that the banquet held March 21 at Providence, R. I., by the New England Manufacturing Jewelers and Silversmiths' Association was one of the largest, greatest and most important that has ever been held in the jewelry trade, and those who were able to be present will long consider themselves fortunate and have reason to be proud of their participation in the event. As told in detail in the last issue of THE JEWELERS' CIRCULAR WEEKLY, the occasion was considered a momentous one not only in the jewelry trade but by the press and public as well, inasmuch as the guest of honor, President Taft, made an address on public questions that was commented upon from one end of the country to the other. This may also be said of the speech of Senator Aldrich, whose every word on public questions is listened to attentively, inasmuch as, being the leader of the Senate, Mr. Aldrich stands among the most important statesmen of the country to-day.

It is seldom that such a great array of public speakers has ever been brought together at a banquet, and we doubt if any trade banquet in or out of the jewelry industry was ever before able to boast of having the President of the United States, two senators of the State, the governor, the attorney-general and chief members of the Supreme Court and the mayor of the city, not to speak of a host of other important officials among its guests. The banquet not only did honor to the New England Manufacturing Jewelers' and Silversmiths' Association but to the entire jewelry trade of the country, and its importance in the community was practically officially recognized by the attendance of these speakers.

One Way to Punish the Smuggler.

THE campaign inaugurated some time ago against smugglers by the collector of the port of New York and other customs officials has undoubtedly had its effect in decreasing the amount of clandestine importations into the country not only through New York but through other ports as well. To a certain extent the professional smuggler has temporarily suspended business and the smuggling by travelers and tourists is nothing like as large as it was a year or two ago. On the whole the effect upon the various mercantile lines in the country that are vitally interested in the smuggling question has been very good, and this despite the fact that the convictions so far have been comparatively few, the mere activity on the part of the customs officials being sufficient to scare off many "customs thieves."

Even though the activity of the government has aroused public sentiment against the smuggler, convictions are in no way easy to obtain. While the public and the jurymen may look upon men who defraud the government as a class with a great deal less leniency than they did before, it is hard to prevent an element of sympathy in favor of the accused from entering into the trial of the individual, particularly if the accused is simply a tourist smuggling for his or her own benefit, and more especially if the accused is a woman. For this reason THE JEWELERS' CIRCULAR-WEEKLY again respectfully urges the government officials, both those connected with the customs department and the department of justice, to consider, in dealing with the private smuggler (that is, the tourist or traveler who tries to bring in goods for his own benefit without paying duty), a suggestion as to invoking the penalty clause that has been made many times in these columns.

> System is as essential in advertising as it is in any department of one's business.

It is well known that in proceeding against smugglers the government has two courses of procedure, both of which are often resorted to: (1) The action *in rem* brought against the smuggled articles themselves to declare them forfeit to the government, and (2), the criminal proceeding against the smuggler. As far as the first is concerned there is little trouble in the government obtaining a verdict against the merchandise when the evidence is at all clear, and many decrees of forfeiture have been obtained in these cases, but when the government starts to *punish* the individual its chief difficulty begins. However, there is an another means of punishing the smuggler besides that provided for in the criminal law, and this may be successfully put in operation at the same time the merchandise is made the subject of forfeiture proceedings. In the statutes providing for the forfeiture of smuggled articles there is a clause which establishes a penalty of three times the value of the goods, which may also be enforced against the person who illegally brings them through the customs lines. The suggestion which we have urged and still urge upon the government officials is that in bringing their actions against smuggled goods they also ask for this penalty as well as the forfeiture, and thereby obtain what will be in effect punishment of the smuggler as well as a justification of the revenue law.

There is little doubt that many a jury that will declare merchandise forfeit to the government will on the same evidence also bring in a verdict for the government when the penalty clause is asked, and this in cases where the individual would be likely to be acquitted if tried in the criminal court on the smuggling charge. If there is any reason why the government should not ask for the penalty as well as the forfeiture, it has not yet been made apparent by the government officials.

Andrew Mueller, Baltimore, Md., has the sympathy of his many friends in the trade owing to the recent death of his wife. The deceased was 57 years of age.

E. E. Bassett intends to make extensive improvements in his store at Wahpeton, N. Dak. The building will be raised, a new steel ceiling put in and the interior redecorated.

ewelers Security Alliance has paid e Captain Andy Earnst, Lima, O., d for the arrest and conviction of a thief who recently smashed the glass in the show window of the R. D. MacDonald jewelry store and stole about $800 worth of watches and jewelry, for which crime he was sentenced to an indeterminate term in the Ohio State Reformatory.

Friends of Wm C Spencer, formerly assistant treasurer of the Gorham Mfg. Co., but now retired, were deeply grieved to learn of the death of his wife, Mrs. Clissa Cicely Spencer, which occurred at St. Augustine, Fla., March 19. Mrs. Spener was in her 68th year. The remains were taken to Providence, R. I., for interment.

Charles Edward Maine died March 21 at his late residence at Howard Ave. and Sterling Pl., Brooklyn, in the 60th year of his age. He had been ill for the past six months. The deceased was a manufacturer of gold leaf, and was born in Philadelphia, Pa., in 1850, and came to Brooklyn 25 years ago. He is survived by a widow.

Merwan J. Irani, the Parsee who was arrested on board the steamship *Oceanic* recently after jewelry valued at about $5,000 had been found on his person, pleaded guilty last week before Judge Hough in the United States District Court. He was sentenced to pay a fine of $200. The jewelry was confiscated. Irani has gone to Chicago this week to join a circus.

At the meeting of the Manhattan Central Improvement Association at the Waldorf-Astoria Hotel last week, to discuss the widening of 34th St., unexpected opposition developed. A number of jewelers in business along 34th St. are members of the association. When the question finally came to a vote the opponents were defeated. The proposed change calls for widening the street 15 feet by cutting off 7½ feet from the curb on each side.

Harriet E. Selleck, a cousin of Theodore B. Starr, deceased, formerly a Fifth Ave. jeweler, has entered a claim in the Supreme Court against his two sons, as executors of their father's estate, for more than $500,000 worth of property alleged by her to have been held in trust by Starr from the estate of Theodore G. White. Her claim is made in connection with a voluntary accounting the sons have offered to make. Miss Selleck alleges that the jeweler, through William H. Jennings, his agent, obtained from her a quit claim deed under pretenses which, she claims, were false.

A woman passenger of middle age, who arrived in this city by the North German Lloyd liner *George Washington* last week, was detained by the customs officials, and when told that she would have to submit to being searched she handed out three strings of coral, a pearl and diamond brooch and a pearl bracelet and several rings. The value of the lot was put at about $1,000. Several gowns were also found in her trunk, according to the Government agents. She was taken before United States Commissioner Ross in Hoboken, who held her in $500 bail for examination.

Last Wednesday night over 600 students at Pratt Institute completed their courses of study, and at that time the completed work was on exhibition. Although the exhibition is smaller than that in June, when the day classes graduate, yet it was not inferior in quality and general interest. One of the most interesting departments was that of jewelry, silversmithing and chasing. Women as well as men were engaged in doing this kind of work, and the former turned out exhibits which compared very favorably with the work done by the men. The jewelry on exhibition included stick pins, belt buckles, etc.

At the Athletic Carnival held in the State Armory at Trenton, N. J., last week, the team representing Robert H. Ingersoll & Bro. won a race and secured the silver cup known as the Gunson trophy. The names of the men who composed the team are as follows: William A. Davidson, William Wagner, Thomas Smith, Jr., and Elmer Walker. Each one of them was presented with a bronze medal. About 100 members of the factory force were on hand and were much pleased with the showing made by the team. The silver cup is about 12 inches high and of artistic design. Princeton, University of Columbia, Fordham and Swarthmore colleges were represented among the contestants.

The Engravers' Art Club of New York, which will hold its next annual dinner Saturday evening at Allaire's Hall, 192 Third Ave., has issued elaborately and artistically engraved invitations to the banquet. The frontispiece contains a gilded crest. The club is now in its fifth year, and has accomplished much by creating a social and professional brotherhood for engravers in this city. The organization is composed in large part of general art engravers employed by leading silversmiths and jewelers of New York. The annual exhibition of engraving, stationery, bank-note work, illuminating, stamping, die engraving, etc., is well worthy of special mention as having attracted a large amount of favorable criticism. The committee in charge of the dinner expect that it will be one of the most successful social events yet held by the club.

William Hoffman, an employe of an agency that supplies watchmen, was arrested last Thursday night charged with having stolen more than $6,000 worth of diamonds, jewelry and clothes from the home of Miss Louise Tiffany, 255 Madison Ave., where he had been on duty since Jan. 1. Miss Tiffany is the daughter of the late Charles L. Tiffany, founder of the jewelry firm of Tiffany & Co., and the house robbed was that occupied by the jeweler until his death. The arrest was made by policemen who had watched the man for more than a week, and who reported that they had seen him enter various pawn shops. They said that when he was arrested he was carrying a woman's coat valued at $300. They also made the statement that he had confessed to having stolen a large quantity of jewelry and diamonds.

Aren Dayeh, a jeweler and watchmaker at 1442 Broadway, Brooklyn, filed a voluntary petition in the United States District Court for the Eastern District last week with schedules showing liabilities of $6,367 and nominal assets of $15 in watchmaker's tools. Among the unsecured creditors are: Henry Magness and Lulu N. Magness, $2,598; John H. Boehm, Jr., $600; Louis L.

The Rubber Co. of America has secured the factory of the International Watch Co., New St., Jersey City. The purchase price could not be learned, but it is said that owing to the sickness of one of the firm of the International Watch Co. the price was a sacrifice one.

Arthur W. Ware, of Arthur W. Ware & Co., manufacturers of walking sticks and umbrella handles, 41 E. 20th St., sailed today on the *Lusitania,* and will be gone about two months, returning some time in May. Mr. Ware will attend the sales of rough woods, ivory, buckhorn, etc.

The New Jersey Jewelry Mfg. Co. has been incorporated with a capital of $5,000. The offices are at 477 Spring St., West Hoboken. The incorporators are: Hevares Hakimiar, Riscalla, Tabib, Dickran Dabagian, Stephen H. Simsarian, Abraham Mardenly, Hannosh Basmajy and Haig Simsarian, all of West Hoboken.

The Rare Jewel Co. has been incorporated to act as commission merchants in jewelry and gems and to import and deal in diamonds, pearls, jewelry, etc., with a capital of $5,000. The incorporators are Thomas Adam, 39 W. 129th St.; Thomas J. Bannon, 51 E. 129th St., and Charles Marks, 460 W. 34th St., all of New York.

Archibald M. Maddock, one of the foremost pottery manufacturers in this country, died in Trenton, N. J., last week, aged 54 years. He was born in Somerset County, N. J., and at the time of his death was treasurer of the John Maddock & Sons Co., the Maddock Pottery Co. and of the Jonathan Bartley Crucible Co. Appendicitis was the immediate cause of his death.

Among the out-of-town visitors in this city during the past week were Philip Jacoby, a Montana jeweler; Edgar Codding, of the Codding & Heilborn Co., North Attleboro; Chris. Klee, head designer for the R. F. Simmons Co., Attleboro; M. Vineberg, Montreal, Can.; William Maintien, of Maintien Bros & Elliot, North Attleboro.

An unusual collection of antiques will be shown at the American Art Galleries preparatory to the sale next week. The collection represents the effort of E. J. La Place during the last 20 years. Included in the collection is a silver centerpiece of the period of 1770. This piece weighs 120 pounds and is of solid silver. The central figure is of St. Hubert, and the stag and the main part is a series of scallops.

Louis Messer Brethauer, who died Thursday from pneumonia, after a short illness at his home, 308 Kosciusko St., Brooklyn, was for 17 years connected with the Roy Watch Case Co., and was a life-long Brooklynite. He was born in Williamsburg 37 years ago, and was the son of Otto and Josephine Brethauer. He leaves a widow, Elizabeth, Provan, and a son, Louis. The Rev. Dr. Rivington D. Lord, of the First Free Baptist Church, conducted the funeral services.

A meeting of the creditors of Schickerling Bros. & Co., who were formerly in business in this city, was being held yesterday afternoon at the Jewelers Board of Trade as THE JEWELERS' CIRCULAR-WEEKLY was going to press. It is understood that Mr. Schickerling was to be given an opportunity to explain how the firm of Schickerling Bros. & Co. met with financial reverses and to tell the creditors how he thinks they can get the most out of the assets in settlement of their claims.

Theodore A. Kohn & Son, 321 Fifth Ave., are at present making an exhibition of hand-wrought jewelry that reflects a distinctive taste and a thorough appreciation of the artistic in jewelry conception. The designs are all original and the execution is most excellent. The exhibit includes rings, pendants, brooches, stick pins and various other articles, all of which show thought and care in design and execution. The grape cluster and leaf is used to a considerable degree in the designs, and some fine results have been obtained.

The Board of United States General Appraisers last week refused to remit a tax of 45 per cent. imposed by the collector of customs in New Orleans, La., on a bronze group imported by Albert Weiblen for the Daughters of the Confederacy at Yazoo, Miss. The group was returned for duty as manufactures in chief value of metal not specially provided for, at 45 per cent. The importer alleged that the group is a first cast from the original model made by a sculptor and that the casting was furnished by him and should therefore be dutiable as statuary at 20 per cent., or free of duty under Par. 649 as having been imported for and by order of the Daughters of the Confederacy, an incorporated society. Judge Waite, who writes the decision for the Board, says that the statements in the protest are unsupported by evidence, which renders it impossible for the Board to uphold the contention raised.

Friday afternoon the motion for a preliminary injunction in the case of Robert Ingersoll & Bro. against Jacob J. Schmukler was on the calendar in the United States Circuit Court, but a further adjournment until April 15 for the argument was agreed upon. The complainants allege that Mr. Schmukler has infringed their patent in that he has been cutting prices in the sale of watches. It is claimed that this alleged violation is being carried on in the face of an agreement between the two parties as to the selling price of the watches. A restraining order has been granted pending the argument on the preliminary injunction. The complainants say that as far as they know this is the only suit ever brought by a manufacturer against a jobber to compel the jobber to sell to the retail trade at certain fixed prices. Heretofore actions have in every instance been brought against a retail dealer who is cutting the established retail price of an article.

The annual meeting of the International Silver Co. was held in Jersey City, Thursday last, and was attended by the officials and large stockholders of the concern. President G. H. Wilcox presided. The usual reports were presented and the directors were elected, as follows: George H. Wilcox, Meriden, Conn.; George C. Edwards, Bridgeport, Conn.; George M. Curtis, Meriden, Conn.; C. E. Breckenridge, Montclair, N. J.; George Rockwell, Waterbury, Conn.; C. B. Rogers, Meriden, Conn.; C. Berry Peets, New Haven, Conn.; Samuel L. Barbour, Hartford; Watson J. Miller, Derby, Conn.; Charles A. Hamilton, New York; Frederick P. Wilcox, New York; C. H. Tibbetts, Wallingford, Conn.;

Boston.

James Anderson, salesman for Bigelow, Kennard & Co., is ill at his home in Newton.

George M. Van Deventer was in town, last week, being the guest for a day of F. W. B. Pratt.

Frank A. Andrews, of 10 School St., is admitted to membership in the Boston Chamber of Commerce.

William Crowley, traveler for E. A. Cowan, has been laid up for a few days with an attack of the grippe.

M. Myers reached Seattle, Wash., last week, and is now on his return trip. He will visit the principal cities en route.

Eliot G. Gerald, of the Mattapan district, is going west for the benefit of his health and is offering his business for sale.

Percival Nichols, of the antique department of Shreve, Crump & Low Co. is on a business trip to New York this week.

E. R. Wing, formerly salesman for the Boston Supply Co., has relinquished his position to engage in business as a jeweler in this city.

April 6 the entries close for the competition exhibit of the New England Watchmakers' Club, for which prizes will be awarded April 12.

The building in which H. Green has his store, at 276 Hanover St., is to be torn down. A larger store will be erected and Mr. Green will occupy it.

A. S. Hirshberg has been on a 10-day trip south, stopping at New York, Philadelphia, Atlantic City and Washington. He was accompanied by Mrs. Hirshberg.

Treasurer Royal Robbins of the Waltham Watch Co., and Mrs. Robbins, sailed from New York, last Thursday, on the steamer *Moltke* for a trip to the West Indies.

Peter Spence, of the E. Howard Clock Co.'s office, in the Jewelers' building, has constructed a handsome working model of the Howard tower clock for display purposes.

The Smith-Patterson Co. bowling team has just closed the series of games with the Mercantile League, of this city, winning the 1910 season championship and a cash prize of $50.

The retail salesmen's club of the employes of the Smith-Patterson Co. will hold the third semi-annual dinner, April 7, at the City Club, and attend the theater in a body later in the evening.

William McKinchey, aged 19, of this city, was arrested, Saturday, charged with being connected with the assault and attempted robbery, on Feb. 19, at the store of Samuel Bagley, 39 Pleasant St.

In the clock store of Frank W. B. Pratt, on Franklin St., a fine specimen of the works of the Seth Thomas tower clock has been set up for exhibition by O. S. de Zara, clockmaker for the concern.

Max Posner has returned from Charleston, S. C., where he conducted a very successful auction for James Allen & Co. Mr. Posner also visited Florida Winter resorts while south, and was accompanied by Mrs. Posner.

Among recent buyers in town were: N. H. Hamel, Lewiston; Guy A. Vickery, Augusta, Me.; A. W. Burque & Co., Nashua, N. H.; B. D. Loring, Plymouth; G. H. Gutteridge, Maynard; J. B. Hill, Beverly; J. A. Filion, David Perreault and S. P. Bailey, all of Lowell; Loring Smith, Brockton, Mass.

The band organized a few years ago by Eugene Rollins, of the Nelson H. Brown clock house, known as the Boston Jewelers' Band, has changed its name to the Rollins Cadet Band. Mr. Rollins is the manager and leader.

Charged with uttering worthless checks on two Boston business houses, Samuel Mogelivkin, 19 years old, of Pawtucket, R. I., was arrested by Special Officer Burke, of station 2, last week. It is charged that he passed a worthless check for $104.25 on the Tremont Jewelry Co. at 26 Tremont Row.

Edwin Passmore, precious stones expert and prospector, will shortly go to North Carolina and Georgia on a mineralogical expedition. He has recently developed a garnet property discovered by him near South Danbury, N. H., and a valuable plant with machinery for commercially handling the product has just been installed.

Peter S. Kabaher, a jewelry salesman, was found unconscious at the corner of Washington and West Sts. March 22. He was hurried to the Relief Hospital in an ambulance from the La Grange St. station and died shortly after arriving there. Death was due to heart trouble. Kabaher was 48 years of age, married and lived in Norfolk Pl.

Henry Mortimer Kimball, formerly, for 18 years, of the diamond department of Bigelow, Kennard & Co., who retired some years ago, died Saturday morning after a brief illness with pneumonia at his room in the Hotel Vendome. Mr. Kimball was 68 years of age and unmarried. The remains were taken to his former home town, Bellows Falls, Vt., for interment.

Lucius W. Lawton, formerly of Waltham, died, March 20, at his home in Quincy, Mass., and funeral services were held March 22. Mr. Lawton was one of the backers of the Waltham Watch Co. in its earlier days, and was a friend of the late Royal E. Robbins, taking stock in the concern soon after Mr. Robbins became identified with the company, and later realizing good returns on his investment.

The case of Patrick Cummings, of Attleboro and Boston, who was indicted several weeks ago by the Federal Grand Jury, charged with using the mails in a scheme to defraud, in connection with his jewelry business, will probably be called for trial in April, it is stated by the assistant United States district attorney, William H. Lewis, who has the preparation of the Government's case in charge.

Traveling salesmen visiting Boston during the week included: Benjamin F. Griscom, Bippart, Griscom & Osborn; Frederick Lapham, Carter, Howe & Co.; W. J. Harber, Enos Richardson & Co.; A. D. Manning, D. Wilcox & Co.; Vernon S. Chapman, Osmun-Parker Mfg. Co.; R. H. Schley, Sloan & Co.; Austin M. Hill, Jr., Hill & Schmidt; Alfred Reeves, Eckfeldt & Ackley; W. N. Peal, Strobell & Crane; J. F. Imfeld, Hendrick & Co.; Henry A. Bruns, George O. Street & Sons; H. E. Slater, Whiteside & Blank; William B. Peck, Crossman Co.; Louis L. Lawton, Jones & Woodland Co.; Fred J. Foster, Traub Jewelry Mfg. Co.; George Silvia and Frank Thompson, Pairpoint Corporation; Frank Spies, Whiting Mfg. Co.

VICTORY WITH INDEPENDENCE

THE TRUSTS are not omnipotent by any means. Quite the re
The fact is they are scared right now. They wince whenever h
hear the word "*court*" or "*law,*" and whenever a "*trust*" is ment
at Washington they all duck! There is not a single trust in the
country to-day that is not feeling worried at this moment.

¶ Remember one thing: the people always win in the fight a
encroachment and usurpation. It is an old story, running right
through history. Tyranny and despotism may change their form
age to age, and liberty may be menaced in a variety of ways; but t
struggle goes on. And the people have been winning the figh
liberty right along, ever since they forced old King John to sig
Magna Charta at Runnymede!

¶ To-day the worst form of tyranny and despotism with which
have to contend is the Trust. It is endeavoring to bring about a
of slavery, industrial slavery, where white men would be the slave
is the people's fight again.

¶ To a man the people are with a firm that takes the Absolutely
pendent position assumed by this house. To a man they uphol
principle of choosing the goods they want without let, hindran
restriction. That is our platform, gentlemen.

WE ARE DIRECT IM

Diamonds and Diamond Jewelry, Silverware, Cut Glass and Materials. Selection packages to responsible jewelers. Prompt and accommodating service. We do not sell at retail.

TERS OF DIAMONDS

D. C. PERCIVAL & CO., Inc.
373 Washington St., BOSTON, MASS.

Newark.

Louis Perelman, who formerly conducted a jewelry store at 390 State St., Perth Amboy, N. J., has moved his business to 322 State St., where he recently held an opening.

Miss Esther Ebert, daughter of Mrs. Olga Ebert, who has been shipping clerk for Adolph Rosenberg, 50 Columbia St., for the past two and one-half years, will marry E. P. Kastner in April.

John Hicks, Long Branch, N. J., after seven weeks' stay with his family at Hot Springs, Ark., has returned home. He is able to be about the house, although very weak from the treatment he is undergoing.

The Newark Cut Glass Co., which is about to move its store from 6 to 17 W. Park St., will hold an exhibit and special sale of cut glass at 971 Broad St. during the coming month. The removal to the new store will take place during this sale. There will also be a special sale at the factory, 60 and 61 Arlington St.

Charles Naef, a jeweler who occupied a room on the second floor of the boarding house kept by Mrs. Anna Meisel, 35 Camp St., was found unconscious from asphyxiation, last week. Mrs. Meisel, when she found the jeweler, at once sent for the police and the ambulance which took the man to the hospital. It is thought that he turned on the gas accidentally.

With last week's games the first annual competition of the Jewelers' Bowling League of Newark came to a close. The contest was a most successful one. Much interest was manifested by the members of the contending teams, and there was always a large attendance of spectators when the games were rolled. Another competition for next year is already being planned, and there is talk of making it a five-man instead of a three-man team contest.

Much interest was aroused among the residents of the Clinton Hill section last week by the announcement of Allsopp & Long, 473 Washington St., of the loss of five diamond rings. The rings, which were in an envelope, were valued at about $500 and were lost by a messenger for a jewelry dealer living in the Clinton Hill section, who had brought the rings to Allsopp & Long for resetting. It is not known just how the rings were lost. A liberal reward has been offered for their return.

The Trenton *True American*, in a recent issue, in speaking of the question of the city's water supply, said that the city would do well to direct its attention to the example set by the Ingersoll Trenton Watch Co., on Monmouth St., Trenton, N. J., where an artesian well is being sunk on the premises. It is said that when finished the well will supply enough water for the purposes of the plant. The company is completing plans for the erection of a four-story addition in order to have the facilities to double its output and turn out 1,000 watches a day.

Shortly after two colored men had left his store, at 23 Springfield Ave., last week, Stephen Messerer, a jeweler, discovered that a $40 diamond ring was missing from one of the trays in a case. Another diamond ring which, it is believed, was dropped by the thief, was found on the floor behind the counter. Messerer reported the theft to the First Precinct police. One of the two colored men suspected is known by Messerer, having been in his store several times before. The companion of this man, however, the jeweler had never seen before, and he described him as being tall and thin. It is believed that the tall negro was able to stretch his arm over the jewelry case, which was open, and lift out the two rings from a tray.

Herpers Bros.' new building at the corner of Washington and Crawford Sts., has just been completed. It is a modern four-story brick building, well adapted for manufacturing purposes. The rooms are high, well lighted and ventilated, and there is ample provision for cloak rooms, closets, etc. On each floor there is a fireproof vault for the safekeeping of books, stock, etc. With the exception of the basement floor the entire building is already occupied. The W. C. Edge Jewelry Co., formerly at 46 Green St., are on the second floor. Kent & Woodland and Theberath & Co. occupy the third floor. L. Fritsche & Co., manufacturing jewelers and diemakers, occupy the fourth floor. In their old quarters on Hamilton St. they occupied parts of two floors.

The games on Monday and Tuesday, March 21 and 22, were odd games to finish out the schedule. On Monday evening the team representing Allsopp & Allsopp won four games straight, while the teams representing Durand & Co. and Krementz & Co. each lost two games. On Tuesday evening the team representing Whiteside & Blank won three games and lost one; the Crescent Watch Case Co.'s team won two and lost two. The team from Durand & Co. won one and lost one, and the second team from Bippert, Griscom & Osborn lost two games. At the beginning of the season both teams and individual prizes were offered to the victors in the competition. These prizes will be awarded at a banquet to be given at the Hotel Broad, Friday, April 8. As the teams representing Carter, Howe & Co. and Kohn & Co. are tied for first place, and the Crescent Watch Case Co. and Whiteside & Blank are tied for third place, these ties will have to be played off before the banquet. It is expected that these games will be rolled Friday evening, April 1.

Albert Albrecht, 40 Crawford St., is working on two orders of special interest. One of these is a medallion, 2⅝ inches in diameter, to be worn about the neck. The mounting is a beautiful seroll design worked in platinum, in which Empire laurel leaves are prominent. Upon them will be mounted a large number of diamonds of various sizes, giving to the whole a lace-like appearance. The nine principal diamonds are worth $100 each. Besides these there will be 256 smaller ones. The chain to be used with these is also designed in platinum and has 65 diamonds. The jeweler's work alone will take more than 235 hours. The cost of manufacturing the piece will be about $4,000. The article was designed by Miss Hilda B. Metzner. The second order is for a large platinum banquet ring of special design. The setting is elliptical in shape, extending from knuckle to knuckle. In the center is a large cabochan sapphire valued at $1,000. Around this are arranged numerous small diamonds weighing in all five carats.

Mills; William F. McGown, F. T. Pearce Co; W. Cooper, Cooper & Forman; W. H. Osborne, R. Wallace & Sons Mfg. Co.; E. W. Dellar, W. S. Hicks' Sons; A. N. Dorchester, Chapin & Hollister Co.

Auctioneers who feature jewelry stocks, jewelers who contemplate using the services of auctioneers, and others in the trade will be interested in a bill recently introduced at Albany by Senator Davis of Buffalo. The measure places stringent regulations upon auctioneers operating in Buffalo and Rochester. The auctioneer, under the Davis bill, is to be compelled to keep records to include the name and address of the persons employing him, for whose benefit the goods are to be sold, from whom the goods are received and who were the owners of the goods immediately prior to the receipt of them, detailed information as to dates and location of goods, description of goods and the terms upon which the auctioneer receives them for sale. The mayor, the district attorney and the chief of police are to have the power to inspect these records at any time and it is a misdemeanor to violate the provisions of the bill.

Canada Notes.

W. E. Kelly, Goderich, Ont., has disposed of his business to W. H. Harrison.

Fred. Fawkes, Brantford, Ont., has given a chattel mortgage for $3,000 to G. H. Fawkes.

Lyon & Morris have begun a jewelry commission and auction business at 57 King St., W., Toronto, Ont.

J. N. Birks, of Henry Birks & Sons, Montreal, is expected home early in April from a business trip to Europe.

Mr. Stowe, of W. H. Wilmarth & Co., Attleboro, Mass., was among the callers on the trade in Montreal last week.

D. Bloomfield, of Bloomfield Bros., 17 Notre Dame St., West Montreal, is home again after a visit to Toronto, Ont.

Harry Ryrie, of Ryrie Bros., Toronto, Ont., with Mrs. Ryrie and family, have gone on a pleasure trip to Virginia.

H. G. Willis, formerly in business on Queen St., Toronto, Ont., has purchased the business of G. M. Mayberry at Lloydminster, Sask.

John Wanless & Co., Toronto, Ont., have plans in preparation for the erection of a modern jewelry store on Yonge St. during the present year.

William Eaves left Montreal on Saturday and spent Eastertide in the eastern townships, where he combined business with a holiday trip.

A. Rosenthal & Sons, Ottawa, will shortly begin the erection of a seven-story building, to cost $125,000, on the north side of Sparks St., in that city. The ground floor will be occupied by the firm and the upper stories let for offices.

W. L. Wilkinson, for many years associated with Ambrose Kent & Sons, Toronto, Ont., and one of the most experienced and widely known men in the trade, has accepted a position in the diamond department of Ryrie Bros.

In the new issue of the official telephone directory for the city of Montreal the number of jewelers advertising in the classified supplement has increased this half-year to 70, while the number of advertising watchmakers stands at 23.

A series of three games of bowls was played on Wednesday, March 23, between the bowling teams of P. W. Ellis & Co. and the jewelry department of the T. Eaton Co. The Eaton team won two games out of the three, the total score being Ellis team 2,122, Eaton team 2,134.

Mr. Wray, watchmaker, Cadieux St., Montreal, who was accidentally shot by a bullet fired by a city detective—as the result of which there is a pending law suit against the city authorities—while he was chasing an escaped prisoner, has thoroughly recovered from his injuries after many weeks of suffering.

Out-of-town jewelers calling on the Toronto, Ont., trade, last week, included: P. E. Byrne, Beaverton; Joseph Park, Bradford; R. Patterson, Kincardine; W. H. Smith, Oakville; W. J. Hollingshead, Woodbridge; N. F. Babb, Stratford; D. H. Flagler, Sunderland, and George Hynds, Acton, all Ontario, and N. Beaudry, Montreal, and A. C. Skinner, Sherbrooke, Que.

At Peterborough, Ont., on Monday, March 21, Lawrence Kelly, a young man employed as yardman at the Oriental Hotel, was arraigned at the police court charged with stealing 126 gold lockets and 14 gold and silver watches belonging to J. A. Knox & Co., wholesale jewelers, Toronto, Ont., from the sample room of the hotel. The evidence adduced showed that while S. Michaelson, traveler for the firm, was eating supper the prisoner and George Van Norman, another employe, entered the sample room by means of a key and took the entire stock of jewelry, most of which they buried in the suburbs. One watch which had been pawned led to the detection of Kelly. Van Norman confessed and aided the police in the recovery of most of the goods. Kelly was committed for trial.

Savannah, Ga.

S. E. Theus has been elected a director of the Savannah Chamber of Commerce.

The following traveling representatives were in Savannah, Ga., recently: V. A. Picard, Pryor Mfg. Co.; Julius C. Lambert, P. W. Lambert & Co.; R. L. Kintz, International Silver Co.; A. M. Haring, Carter, Howe & Co.; Sidney S. Rotheim, Sussfeld, Lorsch & Co.; Mr. Traylor, Krementz & Co.; Mr. Richardson, William B. Durgin Co.; John E. Valk, N. H. White & Co.; Mr. Gretter, New England Watch Co.; Adolph Rosenthal, Henry Ginnel & Co.

An American citizen who is the proprietor of a jewelry and music store in Mexico advises an American consul in that country that he would like to have catalogues, price lists and correspondence in English from manufacturers of jewelry and jewelry novelties in the United States. He also contemplates placing lines of select vocal and instrumental sheet music, and desires to get in touch with American publishers of such goods with a view to handling their publications. The dealer's name and address will be supplied by the Bureau of Manufactures, Washington, D. C.

Philadelphia.

Theodore Beck will leave April 9 on a pleasure trip to New Orleans.

Harry M. Smith, lapidist, 717 Sansom St., sailed Saturday for Europe.

Sol. Sickles, of M. Sickles & Sons, has purchased a home in Tioga, Pa.

John F. Blisard, jewelers' supplies, 727 Sansom St., is ill at his home with Grippe.

John Myers, of Myers Bros., opticians, New York, was here, last week, on business.

J. A. Cresse, with L. M. Nelson, Camden, has gone on a pleasure trip to Cape May, N. J.

H. McLain, Atlantic City, N. J., is making extensive alterations and improvements to his store.

L. Spoerhase, 4078 Lancaster Ave., spent the Easter holiday at Atlantic City with Mrs. Spoerhase.

George Boucheimer, Baltimore, Md., manufacturer of leather goods, was a visitor to this city, last week.

The wholesale jewelers and jobbers of this city observed Good Friday by closing their houses at 1 P. M.

John Lang, a prominent Boardwalk jeweler of Atlantic City, reports the loss of $5,000 in the recent fire.

Walter B. Taylor, of N. M. Harrington & Bro., Harrington Del., is on a short trip through New York State.

John Fleishman, of Hollander & Fleishman, retail jewelers of this city, visited their Scranton store, last week.

Mr. Wilkinson, jeweler of this city, has accepted a position with P. G. Deiner, retail jeweler of Harrisburg, Pa.

Leonard Wetteran has gone to Ashland, Pa., where he has accepted a position as watchmaker for Peter Loeper.

Mr. and Mrs. E. Sickles, of M. Sickles & Sons, are occupying their cottage at Atlantic City during the Easter season.

Ira Seebacher, traveling for M. Sickles & Sons, has returned from a three months' trip trough the southern States.

Louis Solfinger, head watchmaker for C. R. Smith & Sons, is confined to his home with a serious attack of Grippe.

W. Estes, because of steady increase in business, has been obliged to move into larger quarters at 709 Sansom St.

Judgment was entered, last week, by the American Swiss Watch Co., against the Futernik Co., for want of a defense, $213.60.

Ira Garman and L. P. White, prominent jewelers of this city, were guests at the banquet, last evening, given by the 24-Karat Club of Pittsburg, Pa.

A New York jeweler is reported to have taken a 12-year lease of the first floor of the building at 1111 Market St., at an annual rental of $10,000.

Carl Stratton has resigned his position as watchmaker for John Wanamaker, and has established himself in the same line with George Child, 40 S. 10th St.

The sympathy of the trade is extended to D. H. Harman, an old retail jeweler of Frankford Ave., owing to the death of his wife, which occurred March 20.

The local wholesale jewelers and jobbers expect shortly to form a baseball league, in which they can participate in games for the jewelry championship of the city.

William Robertson, diamond setter of this city, started Saturday on an extensive European trip and will combine business and pleasure.

Dr. L. O. Waller, a well-known jeweler of Smyrna, Ill., has the sympathy of the trade owing to the recent death of his mother, which occurred March 24.

The first meeting of the creditors of Isadore Jaschik, bankrupt, will be held at the office of the referee in bankruptcy, Alfred Duver, 505 Chestnut St., on April 4, 1910, at 3 P. M.

John Van Dusen, of the Van Dusen & Stokes Co., sailed, Wednesday, March 23, for Europe on the *Mauretania*. Mr. Van Dusen will be absent about six weeks, combining business and pleasure.

The stock and fixtures of the art store of John G. Craig, well-known art dealer of this city, were sold at a receiver's sale in bankruptcy at the auction rooms of Davis & Harvey, 1112 Walnut St., March 21.

The jewelry store of A. N. Peoples, Chester, Pa., was entered, last week, by burglars and the plate glass window broken. The alarm was given and the burglars captured before further damage was done.

The exhibition of fine arts at the Academy of Music, was brought to a close Saturday. This was the 105th annual exhibition and was viewed by 50,000 visitors. Many paintings were sold during the exhibition.

Ferdinand Keller, an antique dealer, Walnut St., has sold the five-story building, 1022 Chestnut St., to Felix Isman, acting for a client, whose name has been withheld. It is said that a price close on to $200,000 was paid for the property.

Fred Bailey, known to his friends as the "old watchmaker," died at his home in East Bangor, after an illness of four or five days. Deceased was 73 years old and was formerly in business in Pen Argyl, but moved to East Bangor 15 years ago. He is survived by one son.

The sudden death of Mrs. Ella A. Lippincott, wife of Dr. A. Haines Lippincott, Camden, N. J., which occurred March 21, was a shock to her many friends and the jewelry trade of this city. Mrs. Lippincott was a member of the firm of E. A. Langerdorf & Co., retail jewelers of Camden, N. J.

Fred. Hurlburt, of H. O. Hurlburt & Sons, wholesale jewelers of this city, returned Thursday after spending two months in the Orient. Mr. Hurlburt enjoyed his trip immensely, the greater portion of it being spent in Egypt, where he lived just as the natives, entering into their mode of living with the same spirit and deriving much pleasure from the trip.

George Richardson, who was accused of robbing the jewelry store of Aisenstein & Gordon, 517 S. 4th St., early this month and made away with jewelry valued at nearly $300, pleaded guilty to the charge in Quarter Sessions Court, last week. Judge Barratt sentenced the prisoner to a term in the Eastern Penitentiary of not less than two and one-half and not more than 10 years.

In speaking of the judgment for $273.58 entered by the Manufacturing Jewelry Co. against Annie Hamberg and Max Hamberg, a note in the last issue made it read as if the Hambergs had entered the jewelry concern. This was owing to the fact that the plaintiff fendants' names became transposed having been brought by the Manu Jewelry Co. against the others. has been settled.

Hatch, S. B. Champlin Co.; John A. Abel, Abel Bros. & Co.

The members of the Jewelers' 24-Karat Club of Pittsburg, last night, gave their second annual banquet at the Fort Pitt Hotel, but the JEWELERS' CIRCULAR-WEEKLY having gone to press before the festivities began, the full particulars will be given in next week's issue. The toastmaster was the Rev. Dr. Trumbull Lee, pastor of the Wilkinsburg Presbyterian Church. The opening address was made by Steele F. Roberts, the president of the club, whose speech was most brilliant. Judge James R. Macfarlane, of Common Pleas Court No. 1, had for his subject "As Others See Us"; Col. John L. Shepherd, of New York, talked on "Sand"; Dr. John A. Brashear, the noted astronomer, "The Comet"; J. T. Montgomery, of New York, "Who Receives the Reward?" while Lee S. Smith, president of the Pittsburg Chamber of Commerce, made the concluding address, his subject being "The Other Man." The guests of honor were Harrison Nesbit, president of the Bank of Pittsburgh, National Association, and who at present is foreman of the Grand Jury investigating councilmanic graft, and who was scheduled to make a few remarks; President David Kaiser of the Jewelers' 24-Karat Club of New York; Ira D. Garman, Philadelphia, president of the Pennsylvania Retail Jewelers' Association; Charles N. Hancher, Wheeling, president of the West Virginia Retail Jewelers' Association, and L. P. White, of Philadelphia. More than 200 persons were present, the banquet being held in the English room of the Fort Pitt Hotel. The decorations were in gold, and a handsome souvenir of the occasion was given to each of the guests.

Columbus, O.

V. Deane Reese, optician, with his brother, Ned Reese, and Dr. C. T. Okey, left, Sunday morning for the Green River country, Wyoming, to spend a month hunting mountain lion.

The programme for the meeting of the Ohio Retail Jewelers' Association, to be held in Columbus the first week in May, will be ready for the printer this week. A meeting of Columbus jewelers will be called within a few days to again endeavor to organize them before the convention meets.

The Frank F. Bonnett Co. is in its new quarters at 98 N. High St., having removed from its old location, 77 N. High St., with a rush, Saturday evening and Sunday. The work of moving was started Saturday night, a short while before closing time, and Monday morning the new storeroom was opened up ready for business. This is the firm's second move in 22 years.

L. W. Lewis, 99 N. High St., has discovered a formula for a polish which, with slight changes in the ingredients, puts a piano polish on furniture, cuts grease and dirt from and restores the luster of brass and other metals with scarcely any labor whatever, and even restores the original luster to tin. In powdered form it is designed for a silver polish. He has been working on it some time and completed it only last week.

Several Columbus jewelers, with other Columbus business men, were before the Grand Jury, last week, presumably to testify in a State and county graft investigation. The story gained circulation that a Columbus firm with which county officials did a great deal of business made valuable presents of jewelry and other articles to their customers. The charge was that the bills were padded by the officials in order to cover the cost of the presents. The transactions, as far as the jewelers were concerned, were perfectly straight. They sold the articles to the firm in question, and had no interest in what disposition was to be made of them.

St. Paul.

A. I. Shapira has purchased an automobile.

Louis Schroeder has moved to his new quarters at 505 Baltimore block.

Max Mark has returned from a business trip through North Dakota.

D. A. Miller, Duluth, Minn., has brought suit against I. W. Mark for $2,000.

Among the out-of-town jewelers who visited St. Paul recently was David R. Cohen, Lincoln, Nebr.

Among the traveling representatives who called on the trade here was Mr. Noyes, of Bates & Bacon.

P. Morgan returned recently from New York, where he bought goods for the purpose of opening a new store at 193 7th St.

Sam Cohen, traveler for Lewis Finkelstine, left St. Paul recently for Spokane, Wash., where he will remain permanently.

NEVER before in the history of our Company has there been such a large demand for Railroad grade movements of our manufacture. The reputation they have established among Railroad Men as being the "Supreme Railroad Watch" is due entirely to the careful attention given to every detail of their manufacture.

We suggest the advisability of having in stock a few of each of these grades in order to meet the demand that is constantly increasing for them.

The following jobbers carry a complete line of Illinois Movements and can promptly supply your wants:

AT YOUR OWN PRICE

SALE STARTS MONDAY, APRIL 4th, AT 10 A. M., AND WIL CONTINUE UNTIL THE ENTIRE ESTATE IS SOLD

k, as the evidence of the police nfficient to incriminate them. The s taken from the prisoners will be n to them.

Paulson & Co. have made the fol- changes: C. M. Hall, formerly in r il jewelry business at Waupaca, s been engaged to cover Wiscon- R. Douglas' territory has been from Minnesota to Indiana. C. bel, formerly with Sischo & Beard, . Minn., has been engaged to cover n.

Bauman, of the Bauman Jewelry bought the estate of Lapp & n, has decided not to continue the and will sell the entire stock at without reserve, beginning Mon- ning, April 4, at 10 A. M. The sale to be an interesting one, the dise alone representing a cost valuc 000.

mmel has filed a petition in bank- with liabilities of $870 and assets g of personal property valued at ich is claimed exempt under the rmann & Co., with a claim of $30, omas J. Dee & Co., $430, are the l creditors interested. Hummel was in the gold chain business, but to his son-in-law, Isidore Sax, a nths ago, and is now in the lat- ploy.

h Frisch, pawnbroker, has filed a in bankruptcy, with total liabilities and assets of about $400, which med as exempt under the act. Very owed for jewelry. A. C. Becken ; Bleadon Bros., $17; Altbach & n, $43, and Laffir Bros., $179, are ly jewelry creditors. Frisch has pawnbroker here for 17 years, and viously a member of of Frisch & in, which firm he succeeded four go.

will of the late Jonathan W. former member of the firm of Pit- Brooks, was filed in the Probate last week. The estate left by the nt is given as $100,000, of which $50,000 consists of personal prop- d the remainder in real estate. By ns of the will Mrs. Mary R. Brooks. low, receives her legal share of the Two sisters of the late merhant ueathed $600 a year each. The rest property is given in trust to the ex- of the estate for the seven children, e to receive equal shares. Attorney Whipp, who filed the will, declared believed the entire estate would to about $150,000.

Consul-General E. G. Babbitt, at kama, calls attention to the careless r in which some American exporters reign markets: In addressing con- s here no consuls are stationed; in g communications to places where ates have been, but which have long bolished; in addressing consuls by who have been out of the service for or transferred to other stations, etc. es the receipt of three letters at the ama consulate-general, addressed to nsul's at Maskat, Teheran and Tabriz,

Cincinnati.

Godfrey M. Braham, of A. & J. Plaut, has left on a trip to the south.

Frank Herschede and C. W. Lucius, of the Frank Herschede Co., are home from a business trip east.

Edgar Fox, of Lindenberg & Fox, left last week on a business trip among his customers in the north.

Edward Klein, of the Klein Bros. Co., is filling W. H. Modrack's place on the road owing to the latter's illness.

D. J. Gutmann, of L. Gutmann & Sons, and his wife, have left for New York, where they will remain for awhile.

Ernest Waldvogel, bookkeeper for B. Greenwald, 514 Race St., surprised his friends last week by announcing his marriage.

The sympathy of friends in the trade has been extended to John Bertling, 1115 Vine St., owing to the death of his daughter Ruby, March 25. Miss Bertling was 20 years old and was a favorite in the younger set.

I. Oppenheimer, of Hahn & Oppenheimer, is home after spending some time with the firm's new representative, M. D. Eisman, located in Birmingham, Ala. J. Hahn, of this firm, is arranging to leave about April 15 for Europe, where he will combine business and pleasure.

At a recent meeting of the Max J. Greenwald Jewelry Co. it was decided that it was for the best interests of the corporation to dissolve, thus making Max J. Greenwald sole proprietor of the three Greenwald stores at 33, 32 and 25 "Arcade." Mr. Greenwald states that he contemplates moving his business to Walnut St. in the near future.

Max Schapira and P. Slayback, formerly watchmakers for Charles Rosen, the bankrupt jeweler of this city, leave here this week for Aberdeen, S. Dak., having been subpoenaed as witnesses to testify April 2 in the requisition proceedings over Moses Levine, brother-in-law and former manager for Rosen, who is resisting the efforts made to bring him back to Cincinnati to answer a charge of conspiracy to defraud creditors.

The local Retail Jewelers' Association has issued cards to the different retail jewelers asking for opinions as to a uniform closing time. Each dealer has had his own time for closing and it is suggested by the association that 8 o'clock P. M. be made a universal time to close, except on Mondays and Saturdays. This association has recently organized what is called the Retail Jewelers' Information Association of America. It is to be a national organization with headquarters in Cincinnati and is so organized for the purpose of keeping in touch with the trade in general and its so-called "evils." A certificate has been prepared by this association for distribution among all of the jobbers and manufacturers who agree to strictly adhere to wholesale business only; there are also cards to be given to the traveling representatives which will show they are identified with strictly wholesale houses. Any violation of the agreement on the part of anyone holding a certificate shall cause it to be withdrawn and the offender's name will be stricken from the list of those doing only a strictly wholesale business. A violator's list will be kept and mailed to any retailer upon request. All retail jewelers throughout the country will be notified of this plan and will be requested to ask traveling representatives to show cards. Plans are now on foot to generally organize these associations throughout the country.

Out-of-town jewelers in this city last week buying stock included: Edward Mittendorf, Bluefield, W. Va.; Charles Keller, Frankfort, Ky.; Mr. Schipper, Hamilton, O.; O. C. Beer, Sunman, Ind.; J. A. Murray and P. W. Starks, Manchester, O.; J. Steinberg, Jellico, Tenn.; D. H. Daniels, Owenton, Ky.; Fred G. Wittlinger and Mr. Marlett, of Marlett & Baker, Middletown, O.; Abe Ellman, Dayton, O.; D. A. Lamb, Wilmington, O.; William Sporleder, Okemah, Okla.; Norman Schweeting, Oxford, O.; William Shire, of Shire & Fithian, Paris, Ky.; E. B. Scott & Son, Batavia, O., and M. A. Telbert, Frankfort, Ky.

Traveling representatives who called on the Cincinnati, O., trade during the past week included: W. G. Moland, Sansbury & Nellis; T. W. Smith, Roger Williams Silver Co.; E. A. Reed, Reed & Barton; Edwin Stout, Archibald Klement Co.; Mr. Singleton, Adams & Singleton; H. A. Tibbals, Mandeville, Carrow & Crane; J. T. Griffith, Jr., Carter, Howe & Co.; Walter S. Strauss, Jacob Strauss & Sons; H. W. Quimby, S. E. Howard's Son & Co.; Joseph Keller, Keller Mfg. Co.; S. W. Pickering, A. Ludeke & Co.; Henry C. Woods, Dominick & Haff; B. J. Meyer, Meyer Bros.; H. L. Strauss, Nathan Wallach; Mr. Trow, William L. Sexton & Co.; George Howard, Towle Mfg. Co.; E. P. Staunton, Gorham Co.; George W. Cureton, Newall Mfg. Co.; E. P. Ledos, Ledos Mfg. Co.; Leo Henle, Sussfeld, Lorsch & Co.; Mark Perl, Wagner Comb Mfg. Co.; S. E. Dickson, Adelphi Silver Co.

Toledo.

E. D. Libbey, president of the Libbey Glass Co., is Wintering in California, where he has acquired a reputation as a golf player.

W. G. Alexander, advertising manager of the Conklin Penn Mfg. Co., has resigned, and in the future that part of the business will be looked after directly by H. E. Fisher.

The Conklin Pen Mfg. Co. will hold its Spring meeting of salesmen April 1 and 2. R. O. Weisel, of this force, has been ill for some time, but hopes to be able to leave for his New York territory after this meeting.

The W. W. Bolles Standard Pen Co. will shortly remove from its present quarters in the Snow Flake building. Some changes will be made in the business methods of the firm which make the present quarters no longer suitable.

Clocks, watches and other goods to the amount of $100 were stolen from the store of W. M. McMurray, in Burgettstown, Pa., recently. This is the second robbery at the McMurray store.

Schultz & Bowman, Appleton City, Mo., have dissolved, Ludwig Schultz continuing the business on his own account.

"IN THE COURTS OF ACHIEVEMENTS"

We take rank in what we do, not what we say. The Auctioneer makes his own pedigree. It is a g injustice to the memory of those great salesmen who followed this work and left behind them splendid reco for a mere beginner with half a dozen questionable credentials to keep harping, "What was the Jewelry Auct business before I illuminated it with my cultivated presence?" There have been many men who did le behind some footprints, not only for their splendid ability, but sterling worth, such as French, Burroughs, H and Rutherford, and scores of others. There are still some *"live wires,"* a credit to the occupation. Am them I am not too modest to claim a place, backed by a record unequaled not only for the number of sa wide territory covered, quality and aggregate results in volume and profit.

Sales made during the past 5 Months

Am now selling for T. R. J. Ayers & Sons, of Keokuk, Ia. This sale is made on account of the recent death of Mr. Ayers, notice of which appeared in the Circular. It is an Administrator Sale. The firm is one of the longest established Jewelry Houses in America.

Chas. W. Crankshaw

Opened sale for Chas. W. Crankshaw, of Atlanta, Ga., on Jan. 31, closed same March 19, 1910, making the largest sale ever conducted in this city, my seventh sale in this place in eighteen years. The results of this engagement is the talk of the trade to-day. The store was one of the finest in the country. My second engagement with Mr. Crankshaw.

Kingsbacher Bros.

Sold seven weeks for this old established firm, and under my agement making one of the most successful auctions ever held i city, my fifth auction in Pittsburgh.

A. Kurtzeborn & Sons

Stock consisting of $125,000. Only highest grade Diamonds, Sterling Silver, only 14Kt. gold goods, Mr. Kurtzeborn having been actively engaged in the jewelry business fifty-two years. This sale continued for seven weeks.

M. Scooler Co.'s Stock

This stock, consisting of 1,647 pieces of the highest grade Diamond Mounted Jewelry, Patek-Philippe Watches, etc., amounting to over $100,000. Sold most sucessfully to the trade in four days. My third sale for this firm.

Benjamin Rice

Tusla, Okla.—A year ago I made a sale in this progressive little city, in returning repeated former success

Switzer Bros.

ut $500 worth of diamonds and were stolen from the home of W. rmstrong, 1537 Broadway, one night eek. Among the articles taken were mond brooch, one diamond and opal one opal and pearl ring, a gold brace- old necklace and gold scarf pins.

er he had visited a number of jewelry offering two unset diamonds, valued ut $300, at a ridiculously low price, Hollis, a Syrian, was arrested here eek. Following his arrest two rings which the stones had been taken were in his pocket. He claimed to have t the diamonds from Jerusalem. In addition to the unset diamonds he had a large ring with 21 small diamonds, a ruby ring, a gold watch, a stick pin, bracelet and opal ring. All of these tallied with the description of jewelry valued at $1,000 stolen from Cincinnati and the police of that city will send after him.

James Dugger, a private in the Tenth United States Infantry, stationed at Fort Harrison, near this city, has been sentenced to prison for breaking and robbing the window of Andrew Streng in Massachusetts Ave. He was fined $1 and costs, disfranchised for one year and sentenced to the Indiana Reformatory for an indeterminate period of from one to 14 years. In defense, Dugger said he had an honorable record of five years in the army and had broken and robbed the window while he was intoxicated. He was apprehended through a street car conductor who noticed that the soldier's hand was bleeding. The wound was caused by the broken glass.

Minneapolis.

Gus Sames, St. Bonifacius, Minn., visited Minneapolis, last week.

O. L. Cohen, of Cohen Bros., recently returned from a trip through the east.

Charles Mowry, jeweler and clock repairer at W. M. Stone's, has accepted a position with a firm in St. Paul.

F. M. Halstad, a watchmaker formerly in the employ of M. L. Finkelstein, St. Paul, has taken a position with the American Jewelry Co.

Oswald Cohen, of Cohen Bros., and T. S. Dobrin, of M. L. Cohen & Co., have arranged to make a trip to Honolulu in June to purchase coral.

Henry Potz, the well known representative of a diamond firm at Antwerp, Holland, called on his customers in the Twin Cities during the past week.

C. A. Scherdahl, Montevideo, Minn., and William Krohn, Annandale, Minn., were among the out-of-town jewelers who visited the Twin Cities during the past week.

William M. Stone, 16 S. 3d St., who has been suffering from serious eye trouble for the past three weeks, is improving and expects soon to be working regularly again.

S. Alexander, of the American Jewelry Co., and Mrs. Alexander have gone to New York to attend the wedding of their niece. They expect to return in about three weeks.

Dave Willis, formerly salesman for M. L. Cohen & Co., but more recently in the confectionery business, has returned to the ranks of the jewelers, having accepted a position as salesman with the Gittelson Jewelry Co.

A number of traveling representatives called on Minneapolis jewelers during the past week, the list including the following: M. De Simone, F. De Simone, Son & Co.; E. S. Kries, of Kries & Hubbard; Mr. Meyer, Scofield & De Wingert; Mr. Pearl, Wagner Comb Co.; Henry Agate, Weiner & Garson; Mr. Silbernagel, Jonas Koch Co.; George A. Armstrong, Paye & Baker; J. M. Curtiss and W. H. Adams, International Silver Co.

The Ward Jewelry & Optical Co., Springfield, Mo., is in the hands of a receiver.

San Francisco.

William Lamb, representing G. H. Fuller & Son Co., Chicago, was here, recently, calling on the trade.

L. Wolfsheim, of Wolfsheim & Sachs, New York, was here a short time ago, and left with large orders.

Burr W. Freer, of the Burr W. Freer Co., is still in the east, but his return is expected at almost any time now.

Paul Marion, who has taken up watch repairing for the trade, has moved to quarters with the R. & L. Meyers Co. at 717 Market St.

I. Zemansky has returned home after having concluded two very successful auction sales in Medford, Ore., for I. M. Ellers and Elwood & Burnett.

The Gem Jewelry Co. has opened a store at 1512 Haight St. in a rapidly growing district of the city. Robert Abrams is proprietor of this concern.

George H. Iden has just made arrangements with Hambright & Walsh, Los Angeles, whereby that firm is to handle Alvin silverware in the southern territory.

Among the out-of-town jewelers here purchasing stock, recently, were: P. H. Joseph, of the Joseph Jewelry Co., Ukiah; L. C. Koberg, Healdsburg, and C. J. Noack, Sacramento.

The Radke Watchmaking School, which has been located in the rooms of the R. & L. Myers Co. since it was removed from its former location in the San Joaquin Valley, has been removed again to new and permanent quarters in the building at 774 Market St., this city.

Hammersmith & Co. will receive a great deal of favorable advertising as soon as the yachting season commences, as one of the principal events of the year in local racing circles is the race for the Hammersmith trophy, one of the handsomest competed for on the Coast.

George B. Lewis, secretary of Shreve & Co., has been appointed a member of the committee of 75 which has in hand the preliminary plans for the World's Fair that is to be held in San Francisco in 1915 to celebrate the opening of the Panama Canal. The local jewelers are doing all in their power to make the proposed exposition a success.

There have been a large number of house robberies in San Francisco of late, and the police have been notifying the local jewelers to be on the lookout for second-hand goods that may be offered for sale. There have been but few burglaries of jewelry stores here this Winter, owing to the fact that the police have been carefully guarding these stores, as there are several still located in temporary buildings. These temporary buildings are to be removed within a short time, and then the rates for burglar and fire insurance will be less than at the present time

William Reed, employed by his father, J. H. Reed, Indianapolis, Ind., brought out a neat novelty for the Easter trade. On the bowls of sterling silver spoons he engraved newly-hatched chicks and the words "Easter Greetings." These spoons were tied with ribbon on Easter post cards and found a ready sale.

Milwaukee.

TRADE CONDITIONS.

The last week of the Lenten period proved to be a very busy one for local jewelers. The Easter trade has never been so good as it has been this year, according to leading jewelers. Excellent weather prevailed, money seemed to be more plentiful and general business showed a decided improvement. The German element of Milwaukee follows the custom of giving gifts to the young people who are confirmed at Easter time and it would seem that this particular business has been especially strong this season.

Rudolph Stelle has moved into larger quarters one block north from his former location. New fixtures have been installed.

George A. Draeb, who has been in charge of the Tosteson Jewelry Co., at Sawyer, Wis., for the past year, has purchased an interest in the business.

C. E. Searl, Merrill, Wis., reached his 59th birthday anniversary, recently. About 25 Odd Fellows and Rebekahs surprised him at his home and left various gifts.

David Goldman, proprietor of two of Milwaukee's leading jewelry stores, and his brother-in-law, Max Krieger, also a local jeweler, are expected to return this week from a sojourn at West Baden.

Out-of-town jewelers who visited here, last week, included: Henry Bayer, Whitewater; J. B. Kimball, Waukesha; A. Kuckuk, Shawano; F. P. Beswick and J. J. Ronseholdt, Racine, all of Wisconsin.

Franklin Thomson, secretary of the Wisconsin Retail Jewelers' Association, with his wife and family, is expected to return to this city in the near future, after a visit in the State of Texas. Mrs. Thomson and family have been in the south most of the Winter.

Following the action of F. W. Teschner, bankrupt Milwaukee jeweler, in ejecting from his store the custodian appointed by the creditors to oversee the sale of the stock, stock and fixtures have been moved to a new location on 3d St., near Grand Ave. Teschner controlled the lease where he conducted his business.

Gustave Keller, Appleton, Wis., president of the Wisconsin Retail Jewelers' Association, was the originator of a slogan or motto that has been adopted by the Appleton Merchants' Association—"Appleton, Active, Attractive." Mr. Keller is one of the leading public men of Appleton and has always taken an active part in affairs of the city.

F. H. Coburn, East Troy, Wis., was a Milwaukee visitor, last week. Mr. Coburn, who has completed the erection of his new jewelry store and flat building, has installed what is probably one of the largest and most modern vaults to be found in jewelry establishments of Wisconsin. An original burglar system, devised by Mr. Coburn, has been installed in the vault. New fixtures have also been placed in the store.

Milwaukee jewelers have been taking an active interest in the campaign that is being waged by the Merchants and Manufacturers' Association of this city against the peddler nuisance. The ways and means committee of the retail merchants' division of the Merchants and Manufacturers' Association has delegated James A. Fetterly, a special officer of the association, to make a thorough investigation.

Milwaukee jewelers recently sent a delegation to call on Acting Mayor Cornelius Corcoran to protest against the granting of an itinerant merchant license that is to be applied for by a Chicago firm, which is planning to dispose of a large stock of jewelry on the auction sale plan in this city. Mr. Corcoran assured the jewelers that he would not grant a license that would unwarrantedly injure regular business men of Milwaukee.

Omaha.

Harry Ryan will leave soon for a three weeks' trip.

Wm. M. Kusel, Hooper, Nebr., left last week to purchase land in Colorado.

A. W. Sawyer, Silver City, Ia., purchased goods in this city last week.

Harry and Fred Hallock have purchased the stock of W. J. Taylor, Burwell, Nebr.

C. C. Katleman, of Harry Greenblatt & Co., has returned from a successful business trip.

E. F. Strain, Gregory, S. Dak., was in Omaha last week, attending the Scottish Rites reunion.

Good crowds are reported at the auction sale which is being conducted at the store of T. L. Combs & Co.

C. L. Shook, of the Shook Mfg. Co., attended a reunion of the Scottish Rites in Hastings, Nebr., last week.

A. Comte, postmaster and jeweler, Springfield, Nebr., leaves soon for Switzerland, where he will receive a large share of an estate left to him by his father, who died recently.

Two men broke into the jewelry store of Burns Bros., Pierpont, S. Dak., last week, and secured jewelry and watches valued at $2,500. From all appearances the thieves left Aberdeen on a freight train for Pierpont, arriving at 8 P. M. The glass in the front door was broken, after which the men reached in and unlocked the door. There is no clue.

Traveling representatives who called on the jewelry trade during the past week included Louis Jaskow, Bodenheimer & Jaskow; John Marsh, Edmond E. Robert; Mr. Hopkins, Shepard Mfg. Co.; Mr. Cohen, Lewy & Cohen; Rudolph Bruening, Schrader-Wittstein Co.; H. R. Blackman, Enos Richardson & Co.; O. D. Schoening, Fred Gretsch Mfg. Co.; R. L. Clark, International Silver Co.; R. E. Lavigne, Mathey Bros., Mathez & Co.; S. Smith, Garland-Fisher Co.; S. F. Guggenheim, Ingomar, Goldsmith & Co.; Mr. Hoeder, M. A. Mead & Co.; Abel King, Emrich, King & Schorsch; Mr. Hirsch, Nathan Hyman Co.; R. T. Kleckner, Theodore W. Foster & Bro. Co.; Fred McIntyre, McIntyre Watch Co.; W. A. Smith, Waltham Watch Co.; M. DeSimone, F. DeSimone, Son & Co.; Clay von Sheppard, Krementz & Co.; E. P. Stannton, Gorham Co.; M. S. Greenbaum, Wm. I. Rosenfeld; Henry Jacobson, Jacobson Bros.; C. W. Hickox, Graff, Washbourne & Dunn; Mr. Ledos, Ledos Mfg. Co.; H. G. Pfordrisher, Eastern Jewelry Co.; E. H. Moore, Sykes & Strandberg; N. E. Treat, Gorham Co.

Rufus Inshaw, trustee, last week, sold the stock of C. C. Hyde, New Castle, Ind., to W. A. and A. A. Bohman, of Indianapolis and Jasonville, respectively.

rge C. Fearl, of the Elliott Jewelry has just returned from his first trip gh Illinois and Missouri.

rence Heyman, of the L. Bauman ry Co., has returned from Iowa and w working the city trade, assisted by Bauman.

e F. Dienstbier Jewelry Co. opened ew store, 320 N. 6th St., yesterday, h 29. The new quarters afford better es for the concern's increasing busi-

J Burke, president of the Brooks Jew- & Optical Co., left Tuesday night last on a business trip to Chicago, in- ng also to visit relatives there for a e days.

e case of Goldsmith against the stadt Mfg. Co., which has been pend- n Judge Fisher's division of the Cir- Court, was dismissed Wednesday by plaintiff.

W. Hoyt, president of the Hoyt Jew- Co, has just returned from an extend- rip through Texas and Arizona. Mr. er, of the same firm, has returned from p through Kansas.

e S. A. Rider Jewelry Co. has filed an hment suit in the court of Justice lding against Osias Fenster and Louis stein, partners as Fenster & Bernstein, $420.24. The case is to be heard April

S. Bauman is chairman of the bench mittee of the Mississippi Valley Ken- Club, under the auspices of which a h show is to be held next week at the seum. He will also exhibit his famous terriers.

. Stiffelman, head of the firm of M. Stiffelman & Co., will leave about April 1 an extended business trip through the h and northwest. M. Schneider, of same company, will start about the e time on a southern trip.

iss Anna Lunkel, manager of the dia- d department of the L. Bauman Jew- Co., last week was taken suddenly ill e company's establishment in the Com- cial building and had to be assisted to home. Her condition is improved and expects to be able to resume her duties few days.

he suit of the Smith Credit Jewelry against the Barnett Jewelry Co. was for trial last week in Judge Williams' sion of the Circuit Court, but was not hed. This is the suit in which is in- ed the question whether a company buys or loans on a watch sold on it by another company, after notifica- is given of the number and descrip-tion of the article, can be compelled to give it up.

Among the out-of-town dealers in St. Louis, Mo., during the past week were: Frank P Nims, Warrenton, Mo.; Robert Tetley, of the Robert Tetley Jewelry Co., Farmington, Mo.; August Kalbitz, Red Bud, Ill.; F. O. Seidel, Troy, Ill.; William Westphal, St. Charles, Mo.; W. K. Urbani, Vandalia, Ill.; James A. Bainbridge, Marion, Ill.; H. M. Whitner, Caruthersville, Mo.

The St. Louis Court of Appeals will have to decide whether the Mermod, Jaccard & King Jewelry Co. shall pay the National Directory Co. for that page advertisement in the St. Louis City Directory. As has been heretofore told, payment was to be contingent on certain results. A controversy arose as to whether the results had accrued. The jewelry company claimed they had not. The directory company contended the jewelry company was to blame, because it had failed to keep specified goods in stock. Judgment in Judge Williams' division of the Circuit Court was in favor of the directory company. Now the Mermod company has prayed an appeal to the Court of Appeals, and it has been granted and an appeal bond has been filed.

Among the traveling representatives of jewelry houses in St. Louis during the past week were the following: John A. Herschede, the Herschede Hall Clock Co.; Henry H. Jacobson, Jacobson Bros.; Carl H. Weideman, M. De Delictis & Co.; Mr. Singleton, Adams & Singleton; Abel King, Emrich King & Schorsch; E. S. Hike, Champenois & Co.; C. A. Holbrook, Sloan & Co.; F R. Horton, Carter, Howe & Co.; S. E. Dickson, Adelphi Silver Co.; Joseph Keller, Keller Mfg. Co.; S. W. Pickering, A. Ludeke & Co.; W. S. Willis, the Gorham Co.; Emile Homberger, American Swiss Watch Co.; W. A. Burt, Cory & Reynolds Co.; C. A. Rogers, Irons & Russell Co.; M. W. Potter, J. M. Fisher Co.; Clayton Shepperd, Krementz & Co.; M. L. Barnard, Larter & Sons; William J. Anton, Durand & Co.; George E. Taylor, Wilcox & Wagoner Co.; Louis Hirsch, New York.

Los Angeles.

Messrs. Schwarzkopf and Curry are still in New York.

Julius Wiesenberger is taking a short rest at Arrowhead Hot Springs, near San Bernardino.

A. B. Cohn has been visiting some oil land in which he is interested in the vicinity of Bakersfield, Cal.

George L. Penniman, who returned recently from an extended tour in the east, is now taking a week's vacation.

Harry Harrison and J. W. Reid, of Montgomery Bros.' sales force, have recently been confined to their homes by illness.

Jesse Rubin & Co., formerly Rubin & Clark, 331 S. Spring St., is retiring from business. A. G. Bruce is engaged in closing out his stock.

E. F. Whittemore, formerly of Denver, and more recently with the J. C. Fleming Co., is now the head of the watchmaking department of Luckenbach & Co.

George W. Miller, of Brock & Feagans' silver department, took an automobile trip of 180 miles, a few days ago, visiting San Bernardino, Redlands, Colton, Riverside, Pomona and other smaller towns en route.

Among the traveling representatives here, recently, have been: Joe Leudan, of A. R. Katz & Leudan; Gus Weil, Electric City Box Co.; W. J. Miller, Seth Thomas Clock Co.; J. W. Hagan, A. J. Hedges & Co.; Alex Feldenheimer, California Jewelry Co.

The Radium Gem Jewelry Co. has been organized and has opened a store on the north side of W. 3d St., near Broadway. The proprietors are D & M. Hyman, proprietors also of the Raymond Jewelry Co. and the United States Investment Co.

Hambright & Walsh have installed a number of large and handsome new wall cases in their salesroom. They will add greatly to the firm's facilities for doing business. The firm will soon occupy two additional rooms in the rear now occupied by Messrs. Schwarzkopf and Penniman.

The Donavan & Seamans Co. made a rather remarkable exhibit of ecclesiastical goods in their window during the week preceding Easter. It comprised chalices, croziers, candlesticks, crucifixes, censers, ostensoriums, ciboriums, altar chimes, missal stands, etc. This firm has a special department of this class of goods, the only one in this city and probably the largest west of Chicago.

Brock & Feagans sold three handsome silver cups in one day last week. One, 16 inches high, standing on a five-inch base, having two handles and a cover, was sold to the Vancouver (B. C.) Horse Show Association. It is designated as the "President's Cup," and is to be presented at the time of the show, April 19 to 23. Another smaller solid silver cup was sold to the same association, to be given to the owner of the smallest pony exhibited. The third cup was a three-handled loving cup, 27 inches high, including the case.

Emile Shostrom, salesman for the Donavan & Seamans Co., and Harry Harrison, of Montgomery Bros.' gold jewelry department, were both winners of lots in the drawing of government lands near Yuma, made in this city a few days ago. Mr. Harrison was ill at the time of the drawing and sent his companion in the department, Jack Gilbert, to represent him at the drawing. The lot chosen by Mr. Harrison had also been chosen by nine others. Mr. Gilbert was chosen to do the drawing. He was blindfolded and the first number he picked out was that of Mr. Harrison. Mr. Harrison had been offered $1,000 premium for his lot in case he secured it.

When the Pearlin Bros. were found guilty of embezzlement in taking away and disposing of nearly $500 worth of diamonds belonging to J. Rosencranz, the judge told them plainly that neither he nor the jury believed what they had said about the transaction, and that if they did not come before him and tell him the exact truth he would not even consider their petition for probation. A few days later they came before the judge and confessed that Rosencranz had given them the jewels and that they gave them to another dealer to dispose of, accepting his note in payment for the gems. The application for probation was set for hearing March 28. It was understood at the time of Pearlins' confession that the court would examine their petition.

This is Hand!

The Auctioneer that sells your dead stock

"Get Rid of Dead Stock Somehow"

Says Mr. Chas. T. Evans in the "Association Jeweler"

"We all have goods of different kinds which we wonder how we ever came to buy, and which look at us from corners which they have occupied for years. Do they increase in value as the years go by? What do you eventually expect to do with them? If you have them in stock a while longer, what can you get for them? Is it not good policy to make reduced prices on them, and if necessary still further reductions, in order to have their room and the money resulting from the sale? Goods are not worth even what you paid for them if you cannot dispose of them. Take your loss now and your profit later. There is still another feature in connection with all this talk about 'left-overs,' and that is the fact that a lot of these old-timers sitting around give your store the appearance of an old 'curiosity shop,' or a store where 'antiques' are kept—not sold. Think the matter over, and then get busy, for now is the time to act."

If it is your desire to reduce your stock or retire from business, I offer you the services of myself and staff of six of the best trained Jewelry Auctioneers in the United States, who will conduct your sale in the proper manner and guard your interest and reputation in every way.

I have conducted the largest and most successful sales of fine jewelry ever attempted in this country and CAN PROVE IT.

Wire or write me to-day, and I will submit references and proof of my great ability to turn your stock into cash in a satisfactory way.

"THE NEW SALESMANSHIP AND HOW TO DO BUSINESS BY MAIL." By CHARLES LINDGREN. 190 pages, half leather, polished red edges. Published by Laird & Lee, Chicago. Price, $2. Extra cloth, $1.50.

THIS is one of the most recent additions to the rapidly growing literature relating to salesmanship. It is now pretty well conceded that psychology plays an important part in the prosaic task of selling goods both by mail and through the medium of the salesman. College professors well versed in psychology have observed this fact, and in some cases very fittingly and effectively applied their knowledge of psychology to the art of selling.

The present work, however, is more phrenological than psychological, and consequently cannot be taken too seriously, although it contains very many suggestions which will prove helpful.

The author gives advice in approaching and handling buyers of different temperaments. Some of this advice is very amusing. He lays down prescriptions for handling "the disputative buyer," "the opinionated buyer," "the inflexible buyer," "the irritable buyer," "the impolite buyer," "the aggressive buyer," "the know-it-all buyer," "the disagreeable buyer," "the antipathetic buyer," "the buyer who brags," "the conservative buyer," "the conceited buyer," and so on.

In speaking of the irritable buyer the writer says that "irritability springs from approbativeness. With this faculty and combativeness and destructiveness strongly in the lead over his other faculties, a buyer will be very susceptible of anger or passion. You must soothe this type into calmness before attempting to impress him with your proposition. When you have him calm, proceed with your argument without antagonism and tactfully explain away any reasons or opinions that he may oppose. Do not lose your self-possession and you can surely control him."

In another paragraph, under the caption "Buyers Who Intend to Defraud," we read the following: "A buyer who intends to defraud and lacks secretiveness, will show his intentions by a guilty and hurried manmanner. * * * If he has secretiveness large he will use almost as much care as an honest man. But if the salesman is a close observer of expression and *heads* he will be suspicious when he sees a tricky or unreliable expression, or a deficiency of conscientiousness. Observe the eyes when asking for references, and if you find any tell-tale expression there, it is best to suggest care to the credit man. * * *"

In the chapter entitled "The Reasoning Used in the Sales Argument," a syllogism is defined as "a fully expressed form of an inductive or deductive inference. That is, everything connected with the reasoning is set forth explicitly. It is not necessary to directly state everything. Much can be implied." This is a very misleading definition of the good old-fashioned syllogism as understood by psychologists and logicians. Without going into further details it may be said that the work has many good attributes and would have been improved with the omission of the element of phrenology. Psychology is a time-honored science, but the phrenology should by no means be made the basis of a serious work on salesmanship, because the conclusions from phrenology alone are *not* judgments, but only conjectures. R. F. N.

Jay W. Diamond, Lake Odessa, Mich., is now located at Medford, Ore.

Philip Schmidt, Peoria, Ill., is remodeling his store and making extensive improvements. A new front will also be added to the building.

WE have recently issued a supplement to our 1904 material catalog which will be forwarded to you on application. This supplement used in connection with our 1904 catalog you will find a great help in getting correct repairs for our movements. Material for all new grades manufactured since the issue of our 1904 catalog is listed. Serial numbers showing grades of movements to 15394000 are given; table showing numbers and strengths of Hair Springs for different grades will be found a great convenience. We especially call your attention to the introduction in the supplement which explains how to get the part you want for any particular movement. A postal card request will bring one of the supplements.

THE HOROLOGICAL REVIEW

ome Calculations Applicable to Barrel Train, and Motion Work of Watches.

By T. J. Wilkinson.

PART I.

THE BARREL.

CH barrel may be defined as the l circular container which con- mainspring. Barrels may be di- three classes—those not having on their circumference, those pos- eth on upper, lower or central part orders, and those consisting of a l for the mainspring, with a main ving teeth. That class of barrel teeth is found in watches having nd chain. They are mainly of nake. With this exception main- rrels, both American and foreign, with teeth, and it is to this kind English term "going barrel" ap-

er form of barrel consists of two e under steel barrel containing the g with a main wheel, which also s cover for the mainspring. The and structure of this type, being vn, calls for no further reference, ect on the train is similar.

benefit of students and others we point out that the barrel, center d motion work do not constitute of the train. The train essentially of the following parts, viz., the second wheel, the third wheel and e fourth wheel and its pinion, and rn of the escape wheel; all, how- ther train, barrel or motion work, ated in action and proportion of s.

these introductory remarks we shall investigation with an inquiry as olutions of the barrel in its rela- e number of teeth possessed by it enter pinion into which it depths, al with the number of turns it takes p the mainspring.

er to make our subject more ex- shall repeat the foregoing in an- m. The number of teeth in the main wheel, the number of teeth enter pinion and the number of essary to wind the mainspring are rs which we must have when we determine the number of revolu- rrel will make when in place in a . Should we only want to know the of turns the center pinion will make for one complete revolution of the barrel, then we only require to know the number of leaves in the center pinion and the number of teeth in the barrel. This same statement applies if we wish to know the number of revolutions any pinion makes with any wheel in the train.

The following is the rule: Count the number of teeth in the wheel and the number of leaves in the pinion, then divide the number contained in the pinion into the number of teeth in the wheel and the product will be the number of revolutions the pinion will make for each full revolution of the wheel. Having stated the rule, we shall next show its application. Upon counting the teeth in the barrel we find they number 80, and the number of leaves in the pinion of the center wheel counts 10.

According to the rule $80 \div 10 = 8$; this means that the center pinion revolves eight times to one revolution of the barrel. As the center pinion takes one hour under normal running conditions to make one revolution, we can readily adduce that eight revolutions of the center pinion consumes eight hours' time. This point determined, we now know that one revolution of the barrel is made in eight hours. We still have another element to consider before we can furnish an answer to the problem as to the length of time the watch will run—that is, to find out the number of turns it takes to wind up the mainspring. A test shows that it takes four turns to wind up this spring; consequently, we know that the barrel will make four revolutions when running down. To turn this information to practical account it is necessary to enunciate an additional rule—*i.e.*, that the number of turns required to wind up the main spring, multiplied by the number of hours the barrel takes in order to make one revolution, gives us as a product the number of hours the watch will run. To gain in clearness we shall re-state conditions: Number of teeth in the barrel, 80; number of leaves in the center pinion, 10; $80 \div 10 = 8$. This sum, as explained, represents the number of hours this watch will run for one revolution of the barrel. Now we apply our last rule. This sum (8) multiplied by the number of turns it takes to wind up the mainspring (4) gives us $8 \times 4 = 32$. These figures represent the number of hours this particular watch will run.

It might not be out of place to mention that some workmen have the mistaken idea that each turn of the barrel is equivalent to eight hours' running. This is an error; one turn of the barrel may represent six, seven or eight hours, or fractions of these hours. The only exact method of determining how many hours any watch should run is to make calculations, and then in proof compare figures with actual tests, which can readily be made by allowing a watch to run down.

In proof that one turn of a barrel does not always represent eight hours we shall work out another example, as follows: The teeth in the barrel or main wheel number 78, the leaves in the center pinion number 12 and the number of turns necessary to wind up the mainspring is 6½. Having all the necessary data, we proceed in the manner already explained. First we divide 78 by 12, the result being 6½. The answer informs us as to the number of revolutions the center pinion will make to one revolution of the barrel. We next multiply 6½ by the number of turns it took to wind up the mainspring, $6\frac{1}{2} \times 6\frac{1}{2} = 42\frac{1}{4}$. The answer represents the number of hours this watch will run.

We have now shown that in one instance one revolution of the barrel was equivalent to eight hours' running and in the last example one revolution was the equivalent of 6½ hours' running. In further explanation of our subject let us suppose that a workman possesses an old English watch of the chain and fusee type, and for the purpose of practice and experiment desires to remove the old fusee and barrel and substitute in their place an ordinary barrel with teeth. We are not concerned about the planting and depthing of this new barrel, it being no part of our present topic, but only with the selection of a toothed barrel suitable for the purpose mentioned.

Assuming that on counting the leaves of the center pinion we find their number to be 10, it is desired to have the watch run for 32 hours, and with a mainspring requiring four turns to wind up. These being conditions imposed, we shall now see how to meet them. First, we divide the number of turns (four) specified for winding up the mainspring. Four also represents the number of revolutions of the barrel into the number of hours we specified for the watch to run, viz., 32, as follows: $32 \div 4 = 8$. We have now obtained the number of hours required for one revolution of the new bar-

WALTHAM WATCHES

COLONIAL SERIES
Riverside Maximus
Enamel Dial

COLONIAL SERIES

Gold and Gold Filled Watches

These watches are a noteworthy addition to the Waltham line. They are exceptionally thin and may be had with Enamel, Silver Finish or Gilded Metal dials of artistic design. Colonial Series watches appeal to the most critical buyers. Equip your stock with these goods for Spring trade.

Colonial Series watches are to be had in five grades of movements as follows:

Riverside Maximus—23 jewels, adjusted to temperature, isochronism and five positions.

Riverside—19 jewels, adjusted to temperature and five positions.

Royal—17 jewels, adjusted to temperature and three positions.

No. 1425—17 jewels.

No. 1420—15 jewels.

All Colonial Series watches are cased and timed at the factory. They are delivered to the trade in display boxes. The retail selling price on these watches is fixed and plainly printed on the contract notice which is placed in the box with each watch before leaving the factory.

WALTHAM WATCH COMPANY
WALTHAM, MASS.

A the number of hours also repre- t number of turns the center pinion one revolution of the barrel, then u (eight), multiplied by the number in the center pinion, gives as a he number of teeth we require in to run the watch 32 hours.

e the matter briefly, the center s 10 leaves, the watch is to run the mainspring to take four turns p: $32 \div 4 = 8$. Now $8 \times 10 = 80$. lation shows the barrel requires meet the conditions imposed. We alter the conditions before given, e intend now to have the watch urs, the mainspring to require five wind up. The problem, as in the stance, is to find the number of h this barrel requires. Following er method, $30 \div 5 = 6$, the num- volutions the center pinion makes rn of barrel. Then, $6 \times 10 = 60$. el should now contain 60 teeth to requirements of our last specifica-

now assume a different problem in the same watch. Supposing we rrel containing 75 teeth which fits e nicely. The mainspring takes to wind up. Let us see how long will now run.

nter pinion we know has 10 leaves. er we obtain as follows: $75 \div 10$. This gives us the number of hours for one revolution of the barrel. entally the number of revolutions r pinion makes for one revolution rrel. The mainspring winds up in ; therefore, $5 \times 7\frac{1}{2} = 37\frac{1}{2}$. This d mainspring, as the figures show, he watch $37\frac{1}{2}$ hours.

taining the same barrel, we will ditions somewhat, viz., either place ks on or else substitute a heavier g, the effect of which is that we ly four turns to wind up the main- Let us now calculate the running ne watch: Barrel teeth, 75; leaves pinion, 10; turns to wind up, four. $\div 10 = 7\frac{1}{2}$. Length of time it r one revolution of the barrel, $= 30$. The answer represents in running time of watch when four nplete the winding.

do not wish to be misunderstood, ate that if the leaves of a pinion ted to a barrel of certain dimen- ssessing 60 teeth, and we want to rrel containing 75 or 80 teeth, re- he old pinion, it would be neces- obtain a barrel with teeth spaced to match the pinion leaves. This barrel whose circumference is han the 60-toothed barrel.

llowing rule can also be applied ck on calculations: Multiply the the barrel by the number of turns to wind up the mainspring and e product by the number of leaves n pinion. For example: Teeth in 0; number of turns to wind up g, four; number of leaves in inion, 10. Then $80 \times 4 = 320$; $= 32$, which is the number of mainspring will run the watch.

el & Hardenbrook have succeeded to ess of Locke Bros., Oketo, Kans.

Planetaria and Astronomical Clocks.

THERE has just been restored to running order a very fine piece of work by Francois Ducommun, a planetarian, constructed by this artist in 1817, and which the museum of the School of Horology at Chaux-de-Fonds had recovered in a deplorable condition. Thanks to the generosity of a descendant of the constructor, M. Jules Ducommun-Robert, a talented artist, Louis Perrin-Jeanneret has successfully accomplished the restoration, which does him credit.

The work of Ducommun is one of the most interesting of this character in existence. His planetarium is accompanied by a perpetual calendar, which takes account of the vicissitudes of the Gregorian change.

This calendar actually anticipates the suppression of the centennial leap year.

Fig. 1 gives a general view of the apparatus. In the center is the sun, around which turn first Mercury and Venus, then the earth, with the moon, its satellite, and our neighbor, Mars, with which many terrestrial inhabitants hope some day to be in communication. A little further off are the four small planets, Ceres, Pallas, Juno and Vesta; and finally, more and more remote from the center of the solar system, Jupiter, with four satellites; Saturn, with seven and a ring, and finally Neptune, which had to be cut off the engraved plate to enable it to fit into the columns of the paper.

PLANISPHERE OF FRANCOIS DUCOMMUN.

I have just stated, says Leopold Reverchon in *Revue Internationale de l'Horlogerie*, that the sun is at the center of the system; it is more exact to state that it is at the entrance of the orbit of all the planets that revolve about it with the exactness required by astronomical data.

For example, the satellites of Jupiter and of Saturn do not revolve about their mother planets. Such a rotation would require, on the axes of these planets, an accumulation of wheels of which our readers could form an idea by examining plate 3, which represents a planetarium of Antide Janvier. We know that in the second half of the 18th century planetaria were very much the vogue, just like moving globes.

The most eminent artists devoted their attention to their construction, and it is in their pleiad that we may include the name of Decommun as one of the last on the list.

Ferdinand Berthoud, in his "Histoire pour la mésure des temps par les horloges" ("History of the measurement of time by clocks"), devotes a number of pages to the history and the description of planetaria. He commences by referring to the globe of Archimedes, 250 years, and that of Possidonius, 80 years before the Christian era.

It is a curious fact that it is on the testimony of Cicero that the theories are based on which we are compelled to depend with regard to the nature of the movements of these two ancient productions, of which no exact description remains to us. We can only imagine that Archimedes had to employ toothed wheels and that his sphere was operated by means of a water clock.

As to the Possidonius machine, it must have been contemporary with Cicero, for the great orator, in the passage in which he speaks of it, employs these words: Spheram quam nuper effecit familiarris noster Possidonius (The sphere, which, as is well known, our Possidonius recently constructed).

The poet Claudien has given a short description, in verse, of the Archimedean sphere, but he is, of course, very restricted in describing its action. It must likewise be remembered that the invention of toothed wheels is also sometimes ascribed to the illustrious Syracusan, whereas others believe them to have existed prior to Aristotle, who lived a century before Archimedes.

But let us return to our subject. The whole world has heard mention made of the planetarium of Jacques de Dondis, made about 1340. Less is known of the machine of Father Schirlacus de Rheita, described by Schott in his *Mirabilia Techuica*.

In 1701 Martinot and Haye presented to Louis XIV. a moving globe, and some years later others were executed by Jean Pingeon.

Two years after the presentation of the globe of Martinot, eight years after the death of the illustrious Huyghens, there appeared, in a posthumous publication of the works of this great man, the description of an automatic planetarium, concerning which we shall later add a few words.

Antide Janvier has given the description of the Huyghens planetarium, translated from *Christiani Hugueuii opuscula posthuma*, published at Leyden in 1703. This translation has been reproduced in *l'Histoire de l'Horologérie*, by Pierre Dubois, from which is taken plate 2. We shall not

wit is true, the complete detailed ex-ations of Huyghens and of Janvier. e shall state only what is essential to a al comprehension of the systems.

T apparatus is of the form of an onal box of about 31¼ inches (80 eters) in diameter, and at least 7¾ deep. Huyghens made it a point to it to the least dimensions.

onsisted of two plates, the first of was pierced by circular grooves, in moved the little rods supporing the s. I say the first, because the appa- was intended to be attached against I also say circular, because Huy- did not wish to complicate his appa- and its pinion H has 14 leaves. The wheel H, of Mars, has 158 teeth and is driven by the wheel G, of 84 teeth. The wheel of the earth I has 60 teeth and engages with the wheel F, of the motor shaft, which also has 60. The special detail of the movement of the moon is shown in Fig. 5, in which is represented a toothed circle, transmitting the motion to the little wheels of the earth and its satellite. This circle has 130 teeth and is attached to the front plate.

The shaft, therefore, moves by means of the wheel E, with 52 teeth, the circle L, of Venus, which has 32. Finally the wheel D, with 121 teeth, moves the wheel of Mercury, with 17 teeth, through the 365 days, and its epitomized movement of the moon, is incapable of solving the astronomical problems which its originator desired it to accomplish. Its merit consists in its being the first apparatus of the kind constructed according to modern astronomical principles.

One of the devices which attained the most brilliant astronomical reputation was certainly that of Passemant. Passemant, who died in 1769, at the age of 67 years, was at once astronomer, optician and horologist. He perfected the telescope, and in 1765 presented to the king a plan in relief and a "memoire" showing means of very great simplicity for bringing ships to Paris.

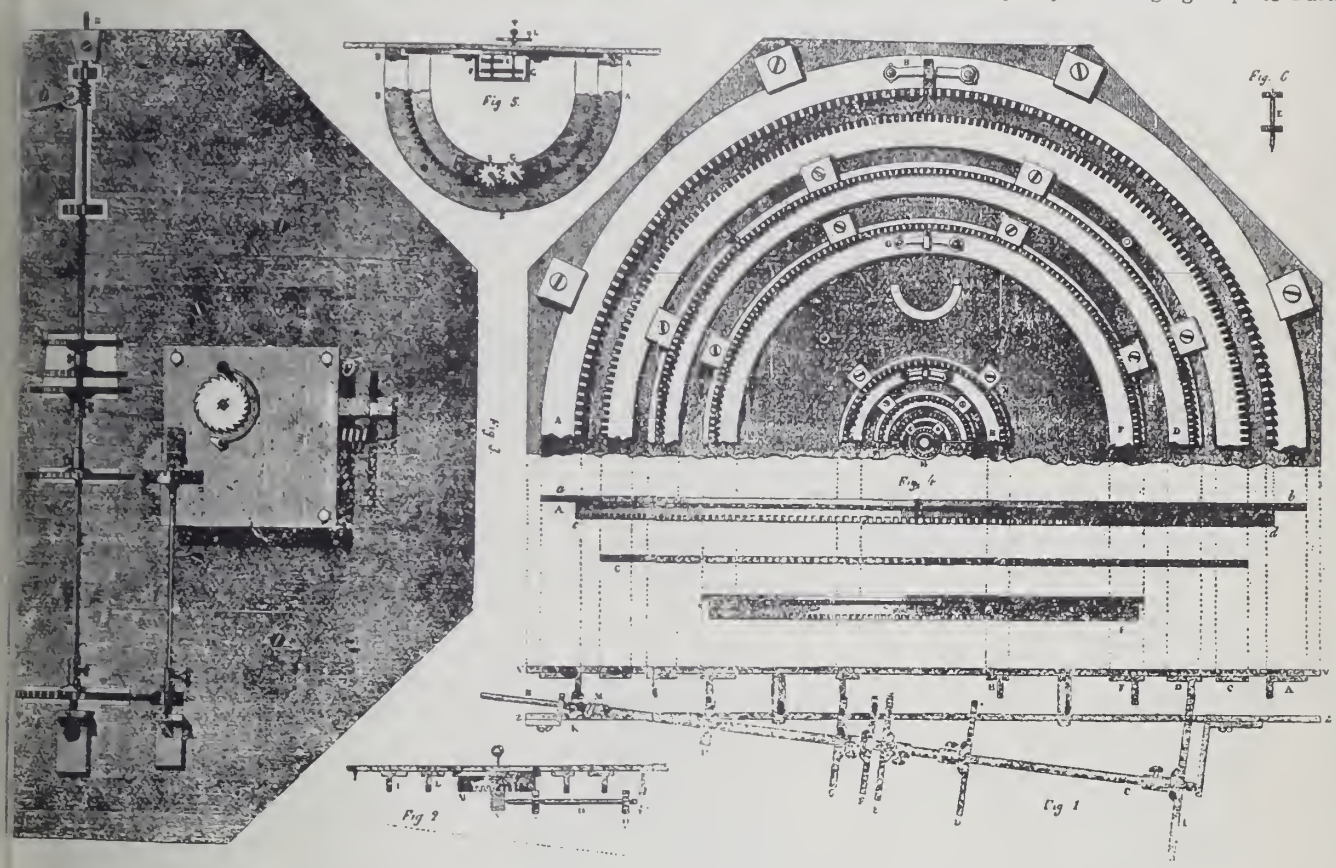

PLATE II—THE PLANISPHERE OF CHRISTIAN HUYGHENS.

at by taking into account the eccen-ri es, hardly appreciable to the eye, on a small scale.

Ich of these rods was mounted on a ced upright circle underneath. These rs are shown in Plate 2, Fig. 4, which ep sents the mechanism. They are all ed simultaneously by the large shaft Fig. 1, of which the connection with he lock N is indicated in Fig. 3. The ob ue arrangement of this shaft will be o ; this disposition allows the large ir ns to work on the small wheels, so n the rotation of all the planets is ac-r ished without difficulty. The planets ep sented, starting from the center to-a the circumference, are Mercury, e s, the Earth, Mars, Jupiter and a n.

l lowing are the number of wheels and r ns by means of which the movements r ffected:

e wheel of Saturn A (Figs. 1 and 4) a 06 teeth. It is moved by the pinion K The wheel F, of Jupiter, has 166 teeth, medium of the two pinions, which are shown in detail in Fig. 2, and of which one, Q, has 12 teeth and the other seven. There remains C and the wheel D, situated between Saturn and Jupiter. The first carries one division for 300 years. It has also 300 teeth, and is operated by the endless screw M on the motor shaft.

The wheel D, which has 319 teeth, indicates the months and the days of the month. It is moved by the wheel L on the shaft, which has 73 teeth.

The hours circle moves behind the opening S. As for the years and the days of the month, they appear below, in the opening located between the orbits of Jupiter and Saturn.

The Huyghens apparatus may be operated indifferently, by hand or by means of a clock.

The constructor has given, in detail, the methods by which he calculated the wheels and the gearings. The details are, of course, very tedious. Moreover, this planetarium, with its earth revolving once in

He was therefore one of the promoters of the project of Paris as a seaport, which has since resulted in the spilling of so much ink.

(To be continued.)

The question of placing what is known as the Richardson clock, a conspicuous timepiece in Elmira, N. Y., on the City Hall there is being discussed. Corporation Counsel Danaher, of that place, has rendered an opinion to Mayor Shechan, of Elmira, in connection with the ownership of the clock. In this opinion he cites the fact that the clock was purchased by the city from J. Richardson & Co., in April, 1904, for $571. It is the opinion of the Corporation Counsel that the city owns the clock, is responsible for any damage that might result from slate or other substances falling from the tower to the sidewalk, and that it is the privilege of the city of Elmira to move the clock to the City Hall tower, if it sees fit.

We are spending our money advertising and building up an immense business which has to come to us through retail jewelers who sell our watch.

The watch is the Ingersoll-Trenton and only jewelers of *responsibility* can have it to sell.

In the important 7 jewel field isn't it to your interest as much as to ours to have this plan succeed?

Over 7,000 of the best jewelers have answered "yes" by placing these goods in stock.

No. 181. Dial 231. Domestic Mahogany Case. 16¼ in. high, 12¼ in. wide, 8¼ in. deep. List, $55.

You Can Sell These Clocks.

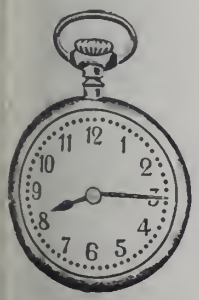
The "Excelsior" fills the demand for a high-class chiming mantel clock at a moderate price and sets a new standard in clock construction. Our progressive policy and unusual manufacturing facilities permit us to offer these superior chiming mantel clocks at prices that mean more sales for you.

The movement retains all the desirable features of the famous English clocks combined with new ideas of our own experts. These clocks are guaranteed to keep time—and they come to you ready to run.

The chimes are made of special bell metal, long rods set in a heavy block and controlled by a movement of proved worth, striking every quarter hour the Westminster chimes in the sweetest tones. A feature of the movement is the quarter striking mechanism. A very important point is the Dial Works —which distinguish the "Excelsior" movement from all other makes of same character.

The illustration shows one of our many attractive models. Note the quiet dignity and elegant simplicity of the case design. The classic lines are unusual in clocks at these prices. We draw especial attention to the excellence of the dials which are beautifully etched. The finish gives a decided rich gold appearance. The hour rim is raised and silvered and the numerals are inlaid in black. The glass of door is of good plate, not bevelled.

The Excelsior will please your customers and the attractive prices are advantageous to you.



Write to-day for illustrated literature and price list for immediate delivery. Import orders for Fall delivery should be placed now.

When in New York visit our salesrooms and see for yourself the superiority of our Chiming Clocks.

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

The Master Jewelry Salesman.

Written expressly for The Jewelers' Circular-Weekly.

ne ever purchases anything but the cessities of life. The statement may ing, but the fact, like its broader re- ruth, is partial to surprises. The rer buys his loaf of bread because ning of a long established custom de it necessary to his existence. use-wife secures her package of cause the demands of culinary art taste of present-day life have made essity.

echanic demands certain tools, not there is no more primitive substi- t because the present development rade requires them. We lay aside blket that was ample covering for the don our tailor-made suits and dub necessity which they are; made e establishment of a custom. Hats, ollars, chairs, desks, houses, gov- s, all are commercial necessities, not ir own intrinsic merit, but because ccustomed to their use and are not to get along without them. There substitutes for all these, but public dustrial development, and social its, have made the forms we are ted to essential to our daily life.

ost of them our remote ancestors had substitutes, and lived their To modern life, exacting as it is quirements and its prejudices, the of the earlier centuries have be- absolute necessities of this.

individual, too, the luxury of an o becomes, under some strongly influence, the necessity of the the one thing needed to restore rbed valences of desire, and with- h life would not be as complete as een before. The need may be ome toy or present for a child. instant the pleasure of that child anticipation, something that is y necessary to make life complete lesire becomes demand; its remedy, se.

ll, then, necessity is but a growth, a variety of outside influences tributed their nourishment; the that formerly confronted mere ve many of them developed into tials of modern life. It is the of the salesman to direct this growth in the direction of his specialty; of the jewelry salesman to create an esthetic interest that will expand into a demand.

Every step up the ladder of culture increases the variety of life's standards and raises the horizon of necessity to a higher plane. The artist finds many things essential to life that to the average day laborer would seem purely visionary, not so much from any natural difference in the capabilities of the two men as from the fact that the artistic perception has been developed into a governing factor in the one case and has not even asserted its existence in the other.

Here is the dividing line between shop-keeping and salesmanship. The former finds his market already created by a developed and universal recognition of a necessity. The bread vender has been preceded through the hallway of centuries by that great advance agent, custom; he only has to let his location and his price be known; his demand is there, for man is a universal bread-eater. Coarse working-garments are also matters of common utility and hardly need a salesman The hardware dealer has an assured market for his hammers through the necessities of the mechanic's trade; still he is given his limited opportunity as a salesman in the possibility of convincing the purchaser that economy and efficiency demand a better hammer than he has been using. To the banker and professional man the tailored suit is a necessity; it is up to the clothing salesman to make it one in the mind of the clerk or the janitor. When really convinced that it is their duty to make the most of their own personal appearance, better clothing ceases to be a luxury and becomes a necessity to them, since the fierce competition of the present has made necessary every ounce of efficiency they are able to muster.

If personal appearance counts for anything at all, as nearly everybody admits that it does, the outer garments may be considered a part of any man's business equipment as necessary a part of it as the mechanic's hammer. The salesman who can show this up convincingly to the man who did not originally believe it has grasped the ethics of a psychological fact and has taken the first step out of shop-keeping into true salesmanship.

It is a part of the jeweler's professional commission to deal largely with the salesmanship of the higher rank; to so far advance the grade of his natural market as to make a necessity of the esthetic. It is easy enough to convince the average man that a watch is a part of his essential equipment; most men know that already and of themselves seek out the market. Watch salesmanship begins at the point where the customer's preconceived ideas of his necessity leave off. Even here the first advance up the grade of utility is not one requiring great skill. Almost any man knows without the telling that he had better have no watch at all than one that is not reliable. It is when an attempt is made to guide him beyond the field of strict utility and into the forests of esthetic beauty that he becomes unmanageable and that the average salesman loses his way.

To show an investing value in those esthetic qualities which the world regards as luxury; to show an honest enthusiasm that is too earnest to be ignored without departing from the quiet dignity of cultured refinement; to convince the watch buyer that an artistic case not only enhances the personality of the wearer among his fellow men, but that it assures to his own consciousness a superior self-assurance which of itself increases his possibilities of success; that it puts his taste upon a higher plane of life which is but a forerunner of intellectual advancement; when all this can be done without offence, without loss of dignity on the salesman's part or loss of self-respect on the part of the customer, a brand of salesmanship has been made use of that creates genuine desire where only admiration at first existed.

The mistake of many good salesmen is that they stop here; it marks the dead line of their efforts or of their capacity. To the master salesman who is prepared to go into the real psychology of his calling it is little more than a beginning. Desire is not necessity, though it is the first step in the latter's creation.

Desire, as a rule, is the product of reason; the fruit of skilful argument. Out of that must be created the personal influence, the silent argument of one soul that is sympathetic with another which has been newly awakened and is as highly sensitized as a new-born babe.

(To be continued.)

Spring suggests life and freshness—let your stock and store do the same.

The Palatial Retail Jewelry Establishment of Henry Birks & Sons, Ltd., Montreal, Can.

SPLENDOR and grandeur in a distinguishing and real sense mark the premises, both outside and inside, of Henry Birks & Sons, Ltd., Montreal, in their commanding location at the corner of Phillips Sq. and St. Catherine St., the very heart of the business section of Montreal.

The building has a frontage on St. Catherine St. of 90 feet, and it runs the entire length of Phillips Sq., a distance of 200 feet, the total area of the premises being 18,000 feet. It is claimed that this is the largest ground area covered by any jewelry store in the world, the second largest being in New York, which has 16,300 feet.

The Birks store, constructed and furnished throughout in an artistic manner, is, in fact, one of the show places of Montreal, forming one of the handsomest purely commercial structures on the American continent.

The building is of Miramichi olive-green sandstone, and is Italian in its architectural treatment. The main entrance is through a richly carved stone arch under a wrought-iron marquise in the center of the Phillips Sq. front. This arch has a domed ceiling in blue and gold supported on eight fluted columns, in Caen stone finish.

Upon entering the store proper a most striking feature is the 24 massive Scagiolia marble columns, the soft yellow tones of which harmonize with the old ivory tones of the richly decorated ceiling and with the deep-toned Spanish mahogany of the counters and show cases, the whole making a very harmonious setting for the costly wares. The floor throughout the store takes the yellow tint of the decoration and is laid in marble terraza, with marble strips forming panels.

The lighting is supplied by Nernst lamps, distributed over the ceilings, and there is a pneumatic tube cash system connecting all departments. The counters and show cases are so admirably arranged that broad aisles wind around the whole ground floor, and the general effect is most admirable. On the west side of the building, facing the main entrance, a broad staircase leads into the business offices and packing rooms on the second and third floors, where the furnishings are sumptuous and practicable.

Very few are aware of the fact that behind the walls in Birks' building is a factory of fine arts employing several hundred expert workmen representing nationalities from all parts of the world. Four floors in this factory are given over to gem setting, goldsmiths, silversmiths, watchmakers, stationery printing, etc. The ecclesiastical department is noted for the fine execution of its work.

For a long period the firm's record was that the business doubled every four years, but the growth of the last few years has surpassed even this rate.

Henry Birks, founder of the present firm, was born in 1840, at 84 St. James St., Montreal, his parents having shortly before this date come to Canada from Barnsley, in Yorkshire, Eng. After his education at the high school young Mr. Birks entered the jewelry store of Savage & Lyman as a clerk. This store, which was then the finest retail store in Canada, was illuminated by three sperm oil lamps! Mr. Birks became a partner in the firm in 1868, and, March 1, 1879, commenced business in his own name at 222 St. James St., in a store with 15 feet frontage and 50 feet depth. The staff consisted of the proprietor, an assistant, a watchmaker and a messenger boy.

Two fundamental principles were adopted at the very outset—prompt cash payment for all purchases and one price for all. The enterprise continued to grow, necessitating a move to larger premises. In 1893 the three sons, William Massey Birks, John Henry Birks and Gerald Walker Birks, were taken into partnership, and a year afterwards it was decided to move to the present site on St. Catherine St. and Phillips Sq. Simultaneously with t uptown the firm reached out for all over Canada, and now a branches has been established to t Coast, the first branch being Ottawa in 1901, the Winnipeg 1903, and the Vancouver store in later and important step by the fir absorption of the Gorham Co., C

The firm employs from 500 to in its Montreal business alone, a of the growth of its business may ered from the following figures the total number of square fe ground floor of the Montreal 750; 1885, 1,500; 1895, 4,950, an the premises were enlarged t th magnitude, with a total ground 18,000 feet.

It was in 1907 that the firm, f nency of management, was a limited company, a close c stock being held by outside parti

What Is It Going to Cos

PEOPLE like to know how m is going to cost.

It may be that a regular price is price; that often occurs, and the people are to know about it is t an ad.

If there is a sale on, or if the condition of affairs which mak mediate and decided increase in sirable, then the quickest and cheapest way to do it is to adve special prices.

I believe in putting enough in an ad to make it readable, but l cutting it as short as possible

Take enough room to describe vently and vividly, and do not the most vivid thing you can description is the price.

Also, do not forget that it n cut price.

In the ad without prices the gained is the making of an o pleasant expression of certain s features.

That is a good thing, but it is to accomplish this end and t bring a direct response to the a *Retailer.*

TWO VIEWS OF THE PALATIAL RETAIL JEWELRY ESTABLISHMENT OF HENRY BIRKS & SONS, LTD., MONTREAL, CAN

The Law and the Retailer.

By Bernhard Raymond, LL.B.,
of the New York Bar.

EDITOR'S NOTE.—The articles published under the above caption have been written expressly for THE JEWELERS' CIRCULAR-WEEKLY and with the especial needs of the retail jeweler in mind. Considerable legal matter of a generic nature has been published in various journals, but the purpose of this series of articles is to give only what is believed to be particularly valuable and helpful to the jeweler.]

(Continued from issue of March 23.)

Conduct Which Makes One Chargeable as a Partner.

WHERE a person so acts that a third person is induced to believe that a partnership exists, upon which he relies, the person will be estopped from denying liability for the act which induces the belief. (Conklin *vs.* Barton, 43 Barb. 435.)

The illustration, it seems to me, would be interesting and instructive.

The question presented in the following action was whether the defendant, one Meyer, was a partner with one Ray. The facts were as follows:

Meyer was sued for rent of premises at 1 Kalb Ave., in the borough of Brooklyn. The landlord testified that Meyer applied to him to rent the premises; that subsequently he was joined by Ray; that Meyer introduced Meyer to the landlord as his partner; that after the parties agreed upon the terms he took the names of each for the purpose of preparing the lease which was subsequently executed; that when the lease was ready for signing Meyer requested that Ray could sign for both.

Meyer denied that he said that Ray could sign for both, and that he was introduced as a partner of Ray.

It appeared, however, by the testimony that Ray and Meyer contemplated forming a partnership; articles of co-partnership were drawn, but never signed, Meyer refusing to execute them. It was also shown that Meyer and Ray sought to procure a location in which to establish the business, that the premises in question were selected, some goods being moved therein, to which Meyer assisted; that he was several times about the building and took charge of some of the property therein.

It also appeared that at the time the lease was about to be signed Meyer handed $150 to be paid on the lease, although Meyer denied it was to be paid on the lease and claimed that it was an advance to Ray as a loan.

The court held that Meyer, acting upon the assumption that a partnership would be formed, negotiated with the landlord for the lease of the premises; that whether he actually participated therein or remained silent upon the subject, it was clear beyond doubt that he conveyed to the landlord the idea that he was a party in interest.

That when an agreement was reached he directed his name to be inserted in the lease as Ray's name is found therein; that when subsequently informed by Ray that the lease was signed he (Meyer) made no objection or intimated that he was not interested; that he loaned Ray's name for the purpose of insertion in the lease and must have so understood it.

That for the above reasons Meyer was responsible with Ray, as a partner, for the rent of the premises; that Meyer was guilty of actions tending to induce a third party to believe that he was a partner of Ray and influenced credit on the faith of such relation. (Taylor *vs.* Meyer, 47 App. Div. 455; Bank *vs.* Walker, 66 N. Y. 424.)

Thus in a case where there was evidence that A, to his knowledge, had been advertised in the newspapers as a partner with another person, the court held that, having knowledge of these advertisements, it was his duty to deny the partnership if he wished to escape liability.

While the court would not say that he was under a legal obligation to publish a repudiation of the partnership in the same newspaper, or in any other, though this would be a very effective and practical mode of proclaiming such denial; still the fact that he failed to do so was a circumstance to be considered by the jury in arriving at their determination.

An able and eminent jurist expressed the rule in the following terse language: "If one is held out as a partner, and he knows it, he is chargeable as one, unless he does all that a reasonable and honest man should do, under similar circumstances, to assert and manifest his denial, and thereby prevent innocent parties from being misled."

Must Show Good Faith.

One who seeks to enforce the liability must show that he exercised good faith and due diligence to know the truth; and if such circumstances are brought to his notice as would be certain to excite inquiry in the mind of any prudent man, and the means of ascertaining the truth were readily accessible, but not used, he could not enforce the liability.

Not a Partner of Alleged Copartners.

A person may thus become liable to third persons as though he were a partner by "holding out," but he is not thereby made a partner as to persons other than those relying upon the appearance and actions for which he is thus held responsible, nor does he acquire the rights or obligations of a partner as between himself and his alleged partners. Whether he is to be held liable alone or in connection with his reputed partner must depend upon the acts of both.

If the person with whom he was held out as a partner was ignorant of it and did not concur in it he cannot be held liable.

If, on the other hand, he concurred or co-operated with him in the "holding out" both may be held liable.

Effect of Declaration After Obligation Had Been Contracted.

A person cannot be charged as a partner merely because of his acts and declarations subsequent to the contracting of the debt for which it is sought to fasten liability upon him. (Rives *vs.* Michaels, 37 N. Y. Supp. 644.)

When a business was carried on by both husband and wife, the fact that both purchased and sold goods, collected and paid debts of the business, coupled with the relationship of the parties, tended to warrant a suspicion that they were partners; but, in the absence of additional facts to prove a partnership, it was held that the mere relationship of husband and wife could, at best, establish a partnership only beyond a mere suspicion and would be insufficient. (Schultz *vs.* Berger, 64 N. Y. Supp. 686.)

Articles of Copartnership

As already stated, written articles of copartnership, while not indispensable and not required by law to be in writing, are highly recommended. Though I fully realize that it is not always feasible, even by the most carefully drawn partnership agreement, to provide beforehand for every possible contingency that might present itself in the distant or even the immediate future, or definitely to set forth all the rights, powers, duties and liabilities of the partners, still it must be conceded that a writing is in all likelihood calculated to be less subject to doubt, dispute and misunderstanding by the parties.

Much, however, must be understood; custom or usage in a given locality must be recognized, and conduct or practice may add to or modify what is expressed.

As in the case where it was uncertain from the terms of a partnership agreement whether personal taxes of one of the partners should be charged to the firm's expense account, the actual construction adopted by the partners through a number of years will be considered as giving a proper construction to the agreement. (Snyder *vs. Scaman*, 37 N. Y. Supp. 696.)

It is, however, a general rule for the construction of partnership agreements that when the language is ambiguous and parties whose interests are diverse have from the beginning adopted and acted upon a particular construction, such construction be followed by the court.

If certain of the provisions of the agreement are capable of two constructions, the one which would prove beneficial to the interests of the partnership would be given effect in preference to that which would retard or defeat the purpose of the partnership.

Thus it is readily seen that, while a written agreement is by no means an infallible means of setting forth what the parties conceive to be their agreement, and, in fact, at times expresses anything but the agreement of the parties, it cannot be denied that a writing is, after all, the only safeguard to be relied upon to protect the rights of both honest and unsuspecting partners.

What is reduced to black and white will endure; what is trusted to one's word and memory will soon be conveniently forgotten except that part which will pay to remember, and just such part is not often in dispute.

I shall in a later issue give a form of a partnership agreement which is calculated to be adapted to a multiplicity of partnership undertakings.

(To be continued.)

A new store will shortly be opened on Summerville Ave., Asbury Park, N. J., by Morris L. Weinstein & Co., now located at 625 Cookman Ave., at that place.

Trademarks and Their Meaning.

From *Advertising and Selling Magazine.*

TRADEMARKS are to-day classed among the necessary adjuncts of successful advertising. Although originally adopted by wholesalers and manufacturers in order to identify their goods in business, retailers have of late years begun to use marks of this character rather extensively.

A trademark has been defined as a mark by which one's trade or wares are known in business. This definition might be improved by enlarging it as follows: A mark by which one's trade or wares are known in business and which is used to differentiate and distinguish some particular brand or article from all other brands or articles in the same line.

A trademark has also been very accurately defined as one's commercial signature to his goods. It may consist of a name, symbol, figure, letter, form or device, if adopted and used by a manufacturer or merchant in order to designate the goods he manufactures or sells so that the goods may be known as his, and to enable him to secure such profits as result from his reputation for skill, industry and fidelity.

The ordinary trademark has no necessary relation to invention or discovery. The trademark recognized by the common law is generally the growth of a considerable period of use, rather than a sudden invention. It is often the result of accident, rather than design. (Trademark cases 1879, 100 U. S. 82.)

The vast number of trademarks which have been adopted by business concerns has necessarily demanded the enactment of laws whose purpose is to regulate their use. The common law itself, of course, gives one an exclusive right to any legitimate trademark, although statutory provisions must be followed in order to secure the proper registration of such mark.

According to the law, there are certain names which cannot be used as trademarks. For example, a person cannot obtain the exclusive use of a trademark to give him practically a monopoly in the sale of any articles other than those produced or made by himself. This is a prudent measure and is a matter of public policy, because without this provision competition would be entirely destroyed.

The principle upon which all the cases on the subject of trademark unite is, that one man will not be permitted, by imitating the distinctive name or mark already in use by another person, to designate the articles of the latter's manufactures, to impose articles of his own manufacture upon the public as the articles of the latter.

The cases so holding rest upon the considerations already stated.

First: It would be a fraud upon the rights of the first user thus to permit his trademark to be imitated.

Second: It would be a fraud on the public.

The zealous enforcement of the law of trademark is not only dependent on the vigilant protection of individual rights, but also upon the broad principle that the public is entitled to protection from the unscrupulous use and simulation of previously appropriated names and symbols, in such manner as may deceive them by inducing or leading to the purchase of one thing for another. (Electro-Silicon Co. vs. Hazard, 29 Hun. 374.)

The mere declaration of a manufacturer that he has adopted a certain word as his trademark is of no avail and will not create a property right in the word.

It is the actual use of the trademark affixed to the merchandise of the manufacturer, and this alone, which can impart to it the element of property, and secure legal protection from imitation and simulation.

No title arises until the thing is actually in the market—marked with the particular mark. (Hazelton Boiler Co. vs. Hazelton Tripod Boiler Co., 142 Ill. 494.)

In the case of Delaware & Hudson Canal Co. vs. Clark, it was held by Justice Stracy that, "Though it is not necessary that the word adopted as a trademark should be a new creation never before known or used, there are some limits to the right of selection."

This will be manifest when it is considered that when rights to the exclusive use of a trademark are invaded, it is invariably held that essence of the wrong consists in the sale of the goods of one manufacturer or vendor as those of another, and it is only when the false representation is directly or indirectly made that the party who appeals to a Court of Equity can have relief. (Brown Chemical Co. vs. Meyer, 139 U. S. 540.)

Names which are generic and names simply descriptive of an article, or of its ingredients, or of its qualities, etc., cannot be used as trademarks, neither can a geographical name.

The question came up some time ago, in the courts, as to whether a Latin phrase, which was descriptive of the goods, could be used as a trademark. It was decided that it made no difference whether the phrase is in Latin or English. As long as that phrase is descriptive of the goods it is not entitled to protection by trademark.

In the case of Shaver vs. Shaver, 1 Io 208, referring to the time of acquis in the right to use a trademark, it was that the right to protection is compl as soon as the mark is adopted and a trademark in connection with articles.

In regard to the life of a trader may continue through the ages, i iously selected and properly registere period of registration, however. for 20 years, at the expiration of wh it may be renewed. It is evide t t enhances the value of a good tra providing the latter has been ju and extensively advertised and n t. fool's gem, hidden in a trunk w r but the owner knows of its existe

Words in common use may be priated as a trademark if they are originally, or by usage have c me dicate primarily, the origin or ow of a commercial article to which t applied, and if they are not geograp the sense of being the names of l of production, or not the generic n the article, or merely descriptive c of its qualities, ingredients, or c istics.

A well-known and long-established is that a trademark must not be de Common words when employed a marks must not give false impres to quality, ingredients, or character the article.

In numerous instances, clai tradeмarks, consisting of words mon use, when met with the object the words were descriptive, have at to show that the articles did not the ingredients, or possess the qual tributed to them by the w rds em and have had their marks held in the courts on the ground that th deceptive.

It is frequently the case that analysis and ingenuity, you can many trademarks a designation quality connected with the goods.

In the case of O'Rourke vs. Co Soap Co., 26 Fed. 576, Judge Brow

"There is, however, a class which, though not descriptive of the are suggestive of some supposed a to be derived from its use, or som produced by its use. These have l dinarily upheld as valid trademark

The ...s it stands means "it may help." ...s," which signifies "time," has been ...iately used on imported watches. ...e" has also been fittingly applied to ...d watches and is the Latin for "I ..." The word-coiner probably had in ...reliability" as applied to timepieces. ...tch cases, the word "Pan-America" ...ently seen, the prefix "pan" being ...ek for "all," making the combined ...ean "all America."

...f the old Romans seeing the name ..." on clocks would be much amused ... in his language it means "a hen." ... dealer in materials, tools and sup... es on saws the word "Finis," which, ...ly everybody knows, means "end." ...s," also used in this trade, is the ...or "merit."

... into the field of music boxes, we ... word "Melo-ton" which has been ... pianos and musical instruments. ... a well-coined word and means ...e tone." "Aqua Crystal" which was ... an optical concern, now out of ... means "water crystal." A London ... uses on certain optical stock the word "Optimus" which is Latin for "the best."

In the general field of advertising the word-coiner is allowed more scope for his genius. Some coined words which have become world famous, entirely by means of judicious advertising, are the following: "Cuticura," Latin, from "cutis," skin, and "cura," cure. "Sozodont," "sozo," to preserve, and "don," tooth. "Bromangelon," a food product, from two Greek words, "broma," meaning "food," and "angelon," "angelic." "Luxfer," the name of a device used to transmit light into insufficiently lighted quarters, comes from the Latin word "lux," for "light," and "fer," "to bring."

These are all examples of trade names which are attractive and euphonious. Words coined from the English are all right if they can be coined without being ridiculous and meaningless, as they frequently are. For the effective coinage of euphonious, significant words, however, the English language alone affords but meager opportunity. Compare, for instance, the awkwardness and vulgar-sounding "Anti-fat," "No-Smellee," and hundreds of others, with the dignity and mellow tone of words coined from the languages of Horace and Demosthenes.

Newly coined words constitute the strongest trademarks. The reason for this is very obvious, such words being usually non-descriptive, and therefore not deceptive.

All questions as to the arbitrary character of the mark is therefore removed, and to entitle the originator thereof to hold such word as a valid trademark it is only necessary to show that it has been affixed or applied to a commercial article or vendible commodity for the purpose of indicating the origin or ownership thereof. It is no objection to a newly coined word as a trademark, that it is suggestive of the quality of the article or the purposes for which it is employed, or the mode of use thereof. (Leonard vs. Golden Lubricator Co. 38 Fed. 922. American Jewelry Co. vs. Sloan 68 Fed. 1539.)

Epigrams by James J. Hill.

THE man with the big opportunity today is the man in the ranks.

There are others in this world besides ourselves, and some of them are active.

Success never comes to the man who spends most of his time watching the clock.

The man who climbs up is the one who is not content with doing only just what is absolutely necessary, but who does more.

A man must make up his mind, if he is going to succeed, that when he takes the other man's dollar he must give back to him an honest return.

Credit is the atmosphere which inflates the lungs of business and when it is greatly lessened business must be reduced in proportion or be quietly smothered.

My rule for success is untiring application, loyalty to one's employer, which is loyalty to one's self, doing the best you can in every task that faces you; practicability, initiative and industry.

The time for a man to retire from active business depends on conditions. Some men are young at 70; others are old at 50. The method of living, the occupation, habits, success or failures, all have their influences.

Original Method of Advertising the Repairing Department.

CHARLESTON, S. C., March 23, 1910.

Editor, THE JEWELERS' CIRCULAR-WEEKLY:

We noted an article in a recent issue of your esteemed journal concerning the interest created by a Texas jeweler who had announced the 10,000th repaired watch that had gone through his hands in the past 14 years.

The enclosed "ad" which we have been running in our local paper will give you an idea of what we have done here since we first commenced to keep an accurate record of watches repaired.

This work has been running for about 45 years. It is interesting to look over the old records and see how few American watches there were then compared to the present day. Now one scarcely sees a key-winder.

JAMES ALLAN & Co.

Over 50,000 Watches

HAVE GONE THROUGH OUR

REPAIR DEPARTMENT

Since we have kept a careful record of the work done, and we are glad that the present year shows an improvement. It must be because our work is satisfactory.

Let us estimate on your Repairs or a New Watch. Our Work is guaranteed.

A RECORD WORTH ADVERTISING.

Time Element in Advertising.

(By E. C. PATTERSON, Advertising Manager *Collier's Weekly.*)

KEEPING everlastingly at it, year in and year out, brings more than success—it makes a business as permanent as steel beams. The true art of advertising is to secure this priceless increment of time; to establish by long and favorable association that thing that people call "Reputation."

And because this reputation depends absolutely upon a certain unvarying standard of quality it is a positive fact that we get better values for our money in articles which are steadily advertised than in those which are not.

Advertising creates standards. Continued advertising guarantees that they will be lived up to.

The man who has a small advertising appropriation will do well to invest it in such a way as to keep his proposition steadily before the public even in small space and few mediums, rather than to buy larger space in more mediums spasmodically.

THE CONNOISSEUR'S HANDBOOK.

Definitions of Some Technical Terms in Gold and Silver Smithing and Ceramics Alphabetically Arranged for Easy Reference.

By Clement W. Coumbe.

(*Continued from issue of March 16.*)

PORT WARE. John Rose, after his iceship to Thomas Turner, started, 1, a pottery at Jackfield, in Shrop- Later he transferred the plant to t. In 1799 he purchased the Caugh- rks from Turner, and is said to have he pieces he produced there to Coal- the biscuit condition for decoration 4, when the Caughley operations discontinued. Rose purchased the w factory in 1822 and worked under m name of John Rose & Co. with and Billingsley, from the Nantgarw to aid with their talented work. ant, first called Colebrook Dale, be- ater known as Coalport, its present

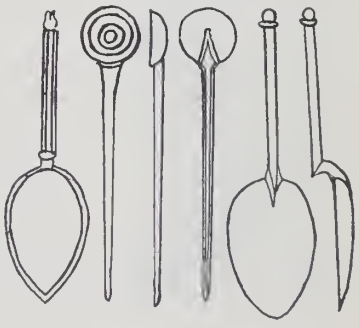
n Rose started to use feldspar in his in paste he received the Society of old medal, and note of this fact is ted in the marks of some pieces the prints read: "Patronized by the of Arts. The gold medal awarded, 30, 1820," and "Coalport Improved r Porcelain." He also received a for introducing a leadless glaze. At he signature J. Rose & Co., with rd "Improved" is found, also I. R. & Co., with "Improved." "Willow " and "blue dragon" were favorite tives styles; Billingsley's "French so extensively used by him at the n factory was largely continued Imitation Chelsea, Sèvres and Dres- are was produced at this time so d as to be fictitiously marked with the of those factories. This fact creates of authenticity even to expert con- irs. Among marks are also "Coal- t "C. Dale," "C. C. D.," "C. B. D." and "John Rose & Co., Colebrook Dale" on later products.

B using the Caughley paste *Coalport* r was much improved in body, having urity and whiteness, and a remark- y ne texture. *Coalport*, up to 1850, d a great reputation for its wonder- rilliant colors, blue (cobalt), rose naroon and apple green.

ALT. The metal *cobalt* "is employed arts, in the form of smalt, for com- ting a blue color to glass, earthen nd porcelain. Smalt, or powder blue, is made by melting three parts of fine white sand, or of calcined flints, with two of purified pearl ash and one of *cobalt* ore previously calcined, and ladling it out of the pots into a vessel of cold water, after which the dark blue glass, or *zaffer*, is ground, washed and distributed into different shades of color, which shades are occasioned by the different qualities of the ore and the coarser or finer grinding of the powder."—Encycl. Amer.

"COBLENCE POTTERY." Fictile wares of this name date from the XVI. to the XVIII. centuries. They came from Lauenstein, Vallendar (Germany), etc., and consisted of "an ash-gray clay, often running into bluish tones, painted in blue, brown or violet (the two last colors produced from manganese that came from the firing in different tones according to the degree of heat). Among the works having artistic value are round or flat jugs intended only for *credenz* (display pieces), mostly having narrow necks and frequently a mask on the lip, the belly painted in rosettes or stars. Next come the Ring, or Würstkrüge (sausage jugs), jugs having a frieze around the belly with human figures in niches or with medallions, etc. More rarely are found writing utensils, salt cellars, architectonic details, as gable finials, etc. The ornamentation often shows different methods of work alongside one another. Engraved outline, stamping in relief, with patterns of wood, clay, stone or metal. On work of the XVIII. century is found the mark B. K. L., also the name Joh. Männecken in Höhr."—Bucher.

COCKADE. "A badge worn on the hats of the servants of those holding a royal commission."—Milbourne.



COCKATRICE. "In Christian art the emblem of sin; attribute of St. Vitus."—Mollett. It differs from what is called a *wivern*, from being combed, wattled and spurred like a cock. In the engraving it has *wings endorsed*. This fictitious creature was said to be born of a cock's egg hatched by a serpent. There are numerous references to it in the Bible. The *cockatrice* is much depicted in art, heraldry, etc. It is usually drawn exactly as the basilisk (to which refer) except that it has no head at the termination of its tail, which is barbed.

COCKATRICE.

Compare with dragon, griffin, wyvern, etc.

COCLEAR (Lat.). "A kind of spoon, the bowl of which was usually round, while the handle was narrow and pointed. (The *ligula*, on the contrary, more nearly represented our spoons.) The pointed end was used for drawing snails (*coclcae*) out of their shells and eating them, whence it derived its name, and the broader part for eating eggs, etc. * * * In the accompanying illustration we give *coclearia* found at Pompeii. *Coclear* was also the name given to a small measure like our spoonful."—Smith.

COCLEARIA (BORBONICO MUSEUM.)

COCK SPUR. "A small fire-clay prop used to support the pieces (pottery and porcelain) and keep them apart in the glazing process (see *gloss oven*)".—Janvier.

COCURA. "Medieval Latin word for a quiver."—Mollett.

COCQUEL (her.). (See *escallop.*)

CODON (Gr. *kodon*). "A bell; the bell of a trumpet; a trumpet with a bell mouth."—Mollett.

COEFFET, Nicolas. A painter-ceramist at Rouen in the XVIII. century.

coins are the symbol of the Chinese riches. This symbol is very frequently found on Chinese porcelain. The two coins are to be seen often hanging over the shop doors of the Chinese.

COIN PATTERN. Often found in Chinese

CHINESE "COIN" PATTERN.

blue and white porcelain decoration.

COINTISE, *contoise, lambrequin* or *mantle.* "The ornamental drapery about the armorial composition. It was originally used to protect the helmet from the weather. The *cointise* is usually shown in curving folds, a conventional method of depicting the honorable tears it has received in warfare."—Milbourne. (See *mantle.*)

COKE, John. "About the year 1795 a small china manufactory was set up at Pinxton (Derbyshire) under John Coke, with the assistance of Billingsley, then employed in the Derby china works as a flower painter, and who was a practical potter."—Marryatt. Coke improved the formerly indifferent glaze. He was the first to use coal in the kiln. In spite of his success in this business, he gave up the factory and went into the coal trade.

COLEBROOK DALE. Same as *Coalport Works* (to which refer).

COLIAS, Mount. This location in ancient Greece was noted for containing the finest pottery clay.

COLIVANO. Goldsmith (1685).

COLLARED (her.). "Animals borne in coat armor with collars round the neck are termed *collared,* and also *gorged.* The form of the collar must be particularly mentioned, whether in imitation of a *ducal, Eastern, mural* or *naval* coronet, etc."—Robson. Sometimes called *accolé* or *accollé.*

COLLE, Raffaele dal. A majolica ware designer and painter.

COLLEGE OF ARMS. (See *heralds' college.*)

COLOGNE WARE. *"Gres cerame* (Fr.). Common stoneware, chiefly bottles."—Marryatt. "The archives of the town of Cologne do not contain any mention of the potting trade having ever flourished in that city. * * * This silence of the public records had hitherto been accepted as a sufficient voucher that no stoneware—nor, indeed, any other sort of pottery—had ever been manufactured in Cologne. In 1891 an excavation disclosed the remains of a potter's oven. Round about the ruins was heaped an accumulation of fragments and castaway pieces, the refuse of a not inconsiderable factory. * * * In consequence of the discovery we are obliged to acknowledge that the capital of the Low Countries had also its pot works, where stone ware of artistic value was, for a time at least, successfully manufactured. It is true that up to now the name had been most inappropriately applied to the white ware really made at Siegburg, and that it must in future be employed in reference to some brown specimens of which the last finds have supplied us with a few well-defined types. * * * Not only potmakers were at work in the very center of the town, but it was real and good stone ware they were making, of a quality that could fairly compare with anything of the kind made elsewhere at a corresponding period. * * * All authentic specimens of Cologne ware which have so far come to hand bear, without an exception, an evident likeness to what was made at Raeren in the early times."—Solon. It is the opinion of M. Solon that the Cologne potters (after being expelled from Cologne—their firings endangering the city) migrated to Freehen, judging from the types of ware of both places.

COLOMB. In heraldry the dove is usually termed *colomb.*

(To be continued.)

A Great Discovery of Gold Ornaments from Ancient Egypt.

THE well-known archaeologist and Orientalist, Prof. Flinders Petrie, announces in the journal *Man* a fresh discovery from the period of the 17th dynasty of the ancient Egyptian monarchy, which is absolutely unique. It is that of a treasure of gold filigree work, found in a tomb near Thebes, a district known to be the richest in relics of ancient Egypt. It is reported that this treasure has been transferred to the Scotch museum in Edinburgh.

The corpse found in the tomb was lying in a single coffin, decorated with golden and blue wings. Around the neck was a magnificent gold ornament, and each arm was encircled by a gold bracelet. The girdle, worked after a Nubian pattern, is made of leather, amber and dried plant seeds.

The gold work is the most valuable find of this description hitherto unearthed. The network shows the extraordinarily high degree of perfection which the ancient Egyptians attained at in this branch of art. Prof. Petrie has also unearthed the great palace of King Apries (about 580 A. C.) in Memphis. Here, too, some valuable art treasures were discovered.

Increase in British Art Exports from London to the United States.

OUR Vice-Consul-General at London, Richard Westacott, reports that since the passage of the new American tariff act providing for the free entry of works of art over 20 years of age, and antiques over 100 years old, according as the articles are provided for in the act, the value of the London exports of these lines to the United States has materially increased. His statistics follow:

The figures from the records in this consulate-general during the three months ending Oct. 31, 1908, compared with the figures for the similar period of the year 1909 show the following result: August, September and October, 1908, works of art and antiques, etc., $375,766; August, September and October, 1909, $5,697,583.

C. W. Morgan has bought the business of Geo. M. Swift, Thompsonville, Mich.

WORKSHOP NOTES AND QUERIES

[Queries are also solicited from our readers to the questions published on this page.] Attention given in part to communications unless accompanied by full name and address of the writer.

QUESTION No. 2447.—**New Method of Producing Satin Finish.**—*I understand there is a new way of producing the satin finish from the acid method which has been used for so long. Can you tell me what this new method is?* W. J.

ANSWER.—According to the *Metal Industry* there is a new way of doing this which is more satisfactory in producing uniform results, which is cleaner, and does not require expert knowledge and which is cheaper. This method is sand blasting. The sand blast produces a satin finish which is uniform at all times. The operator cannot spoil a piece of work, however much he may try; therefore a boy does just as efficient work as the most expert workman. For sand blasting the operation may be performed by a number of different methods. There are a number of these machines now on the market, but they have one fatal defect and that is that when the machine is stopped and the sand settles to the bottom the pipes become clogged, and only by great effort and by disconnecting the piping that operation may be continued. The sand blast machine manufactured by Leiman Bros., Brill St. and Bonyton Ave., Newark, N. J., is a new departure in machines of this character. Especial attention has been given to the system of piping employed. About a pail of ordinary sea sand or other abrasive material is poured into the machine and drops to the bottom. Then the blast of air is turned on and begins to flow down on to the sand, driving it into a whirlwind. When the sand has been stirred up another pipe begins to suck this loosened sand, drawing it up through the nozzle, where the main volume of air strikes it, projecting it upon the work with great force. After the sand strikes the work it drops again to the bottom of the machine, when it is ready to to be drawn up through the same pipes over and over again. Here we have the continuous automatic sand feed by which the same sand is used repeatedly. By blowing down on to the sand and stirring it up it can be readily seen that this machine cannot clog up or get out of order. Another very important feature: Formerly when small pieces of work dropped into the machine it was necessary to disconnect the piping in order to get them again, thereby losing a great amount of time. With this improved sand blast machine a screen is placed across the bottom to catch anything that may be dropped. The glass at the top and sides of the machine admits light so that the progress of the work may be easily followed and the cloth cuffs on the front with the elastic bands are placed there to prevent any of the sand from coming out of the machine while in operation. One lever starts and regulates the flow of sand. In order to operate these machines a supply of air at a pressure of three or four pounds is required, and this may be furnished by pressure blowers, which are manufactured by the same firm. These blowers are also used with all classes of gas appliances, and full particulars regarding them, also the sand blast machines, may be obtained by writing direct to the above-named concern.

QUESTION No. 2448.—**Jewelers' Rouge.**—*How can I produce a rouge suitable for polishing very fine jewelry? I want something free from grit.* J. R.

ANSWER:—One of the best rouges for fine polishing may be made by decomposing sulphate of iron solution with oxalic acid solution. This will cause a precipitate of iron to fall, which must be well washed and dried. Heat it gently until the salt takes fire, which leaves an impalpable powder, oxide of iron, or rouge.

QUESTION No. 2449.—**Polishing Tortoise Shell.**—*How must I proceed to polish a tortoise shell?* P. T.

ANSWER:—Prepare for polishing by scraping perfectly smooth and level and rub it smooth with fine sandpaper. Follow up with a bit of felt dipped in very finely powdered charcoal with water, and lastly with rottenstone or putty powder. Finally finish with a soft piece of chamois leather dipped in sweet oil.

QUESTION No. 2450.—**Effect of X-Rays on Diamonds.**—*Does the exposure of a diamond to the action of X-rays affect its color?* E. O.

ANSWER:—According to the *Scientific American*, M. Paul Sacredote used diamonds from different sources, some of them colorless and others having a slight yellowish tint, and he examined them in turn by the action of the X-rays, with the stone placed outside the tube, also by the cathode rays with the diamond inside the tube, and lastly by the action of heat. The diamond is placed inside a muffle of refractory earth with electric heating, while a thermometer shows the temperature up to 300° C. He finds first that the action of X-rays does not change the color to any noticeable extent. Second, the cathode rays modify the color of the diamond considerably, and the initial hue, white or very light yellow, becomes darker by degrees and takes a light brown tint; and this becomes dark brown by prolonging the action. The diamond thus colored appears to keep its hue, since the sample he showed to the Academie des Sciences was prepared about a year ago. It was kept in a box, but at times exposed to the light, and on one occasion it was left for an entire day in sunlight. As to the action of heat, from 300° to 400°, we find that heat has a decolorizing action, so that we can bring back a colored diamond to its initial hue in this way.

Fire Cracking of Gold During Annealing.

(From the *Brass World.*)

MANUFACTURING jewelers frequently have trouble with their gold during annealing on account of fire cracks. It is more apt to happen in tubing and rods than in sheet and was far more prevalent in the past than at the present time. Many manufacturers have found that the use of a small quantity of zinc in the gold alloy is beneficial in preventing fire-cracks.

Gold tubing is usually made by drawing a round blank of sheet into a cup then swaging down to a tube-shell, and finally drawing down over a mandrel on draw-benches. The fire-cracking generally occurs after the tube has been partially made.

The cause of fire-cracking is the brittleness of the gold at the annealing temperature, and this brittleness is usually caused by the presence of oxide of copper in it. The customary alloy for gold to reduce it to the karat condition is copper and silver. The silver does not cause any trouble, but as the copper oxidizes while melting and as there is nothing to remove it, it remains in the gold and causes the brittleness. By the use of a small quantity of zinc in the alloy, the oxide of copper is reduced and a tougher metal produced. It is advisable, however, on account of the small quantity used, to add it in the form of an alloy of copper and zinc. This copper and zinc alloy is made up as follows:

Lake copper	8½ ozs.
Bertha zinc	1½ ozs.

It is customary to pour the mixture, when melted, into water to shot it as it then forms small pieces suitable for use. It is sold on the market in this condition.

The mixture of copper and zinc thus made is used instead of copper in making up the karat gold. To use in making up the gold melt the following formulas may be taken:

For 18 Karat Gold.

Gold	18 parts
Silver	3 parts
Alloy	3 parts

For 14 Karat Gold.

Gold	14 parts
Silver	4 parts
Alloy	6 parts

The quantities of silver and alloy given, however, may be varied to suit instances where the color is desired red or yellow. The more silver used, the yellower the alloy. The increase in the quantity of the alloy results in a redder shade. The alloy, however, is always used in place of the copper and it is easy to make any particular gold mixture by thus employing it.

Robert R. Benton, Seneca, O., is about to discontinue business, and has taken a position in La Salle.

C. P. Manning, Rockville Centre, N. Y., announces that he will move, April 1, to the Pearsall building, 199 Merrick Road.

The First Watchmaker

WHO BOUGHT

Fulcrum Watch and Clock Oil

was Geo. W. Chritzman, of Gettysburg, Pa. Hearing of it from a traveling man he ordered a bottle each of Watch and Clock Oil from the factory before it was ever shown to a jobber.

READ WHAT HE SAYS

in an unsolicited letter:

Gettysburg, Pa., March 2, 1910.

Fulcrum Oil Co.,

Gentlemen:—You may be interested to know that I have been using your Watch and Clock Oil for nearly two years now, and in my thirty years' experience at the bench, it is the first time I have been free from oil troubles. I have tried all kinds of Watch and Clock Oils and I must say that yours is the only one that has ever been entirely satisfactory. It would seem the same as going back to a key-winding watch to use any oil but yours now.

Yours respectfully,
(Signed) GEO. W. CHRITZMAN.

Don't you think that an oil that is spoken of, as in the above letter, is worth a trial?

35c. a bottle—For Sale By All Jobbers—$3.75 per dozen

VEBSTER-WHITCOMB NEW MODEL LATHE

PAT. APPLIED FOR.

THE VITAL POINT

in a Watchmaker's Lathe is the SPINDLE AND ITS BUSHINGS. In this lathe the bearing surfaces of the spindle and its bushings TOUCH THROUGHOUT THEIR ENTIRE AREA, insuring continued TRUTH, easy running and greatest *durability*. This quality in our lathes is maintained by workmen of long experience in the operation of special machines devised for this particular work.

Many lathes may be found in the market in which the front end of headstock spindle bears only on the 45° angle. They may look well on superficial inspection, but they will run hard if the spindle is closely adjusted, and are quite unreliable for perfect work.

In buying a new lathe be SURE the spindle and bushings are PERFECTLY FITTED. Without this a lathe is dear at any price.

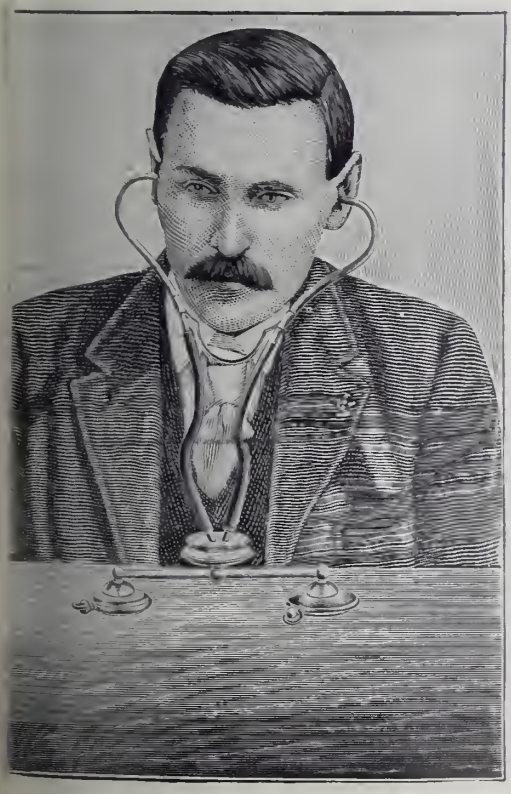
Our lathes are finely finished. The curves are true and the surfaces smooth. All sharp corners are carefully and uniformly rounded; this makes a great difference in the durability of the nickel plate. HEAVILY NICKELED.

In comparing lathes, the size and variety of CHUCKS, as well as the scope and general character of the ATTACHMENTS should be considered.

BVARE
O
ITATIONS

In comparing prices with other lathes, learn the difference in size, quality and details of construction.

L e, including Taper and Screw Chuck, 6 Cement Chucks and Belting $31.00
L e, as above, and 6 Wire and 2 Wheel Chucks (10 Chucks).... 39.00
L e, as above, and 10 Wire Chucks (12 Chucks)..... 41.00
A tional Wire and Wheel Chucks, each..... 1.00



A chuck may look nice and shiny, yet be practically worthless. Examine critically the thread on our chucks in comparison with others. We do not use dies for threading our chucks. THEY ARE CUT IN A LATHE. The cone and body of OUR chucks are GROUND to correct form and size; the surfaces are STRAIGHT and TRUE; compare them under your eyeglass with the shiny ones. The thread and outer surfaces of our chuck, as well as its form and proportions, are important elements in its continued truth and durability. The holes in our chucks are GROUND to size and truth. We caution you against imitations. The GENUINE are stamped "WHITCOMB."

OWEN'S TIMING INSTRUMENT

Regulate the Watch While the Customer Waits

So Simple a Child Can Operate It

A New Instrument

After a watch is repaired you can bring it to perfect time in from one to five minutes.

With this instrument you can also detect any trouble which may have been overlooked in repairing, such as rough pivots, cracked jewels, jewel holes too large or rough, rough or pitted endstones, excessive end shake of balance staff, improper roller action on the fork, defective pallet locking or unlocking, etc., etc.

After a few trials the watchmaker will find this instrument a great time saver in quickly detecting any irregularity in the action of the escapement, the sound of all contacts and motions being intensified to such a degree as to enable the repairer to locate all irregularities almost instantly.

No watchmaker can afford to be without one.

It will repay its cost in a few days.

The instrument is put up in a neat wooden box.

Full directions go with each instrument.

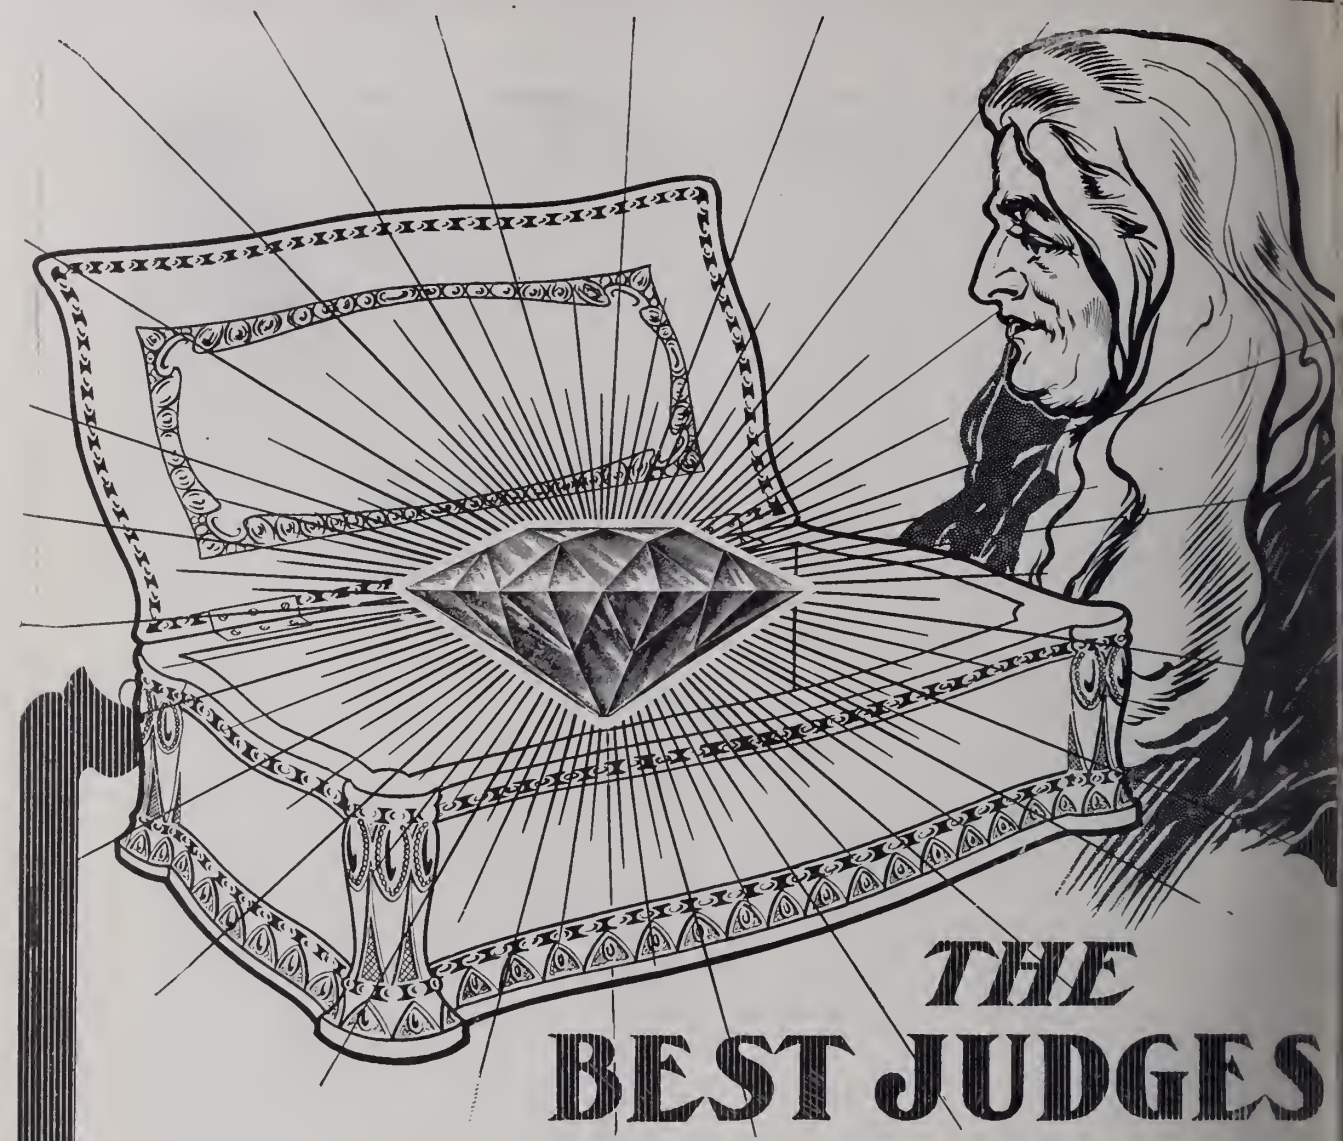
Fahys Permanent Cases



¶ They have the finish and appearance of a fine Solid Gold Case. ¶ They have Solid Gold Joints and Solid Gold Bows.

¶ *They contain and will assay more gold value than any other filled case on the market at the same price.*

¶ They have obtained their popularity entirely on their own merits for STERLING WORTH and INTRINSIC VALUE.

JOSEPH FAHYS & CO.

New York Boston Chicago San Francisco

THE BEST JUDGES

are the most critical as to the cutting, when considering the worth of a diamond—it's the cutting that makes the diamond brilliant—it's because of its brilliancy that the diamond is so highly prized.

The diamonds we offer are cut in our own cutting works, and no effort spared to see that they are cut right. The price we ask for them—the actual cost of the rough stone, plus the workmen's wages, with our modest profit added.

FACTORY: 251 N. J. R. R. Ave., Newark, N. J.

64 NASSAU STREET, NEW YORK

TO THE TRADE:

"A principle which we have always fought for has been to keep the market open for all watch cases, no matter of what manufacture, believing it to be for the best interests of the trade to allow them to buy the watch cases which they consider the best on the market and by so doing stimulate all manufacturers to their best efforts, with a view of establishing a high standard of excellence. The Dueber Watch Case Mfg. Co. in all its many years of existence has never sought to dictate to any jobber what watch cases he should use. It has never used, directly or indirectly, any method of coercion or force to either restrict the product of any watch case manufacturer, or to force the production of its cases upon any wholesale or retail jeweler to the detriment of any other manufacturer of watch cases. It employs the 'open door' policy in selling merchandise and believes that the trade should be open to all manufacturers and jewelers alike and to that end will bring all its energy to bear for the good of the entire trade."

RESENT SLEDGE HAMMER METHODS

BLACKSMITHS should have a monopoly of the Sledge Hammer; it is out of place in the jewelry trade.

The hammer is a good instrument for driving a spike, but a poor one for driving a Man. In fact men—real MEN—refuse to be driven at all. They *resent coercion.*

This Company approaches the trade in a totally different attitude. In selling

Wadsworth Watch Cases

the appeal is made simply to the Good Judgment, the Natural Requirements and the Best Interests of dealers. In a word, the keynote is MERIT. And it is the trade's appreciation of this that spells Success!

Such being the case, the business enjoys a HEALTHY growth, an HONORABLE growth and a STEADY growth—without the Sledge Hammer.

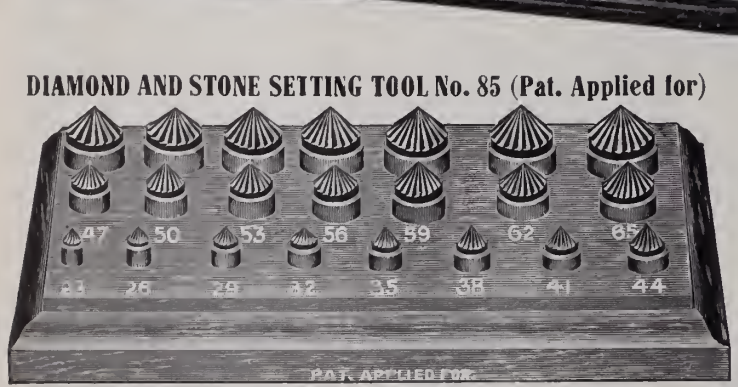
ECHARCO IMPROVED WATCH GLASS CABINET, No. 5

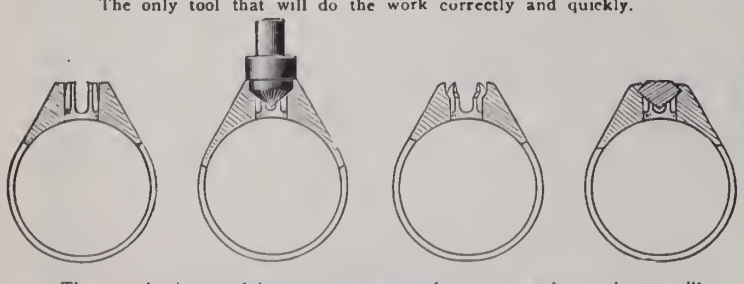
The NEW FEATURES of this Cabinet are the SKEL O DRAWERS, making an accumulation of dust and chips imp b and the very easily read LABELS of white celluloid on the w fronts. The Cabinet has nine drawers, giving 1,632 spaces. t 29½" high, 24" wide and 13" deep. The construction of d e arrangement of partitions to economize space and weight, a novel method of showing contents on the drawer pulls are al and practical ideas and very well carried out. The Cabinet i of oak and finely finished, and is the lightest and strongest c the market. Spaces are provided for the small sizes of L and Genevas, and for Antiques, which no other Cabinet p for, making it the most complete and convenient Cabinet ever to the trade.

Price, $16.00



PEGWOOD SHARPENER, No.

A new attachment, designed for use on a watchmaker's l which sharpens pegwood to a hair point without breaking, a the same time gives the point the proper concave shape. Th is held in the lathe by an arbor fitting into a regular wire ch a shown in the illustration, being steadied by the rest shown. h stick of pegwood is rotated by hand while the tool is revolv the lathe, producing a fine, long, flexible point. With this to watchmaker can prepare enough pegwood for a day's or a w work in a few moments, and have every piece uniformly and sharpened.



The tool is mechanically perfect, made of the best mater durable and cannot get out of order. For sharpening the cutte use of a fine Arkansas oil stone slip is necessary. Coarser abr es should not be used.

Price, each, $2.00

DIAMOND AND STONE SETTING TOOL No. 85 (Pat. Applied for)

The only tool that will do the work correctly and quickly.

These tools, invented by a stone setter of many years' experience, will do the work they are intended for with absolute perfection, whether in the hands of an experienced or inexperienced workman. In eight seconds after adjustment in lathe will cut a smooth seat for any stone from 1/16 to 2 carats.

Tools are made of polished and hardened steel and are indestructible. Will fit in chucks Nos. 30 and 44.

The greatest labor saving device ever invented in the line of stone setting cutters. Put up in neat block and box.

Price, Per Set, $5.50

Bushing with Screw in Pendant Hole.

1000 BAGS DAILY

It is estimated that there are fifty million women in the United States. Not over two millio have mesh bags. **We** must supply the other forty-eight million with machine-made mesh bag

The reason why machine-made Mesh Bags are better than hand-made Mesh Bags is

that we use **much harder wire** than used on hand-made bags, and machines harden it stil more in working, making wire **stiff and strong,** no **rough joints to catch,** and wear the dress Stronger and better than soldered mesh.

We also make the only **ABSOLUTELY SOLDERLESS FRAME EVER MADE,** othe **so-called solderless** frames have joints or some parts soldered.

We are the **sole** manufacturers of machine-made mesh with **solderless** frames.

A Beaut Patter and a Decid Succe

Prices That Mean More Profit For You.

Our new policy of selling you direct by mail eliminates the heavy expense incidental to the old method of selling through salesmen. It permits us to mark our entire line at prices based on the manufacturing cost alone. You can buy from 15% to 20% below former prices. We show here

Convincing Examples of Value.

These prices are representative of the actual difference in cost to you, between our new prices and the old listing.

No.	DESCRIPTION	Old Price	New Price
3094	Compote Sterling, good weight, 11 in. wide, 5¾ in. high	$30.00	$25.50
3011	Twinbottle, Sterling top, 5½ in. high - - -	2.75	2.25
3228	Sandwich Tray, Sterling applied border, 11 in. diam. -	20.00	16.50
53	Lemon dish deposit ware, 6 in. diam. - - - -	1.38	1.00
102	Sherbet glass deposit ware, scroll design, very popular -	$12 doz.	$10 doz.
200	Plateau deposit ware, 4 in. diam. - - - -	1.25	1.00

The Quality Is Unchanged

by these price revisions. We maintain the high excellence of Woodside Silverware. Individuality of our design and its development by skilled artisans is shown in every piece.

Our Spring Catalogue is the most valuable business book you can receive. Get your name on our mailing list. Write for it to-day and

170 Broadway NEW YORK

Large Line of New Loving and Prize Cups

A magnificent new line of Prize and Loving Cups, in Silver Plate, Copper and Bronze, which we have just placed on the market will enable the trade to take profitable advantage of the now universal "Cup" fad.

These cups are distinctive in style, original in design, rich and artistic, yet so moderate in price as to insure a fine profit.

There's prestige and publicity as well as profit for the jeweler furnishing these goods. See our line and know our prices before selecting your cup stock.

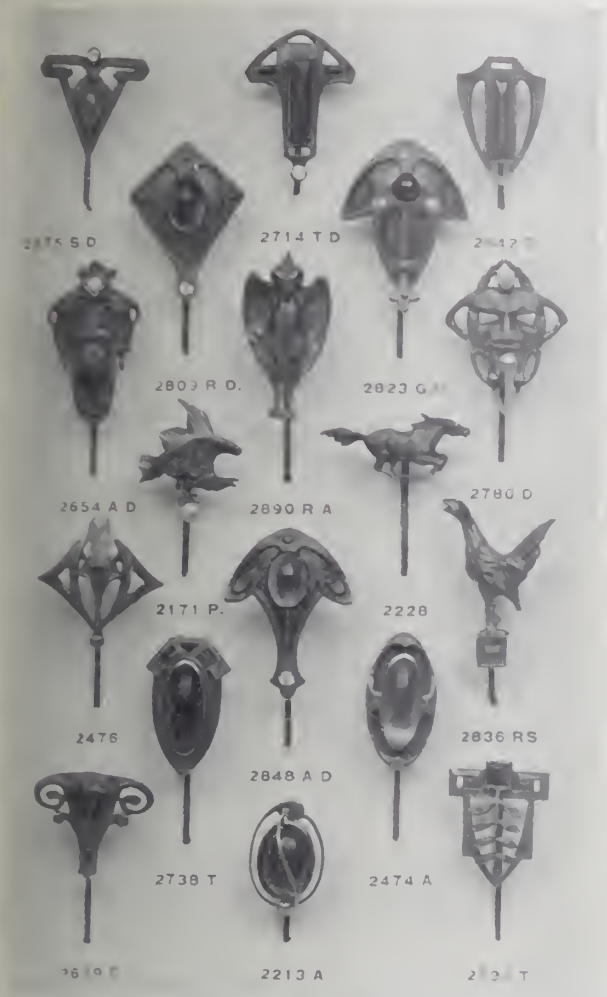
ROGERS, LUNT & BOWLEN CO., Silversmiths, Greenfield, Mass.

50%
MORE SALABLE
Because 50% More Durable

Every time you sell Simeon L. & George H. Rogers Company's XII Sectional Process Silver-Plated Flat Ware, you secure a permanent customer who will bring new trade.

Admiration makes the sale. Satisfaction makes him tell his friends and come back with repeated orders.

The selling is easy. Our designs are the finest product of the silversmith's art and skill. Our name guarantees satisfaction—it marks the best in silver-plated ware.



All our standard forks and spoons are reenforced at the parts most exposed to wear, marked XII, with a triple deposit of silver that more than doubles their service.

We know that our line is the best wearing and gives the best satisfaction of any plated ware on the market. A trial order will convince you. Write for our latest catalogue.

NEW ARTISTIC TRINKETS

FAD OF THE MOMENT

THE PULSE of Fashion can always be felt here. Artistic Trinkets, the Fad of the Moment, are here displayed in fascinating array. Daintily deceptive, they take the form of lockets, pendants, ornaments, etc., but in fact are miniature Mirrors, Puff Boxes, Vinaigrettes, Tablets and Coin Purses (for the new style of street cars). Very large demand. With Wrist Chains or Fancy Long Chains to match, mounted with Amethyst, Topaz, Sapphire, Coral, etc., French Grey the most popular finish. The whole line is as interesting as it is unique and necessary just now.

A SUGGESTION FOR SPRING WEDDING GIFT

¶ These Solid Mahogany Frames are made in various sizes to fit our Glass Plateaus, and are easily removed so that the Plateau can be used for a double purpose of Serving Tray or Centre Piece. Made in 10, 12 and 14 inch round, and 10 and 12 inch oval.

¶ Our Deposit Line comprises several hundred pieces and is one of the most complete lines on the market.

¶ This is only one of a number of new ideas which are working out and it will you to see our new line be placing your Spring orders.

¶ Our line is especially apted for Wedding Engagement Presents as as Graduation Gifts.

In addition to our Deposit Line we are making a line of Sterling Hollow Ware, such as Loving Cups, Jewel Cases, Candlesticks, Coffee Sets, Bon Bon Dishes, Glass-lined Salts and Peppers, Etc.

"The Case That Courts Comparison"

Mr. Retailer:

It required a quarter of a century to bring SOLIDARITY GOLD WATCH CASES up to their present point of perfection.

Merely stamping "SOLIDARITY" on the *inside* of our cases did not do it.

It is the SOLIDARITY **Individuality** on the **outside** of our cases that did it. Individuality is the hardest thing to buy and the easiest thing to sell. SOLIDARITY CASES have it.

SOLD ONLY THROUGH THE WATCH JOBBERS

WE MAKE

The Alliance Ring

The graceful style of the Alliance Ring is rapidly supplanting the use of the old style wedding ring. The joints are invisible, and whenever engraving is desired it is done in the inside surface. Can be easily separated by inserting a pin in inside pinhole.

14 karat, 3 dwts., each, $1.25 per dwt.; in dozen lots, $1.15 per dwt., net;

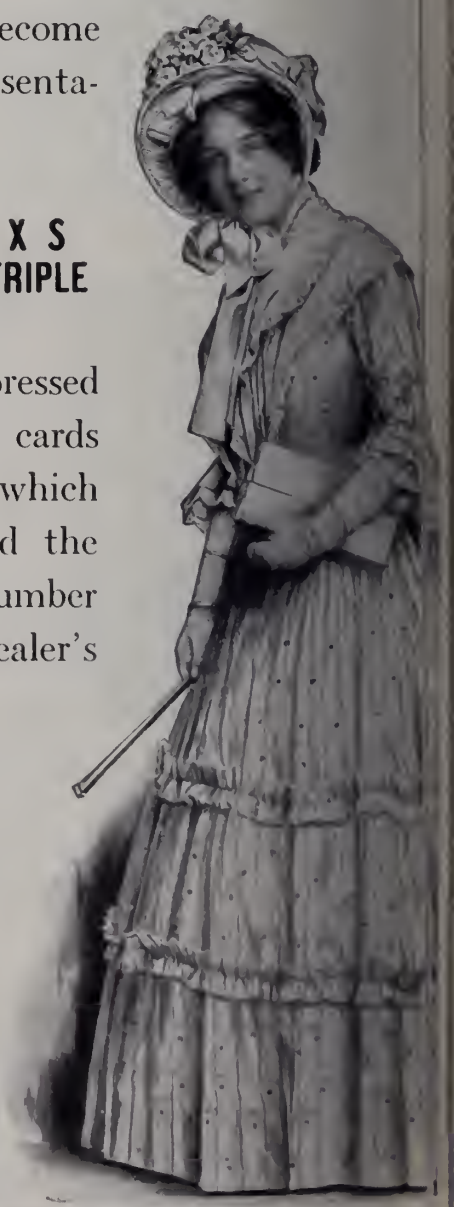
The 1847 Girl in Colors



"The 1847 Girl," in colors, occupied the back cover of the Youth's Companion's Easter Number—the same position as, earlier in the season, she occupied in the Ladies' Home Journal.

Later she will appear in a similar position, in colors, in Vogue and other prominent publications. Other leading magazines have presented her in black and white.

Magazine readers have become familiar with this fair representative of

1847 ROGERS BROS. X S TRIPLE

and have been favorably impressed by her. We have had printed a supply of post cards with "The 1847 Girl," in the same colors in which she appeared in the Ladies' Home Journal and the Youth's Companion, and will send a reasonable number of these, free of charge and imprinted with dealer's name to anyone handling the 1847 Rogers Bros. line. The association in your customers' minds between our advertisements and "The 1847 Girl" post card will serve to identify the ware with your store.

Diamond Cross in Easter Display of Chicago Jeweler.

center of attraction in this year's aster display at Peacock's, Chicago, diamond cross, 13 inches long and hes in width. It was composed of nes, varying in weight from one- to 2⅝ carats. The entire weight 9⅜ + 1/32 carats, and the retail value of the stones was placed at $100,000.

Contrary to the usual custom, this piece was not on exhibition in the show window, as experience proved that displays of this nature cause so much attention that the traffic is impeded on State St., and therefore it was thought best to exhibit the piece inside of the store.

A photograph showing the actual size of the cross was exhibited in one of the show windows, and all those who were interested in seeing the article itself were invited to step inside.

DIAMOND CROSS, COMPOSED OF 559 GEMS, EXHIBITED BY A CHICAGO FIRM.

Beautiful Gold Chalice, Paten and Ciborium Made by a Boston (Mass.) Jewelry House for a Church of that City.

THE goldsmith's art, so lavishly supported and encouraged in the Middle Ages by the Church, suffered from lack of support during many more recent generations, when tawdry imitations and glaringly thoughtless designs and inferior materials were put forth. It is therefore refreshing in the present day to note an ever increasing demand for fitness and perfection in design and execution of the ornaments and sacred vessels for church use, and devout generosity supplying the means for the production of lasting memorials and gifts in a thoroughly artistic form.

To Bigelow, Kennard & Co., Boston, Mass., has been entrusted the work of designing and executing in solid gold a chalice, paten and ciborium for the Church of the Immaculate Conception, Boston. The firm's artists suggested, and the donor accepted, designs of purest Gothic form. The illustration on the first page of this issue conveys more accurately than any description the successful effort for perfection in design and workmanship.

The cup of both chalice and ciborium rests in a separate cuplike supporter, perforated and heavily chased and engraved by a master hand. The stems and bases show heavy raised and applied work, every part of which attests the studied application of Gothic art to the subject in hand.

The value may be very easily apprehended when it is known that the chalice weighs 13 ounces 12 pennyweights six grains; the paten four ounces, 13 pennyweights, and the ciborium 21 ounces 16 pennyweights 18 grains, and that over three months' labor by artist artisans was consumed in their production.

Frank T. Mitchell, Marshall, Mo., Goes Into Voluntary Bankruptcy.

MARSHALL, Mo., March 30.—A voluntary petition in bankruptcy was recently filed in the United States Court by Frank T. Mitchell, a local jeweler.

Mr. Mitchell is well known in the jewelry business here having been in it since his boyhood. The business which he ran was established by his father, George Mitchell, in the early '70's, and when the latter died in 1900 Frank Mitchell succeeded and continued alone. In 1907 he moved to Marshall and then to Higginsville, and later returned to this town.

His principal indebtedness is said to be in Chicago and New York.

3228. Larter Automatic Vest Button. Mother-of pearl, whole pearl center, with gold bezel edge.

TALK NUMBER FIVE

THE VALUE OF OUR TRADE-MARK

When buying gold jewelry, remember that a QUALITY-MARK and a TRADE-MARK must go "hand in glove" to have either get the full benefit of the other—these marks in our gold jewelry are apparently small, but their significance is a matter of great commercial value to Retail Jewelers.

For instance—the next customer you have for a ring, locket, sleeve button, tie clasp, shirt stud or vest button, just show him one of our make; call his attention to the QUALITY STAMP and tell him that we guarantee the gold to assay exactly as it is stamped; explain to him that our U. S. REGISTERED TRADE-MARK guarantees the construction, the settings and general workmanship to be absolutely the best that skill can produce, and if at any time a piece of Larter Jewelry should prove unsatisfactory, Larter & Sons stand ready to make good.

Don't you think a strong talk of this kind would create confidence, and induce your customer to buy? Try it, and see the results.

English Silversmithing; Its History and Development.

By W. W. Watts, F.S.A., Keeper of the Plate at the Kensington Museum, London.

s not proposed to deal with the subect so much from the technical standas from the historical, for in order nderstand the development of the hisof any art one ought to know someot the history of the country in n the art was practised. And not only it necessary to know history of a par ar form, but of almost every form—thing about the political history, the s phases through which the country passed, the ecclesiastical, civil, and so history. The influences from without ell as within the country must also emembered. There are a great many nces which have a bearing on the ry of an art—geographical position and tic conditions left their mark. These rks are particularly true of the his of the silversmith's art in Britain rule the art flourished in time of , and in time of war lost what ground d gained. There were curious excep to this in the case of almost every try. In Britain they knew a good deal t the art and how it had been prac for the last six centuries.

1180 there was in London a Guild of smiths, which had its quarters in Pos Lane, Goldsmiths Row, and was after ds granted a charter by Edward III. charter ordered that all silver plate t be sold in the street of Cheap or g's Exchange, "and that publicly," so it might be ascertained whether the rs had come by it honestly. A further ct was to insure its being of good ity. The Guild was a most powerful ority and attracted royal visitors. Up down the country, too, there were e guilds in towns like Newcastle, York, Exeter, while at St. Albans there was markable guild. In England, at present, e was a large amount of old English remaining, and the fact excited wonall the more because there had been so y causes for its disappearance. The try had passed through tremendous situdes, and wars had accounted for disappearance of a tremendous amount old and silver plate from the country. he Wars of the Roses were responsible the disappearance of a very large unt. So much disappeared, in fact, that as difficult to find much plate that dated er than 1500. Early in the 16th ury the Reformation, with its attendant ge and destruction, saw much of the taken by the State and a great deal t stolen by private persons. Another rtunate thing which accounted for the pearance of many beautiful pieces was habit of the Tudor monarchs of borng money. To supply what was wanted eat deal of plate was melted down. s they could not be replaced. Early he following century there was the l War, and Charles I., accounting for normous amount of plate being melted n. At one time 12 of the Oxford ges were contributing 1,610 pounds per c to be melted down, while the gentry and nobility added a further 700 pounds, while the Crown jewels were pawned. These facts only served to indicate to what a tremendously high pitch the art had attained.

Next came the Cromwellian period, when there was not much produced. Another reason for disappearance of plate was that in 1697 the Government offered good prices for silver to melt down and to be made into coin. Then there was what was called "the vagaries of fashion," and many owners got rid of some of their finest possessions. Instances occurred in which handsome collections were melted down and made into tankards. Corporations, too, had to sell plate in order to pay their debts, and, lastly, there came a change in domestic affairs, and with the advent of plate, spoons, and forks made of silver a lot of plate was melted down for conversion. For all that, however, it was surprising what a large amount of plate had come down to the present time.

The question was often asked as to whether the English craftsman had any real taste—any originality. There was always a tendency to decry their own productions, and yet when they came to look at the history of the art it was certain there were periods in which the English silversmith showed a great amount of originality. Every now and then in the periods a long way back the English silversmith showed himself capable of producing magnificent works of art. One thing he certainly had—the power to see and profit by what he saw. Whenever he came across anything good he seized whatever opportunity seemed to present itself.

In the 16th century the English craftsman was dominated by the German craftsman. There was a lot of communication with Germany at the time; a large number of Germans came to England, and they dominated the art so far as the silversmith was concerned. At the end of the 17th century, owing to political changes in France, a large number of craftsmen found their way to England, and their influence was more marked and more felt. In the second half of the 18th century there was a revival of the classical form, and the English craftsman profited by that, for he was willing to learn and take advantage of all opportunities. He boasted of this, and it was important to note that he did not know the limits as well as the possibilities presented. Sometimes, to show his great skill or emulate his foreign neighbors, he let himself go, and perhaps went too far, and forgot the particular value and meaning of his material.

One branch of the art was at one time the most important—the branch which produced wonderful objects for ecclesiastical use hundreds of years back. It was difficult to realize what must have been the wealth of the churches in mediæval times. There was not a parish church so poor as not to possess considerable plate, and the hundreds of inventories in existence made it difficult to realize the enormous wealth there must have been in the country. Dartford, for instance, in 1552, had crosses, candlesticks, censers, and boats, and pastoral staves weighing about 300 ounces—an ordinary parish church. There were many shrines, the resort of pilgrims, which were of a costly character. As showing the high pitch of the art in those days, an historian has paid a rather pretty compliment by saying "the workmanship exceeded the material." There were also the great possessions of the cathedrals. From Lincoln alone 2,621 ounces of gold and 4,285 ounces of silver were removed to the Tower. It was not difficult to imagine that the mediæval goldsmith was a busy person. But disappearance was effected in the 16th century, and only a few items remained. It was a melancholy thing to think that in the city of London the whole of the churches did not now possess more than three whole pieces of plate made in medieæval times.

Of mediæval chalices few remained, for about the middle of the 14th century there was a change of form. Some of those still in existence had been brought together in remarkable ways. One in the Kensington Museum was interesting from the fact that it was found as far off as Iceland, came down by Copenhagen and was not recognized until it reached London. Of pastoral staffs there were now only two of the period before the Restoration. Some people said these were French, but although they recalled the French art of the period, there was no real reason for supposing that they were not made in England.

When the Reformation came chalices were melted down and some were made into what had been described as the "faire and comely Communion cup." In many quarters chalices were melted down and put into new form—a form imported from Germany. The reason of this was not far to seek, because the then Archbishop of Canterbury was very fond of German people. The chalices were melted down and returned to their parishes in new form. Exeter, Bury St. Edmunds and Ipswich all had the same silversmith's mark, and in the case of some diocese it was evident there had been slavish adherence to what must have been a prescribed pattern. This type went on for about 200 years, though later there was a tendency to ornament introduced from Nuruburg, Venice and the East. In several places, however, in the 17th century there was an attempt made to follow the old form, and there were some chalices remaining as a result of this attempt—one in London and a whole set in Rochester Cathedral. In regard to church plate in the 17th century, they came across the large flagon and many pieces which were probably secular pieces which had been given to the churches.

As a proof of the vast wealth of plate recorded to have been in possession of people of influence, one might mention the enormous amount described as having been placed on the sideboard of Edward I. In those times, however, plate was not meant to be put on the table. There was very little for table use; it was put upon the sideboard—the cup board. There was very little on the table, except the ceremonial

The plate was placed on the sideboard to ...ncate the wealth of the owner, who put ... money into it because he had no other ... to invest. Under these circumstances, ...efore, it was not surprising that the ...k upon it was often very elaborate. ... majority of the larger pieces of the ...æval period which had been left were ... pieces, and were never intended for ...al use.

...e cup at King's Lynn, called King ...'s Cup, was the earliest example of a ...ar cup, but it was made after King ...'s time. There was a good deal of ...ch in its style, and it showed that the ...f enameling was then an important ad... of the silversmith's art.

... salt-cellar was the most important ...rt on the table until the end of the 17th ...ry. It served to separate different ...es of guests, and they had the term ...t above or below the salt." The earli... so far as was known, was the hour-... shape which came toward the end ...e 15th century and which became an ...t of extreme beauty.

... most early silversmiths' work the ...sman used every process he was aware ...hammered, repousée, engraved and ...ed and decorated with enameling. ...e was an extraordinary one at Corpus ...sti, Oxford, the whole of the surface ...g covered with a minute arrangement ...hage and flowers. There were beau... little figures on the background in ...unt green enamel.

...azers, drinking vessels and other ob... were produced to the orders of rich ...le who gave *carte blanche* to the silver...h to produce as fine a thing as it was ...ble to do. It was often said that we ...not produce such fine things to-day, but ...nswer was that the conditions are dif...ent. It was difficult to find the man to... who was prepared to give a craftsman ...scope to produce the finest object he ...capable of. Alas, nowadays there might ...o much limitation in the style of pro...ions.

... the 16th century the country enjoyed ...e, and therefore the arts flourished. R...alty gave their patronage and the no... followed. Henry VII. left plate valued ...2,000,000, and Henry VIII. had a cup...d of seven tiers of plate. What the ...i did the nobility did. Next came Eliza...e and extravagance. The abundance of ...ly of silver was due to the fact that ...n conquered Mexico and Peru. The ...ession of silver became so common that ...st, "loathing plenty," people took to ... Venetian glass, etc. German influ... too, was such that Elizabeth ordered ...he Germans to leave London in 1599. ...r influence, however, had predomi...l. It was not until toward the end of ...16th century that we shook ourselves ... from German influence, and we got ... of the finest productions of the period ... ed by exquisite plainness.

...om the foregoing it will be seen that ... synchronized with the vicissitudes of ...ountry as a rule—although there were ...ge conceptions—and that it followed ...ines of trade and commerce. The sil...nith had been open to all the influences ...came from various quarters, and he ...had the power to see what was good in every work, and make use of it. He had been open to all the influences that came to him from outside his own country, or were suggested by other arts in his own country. On this occasion he proposed to deal with the work of the 17th and 18th centuries.

The 17th century history might be described as one of great contrasts—great changes. Starting from Elizabeth, or just about the time when Charles I. came to the throne, the country was comparatively quiet. Then came the outbreak of the Civil War, and afterwards the stern Puritanism. All the sternness was faithfully represented in the art. There was not the lavish expenditure, but the beautiful simplicity which commended itself to us so very much. The habits and customs had changed in regard to the drinking of toasts, and so on. After Cromwell's time there came the Restoration, and a mighty rebound from Puritan simplicity into the unrestrained extravagance of the Restoration. It was necessary for the coronation of Charles II. there should be a new set of regalia, and municipal authorities began to provide themselves with maces and other badges, which were to symbolize the power they had beneath the king. There was also a revival of plate made for ecclesiastical use. The extravagance in the silversmiths' work was very marked. It was a period of great show and ostentation, and it might be almost said of vulgarity. Pepys spoke of "eating on silver plates, and all things mighty rich and handsome about him."

As far as silversmiths' work was concerned, the Restoration was a period when ornament was over-elaborated. There was little in the way of plain surface, but the workmanship was skilful and the modeling and relief done with great skill. Style had been chiefly introduced from France, and that went on to the close of the century, when a further relapse took place, and the art went to the other extreme of production, and we got what was known as "Queen Anne." Here again we had a somewhat faithful representation of the period by the state of the art of the silversmith at the time. The salt-cellar was now losing its unique position. It had been the sole object on the dining table, but at the beginning of the 17th century its great place on the dining table was not quite so sure as before. The form which lasted nearly to the reign of Charles II. was still that of the hour-glass, but it had different features of decoration. After the reign of Charles II. it had no longer the distinction as to caste at the table, and the whole arrangements of feeding were changed. There were some specimens in the Tower of London which might be studied with advantage, some of them having an unusual feature from the fact that they were provided with covers.

With regard to drinking cups, the drinking of healths came in early in the century, though not quite as we understand it to-day. In the early part of the 17th century came the more proper English form, with very slight decoration, the smaller ordinary drinking cups being of interesting form, and plain. Passing on, they got a magnificent cup early in the reign of James I.—steeple cups, so called because of the pinnacle with which they were surmounted. The features were identical, though they varied considerably in height. Then followed the very large kind of loving cup. The custom of drinking healths had begun before the end of the reign of Charles I., and went on throughout the Cromwellian period, although the artist at the time was content to leave the vessel plain, rather than decorate in the way in which were the cups of Charles II. There were other kinds of cups—the posset or posnet, for example. There were cups of the time of the Commonwealth, characterized by extreme plainness of decoration, but they were not without very splendid shape. There were also a large number of porringers still in existence, and they were generally provided with covers. Again, there were many articles of this period which now commonly went by the description of "Queen Anne."

Coming a little further into the century, we came to enormous tankards or flagons, about which a great deal has been written. They were to be found, for the most part, in churches at the present day. This fact did not mean that they were actually made for the churches, although they were in some cases. But it was more than likely that many were made for private individuals, and these people gave them, out of good feeling, to the church where the ritual had been reviving with the restoration of Charles II. After that there appeared the flagon for ordinary use, some of them having pegs, which might have been responsible for the expression "taken down a peg or two." A venthole in the handle had given rise to the description of "whistling." That hole, I think, was made for a very different purpose from that of whistling, although there might have been whistling tankards. Right at the end of the century came the rather awkward ewer, some of which showed what was called "cut card" work, and the shape was getting away from what was considered purely English form. There was a constant stream to this country of craftsmen and others from France, and, little by little, these people influenced the people in England. Another remarkable form appeared for only a few years—a peculiar decoration, with slightly embossed punched ornament done from the back, highly valued, very simple, and very effective. There was comparatively little of this work in existence, and it fetched as much as £28 an ounce. A few alms dishes with this decoration remained in the possession of the churches. A number of tiny sweetmeat bowls were treated in the same way, the decorations, though simple, being most effective.

Touching upon tableware again, I would point out that in the 17th century—the Apostle in particular, then the severe Puritan spoon, and afterwards the Restoration, when they got a form approximating to the form of the present day. When forks came first into use they were regarded as a sign of great effeminacy, and were at first used for eating fruit. The earliest had two prongs, and not until 1682 was the stage of four prongs reached.

As to candlesticks, excepting the pottery forms, we are very much in the dark, but

earliest seemed to be 1637. About the ddle of the century saw one of the hand- nest forms, and was the best fitted for use for which it was intended. It could t be upset, and the grease must fall o a large grease pan, and it had a charm- sort of ribbing to reflect the light. It not purely English in form, and had prototype in the low countries, who k it from Italy, which, in turn, had en it from the East. The probability s, therefore, that it was Persian. Then came to something more French, and g before the end of the 17th century neighbors over the water were influ- ng us. A large number of the natural ompaniments to candlesticks followed— ffers, etc. A great number of very ge objects in silver came next, as well strated by a very elaborate toilet set he museum at South Kensington. These ge objects were lavishly decorated, and re were even silver tables, looking- sses, and things of that kind. It was age of almost frenzied extravagance. s was well after the Cromwellian pe- d, and a christening font in the Tower London reflected the period. Then the stom arose of drinking punch, and, con- uently, there had to be vessels for that. All the maces, which showed the sign municipal power, dated about the time the Restoration. The original mace a comparatively insignificant object, it developed, and in the time of arles II. was surmounted by a crown. sing on to the 18th century, the French uence was being asserted more and re, though we were throwing off the ishness of Charles II.'s time. After the t 20 years the French influence s very strongly marked. The reason s that in 1685 the Protestants were ven out of France, and among them re a large number of craftsmen who nt to England and settled down. They t on coming, and among them a man o left his mark, Paul Lamerie. From 2 he worked on for about forty years. ey were at first content that their work uld be simple, but as time went on y fell into the terrible fault that their rk became heavy and ugly. That went to the middle of the century, and then, of discoveries at Pompeii, etc., Eng- men turned their attention to the classi- form, and this was found in the latter t of the 18th century. The silversmiths lowed, and produced vessels of all kinds classic form.

There were in all three different pe- ls in the 18th century—the first fairly n, the second elaborate and over- borate, and the third the classical. On social side there was now no longer display of plate on the sideboards. Ob- s were made for use on the table, and dly ever made of silver gilt—generally in silver. The 18th century might be described as the domestic period.

The earliest forms of the coffee pot were de between 1670 and 1681. They were remely plain. During the 18th cen- y they went through various forms, had now got back to the early type in, as witness the coffee pots in any of 6½d. bazaar shops in England to-day. was the old, original shape back again. He supposed the simple reason was that it was the most convenient shape for its purpose. The early teapots, 1717, were of the plainest, but the style of the Queen Anne period must not be confused with that which now passes muster as "Queen Anne." The tea caddie, milk jug and sugar bowl followed, and eventually the cruet stand. The stands apparently all disappeared, but a large number of castors were left, and the earliest was of the simple form of the 1d or 2d. pepperbox sold in Britain to-day. In all these things the French influence crept in, until it predominated. There was a struggle between plainness and decoration, and the pierced work of the time was very wonderful, and the baskets were the most wonderful productions of the 18th century. The styles overlapped considerably, according as the craftsmen were conservative in their ideas or were taken up by later developments. It was in 1753 that people began to turn attention to classical form, and the perforated work of the latter part of the century was affected by classical design. Extraordinary skill was displayed right to the end of the century. For some strange reason the early part of the 19th century saw deterioration of the art, producing Victorian "horrors," but it was hoped we were recovering. It was hoped now that the study of the past might be a source of inspiration, and give hope for the future of the art in England.

Interesting Exhibit of Arkansas Diamonds at the Land Congress Held at Little Rock.

Little Rock, Ark., March 30.—At the Land Congress held in this city last week in the exhibition hall there was an exhibit unique in the history of all expositions in America, large or small. This was an exhibit of uncut and cut diamonds, together with the peridotite they are found in from the first and only diamond mine in the United States so far discovered.

The exhibit naturally attracted great attention. It consisted of a large block of the peridotite, known as "hardibank," weighing several hundred pounds, a quantity of the weathered and disintegrated peridotite, of "blue ground," a large number of stones in the rough and about 20 cut and polished diamonds. The cut diamonds are very brilliant and include several very fine blues, pure white and two or three perfect canaries. In the uncut stones is one remarkable one of half crescent form, pure white and flawless. It weights four and one-quarter carats and will, it is figured, cut into a 2½-carat canoe shaped stone. Because of its unusual shape, brilliancy and color, an offer, it is stated, was made by a New York diamond importer of the unusual price of $125 a carat in the rough.

None of the diamonds, rough or cut, is for sale, however. The exhibit was from the mine in Pike County, Ark., near Murfreesboro, owned by the Arkansas Diamond Co., of this city, and the policy of the company is not to sell even one stone, cut or uncut, until permanent machinery is installed and operations on a large scale begun.

This exhibit is of special interest just now because it marks the beginning of a new activity in the development of the Pike County mine after a long period of inaction, during which practically no work has been done. This apparent inaction is explained by Chas. S. Stifft, vice-president of the company, who, in an interview with your correspondent, said:

"We have been proceeding carefully and cautiously to prove the property as fully as it is possible to do. That there was a true volcanic pipe containing diamonds in their native matrix had been demonstrated by the highest authority. But more things had to be demonstrated before there could be assurance of probable profitable working of the ground. The principal problems were to ascertain if the peridotite extended downward indefinitely, if the diamonds were to be found all over the area of the pipe or only in isolated spots and, finally, the value of the stone and how they would cut. To prove the existence of the peridotite at depth we bored three bore holes with diamond drills and at a depth of 200 feet the drills were still in the peridotite.

"Then with the crude, temporary washing plant we have we washed several loads of the surface each all over the area of the pipe and found the same general ratio of diamonds.

"The one thing remaining was to have some of the stones cut, not to sell them, but simply as a test. We sent them to several places. The result was wholly satisfactory, the diamonds in hardness, brilliancy, color and value fully equaling the South African product. Having demonstrated these matters we feel safe now in going ahead and expect to put in a complete diamond mining plant at a cost of approximately $150,000 very soon."

Death of James C. Bates.

Haverhill, Mass., March 30.—James C. Bates, who passed away at his home on North St. Saturday last, was considered the oldest jeweler in Haverhill, and was widely known as a merchant throughout this section. Though he had not been in good health all Winter he had been able to continue his work until about a week ago, when his illness took a dangerous turn and he grew worse until the end.

A native of New Bedford, Mr Bates was born 68 years ago, his father being Amos Bates, a well-known New England watchmaker. With his father he learned his trade, at which he became an adept, and in 1865 he came to Haverhill. He entered the employ of L. Kimball & Son, with whom he remained for about 13 years, and then he went into business for himself, succeeding C. Kidder, in 1879. Mr. Bates conducted stores at various addresses, but since 1903 had devoted himself principally to his repairing business, conducting a small shop on Railroad Square. He was more competent as a practical than a business man, having met with many reverses during his career.

In October, 1883, Mr. Bates was married to Miss Lizzie Kimball, who died December, 1891. He is survived only by a sister, Miss Caroline Bates. The funeral services were held Sunday last, and the body was taken to New Bedford, where the interment took place.

DIAMONDS

Recent importations have added largely to our stock. We can now, as always give you stones of any size or quality at reasonable prices. No matter what you want, we can serve you.

LA VALLIERES

We are constantly creating new patterns, in combinations of diamonds and precious and semi-precious stones. We have all the newest and most popular styles, at a great range of prices.

Second Annual Banquet

Enjoyable Feast at Fort Pitt Hotel, Pittsburg, Pa., attended by Representative Jewelers from many Cities and Towns

TTSBURG, Pa., March 30.—The members he Jewelers' 24-Karat Club, of Pittsburg, a glorious feast last night in the Eng- room of the Fort Pitt Hotel. Word res of art, education and good business were painted by men of affairs. For than three hours the fragrance of ry mingled with the fragrance of ers. The best of humor prevailed. The rations were of gold, while the food served in a way designed to represent costly pieces of the jewelers' art. The ory of the occasion would have done t to the legislative halls of the nation. I speech of President Steele F. Roberts regarded as a masterpiece and every who followed him took occasion to k of the beautiful manner in which he ght to his hearers the lore of the g smiths' art, each word uttered sparkling the brilliancy of a diamond. It was o of the most successful business ban- q s ever held in Pittsburg and one of the b arranged.

reception was held previous to the b uet, the speakers and invited guests of t evening being in the receiving line. S F. Sipe had charge of the introduc- t s of the guests and speakers during the e ing.

hen the guests entered the banquet hall Nella's band, which was hidden behind ns and potted plants, dispensed popular a national airs, "Rings on Her Fingers a Bells on Her Toes" making a decided h After the guests had been seated deep s nce prevailed. The Rev. Dr. E. Trum- b Lee, the toastmaster of the evening, o red the invocation. Then the banqueters r le ready for the feast and the greatest r riment prevailed while the following s being served:

MENU.

Crab Meat Cocktail.
Assorted Relishes.
Strained Gumbo.
Filet of English Sole Marguery.
Sweetbreads with Spinach.
24-Karat Punch.
Breast of Chicken, Maryland.
French Peas.
Grapefruit Salad.
Biscuit Walnut.
Fancy Cake.
Cheese and Toasted Crackers.
Coffee. Cigars.

resident Roberts, of the club, intro- ced as the toastmaster of the evening, Dr. L The latter expressed regret that he never had the pleasure of meeting Mr. berts until three weeks previous to the quet. Dr. Lee praised the high ideals ticed by the club and then introduced sident Roberts as the first speaker of t evening. Great applause greeted Mr. berts when he arose to speak—this because Mr. Roberts has made the anization such a splendid success. For rly half an hour he gave as brilliant a speech as was ever listened to by a trade organization

PRESIDENT ROBERTS' ADDRESS.

Looking into the happy, smiling faces of the 200 prosperous Pittsburg jewelers before me should prove an inspiration to any speaker, and I assure you the galdsome sight arouses a spirit of pride and enthusiasm on the part of your second-term president.

At our banquet, one year ago, I had the pleasure of presenting to you the infant Jewelers' 24-Karat Club of Pittsburg. Born in the land of Vulcan, midst smoke and steam and clash of iron

STEELE F. ROBERTS, PRESIDENT.

and furnace glare, the child to-night celebrates the first anniversary of its birth. It has been a strenuous year for this growing boy, and not without the various ills consequent to so young a child, such as intermittent business fever, pessimistic earache, trade measles in spots, goldsmiths' colic, overstock hearthurn, anti-profit mumps, diamond whooping cough, old fashioned Winter croup, and a few other ailments which I dis-remember.

Now that the child has been weaned from the travelers' jolly and is heir-apparent to several home-grown teeth, I am gratified to present for your critical inspection this magnificent yearling—a splendid specimen of the jewelers' art—a robust, healthy child, sound in all its members and wreathed in smiles -the Jewelers' 24-Karat Club of Pittsburg

I might mention that the child has visited New York and been presented to its fond parent, the Jewelers' 24-Karat Club of New York, at its annual banquet, last month, and also made known its presence at the dinner of the Jewelers' Club of Philadelphia, where it received a royal welcome.

The membership of the Jewelers' 24-Karat Club of Pittsburg at this date is 150, there having been added during the year, 50 members—among the addition being the good, rich, red blood of 40 young men from the various jewelry establishments in the city.

During the year a smoker and shop talk were given in this hotel, which proved such an enjoyable and profitable entertainment that it will be repeated at an early date. At our recent annual meeting, an entertainment committee was appointed which will arrange for several outings during the Summer and a series of entertainments during the Fall and Winter. An athletic committee was also appointed, which will have the management of the bowling team, baseball club, and the various sports in season. In one year's time we have placed the Jewelers' 24-Karat Club at par with the largest and oldest business clubs in Pittsburg, and its success simply demonstrates to us the potent things that can be accomplished when an earnest, intelligent body of men are united for a purpose.

If for no other reason, we should rejoice that the organization of the Jewelers' 24-Karat Club has been conducive of such a splendid spirit of good fellowship among the jewelers in Pittsburg and adjacent cities and towns. It has placed the jewelry merchants on a higher plane of business ethics. The serpent's tongue competition and all envy, strife and petty jealousies have been eliminated and a new era of honorable competition among gentlemen of integrity and refinement has been ushered in. We have been taught that business is "honest goods at honest" prices presented favorably to the right customer.

A celebrated writer has said, "Business is not business. Business is making a good living and making the world a better place to live in—after that it is fun, real fun, as the man who is running a successful, honorable business knows." When you really get into the spirit of the business game—and experience its trials and defeets—and then the glory of its victory and success, you will realize it is the best game in the world. A long drive, a good brassie shot and approach and a safe put, and you win the trophy—a strike, a spare and a strike and the game is yours—a three-bagger and a home run in the ninth and the Pirates win—it's the same old game—in life, in business, in sports. The man who does not enjoy his life work is missing the whole point of living.

The man who does not see that doing his work honestly and well is a distinct addition to the sum of human comfort and happiness, is missing the richest reward of his labors. We all seek the sunniest souls both in business and society, the cheerful man invariably attracts, and so in the field of merchandising the power to attract is a matter of great importance. Though brains are essential in business, other things beside pure mental power are apt to count, and the greatest of these is an intense personality.

Oh! the charm and delight of doing business with a man of good personality—a well rounded man—a man who is the soul of honor—a man whose mind and heart is filled with all that is pure and true and beautiful—a masterpiece of his Maker. And you and I do occasionally meet just such men—men who live in an atmosphere above the petty details and annoyances of business life and bask in a sunshine of perpetual good cheer—men who do a successful business and yet who just seem to live to make their customers and friends contented and happy. Men whose cheerful disposition and charming personality "droppeth as the gentle rain of heaven" upon the just and unjust customer alike, making them to blossom into loyal friends and patrons. Our business world is as we make it, but we have the immortal conviction that no power or force can prevent us from making it good.

Success is not won by trampling over others—there is room enough for all. Their business life and civilization, like the coral reef, grows out of life's sea, the countless accretions of the thoughts, acts and deeds of innumerable men.

Not to digress too much on the time of the distinguished speakers to follow, let us come close to nature—our second nature—the dearest thing on earth to us—but to the public the most pleasure-giving and moderate priced of all commodities—jewelry.

After humorously telling of the importance of the position of the traveling salesmen to the trade and paying a high tribute to the present force of jewelry travelers, especially those who visit Pittsburg, the speaker then devoted some time to the art side of the jeweler's business. Said he:

In these days of intense commercialism, we are prone to forget the nobility and character of the jeweler's calling, and the influence and impress of its artistic development on the people. Ruskin has said, "Life without industry is guilt; industry without art is brutality.

Many of us have seen and read of the wonderful creations of "Lalique," the famous sculptor

THE SYNTHETIC SAPPHIRE

thanks to its high merits, acknowledged by scientists the world over and given the widest possible publicity by the press, at once takes its place among the class of gems most popularly known and appreciated

th of Paris, whose marvelous productions a heretofore unattained and exclusive po- n the field of modern artistic jewelry. All works of this Parisian genius are technical eces of such decorative effect as can only ately attained by an artistically endowed, se sitive and soulful fantasy.

me immemorial the craft of the gold- ol jeweler has been deemed the most hon- g all trades and professions, recog- revered by the jewel-crowned monarch throne and alike by the humble peasant g for a golden trinket in the market place. seums we look with wonder on the k of the Assyrian goldsmith, and think as he sits in his tent, deftly fashioning r web threads of gold into the most terms of grace and beauty to bedeck the dens of his day and generation. And we, these later days, have caught the inspir- f the Egyptian and Assyrian gold workers, erly evinced in the exquisite creations of t year in the platinum and gold fret work, b and geometrical designs, all so deftly nd fabricated by the ingenuity and skill an craftsmen.

t of enameling is the acme of the gold- craft, and for decades we have made ce to the æsthetic and classical productions ean manufacturers, but there has de- n this country during the past few years e of enamel workers whose hand and brain ught some marvelous creations in trans- and translucent enamel, their work vieing e most expert foreign productions in perfect ue, delicate coloring, shading, tone, har- nd exquisite conception of its application num, gold and jeweled effects.

gratulate the art workers in enamel, gold num for their effort and success in placing icating jewelry in this country on a higher f erudition, and applaud their endeavor to a sentiment and educate the public to a iscriminating taste and artistic conception beautiful in jewelry and jewels, especially ique, unconventional creations that emanate he hand, heart and soul of the individual an

this artist craftsman the gold—give him els and let him sit down and think—let him nto these golden strands his different moods m conceive forms that were before un- and in the grouping and setting of gems for color and arrangement will be as s as the song of a bird.

w it is a difficult matter these days for the cturer to eschew commercialism and pass almighty dollar, but the possibilities of art, and culture to the workers in precious in America are yet as an undiscovered —the promised land from whose borders es have just brought a foretaste of the fas- g jewelry I have just described.

r within the gates of this promised land, nufacturer! O, craftsman! and behold the r and magnitude of this world of fantasy ion, form and design, to which all nations ple have paid tribute—Babylonian, Assyrian, n, Etruscan, Roman, Greek, Renaissance mpire. Go gather the fruit from this garden science, wisdom and learning—walk in its t beaten gold—breathe the floral perfume iration and ambition—pluck the golden apple present from the silver pictures of oppor- —collect the undiscovered pearls of thought into the semi-precious stones that lie at eet—gaze upon the crystal fountain whose g spray of diamonds, rubies, emeralds and es waft a bow of promise over your search owledge. Visions of Tubal Cain, Pharaoh, n, Queen of Sheba, Cleopatra, the Alham- d mines of Golconda float before you—the f birds call you to this enchanted abode, the muses of art and nature acclaim a wel- o him whose inspired soul will weave these s and inspirations into beautiful forms of and jewelry, which will bring æsthetic joy a multitude of art loving people.

rth then, manufacturer and craftsman, con- and to conquer in your field of art, and the day is dawning when all the nations of rld will pay glowing tribute to the peerless ork of American goldsmiths.

Judge James R. MacFarlane was the next r and spoke to the toast "As Others s." The judge assured that the rs always have and are still doing to educate the people in the higher in art. This he contended was being done through splendid window displays, cultivating the tastes of the people for the better things in life. He told the goldsmiths of the great possibilities in this direction. He hoped that they would continue to educate the people to higher and esthetic things.

Col John L. Shepherd, of New York, spoke to the toast "Sand." Some of his friends had a new definition for the word "nerve." In any event, they go hand in hand. As usual, the colonel made a hit.

"My friend Montgomery asked me what kind of stories I intended to dig out of the sand heap to-night," he said, by way of beginning, "but I replied that I did not know how I could dig any out with a Presbyterian minister sitting on the lid." He then went on to tell a story about how Caesar was captured by pirates and taken on a vessel. As soon as he boarded the ship Caesar commanded the crew to take him to his own port. He promised them that as soon as he landed he would hang every one of them for capturing him, and he did. "That was sand," said the colonel. "When Gen. Grant made his famous declaration, 'I will fight it out on this line if it takes all Summer,' that, too, required sand. Lincoln showed he had sand when he freed the slaves." The speaker then took up Andrew Carnegie as an example of a man with sand as well as real nerve. Theodore Roosevelt also was a shining example of the man with sand. He closed his address by saying that it's not the men afflicted with the hookworm that are doing the things of this life, but the men with sand. His address was greatly applauded.

The next speaker was Dr. John A. Brashear, the noted astronomer, manufacturer of lenses and scientist. He gave the jewelers credit for what they are and for the place in business which they occupy—one of the highest in the land. He said there was a time when the jeweler set his clock by the stars, but now things had changed and they are timing stars by the clock. He laid great stress on one which he has in his workshop, and which keeps such perfect time that it only varies .02 of a second out of 365 days a year. The case in which it is kept is airproof, the air being pumped out. The clock also is kept at an even temperature the entire year. He gave the illustration to show that the watchmaker's art has reached an almost perfect state.

The speaker also told some interesting things about Halley's comet. "I wish it would get close enough to swish our coattails so I could tell more about it," he went on. He had everybody scared when he assured them that the comet would hit the earth, but that it would only be the tail of it. Dr. Brashear said that if all the dust particles which refract light and form the blue of the heavens were gathered together and compressed they could all be packed in a woman's portmanteau. The disks of nebulous matter which make up the tail of the comet are infinitesimally minute. In conclusion he paid a glowing tribute to the craftsmen of the trade.

J. T. Montgomery, of New York, was next on the list and spoke to the toast, "Who Receives the Reward?" He had originally intended to speak on "Who Gets the Money?" but changed his subject because of the unpleasant notoriety which Pittsburg has received on account of recent investigations here. He did not wish to be misunderstood. He took up the wage-earning power of men and brought home to those present the fact that if men only make enough to exist they have nothing for luxury.

New competition, said Mr. Montgomery, had arisen in the jewelry trade. He assured his hearers that the player-piano and the automobile have become competitors and that they are giving the jewelers a hot race for business, and that it was time for them to wake up. He dwelt at some length on advertising, and, taking a leading weekly Philadelphia periodical, told his hearers that out of 211 advertisements which appeared in its last issue, but one was that of a jeweler. He believed that there must be greater publicity if the jeweler is to succeed and get his share of business now going to other channels. The speaker contended that the manufacturers, jobbers and retailers should all have more publicity, for publicity brought results when judiciously placed with proper advertising mediums.

The concluding address was made by Lee S. Smith, president of the Pittsburg Chamber of Commerce, who spoke to the toast, "The Other Man." He hoped that the good business fellowship which prevails in Pittsburg would continue for all time to come.

Before the guests left the banquet hall a handsome bouquet of flowers was presented to Dr. Brashear to be given to his wife, who has been seriously ill for several months, and who has been an invalid for several years. Each guest also was given as a souvenir of the occasion a watch fob made of leather, on the end of which dangled a bronze carrot. It came as a complete surprise to those present.

The menu was in book form, neatly bound in leather, giving the names of the officers of the club, the names of the various committees and other data about the organization, making it also a souvenir well worth preserving. It was almost midnight when the assemblage adjourned.

The guests of honor were Harrison Nesbit, president of the Bank of Pittsburg; David Kaiser, president of the Jewelers' 24-Karat Club of New York; Ira G. Gorman, Philadelphia, president of the Pennsylvania Retail Jewelers' Association; Charles W. Hancher, Wheeling, W. Va., president of the West Virginia Retail Jewelers' Association, and L. P. White, Philadelphia.

The committees in charge of the dinner, to whose work the success of the affair was due, were:

Banquet Committee—F. A. Keating, August Loch, O. C. Siedle, S. F. Sipe, Harry Heeren, B. K. Elliott, C. S. Wiley, D. L. Cleeland, Chas. H. Holyland and George L. West.

Reception Committee—William Heeren, H. A. Reineman, O. C. Graf, W. T. Johnston, A. C. Geis, James R. Brown, W. H. Fisher, Benj. Robinson, W. J. McKinney, George T. Kloepfer, A. E. Seidle, J. O. Clawson, Otto E. Heineman, Frank N. Worrell, Chas. N. Hancher, C. W. Wattles,

MEMBERS AND GUESTS OF THE JEWELERS' 24-KARAT CLUB OF PITTSBURG AT THE SECOND ANNUAL BANQUET HELD MARCH 29, IN THE ENGLISH ROOM OF THE FORT PITT HOTEL.

Death of Chas. A. Miller.

MALTA, O., March 30.—The death last Wednesday of Chas. A. Miller, a well-known jeweler of this town, was a shock to his many friends, as it was entirely unexpected. Mr. Miller had been in apparently good health, and though he had complained of an attack of indigestion the night before, the illness was thought to be slight. He fell unconscious while in the bath room, early Wednesday morning, and was found there a few minutes later by his wife. Death was practically instantaneous. The funeral was held Friday afternoon in the Malta M. E. Church.

Mr. Miller, who was 55 years old, was the son of A. L. Miller, who started in the jewelry business here in 1860. Deceased learned the trade with his father, and with his brother Frank became associated in the firm in 1872. In 1896, the brothers succeeded to the business and adopted the style of Miller Bros., under which it has been continued ever since.

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., March 30.—The following were the exports of jewelry, silverware, optical goods, clocks, watches, and kindred lines from the port of New York for the week just ended:

Bombay: 86 cases clocks, $791; 13 cases clocks, $482; 1 case plated ware, $170.

Bremen: 3 cases watches, $2,300.

Cape Town: 3 cases plated ware, $154; 27 cases clocks, $709; 5 cases watches, $3,245.

Cartagena: 2 cases plated ware, $102; 3 cases clocks, $100.

Christiania: 17 cases clocks, $818.

Dublin: 8 cases clocks, $220.

Glasgow: 70 cases clocks, $887.

Hamburg: 2 cases plated ware, $265; 62 cases jewelers' sweepings, $6,540; 2 cases jewelry, $107; 2 cases optical goods, $355.

Havana: 1 case silverware, $206; 2 cases plated ware, $284; 21 cases clocks, $691; 1 case plated ware, $145; 1 case jewelry, $138.

Havre: 2 cases clocks, $160; 1 case jewelry, $350; 2 cases optical goods, $285.

Kingston: 28 cases clocks, $619.

Liverpool: 3 cases plated ware, $269; 1 case silverware, $1,004; 1 case jewelers' sweepings, $176; 10 cases optical goods, $5,044; 4 cases jewelry, $417; 1 case silverware, $717; 235 cases clocks, $3,210.

London: 165 cases clocks, $6,247; 3 cases watches, $300; 22 cases clocks, $7,284; 4 cases watches, $2,608; 8 cases optical goods, $1,041; 1 case jewelry, $200; 98 cases clocks, $795.

Manchester: 2 cases optical goods, $285.

Munich: 1 case plated ware, $250.

Para: 1 case plated ware, $103; 29 cases clocks, $1,096; 3 cases jewelry, $552; 12 cases clocks $310.

Rio de Janciro: 1 case optical goods, $229. 2 cases watches, $237; 4 cases jewelry, $492.

Santiago: 2 cases jewelry, $141; 2 cases clocks $115.

St. Johns: 8 cases clocks, $182

Smyrna: 36 cases clocks, $317

Sydney: 9 cases clocks, $203.

Tampico: 4 cases clocks, $100.

Valparaiso: 4 cases plated ware, $495; 2 cases watches, $997.

Vera Cruz: 2 cases plated ware, $194; 1 case watches, $108

Wellington: 22 cases clocks, $402.

arrisburg, Pa., Jeweler Who Was Convicted of Defrauding Creditors, Now Convicted of Receiving Stolen Goods.

-BURG, Pa., April 4.—For the second within a week Myer Baturin, the Market St. jeweler and pawnwas convicted in Criminal Court day of a serious offense, this time being receiving stolen goods.

alleged that Baturin had purchased hard Bowers on Dec. 17, 1909, a ring, which Bowers later admitted having from Daniel Coyle, 607 St. Coyle got possession of the set for the ring and went to Pawn- Baturin to redeem his property. stated that he had disposed of the oyle thereupon made information Baturin, who then offered to return

Detective Frank testified that had told him he had sold the ring. rial was delayed a short time to Coyle to return home for the ring. imed the ring was valued at $125. nk Sites, a salesman for C. Ross timated its value at $30 after in- it in court through a microscope. rk Miller testified to the fact that a inance requires pawnbrokers to ly returns to the police station of es pawned. In this particular in- he ring was sold to Baturin for t Baturin's return to the police edged."

n testified that his clerk had he diamond and filled out the re- nk.

n's attorney's were given four days to file reasons for a new trial. In ntime Baturin, who has not as yet ntenced on the charge of secreting ith intent to defraud creditors is ng business in his old store for the ners.

e Conklin sold the contents of the store March 30 for $1,825 to M. ns, of Philadelphia, one of the cred- ho in turn transferred the stock to Kay, of the Metropolitan Hotel.

Boston Jewelers and Watchmakers Sentenced to Prison on Charge of Counterfeiting.

N, Mass., April 1.—Robert E. William Sample and Frederick , the trio of counterfeiters who ated by United States secret service Franklin St., in this city, where l a plant as silversmiths and manu- g jewelers, were sentenced to-day in ted States Circuit Court by Judge Robert E. Sample was given three -half years and Frederick Hartung one-half years in the Atlanta (Ga.) ary. William Sample was given 10 in the Greenfield (Mass.) jail, being l by the judge as less culpable than associates. Judge Lowell, in pass- ence, told them that their terms ceedingly light for the offence com-

us good records of the men, to estimony was given on Tuesday, ey were brought into court and re- their plea of "not guilty," each "guilty" instead, induced the court to be lenient. Members of the jewelry trade, Frank A. Colburn, R. F. Thurlow, Eugene W. Rollins and George G. Tucker, who had been fellow employes in the past of William Sample, were witnesses to his previous good conduct and reputation.

The prisoners made and passed about 3,000 dimes of excellent quality, containing a larger percentage of actual silver than the genuine Government coin.

Workhouse Sentence for Swindler Who Got Goods from Pittsburg Jeweler on False Representations.

PITTSBURG, Pa., April 2.—Philip Volk, the man who several weeks ago swindled Heeren Bros. & Co. by the false statements he made to William Hoffman and other members of the firm, was yesterday sentenced to serve 60 days in the workhouse by Judge Reed. As told in THE JEWELERS' CIRCULAR-WEEKLY at the time of his arrest, Volk represented to Mr. Hoffman that he owned property in McKeesport that was unincumbered, and on the strength of his statement Volk was given credit for a bill of goods. An investigation proved that Volk not only had deceived the Heeren house, but that he had deceived others and had given checks which were afterwards found to be worthless, and his arrest followed. At the time it was stated that Volk also was wanted in Buffalo.

In passing sentence upon him the court ordered Volk to pay Heeren Bros. & Co. $156.06, being the value of the goods he secured at the time he made his false representation, and Volk understands that he must make this amount good, hence the comparatively light sentence which he received. It appears that Volk did own property in McKeesport at one time, but had sold it.

The court made quick disposition of Volk's case, the specific charge against him being false pretense.

Boston, Mass., Jeweler Foils "Hold-Up" by Breaking His Own Window and Attracting a Crowd.

BOSTON, Mass., April 2.—For the second time in this city within a few weeks, the breaking of a jeweler's front window, by the throwing of a missile through it from within the store, has frustrated the designs of a would-be robber.

A gold watch was the rather expensive window-breaker on the latest occasion. Last Monday Samuel Baveley, of Eliot St., was examining the watch in question when a man entered the store, drew a revolver and ordered Baveley to hold up his hands. The jeweler promptly did so, but hurled the watch through the window as he complied.

The crash quickly drew a crowd and the man as quickly fled. He was pursued by the throng through alleyways and cross streets of the neighborhood and managed to get away, but later the police arrested William McEachern on the description furnished by Mr. Baveley. In court the same day he was held under $2,000 bonds for the grand jury.

P. Schmidt, Peoria, Ill., is erecting a new front to his store at 2003 S. Adams St., and making extensive improvements in the interior.

Death of Frank M. Sproehnle.

CHICAGO, April 4.—Frank M. Sproehnle, of Sproehnle & Co., died at the Vendome Hotel, Thursday, after a long illness. Mr. Sproehnle's death was not unexpected, his illness dating back over two years, since which time he was confined to his room.

Frank M. Sproehnle was born in Chicago on Feb. 28, 1859. He graduated from the Haven at 14 years of age and became office and errand boy for the wholesale jewelry house of Norris, Alister & Co. His rise was very rapid. In nine years, while at the age of 23, he had reached the position of credit man and head of the financial department.

Seeking a broader field for his powers, Mr. Sproehnle engaged in the general jewelry jobbing business in 1882 under the name of F. M. Sproehnle & Co. In 1897

THE LATE F. M. SPROEHNLE.

the firm changed its name to Sproehnle & Co. and discontinued the jewelry business to become an exclusive watch jobbing house.

Mr. Sproehnle was a kind and just man. Always of a quiet disposition, he preferred actions to words. With nothing but his ability to back him he became one of the ablest men in his business.

The funeral took place last Friday from the Vendome Hotel, the interment being at Oakwoods Cemetery. Nearly all the leading members of the local jewelry trade attended the services to pay their respects to the memory of one with whom they had been associated with for so many years.

The floral tributes were many and beautiful.

The Chicago Jewelers' Association called a meeting of the directors on the day of Mr. Sproehnle's death and an engrossed set of resolutions was ordered sent to the bereaved widow and daughter, who are his survivors.

The Moritz Optical Co., St. Louis, Mo., was incorporated recently with a capital of $10,000. The incorporators are Gustav Moritz, Jennie Moritz and U. Cassidy. The first meeting was scheduled to be held Monday at 609 N. Broadway

t boro Manufacturers Protest ainst Advances in Freight Rates.

TLEBORO, Mass., April 5.—A special ng of the Board of Trade was held, night, and the new express rates re- put into effect through the purchase e Earle & Prew Co. by the Adams ess Co. were considered. The jewelers l that the rates had been advanced in al instances, and a protest will be ed.

e small package rate between Attleo and Providence has been increased 15 to 20 cents, and the rate between boro and Boston has also been raised. jewelers find that the rate to several points of the country are affected, and ey do an immense express business intend to protest as vigorously as posb

esident S. O. Bigney stated that it was utrage for the company to raise the rates five and 10 cents on packages all along the line, and declared that the company has taken advantage of the fact that there is now no competition.

Robbers Break Window of Pittsburg Jewelry Store and Steal Stock Worth $1,000.

PITTSBURG, Pa., March 31.—A most daring robbery occurred between 6 and 7 o'clock Wednesday morning, when the window of Spandau Bros.' jewelry store, at 542 Smithfield St., was broken and goods valued at $1,000 were taken. The store is located within one square of central police station.

A watchman who passed the store at 6.05 o'clock said that everything was then all right, but 30 minutes later, when J. A. Wallace, of the Park building, was passing the store, he noticed that the large window in the front had been broken. He immediately notified the police at the central station.

The articles stolen included 36 wedding rings, valued at $300, 10 diamond rings valued at $400, and a quantity of emblem goods estimated to be worth $300. The robbery occurred at a time when a number of people were on their way to work, but a better time for the robbery could not have been planned, as the night policemen leave their beats at 6 o'clock and the day men do not report until 7 o'clock.

In speaking to THE JEWELERS' CIRCULAR-WEEKLY correspondent, Charles Spandau said: "It is very peculiar that this affair could occur between 6 and 7 o'clock in the morning and no one be seen near the store. I am glad that our store is not on a side street, or perhaps the robbers would have carried away the whole store."

A man was brought before the local magistrate in Chester, Pa., recently, on a charge of having attempted to break into the retail jewelry store of A. N. Peoples, of that place.

Career of the Late Mrs. V. C. Morse.

ITHACA, Mich., March 23.—Many members of the retail jewelry trade of this State, and particularly the members of the Michigan Retail Jewelers' Association are mourning the death of Mrs. V. C. Morse, associated with her husband in the jewelry business at Ithaca, who passed away early this month. Mrs. Morse had always attended the State meetings of the association, and during the two years in which her husband was secretary she acted as his assistant, and, in fact did nearly all of the work of the office. She performed her duties in such an able manner as to win appreciation of the entire membership of the organization,

THE LATE MRS. V. C. MORSE.

and consequently the grief which they feel over her demise is profound.

Mrs. Morse, who was J. Olivia MacLaren, was born Oct. 7, 1874, at Flint, and was educated in the common and high schools of Muskegon, and later at the Normal College at Ypsilanti. She then went in for literary work and teaching, and for four years was principal of high schools in Elk Rapids and Paw Paw. She married Mr. Morse on Feb. 19, 1901, and came to Ithaca to live, and for the past nine years had capably assisted her husband in conducting the jewelry and music business in this town.

Deceased was a woman of splendid personality, and was loved by all who knew her. She was prominent in church work and in the women's fraternal orders, having been president of the Christian Endeavor Society and the Young Ladies' Missionary Society in Muskegon and a member of the Eastern Star, L. O. T. M. M. and the Court of Honor of the Woman's Social Club and for several years of the Coterie Club.

John W. Howes & Co. have opened an attractively furnished store in the County Savings Bank building, at Chelsea, Mass. A large vault encased in mahogany is situated in the rear. The arrangement of the show window is such that a full view of the interior of the store is obtained.

Providence Jewelers Ask Express Companies for More Favorable Terms and Better Service.

PROVIDENCE, R. I., April 2.—Pursuant to invitation from the transportation committee of the Providence Board of Trade, more than 150 business men, merchants and manufacturers of this vicinity gathered in the rooms of the board a few days ago to discuss the recent changes in express rates brought about by the absorption by the Adams Express Co. of the other companies. Among the number present were several of the manufacturing jewelers, and others interested in the industry. These included Fred D. Carr, of the Ostby & Barton Co., president of the Manufacturing Jewelers' Board of Trade; Everett L. Spencer, of E. L. Spencer & Co., chairman of the advisory board, and Harry M. Mays, of the Metal Product Corporation, chairman of the executive committee of the New England Manufacturing Jewelers' and Silversmiths' Association; Frederick C. Lawton, superintendent of the Gorham Co.; Edwin H. Thurber, of the Tilden-Thurber Co., Frederick W. Aldred, with the B. H. Bowring Co., and Edward Shepherd, of Shepherd, McAuslan & Troup.

The representaives of the express company in advance stated that they considered Providence one of the most favored cities in the country as regards express rates. The Attleboro, North Attleboro, Mansfield, Plainville and Pawtucket jewelers have for years been enjoying special privileges from the Earl & Prew Express Co. so that they might deliver their products in the New York and western markets on the same footing as the Providence manufacturers, the change of rate did not permit this. When asked why the Adams Co. did not continue the old policy, the representatives of the company said: "We do not consider that these towns are entitled to it; that is, if we were to continue differential rates for those places it would completely upset the company's schedule in other places."

It was claimed, in behalf of the express company, that the advance in the minimum charge for packages of 15 pounds and under from five cents, making the new rate 20 cents instead of 15 cents, was necessary for the sake of uniformity and to avoid loss, it being claimed that there is no profit in the present minimum rate. It was claimed that in this city actually received reductions to 68 rates of from five to 40 cents per 100 pounds, while there were advances to only 15 places.

Mr. Spencer called attention to the fact that the manufacturing jewelers were not interested in the 100-pound schedule, as the majority of the shipments by the jewelers were in small packages which are too valuable to be sent through the mail. Even on the 100-pound tariff, however, he pointed out that the new rule is unfavorable, as Earl & Prew had taken the packages at a lower rate by the boat route than Adams & Co. proposed, and received the packages hours after 6 o'clock, while the new rule provided the limit on these packages at 4 o'clock.

One of the express company's officials asked Mr. Spencer if the jewelers had rather ship their packages by boat than by rail.

Mr. Spencer replied: "Yes. When we can save 25 to 50 cents in actual cash by so doing and have our packages delivered in Maiden Lane, New York, by 10 o'clock in the morning, when sent by boat; whereas, they are not received until 2 o'clock when shipped by rail. The manufacturing jewelers suffer by this increase in rates more than any other industry because it is a rule of the trade to prepay all their packages."

Mr. Lawton said that the Gorham Co. had many grievances, some of which have been threshed out, but others have not been considered. The most important of these, he said, is the refusal of the express company to take express packages on the noon train. At present, he said, it is impossible to get a shipment to the south until a day later than formerly, as now there is only the midnight express for such shipments.

In reply Mr. Hinder, of the Adams Co., said that at the present time he had under consideration a daylight service to New York, which, he thought, would prove acceptable to all the shippers and business men.

Cincinnati, O., Firm Mystified Over "Restitution" of $1,000 by Alleged Former Employe Whose Dishonesty Is Not Remembered.

CINCINNATI, O., April 4.—Members of the Oskamp & Nolting Co. are considerably mystified over a draft for $1,000 received April 1 from "A. J. Black," who claims he was a former employe of the company and that he took this amount 17 years ago.

Charles A. Nolting, president of the company, said: "It is no April fool. The draft was issued by the First National Bank of South Bend, Ind., and was on a New York bank. The German National Bank officials at Cincinnati, to whom I presented the draft, made inquiry at New York as to whether the draft was good, and have received a telegraphic answer that it is."

The draft was accompaniel by a letter, saying:

About 17 years ago your firm had a loss of $1,000, of which I was the cause and got the money. It was a crooked deal and I was always sorry for it and made up my mind to pay you back. Am sending you the money by enclosed draft. I know that you ought to get interest, but I am not rich and have others depending on me. It has taken us many years to get this money for you, and I ask you to be merciful and forgive the interest so that I will not have it on my conscience any more. It has been a load all these years. You will have time to get this collected by Friday, and as a last favor I ask you to put this advertisement in the personal column, Sunday, April 3: "Black.—Money received; will forgive." If you do not get money in time put the advertisement in Sunday, April 10, because I only get the Sunday papers. Please forgive me and don't fail to relieve my mind.

P. S.—If you will not forgive the interest I will work on to pay it back to you.

Mr. Nolting said he did not remember any such a loss 17 years ago, nor does he remember any man who was in their employ 17 years ago who was named A. J. Black." The name must be a fictitious one. "We will surely forgive the man the interest, which at six per cent. would amount to $1,042," said he, "and I would be glad to shake hands with him, for I think there is good in him. How much better the world would be if all men listened to their consciences as faithfully as did this man."

Philadelphia Jeweler Identifies Man Arrested at Rochester as Swindler Who Operated Fraudulent Diamond Scheme.

ROCHESTER, N. Y., April 4.—Philip Teitelbaum was indicted, last week, on a charge of grand larceny, the complainant being Morris Lefkowitz. According to the story as told, the prisoner fraudulently induced Lefkowitz to part with $5,000.

Benjamin Silverman, of 705 S. 2d St., Philadelphia, Pa., came here several days ago and identified the prisoner as a man by whom he was defrauded about eight months ago. At that time, it is said, the prisoner used the name of Goldstein.

The supposed Goldstein invited the Philadelphia jeweler, according to the account as given, to a room for the purpose of buying $5,000 worth of diamonds. There was an intimation that the diamonds were cheap because they had been smuggled.

Silverman went to the room with the $5,000. Several men broke in, said that they were Secret Service agents and that the money, which they seized, was counterfeit. The jeweler was glad when he saw an opportunity to escape. Later he complained to the police, who told him that he had been swindled in an old game.

Louis Reeches, a baker of Wilmington, Del., has also been here in the last week and identified Teitelbaum, or Goldstein, as a man who took about $3,600 from him in a similar game.

Sam Eggargarin has been indicted for assisting Teitelbaum in the operations in this city. Two other men, Max Wasserman and Sam Levine, have also been arrested on the charge of being accomplices.

Canada Pleased with Tariff Arrangement with United States.

TORONTO, Can., March 31.—General satisfaction is expressed in trade circles over the tariff arrangement effected between the United States and Canada. The only provision directly affecting the jewelry trade is the reduction of the duty on watch actions and movements from 15 per cent. to 12½ per cent. As no movements are at present manufactured in Canada the change is regarded as comparatively unimportant, excepting in the case of importers who happen to have large stocks on hand.

It is felt, however, that any comparatively slight losses that may be occasioned by the change will be much more than compensated by the general stimulus to trade resulting from the settlement arrived at, as the uncertainty of the situation during the last few weeks and the fear of a protracted tariff war has been considerably felt as a disturbing element and has tended to make buyers conservative. Now that the peril has been averted a marked expansion in business is anticipated. The total value of watch actions and movements imported into Canada last year was $538,336, a considerable proportion of which came from Switzerland.

The awning in front of the retail jewelry store of Chas. A. Wolf, Topeka, Kans., caught fire one morning recently, but was extinguished before doing extensive damage.

Although true Black Opal is scarce, we have a notable stock in all grades received by us in a rough state direct from the mines and cut in our lapidary shop in New York.

Our prices are necessarily less than those obtaining in Europe and the fact that no two stones are alike makes this gem very attractive as a profit getter.

WE ARE SPECIALISTS IN BLACK OPALS

All the wonderful changing colors of the Solar Spectrum vibrate through "Black Opal," some in small pin point markings, others in harlequin, peacock and formal designs.

Some stones exhibit broad flashes of red, blue, green and purple while others exhibit cloud effects and sunsets such as Turner painted and only a Ruskin could describe.

A. Fink and Wife, Los Angeles, Exonerated After Examination Charge of Attempted Fraud.

Los Angeles, Cal., March 30.—A. and his wife were promptly discharge Justice Summerfield after their examin on the charge of attempted fraud bro by the Hartford Fire Insurance Co It be remembered that it was charged th and Mrs. Fink conspired to defraud th surance company by changing checks trunk, taking, it was alleged, about $1 worth of jewelry from it, concea g jewelry and then trying to recover ance.

The trunk, it will be remembered, checked to San Francisco by Harry Ad a salesman in Mr. Fink's employ. It alleged that Fink obtained posses the check and changed it for one w represented a suit case containing we apparel of little value and that Mrs went to San Francisco, had the trunk to her room at a small hotel, took a $11,000 worth of jewelry from the tr then checked the trunk back to San where it was afterward found by detect and left the hotel. The suit case was se Mr. Adams at his hotel. He at once ported to the railroad company the los the trunk.

The porter of the hotel, at which t alleged Mrs. Fink stayed over night, an expressman, who delivered the trun San Francisco, were brought here identified Mrs. Fink as the woman who the trunk taken to and from the hotel. T alleged that she wore colored goggles pretended to be unable to speak Eng speaking German only. To offset this t mony, however, the defense brought n than a dozen witnesses who testified Mrs. Fink was in Los Angeles at the t she was alleged to have been in San F cisco.

In the face of this overwhelming evid of an alibi the justice dismissed the The suit of the Southern Pacific Rail on a charge similar to that made by the surance company, is still pending.

Michigan State Board of Optometry n Session at Saginaw.

Saginaw, Mich., March 30 T S Board of Optometry is holding its first sion in Saginaw at the Bancroft Hotel was created by the act of 1909 Al i practitioners in the State are flocking for examination. Thus far about 70 ap cations for credentials have been filed. it is said by the Board that of this nu fully 200 will be disappointed and wil receive certificates.

The applications must be passed on May 1, after which time the State recognize no practitioner without a cer cate. The applicant pays a $5 fee $2 a year fee. The Board says the new will greatly raise the standard of the cians' profession in Michigan and eliminate a horde of men who have right to practice.

Death of George E. Goddard.

ITTSBURG, Pa., April 3.—George E. God-d, senior member of the wholesale jew-e firm of Goddard, Hill & Co., 237 Fifth ., died, yesterday afternoon, of pneu-nia at his home, 4747 Bayard St, fol-ing an illness of only a few days' dura-. Mr. Goddard was at his office last nday, but shortly after his arrival at the e he complained of feeling ill and re-ned to his home. He was suffering from ld at the time, and no serious develop-

THE LATE GEORGE E. GODDARD.

nts were anticipated. However pneu-nia soon set in, but his condition did not w alarming until an hour or two before death. Even on Saturday morning it s confidently expected that he would re-er.

Mr. Goddard was born at Nassau, N. H., years ago. His first experience in the welry business was with Thos. H. Kirk-trick, corner Duane St. and Broadway, w York, and he later came to Pittsburg a traveling salesman for the wholesale use of Scott & Hennegan, remaining with at firm for five or six years. In 1871 the me of the firm was changed to the Scott-rrett Co., the late George B. Barrett be-g associated with it.

In 1874 William Hodge, George Goddard d E. W. Hill formed a partnership as odge, Goddard & Hill, and in 1882 the m name was changed to Goddard, Hill Co., as it is at present known. Mr. God-rd had the distinction of being identified th the first wholesale jewelry firm of ttsburg, and was therefore one of the oneers of the business.

Mr. Goddard was well known among the siness men of Pittsburg, and was promi-nt socially as well. He was a member of odge 484, F. & A. M., of the Duquesne ub and the Pittsburg Country Club and the Church of the Ascension.

Deceased was married in October, 1889, Miss Maude Scott, a stepdaughter of S. Pinkerton. He leaves his widow and one n, Stanhope Scott Goddard, a junior at ale University and one of the youngest students in the university, and a brother, J. M. Goddard, New York.

The funeral will take place, Tuesday afternoon, from his late residence.

Goddard, Hill & Co. have occupied their present location in Pittsburg for many years. While no announcement has been made regarding the subject, the business no doubt will be continued just as it has been, the firm being well fortified to look after its business. The house enjoys one of the most lucrative trades in this territory.

Creditors of Edelhoff Bros. & Co. and Schickerling Bros. & Co., Refuse to Act on Conrad Schickerling's Charges.

A meeting of members of the Jewelers Board of Trade who are creditors of the bankrupt estates of Edelhoff Bros. & Co. and Schickerling Bros. & Co. was held, Tuesday afternoon of last week, at the room of the Board, 15 Maiden Lane, New York, subject to a written request made upon the Board by Conrad Schickerling, who stated that he desired to confer with the creditors in order to show them how a larger dividend could be obtained from the assets of Edelhoff Bros. & Co. and to discuss the present status of the litigation. He submitted two propositions to the meeting, neither of which was acted upon, and an adjournment was taken without anything definite having been accomplished.

The first proposition which Mr. Schickerling put forward was to the effect that there are assets amounting to $30,000 which represent a discrepancy between the merchandise in the possession of the firm of Edelhoff Bros. & Co. on Feb. 8, 1906, and the amount which was turned over to the receiver on Feb. 28, 1906, after the firm went into bankruptcy. This amount Mr. Schickerling claims had never been accounted for, and he declared that it was the duty of the creditors to investigate this matter. The other proposition was to the effect that he (Schickerling) had made a contract with Mr. Edelhoff, Sr., to put a stated amount of money into the corporation of Edelhoff Bros. & Co., which money had never been advanced to the corporation, and that the creditors should look to Mr. Edelhoff for this money.

The meeting was called to order by C. N. Gray, secretary *pro tem.* of the Board, who read the letter received from Conrad Schickerling, stating that he could show the creditors of Edelhoff Bros. & Co. how the assets could be increased. Mr. Gray called upon M. D. Rothschild, the president of the Board, to become chairman of the meeting. The chairman said that the meeting had been called to afford an opportunity to Mr. Schickerling to place before creditors represented by the Board facts by which Schickerling claimed the dividends of the estate could be increased. He then called upon Schickerling to state his case in mind.

Mr. Schickerling said that there was a shortage of $30,000 in the stock of Edelhoff Bros. & Co. about which no inquiry had been made by the trustees in bankruptcy of the Edelhoff estate, and that he had books of account to prove it.

Charles S. Mackenzie, the attorney for the trustee of Edelhoff Bros. & Co.'s estate, said that Mr. Schickerling's statement was false. He said that the trustee had investigated the assets of Edelhoff Bros. & Co. very carefully and had found that there had been a subscription of $100,000 common stock and $50,000 preferred stock, and that Mr. Schickerling gave notes for five years for $25,000 of the preferred stock and Gustave Edelhoff had given his note for the other $25,000 of the preferred stock; that the $98,000 of the common stock was represented by a slip of paper which read: "Conrad Schickerling to Edelhoff Bros. & Co., one lot of jewelry, $98,000." He said that only $1,000 in money had been subscribed to the corporation. He asserted that a week or 10 days before the failure of Edelhoff Bros. & Co. a large portion of the jewelry of Edelhoff Bros. & Co. had been pawned by Mr. Schickerling and that that accounted for a considerable amount of the discrepancy in the assets.

Mr. Schickerling claimed emphatically that the assets had not all been accounted for, and read several numbers from a stock book of which he said there was no record.

Mr. Mackenzie said that the books were kept in such shape that it was impossible to get a real estimate of the financial state of the business, and that the trustee in bankruptcy of Edelhoff Bros. & Co. had done everything possible to get back the greatest amount of assets.

Mr. Schickerling declared that the corporation of Edelhoff Bros. & Co. had been formed between himself and the elder Mr. Edelhoff, and that in a verbal statement Mr. Edelhoff, Sr., had agreed to advance funds to finance the business. He was, however, unable to produce any signed document bearing the name of the elder Edelhoff. He accused Mr. Mackenzie of representing Gustave Edelhoff as his attorney. Mr. Mackenzie explained this statement away by saying that he had been instructed by the creditors to get witnesses with which he could go before a judge in order to start an action against Mr. Schickerling, and that the paper which Mr. Schickerling produced substantiated the fact that he had taken Gustave Edelhoff as the complaining witness before a magistrate in order to take the necessary steps in the prosecution of Schickerling. He said that he had no interest in the Edelhoffs in any way and had never represented them in any capacity.

Mr. Gray asked Mr. Mackenzie if it were possible in any way to bring an action on the so-called agreement between the elder Edelhoff and Schickerling by which it would be possible to obtain further assets from the bankrupt estate. Mr. Mackenzie assured him that it would be impossible to do this.

After considerable stormy discussion on all sides the meeting adjourned without taking any action.

James Billings, who recently broke the window in the store of Geo. P. Wood, El Reno, Okla., has pleaded guilty to the burglary and was sentenced recently to two years' imprisonment in the penitentiary at McAlester. Only 35 hours intervened between the time of the commission of the crime and the passing of the sentence.

Samuel Frackman, Who Claims to Ha Been Robbed of $50,000 Worth of Diamonds, Examined in Bankruptcy Proceedings.

The examination in the bankruptcy p ceedings against Samuel Frackman, a ma facturing jeweler and diamond dealer at Maiden Lane, New York, was co int Thursday afternoon before Commissi r Alexander in the United States Distr Court, and, as was the case in the fi hearing, the court room was filled w jewelers who were interested in the come of the proceedings. Frack claimed to have lost $50,000 worth of d monds in Chicago. The report of the was followed by an involuntary petit n bankruptcy against the jeweler.

The first witness at the last hearing w Joseph Frackman, son of the alleged ban rupt, who testified that he had been traveling salesman in the employ f father for about three and one-half yea and that prior to that time he had wor k in the shop. He said that he left New Y on his last trip west about Jan. 20, taki with him a regular stock of jewelry, wh he estimated to be valued at about $20,0 His first stop, he said, was at Clevelan where he made some sales, and from t he went to Detroit and later to St. Lou where he met his father. He said that discussed business affairs with his father that time, but that no inventory of the st which he had on hand was made at a time after he left home. After visiting S Louis he went to Kansas City and oth western cities and started for home arri ing in New York March 24. He said th he notified the New York office of ev transaction he made, and that he had little over $500 in cash when he start d f home. He explained that he had with h one jewelry grip with about 15 trays in and some reserve stock in his trunk.

The witness testified that he had noth to do with the business end of the N York office, and had never paid any atte tion to the books. Mr. Blumberg, the e amining attorney, showed him a ledger a asked him if he ever saw the book bef re. He replied that he thought he had see t book, but that he had never seen anyb d making any entries in it. He was que tioned further in regard to what he kne of the office management, and the attorn then turned his attention to the trip whi the witness had taken after the bankrupt proceedings began in company with his a torney to Chicago.

Young Frackman was asked to re ate th conversation which occurred betwee h attorney, a man named Leo Weiss, an himself during the interview with M Weiss. To this the witness' attorney ob jected strenuously, but the objection w overruled. The witness then went on t testify that when they had reached Chicag they telephoned to Mr. Weiss and met hi in the corridor of the La Salle Hotel, an that the three of them were together fr m 12 until four o'clock in the afternoon an that they discussed the visit which Wei s and the witness' father had made to th Central police station. He said the po ce chief wanted his father to give a nam when the loss was reported, but this wa

t done. He was asked what was said out Mr. Weiss reporting a loss of $5,000 d afterward making it $50,000. The wit-ss in reply to this question said that Mr. eiss first reported a loss of over $5,000, d later made a different report.

e next witness was Attorney J. H. er, who represents Samuel Frackman and rest of the Frackman family. He was estioned by Mr. Menken relative to the p to Chicago, on which he was accom-ied by Joseph Frackman, and then en-d a lively tilt between the two attorneys regards the testimony which it was de-d that the witness should give, Mr. Baer ng back upon his right to refuse to swer questions which related to matters erein he was acting in the capacity of nfidential adviser.

Samuel Frackman, who was the next wit-ss, was first questioned by Mr. Menken ut a statement bearing date of January, 09, and was shown a copy of the state-nt and asked if it was a correct render-g of his financial standing at that time testified that he could not tell whether not he was worth $42,000, as shown by statement in January, 1909, unless he w such a statement signed by himself, and t if such a statement existed that he s worth that amount at that time. He mitted to liabilities of between $130,000 d $140,000, and said that he considered t the assets in the hands of the receiver re worth over $100,000 to him.

Upon the diamonds which he claims that lost he placed a valuation of between ,000 and $65,000, but did not make an act statement as to their value. He said t he had been selling diamonds for about ir years, but that he had never sold any New York and that he sold none on his t trip west. He was questioned about e jewelry sales which he had made on his t trip and about the sale of diamonds on previous trip. He said that he had be-een 16 and 18 packages of diamonds with n on his last trip, and that they varied size and quality.

The witness was shown a ledger and estioned at some length in regard to this ok. He testified that he did not know here the book was purchased, and other count books which were produced and wn him he said he did not recognize. ked when the ledger was purchased, he d he thought it must have been as long o as the first entry which appeared in the ok, which was in 1907. His attention was lled to the stamp of a stationer on one of books. He testified that he did not re-mber going into the stationery store on n St. about a month ago and buying oks. His attention was called to the fact t on the inside cover of the ledger the mp of the stationer had been scratched t, and he was asked who did this. He d he did not know.

The attorney discontinued his questions out the books abruptly and interrogated the tness in regard to a visit which he made S. Pian, of the S. Pian Time Payment welry Co., of St. Louis. He was asked if did not tell Mr. Pian when he visited n that he had no diamonds with him at time, and if he did not tell Mr. Pian t he intended going from St. Louis to braska. To both these questions he de-nied having made the statements. He admitted that he had purchased from Mr. Pian over $6,000 worth of diamonds at that time.

The examination was discontinued at this point and an adjournment taken until tomorrow morning at 10 o'clock.

An answer to the petition in bankruptcy against Samuel Frackman was filed, last Friday, in the United States District Court. The answer, while it does not deny insolvency, denies the acts of bankruptcy alleged in the petition or any acts of bankruptcy within the purview of the bankruptcy law.

The answer sets forth that the alleged bankrupt has paid no creditors with intent to prefer them within four months of the filing of the petition and has assigned no outstanding accounts within that time, nor has he concealed any property whatsoever, it is set forth. It is also stated that Reuben Samuels and Henry E. Freeman, two of the petitioning creditors, are not now creditors of the alleged bankrupts, but that any notes held by them are so held in trust for Nebenzahl & Munk and were transferred by Nebenzahl & Munk for the purpose of enabling Nebenzahl & Munk to file the petition against the alleged bankrupt. The answer was filed by Crane & Baer, attorneys for Frackman.

Following the hearing before Commissioner Alexander, a meeting of the creditors of Mr. Frackman was held, Saturday afternoon, at the Astor House to discuss the situation and, if possible, to arrange for a satisfactory settlement between Frackman and his creditors. There were about 30 creditors represented or present at the meeting, and a great deal of time was taken up in an informal discussion as to what was the best course to pursue.

The meeting finally organized with Mr. Levinson, of Levinson & Friedlander, as chairman, and the bankrupt, his son and their attorney were requested to withdraw while the meeting discussed the situation. Several suggestions were made as to the most feasible plan of a possible settlement. It was finally decided to make a proposition to Mr. Frackman that he settle with his creditors at 40 cents on the dollar—10 cents in cash in 10 days after the acceptance of the settlement by all the creditors, 10 per cent. cash in 60 days after the first payment and the balance on notes for three, six and nine months, payable in instalments of five per cent., 10 per cent. and five per cent., with guaranteed indorsements besides that of Joseph Frackman, a son of the alleged bankrupt. Mr. Frackman was to stand the expense of the litigation.

The jeweler and his attorney were recalled and the proposition made to them, and the proposed settlement was finally agreed to. The creditors impressed it upon the alleged bankrupt that this was his last opportunity to effect a settlement of any kind, as strong interests were inclined to prosecute him. The proposition of settlement was made simply as a suggestion which would be submitted to the committee of creditors and was not to be official unless sanctioned by all the creditors.

Joseph Frackman, a son, spoke to the creditors, telling them that he was willing to give up everything he had and to work two years for nothing in order to help out his father.

An agreement was drawn up containing the settlement proposition as set forth and was signed by a large number of those present.

Manufacturers of Minneapolis, Minn., Contemplate Organizing for Mutual Benefit and Protection.

MINNEAPOLIS, Minn., March 30.—Some months ago Ernest A. Kirchner, of Kirchner & Renich, suggested the formation of a local importers' association and since that time the proposition has been growing in favor. Both the retail and wholesale jewelers have associations, but the manufacturing jewelers are without organization, and it is pointed out that there is need of something of the kind.

Aside from promoting good fellowship and a better understanding among the manufacturing jewelers, it would be of practical advantage, it is claimed, for the members if the association could warn each other against giving credit to unreliable concerns, whereas now this class has a good chance to play upon the manufacturers because when one loses money through giving credit he says nothing to his competitors about it. B. R. Schwarz has suggested that the proposed association hold regular monthly meetings.

Another move which would tend to promote unity of feeling among the manufacturers, as pointed out by Mr. Schwarz, would be to have all the manufacturing jewelers located in one building. Many of the office buildings of the city will not accept manufacturing jewelers as tenants, as they claim the noise and dirt incident to the work of manufacturing jewelry would annoy tenants in the building. The centralization of manufacturers would also, it is contended, be a great convenience for buyers.

John Zakewitz, Hastings, Pa., Jeweler, Falls Under Train and Is Killed.

HASTINGS, Pa., March 30.—John Zakewitz, a jeweler of this place, fell beneath the wheels of a passenger train to-day and was ground to pieces. He had said goodby to friends and leaped off, but fell under the wheels and was cut to pieces.

Deceased, who was a Lithuanian by birth, had been in business here three years, and was well known and highly regarded. He succeeded to the business of Geo. Hicks in 1907 and continued alone, but carried little stock. He was a practical man, a good workman and, in addition to his watch repairing, acted as interpreter for the Poles and Lithuanians in this vicinity.

Henry C. Pitz, Kalamazoo, Mich., has just started in business in his new location, opposite the Fuller Theater. The interior is equipped with mahogany fixtures and every modern storekeeping device.

The Kuehl Clock Co., 80-82 Wabash Ave., Chicago, has just completed a handsome catalogue which it is sending free to the trade. The book is printed on heavy calendered paper, nine by 11 inches, and its 64 pages contain many fine illustrations of clocks for all purposes.

The Men Accused of Many Robberies mp Their Bail After Bonds Had Been Reduced.

e police of New York are still search- r the three men wanted for a number welry burglaries in Boston and nearby , who disappeared from the metropolis veek after securing bondsmen to go on bail bonds. The bail was reduced $10,000 to $5,000 in each case on ap- on of an attorney. The prisoners to appear when their cases were called Thursday morning in the Jefferson Police Court and Magistrate Bar- declared the bonds forfeited.

s A. Sachs, the attorney who ap- for the alleged burglars, was certain his clients were endeavoring to find ds to prove that they could not have into a jeweler's safe in Boston on 28 because they were, it was claimed, w York at that time. He also told court that he believed that the men d be located within 48 hours, but his proved groundless.

nsiderable excitement was caused at headquarters when it became known the three men had failed to appear e the magistrate. Samuel L. Ullian, of n, who identified two of the men as nes who broke into his safe and got with $12,000 worth of jewelry and had fied as one of the missing articles a found on the third, was very much erted as were the other complainants. feelings of the two bondsmen who took es with their $15,000 can also be better ned than described.

e police in this city do not share At- y Sach's belief that the missing men be found. They say that the ex- oners who gave the names of Joseph G berg, Harry Rothstein and Jacob Gold- , were known to them as "Red Tracy," Smith" and "Itzky, the Mouse." The e say that Smith, while serving a term renton, N. J., invented the "can opener" h makes it easy for crooks to break into fe. This instrument has a powerful rage and once a hole is bored in a safe through steel. It works like a can er. Detectives Duggan, Kinstler and arrell, of the Central Office, have st ed in to do their work all over again. spector M. J. Morrisey, of Boston, was last week with Samuel E. Ullian, the B on jeweler. Benjamin Sarason, New en, Conn., whose store was broken open an. 15 and jewelry worth $9,000 stolen, Max Mayer, a Philadelphia, Pa., jew- who suffered a burglary about Feb. 1, n he was robbed of $9,000 worth of ables, were also interested in the out- e. Rings, watches and stick pins which been found in the Goldberg house at Goerck St., New York, or had been re- ed at pawnshops, were recognized as nging to the jewelers. The arraignment he men was awaited with interest and officers from the different cities were y with requisition papers. All were much perturbed when the attorney for alleged burglars told the magistrate his clients had disappeared.

agistrate Barlow explained that it was ely within his right to reduce the bail, n the matter of a felony it is entirely retionary with the committing magis- trate as to what amount of bail is acceptable.

Attorney Sachs stated that of all the so-called loot which was recovered only one watch had been identified and said that it was unjust to criticize Magistrate Barlow for reducing the bail. He added that there was grave doubt in his mind that the prisoners would have been turned over to the Boston authorities as he considered there was not enough evidence against them.

The Central Office detectives claim that they had a clear case against the prisoners and that it would have been easy to convict them on all three counts.

According to the detectives, Joseph Goldberg was the brains of the gang. They claim that he has $60,000 in cash stored away in a safe deposit vault. The police say that two of the men have police records and that one of the Goldbergs is wanted in Cleveland and Chicago.

A reward of $500 is offered for the capture of the fugitives.

Engravers' Art Club Holds Eighth Annual Exhibition and Banquet at New York.

The eighth annual exhibition and dinner of the Engravers' Art Club of New York, which was held Saturday evening at Allaire's Hall, 192 Third Ave., proved to be one of the most enjoyable social events in the history of the organization. Over 100 members and guests of the club were present to view the exhibit and enjoy the dinner. The larger part of the club's membership is composed of general letter engravers employed by leading jewelers and silversmiths in New York; but men engaged in the kindred trades are eligible for membership.

The exhibition of the club was held in a room adjoining the banquet hall and comprised some excellent specimens of the handiwork of different members of the club. It included examples of engraving, stationery, bank note work, illuminating, stamping, die engraving, wax casting, steel engraving, etc., and was of general excellence. One of the most novel exhibits was that made by C. E. Rauh, who is engraver with Black, Starr & Frost. One of his exhibits consisted of the alphabet and his name engraved in block letters upon the head of a pin. The pin was displayed beneath a powerful microscope. The letters showed clear cut and distinct. He also had several other exhibits of merit. Some of the steel engravings exhibited were of much interest, as were numerous other examples of varied handiwork.

About an hour was spent in viewing and discussing the various exhibits, at the end of which it was announced that the banquet was ready and the members and guests were ushered into the hall, where they found tables arranged for the accommodation of all. At the head table were the officers of the society and the guests of the evening. The others present found their seats informally and the waiters were soon busy with their part of the evening's duties.

When coffee was served President M. A. Doherty rapped for order with a huge "graver" and welcomed the assemblage in a few well chosen words, in which he voiced the pleasure of the society at seeing so many present and spoke in commendatory terms of the exhibition. The other speakers of the evening were: Joseph Little, manager of the Maiden Lane store of the Gorham Co.; George A. Hollis and Nicholas Tommins, the latter making a presentation speech to R. L. Clark, in which he tendered to him a beautiful clock, on behalf of the society, in recognition of his work in engraving the invitations. The work on the invitations was some of the finest ever exhibited by the club.

The rest of the evening was given over to a varied entertainment. A professional man of mystery kept the engravers guessing with his feats of magic, while monologue and musical numbers met with equal approval.

The club meets twice a month and the officers of the organization are: M. A. Doherty, president; George Levind, vice-president; W. Koch, secretary; C. J. Kuhr, treasurer. The committee in charge of the banquet was A. F. Lang, chairman, assisted by E. Bereck.

Just before the speeches began a photographer took a picture of the gathering.

The banquet ended about midnight.

Watches Stolen While in Transit to Waltham Watch Co.'s London Office Had No Dials.

Robbins & Appleton, the selling agents of the Waltham Watch Co., Waltham, Mass., have sent out to the trade a letter anent the recent theft of over 2,000 Waltham watches, reported in full in the last issue of THE JEWELERS' CIRCULAR-WEEKLY. As the movements were without dials they may be recognized in this way. Also if the thieves try to buy dials for them the trade is asked to be on the alert for any such orders and report the same. The letter reads:

"A recent shipment of Waltham movements made by the Waltham Watch Co. to our London office, via Austin, Baldwin & Co., forwarders, New York, has been stolen. These goods were shipped from Waltham, March 9 and 12, respectively, the two shipments aggregating 2,067 movements. These movements, which were stolen in New York, were without dials.

"As the goods have not yet been located, we are writing to request that should you have any unusual orders for dials that might lead you to think that they were intended for these movements, or know of any such orders, we will thank you to please advise us and to be on the lookout for the same.

"Thanking you for your co-operation with us in this matter, we beg to remain,

"Yours truly,

"ROBBINS & APPLETON."

S. L. Diehl, Pen Argyl, Pa., is renovating his retail jewelry store in which he is making many improvements.

The Hotchkiss Jewelry Co., Jackson, Tenn., has just placed a large electric regulator in the front of its establishment for the convenience of passers by. The concern has completed arrangements for the installation of a large new safe in the store, which is unique owing to its small size. The dimensions are 12 by 28 feet.

The Quality of Our Jabots Will Interest You

(PATENT APPLIED FOR)

All indications are that jabots will be worn more extensively than ever this season; and "The Psyche Bow," designed by our own artists, will appeal instantly to your best trade.

The pin in exclusive patterns is made in 14 karat gold, mounted in pearls, diamonds, sapphires, topaz and numerous other attractive combinations. The bow is made of imported moisture proof Maline, and it always looks crisp and clean.

Our Patent Clasp Is An Important Feature

of the Psyche Bow. It opens easily by turning a button at the back. The bow can then be removed, and the pin makes a beautiful hair ornament, or another jabot can be substituted.

One number from our extensive line is illustrated—note the individuality of design and quality of workmanship. Exceptional value is given in our prices that range from $20.00 upward. Place a sample order of these jabots to-day or write us for complete information.

HOWARD & COCKSHAW, 218-220 FOURTH AVENUE NEW YORK CITY

Reward of $500 for Capture of Sneak Thief Who Robbed Louisville, Ky., Jewelry Store.

LOUISVILLE, Ky., April 1.—The police department of this city is offering a reward of $500 for the arrest of Harry Freeman, who is said to be known by the names of Herman Diehn and Frank Chapman, and who is believed to be the man who stole $3,000 worth of jewelry yesterday from the store of Rodgers & Krull, jewelers on Fourth and Greene Sts.

About 12:45 P. M. yesterday a sneak thief stepped up to a show case and got away with a tray containing over 30 valuable diamond and gem-set rings. The police since that the man was identified as Freeman, and have sent out circulars with a picture and description all over the country, with the request that anyone having any information about him or the missing jewelry wire at once to John P. Carney, chief of detectives, of this city.

SUSPECTED OF LOUISVILLE, KY., JEWELRY ROBBERY.

The method of the robbery was peculiar. There were most of those in the store were at the front, and while Mr. Krull was waiting on a customer in the rear of the store, the man who had been seen loitering in front of the store for several days entered unobserved and rolled on the floor under the counter, which is raised some distance above the floor. Reaching up, he opened the case containing the diamond rings and secured a large number. Rolling out toward the door, he regained his feet, but was then seen by Mr. Krull, who ran toward the door. The robber had lost himself in the crowd, however, and the best that Mr. Krull could do secured was a fair description of the man.

Chief of Detectives Carney was notified and put every man in his department to work on the case. Following the identification of a picture taken from the rogues' gallery, as that of the thief, circulars containing the photograph and a detailed description of the articles taken were sent all over the country. A reward of $500 was offered for the arrest of the thief. Chief Carney said to the Louisville correspondent of THE JEWELERS' CIRCULAR-WEEKLY that he believed his men would succeed in effecting a capture.

Rodgers & Krull moved into their present quarters at 518 S. Fourth Ave. only a few months ago from 425 Fourth Ave. Their store is one of the most beautiful in the south, and was evidently selected by the thief as one which would repay him for his effort. The members of the firm refused to discuss the case, further than to confirm the story of the robbery and to say that it had been reported to the association.

The missing man is described as follows: 30 years of age, five feet six inches high and weighs from 126 to 130 pounds; he has a smooth-shaven face, dark hair, brown eyes and a sallow complexion. On the day he disappeared he wore a dark suit of clothes, soft Alpine hat, black bow tie and a high turn-down collar.

The more valuable of the stolen pieces are described as follows: Gent's ring, three diamonds; gent's ring, one diamond center, two pear-shaped rubies; gent's ring, one emerald center, two small diamonds; large marquise ring, rubies through center and diamonds all around; pearl center ring, diamonds around; pearl center ring, in a laecy platinum, small diamond set around setting pearl, sets high; sapphire and diamond cluster ring, sapphire in center, diamonds around and set in platina; pearl and diamond cluster ring, one pink pearl, one peacock green and small diamonds; pearl and two diamonds, set in gold; pearl and six diamonds, set in platina; opal, diamond and olivine, set in gold; all-diamond cluster; all-diamond cluster, set in platina; sapphire and diamond circle ring; opal and diamond cluster, opal center, set in gold; opal and diamonds, set in gold; gent's ring, single diamond; princess cluster diamond ring, all diamonds, set in gold; princess cluster diamond ring, all diamonds, set in platina; princess cluster ring, three pearls in center; princess cluster ring, three rubies in center; princess cluster ring, four rubies in center; princess cluster ring, four pearls in center; gent's ring, ½ carat; ladies' ring, all diamonds, one large stone out of ring; ladies' ring, pearl center and diamonds.

The balance of the rings are solitaire stones, running from 1 2/4 to 1¾ carats each.

Games Rolled by the Jewelers' Bowling League of New York.

The following were the scores of the teams of the Jewelers' Bowling League of New York in the games rolled last week at the Universal alleys, Brooklyn:

Cecil Kline has begun business at Oxford, Wis.

John Hoffman has opened a new store at San Diego, Cal.

A. Von Sederholm is preparing to open a store at Petaluma, Cal.

Chas. Raal has begun business at 3659 Nebraska Ave, St. Louis, Mo.

The Anderson Jewelry Store has just been opened at Long Beach, Cal.

Robert W. Hitchcock, formerly of Manton, has opened a store at Honor, Mich.

Marcus Shapiro and Mr. Reuben are opening a store at 113 W. 7th St., St. Paul, Minn.

J. Bial has engaged in business at 32 Maiden Lane, New York, as a diamond setter.

Fred Stecher, Hibbing, Minn., will open a first class watch repairing shop at Nashwauk, Minn., about April 15.

C. A. Carver is a new jeweler in Lake Butler, Fla., having recently gone there from Bowling Green, in the same State.

Max Baskin, formerly with the Carl Entemann Jewelry Co., has gone into business for himself in the Broadway Central building, Los Angeles, Cal.

A. S. Mark is a new jeweler located at 601 Baltimore Block, St. Paul, Minn. The business is conducted under the name of the Manhattan Jewelry Co.

Segman & Abrahams is the name of a new concern which recently started in business at 45 John St., New York, to make platinum and gold mountings.

Robert W. Hitchcock has opened a new store at Honor, Mich. Much of the stock for his opening was purchased in Detroit. Mr. Hitchcock was formerly with W. L. Campbell, at Manton.

Jewelers' Gold Bars Withdrawn and Exchanged at New York.

Week Ended April 2, 1910.

The U. S. Assay Office reports:

Gold bars exchanged for gold coin	$438,671.86
Gold bars paid depositors	89,827.97
Total	$528,499.83

Of this the gold bars exchanged for gold coin are reported as follows:

March 28	$89,508.63
" 29	103,563.93
" 30	71,887.99
" 31	20,221.79
April 1	102,213.92
" 2	51,415.60
Total	$438,671.86

As president of the Wholesalers and Manufacturers' Association, W. C. Noack, of Noack & Gorantlo, Detroit, promises to take part in the settlement of the street railway question. He is a member of the mayor's committee to draw up a street railway settlement plan and the Wholesalers and Manufacturers' Association has now indorsed the idea of a settlement at once. The matter will go to popular vote.

Tiffany & Co. Win Celebrated Pearl Case on Appeal.

United States Circuit Court of Appeals Holds Guggenheim Pearls Were not a Necklace and are Dutiable at 10 per cent.

A decision in favor of the importers was handed down yesterday by the United States Circuit Court of Appeals in the case of the United States against Tiffany & Co., New York, arising over the classification of 59 pearls purchased in Paris by Morris Guggenheim and imported by the New York house. The brief decision of the court is as follows: "We come to the same conclusion in this case as in our former decision in Citreon *vs.* the United States (116 F R—693). Judgment affirmed."

The pearls, which cost $25,000 exclusive of the duty, were intended for Mrs. Guggenheim. They were first assessed for duty at 10 per cent., and 10 months later the entry was reliquidated, the Government claiming 60 per cent. duty on the contention that the pearls were actually a necklace, though unstrung at the time of transportation.

The case had been in the courts for a number of years. After a long fight on technical grounds Tiffany & Co. finally paid the 50 per cent. extra duty and filed the usual protest, claiming that the original classification and assessment of the Collector was correct. The Board of General Appraisers reversed the action of the Collector and sustained the claim of the importer, holding that the pearls were dutiable at 10 per cent. On review, the United States Circuit Court affirmed the Board's decision and an argument was heard last month on the appeal from this decision, the final decision being reserved at that time.

The Government, which was represented before the Circuit Court of Appeals by Charles D. Baker, of the Assistant Attorney-General's office, argued that the Court should uphold the assessment of 60 per cent. made by the Collector on the ground that the pearls were assorted and matched to form a necklace, and consequently fell within the provision of the paragraph for jewelry as the word is used in the revenue act. Arthur M. King, who appeared for Tiffany & Co., urged the Court to find in favor of the 10 per cent. duty on the theory that the pearls were "pearls in their natural state," as specified in the tariff act. He argued that no part of the purchase price, which was approximately $25,000, was paid abroad. Mr. Guggenheim bought nothing but the pearls in Paris, no pique brilliant and no clasp, and that his contract in Paris was for 59 pearls and not for a complete necklace. He pointed out that the pearls were not strung in the form of a necklace, that they were simply put, after the consummation of the contract, on a cotton string to compare them with others.

Mr. King, the successful attorney in the case, in commenting upon the outcome of the litigation, yesterday, to a reporter of THE JEWELERS' CIRCULAR-WEEKLY, said that he did not believe the Government could ask for a writ of certiorari under Sec. 29 of the new tariff act, effective Aug. 5, 1909, which provides for a United States Court of Customs Appeals, in which, unless an application is made for a writ of certiorari within six months of the passage of the law to review any case heretofore decided or now pending, there is no further recourse. He pointed out that the time limit for an application under this section ended Feb. 5, 1910.

The entire stock of jewelry of the Gaffney Jewelry Co., Gaffney, S. C., has been scheduled to be sold by the receiver, D. C. Ross, to the highest bidder, April 14. Bidders are requested to deposit a certified check for $250, which will be returned in case the offer is rejected. The stock inventories, it is claimed, at over $4,000, and of this nearly $1,000 represents solid gold jewelry.

National Monthly Import and Export Statistics.

WASHINGTON, D. C., April 1.—The records of the Treasury Department contain the following comparative statistics of interest to the jewelry trade for February, 1910, and for the eight months ended February, 1910:

Cephas A. Rogers, the aged manufacturer of Meredin, is in a condition at the Washington Un Hospital, in Washington, suffering juries sustained by being run automobile March 29. Mr. Roger his wife, was returning north after through the south, and had st Washington to attend the Wesleya lege banquet. He was returning ir banquet to his hotel at the time cident. The driver of the mach appeared after the accident.

Benjamin Sarason, a jeweler St., New Haven, and Detective Ja Ward, were present with requisition togcther with officers from Bost Philadelphia, when it was learned that the three men named Jose Jacob Goldman and Harry Rot spectively, had mysteriously disap after having their bonds reduced fr 000 to $5,000 each the night be re son's safe was broken open and rob about $5,000 worth of jewelry In flight the men left behind several bu implements which are still held at quarters as evidence.

Involuntary Bankruptcy Petition i Against W. H. Booth, Sioux F s, S. Dak.

SIOUX FALLS, S. Dak., April 2.— voluntary petition in bankruptcy w March 30 against Willis H Booth, Falls. No statement as to the ass liabilities are as yet at hand.

Mr. Booth first started in busin 1882. He became involved in 1895, business fell into the hands of his b C. C. Booth, for whom he conducte manager until 1899.

In honor of his appointment as po ter of Grand Forks, N. Dak. the 24 Club, composed of jewelers of Grand recently gave a banquet to F V K the Frederick. Max Rabinowich s dent; Paul Girard, vice president, K. Munro, secretary, of the club

The J. E. McCourt Jewelry Co., l ton, Mich., and Hamel & Rochrig hav solidated. The business will be co as the McCourt, Rochrig, Hamel Co incorporation takes in the McCourt at 101 S. James St., the Hamel & R store at 117 S. James St. and the Se branch operated by Mr. McCourt

Buffalo, N. Y.

N. Austin, a jeweler of North Collins, N. Y., has been ill at Lexington Heights Hospital.

Among the Buffalo jewelry traveling representatives in town this week were: Dreytuss, S. L. Levy, Max Fineberg and Herman Slohm.

Among the jewelers who recently visited the Buffalo market were: O. C. Blount, Comstock, M. J. Engelbert, Rome; and W. Hagemate, Elmira, N. Y.

Joseph Max, of Petersen, Max & Co., wholesale jewelers, who recently went into business at 394 Ellicott Square, has returned from a successful busines trip through New York State and Pennsylvania for Messrs. Randecker, Lipsett and Shattuck, travelers for King & Eisele, have returned from their Spring trips. A corps of reporters and decorators were busily engaged at King & Eisele's plant, last week. According to a report from Niagara Falls the Aluminum Company of America has made application for a permit to erect a $1,000 addition to its No. 3 plant on the bank beyond the Hydraulic Power Canal in that city. It is intimated the plant may be used as a rolling mill.

Medals and trophies furnished by Tiffany & Co. were recently presented to the members of the 65th Regiment Infantry in this city. Among the recipients was Captain Gustav Frisch, of Frisch Bros., Genesee St. jewelers. Mr. Frisch is a member of Company K and has received a medal for 10 years' faithful service.

The Buffalo Chamber of Commerce and Manufacturers' Club, of which local manufacturing jewelers are members, are planning to form an energetic convention bureau. It is believed that this city will become the mecca for national assemblages. The presence of thousands of visitors would naturally help the business of many local jewelers.

At a meeting of the Buffalo Optometrical Society at the Lafayette Hotel Friday evening E. V. Syrcher was chosen chairman of a committee appointed to prepare a code of ethics for local optometrists. Mr. Syrcher was also named temporary secretary to assume the duties of Julius Hansen, regular secretary, who will be in New York on business for a time. Mr. Syrcher entertained some members of the society at his home Wednesday evening. Dr. Cott, of Buffalo, will probably address the next meeting.

The Buffalo Retail Jewelers' Association met at Petersen's Hall, Thursday evening. In the absence of President Zilliox the session was called to order by Louis Schutt, former secretary. After some minor business was transacted the members engaged in bowling. The meeting was well attended. Several members and their wives will be present at the convention of the New York State Retail Jewelers' Association in Rochester, May 26-27. Much enthusiasm over the Flower City meeting was manifested. Several of the Buffalonians will remain in Rochester for Decoration Day.

Among the travelers who recently called on Buffalo jewelers were: E. B. Downs, Hayden W. Wheeler & Co.; Herbert R. Morss, R. Blackinton & Co.; S. A. Lynch, William B. Kerr Co.; J. Laffey, Gorham Co.; J. D. Varley, Allsopp Bros.; Morris Weil, Charles A. Paine, Macpherson-Roubaud Co.; Wm. T. Loud, International Silver Co.; A. B. Mensing, Wilcox & Evertsen; Carl H. Weidemann, M. De Dilectis & Co.; Mr Kraus, Steeber-Kraus Co.; Geo. W. Beardsley, Allsopp & Allsopp; Henry Freund, Henry Freund & Bro.; L. H. Smith, Bippart, Griscom & Osborn; A. E. Darby, Adolphe Schwob; James R. Palmer, Henry A. Kirby; W. S. Noon, Corey, Clark & Noon; R. Wakefield, Burstow, Kollmar & Co.; Russell A. Talbot, Alvin Mfg. Co.; E. H. Hough, Jennings Bros. Mfg. Co.; G. S. Bedient, Rogers Silver Plate Co.; F. W. Juengling, Sessions Clock Co.; L. Rockwell, Poole Silver Co.

Lancaster, Pa.

Herbert Shiffer, late with Louis Weber & Son, has taken a position as watchmaker with W. K. Rebert, York, Pa.

Parke Morris, Savannah, Ga., stopped over in Lancaster a few days last week, en route to New York on business.

James D. Fowler has gone to Chicago to spend a week with his parents before proceeding to the Pacific Coast on a business trip.

John L. Winters, who went west a couple of weeks ago to look for a desirable business location, writes home that he expects to open a shop at Denver, Colo.

G. William Reisner, manufacturing jeweler, visited West Chester on business last week, and John B. Roth, Jr., another manufacturing jeweler, visited Lebanon, Pa.

F. A. Huber and James B. Roumfort, traveling representatives of the H. S. Meiskey Co., spent the Easter holidays in Lancaster and are now on their respective routes.

Emanuel Seibel, Greensboro, Pa., has taken a position as watchmaker with Louis Weber & Son, and Frank Hoeffner and Stephen Meier have entered the employ of the same firm.

The 50 beautiful prizes given in last Thursday's big euchre for the benefit of the General Hospital were on exhibition several days of the week in Aug. Rhoads' jewelry store, where they attracted much attention.

A. R. Simpson, a former watchmaker of Lancaster, who went to Chicago from Pittsburg, where he resided two years, died in the former city last week of pneumonia, aged 39 years. He leaves a widow and child.

Charles E. Foose, one of the traveling representatives of the Non-Retailing Co., returned home, on Wednesday, from Atlantic City, where he and his wife spent a short vacation. He is now on an extended trip over his territory.

Rev. Dr. Joseph H. Dubbs, father of T. Wilson Dubbs, died, April 1, after a long illness. He was, since 1875, one of the faculty of Franklin & Marshall College, and was one of the eminent clergymen of the Reformed Church, a scholar and author.

Benjamin G. Kaplan, Williamsport, Pa., stopped over in Lancaster, last week, to see his brother-in-law, Benj. Lichtenstein, while en route to New York to purchase fixtures and stock for another store he is about to open at 114 Market St., Williamsport.

Harrison Lippy, of the Ezra F. Bowman Technical School, has returned there after spending four weeks at Sunbury, where he went to assist E. H. Shipman. Miss Ruth Jones, who was a student in engraving at the school, has returned to Martinsbury, W. Va., where she has taken a position with her father. The basketball team of the school held a banquet the evening of March 30 at the Wheatland Hotel to celebrate the close of a successful season.

Among the jewelers who recently paid a visit to Lancaster were: B. H. Potthoff, Carroltown, Pa.; J. H. Sensenig, New Holland, Pa.; H. Snyder, with W. N. Levy, Altoona, Pa.; Allen Kirk, Quarryville, Pa.; John Goll, with A. K. Brubaker, Columbia, Pa.; Charles G. Rhoads, manager of the Mifflin County Jewelry Co., Lewistown, Pa.; Noah L. Parker, Baltimore, Md.; D. G. Saylor, Richmond, Va.; T. J. Carson, Pittsburg, Pa., and S. C. Zook, Cleveland, O.

Among the traveling representatives in Lancaster, recently, were: Fred J. Classen, Quaker City Cut Glass Co.; George M. Kite, M. J. Averbeck; Sol. Sickles, M. Sickles & Son; Chas. Coates, Jr., L. P. White & Co.; R. A. Tallbot, Alvin Mfg. Co.; Lew. Fleming, Joseph Fahys & Co.; C. E. Bride, Bride & Tinckler; E. M. Brashes, Henry Lederer & Bro.; Arthur H. Schmit, Layman & Straus Co.; T. A. Brennan, Morris Weil; W. G. Moland, Sansbury & Nellis; Mr. Hornig, Codding, Heilborn Co.; Arthur Totten, Brown & Wills; F. G. Mildeberger, Robert S. Gatter; E. B. Downs, Hayden W. Wheeler & Co.; Chas. B. Gray, Gray-Howes Co.

Harrisburg, Pa.

J. C. Welty, Carlisle, has removed to the property he recently purchased on Main St.

N. Brenner & Son, 1315 3d St., are having a package sale preparatory to removing to Walnut St.

Dr. W. M. Happel has removed his optical establishment in Waynesboro to the Krise block.

Uhler & Boyer is the name of a new business firm just established in Millersburg, this county.

Cohen Bros., jewelers of Reading, have established a branch office in the Bergner building, 3d and Market Sts.

Russel Ludwig, son of W. H. Ludwig, Chambersburg, is now occupying his handsome new home in that town.

Harrisburg will send a large delegation to the coming annual meeting of the Pennsylvania Retail Jewelers' Association, to be held in Philadelphia next month.

These officers have been elected by the Chambersburg Merchants' Association: President, F. W. Day; first vice-president, J. William Rearick; second vice-president, C. E. Banks; secretary, T. Z. Minehart; treasurer, J. C. Peters.

A. L. Willard, Schenectady, N. Y., has taken as a partner in his business H. N. DeLisser, formerly of the firm of Nost & DeLisser, New York. The new firm will do business under the style of Willard & DeLisser.

GORHAM SILVER

WHAT EVERY WOMAN KNOWS

That the Gorham trade-mark is a certificate for Sterling Silver $^{925}/_{1000}$ fine, and needs no explanation to the recipient when sent as a gift; therefore, when a dealer offers solid silver bearing this mark the sale is readily made. How much better this is than trying to explain that some other make is "just as good."

Increase in Use of Gold by Jewelers.

THAT the jewelry business has been improving and increasing in volume steadily since 1907 is generally known, but the improvement has at times been so erratic and spasmodic that it has been hard to gauge accurately how much more business was done by the trade last year and is being done to-day than in 1907 and 1908. However, a very good idea of the business condition in the fine jewelry trade is afforded by the statistics of the gold bars withdrawn and exchanged at the New York Assay Office, as to a certain extent these form the bulk of the raw material of a large part of the manufactures in the gold trade of the country. True, they do not show all, as coin is still used to some extent, but it is safe to infer that the proportion of coin used bears a steady relation to the amount of gold bars consumed in the trade.

The statistics of the Assay Office and Sub-Treasury at New York, which were made public last week, give an idea of the amount of gold consumed in this trade in 1908 and 1909, and indicate not only the improvement in the latter over the former year, but also show that the first two months of this year were ahead of the corresponding months of both. According to the official statement the gold bars withdrawn and exchanged at New York in 1908 amounted to $19,475,168, while in 1909 they were valued at $24,581,260.

The increase in the consumption of these gold bars in 1909 over 1908 was over 26 per cent. and was almost uniform throughout the year, each month's figures in 1909 showing an increase over those of the corresponding month of 1908. The first two months of this year keep up this average; the figures for January show $1,982,186, as compared with $1,785,404 in January, 1909, and $1,460,287 in January, 1908, and the February totals show $2,011,032 last month as against $1,643,958 in 1909 and $1,069,560 in 1908.

The monthly demands for gold bars, as officially reported by Superintendent Foster, of the Assay Office, was as follows:

	1910.	1909.	1908.
January	$1,982,186	$1,785,404	$1,460,287
February	2,011,032	1,643,958	1,069,560
March	.....	1,875,367	1,228,345
April	.....	1,709,801	1,264,965
May	.....	1,880,784	1,336,504
June	.....	1,777,141	1,412,250
July	.....	1,630,929	1,358,235
August	.....	2,158,982	1,775,944
September	.....	2,630,519	2,210,323
October	.....	2,947,993	2,516,111
November	.....	2,508,153	2,023,799
December	.....	2,032,225	1,818,841
Total	.....	$24,581,260	$19,475,168

Gem Imports Again Break All Records.

IT has become such a common thing in the past year for the importations of precious stones at the port of New York to break all previous records that the trade no longer looks with wonder or surprise when this is done. However, the figures of the gem importations during March are so unusually large and exceed the highest amount ever reported for that month by such a large figure that the fact is worthy of more than passing comment. The gem imports last month reached the unusual sum of four and one half millions, or to be accurate, $4,525,264.40, which exceeded the figures of March, 1909, by over $1,172,000 and exceeded the figures of the greatest previous March on record (1906) by over $746,000. The last importations were over eleven times the value of the importations of March, 1908.

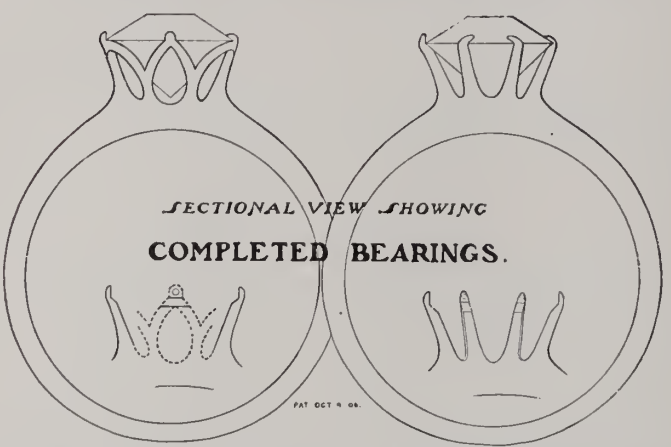
Of the total gems imported the value of cut precious stones and pearls amounted to $3,465,415.11, by far the largest amount ever imported at this season of the year. The figures of uncut gems, principally rough diamonds, amounted to $1,059,849.29, a figure that has never been equaled except once in March 1906.

The figures of the past month will come somewhat as a surprise to many members of the trade, owing to the fact that American buyers have been greatly reducing their purchases abroad. It is generally believed that the record figures are nearly at an end, for the present at least, and that the next two or three months will show something of a drop. But even if this prediction is verified, the chances are that the fiscal year ending June 30 will be the greatest in the history of the Customs House as far as gems are concerned.

How the importations of the past month compare to the figures of previous years, both as to cut and uncut stones, as well as in the totals, is to be seen at a glance from the following table covering statistics of gem importations at New York since March, 1898:

March.	*Cut.*	*Uncut.*	*Total.*
1910....	$3,465,415.11	$1,059,849.29	$4,525,264.40
1909....	2,674,599.47	678,808.50	3,353,407.97
1908....	298,879.90	90,634.77	389,514.67
1907....	2,300,364.00	995,917.00	3,296,281.00
1906....	2,726,970.70	1,062,854.35	3,789,825.05
1905....	2,989,054.20	684,329.30	3,673,383.50
1904....	1,152,916.01	779,150.08	1,932,066.09
1903....	2,022,804.43	848,840.97	2,871,645.40
1902....	1,386,647.04	507,724.43	1,894,371.47
1901....	1,410,770.20	817,768.32	2,228,538.52
1900....	720,408.40	60,601.80	781,010.20
1899....	1,195,397.45	516,513.67	1,711,911.12
1898....	481,107.76	293,808.35	774,916.11

Dangerous Safe Robbers at Large.



THE unfortunate escape in New York, last week of three men held under bail on suspicion of being implicated in a number of jewelry robberies should act as an incentive to many members of the trade at large to be much more careful than they have been in the arrangement of their safes. These men, whom the New York police believe to be directly or indirectly implicated with safe robberies in Philadelphia, Boston, New Haven and other cities, were held under $10,000 bail each, but this amount was later reduced by the magistrate to $5,000 each, and the surety furnished. When the

New and profitable business will come to you through an intelligent use of our advertising columns.

cases were called last week the me[n] not appear and their bonds were de[clared] forfeited.

If the accused men are guilty of [the] charged by the police they will be a t[hreat] to the entire jewelry trade as lon[g as] are at liberty; if they are not gui[lty] real thieves are at large, so that [in] case unusual care and attention [should] given by all jewelers who carry the[ir] in ordinary fireproof safes. Th[ey] robbed the stores in Philadelp[hia] and New Haven worked practica[lly] same manner in every instan[ce] drilled or punched a number of h[oles] back of the safe in the form of a [circle] and then with a large tool, som[ething] a can opener, cut out the iro[n] a space of over a foot square, [through] the cement of the safe and rifled [the] tents from the back.

In every instance the work of t[he] was facilitated by the jeweler h[imself] had placed the safe in such a man[ner] they could operate behind it with[out] seen from the street. If those jewele[rs] now have their safes in a similar [way] receive a visit from the thieves [in the] future they can in great part blam[e] selves for whatever losses they m[ay] sustain.

As THE JEWELERS' CIRCULAR-WEEK[LY] pointed out time and time again t[he] est part of the ordinary safe used [by] small jewelers is the front and th[e] the back; but despite this well-kn[own] members of the trade constantly p[lace] safes in such a position that the fr[ont] protected by the light in the s[tore] back is in absolute darkness, the saf[e] affording a screen to those who wis[h] attack it from the rear. This arrange[ment] is not so bad when the jeweler [sleeps] a room directly behind his safe, [but] he does not it is simply an invita[tion] thives to rob him. Where the [jeweler] leaves his store at night he shou[ld] it that his safe is so placed that [the] of the store permits the passing w[ay] to see all around it, or else it [should] placed with its back against s[olid] [wall].

Let us hope that the fact th[at] dangerous safe robbers now at la[rge] be sufficient to arouse the careless m[ajority] of the trade who have heretofore [failed] heed to the warnings that have [been] them so often by THE JEWELERS CIRC[ULAR-] WEEKLY, the Jewelers Security [Alliance] the police of various cities.

Clever Feats Performed by an Engr[aver] of Sharon, Pa.

Paul P. Wentz, an engraver of S[haron] Pa., recently has been perform[ing a] ber of feats of engraving that have cited interest in his trade, and [the] work upon the head of ordinary [pens] may be almost classed as wonderful. Wentz recently submitted to THE JEWEL[ERS] CIRCULAR-WEEKLY three ordinary [pen] heads of which he had engraved [on] was four alphabets, his name and addr[ess] 113 characters in all, while [another] tained a welcome to "Teddy," and [the] has the monogram of this paper, "J. C. W."

Mr. Wentz is employed by J. W. K[el]ler, a jeweler of Sharon, Pa.

J. A. Didot, Decatur, Ind., is [about] close out his stock.

New York Notes.

orge Cahn & Co. have leased new ters at 49 Maiden Lane.

Bial has just started in business as a ond setter at 32 Maiden Lane.

nk Byrnes severs his connection with H. D. Merritt Co., 14 John St., May 1.

ed M Cook, of Whiting & Davis Co., aiden Lane, is spending a few days at factory.

Semus is now covering the New Eng- territory for the Moser & Whyte Co., aiden Lane.

E. Willis, a jewelry salesman, and his each won a prize in a booklover's con- last week.

gman & Abrahams, makers of platinum gold mountings, have started in busi- at 45 John St.

Gunzberger, salesman for L. & M. & Co., 170 Broadway, is ill at St. 's Hospital, Chicago.

Alexander, of the American Jewelry Minneapolis, Minn., was in town last to attend the wedding of his niece.

lph Hoxsie left New York Saturday the factory of Mason, Howard & Co., eboro, where he will get his new line.

N Abrahams, a well-known "rough" er of London, returned to Europe, last Tuesday on the *Lusitania* after a short in this city.

mes R. Gleason, of the New York office he Waltham Watch Co., is traveling in south for his health. He is staying at ent at Virginia Beach, Va.

pink baroque pearl, weighing 74 grains, h was found near the mouth of the consin river, has been brought to this by Wm. Moore, of Prairie du Chien, .

Nordlinger's Sons, 21 Maiden Lane, increased the force at the New York e by the addition of Henry Delerson, will represent the firm throughout the t.

he first meeting of the creditors of r Eisenstein & Co. will be held April 14 he offices of Referee in Bankruptcy haniel Prentiss, 120 Broadway, at 10.30 .m.

Harry M Levy, with Manasseh Levy & C, importers of watches, 182 Broadway, returned from his trip through New k State for that firm and reports busi- s very encouraging.

erome L. Davis, of Davis & Welikson, es for Europe on the *Mauretania* April to visit the foreign diamond markets. Davis will be married April 11 and his le will accompany him on the trip.

. T. Montgomery, manager of the New rk office of M. A. Mead & Co., is on a for the firm. He recently went to tsburg, where he was one of the speak- at the dinner of the 24-Karat Club in t city.

Mr. and Mrs. Simon Weinstein announce engagement of their daughter, Miss na M. Weinstein, to Jacob Baumgold, of this city. Mr. Baumgold is a member of the firm of Baumgold Bros. & Co., 266 Grand St.

Jos. Landsman, gold and silver electroplater and colorer, 51 Maiden Lane, will add a considerable amount of floor space to his plant, May 1. He expects to take four more rooms, making about 12,800 square feet of extra space.

Fred. Sheridan, Pacific Coast representative for several eastern manufacturers, is visiting concerns in the city at present and recently added the E. A. Potter Co.'s line to his list and will take it west with him for the first time in a few days.

The Parker Pen Co., makers of fountain pens, Janesville, Wis., recently opened a retail store and branch office at 11 Park Row. W. F. Pilcher, who traveled for seven years for the company through the east and south, will be in charge.

M Goodfriend, of Goodfriend Bros., 13 Maiden Lane, arrived Tuesday of last week from Europe on the *Kaiser Wilhelm II.* He has been abroad some time. N. Kaufman, the manager of the Providence office of the concern, returned on the same boat.

The American Clock Co., of this city and Chicago, has leased a large factory property covered with one and two-story buildings at Nostrand Ave. and E. 31st St., Brooklyn, for a long term of years. The property has rail connections with the Long Island Railroad.

G. L. Woodruff, who has been connected with the clock department of the firm of Tiffany & Co. for several years and who did much of the Greenwich work for this firm until compelled to give up his position on account of poor health, is now located at 50 Atlantic St., Stamford, Conn.

An exhibit of pearl oysters has been placed in the central section, second floor, of the Central Museum of the Brooklyn Institute, Eastern Parkway. It has been made possible by the courtesy of the Indian Museum of Calcutta, supplemented by specimens received by gift, bequest and purchase.

H. N. DeLisser, formerly of the firm of Nost & DeLisser, 1139 Tiffany St., the Bronx, has become a partner in the business of A. L. Willard, Schenectady, N. Y. The firm will make extensive improvements and greatly increase the stock. The business will hereafter be conducted under the style of Willard & DeLisser.

The Jewelers Board of Trade announces that judging from present negotiations there will be nothing in the estate of L. Marks, Newark, N. J., for distribution to general creditors. The attorneys say that the sum now in the hands of the trustee probably will be entirely consumed in the costs of administration. Creditors will be notified when the estate is closed.

Fred Zeitz, of Zeitz Bros, Chicago, spent a few days in New York recently on his way home from Cuba and made his headquarters with Henry Freund & Bro., 71 Nassau St. Louis Meier, Detroit, Mich., and S. Brodegaard, Omaha, Nebr., were also in town for a short time and made their headquarters at the same concern.

Among the out-of-town visitors in this city last week were: George H. Holmes, president of the New England Manufacturing Jewelers' and Silversmiths' Association; M. A. Mead, of M. A. Mead & Co., Chicago; J. Alexander Hardy, of Hardy & Haynes Co., Pittsburg; Percival Nichols, of the Shreve, Crump & Low Co., Boston; S. Garner, of the Leach, Garner Co., Attleboro.

A meeting of the creditors of Meyer Baturin, the bankrupt Harrisburg (Pa.) jeweler and pawnbroker, was held last Wednesday afternoon at the rooms of the Jewelers Board of Trade, to consider an offer of 30 per cent. cash to be made as a composition in bankruptcy. The creditors who were present or represented did not accept the offer and the meeting was adjourned.

L. Witsenhausen, formerly the head of the L. Witsenhausen Co., has bought out the interest of Mr. Koch in the Goldsmith-Koch Co., 109 Oliver St., Newark, N. J., and the concern will manufacture a line of patented German silver mesh bags and toilet sets in Britannia ware. The concern has taken over double the floor space formerly occupied by the old concern and expects to be ready within a short time to begin business.

Joseph A. Anzellewitz, 601 W. 179th St., has filed an individual petition in bankruptcy with liabilities of $7,055 and no assets. The largest creditor is the Keystone Watch Case Co., whose claims amount to $3,271. The other creditor named in the petition is David Broschardt, $326. He was formerly a member of the firm of A. Anzellewitz & Co., jewelers at 154 Canal St., who failed, and his individual petition is a result of that failure.

George H. Warwick, 110 W. 14th St., has completed a mace and three wands of unusual artistic excellence for St. Stephen's College, the jubilee celebration of which is being held in Trinity Church to-day. The mace and wands were presented by Prof. Watson Bartemus Selvage, the instructor of the College of the City of New York, who is a graduate of St. Stephen's College. The mace has an original statue of St. Stephen, the martyr, done in copper heavily gold plated. The wands are silver mounted and finely etched.

Archibald Keller, son of J. Keller, a manufacturing jeweler and gold pen maker, 194 Broadway, died March 28 at his father's home, 1069 Decatur St., Brooklyn, after an illness of two years of heart trouble. He was in his 25th year. The deceased was a pen maker and learned his trade with P. J. Collins. He was later with a Maiden Lane firm for a number of years. Mr. Keller was a member of the Nathan Hale Council, Junior Order United American Mechanics and a member of the Pen Makers' Union. The funeral was held the following Thursday.

The Good and Welfare Committee of the Jewelers Board of Trade has been appointed by President M. D. Rothschild as follows: Louis Cohn, of Henry Freund & Bros., chairman; Geo. H. Tomes, of Cross & Beguelin, secretary; Henry Blank, of Whiteside & Blank; Max Kallman, of Lissauer & Co.; Wm. F. Juergens, of the Juergens & Andersen Co.; Robert W. Adams, of T. W. Adams & Co.; Julius S. Oppenheimer, of Oppenheimer Bros. & Voith, Frank T. Sloan, of Sloan & Co.;

New York Notes.

(Continued from page 89.)

Theodore W. Foster, of Theodore W. Foster & Bro. Co., and Matthias Stratton, of Ming & Co. Chairman Cohn announced that the committee will be glad to receive suggestions from members at any time.

Harry Goldsmith has been succeeded by Philip Goldsmith.

Abe Kaufman has bought out the business of M. Ackerstein, 124 Fifth Ave., Brooklyn.

L. Masur, formerly at 107 Broadway, Brooklyn, has moved to 276 Fifth Ave., Brooklyn.

A. A. Gillespie, of Gillespie Bros., Pittsburg, sailed from this city on the *Carpathia* for Europe, last Thursday.

Maurice Harrison, of Harrison Bros., 14 Maiden Lane, returned last Wednesday from a vacation trip to Florida.

B H De Jong, diamond importer, 35 Maiden Lane, sails to-day on the *Campania* for the European diamond markets.

The Jewelers Security Alliance reports that a safe in the store of C. W. Brockaw, Carmen, Okla., was broken into Saturday.

The New Jersey Jewelry Mfg. Co., of West Hoboken, has been incorporated with a capital of $5,000, to manufacture jewelry.

Wm. M. Green, representative for Geo. L. Brown & Co., accompanied by his wife, is on a visit to the factory at Attleboro, Mass.

E. Petrucci & Sons, manufacturing jewelers, have moved from 160 Union St., Brooklyn, to 356 Fifth Ave., in the same borough.

Richard Krawehl, diamond setter, has moved from 98 Third Ave. to 3538 Broadway. Mr. Krawehl is also a watchmaker and jeweler.

Henry L. Smith, 12 Maiden Lane, is a member of the Federal Grand Jury sworn in by Judge Hand in the United States Circuit Court Monday.

Nat Shiman, of Shiman Bros. & Co. and the Shiman, Miller Mfg. Co., Newark, returned recently on the *Lusitania* from a nine weeks' trip to Europe.

Philip Present, Rochester, sailed yesterday on the *New Amsterdam* for the diamond markets of Europe, where he will spend six weeks purchasing stock.

The Peerless Chain Co., Canada, has decided to open local offices at 49 Maiden Lane in charge of Mr. Heine, who was formerly in the employ of Henry Lederer & Bro.

G. B. Vitelli, of Borrelli & Vitelli, 401 Broadway, sailed, Saturday, on the *Duca Delgi Abruzzi* for Naples. He will also inspect the branch offices of Paris and London.

The name of Melhen Saloom, of Brooklyn, appears as a director of the Eastern Clock & Specialty Co., which was incorporated at Albany, last week, with a capital of $20,000.

Percy Malone, formerly with the Elgin National Watch Co., in this city, was renewing old friendships along Maiden Lane, Monday. He is at present with a large Pittsburg, Pa., firm.

Judge Hough, in the United States District Court Monday, granted a discharge in bankruptcy to Barnett H. Bernstein, formerly a jeweler at 51 Maiden Lane, whose liabilities were $1,285.

Milton Belgard with the New York office of H. Nordlinger's Sons, will sail April 27 on the *Majestic*. He will visit the European markets for the purpose of purchasing precious and semi precious stones.

Morris Schenkein, of H. Schenkein's Sons, diamond cutters and importers, who has been in New York for the past few weeks, is about to return to the firm's European offices, and with his wife will sail on the *Kaiser Wilhelm II.*

Maurice Boehner, of J. Boehner & Co., diamond importers and cutters, Antwerp, Belgium, who has been in this city for some time, making his headquarters at the New York office, 6 Maiden Lane, sailed for Europe, Saturday, on the *Kroonland*. He has been in this city about four months.

Leo Kohn, of Alois Kohn & Co., 16 Maiden Lane, has been appointed a member of the reception committee which will receive ex-President Roosevelt in this city upon his return from his African hunting trip. He received a notification of his appointment from Mayor Gaynor early this week.

The Gorham Mfg. Co. has instituted two suits in Chicago, one against Samuel Goldberg, 19 Congress St., and the other against George Sheppard, 4195 Cottage Grove Ave., alleging infringement of the Gorham trademark of an anchor, lion and the letter "G." The allegations are substantially the same as those raised in the suits which have already been commenced against dealers in New York.

William Kaiser, a jeweler, 26 years old, who had a furnished room in the house of Mrs. Lottie Essig, at 159 S. 9th St., Brooklyn, was found dead, Friday night, having been asphyxiated by illuminating gas. The gas was found to have escaped from a disconnected gas meter, and death was probably accidental. Ambulance Surgeon Laub, who was summoned from the Williamsburg Hospital, pronounced the man dead.

Charles Rubin, a dealer in diamonds, whose home is in Brooklyn, is at a loss to account for the disappearance, some time between March 27 and April 1, of a pocketbook which contained four diamond rings, a wedding ring, locket, chains and coins to the value of $700. For years he had carried the pocketbook in a coat pocket, and was certain of its safety. Where and how it was lost he does not know. A liberal reward is offered for the return of the jewelry.

Mrs. Mamie Cruse O'Brien, who lives at the Hotel Astor and is the daughter of Thomas Cruse, a mining man of Helena, Mont., bought $13,000 worth of jewelry recently from T. Kirkpatrick & Co., 334 Fifth Ave. The jewelers declare that she ordered the bill sent to her father, and indorsed on it, "O. K." Mr. Cruse hasn't been heard from and the jewelers have brought suit against Mrs. O'Brien. It came before Supreme Court Justice Greenbaum on the application of the defendant to compel the plaintiff to accept an answer filed too late. The court reserved decision on the application.

An organization known as the Jewelry Auction Dealers Association of New York has been chartered under the laws of the State of New York with a membership of more than 80 jewelry dealers, and at a meeting held last Wednesday the following officers were elected: I. S. Schoenfeld, president; Samuel Price, vice-president; Harry Levy, treasurer; Max Megurowisky, secretary; Charles Weinstein, sergeant-at-arms; Mike Megurowisky, Mr. Resch and Mr. Feigelson, trustees. It is the intention of the association to open a jewelers' exchange and a club room within a short time. The members of the organization buy jewelry at pawnbrokers' sales, which they afterward dispose of to the retail trade or otherwise. The president of the association said that pawnbrokers in this city sell not less than $7,000,000 worth of jewelry to buyers each year.

The Board of United States General Appraisers handed down a decision last week on the protest of the A. Bader Co., New York, relating to hat pins composed in chief value of paste, returned in some cases as jewelry and in others as articles of glass cut, said articles not commonly being known as jewelry, and composed of a composition of glass termed paste. The other articles named in the protest were imitation pearls, not beads, exceeding one inch in dimensions, composed in chief value of wax. Following former decisions the Board sustained the claim of the protestants that the merchandise covered by the first finding is dutiable at 45 per cent. under Par. 112, and those in the second finding at 25 per cent. under Par. 448 of the Tariff Act of 1897. As to all other goods and in all other respects the Collector's decision is affirmed. The Board denied free entry of importation of watches, made by the American Express Co. in behalf of a prominent importer in this country.

The diamond chain and pendant valued at $5,000 which was brought into this country by Mrs. Cornelia M. Woolman, a passenger on the *George Washington*, on March 21, was surrendered last Wednesday to Collector Loeb at the Customs House by Arthur C. Train, counsel for Mrs. Woolman. When Mrs. Woolman arrived she declared that her purchases abroad only amounted to $100, acording to the customs inspectors, but when an investigation was ordered she gave up a coral necklace with a bracelet and rings valued at $1,000, and wearing apparel valued at several thousand dollars was also found in her trunk. The property was all seized and she was taken before United States Commissioner Ross at Hoboken and held in $5,000 bail for examination. It was said at the Customs House that a jeweler's bill for 1,500 francs had been found in Mrs. Woolman's trunks, and her attorney was asked that the ornaments named in the bill be produced. The lawyer, in surrendering them, told the collector that two of the large diamonds had been purchased in the United States. Mark Andrews, solicitor for the collector, claimed that as the stones were made up they would be assessed at 60 per cent. duty. The question of the seized baggage has not been settled. Mrs. Woolman is a wealthy widow of Helena, Mont.

The partnership which existed between T. C. Herrick and L. Stone, Conneaut, O., has been dissolved by mutual consent. All accounts of the firm are now payable to T. C. Herrick.

Newark.

L. Fritzsche & Co. have moved from 73 Hamilton St. to 480 Washington St.

The Lowres Optical Co., in the Shiman-Miller Mfg. Co. building, reports a brisk business necessitating some night work.

James Wordley, of Wordley, Allsopp & Bliss, Orchard and Kinney Sts., has been ill with a severe case of the grip for the past two weeks.

F. C. Allan, representing Allsopp & Long, 473 Washington St., has just started on a trip through the middle west. He will be gone until the middle of May.

Fred T. Long, of the firm of Allsopp & Long, 473 Washington St., is stopping at Lakewood, N. J., where he went for his health. He expects to return to his work in a short time.

Albert E. Allsopp, a jeweler at 322 S. Belmont Ave., was chosen by Sheriff Harrigan last Saturday to serve on the grand jury for the first part of the April term of the Essex County courts.

E. N. Mandebille is on a trip through New York State in the interests of the Arch Crown Mfg. Co., Camp and Orchard Sts. W. B. Vail, representing the same firm, has just started on a trip through New York and Massachusetts.

Edward M. Childs, representing Kohn & Co., Camp and Orchard Sts., has just returned from a 10 weeks' trip through the south and to the Pacific Coast. C. H. Davidson, of the same firm, spent Easter with his family in Buffalo.

Miss Shapiro, who succeeded Emil Levy in the business of enamel painting at 359 Mulberry St., has gone out of business. For many years the late Mr. Levy conducted a business at this place and was well known among the manufacturers of Newark.

M. Hagerstrom has retired from the Hagerstrom Co., manufacturers of jewelry, 276 New Jersey Railroad Ave., Newark, and the officers of the concern are now John Schroeder, president; Charles S. Schroeder, vice-president, and William Rein, secretary and treasurer.

Richard Hunken, representing Allsopp Bros., Camp and Orchard Sts., has just returned from a six weeks' trip through the south. He had a very satisfactory trip considering the season. Henry George Allsopp, of the same firm, is doing well on his trip through New England.

Charles Hayes, for many years a manufacturing jeweler in Newark, and a member of the firm of Hayes Bros., died at his home on Green Village Road, Madison, N. J., Friday, aged 70 years. He leaves a widow, a son and three daughters. The son is an Episcopalian clergyman.

Theodore Mertz, until recently a member of Mertz Bros., 359 Mulberry St., has withdrawn from the firm and started in business for himself in the Ball building, Johnson St. He was one of the original members of the firm of Mertz Bros., which has been in business for a number of years.

No trace has been found of the five diamond rings, the loss of which was reported last week by Allsopp & Long, who had reset and refinished the rings and sent them back to the dealer. It is thought that they were dropped and later found by some one and suspicion points to certain parties, but there is not evidence enough to make a complaint.

Thieves broke into the store of Katz & Fogelson, Sussex, N. J., recently. When the proprietors went to begin business the next morning they found the front door open. It had been pried open with a jimmy. A lot of clothing, watches and jewelry was missing. The store has been robbed at least twice before.

The Harvey Osborn Silver Co. has just removed from 68 New Jersey Railroad Ave. to the Shiman-Miller Mfg. Co. building, where it occupies a portion of the top floor. It now has a capacity for 150 hands, which is double that of its former factory. The factory is also better lighted and ventilated than the old one. Before moving much of the old machinery was sold and the equipment of the new factory is practically new. Several new lines of goods have been added.

Employes of the Trenton Ingersoll Watch Co., Trenton, N. J., have organized an athletic association for the purpose of advancing clean sport in all its branches, and to arrange athletic meets, baseball games, etc., to take place at various intervals during the Summer. The officers of the association are: Fred Bates, president; John Hartman, vice-president, and Elmer Walker, secretary-treasurer. George Burgess is manager of the baseball team, and Elmer Walker of the track team.

Patrolman McDonald recently arrested Charles Hall, who was one of three men that went into the store of Louis Moraller & Son, 219 Park Ave., Plainfield, N. J., and asked to have several diamonds appraised. With the trio was George Metzkopf, to whom the men were trying to sell a diamond. They had one real diamond and the rest were of paste. Mr. Moraller reported the matter to the police and McDonald arrested Hall. The other two made their escape, but were later arrested in New York. Chief of Police Kiely went to New York, but there was nothing on which the men could be held. Hall, after being examined at police quarters here, was released.

A few more games were played in the Newark Jewelers' Bowling League last week preparatory to the banquet on Friday evening, April 8, at Hotel Broad. When the contest proper closed there was a tie for the first, third and fifth places. As the five highest teams will be awarded prizes at the banquet, it becomes necessary to play these ties off. In the games to decide the championship of the league, which were played on Friday evening, the Carter, Howe & Co. team won by taking two games straight from the team representing Kohn & Co., with which team it was tied for first place. The Kohn & Co. team will therefore hold second place in the league. Three games were rolled on the same evening to decide whether the team representing J. A. & S. W. Granbery & Co. or the team representing Alling & Co. should hold the fifth place. The Granbery team won two out of the three games. There yet remains to be played off the tie for third place. This will be rolled before the banquet. The committee on arrangements for the banquet are working hard to make it a grand success. There will be a guests' table for the heads of the firms of the compe teams. The toastmaster will be Vi Hess, and the principal speaker of the ev ing will be George R. Howe, of Ca Howe & Co.

Announcement is now made f r t e time of the proposed erection of a story addition to the Shiman-Mi er Co. building. The modern bu ding occupied by the Shiman-Miller Mig as well as several other jewelry manu turers, was only completed in May of year. All available space, however been leased of the Shiman-Miller M for a long term. Several months company decided to make an addi the building and secured a plot of gr on Austin St., adjoining the pr William E. Lehman, a Newark archi now working on the plans of the pr new building and it is expected that will be broken for it some time dur month. It is thought that the bu will be completed by Oct. 15. The bu will be built of brick, in a style to architecturally with the present d with which it will be connected. It wi modern in every partcular and arran as to be especially suitable for j w manufacturing. But one tenant wi be lowed on a floor. The Shiman-Miller Co. will ask for bids on the construction the building.

New Orleans, La.

TRADE CONDITIONS.

The jewelers of New Orleans, w ex tion, are preparing in every way, as far as st and decorations are concerned, to c lebrate event of the largest convention ever held namely, the Shriners. Not alone is the city d ated, but the jewelers are taking spe l to make an excellent showing. Sou ner buttons, badges, etc., have sold very largely lately and every jeweler is accumulating a stock. A number of our local w s Shriners and are doing their share toward ma the event a great success.

As a great number of visiting jewelers expected here, Leonard Krower, the w sale jeweler, is making extensive pr tions to entertain and receive not only Shriner customers, but every jeweler may visit this city. Part of his lower has been remodeled and refurnished desks and easy chairs for the comfort the visiting merchants, who are all w whether customers or not.

A number of manufacturers' repres tives have visited the city lately, whom were Mr. Carle, the E. H. w Watch Co.; Mr. Neal, the K Watch Case Co.; Mr. Parke P Bros. & Rogers; Mr. Untermeyer C Keller & Co.; Mr. Kohn, Silberm K & Wallenstein; Mr. Goldberg, the U meyer-Robbins Co.; Mr. Rob T. Mauran Mfg. Co.; Mr. Fox, of the G tave Fox Co.

New Orleans is in line of pr manufacturers and wholesalers are c estly started to procure trade in S and Central America. A del sent out lately to Mexico, a was Alfred J. Krower, of Leonard Kro The first place of importance w ited was Merida; from there he rep very favorable business conditions, and has sent in a number of orders. Condi promise to be very favorable for the fu

Boston.

A. Cowan arrived home, last week, on a European trip.

The Waltham Watch Co.'s factory resumed operations, April 1, in most of the departments.

Gordon, retail jeweler of 62 Hanover st, is celebrating his 25th business anniversary.

Newmark, of the sixth floor, Jewelers' Building, closed up his business, March 31, and removed his effects.

Albert Kiehl, of F. H. Noble & Co., Chicago, was in this city, last week, and called on members of the Boston trade.

Edmund Carro moved, last Saturday, from the Washington building to his new office in the Old South building, room 1010.

Farber, proprietor of the Jewelers' Exchange, so called, at 21 Bromfield St., room 207, has removed to Cambridge St.

Irving W. Lannin, clerk in the Boston office of the W. L. Gilbert Clock Co., has relinquished his position and gone to Eastport, Me.

R. Cobb, of Pawtucket, who has just returned from a six weeks' sojourn in the Carolinas, called on customers in Boston the past week.

The case of A. R. Grover, who was arrested on larceny charges preferred by S. Proctor somewhat over a week ago, was continued, Thursday, until April 11.

M. Hamlen, formerly with Solatia M. Taylor, of Bromfield St., has bought out I. Carpenter, of North Cambridge, and is fitting the store for jewelry and optical goods.

Clark & Kaufman, also known as the Boston Leather Co., manufacturers of belts, cases and leather novelties handled by jewelers, have been petitioned into involuntary bankruptcy.

F. H. Cate, formerly in room 706, in the Washington building, has removed to room 703, taking part of the quarters occupied by C. H. Denny. A. F. Freeland, watchmaker for the trade, has also removed to room 708.

Harry and Nathan Orkin, who recently formed a partnership under the name of Orkin Bros., manufacturing jewelers, have fitted up room 407 in the Ballard building, 7 Bromfield St., for their office and workshop.

The John W. Boyce Co. (H. Heller and A. Atkins) have taken room 706, adjoining their manufacturing establishment in the Washington building, for an office and display room, adding considerably to their present space.

C. E. Alsterlund, of the Washington building, who bought the Hotel Chatham, Chatham, Mass., on Cape Cod, a few years ago, has started to develop the peninsula on which it is located as a cottage summer resort this season.

Employes of the Shreve, Crump & Low Co. are organizing their baseball nine for the city mercantile league season of 1910. Bigelow, Kennard & Co. employes are also getting together a nine, and there is a movement to form a Jewelers' building league.

Maurice J. Harrison, of 1 Green St., whose principal business was in the phonographic line, but who carried a light stock of jewelry, has been petitioned into bankruptcy. His liabilities are about $6,000, it is stated, and assets are nominally close to the same figure.

Hubert A. Belcher, head of the new jewelry department of the Jordan, Marsh Co., goes abroad, this week, on a buying trip for the company. He will visit the jewelry centers of England, France, Austria and Germany. This is his eighth annual trip to Europe.

James S. Blake, of Kettell & Blake, is en route to New Orleans as one of the delegates from the Boston Shriners to the convention to be held there next week. Mr. Blake, who is a 33d degree Mason, is one of the high officials of Aleppo Temple of this city.

Reginald C. Robbins entertained the Authors' Club of Boston, last Thursday evening, at his residence on Commonwealth Ave., with an informal address on "India," illustrated with lantern slides from photographs taken by him when he visited that country about two years ago.

The optometry bill desired by the Massachusetts Optical Society has been favorably reported to the Legislature, although five members of the committee dissent. Two of the dissenting ones are physicians. Strong opposition, therefore, appears likely to be encountered in the attempt to secure the bill's enactment.

Albert I. Strobell, former second baseman with the Boston Americans, but now salesman for the Shreve, Crump & Low Co., still retains his love for the national game, and on the Saturday half-holidays of the Summer is to play this year with the Whitinsville nine, a minor league team in this State. Last year he played with the Salems.

N. G. Wood & Sons, who make a specialty of prize cups, have issued a unique line of designs for military drill or competitive shooting trophies on which patent rights have been applied for. These embrace silver or pewter steins, loving cups, vases, etc., in the shape of a modern projectile, with the rotating band of copper or gold.

Fred E. Chick, head of the diamond department of the Smith Patterson Co., returned, this week, from a buying trip to Europe. F. S. Mansfield, manager of the Montreal branch of the company, is also home from Europe, coming across to New York on the *Kaiserin Auguste Victoria* with Mr. Chick. Carl D. Smith is now in Austria, buying a line of Viennese novelties.

The Tuttle Silver Co.'s second anniversary since the reorganization of the concern was celebrated, last Saturday evening, by the members of the firm, Bernard A. Dolan, Frederick W. Parris and Harry O. Coleman, with a dinner at the Parker House. The Tuttle Co. has prospered from the start, and has added two rooms for manufacturing purposes in the Ballard building to its original quarters.

The Thomas Long Co. has added to its force of salesmen A. V. Dieter, formerly with E. & J. Bass, now has New York and Pennsylvania territory; Edward V. Gannett, formerly with Brown, Durrell & Co., is inside salesman in the wholesale department; A. P. Holt, formerly with the Boston Knit Ware Co., has the territory previously covered by C. E. Freeman, who recently severed his connection with the house.

Buyers in the city during the week include: E. F. Lilley, Milford; L. E. Cole, Natick; Harry Foye, Athol; A. Hayden, Wellesley; P. Shogam, Fall River; S. K. Gurney, Brockton; E. G. Worthley, Amesbury; B. D. Loring, Plymouth; C. L. Barnard, Milford; H. S. Hewett, Brockton, Mass.; John W. Russell, Franklin; E. Le Gro, Farmington; Albert Saltmarsh, Concord, N. H.; L. E. Merrill, Paris, Me.

The "Fourteen of Us" Club of the wholesale department of the Smith Patterson Co. held a banquet, last Saturday evening, at the American House. The participants were C. S. Ramsdell, C. L. Quimby, Howard A. Martin, Harry Packard, Ira Linnell, L. S. Black, Edward Eldridge, T. G. Hodgson, W. H. Forbes, F. L. Foster, H. E. Tabb and A. G. Gilmore, the latter being toastmaster. The guest of the occasion was Homer Strasberger, of New York. A theater party followed the dinner.

Waltham's newest industry is the Fisher & Vinal Co., manufacturers of jewels. H. C. Vinal, of Waltham, and T. E. Fisher, an English jeweler, are the sole members of the company. They have leased floor space in the building owned by S. A. Stewart, on Hall St., Waltham. Both Mr. Vinal and Mr. Fisher were in the employ of the Waltham Jewel Co., which has ceased to do business, and a portion of the machinery formerly owned by the Waltham Jewel Co. has been purchased by the members of the new concern.

The Studio Jewelry Co., S. U. Goldberg, proprietor, opens a new store to-day at the corner of Tremont St. and Temple Pl., which has been handsomely fitted up for his occupancy with an entrance and large display windows on each thoroughfare, mahogany cases and a balcony for the office and optical departments. In addition to the force which Mr. Goldberg has employed heretofore in his Studio store he will have as salesman B. J. Ginzberg, who was formerly with B. Ginzberg, his father, at 7 Temple Pl., and Mr. Harris, optician and watchmaker, formerly with Gurney Bros., Brockton, Mass.

Travelers visiting Boston during the week include: V. L. Burgessor, Krementz & Co.; R. C. Gowell, Alling & Co.; H. B. Bliss, B. M. Shanley, Jr., & Co.; John W. Reddall, Gorham Co.; M. Lanneau, Battin & Co.; Henry Juergens, Snow & Westcott Co.; Arthur Connett, Link & Angell; William Lane, Kent & Woodland; Mr Frink, T. F. Brogan & Co.; C. Glauder, J. D. Dalzell & Co.; E. Cooper Stone, Brassler Co.; R. W. Simpson, Jr., Riker Bros.; W. O. Holly, L. Tannenbaum & Co., Samuel Howland, Joseph Frankel's Son, Frank Jeanne, William S. Hedges & Co.; Mr. Johnson, J. M. Fisher & Co.; Charles Boss, American Cuckoo Clock Co.; Homer Strasberger, S. Sternau Co.

W. Skinner & Son is the name of a concern which has been incorporated to deal in glass ware with an authorized capital of $100,000. The incorporators are Thomas Skinner, Frances Skinner and Mary Skinner, all of Newark, N. J.

VICTORY WITH INDEPENDENCE

THE TRUSTS are not omnipotent by any means. Quite the reve The fact is they are scared right now. They wince whenever t hear the word "*court*" or "*law,*" and whenever a "*trust*" is mentio at Washington they all duck! There is not a single trust in the wh country to-day that is not feeling worried at this moment.

¶ Remember one thing: the people always win in the fight aga encroachment and usurpation. It is an old story, running right do through history. Tyranny and despotism may change their form fr age to age, and liberty may be menaced in a variety of ways; but the l struggle goes on. And the people have been winning the fight o liberty right along, ever since they forced old King John to sign Magna Charta at Runnymede!

¶ To-day the worst form of tyranny and despotism with which yo have to contend is the Trust. It is endeavoring to bring about a retu of slavery, industrial slavery, where white men would be the slaves. It is the people's fight again.

¶ To a man the people are with a firm that takes the Absolutely In e-pendent position assumed by this house. To a man they uphold h principle of choosing the goods they want without let, hindrance o restriction. That is our platform, gentlemen.

WE ARE DIRECT IM

D. C. PERCIVAL & CO., Inc.

373 Washington St., BOSTON, MASS.

Thieves recently broke into the retail jewelry store of Burns Bros., Pierpoint, S. Dak., and escaped with a large amount of plunder.

Washington, D. C.

TRADE CONDITIONS.

Dealers in novelty and souvenir jewelry articles are doing a land-office business this week with between 10,000 and 20,000 tourists in town and other excursions arriving daily

W. A. Ramsay, 1221 F St., N. W., has just returned from a trip through Florida and Cuba. Mr. Ramsay was accompanied by his wife.

A. O. Hutterly, vice-president of the Retail Jewelers' Association of the District of Columbia, is confined to his home with quite a severe attack of rheumatism.

A. D. Prince, of R. Harris & Co., is a member of the excursion party leaving for Atlanta, Chattanooga and New Orleans under the auspices of the order of the Mystic Shrine. Similar parties are leaving from other cities.

Cephas B. Rogers, for many years connected with the silverware trade of Meriden, Conn., while returning to his apartment in the Hamilton Hotel from a banquet at the New Willard Hotel, was struck by an automobile, sustaining a fractured thigh. Mr. Rogers was taken to the George Washington University Hospital.

The membership committee, together with the officers of the Retail Jewelers' Association, have entered on a strenuous campaign to enroll every jeweler and to awaken new interest on the part of the few delinquent members. Besides the usual aid and benefits to be derived from such an association the special inducement of the second annual picnic soon to be held is acting as a very seductive bait.

The death of Bendetta Constantini occurred at his late residence, 136 Massachusetts Ave., N. E., March 28, after an illness extending over a long period. Mr. Constantini, a native of Venice, Italy, came to this country when a youth, and for 40 years was employed as head watchmaker by Galt & Bro., 1107 Pennsylvania Ave., N. W. He was an expert in his work and well known by the trade. Three sons and a daughter survive him.

The following traveling men were in the city, last week: George A. Jochum, C. Cornehlsen; J. E. Simonson, Ludwig Nissen & Co.; John H. Sackett, Omega Watch Co.; R. C. Wilde, La Secla, Fried & Co., and Meriden Cutlery Co.; Herman I. Stermer, Bradley Reese Co.; Frank P. Steitz, representing William Link; William R. Eliot, Meriden Cut Glass Co.; representative of the Elbe Mfg. Co.; Theo. L. Parker, Martin-Copeland Co.; J. W. Armbruster, Illinois Watch Co.; J. G. Rindell, Champenois & Co.; representative of Wm. Blood & Co.

Peterboro, N. H., a town of 3,000, is at present without a jewelry store, Delmont E. Gordon having closed up his branch in that town and moved his stock to Hillsboro Bridge, where he has been in business for the past 18 years. Mr. Gordon states that the move was made necessary by the fact that he felt that he had to devote his entire time to the management of the Hillsboro business. He says an up-to-date jewelry store is much needed in Peterboro and will be well patronized, but he is not in the position to run his two establishments.

Philadelphia.

TRADE CONDITIONS.

The jewelry trade has suffered considerably during the past month as the result of local labor troubles. The year opened well and prospects were regarded as promising, but collections are unsatisfactory.

Clarence Kern, Mt. Joy, Pa., has given up his business.

William L. Spooner & Co., 205 S. 52d St., have added a new wagon to their delivery service.

R. Engelhart, recently in the business at Riverside, N. J., has accepted a position with Lit Bros.

George S. Katz, 1942 Germantown Ave., and Mrs. Katz have returned home from a Southern trip.

J. A. Cresse has resigned his position with L. M. Nelson. The vacancy will be filled by Mr. Jasper.

Mrs. E. S. Radley, wife of E. S. Radley, sailed for Europe March 31, accompanied by her son, Godfrey.

Thomas Campbell, traveling for M. Sickles & Sons, has returned from a trip through Pennsylvania.

Korn & Son, New York, have opened a branch retail store on Market St., near the Reading Terminal.

The cut-glass strike at Honesdale, Pa., has affected the delivery of the orders booked for the middle of March.

John Knight, of Bayes & Knight, silversmiths, received a painful injury, last week, while acting as short-stop in a ball game.

Judgment was entered by default in the local courts, last week, by J. E. Caldwell & Co. against Richard Buckley for $186.72.

J. E. Webb, West Chester, Pa., celebrated the opening of his new store, Saturday, by entertaining a party of jewelers from this city.

The store and fixtures of the late M. D. Sanders has been sold to Louis Mande, who now continues the business at 713 South St.

Under the terms of a new ordinance, signed by the mayor of Atlantic City, N. J., all transactions in pawnshops must be reported daily to the police.

The Bailey, Banks & Biddle Co., made and designed the handsome shield presented to the Lawrenceville school by the Princeton Club of Lawrenceville.

John Johnson, one of the oldest watchmakers of this city, received the congratulations of his many friends upon the 48th anniversary of his wedding, April 2.

Robert Strawbridge, of Strawbridge & Clothier, who has been touring Europe and the surrounding countries with Mrs. Strawbridge, will arrive in this city April 11.

Albert Sommer has severed his connection with the Sommer Clock Co. and started in business as a manufacturer and importer of clocks under his own name at 1626 N. 11th St.

J. E. Caldwell & Co. exhibited a fine line of clocks in their show rooms, last week. Exclusive designs in the Whittington and Westminster chime clocks were included in the display.

The property at 37 S. 13th St. has been leased by Robert L. Saunders, 11 and 13 S. 8th St. Improvements and alterations have already been started in the leased building, which Mr. Saunders expects to occupy shortly.

The stock and fixtures of Thomas J. Hannigan, 1914 Columbia Ave., who has discontinued the retail business, will shortly be sold at public auction. Mr. Hannigan recently associated himself with the Horace N. Tuttle Co., wholesale jewelers.

A. N. Peoples, West Chester, Pa., has returned home after a four months' trip through the South. Mr. Peoples has brought back a turtle weighing 114½ pounds, which he caught. The turtle which has a beautiful tortoise shell, is displayed by the owner in one of the show windows.

H. A. Cain, watchmaker at 2924 Ridge Ave., who has been for two weeks in Atlanta, Ga., as the official timekeeper for the Cain & Lebarry automatic device for stopping railroad trains, reports that trains were stopped in from 13 to 18 seconds, when running at 40 and 50 miles an hour.

Though Max Mayer, formerly of 605 Market St., identified part of the jewelry stolen, Feb. 1, from his store, which was found on Joseph and Jacob Goldberg and Harris Rothstein, arrested recently in New York for having jewelry looted from various stores in the east, he could not positively identify the suspects. Detective Walsh returned to this city with Mr. Mayer Wednesday.

Richard Treslou, formerly a floorwalker for N. Snellenburg & Co., was sentenced, last Thursday, to 18 months' imprisonment by Judge Barratt in Quarter Sessions Court, No. 1, for stealing $1,400. His thefts extended over a period of several months. Mary A. Kiely, who acted as cashier in the same store, was allowed to go under a suspended sentence.

The following jewelers were visitors to this city during the week: Stewart Ackerman, Phillipsburg, N. J.; P. Ziegler, Doylestown, Pa.; Mrs. Righter, Conshohocken, Pa.; M. Silverman, Atlantic City, N. J.; D. H. Krouse, North Wales, Pa.; M. E. Hunter, Beverly, N. J.; E. K. Bean, Sansdale, Pa.; H. B. McFarlan, E. Downingtown, Pa.; A. T. Heberling, Parkersburg, Pa.

Pittsburg.

Sam F. Sipe entertained L. P. White, of Philadelphia, and several other friends at luncheon last week at the Union Club.

J. Alexander Hardy, of the Hardy & Hayes Co., has returned from a business trip to New York where he had been buying Spring stock.

J. T. Montgomery, New York, was a visitor to Pittsburg as a guest of the Jewelers' 24-Karat Club, remained over several days to visit his friends of this city.

Out-of-town jewelry buyers in Pittsburg last week included: H. A. Jackson, Somersburg; T. N. Smith, Morgantown; G. F. Lozer, Patton; Frank Murdock, Ligonier; F. H. Hayes, Washington.

Heeren Bros. & Co. made the Erie souvenirs, representing carrots and gave to the members and guests of the Jewelers' 24-Karat Club, at their annual banquet last week as a memento of the occasion.

The members of the Jewelers' Duckpin Bowling League, who rolled Monday night of last week, had an interesting time. The Vilsacks took three games from the Lochs, the Roberts took the same number from the Terheydens and the Wattles took three from the Diamonds.

The alterations and additions to the W. J. Johnston Co.'s handsome quarters in the Union Bank building are nearly completed. The painters were still at work last week putting on the finishing touches, but only a few days' more work apparently remains to be done to finish one of the handsomest wholesale jewelry establishments in America.

A voluntary petition in bankruptcy has been filed by Marcus Marks, Homestead, Pa., who conducts a retail jewelry store at 531 E. Eighth Ave., that town. The failure is supposed to date back to the business depression here of two years ago, at which time Mr. Marks fell behind, owing to an almost cessation of business. Marks started in the jewelry trade at Braddock and about 10 years ago moved to Homestead. His liabilities are said to be $2,966.89 and his assets $2,065.08.

Ralph Heeren, a son of Otto Heeren of Heeren Bros. & Co., was married in Havana, Cuba, March 28, to Miss Drake of Cleveland, the wedding being a quiet affair. Mr. and Mrs. Otto Heeren being the only members of the Heeren family present at the ceremony. The young couple were handsomely remembered by the employes of the Heeren establishment, who sent them a beautiful silver flat ware set. Mr. and Mrs. Ralph Heeren intend to make their home in the Isle of Pines for the present, where Mr. Heeren has a fruit and vegetable farm.

Irma Freeman, who says she is 17 years old, was arrested last week in a downtown store and charged with shoplifting. She secured $90 worth of jewelry in addition to a number of other articles and gave the name of a customer who had a charge account at the store. The matter was investigated before the goods were delivered over, the clerk who waited on the woman saying the goods would be delivered. Through this precaution it was discovered that the woman was an impostor. She, however, is not a professional at the business.

It has not been decided as yet what tion will be made of her case.

stine V. Gillespie, of Gillespie Bros., building, surprised his friends last by getting married. He quietly away to Sandusky, O., where, on 29, he married Miss Lucie V. e. The wedding was a very quiet only the immediate relatives of both being present at the marriage. Mr. Mrs. Gillespie left immediately for ork and set sail for Europe on the p *Carpathia* and will tour the old or the next three months. Mr. Gil- friends in Pittsburg wish him much ess.

h C. Wasson, formerly manager of velry department of a local depart- store and former chairman of the committee of Pittsburg councils, nfessed to the grand jury to ac- a bribe, is not to be prosecuted fur- He is now serving 18 months in the n Penitentiary and in view of the at he came forward and aided the by telling all he knew about the g transactions, the grand jury, in nending indictments against 100 recommended that no further prose- be laid against Wasson, who will 4 months and 15 days of his sentence, g time off for good behavior.

ng the traveling representatives who on the trade here last week were the ng: W. R. Shute, Day, Clark & . H. Davison, Kohn & Co.; F. F. . Gibson, Krugler Co.; J. W. Me- n, Wilcox Silver Plate Co.; H. C. , Geo. Borgfeldt & Co.; A. Ruther- Taylor & Co.; Emil Berbeck, Her- emer Co.; W. R. Eliot, Meriden Cut Co.; Bert Ganz, Leroy Mfg. Co.; Mr. Wm. L. Sexton & Co.; DeForest arbour Silver Co.; C. B. Bartlett, g Mfg. Co.; C. P. Young, White- Blank; Milford G. Fox, Gustave Fox os. J. Sideman, Redlich & Co.; C. M. Depasse Mfg. Co.; H. B. Bliss, B. anley, Jr., Co.; J. P. Fagan, Unger J. N. Curtis, Meriden Silver Plate Alfred Nathan, Henry Baschkopf; Alfred Nathan, Workman & New-

ry Held, doing business in Carson St., u Side, who last week filed a voluntary n in bankruptcy, has liabilities of 38 and assets of $2,696.85. Several s creditors were caught for large ts. Following is a list of those he e n excess of $50: P. A. Klein, $140; ronchield, $81.08; Dennison Mfg. Co., , Rockford Watch Co., $170; M. h ann, $63; Non-Retailing Co., $376; B. C. Weinhaus, $96; Star Watch s Co., $64; John A. Goldber, $756; H. l nka & Co., $427; Adolph Rosenberg, Biggard & Co., $205; Graffner Bros., . Frendheim Son, $53. With these ts representing notes: Dr. W. H. , $500; Carl Theobald, $500; J. A. rg, $90; A. A. Cosatch, two, one 00 and another for $635. The United t marshal closed the store and Held's a will be wound up as rapidly as the nkptcy court will permit. This makes cond failure to occur among the jew- r of the South Side of Pittsburg dur- g is year.

Canada Notes.

H. Robinson, West Lorne, Ont., has sold his business to J. S. Ward.

Charles Willeumier, wholesale watchmaker, has registered at Montreal.

H. G. Willis, Lloydminster, Man., has given a chattel mortgage to F. D. Mayberry, of the same city, for $1,629.

Benjamin Kent, of B. and H. B. Kent, Toronto, leaves next week on a pleasure trip to California. He will be absent about two months.

D. R. Dingwall and D. W. Dingwall, of D. R. Dingwall, Ltd., Winnipeg, Man., have returned from an extended buying trip to England and the European continent.

R. S. Hutton, of Wm. Hutton & Sons, Sheffield, Eng., has returned from a trip to the Pacific Coast and is spending a few days in Toronto before returning to England.

An absolute bill of sale has been given by the Jewelry & Import Co., Ltd., Vancouver, B. C., and by Goldie Goldberg to the Rubinowitz Department Stores, of British Columbia.

Lawrence Kelly, convicted at Peterborough, Ont., of stealing a large number of lockets and watches from the samples of S. Michaelson, traveler for the J. A. Knox & Co., Toronto, Ont., has been given one year's imprisonment.

Among traveling represenatives calling on the Toronto, Ont., trade, last week, were: Alfred E. Hughes, Bishop Co.; J. R. S. McLennon, manager of the Montreal agency of John Rounds & Son, Sheffield, Eng., and F. H. Scott, Montreal.

M. William Birks, Mr. Binns, Mr. McKee and Mr. Eadie, of Henry Birks & Sons, Ltd., members of the Montreal and Winnipeg staffs, respectively, have just returned from a European business trip, having visited England, France and Belgium.

On the morning of Tuesday, March 29 the second-hand store of Max Finkelstein, Wellington St., Ottawa, was entered by burglars by cutting a pane of glass in the front door. They took about $300 worth of rings, valuables and other jewelry.

Maurice Gerrald, a well known young man of Hamilton, Ont., last week was found by the police mining in the side of Hamilton Mountain, a mile east of the city. He had a complete mining equipment and he told the police he was digging for diamonds that he was sure were to be found under the mountain.

Out-of-town jewelers calling upon the Toronto, Ont., trade, last week, included: C. Van Valkenburg, Jr., Forest; G. L. Wehrley, Harriston; E. F. Davis, Tillsonberg; W. Ashcroft, Wiarton; T. C. W. Watson, Newmarket; J. E. Nettleton, Penetanguishene; R. N. Bassett, Whitby; H. Wendt, Clifford, all Ontario, and W. H. Wilkerson, Victoria, B. C.

The marriage of L. Herbert Luke, late of Ambrose Kent & Sons, Toronto, Ont., to Miss Maude Elizabeth Hearn, Toronto, will take place to-day, April 6. Mr. and Mrs. Luke will sail from Boston for Europe April 12. During the trip abroad Mr. Luke will visit the principal diamond and jewelry centers and select a choice stock, resuming business on his own account upon his return.

Henry Birks, of Henry Birks & Sons, Montreal, discussed with a representative of THE JEWELERS' CIRCULAR-WEEKLY last week the conditions of the new tariff arrangement that was made recently between the United States and Canadian Governments. The concession of 2½ per cent. on American watch movements and parts will not, in Mr. Birks' opinion, affect importers in the trade to any appreciable extent.

Anne Duquette has been remanded for trial by Judge Bazin, at Montreal, on a charge of stealing jewelry from the establishment of Theophile Grothe, E. St. Catherine St. The police state that the woman has been previously arrested as a shoplifter. In the present case she went into the Grothe jewelry store last week to make a purchase. While looking at stock she is alleged to have slipped two valuable brooches into her hand satchel. The police were telephoned for and the woman was arrested by Detective Riopel.

A man and woman supposed to be diamond smugglers and carrying $30,000 worth of gems, passed through London, Ont., on Monday of last week,, closely followed by two American customs detectives, ready to arrest them should they attempt to cross the border. It is believed that the American customs' authorities received information that the pair would try to enter the United States with the diamonds. They came from Toronto, where for some days they had been closely shadowed and changed cars at London. As no arrests have been reported it is surmised that the diamonds have been transferred to other parties.

Savannah, Ga.

S. E. Theus is a guarantor of the second annual music festival by the New York Symphony Orchestra, to be given in Savannah, April 6 and 7.

R. Van Keuren & Co., Theus & Co.; A. L. Desbouillons, and the Bostwick Optical Co. made donations of articles awarded as prizes at the mammoth bridge party given at the De Soto Hotel here, April 5.

S. E. Theus, Theus & Co., has been elected a vestryman of St. John's Episcopal Church, and has also been appointed chairman of the house committee of the Savannah Chamber of Commerce.

The following traveling representatives were in Savannah, recently: Chas. H. Horton, Bradley & Hubbard Mfg. Co.; J. Zineman, Heyman & Kramer; J. Percy Wrayton, Durand & Co.; G. H. Sluter, Bippart, Griscom & Osborn; Wm. McGill, William B. Kerr Co.

The new store which has been opened by G. W. Haltom, at Sixth and Main Sts., in the Fort Worth Club building, Fort Worth, Tex., has been generally credited with being one of the finest jewelry establishments in the southwest. It is a veritable palace of mahogany and glass and promises to be one of the show places of that city. A beautiful cut glass room has been installed in the rear, which contains features designed especially for showing off the beauty of these wares. The lighting fixtures in the store are of the most modern type. Mr. Haltom's store has been the subject of a number of laudatory articles in local newspapers.

NEVER before in the history of our Company has there been such a large demand for Railroad grade movements of our manufacture.

The reputation they have established among Railroad Men as being the "Supreme Railroad Watch" is due entirely to the careful attention given to every detail of their manufacture.

We suggest the advisability of having in stock a few of each of these grades in order to meet the demand that is constantly increasing for them.

n Abel and Mr. Andrews, of Abel & Co., were here, last week.

ude Seymour, vice-president of Otto g & Co., is back from California.

iter Mayer, of Wallenstein, Mayer & Cincinnati, O., was here last week.

y" Lamb is resting up at Coronado after a trip through old Mexico.

Bennett, of the Reed-Bennett Co., apolis, Minn., was here, last week.

d Haller, with J. Ziegler & Co., served jury last week before Judge Gowing.

Loeb and Max Loebnitz, with the er-Hampden Co., were here, last week.

rry E. Jones, with the Wadsworth Case Co., visited St. Louis, last week.

J. Finch, representing the R. F. Sim- Co., is on a trip through the middle

Levy, retail jeweler at 6236 Went- Ave., has removed to 6248 same

S. McGillivray & Co. have removed 163 Dearborn St. to the Republic ing

Crawford, with J. W. Forsinger & s on a trip through Ohio and West nia.

J. Walther, representing the D. F. s Co., Attleboro, Mass., is on a visit factory.

V. Ghislin, Chicago manager for the m Co., is on a trip to New York and dence, R. I.

F. Dailey, formerly of St. Louis and go, has opened an installment clothing ss at Evansville, Ind.

Stein & Ellbogen Co. is to take room addition to its present quarters as greatly pressed for room.

. Laiblin, with the R. Wallace & Sons Co., is attending the Hotel Men's ntion at Los Angeles, Cal.

A. Armstrong, with the Paye & Mfg. Co., is spending a week here will soon leave for the northwest.

stock of Campbell & Co., 827 W. 63d as been bought by the United Watch which is closing it out at auction.

S. Richter, representing Doran, Bag- Co. and the N. Barstow Co., is on a 's trip to the factories of these firms.

corporate name of the Western Selling Agency, Omega Watch Co., has been changed to the A. Max Holzheimer Co.

Geo. H. Thomas, representing the Shepard Mfg. Co., Scharling & Co. and the Hartford Sterling Co. is on a trip to Denver, Colo.

Frank Shinn, traveler for the Keller Jewelry Mfg. Co., was, last week, called to the bedside of his mother, who is very ill at Toulon, Ill.

A. E. Madsen, of Rettig, Hess & Madsen, stopped over here, last Saturday, on his way to Hot Springs, Ark., for a three weeks' stay.

The Bartels Optical Co., now in room 702, will take room 703 in addition to its present quarters and will have double the space it has now.

H. B. O'Brien, general sales manager of the Alvin Mfg. Co., was here last week. Mr. O'Brien is making a tour of the principal western cities.

Theo. Jacobs has acquired more vacant property on Milwaukee Ave., opposite his present holdings, and will erect a white tile business block there in the Fall.

The H. Lesch Jewelry Co., now at 164 Madison St., will remove to the sixth floor of the Powers building, 156 Wabash Ave., about the middle of this month.

The western office of the Daggett & Clap Co., Potter & Buffinton Co. and Whiting & Davis will remove from room 405, but haven't decided as yet where they will go.

L. W. Moser, formerly traveler for Otto Young & Co., has quit the jewelry business to devote his attention to a 320-acre farm near Salem, Ill., left to him by his father.

The employes of the Juergens & Andersen Co. gave an entertainment and ball at Wicker Park Hall on the evening of April 1. The affair was a success and was enjoyed by all.

C. R. Taylor, nephew of A. C. Taylor, Cedar Rapids, Ia., and who was formerly in business at Burwell, Ia., is finishing his course in optics here and will open a new jewelry store at Ord, Nebr., June 1.

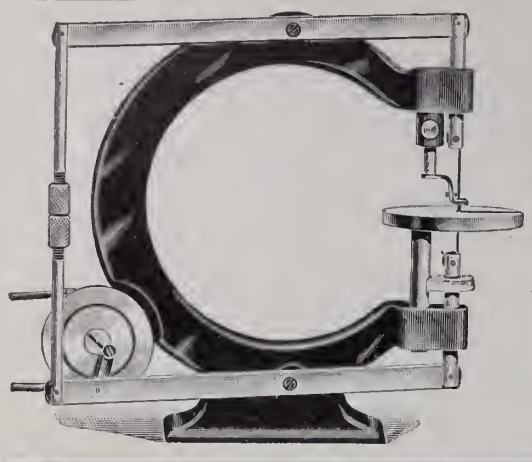
W. H. Queeman, traveler for the F. C. Happel Co., has bought a half interest in the retail jewelry business of W. A. Seaman, at Gothenberg, Nebr. Mr. Queeman will still continue to travel on the road.

The stork got busy in the jewelry trade here, last week. To the families of Walter Frazer Brown, of the Bannatyne Watch Co., and Paul Braude, of Emil Braude & Bro., it brought girl babies. To George Spies, of Spies Bros., it brought a baby boy.

T. S. Simpson, representing the E. Howard Clock Co., has returned from Corunna, Mich., where he superintended the erection of the clock for the new court house there. The clock has four six-foot illuminated dials and strikes hourly.

John Woollett, watchmaker in the Columbus Memorial building, is on a trip to New Orleans and attended a meeting of the Imperial Council Ancient Arabic Order Mystic Shrine. Mr. Woollett, who is a musician of note, plays a horn in the Medinah Temple Band.

The estate of George E. Marshall has bought out the interests of A. S. True and W. S. Hyde. This latter has severed his connection with that corporation. Mr. True is still secretary and treasurer. Mrs. Geo. E. Marshall, widow of the founder of the business, is now the president of the concern.



Anderson, McCarthy & Co. is the name of a new mail-order jewelry house at 1519-1521 Wabash Ave. The president is Jay J. McCarthy, and the secretary and treasurer is C. H. Anderson. The concern is incorporated under the laws of South Dakota with $200,000 and is capitalized in Illinois for $20,000.

Leon D. Weiss, who reported to the police the loss of $5,000 worth of diamonds, said to have been owned by Samuel Frackman, and who the police claim afterwards raised the amount of the loss to $50,000, was at one time a member of the firm of Weiss & Weiss, 142 W. Madison St. The latter firm, consisting of father and son, jewelers, failed two years ago.

Among the buyers here last week were: Andrew Wilson, Winfield, Kans.; L. H. Holbrook, Kenosha, Wis.; H. S. Siebel, Saginaw, Mich.; C. E. Prouty, Bradford, Ill.; A. Hawkins, Clayton, Ill.; C. O. Booth, Oelwein, Ia.; Jack Kaden, Grand Haven, Mich.; Wm. A. Thayer, Niles, Mich.; Bert Bills, J. A. Bills & Son, Vinton, Ia.; Wm. M. Shlaes, Hancock, Mich.

S. T. A. Loftis visited the St. Louis branch of Loftis Bros. & Co., and made some important changes recently. J. C. Morefield and Harry C. Taylor are no longer connected with the branch there. Edward S. Jacobs, formerly of Vahlman & Jacobs, East St. Louis, Ill., is representing the concern in the latter town with an office in the Colma building.

Among the diamond men here last week, were: Sig. Stern, of Stern Bros. & Co.; J. Judels, of H. F. & J. F. Judels; Mr. Shire,

...iver R. De V. Carroll, of the Her... ...Keck Mfg. Co., in transferring to ...f now as trustee of this estate the ... of said company, filed in the United ... District Court, March 31, an ac... ...of his trust. He was appointed re... ...ceiver on Feb. , 1909, and during that time the receipts amounted to $19,759.65, and the expenditures $11,594.38, leaving a balance of $8,165.24 going to the trustee. A report of the Duhme Jewelry Co. will be filed later, when the court determines what shall be done with the property.

Andrew Mich, 930 W. Liberty St., has added an adjoining store room, having a floor space of 20 feet by 10 feet, which now gives him a frontage of 40 feet by a depth of 40 feet. The whole has just been remodeled and is considered quite an acquisition to the west end of the city, it now being the largest and handsomest store in that part. The entire front is plate glass, thus giving splendid opportunity to display goods. The interior is fitted up with new fixtures and cases in solid oak of the latest styles. Mr. Mich has added an optical department, and also increased his force and his stock.

Traveling representatives who called on Cincinnati trade during the past week included: Max Leebwitz, Dueber Watch Case Mfg. Co.; Mr. Putman, R. H. Ingersoll & Bro.; Mr. Neal, Keystone Watch Case Co.; Mr. Gerbbins, Illinois Watch Case Co.; E. M. Dellar, W. Hicks' Sons; Mills Smith, R. Blackinton & Co.; J. M. Curtis, Meriden Silver Plate Co.; F. F. Gibson, Gibson-Krugler Co.; C. W. Thomas, Allsopp Bros.; J. N. Beckwith, Frederick B. Weiss, Inc.; M. L. Barnard, Larter & Sons; H. A. Tibbles, Mandeville, Carrow & Crane; George W. Beardsley, Allsopp & Allsopp; Mr. Lucas, Frank W. Smith Co.; W. S. Noon, Cory, Clark & Noon; C. P. Young, Whiteside & Blank; S. W. Pickering, A. Ludeke & Co.; Mr. Quinney, Irving Cut Glass Co.; A. E. Rich, Derby Silver Co.; Charles Steiner, L. Adler & Son.

Milwaukee.

Jacob Walters, Park Falls, Wis., recently found four pearls, valued at about $50, in a can of oysters.

William Salsbury has opened a new watch and clock repairing establishment at Dodgeville, Wis. Mr. Salsbury was formerly connected with J. H. Cartwright, well-known jeweler at Dodgeville.

Robert Rank, with the New York office of the Bunde & Upmeyer Co., was married at Milwaukee, March 29, to Miss Agnes Zellman. After a short wedding trip in the east Mr. and Mrs. Rank will be at home in New York.

Considerable excitement was caused at the jewelry store of Edward Koenig, at Green Bay, Wis., recently, when a team hitched in front of the establishment ran against the store building, broke down a large clock sign and narrowly missed smashing the large plate glass windows.

Because he acted as an auctioneer and sold jewelry without the required license, Thomas P. Moody, Chicago, was fined $25 and costs in the Milwaukee Municipal Court recently. Three Chicago jewelers opened headquarters at 423 Grand Ave. some time ago, and entered into a contract with a local auctioneer for the sale of various articles. Local jewelers strongly objected to the transient merchants and the arrest of Moody followed. In court the defense contended that Moody was but an employe of the local auctioneer, who was under contract for the sale of the goods, but Judge Neelen constructed the city ordinance to the letter and imposed the minimum fine. The defense has asked that in the event of further arrests, the court withhold the examination, pending an appeal to the Supreme Court of the first case.

Following an agitation that has been started by retail merchants, particularly the jewelers of Milwaukee, Bernard M. Kaatz, itinerant merchant, and manager of a store where "special sales" of jewelry have been conducted for some time, was arrested recently on the charge of having obtained money under false pretenses. Joseph Mariacowicz filed a complaint against Kaatz, charging that he had selected a watch for which he was to have paid a total of $48, but paid only $10 down when he received it, the remainder to be on the instalment plan. Before making more than the initial payment, Mariacowicz secured an appraisal of value from a local jeweler, who gave his estimation of value at $1.69. Because there were insufficient grounds for prosecution under the circumstances, as it appeared that the watch had not been represented to be worth $48, Kaatz escaped punishment, although Judge Neelen ordered him to return the initial payment of $10.

The Merchants and Manufacturers' Association, particularly the Retail Merchants' division, has taken up the matter of bringing about an enforcement of the city ordinance regarding itinerant merchants. In a recent report made upon the matter, Secretary William George Bruce of the association, said: "To allow the ordinance in question to be evaded hurts the reputable merchant and permits wrong to be done to the innocent purchaser. Several such instances have come to our attention. In one case an innocent purchaser paid $7.50 for an alleged gold ring, which was later tested and found to be worth 75 cents. In another case a man paid $46 for what he supposed and what was represented to him to be a gold watch. The watch was later ascertained to be worth but $4.50, yet no prosecutions of the fraudulent dealer were made." One of the proposed amendments to the law will provide that no licenses shall be issued to transient merchants unless they can show proof of good character and previous good record. Jewelers are determined to push the matter to see that there is a more rigid enforcement of the existing law as well as bringing about an improvement in the ordinance if this is possible.

John Schneider, Charleston, S. C., recently missed two watches out of his repair case. One is a 16 size, 19 K. gold, Swiss, key wind movement, with a gold dial, and the other is an O size, 15 jewel Elgin 14 K. gold, cases engraved on the back of inside cover with the word "Fitzsimmonds," while on the outside an old English letter "F." Should any reader be offered these watches or be entrusted with them to be repaired, he is urged to communicate immediately with Mr. Schneider.

This is Dan I. Murray, Manufacturer and Broker, as well as the Leading Auctioneer of America

SAVED FROM BANKRUPTCY

But I always do that. Read this letter carefully, Brother Jewelers. I have many letters of this kind from jewelers, attorneys, trust companies and banks. No jeweler ever failed after my sales. 20 years of success is my record. This, my last sale, ran four months and my daily average profit was 31 per cent. over cost of goods. I sold the fixtures also without a loss. This is not only salesmanship, but cool-headed business judgment. If you need money, if you want to reduce stock, if you need advice that will make you money, consult me. I often advise against auction sales, as I just did for a large house in New York, where I knew a sale would hurt them. That is the kind of a man you deal with when you deal with me, and if you need a sale you can have two men at the price of one. Gentlemen, not fakers. I also furnish you any amount of goods desired at 25 to 50 per cent. under market prices. You pay for what you sell, return balance. Sales made on commission or share of profits.

DAN I. MURRAY

3 Maiden Lane - - - - NEW YORK
151 Wabash Avenue - - CHICAGO, ILL.
512 Race Street - - - CINCINNATI, O.
183 Eddy Street - PROVIDENCE, R. I.

This is H. T. Stapleford, who has been in my employ for the past 10 years. Just closed out the finest sale in Georgia, for the Madison Jewelry Co., Madison, Ga. At present closing out the estate of Quintard Bros., Poughkeepsie, N. Y., and making the largest sale ever made in that city.

To Whom It May Concern: Syracuse, N. Y., February 14, 1910.

This is to certify than Mr. Dan I. Murray, who has just concluded a four months' sale with us, has pulled us out of a bad hole and, through his advice, good judgment and splendid salesmanship, has enabled us to pay our creditors in full and saved us from going into bankruptcy. We dreaded the idea of an auction, but after consultation with our creditors and others, found Mr. Murray has greatly exceeded our expectations and cannot too strongly recommend any firm to employ him who wants to realize 100 cents on the dollar for their stocks. (Signed) VANDERBURG & DURNEY, H. C. Vanderburg, Successor.

EMPIRE BOXES
are equipped with our Patented Double Action Spring, which holds the box rigid when open or closed. They are made of steel and

ARE BETTER
because they will not warp or shrink, and that Empire boxes will always keep their shape. They are neat in construction and strong and durable, and

COST LESS
than wooden or fibre boxes, because we make them in very large quantities by our automatic machinery, and therefore cost *us* less to produce—you deriving the benefit. They

ARE GUARANTEED
against all defects in material and workmanship, and we will repair and replace any b found defective. They therefore

ARE THE BEST
because they are the neatest, cheapest, m durable boxes on the market.
If not acquainted with our line ask us send you free our booklet,

THE REASON WHY
If you feel that you do not require enou boxes to order from us, let us send you t name of a jobber nearest to you. Ask him f Empire boxes.

EDWARD WARNER, Pres. and Treas. RUDOLPH J. WARNER, Secy.

Hanford, representative of the Wm. bert Clock Co., has left for an ex- e business trip through Illinois.

ry Burgheim has moved from the Theater building to a temporary loca- t 42 N. Illinois St. Later he will to W. Washington St.

ter A. Burhman, for some time travel- esman for the Baldwin Miller Co., is brother, has established a retail t Newcastle under the name of Burh- Bros

r several years with N. M. Rubins, Haute, Ind., E. S. Williams has taken tion with John P. Mullally, of this Mr Williams will take charge of the store as manager.

rles Mayer & Co. furnished a cut flower basket and cut glass punch the Indianapolis Automobile Trade ation which were used as prizes in omobile floral parade last Wednesday.

ert Zoller, manager of the hollow and jewelry department of Charles ar & Co., has gone to Europe for three s. While away he will place orders welry and novelties in the various ies which he visits.

M Stevenson has located at 46 rley building, where he is manufac- jewelry specialties and also doing al repair work. He has been en- in business in a small way in the sor Block for several years.

-of-town jewelers in this city last included: L. J. Savage, Macy; F. L. e, Cloverdale; J. F. Kiser, Muncie; 3. Connaway, Morristown; Charles Frankfort; John W. Hudson, Fort- C K. McCain, Kokomo; Walter A. nan, Newcastle, and F. C. Sheldon, yville.

ncilman George B. Rubens has intro- an ordinance in the city council reg- the use of hat pins. It provides that ns must not protrude more than one- nch from the crown of the hat, unless oint is protected by a metal or rubber n. For violations a fine of from $1 is provided. Mayor Shank states he gn the ordinance if it is passed.

Cleveland.

C. Joss, New Philadelphia, was a re- buyer on a large scale.

D. Johns, Akron, has opened a new and was busy the past week in plac- is order for fixtures with Cleveland facturers.

bert Miller, of Lorain, and E. E. Critz Elyria, were also large purchasers at wholesale stores during the past week. ng other buyers, last week, were F. N. ey & Co., and Ralph Hogan of Akron, Davis and G. F. Elgin, of Kent.

E. Oyster, Alliance, has sold his store arl J. G. Lovett, who took possession, 2. It will be remembered that Mr. t formerly conducted a jewelry store at Transville, Pa., and sold the same to C. F. Gardner of Newton Falls recently. Mr. Gardner bought the lease and fixtures and has purchased a complete line of new goods, the most of it having been placed through Cleveland wholesalers.

Harry M. Taylor, proprietor of a jewelry store in Louisville, has filed a deed of assignment in Probate Court of Stark County. Attorney Niles A. Sponseller was appointed assignee. Taylor's assets are estimated at $70 and his liabilities at $900.

The following were among the traveling salesmen who visited Cleveland, last week: S. C. Corbin, Waterbury Watch Co.; M. Hirsch, Leon Watch Case Co.; Col. J. L. Shepherd, Keystone Watch Case Co.; John F. Galloway, Wm. A. Rogers, Ltd.; H. L. Sherman, Simpson, Hall, Miller & Co.; A. H. Oakley, Thornton Bros.; G. W. Bleecker, Martin-Copeland Co.; R. H. Talbot, Alvin Mfg. Co.

Toledo.

Norman Hascall and L. S. Freeman, of the J. J. Freeman Co., have returned from a business trip to New York.

The Walcott-Kapp Co. has just taken on its first stock of new Spring goods, subsequent to its reorganization last Fall.

The Hull Bros. Umbrella Co. has just closed out its retail store in the downtown section and will not maintain another for the present or until a suitable location is secured. The building formerly occupied by the company as a factory and retail store, prior to the erection of the new factory building on lower Summit St., has been leased to a large hardware company.

The Clinton-Close Co., which has been conducting a retail store at the corner of Adams and Summit Sts. for the past four years, has just sold out its entire stock to the Lamson Bros. Co. and will retire from business. The retiring firm gave considerable attention to jewelry novelties for ladies and for a part of the time Joseph Teipel conducted his umbrella store in connection with the larger institution. The new operators maintain a large and well assorted department of jewelry novelties.

At last decision has been reached in regard to David Werbe and David Blair, Detroit pawnbrokers who have been before the Toledo courts for months in connection with alleged reception of goods stolen from a Toledo store more than a year ago. David Blair pleaded guilty and was sentenced to one year in the Ohio penitentiary, the minimum sentence being given as the defendant's physical condition is such as to demand medical attention and as he was an employe of Werbe. David Werbe failed to appear and after postponing action twice, Judge Brough declared his bond forfeited. It is likely that a reward will be offered for his capture. His bond was signed by Abraham J. Smith and Rachel Smith, dealers in jewelry and leather goods at 39 Summit St. Within two hours after Werbe's bond had been declared forfeited the signers of his bond had filed instruments in the recorder's office showing that they had conveyed or placed mortgages on practically all their property. Suit for recovery of the amount of the bond will be started immediately and in an early statement the Smiths have stated that if sued they will reveal certain things told them at the time of their signing the bond, at which time they say they were assured that they would be amply protected.

Kansas City.

Leslie Burkland and wife, Moberly, Mo., spent Easter in this city.

J. R. Mercer and wife have just returned from a trip to Louisiana and Texas.

Leslie White, with D. B. Ward & Co., was in the house again last week, refilling his trunks.

D. C. Burchett, Kirksville, Mo., was in this city, last week, on his way West for a pleasure trip.

G. A. Lefler, Iola, Kans., is in the city, taking a course at the Missman School of Engraving.

C. E. Manor has gone down to Bartlesville, Okla., to conduct a sale for the Owens Jewelry Co.

C. W. Morrell has gone out on the road for the C. B. Norton Jewelry Co., taking the Kansas territory.

Ray Gregory, a stone setter, formerly of St. Louis, has accepted a position with the Porter & Wiser Jewelry Co.

W. C. Vandel, traveler for the Edwards & Sloane Jewelry Co., was in the house, last week, selecting new stock.

W. D. McCune, with the Woodstock-Hoefer Watch & Jewelry Co., is serving on a jury in Independence, this week.

L. Meyer, president of the Meyer Jewelry Co., has just returned from a combined business and pleasure trip to Chanute, Kans.

Harry Berger, formerly with Porter & Wiser Jewelry Co., has resigned to take a position with W. F. Kirkpatrick & Co., St. Joseph, Mo.

F. G. Buchan, Aurora, Neb., last week, passed through the city on his way home from a stay at Hot Springs, Ark., and other southern resorts.

E. H. Snow, with the Woodstock-Hoefer Watch & Jewelry Co., was in the house last week, replacing his trunks and reported that a Santa Fe freight train ran over one of his watch trunks at Kiowa, Kans. Several watches were damaged.

The following travelers called on the trade in this city last week: Mr. Newcomb, Maple City Cut Glass Co.; Fred Pattee, Waterbury Clock Co.; Hugh King, Queen City Silver Co., and Fessenden & Co.; I. A. Levis, Oppenheim & Strauss; S. J. Summer, Providence Mfg. Co.; Mr. Hirsch, Nathan Hyman Co.; Walter Strauss, Jacob Strauss & Sons; L. O. Binder, Ernest Gideon Bek.

The following jewelers were in this city during the past week: J. O. Bates, Manhattan, Kans.; A. J. Kribler, Wellsville, Kans.; Mr. Clement, of Clement Jewelry Co., Springfield, Mo.; W. H. Meyer, Lawson, Mo.; M. T. Chapman, Atoka, Okla.; John Morrison, Morrison Bros., Olathe, Kans.; Mr. Noe, of Noe & Noe, Hill City, Kans.; J. H. Whiteside, Liberty, Mo.; Abe Rosenfield, of Rosenfield Bros., Leavenworth, Kans.; D. C. Burchell, Kirksville, Mo.; J. W. Trowbridge, Williamsburg, Kans.; R. D. Dawson, Clinton, Okla.; J. W. Phillips, Chanute, Kans.; C. F. Parker, Collinsville, Okla.

NOTICE

We don't "knock" our competitors in order to increase the sales of R. & L. Watch and Clock Oils. Apart from the fact that it is exceedingly poor taste, we don't find it necessary to resort to such methods to increase the sales of a product that is a recognized success. Watchmakers by the thousands all over the United States are using R. & L. Oil and pronounce it the best oil ever brought to their notice. Results tell the story.

THE MOST FAVORABLY KNOWN AND SUCCESSFUL MAN IN THE BUSINESS

Many jewelers who wish to retire from business, reduce stock or secure money to meet obligations, sell their stocks as a whole, and the best they can realize is 50 to 60 per cent. of invoice cost of goods. Now, from a business standpoint, why does the established jeweler dispose of his stock, or a portion of same, in this manner, where, by holding an auction sale in his own establishment, under his own name, he can realize at least 100 cents on every dollar of invoice cost, and in most instances more? Through my methods I can crowd your store day after day with the best people of your city and turn your stock of fine diamonds, sterling silver, cut glass, watches, etc., into CASH at a good profit to you, and at the conclusion of your sale you will be more favorably known in your city and vicinity than ever before.

A letter from the leading jeweler of Johnstown, Pa., follows:

H. A. HERSHBERGER,
JEWELER AND OPTICIAN,
STATIONERY AND ART ENGRAVING,
219 Franklin St., Johnstown, Pa.

To Whom it May Concern: JOHNSTOWN, Pa., Feb. 25, 1910.

Mr. W. H. Brokaw conducted an auction sale for me the first three weeks of this month. I take pleasure in testifying to his superior ability as an auctioneer and to the gentlemanly treatment of my patrons and myself. I can cheerfully recommend him to anyone needing the services of a first class auctioneer. Yours truly,

(Signed) H. A. HERSHBERGER

A SPECIALTY of sales of high-class stocks. Results guaranteed and your reputation well guarded.

At all large sales I am aided by most competent auctioneers who are GENTLEMEN.

Hundreds of letters of references from jewelers in all parts of the United States for the asking.

All correspondence strictly confidential.

If you want THE BEST write or wire me TO-DAY.

Los Angeles.

Brock & Feagans have sold three silver os to be awarded as prizes by the Sig- Hill Tennis Association, Long Beach. e same firm has also sold a large cup the Citrus Belt League, an interscholas- athletic organization of southern Cali- nia.

Pacific Coast Notes.

R. Van Buren, Ontario, Cal., has moved a new store at 127 North Euclid Ave.

Peter Engel, Marysville, celebrated the h anniversary of his wedding, last week. l was the recipient of many gifts from nds in the trade.

Peacock & Co., Manila, P. I., are moving o a large new store at that place, where retail, wholesale and manufacturing iness carried on by them may be given re attention.

A. R. Vierra, Honolulu, H. I., has en two partners in his business in the sons of H. H. R. Vierra and John S. rques, Jr., for 16 years with Wichman Co., of that place.

J. A. G. Smith, Porterville, Cal., who recently entered the manufacturing business and placed upon the market a silverware polish of his own invention, has made preparations to manufacture another metal polish of value to jewelers, and will soon have this on the market.

A compromise of the differences which have existed between the United States Diamond Mining Co. and a number of Oroville business men has been settled, and within a short time it is anticipated that the mine near there will be opened again. One other suit is pending against the mining company, but it is announced that this will probably be compromised within a short time.

San Diego, Cal.

Owing to the fact that the site upon which stands the building now occupied by the San Diego Jewelry Co., of which W. H. Hilts is manager, is to be used for a new business block and the present occupants have only until May 1 in which to vacate, application has been made to the Common Council to permit to sell the stock at auction. Col. L. Byrens will be the auctioneer.

Mrs. W. W. Meadows, colored, who was recently convicted in Justice Court of practicing optometry without a state license, has been fined $50 and released from custody on probation. The woman was convicted on the evidence of Mr. and Mrs. Nick Harris, Los Angeles detectives in the employ of the state board of optometry. Mrs. Meadows has a place of business at 1627 E St.

On Sunday, March 27, Charles C. Clusker, a resident of this city, celebrated the 100th anniversary of his birth. Mr. Clusker engaged in the jewelry business in Cincinnati in 1843, but at the outbreak of the Mexican war he entered the army and participated in the battles of Vera Cruz, Chapultepec, Cerro Gordo, Buena Vista and the siege of the city of Mexico. Later he came to the state of California among the early gold seekers, but at the commencement of the Civil War he went east and served in the Union army. When peace ensued he again became a Californian. He is the oldest Elk in the world.

Detroit.

P. J. Fischer, who has purchased the business formerly occupied by E. A. Cress, at Minden City, has been in Detroit purchasing new goods to fill out his stock. Mr. Cress had been in business about 25 years and has decided to retire.

Noack & Gorenflo have completed the moving of their wholesale business at 212 Jefferson Ave. The store which they have occupied for many years at 100 Woodward Ave. is to be remodeled. The lease expired March 31. The new store is of about the same size and is located in the heart of the wholesale district, with a ground floor show room. With the going of Noack & Gorenflo the former wholesale jewelry center on lower Woodward Ave. has been largely broken up. Three other firms had moved a year ago into the retail district above the Campus, on Woodward Ave. There now remain only four wholesale houses in the old district.

San Francisco.

C. M. Fogg, of the Keystone Watch Case Co., was a visitor here recently.

Burr W. Freer is expected home within a short time from his eastern buying trip.

Mr. Mayer, of Mayer & Weinshenk, has returned from a buying trip to New York.

C. H. Tibbetts, vice-president of the International Silver Co., visited the local trade last week.

W. H. Hovey, with J. B. Whitney & Co., has returned from a trip to the southern part of the State.

Gus Weil, of the Electric City Box Co., was here recently and reported doing the heaviest volume of business he has ever done here before.

Mr. Abrahams, traveling man for George Greenzweig & Co., is now in the northwest and will remain away for some time. Jos. Stark is traveling for this firm in the southern part of the State.

Lazarus & Cheney have dissolved and, according to the arrangement that has been made, the Market St. store will be taken over by Mr. Lazarus and operated by him. Mr. Cheney will take the Fillmore St. store.

Among the out-of-town jewelers here last week were: Percy P. Davis, Seattle, Wash.; Caesar Isaacs, Tuolumne, Cal.; M. Hetzler, Haywards, Cal.; Mr. and Mrs. L. C. Koberg, Healdsburg, and Walter Lord, Sacramento.

Powell Fredericks, in the Kamm building, has just returned from an eastern buying trip with a large line of goods for the coming season. He found the eastern trade much interested in the World's Fair that is to be held in San Francisco in 1915.

A. I. Hall & Son are anticipating a big season's business and, although they occupy a large part of the floor space on the sixth floor of the Jewelers' building, are preparing to take over more space. Considerable space has been set aside for the purpose of renovation, and carpenters are now busy making the necessary changes.

Pacific Northwest.

H. W. Morgan, of the Morgan & Allen Co., San Francisco, is in Portland, Ore., on business.

L. L. Berens, Bellingham, Wash., has been calling on the wholesale trade at Portland, Ore.

The store of H. L. Doge, Anacortes, Wash., was entered by burglars, a short time ago, and stock valued at $200 was taken.

George W. Carleton, Carleton Jewelry Co., Marshfield, Ore., has been declared a bankrupt, and the stock is to be sold at auction by the trustees.

J. S. Springer, a clerk in Frank L. Hart's, Tacoma, Wash., was held up recently, while on his way home, and robbed of a small amount of money and a gold watch.

Kristian Falkenberg, Walla Walla, Wash., is enlarging his manufacturing department and will shortly have in place a new gold rolling machine. Extra workmen are being taken on and the output of the shop greatly increased.

Frank W Hayes, Montoursville, Pa., is disposing of his stock prior to devoting his entire time to optometry, of which he will make a special study.

St. Louis.

Herman Mauch is serving his country as a juror in the Federal court.

Joseph Storthz, Little Rock, Ark., and his bride are in St. Louis on their wedding trip.

J. J. Burke, president of the Brooks Jewelry & Optical Co., returned Friday from a trip to Chicago.

Charles Zens, of the Globe-Democrat building, is dangerously ill at his home. His recovery is said to be doubtful.

A. L. Blankenmeister, of the Blankenmeister-Oberting Jewelry Co., left Monday on a three weeks' trip through Arkansas.

E. A. Schoenle, of the Maschmeyer-Richards Silver Co., has just returned from an extended business trip through the west.

Samuel E. Bamber, secretary of the Hess & Culbertson Jewelry Co., left recently on a flying business trip to New York. He is expected to return in a few days.

C. Heyman, of the L. Bauman Jewelry Co., will leave next week for a trip through Missouri and Iowa. F. J. Bross, of the same firm, left Thursday on a trip through Illinois.

F. Dienstbier has finished moving from 205 N. Broadway to 320 N. 6th St. In his new location he carries a larger stock and is better equipped and prepared to serve his customers.

Max Plambeck, son of W. F. Plambeck, of Denver, Colo., who is attending the Bradley Polytechnic Institute, Peoria, Ill., was visiting friends in St. Louis the latter part of the week.

Ralph Lowenstein, of the R. Lowenstein Jewelry Co., returned from a 10 days' trip through the west last week. Milton B. Lowenstein, of the same firm, returned from a two weeks' trip through Arkansas.

W. E. Susong, Iowa representative, and Charles Welzmiller, Kansas and Oklahoma representative of the Bauman-Massa Jewelry Co., were in town several days last week and then started out on their regular trips.

Several representatives of the East St. Louis Jewelers' Association attended the meeting of the Retail Jewelers' Association of St. Louis at the Jefferson Hotel Thursday night. Matters of mutual interest to the jewelers of the two cities were discussed. Outside of that only routine business was transacted.

The firm of Aronberg & Schubach, 207 N. 6th St., has been dissolved. Charles Aronberg will continue in business at the same location. Henry Schubach has taken the management of the jewelry department of the Herman Schubach Jewelry Co. Aronberg & Schubach had been in business at the 6th St. location for the past several months.

In bankruptcy proceedings pending against Mannie Levy, Lee W. Grant and P. B. Kennedy have filed a claim for $75 for legal services and $34.06 costs with Referee in Bankruptcy Coles. At the first meeting of the creditors Joseph Kane was appointed trustee and his bond was fixed at $1,000. He filed his bond and it was approved. Another meeting of the creditors will be held April 7.

Among the out-of-town dealers in St. Louis during the past week were: B. S. Hunt, Mayfield, Ky.; Joseph Storthz, Little Rock, Ark.; H. Chambers, Bonne Terre, Mo.; T. H. Vinyard, Piedmont, Mo.; C. Bergquist, Minneapolis, Minn.; F. B. Thayer, Memphis, Tenn.; J. H. Booth, Alton, Ill.; Enno Dick, New Baden, Ill.; Edward Davidson, of Davidson & Wardlaw, Oxford, Miss.; Fred Simon, Collinsville, Ill.; Fred Herold, Jerseyville, Ill.; John Koetting, St. Genevieve, Mo.

Among the traveling representatives in St. Louis during the past week were: A. W. Joseph, Fontneau & Cook Co.; George W. Beardsley, Allsopp & Allsopp; M. B. Bernstein, Tuthill Cut Glass Co.; Mr. Quinney, Irving Cut Glass Co.; Joseph C. Wilson, Landers, Frary & Clark; Mr. Kellsey, Harris & Harrington; M. S. Greenbaum, William I. Rosenfeld; E. A. Reed, Reed & Barton; E. P. Staunton, Gorham Co.; I. A. Levis, Oppenheim & Strauss; C. W. Thomas, Allsopp Bros.; William G. Andrews, Abel Bros. & Co.; A. T. Teague, Link & Angell; John Marsh, Edmond E. Robert; F. L. Pettee, Waterbury Clock Co.; Charles T. Dougherty, Osmers-Dougherty Co.; Charles A. Hartshorn, Alling & Co.; Mr. Ross, Robert H. Ingersoll & Bro.; Emile Homberger, American Swiss Watch Co.; M. W. Potter, J. M. Fisher Co.; W. A. Burt, Cory & Reynolds Co.; D. Skutch, New Haven Clock Co.; Melville Untermeyer, Charles Keller & Co.; C. A. Rogers, Irons & Russell Co.; A. H. Oakley, Thornton Bros. Co.; H. L. Strauss, Nathan Wallach; G. Fred Perry, F. H. Sadler Co.; S. J. Summer, Providence Mfg. Co.; Hugh King, Fessenden & Co.; Mr. Miller, Ansonia Clock Co.; Mr. Krieger, Petow & Krieger Co.

Atlanta, Ga.

Eugene Haynes has returned from New York.

Nat Kaiser, whose wife died recently in New York, is spending some time in Florida.

V. R. Davis, president of the jewelry firm of Davis & Freeman, who was severely bruised several days ago by a restive horse, has about recovered. Mr. Davis had just left his store, and while crossing a crowded street was run into and knocked down by a runaway horse.

An involuntary petition in bankruptcy has been filed against the Madison Jewelry Co., Madison, Ga., by creditors. The company is a corporation with a capital of $5,000, with the privilege of increasing it to $20,000. It was formed in October, 1908, by M. W. Clement, G. W. Cavanaugh, J. F. Slevell and O. L. Wildord.

Admitting that she "switched" a diamond worth $700 from the shirt front of George W. Muller, a well-known man of Atlanta, and in its place put a "phony" stone, a woman with several aliases was last week bound over to a higher court to answer to the charge of robbery and is now resting in jail, failing to make a required bond of $1,000. The police are looking into her record in the belief that she may have operated at jewelry stores as well.

The Crescent Jewelry Co. has applied for a charter to do business in Memphis, Tenn., with a capital of $30,000.

Omaha.

K. B. Griffith has returned from a business trip through Kansas.

H. S. Knapp, representing the Sh... Mfg. Co., left, last week, on a trip to Colorado.

H. Graberman, watchmaker for A... Edholm, will move his family here ... week.

The Ryan Jewelry Co. has secured ... services of Roy Clay, Long Pine, as watchmaker.

Moyer Fleisher, Philadelphia, Pa., ... off here while en route to the Pacific ... last week, and showed some interesting watches to the jewelers. Mr. Fleisher not in the trade, but is a collector of ... old watches, some of which belong to ... 15th and 16th centuries.

Minneapolis.

L. Metzger, of S. Jacobs & Co., has just turned from a two weeks' trip to New ork.

Charles Bergquist, Minneapolis, has re-rned from six weeks spent at Hot prings, Ark.

William Krohn, Anandale, spent a week cently in St. Paul, having been called ere by the serious illness of his father-law.

B. R. Schwarz, 305 Nicollet Ave., has ce his brother, M. L. Schwarz, into rtnership, and the firm will in future be own as B. R. Schwarz & Bro.

Following a custom which he inaugu-ed when he started in business several rs ago, B. R. Schwarz, manufacturing weler, closed his shop on Good Friday.

Creditors of the National Cut Glass Co., ve filed an involuntary petition in bank-ptcy against the company. The petition signed by John C. Elzy, P. O. Nelson d Irvin A. Crocker.

. M. Sullivan, formerly of Rockford, Ill., s purchased E. P. Sundberg & Co.'s re, Fargo, N. Dak. Mr. Sundberg has n planning for some time to retire from e business on account of his health.

Charles E. Reed, engraver for B. R. hwarz & Bro., will leave in a short time r his home at Long Creek, Ore. He ex-ts to spend some time looking about in Far West, and may start in business r himself in that locality.

The John D. Bodfors Co. has been in-rporated with $50,000 capital stock, to ntinue the retail business of John D. dfors. The incorporators are John D. d Elizabeth P. Bodfors, E. P. Blomgren d Fallmer Jarner, all of this city.

The following traveling representatives jewelry houses called on Twin City welers during the past week: Henry dichimer, I. Bedichimer & Co.; George ruen, D. Gruen & Sons Co.; Mr. Finch, F. Simmons Co.; Mr. Roman, Manas-h Levy & Co.; George Pilzer, Good-end Bros.

Among the out-of-town dealers in this y during the past week were: H. R. anks, Castlewood, S. Dak.; M. D. Loner-n, Grantsburg, Wis.; J. C. Marx, Sher-od, N. Dak.; V. Kerr, Ellendale, N. ak.; Mr. Jones, Revillo, S. Dak.; M. ury, Bellingham, Minn.; H. Greethurst, inona, Minn.; E. Geiwitz, La Crosse, is.; A. G. Feinberg, Brownton, Minn.

Several Minnesota jewelers have gone o the moving picture business as a side e with much success. This they are le to do by devoting their attention to eir stores in the day time and to their aters in the evening. A. G. Feinberg, oughton, Minn., opened a moving pic-re theater in that town, and Harry Green, H. H. Green & Bro., is doing a profit-le business operating the Crystal Theater Minneapolis.

A. E. Paegel, of the Paegel Jewelry Mfg. ., and secretary of the Minnesota Re-il Jewelers' Association, will leave in a w days for an extended trip through the st and south, during which he will com-ne business with pleasure. He will go to ew Orleans to attend the conclave of the ncient Order of Nobles of the Mystic Shrine, stopping at Chicago and St. Louis on his way to the gulf. After the Shrine meeting he will leave New Orleans by steamer for New York, which he expects to reach about April 15. He has not determined the length of his stay in New York, and may remain there 10 days before starting home.

While H. A. Lunda, 119 Central Ave., was attending church recently, thieves entered his store and stole watches and diamonds valued at $1,000. The jewelry which the robbers secured had been on display in the show window. Mr. Lunda, it is believed, will recover much of his property from the burglars. The gang which robbed his store operated extensively in East Minneapolis, and two of them have been arrested. On searching their rooms later the police discovered some of the jewelry which had been taken from Mr. Lunda's store, together with other loot. It is believed that a careful investigation by the authorities will serve to discover still more of the missing jewelry.

The Pinkerton Detective Agency has sent a letter to local jewelers warning them against a clever swindler who has been operating extensively in Milwaukee, and is now thought to be on his way to the Twin Cities. The swindler is described as 32 years old; height, 5 feet 5 inches; weight, 145 pounds. He wears eyeglasses, is smooth shaven, and has well manicured hands. He wears a two carat diamond ring on his left hand with tooth mounting in green gold, and has a prominent gold tooth in his mouth. He is sometimes accompanied by a man 40 to 45 years of age, and by a woman about 35 years of age, with a round face and very red complexion. The swindler asks to be shown diamond rings. Then while the jeweler's attention is held by one of his companions for a moment, he skilfully substitutes a ring with a small diamond which he carries with him for one with a much more valuable gem in the tray. The theft is not generally discovered until he gets away.

Denver.

Fred Syman and Chas. Doersam have been on the sick list, but are reported better now.

The following traveling representatives were in this city last week: J. H. Merrill, J. H. Merrill Co.; H. E. King, Queen City Silver Co.; Mr. Lorenz, Albert Berger & Co.

The Enterprise Jewelry Co. has been running an auction sale to reduce old stock and make room for the new. The firm is fitting up an elegant store in the new Foster building.

Wm. Mace has just opened the Denver Horological and Optical School. He has several instructors who teach watchmaking, jewelry repairing, stone setting, engraving and optics.

C. F. Beghtol, of the Edward Lehman Jewelry Co., has left on his regular trip through Nebraska and Wyoming. C. L. Clark has returned from his trip to the northwest and reports business very good.

The following visited this city during the past week: Earl Kelly, with C. P. Petingill, Boulder, Colo.; M. Q. West, Colorado Springs, Colo.; C. L. Beard, Longmont, Colo; L. E. Gardner, Longmont, Colo.; W. H. Brannan, Loveland, Colo.

Several jewelers here are being put to much trouble finding temporary locations owing to the fact that so much building is going on. Nearly every square has a large business block in course of construction, and the old sites are being torn down. The following are some of those forced to move. Enterprise Jewelry Co., K. C. Cosley, Harry H. Frumess, Ben Frumass, Jos. I. Schwartz and the Francis Jewelry Co.

Association Notes.

The programme for the second annual convention of the New York State Retail Jewelers' Association, which is to be held in Rochester, May 26 and 27, will be issued this week, and the indications are that it will be largely attended and productive of much good. The Rochester association is planning a fine time in the way of entertainment. The membership is now 175, but it is expected that it will be increased to 250 by the time the convention meets. There will be a well-prepared programme of practical papers by jewelers and their workmen, and flaming orations will be "tabooed." All the papers will be along practical lines, and the convention will be closed with a banquet.

Ohio will have a convention of retail jewelers this year at Columbus, O., on May 2, 3 and 4, that promises to equal if not eclipse any other State convention of retail jewelers. The three days will be busy ones; the second day especially will be crowded with talks by men of national reputation, and it will pay any retail jeweler to journey to Columbus for that day at least. The day will close with a banquet, a fitting climax to the "talkfest" of the day. Many novel features of entertainment will be introduced during the three days' meeting, and it is hoped by the committee in charge that a record-breaking crowd will be in attendance. The Southern Hotel will give special inducements in rates, both European and American plan, and it is advisable to make reservations in advance. Jewelers from other States are also invited to attend.

St. Paul.

A. Ferguson, formerly of New York, is traveling for I. W. Mark.

Among the out-of-town jewelers in St. Paul, last week, was Swan Olson, Lemmon, S. Dak.

Max Mark left, Monday of last week, for a business trip through the southern part of the State.

Sam Mark, traveler for I. W. Mark, has returned from a business trip from the northern part of the State.

Albert Goodman, of Vehon & Goodman, has returned from Duluth, Minn., where he was on a business trip for the firm.

A. S. Mark, formerly of Princeton, Minn., has gone into the wholesale jewelry business and is located at 601 Baltimore block under the name of the Manhattan Jewelry Co.

C. F. Sachtleben is about to open a jewelry and repairing establishment in Brookeland, Tex.

A Phenomenal Auction Sale

I am now in my 14th and last week for G. MEINERS & SON, 306 WASHINGTON ST., HOBOKEN, N. J. This is a "retiring-from-business" sale, after 45 years of recognized leadership in the Jewelry trade.

Last week was next to the largest of the entire sale.

Not one dollar's worth of goods added to this stock, and it shows a fine profit up to date.

A very peculiar City. Although many sales have been attempted, this is the first successful Jewelry Auction ever conducted in this City.

This is what G. MEINERS & SON have to say:

I would never have believed an Auctioneer could possibly have held the crowds interested so long a time. My sale is far in excess of my expectations and I heartily recommend Mr. Gates to the Jewelry trade in general.

G. MEINERS & SON.

I will be pleased to furnish references from all parts of the United States and Canada regarding my ability.

CORRESPONDENCE STRICTLY CONFIDENTIAL

I furnish as many assistants as your sale requires to properly conduct same.

A. E. GATES

Jewelry Auctioneer

FOR SALE, a 35-year well established jewelry store, on account of sickness; can clear about $3,000 a year. Call, at once, 117 Broad St., Elizabeth, N. J.

JEWELRY STORE on Eighth Ave., New York, for sale on account of other business; very reasonable. Address "A M., 1873," care Jewelers' Circular-Weekly.

FOR SALE, jewelry and optical business; will pay to investigate; new stock and fixtures in Virginia town of 2,000. Address "E. W., 1949," care Jewelers' Circular-Weekly.

FOR SALE, confectionery business with good established trade in good mining town; good opening for jeweler with stock in connection; rent cheap. E. F. Lanzon, Coleraine, Minn.

FOR SALE, a first class jewelry store in a New England town; stock and fixtures at inventory, $3,000; good reason for selling. Address "Y. Y., 1880," care Jewelers' Circular-Weekly.

FOR SALE, a complete, up-to-date gold pen shop; Foster tools in good order; tools and right to manufacture safety fountain pen and pencil holders. John R. Kaiser, 41 Myrtle Ave., Jersey City, N. J.

FOR SALE, jeweler's business, established 20 years; bargain; easy terms; Illinois city; Scandinavian settlement. Address "Z. B., 2059," care Jewelers' Circular-Weekly, 503 *Heyworth Bldg., Chicago, Ill.*

JOBBER of 20 years' experience wishes to purchase an interest in a manufacturing business in New York City or Newark, which has an established trade. "E., 2,000," care Jewelers' Circular-Weekly.

ONR STORE in Passaic, N. J., opposite Erie depot, best location, leading store, for sale; $3,000 to $6,000 required; an opportunity of a lifetime. Address or apply, Rubenstein Bros., 14 Maiden Lane, New York.

ESTABLISHED jewelry business, Newark, N. J., a money maker for some one; with or without stock; must have at least $2,000 cash or don't answer; retiring from business. Address "Chance, 2083," care Jewelers' Circular-Weekly.

EXCELLENT chance for wideawake persons with $7,500 to $10,000, to buy attractive jewelry and optical store, with lease, in Atlantic City, N. J., on boardwalk, established 15 years. Address "J. A., 1945," care Jewelers' Circular-Weekly.

DIAMONDS at great bargains, $45 per carat and up; mounted rings and other diamond jewelry bought from private people sold at half the regular price; sent on memo. bill to rated dealers; sold for cash only. D. I. Murray, 3 Maiden Lane, New York.

ACTIVE MAN will invest from $4,000 to $5,000 with going and profitable jewelry manufacturers or jobbers, New York or Newark; would embark with experienced salesman or expert workman having some capital. "D. L., 2098," care Jewelers' Circular-Weekly.

FOR SALE, a first class jewelry store in northern New York, doing a business of $22,000 and over per year; this is an opportunity of a lifetime and will bear close investigation; best reasons for selling. Address "P., 2016," care Jewelers' Circular-Weekly.

FOR SALE, new stock, mahogany fixtures; will invoice about $4,000; good, live manufacturing town of 15,000, northern Michigan; only three jewelers; can reduce stock; a live proposition. For particulars address Despres, Bridges & Noel, 103 State St., Chicago, Ill.

FOR SALE, jewelry store in one of larger cities in Texas, well established, best location, doing good business; best of reasons for selling; don't answer unless you have over $5,000 cash. Address "X., 2002," care Jewelers' Circular-Weekly, 503 *Heyworth Bldg., Chicago, Ill.*

I PAY CASH for your surplus stock of diamonds, watches and jewelry; business confidential; National Bank references. H. Schwartz, 903 Heyworth Bldg., Chicago, Ill.

FOR SALE; will sell handsome fixtures and long lease of best located jewelry store on northwest side, Chicago; also stock is desired; doing excellent business, but have other interests; will stand full investigation. Address The Jewelry & Art Shop, 2560 Milwaukee Ave., Logan Square, Chicago, Ill.

STORE FOR SALE; stock and fixtures will invoice about $12,000; will reduce stock to suit buyer; located in oil town of western Pennsylvania; population, 15,000; good repair trade; present owner retiring to care for outside interests. Address "G. L. H., 2094," care Jewelers' Circular-Weekly.

THE CHANCE of a lifetime; for sale, one of the oldest retail jewelry stores in New York City, established over 45 years in one of the best locations, carrying over $65,000 worth of stock; must sell for cash; best references; reasons for selling, settling up an estate. Address N. S. Brann, 231 Eighth Ave., New York.

PARTNER WANTED with capital of $20,000 to $25,000, to invest in a first class jewelry and loan business; business can now pay a salary of $5,000 a year to each partner, and with new money invested ought to clear $10,000 each a year; must have best of references. Address "T. T. T.," General Delivery, Atlanta, Ga.

FOR SALE, only jewelry store in Texas town of 5,000 population; stock and fixtures will invoice about $3,500; more bench work than one man can do; sales and bench receipts were over $5,000 during 1909; best chance of a lifetime; good reasons for selling; write at once. Box 1905, care Jewelers' Circular-Weekly.

WANTED, jewelry stocks; I pay 20 per cent. more than anyone else; send me your surplus diamonds, watches and jewelry and get money by return mail; bank references. Emil Noel, 541 E. 46th Place, Chicago, Ill.

CHANCE OF A LIFETIME; I offer for sale my long established jewelry store in the best manufacturing city of Connecticut; fine up-to-date stock of watches, diamonds, silver, cut glass and very fine gold and gold filled jewelry; everything up-to-date that a first class jewelry store requires; made money enough to retire; stock and fixtures will invoice about $20,000; can reduce if necessary; will sell only for cash; don't answer unless you have the cash. Address "Chance, 2096," care Jewelers' Circular-Weekly.

DO YOU WISH TO RETIRE? Are you looking to raise ready cash quick? We are ready to purchase your entire or surplus stock of diamonds and jewelry, no matter how large it may be; we also advance liberal cash on same; highest prices paid for entire stocks; communicate with us before consulting others and get quick returns; communications strictly confidential. Address Brooklyn Purchasing Syndicate, 608 Broadway, Brooklyn, N. Y., Telephone, 2328, Williamsburg.

For Sale.

WATCHMAKERS and jewelers, special not it is to your advantage to read the Le-Bo ad. page 116 of this issue.

FOR SALE, a genuine C. W. T. Co. outdoor e tric watch sign at bargain. "M., 2070," care J elers' Circular-Weekly.

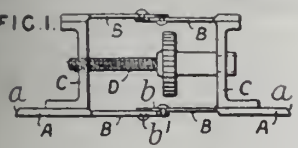
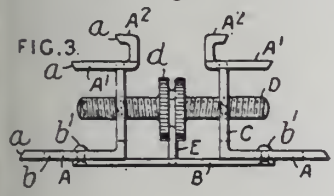
BRITISH PATENTS.



IDGMENTS OF SPECIFICATIONS, 1908, FROM *The Illustrated Official Journal.*)

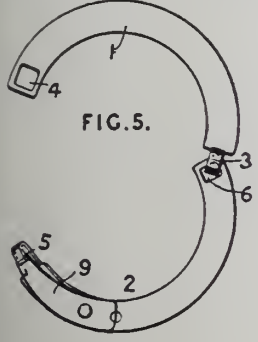


ISSUE OF MARCH 16, 1910.

2,467. WATCHMAKERS' TOOLS. H. W. MASSEY, Weymouth. Nov. 21.

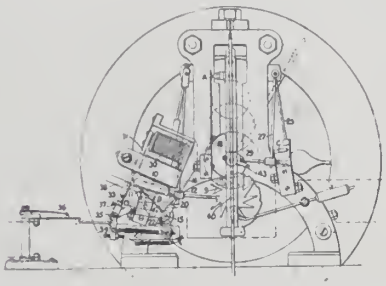
watch bezel and case truing-tool comprises base-plates A provided with guide-plates B h are adapted to guide each other by means ns b^1 and slots b when moved relatively to other by a screw D, which is supported in ngs in the brackets C. The outer edges a e plate A are beveled and rounded to form

FIG. 1.



cing-edges. In a modification, Fig. 3, the kets C form part of the plates A which are ble of relative motion on a plate B by means right and left handed screw D, the milled d of which is supported in a backet E. The kets C carry auxiliary cutting-plates A^1, A^2, h allow of truing bezels without making ex- e adjustments; and in lieu of cutting-edges, edges a may be roughened so as to act like

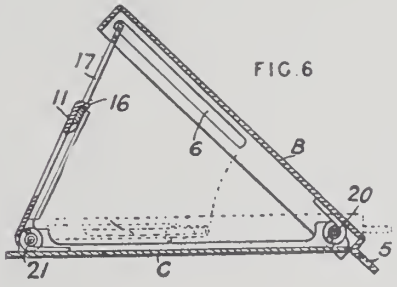
2130. KEY RINGS. L. MYERS, Birmingham. Nov. 23.



key ring is formed of two flat parts 1, 2 pro-

d with eyes 4, 6 and tongues 3, 5. The ue 3 is passed through the eye 6 and bent nd so as to form a loose hinge, and the ue 5 is bent in the form of a hook to engage the eye 4, a spring 9 being provided to secure it in engagement. With this construction the two parts of the ring may be folded together, but the parts may be other than semi-circular, so that in some forms this is not possible. The ring may comprise more than two parts.

25,149. CLOCKS. F. H. WALKER, London. Nov. 23.

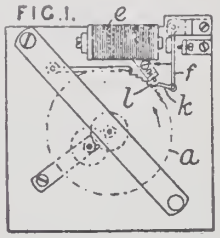


Striking Mechanism.—An electric striking-mechanism is controlled by three sets of contacts, at one of which the circuit is made and broken by the oscillation of the pendulum. A little before the hour, an arm 16 on an arbor 15 having been raised by a cam 18, a rod 20 fixed to the same arbor presses on a weighted lever 38 which bears the gathering-pallet 11, and the rack 10 thereupon falls to a position determined by the hour-snail 9. At the same time, the contact-spring 13 is released from a pin 12 on the rack, and the contact B is closed. The detent 22 is applied to the rack when the arm 16 falls down the cliff of the cam 18. Precisely at the hour, the small cam 29 allows the arms 27, 25 to turn

and permit the second contact C to close. The circuit is then completed at the contact A at each double swing of the pendulum. The armature 31 of the electromagnet 30 is thus periodically attracted, and may strike a bell directly, or preferably, by rocking the arms 33, 54 on an arbor 35, may close a subsidiary circuit at contacts 36 to operate one or more single-stroke bells. The weighted lever 38 which carries the gathering-pallet 11 is pivoted on a lever 37 fixed to the arbor 35, and the rack is therefore gathered at each stroke of the armature until the pin 12 presses on the contact-spring 13 and stops the striking by breaking the circuit. The snail 9 is preferably mounted on an arbor 40 carrying a 12-rayed star-wheel, which is moved hourly by a pin 43 on the minute-arbor.

25,408. CIGAR-CUTTERS. R. W. JAMES, London.—(C. P. Goldsmith & Co., Manhattan, New York, U. S. A.). Nov. 25.

A cigar-cutter which may be folded and placed in the pocket consists of a cutter blade 17 working in a part 11 pivoted to a section C, which at the other end is pivoted to a section B having slots



6 in which the head of the cutter blade takes. The pivots 20, 21 are provided with springs so that the cutter is open normally as shown in Fig. 6, but may be closed as shown by the dotted lines. The movement of the cutter blade 17 is limited by means of a detent 16 taking in a slot in the blade. Locking-means may be provided to keep the cutter closed. The cutter may be ornamented and may serve as a pendant by means of the eye 5.

25,577. ELECTRIC CLOCKS. W. S. STELJES, Stamford Hill, London. May 17, 1909.

In a secondary clock in which the hands are actuated through the medium of a large ratchet-wheel a, this wheel is driven by a pawl k carried by a depending pivoted armature-lever f. The pawl k drives when the armature is attracted by the electromagnet e, and the lever falls back by gravity when the current ceases. In order to prevent sticking of the armature, an adjustable

FIG. 1.

stop l is provided, which limits the forward movement of the pawl.

Applications for British patents, March 7-12.

5,647. IMPROVEMENT IN OR RELATING TO OPENINGS AND FASTENINGS OF BAGS, WALLETS, PURSES, AND THE LIKE. T. J. LANG, Weybridge.

5,796. HAT-PIN PROTECTOR. G. BENSON, London.

5,802. IMPROVEMENTS IN SHIRT STUDS AND STUD HOLES. A. C. HUGHES.

5,811. THE FIXING OF MEDALLIONS UPON LEATHER AND IMITATION LEATHER AND IMITATION LINEN PURSES, POUCHES, NOTE-BOOKS, POCKET-BOOKS, DIARIES, CARD-CASES AND FANCY ARTICLES, WITH ANY PHOTOGRAPHIC VIEW, COAT-OF-ARMS, OR ANY DESCRIPTION OF PRINTED PHOTOGRAPHIC MATTER. T. GAWLEY, London.

6,024. IMPROVEMENTS CONNECTED WITH CLOCKS, ETC. G. T. WALL, Birmingham.

6,229. IMPROVED PORTABLE STAND APPLIANCE FOR A WATCH, CLOCK, ETC. W. W. LISTER, Birmingham.

6,291. COMBINED POCKETKNIFE AND PENCIL HOLDER. P. REIFERT. London.

Complete specification accepted, 1909.

12,108. EARRINGS AND LIKE ORNAMENTS. BARNETT.

UNITED STATES PATENTS THAT HAVE EXPIRED.

Design patents granted March 31, 1903, for 7 years.

36,257. COVERED DISH OR SIMILAR ARTICLE. C. J. AHRENFELDT, New York.

36,261. PLATE OR SIMILAR ARTICLE. C. J. AHRENFELDT, New York.

Design patents granted Oct. 2, 1906, for 3½ years.

38,262. CLOCK FRAME. A. G. KOLLSTEDE, New York.

38,263. CLOCK FRAME. A. G. KOLLSTEDE, New York.

D. Buchanan & Son, Norfolk, Va., have asked for a permit from the Board of Control to erect a large clock on the sidewalk in front of their store at 121 Granby St. The clock will be placed next to the curb and the dials will be illuminated by electricity.

WE have recently issued a supplement to our 1904 material catalog which will be forwarded to you on application. This supplement used in connection with our 1904 catalog you will find a great help in getting correct repairs for our movements. Material for all new grades manufactured since the issue of our 1904 catalog is listed. Serial numbers showing grades of movements to 15394000 are given; table showing numbers and strengths of Hair Springs for different grades will be found a great convenience. We especially call your attention to the introduction in the supplement which explains how to get the part you want for any particular movement. A postal card request will bring one of the supplements.

THE HOROLOGICAL REVIEW

Some Calculations Applicable to Barrel Train, and Motion Work of Watches.

Written expressly for The Jewelers' Circular-Weekly by T. J. Wilkinson.

(Continued from issue of March 30.)

PART II.—THE TRAIN.

THE train of a watch, as mentioned in our former paper, consists of the following parts: The center wheel, the third wheel and pinion, the fourth wheel and pinion and the pinion of the escape wheel. Either the barrel, center pinion nor motion works constitute any part of the train. The calculations which we shall make in this paper will apply to fast-train watches, *i.e.*, those making 18,000 beats per hour.

The center wheel, as is well known, makes one revolution in one hour; the fourth wheel, carrying the seconds hand, makes one revolution in one minute, and the pinion of the escape wheel, and with it the escape wheel, makes 10 revolutions per minute.

In all fast trains we find the number of revolutions of the escape wheel pinion as being 10 to the one revolution of the fourth wheel, or, to express it otherwise, one revolution of the fourth wheel takes place in one minute, and 10 revolutions of the escape wheel take place in also one minute's time; therefore, the number of revolutions of the escape wheel in one minute multiplied by 60 gives us the number of its revolutions in one hour: $10 \times 60 = 600$.

If we multiply this sum 600 by 24 we obtain the number of revolutions the escape wheel makes in 24 hours, *i.e.*, $600 \times 24 = 14{,}400$. Having obtained this wheel's revolutions per minute, per hour and for 24 hours, let us estimate therefrom the number of beats. The horological definition of the term "beat" refers to the blow of the escape wheel tooth on a pallet jewel. We shall now estimate the number of blows or beats which the teeth of the escape wheel make with the pallet jewel. Each tooth of the escape wheel as it revolves strikes two blows, or beats—once on the entering pallet jewel and once on the discharging pallet jewel. As there are 15 teeth in the escape wheel, for the reason explained we multiply 15 by 2 to get the number of beats for each revolution of the escape wheel, namely, (15×2).

As this wheel revolves 10 times in one minute, $10 \times 30 = 300$, the number of beats in one minute, and 300 multiplied by 60, the number of minutes in one hour, gives us 18,000 beats per hour in fast-train watches.

Further on we shall give other rules for figuring the beats.

We shall now consider other calculations concerning the train. As we mentioned before, the center wheel makes one revolution in 60 minutes, while the fourth wheel, carrying the seconds hand, makes 60 revolutions in 60 minutes. Hence the number of teeth in the center and third wheel multiplied together must be 60 times as much as the result obtained when we multiply together the number of leaves in the third and fourth wheel pinions. To illustrate, suppose we have a watch whose center wheel has 64 teeth, and a third wheel with 45 teeth. The pinion of the third wheel has eight leaves and the pinion of the fourth wheel six leaves. We shall prove that the product obtained by multiplying the teeth together is 60 times as great as that obtained by multiplying both pinions together:

$$64 \times 45 = 2{,}880$$
$$8 \times 6 \times 60 = 2{,}880$$

If a workman decides to construct a watch of his own, cutting his own wheels and pinions, he would not be confined to copying some other maker's production, but could vary the number of teeth and pinions in his own watch, so long as he observed the rule mentioned, viz., the product obtained by multiplying the teeth together must be 60 times as great as when the leaves of the pinions indicated above are multiplied together, as the following example will show:

Center wheel, 80 teeth; third wheel, 60 teeth; leaves of third wheel pinion, 8; leaves of fourth wheel pinion, 10.

$$80 \times 60 = 4{,}800$$
$$8 \times 10 \times 60 = 4{,}800$$

The table of trains in this series will bring out one point that we desire to draw attention to, namely, that if we divide the number of leaves in the 'scape pinion into the number of teeth in the fourth wheel the answer is always 10; therefore, whenever we desire to quickly know if a watch is quick train or not, follow the above rule.

With this explanation we shall return to our subject, on the supposition that we want to figure on and construct a train whose teeth and leaves suit our own ideas. We can do so by following the method herewith given, knowing that 10 revolutions of the escape wheel take place in fast-train watches to each revolution of the fourth wheel. Therefore, if we select a number to represent the number of leaves in the 'scape pinion and multiply it by 10, the product always gives the number of teeth which should be in the fourth wheel. The figures 6, 7, 8 or any other number can be taken to represent the leaves of the 'scape pinion; if we select 6, then $6 \times 10 = 60$, and the fourth wheel should have this number of teeth; if 8 is selected, then the fourth wheel requires 80 teeth (8×10). We shall decide on using a 'scape pinion with eight leaves; then $8 \times 10 = 80$. The fourth wheel requires 80 teeth.

Our train list so far shows the following: A 'scape pinion of eight leaves, a fourth wheel with 80 teeth. The balance of the train we shall now calculate. To do this we must conform to the rule which we shall again repeat, namely, that the number of teeth in the center and third wheel, when multiplied together, shall be 60 times as much as the product obtained by multiplying the leaves of the third and fourth pinion together.

With this rule in mind, we shall refer the reader to both the following tables, the first showing the number of teeth used in the center and third wheels of some fast-train watches:

Center.	*Third.*	*Product.*
80 ×	75 =	6,000
72 ×	60 =	4,320
64 ×	60 =	3,840
60 ×	49 =	2,940

The following has been used in watches with slow trains:

Center.	*Third.*	*Product.*
80 ×	75 =	6,000
64 ×	60 =	3,840
60 ×	48 =	2,880
56 ×	45 =	2,520

A comparison will show that two sets in the upper series correspond with two sets in the lower. This we have done to show that the dissimilarity existing between slow and fast trains does not exist in the parts under consideration. This statement also includes the pinions of the third and fourth wheel. The difference so far as it applies to the train lies in the number of teeth found in the fourth wheel and in the pinion of the 'scape wheel.

In fast train watches, those having 18,000 beats per hour, when we divide the number of leaves in the 'scape pinion into the num-

WALTHAM WATCHES

Riverside Maximus
Enamel Dial

COLONIAL SERIES

Gold and Gold Filled Watches

These watches are a noteworthy addition to the Waltham line. They are exceptionally thin and may be had with Enamel, Silver Finish or Gilded Metal dials of artistic design. Colonial Series watches appeal to the most critical buyers. Equip your stock with these goods for Spring trade.

Colonial Series watches are to be had in five grades of movements as follows:

Riverside Maximus—23 jewels, adjusted to temperature, isochronism and five positions.

Riverside—19 jewels, adjusted to temperature and five positions.

Royal—17 jewels, adjusted to temperature and three positions.

No. 1425—17 jewels.

No. 1420—15 jewels.

All Colonial Series watches are cased and timed at the factory. They are delivered to the trade in display boxes. The retail selling price on these watches is fixed and plainly printed on the contract notice which is placed in the box with each watch before leaving the factory.

WALTHAM WATCH COMPANY
WALTHAM, MASS.

l of teeth in the fourth wheel the product ılways 10.

'n slow-train watches, having 16,200 beats hour, the product is nine.

n slow trains having 14,400 beats per r the product is eight.

n each instance the revolutions of the ape wheel is 10, nine and eight to one olution of the fourth wheel.

'herefore, if we want to know the char- r of a train it is quickly told by dividing 'scape pinion leaves into the teeth of the th wheel, and the product obtained, ther 10, nine or eight, at once tells us lass.

(To be continued.)

Planetaria and Astronomical Clocks.

(Continued from issue of March 30.)

HE astronomical clock of Passemant, surmounted, like that of Janvier—of ch we shall later have something to say—a movable sphere, was his masterwork devoted 20 years to the completion of his ulation of its wheels. And the famous ologist, Danthian, employed a dozen in r execution. It was in 1749 that the ssemant clock was presented to the ademy of Sciences. Camus and Depar- x, appointed commissioners for the ex- ination of this work, certified that the olutions of the planets were so exact t in 3,000 years they found not a degree difference with the astronomical tables. may be understood that with such a re- t the king received with pleasure the t of so wonderful an apparatus.

n connection with this presentation I l allow myself a slight digression, which l nevertheless not necessitate our pass- beyond the realms of horology. When artist had conceived and executed some gnificent work, his most ardent wish was make a presentation of it to the king. e royal approbation was a consecration ich gave a definite class to and placed line those who were desirous of being ointed purveyors to the courtiers (ladies and gentlemen), the nobility and the wealthy.

If the article presented pleased the sovereign, there was no reason for him to ask the price. The artist, desiring to find grace, did not hesitate to offer his work gratuitously. It was the best means of obtaining a pension and lodging, as had been given to the great horologists at the period of Louis XIV. and Louis XV.

This was unfortunately not known to one of my compatriots, the good Abbé Outhier, when in 1732 he presented to the king a moving globe of his invention, executed by Jean-Baptiste Cattin, and of which mention is made in a postscript to the preface of Thiout's book. Here is the account given by Désiré Monnier, of the misadventure of the abbé Outhier: "The prince pressed him to say what price he put on it. Our abbé, who did not know that nothing is sold to the king, was maladroit enough to fix its value at a few louis. The amount was paid to him, but by this ill-considered sale the merit of the inventor was eclipsed by the salary of the workman."

In spite of his lack of tact, they say, not to mislead one with retrospective regrets for a fate that was not at all unfortunate, in spite of this sordid beginning, abbé Outhier died a pensioner of the king, in 1774. But this was in his capacity as astronomer. As a fact, he accompanied the expedition made to the Arctic regions by Mauperthius, Clairaut, Camus and Lemonnier, commissioned to work down there—or up there—in studying the form of our planet.

* * *

We will devote no more time to the work of Passemant and Dauthian, already described by the latter and a little later by Janvier. We will merely briefly mention the astronomical clock constructed by the same artist in 1754 and the planetary made, it appears, in 1715, by the illustrious George Graham. Likewise all these works have been surpassed by those of Antide Janvier.

Although he never could enter the Academy of Sciences, hospitable to others much less learned than he, and although he died in a hospital without a penny, Janvier is one of the indisputable glories of French horology. The defects in his character have created enmities for him and have alienated sympathy from him. It is none the less to be regretted that one who devoted all his life to chronometry is hardly known to horologists, and that it is even impossible to find out the exact place of his birth.

Plate 3, reproduced from *l'Histoire*, by Pierre Dubois, represents a planetary machine constructed by this eminent artist. We do not propose to enter into the details of its construction. We merely reproduce it to show that Janvier, in his apparatuses, was bent on realizing the celestial movements with the most perfect mechanism possible.

To give an idea of the perfection he had attained we quote the comparison that he himself established between Lalande's calculations relative to the periodical revolutions of the planets and the results obtained by the wheel works of the more celebrated of his contrivances at which he worked 12 years, from 1789 to 1801:

LALANDE'S CALCULATIONS.

Mercury	87	days,	23	hours,	14′	32.7″
Venus	224	"	16	"	41′	27.7″
Earth	365	"	5	"	48′	48.0″
Mars	686	"	22	"	18′	27.0″
Jupiter	4,330	"	14	"	39′	2.3″
Saturn	10,746	"	19	"	16′	15.5″
Uranus	30,347	"	4	"	4′	

MECHANICAL RESULTS OBTAINED BY A. JANVIER.

Mercury	87	days,	23	hours,	14′	30″
Venus	224	"	16	"	41′	25″
Earth	565	"	5	"	48′	49″
Mars	686	"	22	"	18′	55″
Jupiter	4,330	"	14	"	38′	2″
Saturn	10,746	"	19	"	14′	35″
Uranus	30,347	"	3	"	25′	43″

The motor wheel designed to produce these planetary movements makes one revolution in 24 hours. Janvier employed, for

stance, for Uranus, four pinions, of which ree had six leaves and one seven, with our wheels having, respectively, 60, 73, 97 nd 108 teeth.

For Mercury he used three pinions of 10, 3 and 53 leaves, with three wheels of 80, 40 and 179 teeth. The revolution of the rth, as it was indicated, was obtained by eans of three pinions, with 7, 13 and 23 aves, and three wheels of 52, 61 and 241 eth.

Janvier was successful in completely sup- essing all difference with the astronomical bles for our planet by employing the fol- wing numbers, 10, 12 and 15 leaves for e pinions, 46, 52 and 268 teeth for the heels.

Readers to whom these questions are of terest have only to make the multiplica- n of the wheels and the division of their roduct by that of the pinions to see that itizen Janvier," as he was then named, id simply attained perfection.*

* * *

According to the testimony of Berthoud, Janvier was the first to have given the gures of which he made use. He is really e only one. François Ducommun has ot made his known to us. It is probable at we are not ready to calculate them ow. This, moreover, it is necessary to limit, would be an undertaking as super- ious as tedious.

The day of the planetarium, I believe, is passed (except as an adjunct to astro- omical clocks! Transl.), and these me- anical devices appeal to us nowadays only s marvels of patience, showing, when the and that executed belonged to the same in- vidual who had designed them, such skil- ulness was only likely to lead a man to overty.

Neptune has, moreover, come, since the eriod of Janvier and of Ducommun, to omplicate, with his course of 164 years, the echanism that aims to imitate exactly the ovement of our solar system, and their tilitarianism has diverted the current of orological activities, as it has that of all ac- vities, into other channels than simple or ure art. The marvel or the masterpiece re made now only to order. And still the Maecenas of chronometry attach consider- ble importance to that in mechanism which elaborately dressed and prepared.

As to the common crowd, they attribute, bove everything else, importance to the ore ordinary automatonism and the imi- tion of the movements of ordinary life. The Jacquemarts, or movable figures, lease them. I have been able to note dur- g a recent visit to Berne that the tour- ts assembled before the famous clock ere, waiting for the stroke of noon, Bae- eker or other guide book in hand, bestow o attention on the visible mechanism of e astronomical dial, but have their eyes xed on the bears, the procession of which hows nothing original, nothing more diffi- ult, in fact, than the turning of an hour glass. It is the same sentiment, exceed- ingly human, which causes the public to admire the useless automatons of a Maillard or a Jacquet Droz, when they have but a heedless eye for the mechanical creations of artists of which we have spoken above.

*In the "Revolutions of the Heavenly Bodies by e Mechanism of Wheel Works" Janvier has ven the deseription of his machines. His mous clock with moving globe, examined by the cademy in 1801, was otherwise made the object f a treatise by him which Berthoud has repro- aced in its entirety in his "History of the Meas- rement of Time." The four last plates of this ork are devoted to the illustration of the text.

Horological Instruction Given by the Iowa Retail Jewelers' Association.

THE short course in watchmaking held by the association at Des Moines, Ia., re- cently was a decided success, and will be followed by others year after year. This course was held for the purpose of aiding ambitious watchmakers who had made a good start, but still lacked skill and knowl- edge of a good many points.

The entire first part of the week was taken up exclusively by instruction in set- ting up escapements, setting of jewels, pivoting, staffing, truing balances, setting hair springs, replacing cylinders and numer- ous other things. Every student was fur- nished with bench room, countershaft and power, but was required to furnish his own lathe and small tools. The instructors were John Hands, Iowa City; Fred Edgar, Eldora, and N. Neilson. An appreciated lecture was delivered on the second day by Mr. Feige, of Des Moines. This lecture was on designing, nearly all in attendance being interested in engraving.

On the third day Mr. Edgar gave an instructive talk on "Botch Work." On Thursday ex-President Mack A. Hurlbut Ft. Dodge, spoke on "How to Take in Watch Work." The art of taking in watch work is, as a rule, not very well under- stood by the average workman, and the ad- dress was highly appreciated by the students. Watch work taken in with skill and judg- ment means a better satisfied customer, as well as better prices for the work.

The examination was held the last day of the course, in charge of the examining board, consisting of Mr. Hurlbut, Mr. Ed- gar and Mr. Neilson. The first part con- sisted of setting up an esapement. Each student furnished a movement from which the pallet stones and roller jewel were removed, the guard pin bent out of shape and the banking pins thrown out. Each student was timed from the first move of the beginning of the assembling, and the movement was brought up finished. The judging of the work was done on 10 dif- ferent points, each representing 100 points. The written examination consisted of 10 questions, partly subdivided, covering all the most important examination points out- side of the escapement. Each question rep- resented 100 points. An average of 75 points on work and written examination both were required to pass.

The questions and methods of the ex- amination will be changed from year to year. No two will be alike. The require- ments for a diploma demand that the ap- plicant have a thorough knowledge of watchmaking.

Willis B. Gardner has purchased the busi- ness of the Lovett Co., Titusville, Pa. Mr. Gardner had been in Mr. Lovett's employ as watchmaker for about two years. Mr Lovett will move to Alliance, O., where he has purchased another store.

Another Universal Clock.

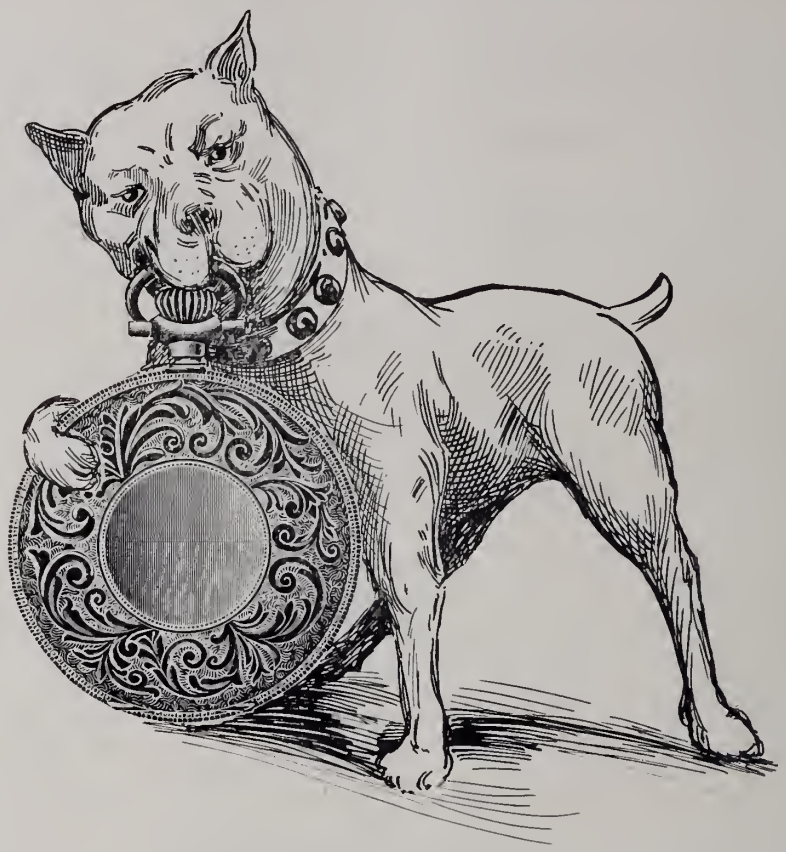
A UNIVERSAL clock which is attracting attention has been placed in the building of the Philadelphia *Record,* in Philadelphia, Pa. Below the clock face is a large map of the world on a projection dis- playing the globe surface spread out upon a plane. The map is large enough to contain the names of all the principal cities in the world marked in type easily readable at a distance. Meridian lines divide this map from top to bottom and across the top runs an endless chain of figures. Every 15 min- utes this endless chain, containing the hours and quarters, moves from right to left across the top of the map. It covers in each movement about three-quarters of an inch, or the equivalent of one-quarter of an hour, and then comes to a stop. If the ground upon which these figures appear is white the time marked is that between 6 A. M. and 6 P. M., or day light. Should the ground be black it indicates the time between 6 P. M. and 6 A. M., or night. In order to associate these figures with the time of the day at any particular place the method is simple. All that is necessary is to find the place on the map then to allow the eye to travel upward until it reaches the row of figures at the top, the meridian lines acting as guides. That figure which stands im- mediately above the city or town selected gives the hour of the day there as compared with Philadelphia time as shown on the dial of the *Record* clock.

Verses to a Watch.

THE following verses were recently sent to Harris & Shafer, Washington, D. C., by an appreciative customer of a poetic turn of mind:

MY POOR OLD WATCH.

My watch went on with might and main,
Until it broke its inner chain,
Why it should need a chain at all,
And that so very slight and small,
I do not know; but this I say,
Watch will not tell the time o' day.



This watch and I, for many years,
Have traveled through this "vale of tears,"
In joy and grief, whate'er betide,
My old friend nestles to my side;
And even in the still, dark night,
Its ticking brings to me delight.

Now, does this breaking down portend
That I, likewise, am near my end?
It may be so; who knows but we
May meet in vast eternity.
What shall I do in such a case,
To keep my old friend in the race?

Ah! Harris is the man I need
To give my watch its wonted speed.
And Shafer is a Wizard Wight
When watches are in sorry plight.
These two so can apply their art
That they can cause a watch to start.

They whisper to it soft and low:
"Now, watchy, dear, be good—and go,"
And so by many a cunning trick,
They get the grunty thing to tick.
Now watch and I take on new life,
And start again in worldly strife.
Harris and Shafer power lend
To give me back my old-*time* friend!

Thieves pried open a window in the rear of the store of C. A. Sherdahl, Montevideo, Minn., one night recently and stole a large quantity of miscellaneous jewelry. There is no clue.

No. 181. Dial 231. Domestic Mahogany Case. 16¼ in. high, 12¼ in. wide, 8¼ in. deep. List, $55.

The "Excelsior" fills the demand for a high-class chiming mantel clock at a moderate price and sets a new standard in clock construction. Our progressive policy and unusual manufacturing facilities permit us to offer these superior chiming mantel clocks at prices that mean more sales for you.

The movement retains all the desirable features of the famous English clocks combined with new ideas of our own experts. These clocks are guaranteed to keep time—and they come to you ready to run.

The chimes are made of special bell metal, long rods set in a heavy block and controlled by a movement of proved worth, striking every quarter hour the Westminster chimes in the sweetest tones. A feature of the movement is the quarter striking mechanism. A very important point is the Dial Works —which distinguish the "Excelsior" movement from all other makes of same character.

The illustration shows one of our many attractive models. Note the quiet dignity and elegant simplicity of the case design. The classic lines are unusual in clocks at these prices. We draw especial attention to the excellence of the dials which are beautifully etched. The finish gives a decided rich gold appearance. The hour rim is raised and silvered and the numerals are inlaid in black. The glass of door is of good plate, not bevelled.

The Excelsior will please your customers and the attractive prices are advantageous to you.

Write to-day for illustrated literature and price list for immediate delivery. Import orders for Fall delivery should be placed now.

When in New York visit our salesrooms and see for yourself the superiority of our Chiming Clocks.

Electric Light is Now Cheaper

Because the invention of a new lamp has more than cut in two the former cost of electric lighting, you can now flood your store and windows with twice their former brilliancy.

Your brilliant window displays will attract a volume of trade that your equally brilliant store will hold.

MAZDA LAMPS

They mark the greatest advance in electric lighting since Edison's invention. They are brilliant and economical to install and use.

A 60 watt G. E. MAZDA LAMP gives a light equal to three 16 candle-power lamps commonly in use on about ⅓ of the amount of electric current required by the 16 c. p. lamps.

Your lighting company or electrical supply dealer has a full line of G. E. MAZDA Lamps. To get the genuine, insist upon seeing the famous G. E. monogram on each lamp you buy and on the carton containing it.

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

The Master Jewelry Salesman.

Written expressly for The Jewelers' Circular-Weekly.

(Continued from issue of March 30.)

THE personal magnetism of the good salesman must be cast into the balance with such delicate skill that the scales will turn toward a sale so gradually there will not be the disturbing influence of a jar; yet the effect must be decisive; beyond the influence of a shifting weight.

The unfolding of a desire into a necessity in the sale of costly ornaments is almost an unreasonable demand upon the human capacity at times, yet it is a condition that the master salesman of jewelry has to meet more frequently than any other, the vender of the costly musical instrument possibly excepted. All of the careful training that the centuries have devoted to developing the modern tailored man out of the primitive blanket-wearer must be accomplished by the salesman in a short half-hour. He must himself be more than an ardent admirer of the beautiful in gems. He must impart that admiration without conscious effort in every lineament. His every attitude must show that this is a soul feast to him, such as the true lover of nature feels in the solitudes of towering mountains; such as glows in the artist's face while the divine message of his first Italian sunset plays in his soul and leaves his lips mute.

The salesman must become, in fact, an artist in gems, appreciating their beauty fully in every fiber of his personality; indeed, they must for a time, become a part of his personality—and there must be no affectation. The soul is a sensitive thing, and once awakened to these unaccustomed heights it is quick to recognize and resent any insincerity in its guide.

From the moment when the soul of the customer has been taken to his supreme height, the luxury of a moment before becomes a necessity. This higher plane of thought, this new existence, demands its own special food and its hunger is only appeased by gratification. Out of the situation comes the supreme psychological moment to the master salesman. While this ideal existence is the absorbing passion of the customer's life and its gratification the one longing of his soul, there is still, perhaps, a wavering moment; a sub-conscious battle between desire and the old commercial caution that has so long held sway; the shall I, or shall I not, that determines the sale.

There is yet another step, the personality of the customer must be eliminated: all of his previous training, the commercial instincts that have governed his entire life erased, before he steps from the salesman's presence into the mysterious solitudes of his own soul, whence presently will come the final answer. There are few situations in life more delicate to handle. To withhold that last needed atom of influencing personality is perhaps to see the customer descend out from the clouds of his idealism to the accustomed plane of life where the bread of vision becomes luxury again; still coveted, perhaps but no longer regarded as an actual necessity to existence. To speak a single discordant word is frequently to hasten the descendant by arousing the common man out of his reverie. The soul of the salesman must actually accompany the one it has guided up into those heights of appreciation and must remain there in close sympathy; then his own emotions will direct the tenor of his appeal.

There is, perhaps, no more severe test of a man's real manhood than his ability to face the psychological moment of a sale. To prepare for it really means the building of a lofty character from its foundations. It is a life-work, and a moment of insincerity can undo it all. Here is the time when the worm in the heart will be revealed though everything else has failed to reveal it. The lie, the deception that has lain concealed like a viper under the leaves of conventionality, the lurking scorpion of disrespect for higher things, will all be driven from their hiding-places and the heart laid bare of its covering. It is not possible to expose the soul to the supreme influence of its highest impulses without also exposing its deformities.

Conscious striving for effect such as concealment requires defeats the effort. No soul can carry another soul away from its accustomed limitations and retain its own. It must burst away from them or be defeated by the restraint. Deception must be rigidly banished from the heart, not merely for the time but for all time. Did you ever notice the different degrees rapture expressed by the inexperienc child and by the matured votary of c for some specially beautiful thing? T studied words of aproval from the l are faultless in their form but how sup and flat they seem beside the shining fa the quick breath, the simple "Oh-h-h of the child. Sincerity always carries w it a sympathetic influence to which the mo polished affectation can never attain

There are lines of trade in which t salesman may be moderately successful a still live among the ant-hills, if he prefe The master salesman in the jewelry sto must breathe a constant atmosphere fro the same high altitudes into which he gui his customers and he can never lead the above the level of his own ideals. If th go higher it is because of a superior c recting force in themselves and they are ju that much beyond his reach. When t supreme moment of decision comes th will be out of his influence. To peop like that he is no more a salesman than t policeman on the street who directed the to the store. There is no one to sugge to them when the purchase has become necessity to their soul. The opportun awaits the man but the man is wanting

The salesman who can create a neces out of luxury by so entwining it into t demands of the customer's heart that li to him is incomplete without it, is the m who has mastered the psychological side salesmanship. In order to do this he first to cultivate similar desires in his ow heart until they are a part of himself, rai to respond, sincere to answer. Dickens learned to suffer, through his intensely d veloped powers of sympathy, with eve suffering that came upon the children in his imagination. We may smile that I wept, in the vividness of his vision, by "Little Nell," but we know that the wor of literature some way never had another "Little Nell"; that the human element the character sprang out of the inner tenderness of his own heart. It is the same personal intensity, that entire forge der of conventionalism to sincere realit that renders the master salesman ready t the supreme occasion which circumstan may force upon him.

It is a misfortune, this high plane salesmanship in the retail jewelry trade, is one of the chief attractions. There a constant satisfaction in the life that c experience such pleasure in the beautifu that can draw such appreciation out of Dr. Jekyl here reverses the process an builds a new appreciation of life's high

he shaping of his own heart and life.
(THE END.)

Neat Display Made by a Jeweler of La Crosse, Wis.

ERE is a very attractive window display which was made some time ago
W. T. Irvine, 429 Main St., La Crosse,
s. The show window has a frontage on
main street of six feet, while it extends
k four feet on the side street. In the
er part of the window were shown
ches, scarf pins, brooches, etc., and on
first shelf there were five trays of dia-
nd rings, besides numerous rings ar-
ged in small boxes.
A number of mesh bags were shown in
window, but these are not very dis-
t in the photograph. On a bracket in
window was a tray of white stone hat
s. Cut glass ware, silver smoking sets
l a large variety of miscellaneous jew-
y, sterling silver novelties, etc., were ex-
ited.

udicious buying, fair selling and good vertising create mercantile success.

A Representative Store of Princeton, Ind.

THE retail jewelry establishment of Applegath & Thomas, Princeton, Ind., is illustrated below. The store is 110 feet long and 19 feet wide. The jewelry concern occupies the western half of this space. The fixtures are made entirely of mahogany, as are also the tables, writing desks, work benches, etc. The front part of the jewelry establishment is partitioned off, making a salesroom. Behind this is a private office 10 by 12 feet. The workshop is located back of the office.

The establishment is up-to-date in every respect, the mechanical equipment being very complete. The lathes and polishers in the workshop are all operated by motor power.

The show windows are spacious and attractive, being 4½ feet deep and six feet wide. One side of the room is covered with green burlap, which extends upwards about six feet, the rest of the space being covered with brown paper.

The room faces the south and is illuminated at night by means of Tungsten burners.

THE RETAIL JEWELRY ESTABLISHMENT OF APPLEGATH & THOMAS, PRINCETON, IND.

ATTRACTIVE DISPLAY OF JEWELRY, FANS, CUT GLASS, STATIONERY, ETC.

An Attractive Booklet for the Wedding Season.

A STRIKING booklet, entitled "The Wedding Season," has just been issued by the Bailey, Banks & Biddle Co., Philadelphia, Pa. The booklet measures 4⅝ inches wide by 7 inches high. The title is in gold and is embossed, as also is the firm's name, on a white background of corrugated paper, ornamented with a light purple border.

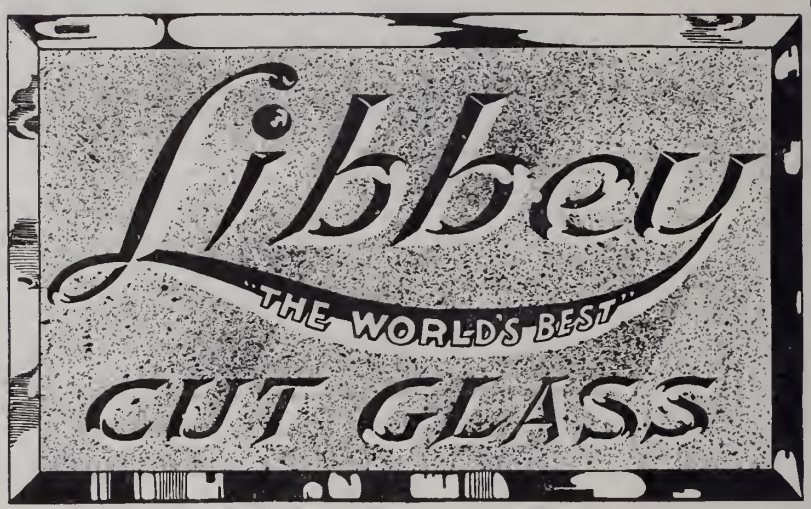
The inside pages are of a high quality of coated paper, and the text is illustrated by clean-cut half-tones representing flower vases, baskets, table accessories, etc., in silver and engraved glass, cut glass, and in hand-wrought brass.

E Pluribus Unum.

Editor THE JEWELERS' CIRCULAR-WEEKLY:

I am pleased to let you know that I erected in my show window a mechanical display such as you described in your storekeeping department in the issue of March 9.

In addition to that, I put up the "Old Holland Mill." Chicks and mill work perfectly.



I am sure the display will be profitable.

C. L. BRANDT.

J. L. Shalit, Moorhead, Minn., recently moved to Fargo, N. Dak.

The safe in Burns Bros. store at Pierpoint, S. Dak., was blown open recently and $2,500 worth of watches were stolen.

BUSINESS ESTABLISHED IN 1818

"It is very handsome; doubtless a piece of very good cut glass, but—it is not Libbey's."

That is the attitude which the really discriminating buyer of cut glass almost unconsciously assumes.

So that no cutting short of the world's best is acceptable.

Many dealers, in selecting cut glass for their stores, have taken cognizance of this attitude of the buyer.

The Story of Derby China.*

PORCELAIN was first produced in Derby very soon after its introduction into Europe. Although it was not until the early part of the 18th century that John Böttger, the German pioneer of the ceramic art, made his important discovery, a china factory was established at Derby by William Duesbury in 1750, and the Derby ware soon attained national fame. It furnished the tables of the king and was sought after by the nobles. In a word, it became the vogue. Duesbury acquired the right to use the royal crown to distinguish his wares, and his factory became the most celebrated of its kind in the United Kingdom.

As to the origin of the Duesbury works little is much known. Some years prior to 1750 a young French refugee, named Andrew Planché, took up his abode in the town. He was a person in humble circumstances, and earned a precarious livelihood by fashioning small articles in china, such as lambs, dogs, cats, birds, sheep, and other toys, which were fired at a local pipe-kiln. William Duesbury became acquainted with him and engaged his services. By patience and perseverance the manufacture of these simple china ornaments was improved, and the two soon added to their productions a great variety of other ornamental and useful articles. Duesbury's efforts were noticed and encouraged by a Derby banker, Mr. Heath, who owned an earthenware manufactory. This was about 1748, or three years before the founding of the Worcester factory.

The site occupied by Duesbury when, in 1750, he began to make china in earnest, was on the Nottingham Road, near the foot of St. Mary's bridge. Subsequently, buildings giving greater accommodation were erected near the same spot.

In 1769 Duesbury acquired the famous factory at Chelsea. Here a splendid variety of figures, vases, and other beautiful ornaments had been made, as well as a fine assortment of dessert and tea services. The owners employed first class artists in painting and gilding. But their success was only transient, although their workmen were producing the choicest and most artistic wares, which were usually disposed of at handsome prices.

In 1776 the Bow factory was also amalgamated with that at Derby, to which place the whole of the London business was eventually transferred. Under the new conditions, as might be expected from the rare combination of the honorable traditions of Chelsea and Bow, the Derby productions attained great popularity and distinction, and may truly be said to have been equaled by few other makes and excelled by none.

Duesbury lived to a good old age, and died in November, 1786, sincerely regretted and respected by all who knew him. He was succeeded in the business by his son, William, who married a daughter of Alderman Edwards, who was Mayor of Derby several times.

William Duesbury, the younger, was a man of superior talents, and brought the manufacture to great perfection in every branch. He was encouraged by George III. and other members of the royal family. As already mentioned, George III. granted him a patent to mark the Derby china with a crown.

The show room at that time was superior to any in the land. The figure trade was without a rival for many years, and the productions reached the highest stage of perfection. The workmen whom Duesbury collected around him possessed the true artistic spirit. They went to nature for their models. All of them were men of taste; some of them were men of genius. The decorations were brought to a greater degree of excellence than at any other time, and the drawing and coloring of flowers were inimitable in their peerless perfection.

For about 15 years, up to 1796, one of the most famous of the artists, a painter of flowers, was William Billingsley, artist and publican—queer combination—whose skill was afterwards a tradition at the works, which none dared to dispute. Specimens of his work were retained as standards of excellence, and in the pattern books frequently copied designs bore his name. Among the cherished specimens kept at the old works was his 'Prentice Plate, now preserved at the Derby Art Gallery. Its splendid roses are of a revelation of refined treatment and gentle coloring.

The younger Duesbury was of a delicate constitution, and, acting upon the advice of his friends, he took into partnership Michael Kean, a gifted Irishman, a first-rate artist and a good designer. Duesbury died in 1796, having only survived his father 10 years. The manufacture was continued successfully for several years by Kean, who, in 1809, disposed of it to Robert Bloor, who carried it on for some years longer. Bloor considerably increased the volume of trade, but not its character, manufacturing to a great extent and then selling by auction all over the country.

On Bloor's death the business was taken over by Mr. Clark, a sculptor and ceramic painter, who had married the only surviving grand-daughter of Bloor. This gentleman experienced great difficulty in conducting the business owing to his want of practical knowledge, and he finally disposed of the entire stock of models, etc., and everything movable on the premises, to a firm in the Staffordshire potteries. The works were closed in 1848, and were shortly afterwards demolished.

The workmen who made the place famous have all passed away, but such names as Billingsley, Pegg (the Quaker), James Rouse, Leonard and John Lead, Marriott, Rowland, Cutts, Wheeldon, Steele, Hopkinson, Haslem (many years art tutor to Queen Victoria), and others, will live long in the world of ceremacis.

Although the works were dismantled in 1848, the production of china in Derby was not allowed to die out. The late Sampson Hancock, assisted by other hands from the Bloor factory, carried on a small works where he produced articles of the old type and character.

In 1877 a company, styled The Derby Crown Porcelain Co., Ltd., was formed to revive the industry, and works were established on the Osmaston Road. Considerable success attended the venture, and in the year 1890, on the representation of the Seventh Duke of Devonshire, Lord-Lieutenant of the County and Lord High Steward of Derby, Queen Victoria was graciously pleased to command that the company should in future be styled "The Royal Crown Derby Porcelain Co., Ltd." and to grant the company a warrant of appointment as porcelain manufacturers to her Majesty at Derby.

In 1901, on his accession to the throne, King Edward VII granted the company a similar warrant of appointment as manufacturers of porcelain to His Majesty at Derby.

On the merits of the Derby productions of the present time it is not necessary to dwell at any length. Some of the best "Old Derby" patterns are revived, including the celebrated Derby "Japans," with their rich blendings of gold, red and blue.

The company's craftsmen have been and are in the very front rank of their profession. Among them may be named Monsieur Désiré Leroy, an artist trained at Sèvres

d a naturalized Englishman. He joined e company's staff in 1890, and remained th them until his death in 1908. M. roy made a specialty of old-time Sèvres wer, bird, and trophy painting, and was o strikingly successful with white amels. He did some very important work, ong other things a service of plate pre- nted to H. R. H., the Princess May of ck, on the occasion of her marriage with R. H. the Duke of York (now Prince Wales). His work is eagerly sought ter by connoisseurs.

Another artist whose work is well known A. Gregory, who has made a special dy of Billingsley's work, and has suc- eded in attaining the pleasing grouping d delicate touch of that prince of posy inters.

The company has produced many notable esentation works. Special mention may made of the Gladstone dessert service 1883), which elicited from the great Lib- al leader a tribute which was, perhaps, ne of the most charming disquisitions on eramics ever uttered or published; Queen ictoria's jubilee vases, presented by the dies of Derby (1887); and the Princess lay (now Princess of Wales) wedding ken from the town of Derby (1893). The mpany also supplied royalty with more rviceable articles, and since 1900 has een favored with the order for dinner, ea and breakfast services, etc., for the ing's yachts.

Needless to say, these new works enjoy considerable home and foreign trade. The exports to the United States and Canada are especially large, for Royal Crown Derby is a great favorite with overs of fine ceramics in those countries. The showroom visitors' book itself is a sort of world directory.

Resumption of American Prosperity Caused Active Demand in Diamond Market of Amsterdam.

THE following report from Consul Henry H. Morgan, of Amsterdam, will be of interest to the diamond trade:

"The diamond industry, which in 1908 suffered severely from the effect of the 1907 financial crisis in the United States, commenced to show decided improvement in the beginning of 1909. The rapidly increasing prosperity of the United States, which absorbs 60 per cent. of the diamond production of the world, caused renewed purchases, so that in the early Spring all the diamond shops of Amsterdam were at work in full force to supply the demand. Conditions have steadily improved, and the trade prospects are exceptionally good. The increased demand for diamonds during the Spring of 1909 was followed by a raise in prices of the raw material by the London syndicate, which continued to advance the price from time to time until now the rough diamond is fully 20 per cent. higher than a year ago. The increased cost of the rough diamond is said to be due entirely to the lack of labor and the inability of the De Beers company to supply the demand. During the 1907-8 depression the company reduced its working force, and finally shut down altogether. The workmen found positions in gold mines, replacing the Chinese. Whether their new employment was easier or more to their liking, the fact remains that when the De Beers company resumed work strenuous efforts to get their old workmen back did not avail. It is now estimated that they are over 10,000 men short of their usual force.

"The largest increased price has been placed on stones from three-eighths up, as for smaller stones the London Syndicate has to take into account the competition of the Premier and German Southwest African mines. The last named, it is reported, market about 11,000 carats of rough stones a week, the largest part of which consists of bort and other material unfit for cutting purposes, so that of the quantity stated only about 4,500 carats comes into actual consumption.

USE OF MÊLÉE—LABOR PROBLEMS.

"These stones, when cut, only yield what is known to the trade as mêlée, and rarely polished stones of over one-quarter carat are obtained therefrom. It appears to be the opinion of experts that they are greatly inferior to the Kimberley, or closed goods, marketed by the London syndicate, nor have they the brilliancy of the latter stones. They are not bought by the American buyers, and are manufactured principally for the European market. It was at first feared that the large output of the German Southwest African mines would cause the mêlée to be a drug on the market and cause prices in this article to drop, but such was not the case for the reason stated.

"Another reason is that the Labor Union of Amsterdam, having effected new arrangements with the Manufacturers' Association to avoid all conflicts, has caused a substantial increase in wages for eight hours' work in exchange for its concession which gives the manufacturers 2,200 new apprentices during the following five years. These apprentices will be taught the art of cleaving, cutting, polishing and sawing in a trade school opened for that purpose. The mêlées, which require more labor than the large, will have to bear the brunt of this condition. As evidence, very small brilliants are 35 to 45 per cent. higher than a year ago, and there is now a great scarcity of them. Large diamond polishing factories of Amsterdam state that their stocks are low, especially in better grades. As the De Beers company is seriously handicapped in accomplishing their yearly output of about $25,000,000 worth, additional advances are certain to take place.

"The exports of diamonds from the Amsterdam district to the United States for 1909 were in value $11,795,078 of the polished and $646,116 of the rough, against $4,340,987 and $230,818, respectively, in 1908, and $7,452,604 and $453,248, respectively, in 1907."

The Hotchkiss Jewelry Co., Jackson, Tenn., has just installed in its store at 207 Main St., a fine electric regulator, which is so placed as to be a convenience fo those passing in the street. The new safe made for this concern will be shipped soon and then the finishing touches will be put on the what is claimed by the company the smallest but the smartest jewelry salesroom in Jackson. The store is 12 feet wide and 28 feet long.

An Ex-Engraver Courts the Muse.

A PHILADELPHIA jeweler, B. E. Loeper, recently received from C. J. Blackhurst, a former engraver of that city, now in Utah, an original poem expressing "The Delights of the Engraving Trade," for which he often yearns (?). The poem is as follows:

Yes, I'm away from "Philly,"
Out in the western wilds,
Where plains merge into mountains,
And you measure things in miles.

But back in the jewelers' cañon,
In spirit I'm sometimes there,
Doubled up like a pothook,
Chewing the old chunk of air.

The last three days "nothing doing,"
And then the usual rush,
"I must have this," "I must have that,"
Nerves and worry and fuss.

Four orders marked "Do this at once,"
And "right away" several more,
And "this a special favor,
Customer's waiting in the store."

"To make a sale you must do this,
So please to rush it through,
And all the other goods we send by noon,
We must have, too."

"These are for the messenger,
And wanted right away,"
A loving cup and wedding gifts,
"Certain, sure, to-day."

"The mason wants his diamond crown,"
To-night he goes to heaven,
"This party's off to Europe,
His ship sails at eleven."

One girl must have her necklace
Or she will surely choke,
Another "has to make a train,"
A third "to make a boat."

The lady wants her diamond ring,
Her precious life 'twill save;
Oh! Let her die! The game is up,
The engraver's in his grave.

A Prehistoric Jeweler's Workshop.

ABOUT 25 years ago the discovery in the Department Allier in France of several hundred small round disks of slate excited considerable interest in archaeological circles, as the object of these prehistoric worked stones could not be explained. Now, however, thanks to a new discovery in the same department, as *La Nature* states, the explanation of the origin of these disks is at last forthcoming. They are nothing else than the remnants and waste from a prehistoric jeweler's workshop, in which finger rings of slate were manufactured.

For this purpose a piece of slate one centimeter in thickness was chosen and ground to a disk ⅞ centimeters in diameter. Circular grooves were then cut in these little plates with a hard flint at a distance of 1½ centimeters from the edge and gradually deepened till the center piece fell out, leaving a ring. This ring was then again ground and rounded off at the edge, to serve finally as an ornament for our prehistoric ancestors.

The store of the late Mrs. Bertha Davidson, McAdoo, Pa., will in future be managed by A. Shachter. Mrs. Diehl died a short time ago.

There are no other lines in the market that are more particularly adapted for the Jewelry trade than

Trade-Marks.

WHILE both trade secrets and trade-marks are of ancient origin, the al recognition and protection, under the mmon law, of trade-marks long pre ded that of trade secrets. In fact, it is tually but a century since the courts have ended their protecting arm to cover the perty rights known as trade secrets The trade mark is a development of the ilar shop sign. Even the ancient Egyp- s are known to have displayed inscrip- s denoting their trade in conjunction h an emblem to further indicate it. Also ng the ancient Greeks signs were em yed to proclaim their calling. In the s of Pompeii and Herculaneum discov s are reported of representations of us kinds let into the pilasters at the of an open shop, as, for example, a t, by a diary; a mule driving a mill, at baker's, and at the door of the school- ter's what has been termed "not over- pting allurement to knowledge," com ng the representation of a boy receiv- a good birching. These trade emblems e doubtless introduced into England at time of the Roman invasion.

Originally, owing to the limited number traders, the signs were indicative of the de, and were employed in the same ca- ity as we now use street numbers. adually, however, as competition in- ased in these particular trades, and the ps became designated by street num- s, the sign-board fell into disuse. Then was that the trade-mark came into active , being merely in the beginning a trans- , so to speak, from the door of the shop the article of merchandise.

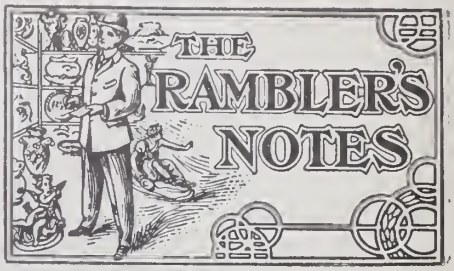
Even the piracy of trade-marks is of ly origin, as witnessed by the preface urring in Adler's "Livy":

astly, I must draw attention of the student to fact that some Florentine printers, seeing that y could not equal our diligence in correcting printing, have restorted to their usual artifices. Alder's *Institutiones Grammaticae*, printed in r offices, they have affixed our well-known of the Dolphin wound round the Anchor! they have so managed that any person who n the least acquainted with the books of our duction cannot fail to observe that this is an udent fraud. For the head of the Dolphin is ned to the left, whereas that of ours is well- wn to be turned to the right."

A critical review of famous trade-marks uld indeed form an interesting lesson in chology, and would doubtless supply a d of useful information to the memory tem *doctrinaires*.

The passage of the pure food laws has n already a boon to the manufacturers of re food, and with the maintenance of lity, their trade-marks will ever stand remost in the minds of the 80,000,000 nsumers of this country, who will, it is ed, never again have occasion to buy ndard commodities subject to the doc- ne of *caveat emptor*.

n respect of the three classes of prop- y rights mentioned, either the manu- turer, the merchant or the inventor in ne cases has a misconception of, or fails realize, the protection afforded. The ral effect of a patent, and of a certifi- e of registration of a trade-mark, upon public generally, and upon competitors particular, is often of considerable value. is is even true in the cases of what are termed "paper patents" or 'paper trade-marks"—that is, patents and trade-marks which are of such a nature as to be almost certain of being ultimately upset in court. When one realizes the time and money often required, under the present administration and enforcement of our patent laws, to defeat a patent or a certificate of registration, is it any wonder that corporations and individuals who are cognizant of this fact do not hesitate to secure every possible degree of protection for their products which the common law or the United States patent system affords them? Similarly in the case of the trade secret. There is no question but what the moral effect of a *caveat* upon the employes and competitors would result in increasing the loyalty of the employe and discouraging the competitor against infringing upon the rights of his rival, who had thus endeavored to protect his trade secret.—W. Hastings Swenarton in the *Yale Law Journal*.



Costly Easter Eggs.

SOME of the most costly Easter eggs can be found in the possession of the Russian Imperial family. In the Russian section of the last Paris exhibition it was possible to admire the Easter eggs owned by the Dowager Empress, Maria Frodorowna and the reigning Czarina. In the year in which the Heir Apparent started on his journey round the world Alexander III. presented his consort with a large Easter egg worked in jasper and embellished with some remarkable ornaments in gold and diamonds. Inside it is a miniature ship, a model of the vessel in which the Czarewitch crossed the ocean. A splendid green beryl constitutes the lower portion of the graceful hull; the deck, masts, anchor and rigging are made of solid gold. The boat even carried two tiny cannons. A skilled goldsmith took 10 months to complete the work.

A companion piece to this rare work of art is the Easter offering which Nicholas II. gave to his consort in the year of his coronation. It consists of a gold egg inlaid with rose-colored enamel and serves as a receptacle for a model of the State carriage in which the Imperial pair made the journey to the Cathedral in Moscow. The little carriage is an exact copy of the large one down to the smallest detail; even the stuffed seats are imitated in red enamel and the silk curtains, scarcely half an inch high, on the little window can be moved to and fro. The finishing touch to this magnificent coach is supplied by a small Imperial crown richly bedecked with jewels.

Another egg bears the inscription in brilliants, "The Heart of My Czarina," and contains a heart composed of variously colored precious stones and enclosing 25 portraits, all of them of members of the Imperial family.

T. J. Thomas, who conducted a retail jewelry store at Roslyn, Wash., has bought out the old-established jewelry store of L. W. Herrick, Aberdeen, Wash. Mr. Thomas will move his entire stock now in the Roslyn store to Aberdeen.

FERN DISHES AGAIN POPULAR

FERN dishes are now in demand by the housewife, and the enterprising jeweler who carries a line of this kind should be ready to meet the call for the latest and most salable novelties. Fern dishes made in a variety of shapes and sizes in solid brass, plain, polished and engraved, may be seen at the salesrooms of the Pairpoint Corporation in New York. The pieces are designed to meet the need of the exclusive jeweler, and should prove ready sellers. Candlesticks are also shown by the same firm in the different finishes. The display of smoking sets, comprising a cigarholder, match-box and ash receiver, includes a number of attractive patterns.

*

NOVEL SUBJECTS IN ELECTROLIERS

AT the salesrooms of L. D. Bloch & Co., 44 West Broadway, New York, there was recently exhibited an attractive bronze representing a life saver about to cast a life-belt to some unseen struggler. The piece shows a life-boat resting on a base formed to represent waves. In the boat stands the life saver dressed in oilskins and holding a life preserver, which he is about to cast off. The life-belt is illuminated with small electric globes in colors. Another attractive exhibit at the same salesrooms shows a man dressed in colonial costume and seated before a wide fireplace. The electric lights are so arranged as to shine through from the back of the fireplace, producing a most realistic appearance.

*

CHANTECLER COCKTAIL SETS

"CHANTECLER" cocktail sets have appeared in the New York market, and are now being shown as one of the latest novelties in glass ware. The sets include 11 pieces, comprising holders and six glasses. The decorative scheme shows a pompous rooster facing the rising sun. The sets are shown in plain glass ornamented in gilt. Another novelty shown at the salesrooms of C. J. Dierckx, 8 Barclay St., New York, is a perfume jar in quaint Roman shape and made of baked clay. The jars are a brick color, and while in a plastic state the perfume is worked into the clay. It is claimed that these jars retain their fragrance for a long period.

THE RAMBLER.

The business which for the past five years has been conducted in Titusville, Pa., by Earl J. G. Lovett, has been purchased by W. B. Gardner, who for the past two years has had charge of the optical and repair departments of the store. Mr. Gardner took possession April 1.

THE BIXLER MFG. CO. SPRINGFIELD, ILL.

We Make No Extravagant Claims

In the "sad, bac days" of "practica politics" the election night slogan ran "Clain everything in sight."

For ourselves we make no such claims in regard to the results we obtain in dealing with the wastes sent to us by Silversmiths and Jewelers.

We merely say that by the use of the most scientifically advanced methods we extract all that is humanly possible.

As a matter of course, the last fraction of this value is sent to our clients.

Handy & Harman

Office: 22 Pine St. New York City

Plant: 202 John St. Bridgeport, Conn.

WORKSHOP NOTES AND QUERIES

Answers are also solicited from our readers to the questions published on this page.]
No attention paid to communications unless accompanied by full name and address of the writer.

QUESTION No. 2551.—**Polishing Shells.**—*How can I polish and cut clam shells into various designs for buckles and pins?* *P. S.*

ANSWER:—Rough shells can be sawed or filed into the shape wanted; then ground on a coarse grindstone. Smooth them with pumice-stone and water on a buffing wheel or with a hand polisher and finish with rotten-stone. The rotten-stone is sometimes mixed with sulphuric acid, full strength, or slightly diluted, to heighten the color. Certain kinds of shells are treated to a boiling in a strong solution of potash; then polish with hydrochloric acid and putty powder.

QUESTION No. 2552.—**Parisian Polishing Powder.**—*What are the ingredients in the jewelers' Parisian polishing powder?* *P. P.*

ANSWER:—The Parisian powder consists of five parts of rouge, 30 parts of carbonate of magnesia, well mixed together. It should be used with alcohol.

QUESTION No. 2553.—**Brush Brass Finish.**—*How can I produce the brush brass finish now so much seen on brass novelties?* *B. B.*

ANSWER:—In order to produce the brush brass finish prepare the brass pieces and buff them just as if they were to have a polished finish. Then scratch brush the pieces with a fine brass wire scratch brush, using as a lubricant a little moistened pumice. The water should be softened with a little soda. Scratch brush the pieces evenly all over, then rinse in cold water and pass through a cyanide dip. Next dip into clean hot potash, swill in hot water and dry. The finish should be protected with a coating of brass lacquer.

QUESTION No. 2554.—**Silver and Gold Polishes.**—*Being interested in polishes suitable for silver and gold, I request you to publish a few formulas for making them?* *S. & G.*

ANSWER:—The ingredients used for silver and gold polishes should be ground as fine as possible, otherwise the articles to be polished will be scratched. For this reason the Germans have, up to a few years ago, been able to prepare the best polishes. They devote much attention to reducing all the ingredients to the finest powder possible. Below will be found several very good polishes. If carefully prepared they can be recommended and reliable: (1) Putz Pomade: Mix thoroughly 4½ parts vaseline with a few drops of essence of mirbane; add to this by stirring 7½ parts elutriated chalk, 1½ parts burnt heartshorn and 1½ parts pulverized cuttlefish bone. The mixture should be of the consistency of butter. (2) Sodium hyposulphite has been recommended. Use with water. (3) A polishing powder, to be moistened with water when ready to use, consists of finest whitening, 15 parts; soda, 1½ parts; citric acid, three-eighths parts. Reduce to a fine powder. (4) English silver soap: Dissolve 10 parts fine castile soap in 10 parts hot water. Remove from the fire and stir in 30 parts fine whitening. (5) Prepared chalk, two ounces; water of ammonia, two ounces; add water enough to make eight ounces. This can be kept in a well-stopped bottle. Gold polish: Most gold articles, especially jewelry, should not be polished with any wet substance. When the gold must be washed, and if the articles are small, use alcohol. The best polish is rouge. Brush and dry with a bristle brush.

QUESTION No. 2555.—**Casting Gold Ornaments.**—*How must I proceed to cast some gold ornaments? Is it best to cast in sand or is there some other way of doing this?* *C. G.*

ANSWER:—Gold may be cast into ornaments in sand in the same manner as silver or brass, but if done that way a pattern is required to get the impression in the sand. When gold pieces are cast they always require more or less filing to remove the rough scale, and it is therefore just as profitable to do the castings in a mould cut out in a cuttlefish bone, which is excellent for casting gold. Select a good cuttlefish bone and file it flat on one side; then cut out an opening nearly the shape of the ornament, making a gate at the top to pour in the molten gold. Select another cuttlefish bone and flatten this on one side and fit it against the other, then wire the two securely together. The gold can be melted in a hollowed-out piece of charcoal. Before putting in the gold pieces rub the sides of the charcoal opening with powdered borax, put in the gold pieces and cover well with borax. The blow pipe can be used to melt the gold, and when melted let remain at a molten state a little while or until the top looks easy-flowing, like water, when it is ready for pouring. The gateway or head should be left on the ornament until the other portion is filed into shape, as the gate gives a good hold with the plyers. When making the moulds allowance should be made for the filing off on the cast pieces, as gold will perhaps need more filing off than other cast metal. Should the castings be very rough and unsound, then they can be improved by remelting the gold, applying more heat than was used at the first melting.

QUESTION No. 2556.—**Repairing Hat Pins.**—*How can I best replace the pins on the large hat pins. Customers bring them to me all bent out of shape, and they desire new pins put in. I have tried brass wire, but this is not hard enough and will not stand the usage.* *R. H.*

ANSWER:—The best material for the large hat pins is a thin knitting needle; they are about right length and are very strong. One end must be filed to a point, then smoothed up with emery cloth. First use coarse emery and finish with a finer grade. To solder the other end to the head first tin it over by heating and applying an acid flux and a little tin. The pin can then be soldered to the head, where the old one has been melted out, with a very little flux and tin solder. The knitting needles are polished and need no further treatment.

Dip Silvering.

(From the *Brass World.*)

MUCH dip silvering is done upon small brass copper goods and is a cheap and easy method of silver plating without any electric current. The success of the operation is in the use of the right dip. It is easily made, but many persons do not use the right proportions of materials in making it. The secret of success lies in the use of no free cyanide in the solution. The cyanide used should take up all of the silver nitrate that it will dissolve. An excellent formula and one extensively used is as follows:

Solution A.

Water	1 gallon
Silver nitrate, crystals	¼ oz

Solution B.

Water	1 gallon
Potassium cyanide	1 lb.

Add Solution B to A (pour the potassium cyanide solution into that of the silver nitrate) little by little with stirring. A precipitate is at first formed which then is dissolved. When no more of the precipitate will dissolve, add no more. If any precipitate remains undissolved after vigorous stirring, then add a little more of the cyanide until it just barely dissolves. The object is to use just enough of the cyanide solution to dissolve the silver nitrate and no more. In this manner no free cyanide is present. Use the solution hot at a temperature of about 150 degrees F.

If the dip contains much free cyanide, the silver will come dull and yellow. By using no free cyanide, it will deposit on the work in a perfectly white and bright condition. The secret of bright dip silvering is to have no free cyanide.

Cement for Repairing Celluloid.

DISSOLVE one part of camphor in 40 parts of alcohol and add an equal quantity of shellac. The cement must be applied hot and the celluloid articles kept pressed together till it cools.—*Scientific American.*

The San Diego Gem Co. has just finished cutting at its San Diego, Cal., establishment some of the largest and finest beryls ever produced. The largest pink stone weighs over 26 carats and is valued at about $400. The colors are blue, pink, white and yellow. No green stones have been found as yet on the property of the company.

SMELTING FOR THE TRADE

WEBSTER-WHITCOMB NEW MODEL LATHE

THE VITAL POINT

PAT. APPLIED FOR.

in a Watchmaker's Lathe is the SPINDLE AND ITS BUSHINGS. In this lathe the bearing surfaces of the spindle and its bushings TOUCH THROUGHOUT THEIR ENTIRE AREA, insuring continued TRUTH, easy running and greatest *durability*. This quality in our lathes is maintained by workmen of long experience in the operation of special machines devised for this particular work.

Many lathes may be found in the market in which the front end of headstock spindle bears only on the 45° angle. They may look well on superficial inspection, but they will run hard if the spindle is closely adjusted, and are quite unreliable for perfect work.

In buying a new lathe be SURE the spindle and bushings are PERFECTLY FITTED. Without this a lathe is dear at any price.

Our lathes are finely finished. The curves are true and the surfaces smooth. All sharp corners are carefully and uniformly rounded; this makes a great difference in the durability of the nickel plate. HEAVILY NICKELED.

In comparing lathes, the size and variety of CHUCKS, as well as the scope and general character of the ATTACHMENTS should be considered.

In comparing prices with other lathes, learn the difference in size, quality and details of construction.

EWARE
(
ITATIONS

ne, including Taper and Screw Chuck, 6 Cement Chucks and Belting $31.00
ne, as above, and 6 Wire and 2 Wheel Chucks (10 Chucks).... 39.00
ne, as above, and 10 Wire Chucks (12 Chucks)..... 41.00
itional Wire and Wheel Chucks, each..... 1.00

A chuck may look nice and shiny, yet be practically worthless. Examine critically the thread on our chucks in comparison with others. We do not use dies for threading our chucks. THEY ARE CUT IN A LATHE. The cone and body of OUR chucks are GROUND to correct FORM and size; the surfaces are STRAIGHT and TRUE; compare them under your eyeglass with the shiny ones. The thread and outer surfaces of a chuck, as well as its form and proportions, are important elements in its continued truth and durability. The holes in our chucks are GROUND to size and truth. We caution you against imitations. The GENUINE are stamped "WHITCOMB."

A NEW DEPARTURE IN ENGRAVING TOOLS

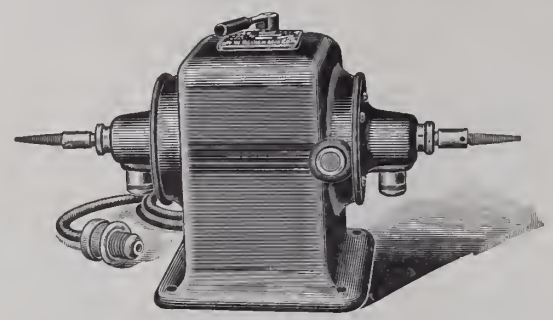
WELLS' UNIVERSAL GRAVER

Pat. March 9th, 1909.

The above cut gives a general idea of the Wells' Universal Engraving Tool. The crescent graver is held by means of a clamping device and can be adjusted quickly and securely. The crescent may be set at any angle to suit the operator, thus enabling him to engrave flat, concave and convex surfaces with perfect ease and a better control than is possible with any other kind of tool.

The length of the graver remains the same throughout the life of the tool; it is in the fullest sense UNIVERSAL owing to its uniformity of length, adjustability of angles and the facility with which it is handled. It is readily adapted to all kinds of work and inasmuch as the engraver has a superior degree of control and feel with this tool he is able to do the work more quickly and accurately than is possible with any other graver.

The tools are so constructed that when sharpening the crescents lay flat on the stone; this assures a sharp cutting angle, and as both ends of the crescent are ready for use the engraver has two angles of different degrees to suit the work he has in hand.



The three styles of crescents are (1) sharp point, (2) narrow flat, (3) wide flat. The tools are guaranteed to be perfect in temper and quality.

PRICES

A—Patent handle with one crescent graver..... $ .75
B—Patent handle with three crescent gravers.... 1.00
C—Three patent handles with three crescent gravers. 2.00
D—Separate crescent gravers each ..... .20

LEIMAN BROS. DEPT. B. **63 John St., NEW YORK**

Facts about the Cold Test of

FULCRUM OIL

A correspondent in the March "Keystone," under the head of "Workshop Notes," writes that all watch oils he had previously used blackened the pivots—that he bought a bottle of Fulcrum Oil, and thought at last he had an end to his "oil troubles."

However, one morning, when it was some degrees below zero, he put this bottle of Fulcrum Oil outside, and it became white and thick and would not run out of the bottle. He asks the "Keystone" if this is a fair test.

HERE IS A LETTER

to a user of Fulcrum Oil who had seen this article:

"In regard to the condition of Fulcrum Oil in cold weather, up to about zero there is no change. Around zero the oil will begin to cloud and will continue to get more cloudy as the temperature decreases. The mention of this fact might seem at first thought to be detrimental, but in reality it is an advantage which has been demonstrated many times.

"A number of the same grade watches were cleaned thoroughly and each oiled with a different brand of the best known watch oils. At six degrees below zero every watch but one had stopped; the one still running was the watch oiled with Fulcrum Oil.

"All watches were carefully examined; in those which had stopped the oil was found to be thick and stringy, like molasses. In the one which cold had failed to stop the oil was found to be white and had formed itself into a grease; this was Fulcrum Oil.

"The fact which we wish to prove and which has been proven in various other ways by many expert watchmakers and watch factories is, that while Fulcrum Oil will cloud and does not have the same appearance below zero as it has above—on account of forming itself into a grease below zero—IT NEVER LOSES ITS LUBRICATING EFFICIENCY, and it has been impossible to find an oil which will stand as low a cold test in actual use as will FULCRUM OIL."

Every watchmaker knows that a machine will run with less resistance in grease than it will in a gummy, stringy oil.

THE TEST OF ANY OIL IS IN ITS USE

and the cold test of Fulcrum Oil is guaranteed. Test it yourself and see.

35c. a bottle *For Sale by all Jobbers* **$3.75 per dozen**

FULCRUM OIL CO., Franklin, Pa., U.S.A.

AN APOLOGY

Every watchmaker and jeweler in the United States and Canada should have received a letter the first part of March stating that a bottle each of Fulcrum Watch and Clock Oil would be mailed them direct from the factory about March 10. All of these samples were mailed as intended on the date specified, but were refused by the post office departments on account of a small irregularity in the package. New mailing tubes had to be procured for the entire lot, which, with the repacking, delayed the shipment about two weeks. Fourteen thousand of these packages were mailed on March 28, and the balance will go forward in a short time now. This explains the unavoidable delay.

THE BEST JUDGES

are the most critical as to the cutting, when considering the worth of a diamond—it's the cutting that makes the diamond brilliant—it's because of its brilliancy that the diamond is so highly prized.

The diamonds we offer are cut in our own cutting works, and no effort spared to see that they are cut right. The price we ask for them—the actual cost of the rough stone, plus the workmen's wages, with our modest profit added.

BE CAREFUL

Where you send your old Gold and Silver

Every Jeweler knows that Old Gold is worth four cents per karat. The point is, however, to have your Gold graded properly. If you send it to anyone who has not the requisite knowledge and experience in testing, he will be sure to give himself the benefit of the doubt.

And again, if you send your Gold to a refiner who will not give you a valuation without first melting and refining same, you would be compelled to accept his valuation, whether satisfactory or not, as all complaints could be met by the stereotyped reply, "Your Gold is melted and you received all it was worth."

Here is where you see the advantage of

OUR PLAN

If you send your old Gold, Silver, filled and plated and platinum to us, we will value same immediately and send you a check, draft or money, as preferred.

If our offer should not prove satisfactory (which is a very rare occurrence), we will *return the shipment* in exactly the same condition as received and pay all charges.

64 Nassau Street, New York

TO THE TRADE:

"A principle which we have always fought for has been to keep the market open for all watch cases, no matter of what manufacture, believing it to be for the best interests of the trade to allow them to buy the watch cases which they consider the best on the market and by so doing stimulate all manufacturers to their best efforts, with a view of establishing a high standard of excellence. The Dueber Watch Case Mfg. Co. in all its many years of existence has never sought to dictate to any jobber what watch cases he should use. It has never used, directly or indirectly, any method of coercion or force to either restrict the product of any watch case manufacturer, or to force the production of its cases upon any wholesale or retail jeweler to the detriment of any other manufacturer of watch cases. It employs the 'open door' policy in selling merchandise and believes that the trade should be open to all manufacturers and jewelers alike and to that end will bring all its energy to bear for the good of the entire trade."

THE DUEBER WATCH CASE MFG. CO.

POINTER NO. 129

This Firm Has Used The Arnstine Catalog System With Remarkable Success

THEY SAY SO—READ THEIR LETTER

STORE OF THE LEWIS JEWELRY COMPANY, CLEVELAND, OHIO.

THE ARNSTINE BROS. CO., Cleveland, Ohio:

CLEVELAND, O., Jan. 5, 1910.

Gentlemen—Replying to your inquiry of the 1st inst., regarding the 5,000 Catalogs and 15,000 Circulars, we have the pleasure of saying that we are well satisfied with results.

Our December business was unusually good, showing from 15 per cent. to 25 per cent. increase over December, 1908, which we attribute to this mode of advertising, and believe we will get from five to ten thousand dollars additional business in the near future. From the effect produced by the use of your Catalogs and Circulars, we feel we can safely calculate on this, judging from our experience from the year previous, which was the first time we sent out the Catalogs.

The greater portion of them we mailed to people in the city; they brought people to the store not only to look at the goods, but to buy, and through them we have made many hundreds of customers.

The goods you illustrate are quick sellers, excellent quality and well selected—far better than even an experienced buyer could get together in the same number of pieces, and your prices on them are satisfactory.

Your Catalogs will keep in the front rank any store using them. They establish a nice impression and give the store a high standing and prestige obtainable by no other method of advertising.

We are so well satisfied that we will buy your goods and Catalog for next Fall.

Wishing you continued success, we remain,

Yours truly,

THE LEWIS JEWELRY CO., R. P. DORMAN, Sec'y.

We make Catalogs only for Legitimate Jewelers and as a rule sell but one in a city

RESENT SLEDGE HAMMER METHODS

BLACKSMITHS should have a monopoly of the Sledge Hammer; it is out of place in the jewelry trade.

The hammer is a good instrument for driving a spike, but a poor one for driving a Man. In fact men—real MEN—refuse to be driven at all. They *resent coercion.*

This Company approaches the trade in a totally different attitude. In selling

Wadsworth Watch Cases

the appeal is made simply to the Good Judgment, the Natural Requirements and the Best Interests of dealers. In a word, the Keynote is MERIT. And it is the trade's appreciation of this that spells Success!

Such being the case, the business enjoys a HEALTHY growth, an HONORABLE growth and a STEADY growth—without the Sledge Hammer.

RIGHT OR WRONG

¶ At our coming EIGHTH ANNUAL EXHIBITION, to be held in our new offices from *August 29th to September 3rd, inclusive*, the Seasons' new models in Ladies' Jeweled Rings, unlike the average shop making Diamond Rings by the dozens of the same design, we suffer no handicap. No Manufacturer sends us his conceptions—right or wrong—of the Seasons' new modes. Every Ring that is sold by us is a creation of our own designers and workmen—an exclusive product from the hands of the trained and talented craftsmen.

¶ "Our Mr. Josh. W. Mayer, who is now abroad, is purchasing liberally all sorts of precious stones."

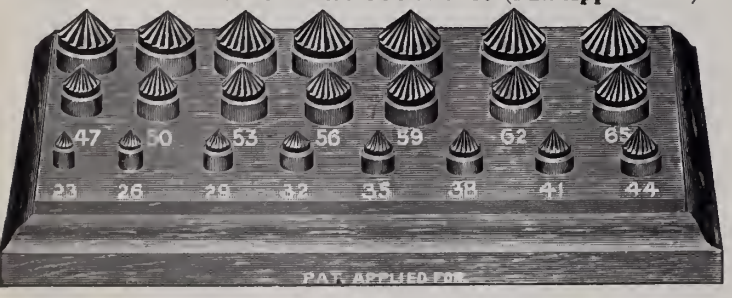
CABLE ADDRESS "ON TOP," LONDON

ECHARCO IMPROVED WATCH GLASS CABINET, No. 85

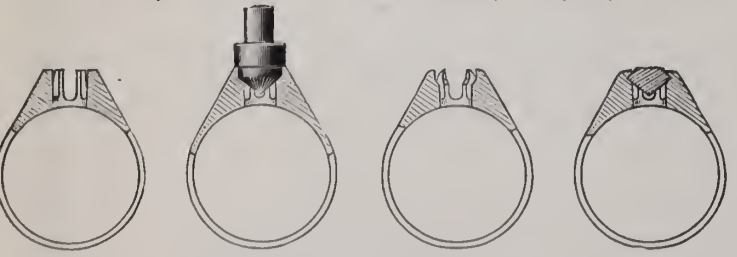
The NEW FEATURES of this Cabinet are the SKELETON DRAWERS, making an accumulation of dust and chips impossible, and the very easily read LABELS of white celluloid on the drawer fronts. The Cabinet has nine drawers, giving 1,632 spaces. It is 29½" high, 24" wide and 13" deep. The construction of drawers, arrangement of partitions to economize space and weight, and the novel method of showing contents on the drawer pulls are all novel and practical ideas and very well carried out. The Cabinet is made of oak and finely finished, and is the lightest and strongest case on the market. Spaces are provided for the small sizes of Lentilles and Genevas, and for Antiques, which no other Cabinet provides for, making it the most complete and convenient Cabinet ever offered to the trade.

Price, $16.00



PEGWOOD SHARPENER, No. 3

A new attachment, designed for use on a watchmaker's lathe, which sharpens pegwood to a hair point without breaking, and at the same time gives the point the proper concave shape. The tool is held in the lathe by an arbor fitting into a regular wire chuck as shown in the illustration, being steadied by the rest shown. The stick of pegwood is rotated by hand while the tool is revolved in the lathe, producing a fine, long, flexible point. With this tool the watchmaker can prepare enough pegwood for a day's or a week's work in a few moments, and have every piece uniformly and evenly sharpened.



The tool is mechanically perfect, made of the best material is durable and cannot get out of order. For sharpening the cutters the use of a fine Arkansas oil stone slip is necessary. Coarser abrasives should not be used.

Price, each, $2.00

DIAMOND AND STONE SETTING TOOL No. 85 (Pat. Applied for)

The only tool that will do the work correctly and quickly.

These tools, invented by a stone setter of many years' experience, will do the work they are intended for with absolute perfection, whether in the hands of an experienced or inexperienced workman. In eight seconds after adjustment in lathe will cut a smooth seat for any stone from 1/16 to 2 carats.

Tools are made of polished and hardened steel and are indestructible. Will fit in chucks Nos. 30 and 44.

The greatest labor saving device ever invented in the line of stone setting cutters. Put up in neat block and box.

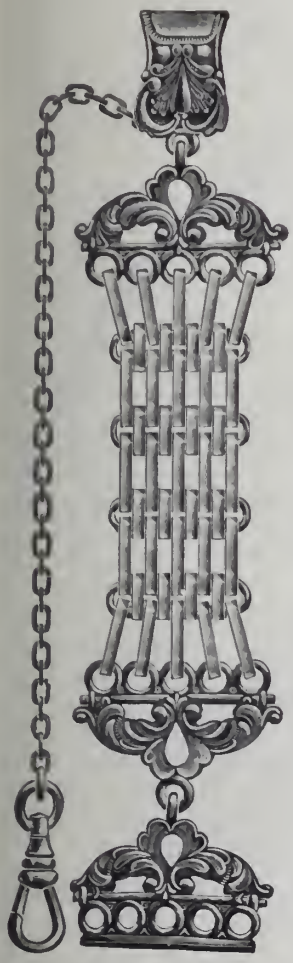
Price, Per Set, $5.50

OCTOPUS ENGRAVING BLOCK ATTACHMENT No. 85

Pat. May 11, 1909

Illustration is exact size of Attachment

In order to perfect an attachment that would fit any engraving block and, at the same time, *hold everything* that came within the spread of the engraving block jaws, long study was required to design the combination of gripping surfaces that are assembled in such a small space.



This has long been considered an impossibility, but the Octopus Attachment now stands to disprove this pessimistic assumption. Our claim of pre-eminence for the Octopus Attachment lies in its general construction and simplicity of operation. Its predominating features are *efficiency* and *economy* and *adaptability* to the wants of the engraver, who, for years, has been in need of an attachment that would relieve them of the encumbrance incurred by the use of the numerous pegs and other appliances, and, furthermore, admit the many articles of jewelry and silverware that have previously been found impossible to hold

The four adjustable pegs, as shown in the illustration, are inserted in the peg holes of the engraving block, and the guide rod retains the gripping jaws in perfect alignment to each other while in operation.

A partial list, showing articles that can be clamped and where holds this attachment, is sent with each tool—a thoroughly well made tool and finely nickel plated.

Price each $4.50.

Simmons Specialization

IS RESPONSIBLE FOR

SIMMONS SUPERIORITY

IN

GOLD FILLED CHAINS

Since the seventies of the past century we have made chains. Day after day and year after year we have specialized in this one branch of the jewelry industry.

With basic stock made under our own supervision—with a plant that is complete in every particular—and with a corps of skilled workmen that time alone can gather, it follows logically that we are in position to produce the best in chains.

And that we do. Simmons Superiority is recognized by the trade at large. Simmons Chains are conceded to be the best gold-filled chains on the market; they are known sellers and they are sanely guaranteed.

Consequently they deserve a place in all stores where high-grade gold-filled goods are handled.

1000 BAGS DAILY

It is estimated that there are fifty million women in the United States. Not over two million have mesh bags. We must supply the other forty-eight million with machine-made mesh bags.

The reason why machine-made Mesh Bags are better than hand-made Mesh Bags is

that we use **much harder wire** than used on hand-made bags, and machines harden it still more in working, making wire **stiff and strong,** no **rough joints to catch,** and wear the dress. Stronger and better than soldered mesh.

We also make the only **ABSOLUTELY SOLDERLESS FRAME EVER MADE,** other **so-called solderless** frames have joints or some parts soldered.

We are the **sole** manufacturers of machine-made mesh with **solderless** frames.

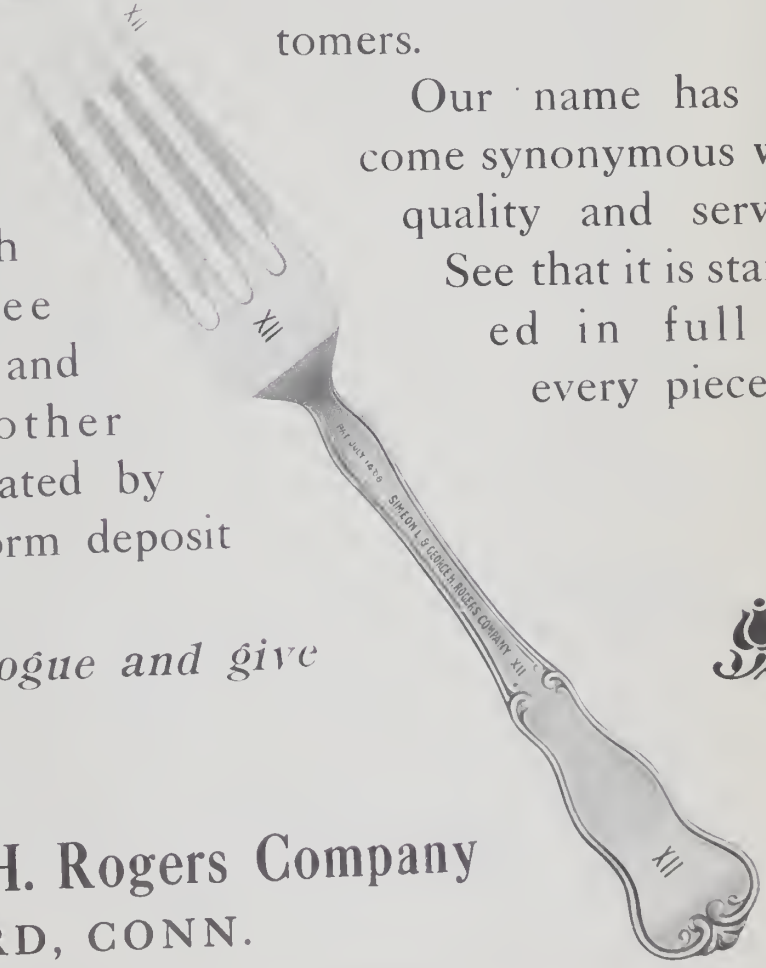
Retain and Increase Your Trade

with the easiest selling, best wearing and most beautiful silver plated flatware on the market—the SIMEON L. & GEORGE H. ROGERS COMPANY XII.



Goods bearing this trade-mark are guaranteed to carry 50 per cent. more silver than standard plate, which means a durability that makes satisfied customers.

Our name has become synonymous with quality and service. See that it is stamped in full on every piece.

Our Sectional Process

reinforces the parts most exposed to wear with a triple deposit of silver, which enables us to guarantee that our regular spoons and forks will outlast all other brands of silverware plated by the old method of a uniform deposit of silver.

Write for our catalogue and give us a trial order.

THE JEWELERS' CIRCULAR
WITH WHICH ARE CONSOLIDATED
THE HOROLOGICAL REVIEW
THE JEWELERS' WEEKLY THE JEWELERS REVIEW

VOL. LX. WEDNESDAY, APRIL 13, 1910. No. 11.

Beautiful Silver Service Presented to the United States Battleship "South Carolina."

THE beautiful silver service made for the United States battleship *South Carolina*, was to be formally presented, yesterday afternoon, as THE JEWELERS' CIRCULAR-WEEKLY went to press, at the Academy of Music in Charleston. The Daughters of the Revolution were to present to the ship

ONE OF THE ENTREE PLATES.

at the same time a large State flag. Governor Ansel, of that State, was scheduled to make the presentation speech, and Capt. Augustus Fechtler the speech of acceptance for the battleship.

This silver service, which is illustrated in this issue in detail, is a fine example of the silversmith's art and is the work of the Gorham Co., New York and Providence, which has made so many other services for boats of the navy. The large illustration of the salient piece is to be found on the front cover page, while an idea of the other pieces may be had from the group on this page, together with the other illustrations.

In designing the service the artist has chosen for his theme the severe and pure style of the 18th century, avoiding the earlier and more elaborate fashions. This style, the basis in France of the Louis XVI., and in England of the Georgian, parent of our own Colonial, permits of the plain monumental treatment, making its effect by purity of line and form rather than elaborateness of decoration. The severity of the theme has been relieved by a free decorative treatment of the sources of South Carolina's wealth as a State; her flowers, fruits and agricultural products, giving a service massive and dignified in form, enriched by elements characteristic of the State, but properly and artistically subordinated to the practical requirements of the pieces.

This treatment the artist believes to be exceptionally appropriate in view of the fact that it gave the first impulse for the development of our Colonial style, and no more worthy period could be chosen as inspiration for the beautiful design and the most perfect execution as demanded in this service. Throught, classsic simplicity of form, together with elegance and refinement of ornamentation, have been sought, making the service architecturally chaste in treatment. Features denoting the sources of South Carolina's wealth as a State and commemorating epochs in her history, together with portraits of some of her illustrious sons, have been incorporated in the decoration. The State and Navy seals occupy prominent positions, while associated with these throughout the service occur, as decorative features, various products of the State.

The decoration of the various pieces is by repoussé and flat chasing with but little engraving or etching, for the reason that the flat chasing, properly executed, is done for all time, while engraving or etching will in time wear smooth.

The punch bowl has a capacity of seven gallons. It is round, with handles representing two dolphins. The main decoration on the body of the bowl is magnolia. On the front appears a flat chasing of the bat-

THE TABLE CENTER.

tleship *South Carolina*, in commission, together with portrait medallions of Governor Rutledge and John C. Calhoun in relief. On the reverse is shown "Jasper Planting the Flag" and medallions of Col. Pierce M. Butler and Gen. Wade Hampton. The American and State flags are shown in enamel.

The plateau on which the bowl sets bears the inscription, "Presented to the Battleship *South Carolina* by the State of South Carolina": on the reverse side appears "Millions for defense, not a cent for tribute"—Pinckney. There are places for 24 cups, which

SOME OF THE SMALLER PIECES OF THE SILVER SERVICE PRESENTED TO THE BATTLESHIP "SOUTH CAROLINA."

FOR THE GROOM—BEST MAN—AND USHERS.

have dolphin handles, and also the State seal.

The ladle has a capacity of one-half pint. On the top of the handle is the national seal in enamel, surmounted by the eagle conventionally treated. The main decoration is the oak and sunflower. At the connection of the handle and bowl are two con-

PITCHER AND TRAY OF THE "SOUTH CAROLINA'S" SILVER SERVICE.

ventional dolphins. The panels are divided by rope.

The centerpiece is oval in form and classic in design. The eagle and prow of the ship are treated in a very happy manner. On the front is the State seal in enamel. The border is laurel and dolphins. The four portraits are Generals Marion, Pickens, Sumter and Col. William Washington. The principal decoration is pine. The seal of the State is used on either side, around which are branches of laurel. From the center rises a vase ornamented with shell, rope and laurel. The plateau is ornamented with fruits of the State.

One of the most impressive pieces is the pitcher, classic in form and decorated with conventional laurel, shell and dolphins. The State flag is shown on the front of the pitcher, surrounded by rope. The State and Navy seals appear on the tray. Live oak and laurel are used effectively as decorative features.

Laurel and dolphins in connection with the State and Navy seals are used in the decoration of the entree dishes. In the center of one is reproduced by flat chasing the scene showing "Marion's Dinner to the British Officers"; on the other, "Mrs. Mott offering arrows to destroy her home."

The vessels of the United States Navy whose presentation services have been illustrated and described in THE JEWELERS' CIRCULAR-WEEKLY and the dates of the issues in which these appeared from time to time are as follows:

The Diamonds of the Empress Taitu of Abyssinnia.

THE Empress Taitu of Abyssinia has sent her diamonds to Berlin for sale, where they now are in the possession of the jewelry house of J. H. Werner & Co., who have undertaken to sell them. Coptic Christians in Jerusalem sent the Empress Taitu these diamonds, but King Menelik refused to allow her to accept the gift.

Menelik ordered that the diamonds be

LARGE SALVER, SHOWING BATTLE OF KING'S MOUNTAIN.

returned to the givers, but the empress defied her husband's order and determined at least to see the gift. As, however, she knew that she could not sell the diamonds in Adis Abeda, she entrusted them to an Englishman, the owner of factories in Abyssinia, to take them to Europe and sell them.

THE NEWS FROM ENGLAND.

Confidence Felt in Colonial Markets—French Tariff on Sheffield Cutlery Causes Uneasiness—"Blue Bird" Jewelry in Great Demand and "Chantecler" Jewelry in Evidence—Sheffield Asks Protection Against Fraudulent Trade-Marks—Firm Fined for Falsely Describing Metal as "Britannia."

LONDON, April 2.—Now that Lent is past trade will resume its normal condition, or, as most hope, an abnormal state when compared with the like periods of the past few years. There is hope. Our exports and imports still show an upward tendency. The former, when compared with the same period of last year, are up £3,667,000, the bulk being manufactured goods. Imports show an increase of £690,000, so that statistics can give comfort.

Trade in London has only been fair, while Birmingham is not content with things as they are. "Jewelopolis" is not doing well with the sale of jewelry; it is small silverware and electroplate which are mainly responsible for the satisfaction displayed in some quarters. There is, however, a feeling of confidence in the Colonial markets, excepting Australia. South Africa is felt to be a certain buyer in the very near future, while India is also claiming keen attention. Canada is also looked to with confidence.

* * *

Sheffield retains much the same position as indicated in my last notes, but a more hopeful tone prevails, particularly since manufacturers have been placing orders for material rather freely. The high tariff which the French have placed upon Sheffield steel goods has caused a very uneasy feeling and complaints are made that local interests have been badly neglected by the British authorities. The tariff is more badly felt because the cutlery trade is not so good as it might be, and it is the export trade which has helped to keep hands going. Owing to the exceedingly fine weather the exodus to the seaside resorts was particularly great for Easter, and as a consequence the local jewelers and fancy goods people report a rather good time. If only we were certain that another general election was not imminent, trade would move more rapidly.

* * *

Blue Bird jewelry is all to the front in London and the provinces just now. The blue bird is the "Emblem of Happiness," and therefore makes an excellent gift for lover or friend. The delightful play by Maeterlinck, which has given rise to this kind of enameled jewelry, is still running. Chantecler jewelry also is in evidence, but much of this is not new. The craze has been a godsend to the jeweler who had a stock of well modeled but unsalable jeweled cocks, hens, pheasants and other members of the feathered kingdom, set with brilliants, etc., and enameled. Twenty-five years ago these models were all the craze, and those who had stuck to their old stocks now look like clearing them off at good prices.

* * *

The annual dinner of the British Watch and Clockmakers' Guild, which was held in the forepart of the month, was a very successful affair. The gathering was not particularly large, but it represented practically all that is the best in the horological industry. A note, which may make itself felt—or not—was sounded by Charles Baxter, the treasurer of the Watch and Clockmakers' Asylum, and a prominent worker in the London Wholesale Association. In effect, he said there were too many associations and suggested an amalgamation between the N. A. G. and the Guild. I am among those who do not think this feasible. The Guild, it must be remembered, is a combination of manufacturers, retailers and workpeople and devotes its energies particularly to the horological industry. It specializes, and there lies its measure of success; and then, again, it has looped up some of the older local societies which the N. A. G. could not get hold of. For some time, I think, we shall have to be satisfied with a series of societies in both England and Scotland. A working arrangement might be made between all societies at an annual conference, but amalgamation is not yet ripe.

* * *

The annual report of the Institute of Ophthalmic Opticians records a membership of 261. The institute membership is only open to those who have passed one or both of the examinations of the Worshipful Company of Spectacle Makers. Quite a large proportion of those holding diplomas are jewelers or watchmakers as well as opticians.

Sheffield manufacturers are hard hit over the fraudulent use of their trade-marks, particularly in the cutlery and E. P. line, and it is not surprising therefore that the local manufacturers and workpeople should feel keenly on the question. A very reasonable request was recently made to the Financial Secretary to the Treasury. It was in effect that when the customs authorities seized goods unlawfully bearing the name or trade-mark of any British manufacturer, dealer or trader they should furnish, to the person whose name or mark had been pirated, full information as to the origin, transit, destination and description of the goods. So far the customs officials have no authority to give such information, but the Financial Secretary gave his word that when the various interests had formulated their proposals he would be prepared to promote a bill in Parliament providing a regulation was found to be impracticable.

In this connection I might record that an important meeting of British manufacturers of all kinds met at the Hotel Metropole and agreed to form the Register of British Manufacturers in order to "check the prevalent practice of selling foreign goods as British and to promote the sale of British-made goods in preference to foreign articles." Among the proposals of the founders of the new "non-political" association is that a special mark should be adopted and placed upon the goods of members of the association.

Just as I am concluding my letter I hear that at Birmingham I. S. Greenberg & Co., Ltd., have been summoned and fined £5 and £10 10s. costs for giving a false description to certain teapots. The matter is very important, since the prosecution was at the instance of the Sheffield Master Silversmiths' Association and the defendant firm were charged with selling goods for Britannia metal which were quite otherwise. Certain teapots were bought, and as the result of an analysis by the Sheffield City Analyst it was shown that the bottom of the teapots consisted of 13.5 per cent. of antimony, 3.7 per cent. of tin and 82.8 per cent. of lead, while a ring under the lid had as much as 93.6 per cent. of lead. As a matter of fact, in Britannia metal, which is almost entirely composed of tin, 90 per cent. of the genuine article being of such metal as a rule, there is also a little antimony and copper and sometimes a little zinc. The market price of tin stands so far above lead that those who sell articles practically composed of lead have an enormous advantage over those selling bona-fide articles. It was argued for the defense that Messrs. Greenberg did not make the teapots but simply sold them, and that they knew nothing whatever about the composition of Britannia metal, but naturally the law refuses to know anything of ignorance, and if a person is satisfied to sell articles for what they are not he must take the risk.

The case is an exceedingly important one and shows the keenness of the Sheffield manufacturers to insure that goods bearing the Sheffield mark, or pretending to be in any way of the character or quality turned out by Sheffield, shall be quite up to the mark, and so this is a demonstration of the bona-fides of their contentions before the Financial Secretary, to which I refer above, that while they are ready to deal with fraudulent foreigners they are just as alive to the misdeeds of their own countrymen.

ST. GEORGE.

Death of Robert Gracie

LORAIN, O., April 6.—Robert Gracie, who died at Massillon early last Thursday morning, was for many years well known in the jewelry business in this section of Ohio. He was highly regarded for his technical knowledge as a watchmaker, being considered one of the most able men in this line in the State. He passed away at the State Asylum as a result of an illness which extended over several months.

Mr. Gracie was a native of Scotland and was about 45 years old. He came to this country when a youth of 17 and located in Cleveland, but a year later came to Loram and accepted a position as watchmaker with George A. Clark. After following his trade for a number of years, he started in business for himself in 1894 and continued alone quite successfully until he became incapacitated about six months ago and was taken to Massillon for treatment. Since that time the business has been controlled by his wife, who with six children survives. Mr Gracie was widely known in the community and the news of his death was a great shock to his many friends. The remains were brought from Massillon to this city Thursday night.

The Scientific or Synthetic Sapphire.

Some Facts as to Its Composition, Hardness, Specific Gravity and Other Properties, and How They Compare with Those of the Natural Gem—Points of Similarity and Difference Noted.

WHEN the announcement was made late last January from Paris to the effect that Professor Verneuil had finally succeeded in his efforts to make the so called scientific sapphire, there was considerable skepticism in the trade owing to the many similar announcements that had previously been made which were not borne out by the facts. It was not until the last month or so when these scientific sapphires were brought to this country and shown to the trade here that the gem merchants became fully convinced that a laboratory product had at last been put on the market which so closely resembled the blue corundum gem in its salient characteristics as to be properly termed scientific sapphire.

The laboratory stones have essentially the same specific gravity, about the same hardness and the same refractive and other optical properties of the corundum gem. As far as the composition is concerned they differ somewhat from the accepted composition of the sapphire, showing more alumina and less ferric oxide than the natural stone and show no silica; but, on the other hand, they contain titanic oxide in small amounts, an ingredient which Professor Verneuil believes exists in some sapphires, but which has never been recognized in appreciable quantities in any of the natural sapphires spoken of in the mineralogical text-books.

In effect it has been found that these artificial blue stones bear the same relation to the natural sapphires that the scientific rubies do to the red corundum crystals. They have the essential features of the natural stones with slight characteristics of their own, such as irregular enclosures or *macles* through which they can be distinguished by an ordinary expert who gives them a close examination.

THE JEWELERS' CIRCULAR-WEEKLY obtained a number of these scientific stones and had a number of tests made. Three stones showed a specific gravity of 4.03, 3.97 and 4.00, which is nearly that of the sapphire, which is given generally as 4.08. The stones tested for THE JEWELERS' CIRCULAR-WEEKLY showed a hardness slightly less than that of the sapphire, while other tests are said to have shown a hardness greater than the natural stone.

A chemical analysis made for this journal by Prof. Alfred Moses, of Columbia University, showed the synthetic stone to consist of: Alumina (Al_2O_3), 99.83 per cent.; silica (SiO_2), none; titanic oxide (TiO_2), 0.13 per cent.; ferric oxide (Fe_2O_3), but a trace. The composition of the sapphire, as given by Professor Bauer and generally accepted by mineralogists and gem experts, is: Alumina, 95.51 per cent.; iron oxide, 1.89 per cent., and silica, 0.80 per cent. The sapphire of India has been given as: Alumina, 97.51 per cent.; ferric oxide, 1.89, and silica, 0.80; while the Ceylon sapphire has been given as: Alumina, 99.33 to 99.26 per cent.; ferric oxide, 0.92 to 0.97 per cent. According to Professor Moses, there is one analysis of a blue corundum gem which contains titanium, but this is said to be a stone of grayish and red color, which contains much less alumina and more silica and ferric oxide than the usual corundum crystal, with other ingredients as well.

Reporting on the crystalline and optical properties of this new laboratory product Professor Moses shows that essentially it is crystal; that it is pleochroic; that it is doubly refracting and shows about the same refractive index as the natural sapphire. He reports the hardness slightly greater than the sapphire and the specific gravity to run from 3.9 to 4.1 in the stones he examined.

A phenomena not observed in the natural sapphire, spoken of by Professor Moses, was the frequent presence of approximately parallel rifts or breaks; but, as before stated, the essential distinguishing characteristic which will be noticed by the trade will be the round or regular enclosures, while those of the natural stones are of an irregular form. This same peculiarity exists in the scientific ruby, and attention to it was called many years ago by M. Chaumet, of Paris.

In summing up it may be said that while differences in appearance and composition may be found that distinguish this new chemical gem from the natural sapphire, it bears sufficient of the properties of the gem to be properly termed a scientific sapphire, it being essentially a crystal with optical and other characteristics close to those of the corundum gem.

A word of caution is necessary to the trade in regard to the use and acceptance of the term "scientific sapphire," as this can in no way be applied to the products heretofore on the market and still being put on the market from many sources; these resemble the sapphire only in color and have neither the hardness or dichroism of the sapphire and in many cases have neither the specific gravity or the crystalline properties of this gem. As far as we are able to determine, the only scientific sapphire, properly so called, that is on the market is that produced under the supervision of Professor Verneuil, who, it may be mentioned, was the discoverer of the process by which the scientific rubies are at present made. These sapphire-like products of Professor Verneuil are sold only under the name of "Hope" sapphires, and are controlled by one firm.

Members of Congress who failed to keep engagements because of faulty public clocks in Washington have found a champion in Mr. Coudrey, of Missouri. He introduced in the House, Wednesday, a bill imposing a fine of $25 upon any person owning such a clock that is not kept in running or is found to be more than two minutes off the right time. Whether the bill would apply to the time-honored clock signs over jewelers' shops, which usually point to 18 minutes past eight, Mr. Coudrey did not make clear.

"Pennyweight" Thief Works Substitution Game with Marked Success in Washington, D. C.

WASHINGTON, D. C., April 6.—E. G. Hines to-day met with the loss of a solitaire diamond ring valued at $350 through the cleverness of a "pennyweight" thief who worked the substitution game

Yesterday two ladies entered the store and requested that they be shown some diamond rings, and after looking over a large assortment decided on one in particular and left the store with the remark that the husband of one of the ladies in question would complete the purchase that afternoon. They gave a description of a man which was almost opposite that of the real thief. To-day a man whose description fitted that of the man who worked the Milwaukee jewelers on March 2, an account of which appeared in THE JEWELERS' CIRCULAR-WEEKLY, called and also requested to be shown some diamonds. A tray was produced, and the man, after looking over the line quite thoroughly, left the store with the remark that "He guessed he would look a little further." A short time afterward, on looking over the tray, which contained nothing but solitaires, the clerk was surprised to find a two-stone ring valued in the neighborhood of $50.

It seems that the women in looking over the tray yesterday paid particular attention to the cost mark and the selling price; also the size of the tag and the string, etc., and, giving the information to the man, a duplicate tag was made out and fastened to the other ring, this latter being substituted for the ring containing the larger stone, and the clerk seeing all the tags in view and every slot in the tray filled had no suspicion of the theft.

The store of Chas. A. Goldsmith, on F St., N. W., was worked in the same manner as that of Mr. Hines, and the discovery was made that a ring valued at $400 had been taken and a smaller stone, worth possibly one-tenth that amount, left in its place. Exactly the same proceedings took place.

The swindler is described as follows: About 32 years old, florid complexion, light hair, wears glasses, weighs about 145 pounds; is well dressed, well manicured and of pleasing manners. He wore a dark blue suit and black derby hat and had a two-carat diamond ring. When talking he disclosed a gold-crowned tooth.

Thief Who Robbed Window of Lancaster (Pa.) Jeweler Is Quickly Captured and Confesses.

LANCASTER, Pa., April 8.—Early Wednesday morning the show window of John Kieffer's jewelry store, 504 Manor St., was smashed and about $50 worth of small articles stolen. Wednesday afternoon two young men offered some of the articles for sale to John B. Roth, Jr., manufacturing jeweler, who promptly put the police on their track and they were later arrested.

The parties who offered the jewels for sale described themselves as Preston and Lytle Moffett, and when searched at police headquarters most of the stolen property was found on Preston Moffett. He confessed, but exonerated his brother, who was released. He was committed for trial.

Death of Pierre F. Courvoisier.

Pierre F. Courvoisier, a well known and highly respected traveling salesman, for many years in the employ of Henry Ginnel & Co., 54 Maiden Lane, died Tuesday of last week at his home, 720 Malone St., West Hoboken, N. J. The funeral was held from his late residence, last Thursday afternoon, and interment was in the Grove Church Cemetery. Mr. Courvoisier had been in poor health for about a year and since the first of January has been unable to be at work. His death was caused

THE LATE PIERRE F. COURVOISIER.

by a complication of diseases. He was well known both in this city and throughout the Middle West, where he traveled for many years.

Mr. Courvoisier was born Oct. 30, 1852, in New York. His parents came from Locle, Switzerland, and settled on Dey St., in New York, and afterward moved to New Jersey. As a boy Mr. Courvoisier first became an employe of the firm of Henry Ginnel & Co. about 45 years ago, when that firm had its offices at 44 Maiden Lane. He remained with them for 15 years and then for a time was employed by Heeren Bros. & Co., Pittsburg, and later by J. T. Scott & Co., until the latter company went out of business about 10 years ago, at which time he again entered the employ of the Ginnel firm.

The deceased made many friends during his years of traveling, who learned with deep regret of his death. He was a member of the Royal Arcanum and of the Commercial Travelers' Association. He is survived by a sister, his wife having died some years ago.

Retail Jewelers of Lima, O., Organize a Local Club and Elect Officers.

LIMA, O., April 6.—The local jewelers of this city have become organized, a retail jewelers' club for the promotion of social welfare and good fellowship having been formed Friday night. The sole idea of the new organization is to bring the members into closer touch with one another and to make them realize the identity of their interests. At the meeting F. D. Ausman, president of the State association, was present and delivered an interesting address, which was received with enthusiasm.

The officers of the local club are: M. U. Basinger, chairman, and J. W. Puetz, secretary, while the membership includes Hughes & Son, M. U. Basinger, J. W. Puetz, R. D. McDonald, Schneider & Michael, J. P. Hall, Chas. Tucker, Clark Ford, Harry Thew, Clarence Reel and Joseph Daller.

Jewelers and Opticians of Utica, N. Y., Celebrate Close of Bowling Tournament with Enjoyable Banquet.

UTICA, N. Y., April 6.—The bowling tournament which has been in progress this Winter between the jewelers and the opticians, a fine victory for the jewelers, was brought to a close with a banquet at the Yates Hotel last evening. There were about 30 present.

President Charles T. Evans, also president of the New York State Jewelers' Association, was out of town and J. R. Burtiss, vice-president, served in his place. A fine dinner was served and then Mr. Burtiss introduced E. C. Boucher, of O'Donnell & Boucher, as toastmaster. A. M. Kenney responded for "The Opticians" and W. A. O'Donnell spoke for "The New York State Jewelers' Association." W. B. Wilcox spoke for the local Jewelers' Club and J. C. Whittlesey for "The Opticians' Employes." There were informal responses from others in the company.

The bowling trophy, which was won by the jewelers, was presented to Vice-President Burtiss. There is a silver bowling ball, resting on three pins on an ebony base—a very tasty trophy.

Those in charge of the tournament and the dinner last evening were Mr. Raehm, E. C. Boucher and J. R. Burtiss for the jewelers and William Pritchard, Charles Bartel and Clark Jones for the Optical Club.

Bankruptcy Proceedings Against Samuel Graubart Co., Schenectady, N. Y., Settled and Dismissed.

UTICA, N. Y., April 7.—The proceedings in bankruptcy which were begun Feb. 4 against the Samuel Graubart Co., of Schenectady, have been discontinued and the adjudication in bankruptcy against the concern has been revoked by Judge Ray, of the United States District Court of this city. The company is a stock concern and the directors are Samuel and Hulda Graubart and E. Burt Van Vorst. All the claims against the company were bought up by George W. Donnon in the interests of the company and it will continue in business.

A creditors' petition in bankruptcy was filed against the Graubart Co. by three New York merchandise creditors and it was later stated that the company would contest the bankruptcy proceedings, but it failed to file an answer in opposition and an adjudication was had. Between the adjudication and the time for the calling of the creditors' meeting steps to do away with the bankruptcy proceedings were instituted, all creditors accepting the settlement offered by Dr. Donnon, to whom were assigned all the claims against the bankrupt corporation.

The receiver consented to a dismissal of the bankruptcy proceedings, the company paying all the costs.

Death of Joseph C. Watts.

ANN ARBOR, Mich., April 6.—A sudden stroke of apoplexy caused the death, Saturday morning, of Joseph H. Watts, a pioneer business man of this city and one of the oldest and best known jewelers in this section of Michigan. The esteem and respect in which he was held was attested by the large number of friends who attended the funeral services yesterday at his residence. The funeral was in charge of the Knights Templar, while the services were conducted by Rev. James Mills Gelston, of Valparaiso.

Mr. Watts had been in his usual health all Winter and had looked forward to celebrating the 80th anniversary of his birth on Monday last, so that the news of his death came as a shock to all who knew him.

Deceased was an Englishman by birth but an American in every other respect, having lived in this country since his childhood. His parents came to America from Gresham, England, and settled in Ypsilanti, where he lived until he was 16 years old. Then, determining to strike out for himself, he came to Ann Arbor in 1846 and started to learn the jewelry business. He worked hard and diligently and saved his money until he was able to embark in business for himself in 1851. He was a member of the firm of J. C. Watts & Bro. for a number of years, but for the greater part of his career had been alone. He stayed in Ann Arbor until 1875, when he went to Saginaw temporarily, but later decided to stop in that city and remained there for 19 years. During all that time, however, he kept his relations with his friends and customers in Ann Arbor and kept his home here, coming to Ann Arbor regularly to vote. About 1894 he moved from East Saginaw, to this city, and for the last 16 years successfully carried on a jewelry and pawnbroking business, of recent years having had his headquarters at his home at 331 East Liberty St.

During the 59 years with which Mr. Watts has been connected with the jewelry trade he bore an honorable reputation, and his ability, enterprise and integrity earned for him the respect of all with whom he dealt. He was a public-spirited citizen to whom the interests of Ann Arbor were always dear.

Mr. Watts was married in 1881 to Miss Emilie E. Babcock, of Buffalo, and to them were born three daughters and two sons. Mrs. Watts and two daughters preceded him to the grave, his only survivors now being Henry Clarence Watts, an optician of Syracuse, N. Y.; Harry Howard Watts, optician of Kansas City, and Miss Caroline Watts, of Ann Arbor.

A fire was discovered in the show window of the store of the Lewis & Van Sickle Co., 619 Walnut St., Des Moines, Ia., one Sunday morning, recently, but was extinguished before serious damage was done. Passersby noticed the smoke filling the window and an alarm was given. The flames were extinguished just in time to prevent a serious conflagration.

THE SYNTHETIC SAPPHIRE

thanks to its high merits, acknowledged by scientists the world over and given the widest possible publicity by the press, at once takes its place among the class of gems most popularly known and appreciated

The real Synthetic Sapphire is produced exclusively by us and is the only sapphire that is the exact counterpart of the natural.

None but those sold under the name of

"HOPE SAPPHIRES"

Registered United States Patent Office

are the genuine Synthetics.

To distinguish an ordinary Scientific Sapphire from the natural or our Hope Sapphire, apply the Hydrofluoric acid test. This acid reacts on glass, but has no effect on either the natural or our Hope Sapphire.

Both Jewelry Stores of Middletown, Pa., Destroyed by Fire, Which Does $300,000 Damage.

HARRISBURG, Pa., April 11.—Middletown, this county, which has experienced a series of unfortunate events during the past dozen years, received another severe blow, Saturday afternoon, April 9, when a conflagration entirely wiped out two solid blocks in the main business section, inflicting a property loss of about $300,000, not to mention the heavy additional damage through loss of business during the rebuilding period. Among the business places destroyed were the town's two jewelry stores, those of Walter Fuerneisen, 18 S. Union St., and Elias H. Klahr, 25 S. Union St.

In all 27 business places and 26 dwellings were either totally destroyed or so seriously damaged that they will have to be rebuilt. The high wind that prevailed at the time

SECTION OF THE BURNED DISTRICT OF MIDDLETOWN, PA., AFTER THE FIRE.

the fire was discovered made the efforts of the firemen of Middletown, this city, Steelton, Columbia and Lancaster doubly hard, burning embers being swept high in the air to distant points, where the work of destruction was again taken up. Those interested in the main conflagration in the business section state that the heat from the flames was almost unendurable a hundred yards away.

The fire originated in the old Farmers' Market House at Catharine and Emaus Sts. It was about 2.15 P. M. when the first alarm was sounded, and so rapid was the fire fiend that in half an hour the entire two blocks were in flames.

Desperate efforts were made to stop the flames at E. H. Klahr's jewelry store, Mr. Klahr himself working a small garden hose at the rear of his building until driven away by the onrush of the fiery blasts. In addition to the high wind the efforts of the firemen were impeded by the poor water pressure.

Mr. Klahr had sufficient time to place his repair watches, diamonds, his best-grade watches and more valuable jewelry in his large safe, which is now lying on its side among the debris in the cellar of his building, the side walls of which are partially standing. He believes that this stock will be found in fair shape after the safe can be lifted from its present position and opened. In addition he placed nearly all his silverware in a place of safety.

Mr. Klahr estimates his loss on the building at about $8,000 and on stock and fixtures at about the same amount. He carries a very small amount of insurance, and will lose heavily through the fire. However, he has rented a house on N. Union St., where he will reside, devoting the front portion of the first floor to watchmaking and jewelry repairing, until he is ready to remove to the new building he purposes erecting on the site of the burned structure.

Across the street from Mr. Klahr's store was the jewelry store of Walter Fuerneisen, of which to-day not a timber was standing. As in the case of Mr. Klahr, Mr. Fuerneisen had an opportunity to place his most valuable goods in his safe. Both safes are being guarded night and day to protect their valuable contents.

Mr. Fuerneisen was seen by THE JEWELERS' CIRCULAR-WEEKLY correspondent as he was leaving with his wife for the home of relatives in York to remain for a day or two. He placed his loss on buildings at $7,500 and on stock at $6,000. His total insurance is about $8,000. Mr. Fuerneisen did not own the building in which his store was located but lost two double houses on Astor and Union Sts. and three single houses on Emaus St. by the fire. He expects to start the work of building a new store property just as soon as the debris has been cleared away and the insurance adjusted.

There was no cellar under the Fuerneisen store and the contents of the safe are probably in better condition than the goods in jeweler Klahr's safe.

Both jewelers have been in business in Middletown a number of years, Mr. Klahr removing there from Myerstown in 1885 and Mr. Fuerneisen coming to Middletown from Manheim, Lancaster County, about 13 years ago. Both carried nicely selected stocks and enjoyed a fine run of trade. Neither is crushed by this latest reverse of fortune, and both propose to be doing business at their old locations in time to open the Fall trade with new stocks, new fixtures and new buildings.

Trial of Patrick J. Cummings on Charges of Improperly Using the Mails.

BOSTON, Mass., April 12.—Patrick J. Cummings, of Attleboro, and Howard Dill, of Philadelphia, indicted on the charge of using the mails in a jewelry vending scheme with intent to defraud, were placed on trial April 6 in the United States District Court in this city. Both pleaded not guilty.

The case has been awaiting trial for several months. There is a third party, also under indictment, whom the Government officers have been unable to locate. Cummings and Dill have been out on bail since the case came before the grand jury on charges preferred by Robert A. Gray, of Greensboro, N. C., who claims to have answered advertisements inserted in newspapers by the defendants, which resulted in his becoming a party to a selling agency contract which he alleges proved fraudulent.

Gray testified at the preliminary hearing that he came on to Attleboro and met Cummings and a man named Holoway, the latter, it is understood, being the third party indicted and now missing, with whom he made the contract referred to, on June 1, 1909, paying a deposit of $200. He further testified that the articles furnished him to sell were of such a quality as to be unsalable at the prices set upon them.

Cummings is said to have offered agents the inducement of a salary of $1,800 a year and expenses, but to have paid Gray nothing upon demand.

The case is still on trial, the Government being represented by the assistant district attorney, William H. Lewis, widely known as a former star Harvard football played. Counsel for Cummings is John P. Leahy, of Boston.

Witnesses have come from as distant points as Tacoma, Wash., and Tampa, Fla., to testify against the defendants. The postal authorities claim that about 40 persons were induced to go into the scheme.

Swindling Optician Sentenced at Boston, Mass., on Three Charges of Larceny.

BOSTON, Mass., April 7.—Meyer Cohen, arraigned on the charge of larceny in three counts, was found guilty in the municipal court in the Charlestown district in this city to-day and sentenced to serve 18 months in the house of correction.

Cohen, who is married and lives in the adjoining town of Revere, according to the testimony submitted at the trial, pretended to be an expert optician connected with the Boston city hospital, and sold glasses of ordinary quality at high prices, claiming extraordinary virtue for them in restoring the eyesight. His dupes in two of the three instances which figured in the case to-day were women upward of 80 years old.

It was charged that to one of these women he sold on Sept. 30 of last year a pair of eyeglasses, representing them to be charged with electricity, and capable of restoring her sight to normal in six months. Her sight did not improve and the glasses were taken to an expert optician who pronounced them practically worthless.

To another woman he sold a pair of glasses which he is said to have claimed were worth $7. As she had but $2 cash to offer he said he would accept that and a couple of rugs which she had [illegible].

The third count alleged larceny of a gold ring and a pair of glasses on April 9 from a woman in the Charlestown district.

Cohen was identified as having arrested on the same charge in this city [illegible] year. He is said to have stated that he was a "Dr. Bernstein" of the hospital staff, going through the farce of examination of the eyes, but not furnishing glasses of the value for which he charged.

Death of C. C. Marsh.

PITTSBURG, Pa., April 9.—C. C. Marsh, senior member of the Marsh, Brown, Mather Co., who had been in poor health for over two years, died, last Tuesday, at the home of his sister, Mrs. A. B. Williams, Mt. Vernon, O., of locomotor ataxia. Recently Mr. Marsh had shown signs of improvement, and it was thought that he might get better, but his relatives and business associates knew that he would never be well. On account of the state of his health he was compelled to retire from active business life about two years ago.

Mr. Marsh was born Aug. 11, 1860, at

THE LATE C. C. MARSH.

Bridgeport, O. He learned the jeweler's trade with his brother, L. N. Marsh, of Bellaire, and was with him a number of years. He first went into business for himself at Findlay, O., in the firm of Marshall & Marsh, but retired some time later; he then went to Chicago, where for two years he had charge of the watch department of one of the largest concerns in Chicago. In the meantime his brother, L. N. Marsh, had opened a store at Sistersville, W. Va., and Mr. Marsh bought him out, but later resold the business to him.

From Sistersville Mr. Marsh went to Cincinnati, and while there formed a partnership with Cliff Miller, the firm name being known as Miller & Marsh. Some time later the firm was reorganized as the Miller Jewelry Co. After the formation of the company Mr. Marsh sold his stock to Mr. Miller and came to Pittsburg, where he formed a partnership with James R. Brown, opening up a store in the Bijou building in 1901. Later it was reorganized and incorporated as the Marsh, Brown, Mather Co., the officers of which have been: James R. Brown, president; W. Warren Mather, vice-president; C. C. Marsh, treasurer, and W. O. Harrison, secretary. Since Mr. Marsh's retirement from the activities of the company Mr. Harrison has been holding the position of secretary and treasurer.

Mr. Marsh is survived only by a son 15 years old, his wife having died about five years ago. The son is at the home of Mr. Marsh's sister in Mt. Vernon.

As Mr. Marsh's wife and his parents are buried in a cemetery at Bellaire, Mr. Marsh expressed a desire to be buried there, and the remains were taken to Bellaire, last Thursday, for interment, following the simple but impressive funeral services at Mt. Vernon.

The Marsh, Brown, Mather Co. will be continued just as it has been, but what disposition will be made of the deceased's interest in the business has not been made public. Mr. Marsh had been kind and cheerful during his long illness, and his loss is keenly felt by his friends and associates in the business.

First Beefsteak Dinner of the 14-Karat Club of New York Proves a Pronounced Success.

Saturday night in the "garret" at Reisenweber's, Columbus Circle, the 14-Karat Club of New York held its first beefsteak dinner, and to say that the affair was a success only half tells the story of an evening of genuine enjoyment. Although there were not as many members of the club on hand as at some of the other social events, there was no lack of enthusiasm and good fellowship. The "beefsteak" was all that could be desired, and the club is to be congratulated on the wholesome program of entertainment, which did not contain a single feature which could be objected to by the most exacting.

The dinner was scheduled to begin at 6.30 P. M., but it was nearly an hour later before the young men had finished the preliminary chats that always proceed an affair of the kind. The "garret," as it is called, was an ideal place for the gathering. From the frowning rafters hung a motley collection of antiquated trash such as is found in the garret of a typical farmhouse. The only suggestion of the modern New York dining place was the white-garbed chef and the silent waiters, who were busy with their duties. The chef presided at a large open grate at one side of the room.

Beer casks made into cumbersome seats were arranged in a circle, before which were small, rough-hewn tables. The president and other officers were seated at the far end of the room, and the other members and guests of the club to the number of about 40 found their places where it best suited them. Everybody donned a big white apron, and the dinner was then quickly served.

Oysters on the half shell were followed by round after round of appetizing steak served on bits of bread, with a generous supply of amber liquid served in big mugs. Celery, chops and finally coffee and cigars finished the "feed."

Following the dinner President Anderson addressed the members and guests of the club in pleasing style. He spoke of the success attained thus far by the 14-Karat Club and the anxiety felt over the outcome of the first beefsteak dinner, and in conclusion thanked those in charge of the affair for their earnest effort in making the evening one long to be remembered.

He then called upon ex-President James Loeb, who spoke for a short time in his own particularly pleasing style. He was followed by other officers of the club, and President Anderson then called upon Percy Turner, son of the captain of the *Mauretania*, who gave a clever imitation of a Scotch bagpipe. Mr. Turner was the guest of President Anderson.

The professional talent then took charge of the evening's entertainment and provided song and merriment for some time. The singing of the Austin quartette and the work of the monologue artists met with equal approval. By special request Percy Turner recited a selection from Rudyard Kipling's works, which was unusually well rendered and was perhaps the most enjoyable feature of the entertainment.

The gathering broke up about 11 P. M., and everybody there joined in pronouncing the dinner one of the best ever given by the club.

Among those present were Frank Schaller, Sam Lauterbach, Wm. S. Honigbaum, George Korper, Jos. W. Frankel, Albert Rutaup, Albert Williams, Otto P. Osmers, P. W. Turner, Chas. H. Miller, L. Tilton, M. Konijn, Walter Fera, Jack Gleason, Tex Richard, F. Barth, Paul Levi, Max Moser, Joe Krause, Howard Whyte, Edwin P. Loebl, Wm. M. Anderson, Jr., Bernard Jaffe, W. Herman Rose Frank Moller, Harry Cutting, Morris Astor, James E. Loeb, Charles S. Fieldsteel, E. B. Bingham, H. S. Osterweil, Norbert Cahn, George Semple and A. M. Clark.

Christopher Treadway, Kansas City, Mo., Files a Voluntary Petition in Bankruptcy.

KANSAS CITY, Mo., April 6.—Christopher Treadway, doing business on Summit St., filed a voluntary petition in bankruptcy in the United States District Court, April 4. The liabilities are about $2,505.

Among the creditors are: C. B. Norton Jewelry Co., $777; Myer Jewelry Co., $90; D. B. Ward & Co., $90; Heintz Bros., $366; Charles R. Treadway (promissory note for borrowed money), $150; Will C. Root, (promissory note for borrowed money), $200.

The assets, which amount to $1,690, include an insurance policy for $1,000. Property worth $345 is claimed as exempt.

Of the indebtedness the claim of Heintz Bros., Buffalo, for $366 has been converted into a judgment.

The insurance policy for $1,000 had been taken out but a short time, a note listed by D. Boone for $35.42 being for the first premium. The policy, therefore, has no cash value.

A meeting of the creditors will soon be held in the office of Isaac P. Ryland, referee in bankruptcy, to whom the petition has been referred.

New York Police Recover Greater Part of Watch Movements Recently Stolen—Four Men Under Arrest.

Private detectives and Central Office men who have been trying for the last three weeks to locate over 2,000 Waltham watch movements, valued at about $8,000, which were stolen on March 16 from a truck while in transit from the New York quarters of the Waltham Watch Co. to the Cunard Steamship Co.'s pier, were successful last Thursday in apprehending four men who are alleged to have been connected with the disappearance of the watch movements, and succeeded in recovering 1,371 movements out of a total of 2,067. They are hoping to get the rest in a short time. The watch movements were inclosed in three packages containing 1,310 movements and in two packages containing 727 movements, respectively.

The truck, which belonged to the Austin & Baldwin Co., 21 Pearl St., disappeared at 8:30 o'clock in the morning while the driver was away, and was found abandoned at 16th St. and Avenue B that same night. A quantity of fishing tackle and dental supplies were also on the truck at the time. The first trace of the missing loot was found March 31, when Detectives Werzensky and Miller arrested a junk dealer to whom had been sold some of the fishing articles. They failed to find any other of the missing articles in his shop, and it was only recently that through the aid of a detective agency and stool pigeons information reached them that the goods were stored in the cellar of a tenement at 310 E. 56th St. The housekeeper told the detectives that she had rented the cellar to three men, who said they were going to use it as a clubroom. They had brought in several large boxes which she supposed contained part of the furniture for the clubroom.

The detectives decided that the club was worth investigating, and for two days watched the premises. Last Thursday afternoon an express wagon with three men in it drove up. One man stayed with the wagon and the other two went into the cellar, for which they had a key. While one detective watched the men in the wagon the other three went into the cellar, where thy found the two men struggling with a large packing case.

When arrested the men gave the names of Fred Kuntz, William Taylor and John Reilly. They were locked up on a charge of grand larceny. The two patrol wagons were loaded with plunder and taken to police headquarters. Another prisoner, who gave the name of Harry Levine, was arrested by Detective Flood, and when taken had in his possession, so the police say, a number of stolen watch movements.

The head of the detective agency which has been looking for the watch movements for the last three weeks, found a man to whom Levine had offered to sell a number of watch movements, and got him to help lure Levine into the trap. The stolen watch movements were identified later.

The prisoners were held for arraignment Saturday morning in the Tombs Police Court, at which time the case was adjourned until to-morrow, the prisoners being held in $2,000 bail.

J. A. Edan, manager of the claim department of the Insurance Co. of North America, with whom the watches were insured, said that no suspicions were attached to the truck driver in any way. The watch movements came to New York from the Boston office and were started on their way to Europe. A list of the stolen movements was published in THE JEWELERS' CIRCULAR-WEEKLY in the issue of March 30.

New Members Elected and Rewards Paid by the Jewelers Security Alliance.

The regular monthly meeting of the executive committee of the Jewelers Security Alliance was held Friday, the following members being present: Chairman Butts, President Sloan, Vice-Presidents Wood and Champenois, Treasurer Karsch, Secretary Noyes and Messrs. Abbott, Alford, Bowden, Brown and Stern.

The following new members were admitted:

American Jewelry & Loan Co., Terre Haute, Ind.; Louis Amundsen, Marinette, Wis.; A. W. Biber, Spartanburg, S. C.; Buoy & Davedeit, Springfield, Ill.; Fidelity Jewelry Co. and Joseph N. Kern, Terre Haute, Ind.; Ostermeier & Trunk, Springfield, Ill.; William Paul, Beecher, Ill.; Sturgell Jewelry Co., Paris, Ill.; Watts Jewelry Co., Eugene, Ore.; William Coleman, Deer Lodge, Mont.; A. Swart, Bay City, Mich.; J. & C. N. Thomas, Savannah, Ga.; A. E. Richmond, Seymour, Texas; E. L. Guthman, Youngstown, O.; W. W. Appel & Son, Lancaster, Pa.; H. F. Steck, Owosso, Mich.; F. G. Pennington, Wymore, Nebr.; Tappin & Gardner, Earlington, Ky.; G. W. Hobson, Washington, Ia.; Welch, Bonebrake W. & J. Co., Hutchinson, Kans.; J. M. Samuels, Los Angeles, Cal.; W. W. C. Geary Co., S. Bethlehem, Pa.; J. H. Donner, Aurora, Nebr.

The following "rewards" were paid:

Reward No. 103.—To C. G. Hutchinson and Thos. Coursey, Geneva, N. Y., for the arrest and conviction of Henry Lloyd, who smashed the window in the jewelry store of L. H. Barth, Oct. 16, 1909, and grabbed a tray of watches with which he ran down the street. Mr. Hutchinson, who was a clerk in the store, gave chase and captured the man with the assistance of Mr. Coursey, brought him back to the store where he was searched and the watches recovered. At the trial Lloyd was identified as an old-time crook with several previous convictions against him and, on his conviction, was sentenced to 10 years in the Auburn State prison, which is practically a life sentence, he being 71 years of age.

Reward No. 104.—To A. L. Rogers and Chief of Police Frank McMahon, of Little Rock, Ark., for the arrest and conviction of Edward Murphy, who broke in the show window in the jewelry store of Charles S. Stifft, Dec. 18, 1909, and stole miscellaneous jewelry of the value of about $150. A part of the stolen property was recovered from a woman who accompanied the thief when he was arrested at the railroad station where he was about to take a train. On conviction he was sentenced to three years in the penitentiary.

Reward No. 105.—To Harry McCracken and Cornelius Miller, Newark Valley, N. Y., for the arrest and conviction of Ernest L. Fairbanks, who broke into the store of John S. Ayres, Dec. 24, 1908, and stole miscellaneous jewelry of the value of about $100. McCracken and Miller, who were private citizens, interested themselves in the case on account of the reward offer, traced the thief to Binghamton, and, with the aid of the police, arrested him and recovered all of the property from a woman to whom it had been sold. There being a warrant out for the thief for a previous burglary, he was first sent to Elmira Reformatory and the "fence" received a sentence of two years at the Auburn State prison. On Fairbanks' release from the reformatory he was tried for the burglary at Mr. Ayre's store, and, on conviction, was sentenced to one year at hard labor at the Auburn State prison under a plea of guilty.

Reward No. 106. To Chief of Police William McCartney, of El Reno, Okla., for the arrest and conviction of James Billings, who smashed the window in the store of S. E. Brady, March 18, and stole watches and jewelry of the value of about $100. Notices were sent out describing the property and the thief was caught in Oklahoma City in the attempt to dispose of some of the stolen goods, and, on conviction, was sentenced to two years in the penitentiary at McAlester within 36 hours after the crime was committed.

Reward No. 107.—To Chief of Police John Stork, Medina, N. Y., for the arrest and conviction of Bolslow Czarney, who broke into the store of Charles F. Hurd, Sept. 18, 1909, by cutting out a panel in the back door, and stole about $400 or $500 worth of silverware and jewelry. The thief was caught in the act of highway robbery, in connection with two companions, through his revolver missing fire, and a part of the stolen property was found in his possession, also the "jimmy" which was used in forcing the door. On conviction he was sentenced to an indeterminate sentence in the Auburn prison.

Reward No. 108.—To Officer John J. Sheehy, Chicago, for the arrest and conviction of Harry Covington, a negro burglar, who broke the show window in the store of Lewy Bros. with a brick wrapped in paper, and stole two trays of diamonds valued at about $3,000. A notice of the reward offer, with an illustration of the shield having been placed in all the police stations in the city, the police interested themselves in the case and investigated pawnshops in which they recovered a part of the stolen property and arrested Covington, who was found guilty and given an indeterminate sentence at Joliet.

Reward No. 109.—To Louis Nebrich, Buffalo, N. Y., and George Kuehn, Cleveland, O., for the arrest and conviction of Arthur Hill and Frank Jones, who smashed the show window in the store of Frisch Bros., Oct. 13, and stole a tray containing 36 diamond rings valued at about $2,000. Kuehn, while riding in a street car, overheard Hill discussing the robbery with a "pal," and notified a policeman, who succeeded in arresting Hill after a fight in which he was obliged to shoot him. A part of the stolen property was found in his possession and he was identified by Nebrich. While in the hospital in Cleveland, Hill attempted to escape, having been furnished with revolvers and clothing by a friend, and after removal to Buffalo saws were found in his possession with which he intended to cut his way out of jail. Jones was arrested through having sold six of the rings, and, on conviction, was sentenced to four years and three months, while Hill received a sentence of one year and six months at the Auburn prison. About $800 worth of the property was recovered and returned to Frisch Bros.

Clayton Emrick, Monroe, Wis., has sold his business to Charles Kohli, Monroe, who is connected with the Clifford Jewelry Co., Platteville, Wis., at the present time. The new owner will conduct the business under the firm name of the Kohli Jewelry Co. Mr. Kohli is the son of Robert Kohli, Monroe, and has had considerable experience in the jewelry business. Mr. Emrick has not as yet announced his business plans for the future.

Gems and Precious Stones Cloth, Postpaid, $1.00. Published by The Jewelers' Circular Publishing Co., 11 John Street, New York.

Prizes Awarded at the First Annual Banquet of the Newark Jewelers' Bowling League.

The first annual banquet of the Newark Jewelers' Bowling League, which was held at Hotel Broad, Friday evening, was a great success and was attended by nearly 200 enthusiasts. An excellent menu was served and was followed by a number of speeches. Members of the firms represented by the contesting teams were the guests of the evening.

Victor Hess was toastmaster, and the speaker was George R. Howe, of Carter, Howe & Co. Others who spoke were Herbert L. Farrow, of Carter, Howe & Co.; Simon Miller, of the Shiman, Miller Mfg. Co.; Matthias Stratton, Fire Commissioner and a member of the firm of Alling & Co., and Thomas Allsopp, of Allsopp & Allsopp.

At the beginning of the season seven team prizes, three individual average prizes and one individual high score prize were offered. These were awarded at the banquet. The team representing Carter, Howe & Co. was declared the champion of the league for the season. This team, which won 18 games and lost seven, was awarded the first prize of $36. The second prize of $27 was won by the team representing Kohn & Co. The third team prize of $21 was taken by the Crescent Watch Case Co.'s team; the fourth team prize of $15 by the Whiteside & Blank team, while the fifth team prize of $9 went to the team representing Alling & Co.

The first high team score prize of $9 was won by the second team from Bippart, Griscom & Osborn, and the second high team score prize of $6 by the team from Kohn & Co. The first individual average prize of $9 was won by Mr. Dennebaum, of Whiteside & Blank; the second individual average prize of $5 by Mr. Speary, of the Crescent Watch Case Co.; the third individual average prize of $3 by Mr. St. John, of Whiteside & Blank; and the individual high score prize of a mineralite bowling ball by Mr Gisell, of Whiteside & Blank.

To qualify for the average prize a bowler was required to roll 200 frames and had to roll the last four games scheduled To qualify for the individual high score prize the bowler was required to roll 160 frames. The games were all played on the Oxford Alleys.

Optometry Bill Again Fails to Pass Legislature of New Jersey.

TRENTON, N. J., April 8.—The bill to provide for the appointment by the Governor of five optometrists as a State Board to license persons after examination under certain rules and regulations to practise optometry was killed by the Senate after having passed the lower house.

The bill was similar to the one now in force in New York State. This is the second time that a bill has been killed through the influence of the physicians.

Perry, Stone & Fulcher, who conduct stores in New London and Mystic, Conn., and Great Barrington, Mass., are about to open a branch store in Pittsfield, Mass The establishment will be ready for occupancy about June 1.

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., April 6.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the port of New York for the week just ended:

Accra: 20 cases clocks, $295.
Bergen: 2 cases clocks, $120.
Berlin: 3 cases optical machinery, $161.
Bombay: 3 cases plated ware, $224; 51 cases clocks, $4,571.
Bremen: 7 cases watches, $4,545.
Buenos Aires: 10 cases plated ware, $1,257; 8 cases optical goods, $4,007; 4 cases watches, $2,916; 8 cases clocks, $141; 14 cases plated ware, $1,111; 26 cases jewel cases, $2,060; 73 cases clocks, $1,174.
Colon: 2 cases watches, $312.
Glasgow: 11 cases clocks, $600.
Hamburg: 1 case plated ware, $500; 5 cases optical goods, $326; 1 case jewelry, $500; 3 cases plated ware, $455; 19 cases jewelers' sweepings, $4,000; 3 cases watches, $338; 5 cases optical goods, $260.
Hanau: 2 cases jewelers' charcoal, $200.
Havana: 5 cases jewelry, $279; 7 cases clocks, $184; 173 cases clocks, $1,685.
Havre: 2 cases jewelry, $258; 3 cases plated ware, $426.
Lisbon: 24 cases clocks, $278.
Liverpool: 3 cases silverware, $2,154; 191 cases clocks, $2,696; 1 case watches, $800; 2 cases jewelry, $2,296; 1 case optical goods, $500; 3 cases watches, $600; 3 cases optical goods, $216.
London: 43 cases clocks, $570; 2 cases silverware, $100; 22 cases watches, $2,596; 33 cases clocks, $1,822; 15 cases optical goods, $6,726; 13 cases clocks, $787; 1 case scopes and views, $100; 1 case clocks, $200; 1 case plated ware, $168; 1 case silverware, $500; 29 cases clocks, $1,222; 3 cases scopes and views, $622; 30 cases watches, $4,646; 22 cases optical goods, $7,414.
Melbourne: 15 cases plated ware, $609; 71 cases clocks, $1,251.
Montevideo: 1 case jewelry, $365; 1 case jewelry, $504.
Nuevitas: 1 case thermometers, $164
Para: 67 cases clocks, $1,577.
Piraeus: 6 cases clocks, $125.
Pto Plata: 9 cases clocks, $103.
Puerto Merico: 1 case plated ware, $108.
Rangoon: 4 cases clocks, $189.
Rio de Janciro: 5 cases optical goods, $611; 8 cases jewelry, $2,522; 64 cases clocks, $1,416.
Shanghai: 43 cases clocks, $611.
Sheffield: 9 cases jewelers' sweepings, $8,000.
St Johns: 6 cases clocks, $112.
St. Petersburg: 2 cases optical goods, $331.
Tampico: 1 case plated ware, $188.
Vienna: 4 cases clocks, $480.
Yokohama: 135 cases clocks, $1,402.
Vera Cruz: 66 cases clocks, $100.
Wellington: 14 cases clocks, $186.

Treasury Department Invites Bids to Supply Time Detectors, Marine Clocks and Other Articles.

WASHINGTON, D. C., April 11.—The Superintendent of the Life-Saving Service, Treasury Department, is inviting proposals until April 28 for the following supplies, to be delivered during the fiscal year ending June 30, 1911:

For 24 leather cases for Imhauser's time detectors, New York delivery.

For 200 boxes dials for Imhauser's time detectors.

For 100 indenting keys for Imhauser's time detectors.

For 25 leather cases for Newman's time detectors, complete.

For 130 boxes dial cards for Newman's time detectors.

For 20 Newman's time detectors, watchman's, latest improved.

For 30 marine clocks, 25 for New York and five for Grand Haven delivery; to be eight-day, seven-jeweled, lever escapement; Breguet hairsprings, compensation balance; all pivots hardened and polished; metal dials with dull or lusterless white surface; hour, minute and second hands; cast brass, nickel-plate, insect-proof cases.

For 50 binocular 26-inch field glasses, short body, oxidized slides, movable shades, with heavy sole-leather cases.

For day and night telescopes, 22-inch.

For 20 Newman's watchman's time detectors.

Man Accused of Stealing Stickpin from Cincinnati Jeweler Convicted and Sentenced.

CINCINNATI, O., April 11.—Charles Raiber, a bartender and formerly an insurance solicitor, convicted April 5 on a charge of petit larceny for stealing from the store of Gradison & Co., was fined $100 and costs and was sentenced to 30 days in the workhouse.

Raiber called at Gradison & Co.'s jewelry store, 136 Vine St., April 4, and asked to see some stickpins, but did not buy anything. Mr. Gradison, who waited on the man, noticed that a diamond and amethyst pin was missing and accused him of taking it. Raiber claimed he knew nothing of its disappearance, but he was detained until a detective arrived.

Later, as a result of a search, the card in which the pin was stuck was found on the show case some distance from where the pins were shown, and the pin without the jewels was found in the cellar underneath the store. It is thought that while Raiber was detained he dropped the pin through an opening at the steam pipes, near the show case. Raiber was searched at police headquarters, but no jewels were found on him, nor have they been found since.

Importations at the Port of New York.

Weeks Ended April 3, 1909, and April 2, 1910.

Fred L. Schultz, Cambria, Wis., has leased the new E. O. Roberts building, and will move into the new and larger quarters May 1. New fixtures and cases will be installed, and Mr. Schultz expects to enlarge his stock.

Association Notes.

The executive committee of the Oregon Retail Jewelers' Association completed arrangements early this month for its annual meeting, to be held at Portland, May 10 and 11, with headquarters at the Imperial Hotel. The meeting promises to be the best attended ever held, for already about 100 jewelers from all over the State have promised to attend. Elaborate preparations are being made by the wholesale dealers of Portland for the entertainment of the jewelers. The executive committee consists of F. M. French, Albany, and E. J. Jaeger and L. W. Bruns, Portland.

Very elaborate programmes for the Ohio Retail Jewelers' Association's convention have been mailed to all Ohio retail jewelers, this week. Any jeweler not receiving one should send his name and address to A. L. Thoma, secretary, Piqua, O. Secretary Thoma announces that a large number have made application for membership, and the officers hope to double the membership this year. The convention dates are May 2, 3 and 4, at the Southern Hotel, Columbus, O.

Claud Wheeler, Columbia, Mo., president of the Missouri Retail Jewelers' Association, recently returned to Columbia after a visit to Kansas City, where arrangements were completed for the joint convention of the Kansas and Missouri jewelers, which will be held at the Baltimore Hotel, Kansas City, June 20, 21 and 22. Missouri opticians will meet at the same place during that week. Mr. Wheeler announced that the arrangements that have been made and the programme adopted has created an unusual interest in this meeting, as it will undoubtedly be the most successful as well as most instructive and entertaining convention that the organizations of these States have ever held.

"The Retailing Jobber," by Benjamain T. Ash, Binghamton; "The Repair Department, a Necessary and Profitable Adjunct to a Jewelry Store," by Thos. J. Routledge, Elmira; "Buying Stock," by H. Y. Burlingame, Sherburne; "What Constitutes a Fair Profit," by Ernest W. Frost, Syracuse; "The Local Association, Its Advantages," by John C. Young, Buffalo; "Employer and Employe," by William A. O'Donnell, Utica; "Competition and Cooperation," by F. M. Thrasher, Buffalo; "Keeping Up Appearances," Charles J. Dale, Plattsburg, and "Trade-Marks and Qualities," by E. M. Baringer, Gloversville. These are the topics and the speakers in the programme of the annual convention of the New York State Retail Jewelers' Association, which will be held in the Powers Hotel, Rochester, on Thursday and Friday, May 26 and 27. One other essayist, an Albany retailer, is to be assigned to "Satisfied Customers." There is every reason to believe that this excellent programme will bring forth many helpful ideas which will result in members of the association acquiring much valuable information. President Charles T. Evans is in daily correspondence with the local committee in charge of the arrangements for the convention, and programmes will soon be sent to all the members.

Although true Black Opal is scarce, we have a notable stock in all grades received by us in a rough state direct from the mines and cut in our lapidary shop in New York.

Our prices are necessarily less than those obtaining in Europe and the fact that no two stones are alike makes this gem very attractive as a profit getter.

WE ARE SPECIALISTS IN BLACK OPALS

All the wonderful changing colors of the Solar Spectrum vibrate through "Black Opal," some in small pin point markings, others in harlequin, peacock and formal designs.

Some stones exhibit broad flashes of red, blue, green and purple while others exhibit cloud effects and sunsets such as Turner painted and only a Ruskin could describe.

West Virginia Retail Jewelers Meet at Wheeling

Fifth Annual Convention of the State Association Largely Attended —Many Important Matters Transacted.—Ends with a Banquet.

WHEELING, W. Va., April 7.—The fifth annual meeting of the West Virginia Retail Jewelers' Association, which adjourned last night, after a most interesting session at the McLure House, proved to be one of the most important and best attended meetings in the history of the organization. Altogether, it was the opinion of the delegates and visitors that more actual business had been accomplished than ever before and that the addresses and discussions were of an unusually interesting character and well worth traveling many miles to hear.

The convention was opened by President Chas. N. Hancher, Tuesday morning at 10:30 o'clock and proceedings began with an address of welcome by Hon. C. B. Hart, president of the Wheeling Merchants' Association, who in a clever manner offered the jewelers the hospitality of Wheeling. The address was ably responded to by Hon. Henry Zilliken.

The secretary and treasurer's reports were side-tracked for a short time while the jewelers inspected the exhibits, which were a very interesting feature of the convention, and after the exhibits President Hancher appointed the following committees:

Auditing—W. L. Jones, Martinsburg, Hon. Henry Zilliken, Wellsburg.

Resolutions—C. A. Keefer, Grafton; J. H. Feaster, Piedmont, and T. A. Westmeyer, Wheeling.

A bill was drafted and recommended for passage to the State legislature, which is intended to correct an old abuse upon jewelers, namely, the releasing of liability of the jeweler for articles left with him to be repaired. This reads as follows:

Section 1. All personal property subject to be retained by any person under the common law until his claim or demand is satisfied, shall after one year from the date of the claim or demand, be sold to the highest bidder for cash, in the same way upon the same advertisement, and by the same officers that personal property is now sold by executions, and any money remaining from said sale after satisfying said demand or claim, costs and expenses of sale, shall be paid to the person or persons whose property was sold.

This bill, if passed by the Legislature, will mean much to jewelers, as many times the merchant is stuck for repair work.

An important address of Tuesday afternoon was delivered by A. L. Sackett, of the Rockford Watch Co., who took for his topic "Retail Jewelers as Shipbuilders."

No class of men occupy a higher position in the business world than the jewelers, he said. This is true because the articles in which they deal, gold and silver and precious stones, are so valuable. The first "ship" for the jeweler to build is citizenship, which is the flagship. The first essential in becoming a successful jeweler is establishing a reputation as a good citizen and being absolutely reliable.

Friendship is another ship which the jeweler should build, and good fellowship, for this breeds confidence. Turning to a lighter vein, Mr. Sackett said that all the jewelers present had already built or would build courtship, when a first mate is taken, and if this one is built right, the fleet will be well manned.

Hardships are the opposing fleet which the ships built by the jeweler will have to contend with, and care should be exercised against building hardships.

One of the strong points in the lecture was made when Mr. Sackett spoke of newspaper advertising. Jewelers are inclined to say sometimes that newspaper advertising does not pay. It does pay handsomely, however, whenever the public learns that the merchant is telling the truth, and truthfulness is the basis upon which every jeweler should build his business. He is not building for to-day or to-morrow, but for his son and his son's son, and reliability is the first thing to be sought for in building all the ships of which he had spoken.

The discussion on the attitude of retail jewelers to watch companies supplying catalogue houses with their product, was taken up and the action of one firm in furnishing the goods to the catalogue houses was severely criticized. The association is endeavoring to confine the trade to the local houses instead of outsiders getting the patronage which is by rights due to the taxpayer at home. Certain companies are refusing to furnish catalogue houses and the action af all, along this line, is heartily sanctioned by the retailers' association.

An able address was then delivered by Col. John L. Shepherd, of the Keystone Watch Case Co., who gave a number of reminiscences of his life as to events in Wheeling from the time when he enlisted as a boy in the Union Army at a place just below where the convention was being held, up to his travels and visits to jewelers of this city in recent years.

W. L. Jones, chairman of the delegates to the National convention held last year at Omaha, gave a very interesting talk on the trip and what was accomplished at the meeting. J. P. Archibald, of Blairsville, Pa., president of the National association, was unable to attend the Wheeling convention owing to sickness in the family.

The afternoon session was brought to a successful close by the "Question Box" and discussions in general.

At the conclusion of the business session the delegates and members met together for a social chat and a photograph of all was taken standing in front of the Federal building.

WEDNESDAY'S SESSION.

During Tuesday afternoon and evening a large number of jewelers arrived in the city, so that the session of yesterday was even more largely attended than was its predecessors. The delegates were called to order at 10 o'clock by Secretary A. C. Thomas, in the absence of President Hancher, and the first item on the program was the address by H. C. Carpenter, of the South Bend Watch Co., who chose for his topic, "Are You a To-morrow Man?" but the real topic was "Do It Now." Mr. Carpenter, after emphasizing the necessity of getting all jewelers in the organization, told of the necessity of cheerfulness for the business man.

"Grasp opportunities," he said, "don't be contented with what is on top and within easy reach, but go after the things that are hid. Advertise and get the loose trade. Keep at getting business and success will be the result."

He told of several men who had made good by going after things that are not exactly within reach, and told the jewelers not to be afraid to expend energy in getting business.

"An organization like the one that is meeting here is a good thing for all, as it develops new and modern ideas, teaches how to get business, and every jeweler in the State ought to belong to the association."

He advised the visitors not to wait for the good things, but to go after them. Instances were cited of successful men who did not wait, but went after things at once. "Break your own path," may also be called one of the chief topics of the address delivered by Mr. Carpenter. The delegates were advised to keep up to the times by reading magazines dedicated to the trade and by watching methods of successful competitors.

The mail order houses were scored by the speaker, and he told of a merchant that had injunctions against them for getting business under misrepresentations, but he said that they were successful in business because they went after business and did not wait for things to turn up.

"Association work makes friends of competitors and makes lasting friendships. This helps every member, as the jewelers can help each other out. No trade is lost by being on good terms with your competitors, and one of the successful mottos of the business men to-day is to stick together. Be a To-morrow Man."

A letter from President Archibald, of the American National Retail Jewelers' Association, explaining why he could not be present, was read at the convention, after which the Auditing Committee's report was read before the body and showed its financial condition to be excellent.

The Committee on Resolutions reported and the resolutions it offered were all adopted.

(The resolutions appear on page 77.)

An interesting talk on side lines for jewelers was given by A. C. Thomas, secretary of the association. He told of successes that had been made, citing his own experience with talking machines. He said that success could be made in side lines and the jewelry business, and advised the delegates not to be afraid to advertise and to especially advertise in the newspapers. The optical business, he said, is an essential of the jewelry business, and advised that the jeweler himself give a lot of time and work to this or to hire a good optometrist.

The parcels post question was taken up and A. L. Sackett delivered a short address in which he stated that in his opinion the majority of the farmers want a parcels post and that a bill of some sort would surely be passed in Washington and that the delegates ought not to pass resolutions against the bill, but should take a better stand by

getting a bill passed that would not help the big mail order houses.

He told of a bill that was put in the hands of a Congressman in Indiana recently that would not hurt local merchants. It would allow parcels to be sent from cities to farmers on rural routes running out of the city itself, but packages could not be carried on the railroads. This, he said, would help both farmers and local merchants, but would not take trade to other than home circles. Mr. Sackett's speech was the starting of much applause and the delegates seemed to agree with him.

Several interesting speeches were made on the subject. Colonel Shepherd stated that the mail order houses were not the worst enemies of the retailers, especially jewelers, and that by talking to home people and advertising, retailers could compete and even beat out mail-order houses. He said that a bill like the one snggested by Mr Sackett would be a benefit to the retailers and that the organization ought not to pass resolutions against the parcels post, but should advocate one like the one suggested

Senator Zilliken, of Wellsburg, said that he advocated a bill like the one mentioned being passed as a trial measure, and after a few years take the matter up again. He said that competition aided business and benefited the people, and cited the building of the street car lines between Wellsburg and Wheeling and Wellsburg and Steubenville as not hurting Wellsburg merchants and benefiting people at large.

Following this discussion a motion was made that a special resolution be passed pertaining to the parcels post. The motion was passed and the resolution was adopted.

Next to the last business to be attended to at the convention was the selecting of officers to serve during the coming year A new president was chosen, all the vice presidents were re-elected and the offices of secretary and treasurer were combined, one man filling both. Following are the officers that will serve during the coming year: President, W. L. Jones, Martinsburg; vice-presidents ranking in order named: C. E. Raab, Parkersburg, Hon. Henry Zilliken, Wellsburg; Ralph Erhard, Davis; C. A. Keefer, Grafton; W. T Eisensmith, Charleston. A. C. Thomas, of Sistersville, who has been secretary for some years was elected to the office of secretary-treasurer. T. A. Westmyer, of this city and C. E. Raab, of Parkersburg, were appointed to represent West Virginia at the American National Retail Jewelers' Association convention to be held in Detroit July 26-29, this year, and Senator Zilliken, of Wellsburg, and C. A. Beresford, of Piedmont, were appointed alternates.

Huntington will probably be the place of meeting next year. It was decided to make next year's convention a joint one with the West Virginia State Optical Society and the time and place of meeting will be decided on by the secretaries and presidents of the two organizations Huntington is the city that is favored by nearly all and the date will be in the Spring

---

The jewelers wound up their gathering by a banquet at The Oaks last night Among those who participated were also members

of the West Virginia State Optical Association, who were here for their annual meeting.

When the jewelers and opticians arrived at the banquet they found the hall decorated throughout with palms and other plants, with white and yellow streamers from chandelier to wall. There was no set programme, but Mr. Thomas acted as toastmaster, and performed his duties in a very creditable manner.

After the menu had been finished Mr Thomas called on F. W. Christman as the first speaker, who complimented the jewelers in a few brief remarks. W. S Eisensmith, Charleston, spoke enthusiastically on the convention and told of the optometry bill which was coming up at the next session of the legislature. He also played a high tribute to his home town and to the State in general.

The principal speaker of the evening was Col. John L. Shepherd, who made one of the addresses for which he is famous in the jewelry trade, holding his hearers in rapt attention until he had finished. He is an optimist and showed it, but his address was punctuated with poetic perorations, which raised the diners to the greatest enthusiasm. In his talk he urged the jewelers to be honest, considerate and above all to be optimistic and ended by reciting his well known original poem on "Opportunity," which is his answer to the more pessimistic verses of the late Senator Ingalls.

Col. Shepherd also told a host of funny stories in his own inimitable way, setting an example which was generally followed.

The Resolutions.

The resolutions adopted were as follows:

Resolved, That we heartily commend and express our sincere appreciation of the various watch companies, who have and are now making efforts to confine the sale of their product to the legitimate retail jewelers, and especially do we commend and hereby announce our fullest appreciation to the Waltham Watch Co., for the recent change made in their selling plans by placing the sale of their product in the hands of the retail jewelers, and, be it further

Resolved, That we here condemn the practice of the several jobbing houses who distribute catalogues promiscuously to persons not entitled to the same, and by this means market goods to the consumer at wholesale prices, and, be it further

Resolved, That we commend all jobbing houses who aim to protect the retail jewelers by maintaining such business methods that are beneficial.

Resolved, That we also commend this same company for the intensive advertising efforts now being used, which are a great advantage to the retail jeweler.

Resolved, That we commend all watch manufacturing companies who are confining their product to the retail jewelers, and at the same time firmly maintain fixed selling prices, and, be it further

Resolved, That we commend the very liberal advertising used by these companies.

Resolved, That we strongly condemn the practice of manufacturers and jobbers maintaining retail stores and selling at retail. We pledge ourselves to stand together and so far as practical confine our business to the manufacturer and jobber who gives to the retailer that protection and consideration to which he is justly entitled.

Resolved, That we earnestly endeavor to secure the passage of Federal laws that will enable the prosecution of persons doing fraudulent advertising by the use of the United States mails, or by any methods whatsoever.

Resolved, That the thanks of this association be extended to Charles Burdette Hart for his attendance and very pleasing address of welcome; to the Wheeling papers for their complete reports concerning our meetings; to the various jobbers and manufacturers who have attended this convention and made displays for the convenience and information of our members; to A. Y. Sackett, of the Rockford Watch Co., for his excellent and entertaining address; to J. L. Shepherd, of the Keystone Watch Case Co. for his pleasing, humorous and advisory talk; to H. C. Carpenter, of the South Bend Watch Co., for his exceptionally instructive and forcible address; to the Wheeling members of the association for their hospitality and kind attention and entertainment during our stay in their city; to the McClure Hotel management for courtesies extended; to the manufacturers, jobbers and representatives who have by their genial manner, good will and interest in our affairs aided the officers and members in making this convention such a grand success.

SPECIAL RESOLUTION ON PARCELS POST.

Resolved, That this association, recognizing the demand by the people at large, particularly those in the rural districts, for some form of parcels post, and realizing that majority should rule in this, as in all other matters under our form of government, we, therefore, as an association desire to express ourselves in favor of such action upon the part of the Federal Government and the Post Office Department, tending to establish parcels-post service, carrying packages at a rate to be established, over rural routes only, and packages so carried must be taken from such offices from which the rural route carrying such packages originates, and all such packages so carried must bear the original post-mark of the office where same was delivered for transportation and given to the rural carrier.

T. A. WESTMYER, J. H. FEASTER, C. A. KEEFER, Chairman, Resolution Committee.

Detroit Retail Jewelers' Club Make Plans for Coming Convention.

DETROIT, Mich., April 8.—The regular monthly meeting of the Detroit Retail Jewelers' Club was held Thursday evening in Harmonie Hall. A dinner preceded the informal talks, which turned largely upon the condition of trade in Detroit and the preparations being made for the National convention in July. President Charles W. Warren presided and one of the principal talks of the evening was made by Herman A. Rolshoven, chairman of the entertainment committee, who spoke on the entertainment features of the convention.

The program for the convention has already been adopted. It calls for a reception to the president and officers of the National association in the Hotel Cadillac on the evening of Monday, July 25. Tuesday will be devoted to the business session and the delegates will look Detroit over in the evening.

Wednesday will be Manufacturers' and Jobbers' Day and the business session will be followed by a trolley ride through Grosse Point and along the shore of Lake St. Clair to Lakeside Inn, where dinner will be served. Thursday will be given over to a business session, the election of officers coming in the afternoon. A theater party in the evening will conclude the day. On Friday there will be a final business session and adjournment at noon, after which there will be a steamer ride on the Detroit River and Lake St. Clair.

Already two-thirds of the exhibition space in the Hotel Cadillac has been engaged. The parlors will perhaps be used as auxiliary show rooms.

Death of George W. Townsley.

PIERCE CITY, Mo., April 6.—George W. Townsley, a well-known jeweler of this place, died at his home last week. Mr. Townsley was formerly engaged in business at Sedalia, Mo., but had been in business at this place for about 15 years.

The business was conducted here under the name of the deceased's wife. When Mr. Townsley came to this place he succeeded B. L. Buley.

Do You Recognize Any of the Repair Marks in Watch Described Below?

MORRIS, Ill.—Dr. H. M. Ferguson, coroner of Grundy County, is asking the aid of jewelers and watch repairers in an effort to establish the identity of an old man whose body was recently found floating in the river here. The only clew is in the watch which he carried. Dr. Ferguson hopes that jewelers who repaired it may be able to identify the owner from the marks.

The watch is described as an 18 size, gold filled, open-faced Crescent case, No. 128,142, with a Columbus movement, 11 jewel, No. 105,222. There are several repair marks on the watch which would indicate it had been carried for some time. One is No. 64,181 with letter "C" above the letter "B." Another is 10,149 over letter "K" and another is 7,064 over letter "K." Still another is 6,304 over the letter "K" indicating a residence of some time where the last jeweler is located.

Any jeweler who may recognize the above marks is requested to communicate with Coroner Ferguson at once.

Pearlin Bros. Released in Los Angeles, Cal., Under Exacting Conditions.

LOS ANGELES, Cal., April 8.—Judge Willis, of the Superior Court, has released, on probation, Samuel and Simon Pearlin, the young men who embezzled diamonds valued at $447 from Jacob Rosenkranz, but the release is given under very exacting conditions. The term of Samuel Pearlin was fixed at seven years, and one condition of release was that he save $30 a month for a fund to reimburse his creditors. Simon, who is married, was given a five-year term and ordered to pay $20 a month toward the creditor fund.

Neither of the young men is allowed to enter into business for himself, but both will be compelled to work as journeymen. The action of the court was taken against the advice of the chief probation officer, who had investigated their case.

The Pearlins, it will be remembered, fled from here to New Haven, Conn., their former home, where they were arrested.

Games Rolled by the Jewelers' Bowling League of New York.

The following were the scores of the teams of the Jewelers' Bowling League of New York in the games rolled last week at the Universal alleys, Brooklyn:

Reigning Jewelry Fashions Noted in Paris.

Dainty Novelties in Jewelry, Watches, Etc., Shown at Exposition, Now in Demand Among People of Taste in France's Capital.—Effects of Chantecler Craze.

PARIS, April 3.—Spring is the season of expositions, and in Paris whenever pictures are shown there are also jewels and small bibelots from renowned masters of the craft. The Automobile Club, a chic organization, is having its showing of artistic objects. Among the jewels may be mentioned an exhibit from Vever rue de la Paix which strikingly illustrates the mania for circular or, as they are called, plaque pendants. A striking example was set with smooth and shallow sapphires of oblong shape, on each of which was incrusted a diamond, the ornament delicately worked in aluminum in a showy design in small brilliants. Such settings are exceedingly light. Another was in the form of a Louis XV basket overflowing with exquisitely wrought blossoms expressed in diamonds. Each of these pendants hung from a diamond hook attached to a neck chain an inch wide, of small seed pearls in a pattern. These disk like pendants have almost superseded the fancy shapes and afford scope for much diversity of design.

The greater proportion of these plaques are in a delicate network almost entirely of diamonds, with occasionally a few colored stones introduced. George Fouquet, who rather runs to what is known as "modern style," had a case worthy of notice. Here, again, the graceful flower basket was in evidence, but differently treated. The basket was composed of tarnished gold wire studded with glittering marcassites, while here and there were small fire opals, while on one side was a glowing bit of flat opal matrix surrounded by shaded green enamel. A pendant of Byzantine inspiration showed two long and slender pieces of translucent green-blue enamel separated by diamonds, with one great shimmering pearl drop in pear shape. A brooch elicited much attention. It was a bar of pale medium-sized sapphires with, at each end, circular ornaments of enamel and colored stones, with above a couple of scintillant diamond wings and a great yellow pearl depending from the center.

A quaint brooch from another artist had a character of its own, being an enormous topaz *brulé* faceted and set in twisted copper wire and supported by flat pieces of brown mottled quartz. A hat pin was noticeable for its originality, in the shape of a thistle, an immense topaz being sunk in the calyx of finely ciselé blackened silver.

There were exquisite little statues, one in precious stones the work of Georges Lemaire and called *La Fortune*, composed of red jasper, rosy crystal, labrador, white quartz, lapis lazuli, moss-green jasper, yellow silex and gilt, the colors blended with an eye to harmony of the ensemble. Another marked *Myrto*, a Greek dancer, revealed the head and arms of white quartz of Arizona, with the flowing robe of amethyst matrix and base of yellow Sienna marble.

The butterfly and dragon fly are old but ever new as designs for jewelry; a striking brooch is as light as lacework in the form of a butterfly of aluminum, the wings in openwork studded with large and small brilliants and which could at will be transformed into a hair ornament. For the hair two dragon flies with long and slender wings of transparent white horn set with pale pink peridots and clasping between them a great brown topaz. A brooch simple yet artistic took the shape of a long and narrow lily leaf, while twisted on top was a bunch of silver berries and button-like buds of blackened silver and tiny brilliants. A hat pin with a deep cup of dark blue

THE WAY THE PLAQUE PENDANT IS WORN IN PARIS.

enamel held sunken in the top a triangular-shaped amethyst.

Ivory is greatly used by the new school of workers, one brilliant being shown in a brooch composed of butterfly wings enriched with dull opals held in gold wire. The ornament and teeth were all cut of a single piece.

Snowy is a brooch the size of a dollar set with a big oblong sapphire surrounded by a wide border in a Greek key pattern in small diamonds.

The prevalence of neck wide chains of gold and pearl from which depend the great plaque pendants is noticeable. While a design in flat openwork pearls is the most used there were besides heavy gold chains in cut work that reminds one of the chain of office of a major domo. A remarkable example showed oblong plaques divided by big cut topaz from which hung a pendulous pendant set with topaz surrounded with diamonds. The aquamarine is a great favorite, and enormous ones an inch or more square are embedded in an aluminum frame, diamond interlaced.

A departure from the conventional plaque was a pendant in narrow triangular shape with a reminiscence of iridescent peacock tones in its ornamentation of olivines and sapphires.

To clasp a wide black velvet throat band was a barette of maiden-hair ferns in diamonds set on black enamel. A novel arrangement shows a large gold mesh bag striped with gold in various colors, from which is hung by the ornate enameled clasp a thread-like chain with a tiny coin purse studded with rubies, and from which change could be extracted without opening the larger bag.

Bracelets are both wide and narrow, the latter appearing, however, the most popular. Pretty are those simulating a dress galloon or ribbon expressed in enamel and gems. Another bracelet scarce a quarter of an inch in width showed small square rubies set *pavé* fashion. A necklace of varicolored pearls as large as a pea, with the stones separated by a line of small diamonds, was a chaste ornament. Beryls and corundons are lavishly used by the *Art Nouveau* workers in the precious metals, the wide range of color affording great scope for artistic harmonies.

The Chantecler craze has inspired much quaint jewelry, three roosters' heads in gold with crests of scarlet enamel being one of the newest expressions of barnyard jewelry for a brooch. Gentlemen's scarf pins also follow in this lead, but for the advocate of open-air sports there is the entire category of game birds—pheasants, quail, grouse, etc.—with small gold skis, golf sticks, etc. Several gold club stick pins are inclosed in a small leather case like those in which are carried the real article.

The bird and animal craze is also evidenced in umbrella and parasol handles, a silver chanticleer with outspread wings and scarlet crest displaying itself on a lady's red parasol. There are handles of precious quartz, amethyst and opal matrix, pink quartz jade, lapis and malachite fashioned like a column, upon the apex of which sits a saucy pug in the same material or in crystal, his neck encircled with a gold chain from which dangles a baroque pearl or other stone. He has for rival a black cat with glistening aquamarine eyes, or a pert-looking white or gray rabbit. A hideous ape, which by some mechanical arrangement rolls its eyes and sticks out its tongue, does duty for a man's umbrella handle.

For ladies there are crooks of dull and bright crystal studded with tiny gold-rimmed gems and banded with the same colored enamel; golden crooks, enamel ringed, and those of wood matching the silken covering and with a hoof-like termination at the top of the long directory handle. The Chanticler craze has inaugurated parasol tops representing ducks, geese, pheasants and chicks, with gorgeous-hued parrots and kingfishers, expressed in carved and painted wood.

Wooden porridge bowls often replace those of silver, a pretty one being of finely marked exotic wood in a delicate shaded gray, silver banded, and with for ornament a silver *fleur-de-lis* in a raised design. For Easter are tiny silver chickens with on the back a pale blue or pink velvet pin cushion. An egg platter shows a pattern in dull silver in relief, while at the four corners are silver roosters. Around the edge are gold-lined receptacles for a dozen eggs, and in the center a silver mounted crystal butter dish.

COUNTESS DE MONTAIGU.

The Quality of Our Jabots Will Interest You

(PATENT APPLIED FOR)

All indications are that jabots will be worn more extensively than ever this season; and "The Psyche Bow," designed by our own artists, will appeal instantly to your best trade.

The pin in exclusive patterns is made in 14 karat gold, mounted in pearls, diamonds, sapphires, topaz and numerous other attractive combinations. The bow is made of imported moisture proof Maline, and it always looks crisp and clean.

Our Patent Clasp Is An Important Feature

of the Psyche Bow. It opens easily by turning a button at the back. The bow can then be removed, and the pin makes a beautiful hair ornament, or another jabot can be substituted.

One number from our extensive line is illustrated—note the individuality of design and quality of workmanship. Exceptional value is given in our prices that range from $20 00 upward. Place a sample order of these jabots to-day or write us for complete information.

HOWARD & COCKSHAW, 218-220 FOURTH AVENUE, NEW YORK CITY

Canada Notes.

T. S. Porte, Campbellford, Ont., has given a chattel mortgage to L. G. Young for $275.

Fred Gundy, of the Gundy, Clapperton Co., Toronto, Ont., has returned from an extended trip through western Canada.

Among traveling representatives in Toronto, Ont., last week, were: W. R Stevens, R. Wallace & Sons Mfg. Co, and A. Bains, Wilcox Silver Plate Co

William Eaves has removed from 103 to 107 Notre Dame St, West Montreal. Mr. Eaves and his father before him had been in the old building for nearly 50 years.

P. W. Harrison, of Deykin & Harrison, Ltd., Birmingham and London, Eng., called on the trade in Montreal during the past week. Upon leaving the city he went to Toronto, en route for the west. He will return to England via New York.

The death of Arthur M. Graham, salesman for the Goldsmiths' Stock Co., Toronto, Ont., occurred on Sunday, April 3, in his 29th year. Mr. Graham had been ill with typhoid fever for about two weeks, but his case was not considered serious until a short time before his death.

W. E. Coutts, manager of the stationery department of Ryrie Bros., Toronto, Ont., has gone to New York on a purchasing trip. W. E. Brown, who has been for some time with the same firm, is leaving Toronto to take charge of the silver department of Porte & Markle, Winnipeg, Man.

Out-of-town jewelers calling on the Toronto, Ont., trade, last week, included: F. Clarke, Jr., Peterboro; L. A Jeanneret, Elmira; O. Saidenberg, Ottawa; Norman Ellis, Hamilton; J. Trotter, Galt; A. B Willson, Georgetown; W. H. Smith, Oakville, and A. Gibson, Woodstock, all Ontario.

A mysterious individual giving the name of S. G. Green, and pretending to represent a New York diamond firm, swindled a number of jewelers in Winnipeg, Man., last week, for a large amount and skipped out. He was arrested at Fargo, N. Dak., a wire having caught him on his train en route for St. Paul. He is fighting extradition.

On Tuesday, April 5, Alfred Hazlett, a Grand Trunk Railway baggageman, was arrested on information laid by E. J. McIntyre, jeweler, Chatham, Ont., charged with stealing two rings valued at $150. McIntyre had sent a rush order to Avey & Jones, London, Ont., whose messenger entrusted the box containing the rings to Hazlett. The latter disclaimed any definite knowledge of the parcel, asserting that it must have been placed with other baggage and fallen off the truck. Fortunately for the defendant, his story turned out to be correct, for the rings were subsequently found in the possession of a young girl, who said she found them on the platform and was ignorant of their value. Hazlett was discharged.

Evidence is being given this week in the case of D. L. Rey, watchmaker and consul-general for Switzerland, at Montreal, who was shot in the face while standing at the door of his jewelry store at 14 Cadieux St., Dec. 7 last. Mr. Rey is suing the city for $15,000 damages, and the case is being heard before Justice Archibald and a jury. The evidence as far as it has gone showed that several city detectives were running after Vincent Morgan, a notorious crook, who was wanted by the police on a charge of house-breaking and robbery. As the accused ran along Cadieux St. several shots were fired after him; two went through his coat-tails, and it was then that Mr. Rey, who was standing at his door talking to his wife, was shot in the jaw. Mr. Rey occupied the witness stand through one court session. He informed the court that the bullet was still in his face, and that his health had been greatly impaired as a result of the shooting. His business has also materially suffered owing to his long illness. Some of his customers had been under the impression that he had been killed and they had transferred their business elsewhere.

Washington, D. C.

John Hansen has left this city on a short business trip to Columbus O.

The Edwards & Zanner Co., 7th St., N. W., has taken on an additional man in their repair department.

The announcement of the engagement of Miss Caroline Baer, sister of Milton Baer, of Georgetown, to Morris Wolf, Tampa, Fla., has been announced.

On the sick list are A. O. Hutterly, vice-president of the Retail Jewelers' Association of the District of Columbia, and E. G. Hines, 921 F St., N. W., both suffering with severe attacks of rheumatism.

Le Roy Rosenthal, formerly in the employ of Schmedtie Bros., has gone into business for himself on G St., N. W. Mr. Rosenthal will confine himself at present to jewelry repair work, etc., for the trade.

"The Jewel Box" is now well established at the new address, 1337 F St., N. W., the business having been removed from 1303 F St. The new store is quite large and is so sub-divided that the rear may be used as an office or manufacturing department.

The Galt Cup, a prize to be offered at the coming dog show, is the largest of 11 cups which, together with a half dozen or more other prizes, are on display in a local store window. Galt & Bro., 1107 Pennsylvania Ave., N. W., presented the cup as a prize.

The Police Department have been notified of the theft of a gold mesh purse valued by the owner at $275, and of a gold cigarette case marked "Kittens" appropriated by a sneak thief, which will probably turn up sooner or later in the store of some jeweler.

It is reported that the child of Ray L. Parsons, watchmaker in the employ of M. Goldsmith & Son, is in a very critical condition from the effects of spinal meningitis. Mr. Parsons is very well known here and his friends in the trade earnestly hope for the recovery of the little one.

C. H. Childs is making extensive improvements to his store at 703 12th St., N. W. The old front has been pulled out and a new display window put up in its stead. The outside has been repainted and the inside repainted and repapered. The window is laid with parquet flooring. Mr. Childs is taking on additional lines.

A bill has been introduced in Congress by Representative Coudrey, of Missouri, regulating the wearing of hat pins by the ladies in the District of Columbia. The bill provides that the wearer of a hat pin from which "the exposed point thereof shall protrude more than one-half inch beyond the crown of the hat," etc., shall be liable to a fine of $50.

Among the traveling men in the city during the past week were: T. J. Judge, Joseph B. Bechtel & Co., Inc.; Harry C. Birch, S. B. White & Co.; Frank L. Wood, Ludwig Nissen & Co.; A. Kaufman, Ingomar Goldsmith & Co.; E. B. Midlen, Gorham Co.; Harry G. Young, The Gibson, Krugler Co.; George A. Terhune, Robert H. Ingersoll & Bro.; Henry Greenthal, Albert Lorsch & Co.

Baltimore.

Oliver Wareheim has sold out to John E. Beck.

Leon Levi, who conducts a store at 309 W. Lexington St., has leased the adjoining building and will make alterations so as to have one large store.

The J. S. MacDonald Co., 214 N. Charles St., supplied the handsome silver service which was recently presented to Speaker Adam Peeples by members of the House of Delegates at the close of the last session. The pieces are of Colonial style and are beautifully wrought.

Jacob Gamerman, owner of a jewelry store at 424 N. Calvert St., was instrumental in bringing about the arrest of Clarence Howlett, alias Wilson, alias Oliver Reaves, who is wanted in Washington, D. C., on a charge of stealing $20,000 worth of diamonds belonging to Mrs. Frederick Bugher. Howlett had entered the jewelry store and offered for sale a one carat diamond, valued at $150. At first he told Mr. Gamerman that he wanted the stone set in a pin, and then he tried to sell the stone for a small sum. Mr. Gamerman recognized Howlett as the man whom the police were seeking and held him until the arrival of the proper authorities.

Cash prizes have just been awarded at the Bowman Technical School, Lancaster, Pa., for excellence of workmanship in watch work during the past six months going to H. F. Buckwalter, Herbert Hamrit and Albelt Steller, first, second and third in the order named. L. O. Beard, formerly with the Fred. Frick Clock Co., Waynesboro, Pa., and J. C. Barker, Hinton, W. Va., have entered the watchmaking department of the school.

William H. MacAusland, foreman of the white metal department of the Reed & Barton Co., Taunton, Mass., resigned Saturday after 37 years of faithful work. Beginning as errand boy and apprentice, Mr. MacAusland rose to the head of his department. His resignation was a surprise to the workmen, who were not aware of his decision until he appeared in the room to bid them good-bye and good luck. Mr. MacAusland started in the employ of the company in 1873. His first position of trust was as superintendent of the pattern making department. In 1891 he was placed in charge of the tea ware department, and two years later was given full charge of the white metal department.

Providence.

George W. Dover was in New York last week.

Alfred K. Potter made a trip to New York last week.

Frederick A. Stevens has been granted a patent on a frameless spectacle.

Charles B. Donle has just purchased a new 32-horsepower touring car.

A new sand-blast outfit has been installed for Fessenden & Co. by H. J. Astle & Co.

C. Rudolph has started in business as a stone setter and engraver at 113 Friendship St.

W. V. Ghislin, Chicago manager for the Gorham Co., is visiting the factory in this city.

W. A. Burt is sending in some good orders to the Cory & Reynolds Co. from the middle west.

John F. P. Lawton, secretary of the Gorham Mfg. Co., is stopping at the Chalfonte, Atlantic City, N. J.

Albert Mayer, of Joseph Mayer & Bro., Seattle, Wash., has been in town the past week placing orders.

Alfred K. Potter, of the E. A. Potter Co., has been elected a member of the Providence Board of Trade.

William Gow was in New York, last week, showing the new line of the George N. Steere Co., of Pawtuxet.

C. H. Ballou & Co. are getting out a new line, and Mr. Ballou is preparing to take the road in about a fortnight.

The manufacturing jewelers of this city received calls from David Goldberg of Lucios, New York, last week.

Tiffany & Co. have been calling through the local newspapers for silver spinners for their works at Forest Hill, Newark, N J.

In its department of chainmaking by machinery and the toolmaking department, the E. C. Bliss Mfg. Co. is extremely busy.

The Chapin & Hollister Co. has been granted a registry of a trade-mark for pendants, brooches, scarf pins, cuff links, etc.

Albert S. Vennerbeck was in New York and vicinity the past week, visiting the trade in the interests of Vennerbeck & Clase Co.

Wesley Cornell Martin, a manufacturing jeweler of this city, has taken out a marriage license to wed Miss Olga Wilhelmina Olsen.

The American Oil & Supply Co., Newark, N. J., has discontinued its Providence salesroom, which was in charge of George H. Smead.

John A. Colwell, with Albert Walker & Co., has been elected vice-president of the men's Club of the Beneficent Congregational Church.

The Providence Stock Co. is receiving some satisfactory orders from S. J. Sumner, who is visiting in the middle west in its interests.

J. S. Richter, who represents the N. Barstow Co. and Doran, Bagnall & Co., of this city, in Chicago, is at the factories of those concerns here.

Barton A. Ballou, of B. A. Ballou & Co., Inc., has just registered a 32-horsepower Corbin touring car with the State Board of Public Roads.

The Chicago office of Hutchison & Hinestis, in charge of Harry H. Miller, is to be changed to room 804 in the Columbus Memorial building.

The Bassett Jewelry Co., of this city, is to remove its Chicago office from room 510 to 705, in the Columbus Memorial building, at an early date.

John Kelso was one of the speakers at the annual meeting of the Men's Club, of the Beneficent Congregational Church, on Tuesday evening.

D. A. Hodge was a caller upon the manufacturers of this vicinity the past week purchasing goods for Hodge-Miller Co., Inc., of Seattle, Wash.

Horatio E. Bellows was in Washington the early part of last week in the interests of patents for manufacturing jewelers whom he is representing.

James G. Trafton has returned from an extended and successful trip to the central and northwestern sections in the interests of the Morgan Jewelry Co.

Major E. Merle Bixby, superintendent of the silver department of the Shepard Co., will sail from Boston the first of next month for an extended trip in England.

Jacob Solinger, who has been in Florida and Cuba for several weeks on account of his health, has returned much improved. He was accompanied by Mrs. Solinger.

Edward B. Shepard is absent on a trip to Europe in search of new novelties in precious and imitation stones to be imported by Albert Lorsch & Co. for the manufacturing jewelers.

William H. Manchester has just purchated a 40-horsepower touring car to replace the one smashed up a few weeks ago by his chauffeur while on a joy ride without the owner's consent.

Alton I. Churchill, 18 years of age, was fined $20 and costs in the Sixth District Court, Thursday, for the larceny of two mesh bags valued at $2.25 from the Shepard Co., by which he was employed.

Henry C. Luther has been elected as one of the delegates to represent the Department of Rhode Island, Grand Army of the Republic, at the national encampment, to be held at Atlantic City in September.

The case of Arthur D. Wood against William Bens Co., manufacturing jewelers, 95 Chestnut St., was on the calendar of the Superior Court for last Friday, but was not reached and will be reassigned later.

The house of Oscar E. Place, of O. E. Place & Sons Co., narrowly escaped destruction by forest fire near Hills Grove recently. The flames were extinguished just in time to save that and other buildings on the estate.

While in this city, last week, Frederick Sheridan, who represents several eastern manufacturing jewelers on the Pacific Coast, added the line of the E. A. Potter Co. He left for the coast the latter part of the week.

Frederick A. Ballou, of B. A. Ballou & Co., Inc., has given up his home in this city and returned to his home at Nayatt, where he will remain until June 1, when, in company with his wife, he will sail for Europe on the *Mauretania*.

First Lieut. Alfred B. Lindroth, of the Ordnance Department, R. I., N. G., has tendered his resignation from the State service. He has been engaged in conducting a mail-order business and now intends going into the manufacturing jewelry business.

Henry Hunt Clark, head of the decorative design department of the Rhode Island School of Design, delivered an interesting and instructive lecture on "The American Style of Ornament" in Memorial Hall on Wednesday evening.

Aldridge G. Pearce, of the F. P. Pearce Co., sailed from New York on Wednesday last to attend the sessions of the Imperial Council of the Mystic Shrine in New Orleans. He is one of the delegates from Palestine Temple of this city.

The employes of R. L. Griffith & Son Co. held a dance, Friday evening, in Macnair's Hall, at which about 150 couples were on the floor. Vocal and instrumental music and fancy dancing exhibitions were features of the evening's entertainment.

The Tilden-Thurber Co. secured a decision against Henry W. Stiness, on book account before Judge Rueckert in the civil session of the Sixth District Court on Wednesday, the defendant not appearing. The decision was for $129.49 and costs.

Zare White has discharged a mortgage of $4,456 held by Eden H. Bigney on a lot of land with improvements at the northeast corner of Eddy and Public Sts., and placed two mortgages thereon for $10,000 and $2,489, respectively, to Charles E. C. Fisher.

Charles H. Fuller, of George H. Fuller & Son Co., Pawtucket, has had his steam yacht *Thetis*, in which he has been cruising in southern waters the past Winter, brought up from North Carolina the past week and anchored off the Rhode Island Yacht Club house in Narragansett Bay.

Among those who attended the 76th regular dinner of the Churchmen's Club in Churchill House, last week, were Edward I. Mulcahey, Fred D. Carr, William P. Blanding and Percy W. Hatch. The first two were elected as vice-presidents of the club at the annual election.

It was announced the past week [illegible] on the occasion of the 30th anniversary [illegible] opening of the Shepard Co.'s store in this city, April 2, the sales aggregated $125,391.57, which is claimed to be the largest amount on record for a single day's business [illegible] department store in this country at [illegible]

Mr. and Mrs. John H. Collingwood celebrated the 51st anniversary of their marriage last week and their golden wedding, postponed from last year because at the time of the 50th anniversary Mr. Collingwood was ill in a hospital. Mr. Collingwood has been engaged in the business of manufacturing jewelry.

Walter A. Griffith, treasurer of the R. L. Griffith & Son Co., of this city, has been elected president of the Edgewood Golf Club. The directors are Joseph Sattler, Joseph S. Gettler and Samuel Sattler, of the Outlet Co.; H. L. Carpenter, of A. Walker Co., and A. Vennerbeck, of Vennerbeck & Clase Co.

Among the foreign importations received through the Providence Custom House during the past week were the following: From Bremen, 27 packages of precious stones; from Hamburg, three packages of imitation precious stones; from Havre, one package of copper and imitation precious stones.

Among the travelers in the [illegible]

week were: I. Alberts; C. F. Sweazy, Champanois & Co.; C. W. Sweetland, C. W. Sweetland & Son; Edward Jones; Benjamin Uttall, F. A. Hardy; Charles E. Mott, J. B. Bowden & Co.; D. W. Lane, E. Kirstein Co.; Mr. Billings, Excelsior Umbrella Co.; F. M. Drisco, Globe Optical Co.

Carroll Edward Wilson, salesman for Albert Lorsch & Co., of this city, and Miss Maude Evelyn Perry, of Attleboro, were united in marriage Thursday at Roxbury, Mass., by Rev. J. Harry Holden, the ceremony being witnessed by only the intimate friends and relatives. After a short wedding trip Mr. and Mrs. Wilson will live at Attleboro.

The C. H. Cooke Co., manufacturing jewelers at 61 Peck St., is moving its factory from the second floor to the one above, where it will occupy the shop recently vacated by William Smith & Co. This will give more than double the floor space previously occupied, which increasing business demanded. Much up-to-date machinery is being placed in the new plant.

The case of the New Acme Plating Co. against Mark Streicher *et al*, on book account, was called before Judge Rueckert in the civil session of the Sixth District Court Thursday. The plaintiff discontinued the suit against the defendant, Streicher, and decision for the said defendant was given for costs. Decision was rendered for the plaintiff against the defendant, M. S. Comb Co., for $298.16 and costs.

Charles W. Bowen, one of the well known merchants of this city and owner of the several brick factory buildings at Friendship and Page Sts., occupied by manufacturing jewelers and kindred concerns, died Saturday morning in his 74th year. On Jan. 3, 1861, he married Mary Thomas Richardson, only daughter of George Richardson, of the old time manufacturing jewelry firm of Richardson & Hicks, of this city.

William B. Streeter, of Streeter & Co., is having a new power boat built that will be ready for launching about the middle of May. It is to be 32 feet in length and constructed from original designs by Mr. Streeter. It will be lighted throughout by electricity, with a cabin large enough to furnish sleeping accommodations for six persons and will be finished throughout in oak. It will have a 15-horsepower engine.

The case of Zare White against the Victor Jewelry Co., which was on the calendar of the Superior Court for trial on Friday, was settled out of court. The day previous notice of the submission of the defendant to judgment for plaintiff for $300 and costs was entered. This was a suit brought against Frank Young and George Johnson, doing business as the Victor Jewelry Co., for balance of book account. In the declaration it was alleged that in August, 1909, the defendants purchased of the plaintiff a lot of combs, valued at $600, upon which balance of $300 was due.

Judge George T. Brown, on Wednesday last, sentenced Antone Burke and Max Kirtz in the Superior Court to pay a fine of $25 and costs each under the new law, enacted last term of the General Assembly through the efforts of Representative Harry Butler, prohibiting pawnbrokers from buying or receiving silver scrap. Burke and Kirtz were the first persons to come before this court charged with this offense. They had been indicted for receiving a small quantity of scrap metal Nov. 29, 1909, and the authorities recommended that the defendants should be punished in order to show that the law is to be enforced.

Attleboro.

William Gowan left last week for a western trip.

Ralph Hoxsie, salesman for Mason, Howard & Co., was at the factory last week.

The Van Dyke Club, of the Fontneau & Cook Co., enjoyed a fancy dress party last week.

Fred Sheridan, Pacific Coast representative of several local firms, was in town last week.

J. M. Fisher & Co. started to move this week to their new location in the Leach & Garner factory.

The traveling force of S. O. Bigney & Co. started on the road last week with new lines of samples.

Stephen Garner returned last week from New York, where he spent a few days in the interests of his concern.

Walter Hopkins, salesman for C. H. Eden & Co., was at the factory last week arranging his sample line. He left Monday on a western trip.

A. G. Cobb, of the Daggett & Clap Co., whose headquarters are in Chicago, was making his semi-annual visit to the factory last week.

Benjamin Taylor, who has been connected with the office of the Adams Express Co., has taken a responsible position with C. M. Robbins & Co.

Joseph Aranji, a designer and die cutter, has been awarded a verdict of $500 in a suit against Allen, McNerny & Co. for damages for breach of contract.

On account of the increase in rates of the Adams Express Co. the manufacturing jewelers have decided to carry on business with the overland express companies whenever it is possible.

At the annual meeting of the Odd Fellows Building Association last week, Joseph Finberg was elected president and S. O. Bigney, Fred L. Torrey, David Makepeace and Albert Ingraham, directors.

The Hopewell mill buildings, the oldest mill structures now standing in Taunton, will be torn down in a few days to make way for the erection of an electric plant which will supply the Reed & Barton factory with power.

The many friends of Edward A. Sweeney, head of W. H. Wilmarth & Co., Inc., are urging him to become a candidate for the position of representative from this district this Fall. The suggestion of Mr. Sweeney's name comes from the manufacturing jewelers who desire to show him some recognition of his efforts in behalf of the jewelry clause in the tariff bill, as well as in numerous other activities in previous years. If he should consent to run there would be no doubt about his nomination and election.

The firm style of Defur & Schlosser, Wadesville, Ind., will hereafter be known as Defur & Wall, Mr. Schlosser having been succeeded by Mr. Wall.

North Attleboro.

W. G. Clark was in New York last week, in the interests of his concern.

Fred M. Cook, New York representative of Whiting & Davis, was at the factory last week.

S. H. Keinman, of Philadelphia, was in town, last week, calling on the local jewelers.

The new addition to the factory of the T. I. Smith Co., is rapidly nearing completion.

William Peckham, New York representative of the J. H. Peckham Co., was in town last week.

The H. F. Barrows Co. resumed work Monday morning, after being closed for stock taking.

Oscar Hornig returned last Friday from a business trip in the interests of the Codding & Heilborn Co.

E. B. Wilmarth, a local manufacturing jeweler, is serving on the jury now in session at Fall River.

Ex-Representative F. O. Coombs, a former manufacturing jeweler, is confined to his home on Park St. by illness.

The Plainville firms were obliged to close down last Friday night over Saturday on account of the gas mains being disconnected.

George A. Gilmore, shipping clerk for the Estate of O. M. Draper, was elected president of the Taunton Baptist Association last week.

The firms in the Sommer and Riley & French buildings are planning to close this week for a number of days in order to take account of stock.

William H. Riley has been appointed administrator of the estate of Rhoda W. Riley. The real estate is valued at $7,000 and the personal at $2,500.

John E. Tweedy, of Cheever, Tweedy & Co., had charge of the arrangements of the Café Chantant, which was given last week for the benefit of the Universalist church.

Frank Burns, who has resigned as New York representative of H. D. Merritt & Co., is to travel for Brod & Co. Robert Clampitt succeeds Mr. Burns with H. D. Merritt & Co.

A large delegation of manufacturers attended the hearing of railroad commissioners on Monday morning at Boston on the proposed change of the location of the Boston & Providence Interurban Railway.

George C. Bugbee, who for several years has been carrying on a designing and die-cutting business on East St., has become associated with Stewart M. Rhodes, Jr., and will continue business under the firm name of Bugbee & Rhodes. Mr. Rhodes was for many years head designer for Straker & Freeman.

Luke A. Curtis, who for many years was in the employ of the Earle & Prews Express Co., and who was well known and highly esteemed by the local manufacturers, died last Thursday morning. The deceased leaves a widow and one son, Henry H., of the H. H. Curtis & Co. The funeral took place Sunday afternoon.

Richardson & Trowbridge, Leominster, Mass., have been succeeded by A. A. Trowbridge.

GORHAM SILVER

The acknowledged supremacy of the Sterling Silver productions of The Gorham Company is due to long maintained superior merit. Every example possesses that appropriate form and perfect adaptability to its purpose, which add enduring satisfaction to assured intrinsic worth.

The mark  **which identifies these articles in Silver is a guarantee of standard of metal (925/1000 fine) and of excellence in design and superiority of workmanship known to be characteristic of Gorham Quality.**

These Sterling Silver productions are offered by the Gorham Company, only through jewelers, at prices which compare favorably with those asked for less well known and less meritorious wares.

ONE of the great difficulties experienced in conducting a technical trade journal is in obtaining articles upon distinctly trade topics written by men who thoroughly understand the subject about which they are talking. Unfortunately in all trades a great number of men who *know* cannot write, and the great number of the men who can write do not know the technical and trade side of the subjects thoroughly. Even those who know and can write often cannot present their subject in a readable or attractive form. It is pleasant, therefore, to obtain an article such as appears in the first page of the Horological Department upon a live subject of interest to all watchmakers and employers, put in a way that every watchmaker and employer will understand. It aims to solve a long standing problem affecting interests of the customers as well as the watchmaker and the latter's employer.

Why Pearls Should Be Bought at Home.

THE decision of the United States Circuit Court of Appeals in the Tiffany or Guggenheim pearl case, which was published in THE JEWELERS' CIRCULAR-WEEKLY last week, proved of interest both to the trade and public, as abstracts of our story were later published in the daily papers of Thursday. This decision, in effect, affirms the attitude of the lower courts and the General Appraisers in assessing drilled pearls at 10 per cent., whether or not they may have been previously matched or selected for the purpose of forming the necklace, and overrules the Government's contention that, because the pearls could be simply put on a string and made into a necklace with little care or skill on the part of the importers, a duty of 60 per cent. should be assessed upon them as if they were brought in as an article of jewelry. It is generally hoped by the trade that the question is now settled for all time, as the more broad and liberal provisions of the present tariff act give the Government even less excuse for its contention than did the old act under which the Tiffany case was decided.

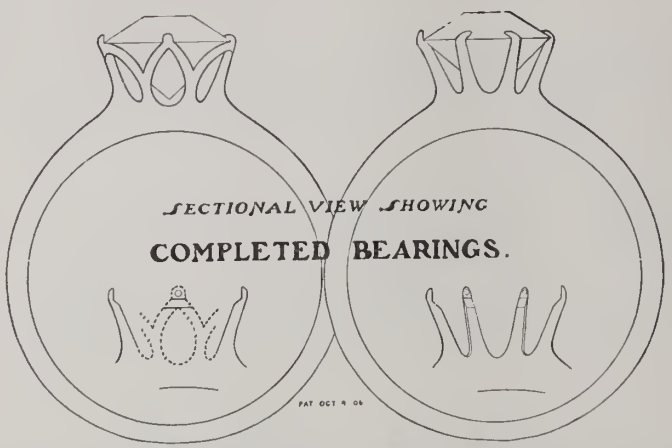
This decision serves to call the attention of all jewelers and gem dealers to the fact that they have an argument in favor of Americans purchasing pearl necklaces in this country instead of Europe, that they should not hesitate to use on all occasions. In fact, it is to the advantage of both the jeweler and his customer that the latter be clearly informed that the pearl necklaces which he buys in this country pay a duty of only 10 per cent. and not 60 per cent. when imported by the jeweler or gem dealer, whereas if they are bought abroad as a necklace by the consumer a duty of 60 per cent. will be imposed. What is more, the margin of profit charged by the jeweler in this country is much less than that charged by the foreign jeweler who deals with rich Americans, and the tourist is not only apt to get his pearl necklace cheaper here, but will get a better selection and better quality from the dealer in his own country than he would from the European, who makes capital out of the ordinary American's ignorance on the subject of gems. It is clear that, even should the customer smuggle his necklace into this country, he will pay more for it than he would if he bought it here.

As the season is approaching when thousands of Americans will go abroad for the Summer, the jeweler should lose no time in impressing these facts upon every customer whom he thinks is likely to look for bargains in pearls on the other side.

Intelligent advertising and business stagnation cannot exist together.

The Press and the Diamond Market.

THE fact that diamonds and gems are subjects of universal interest may account for the anxiety of newspapers in general to publish items on this subject whenever they get an opportunity, but it seems strange that among all the topics of general interest occasionally touched upon by the press there are few in which more misinformation is disseminated than upon those relating to jewels. Whether it is that the newspapers do not consider these matters worthy of special verification or whether they think that an incorrect story is as interesting to the readers as a correct one it is hard to determine, but experience has shown that whenever there is a chance to publish something that is not true the newspapers generally take it. This tendency is especially manifest in regard to anything that relates to the price of diamonds. The least silly report of conditions which the ordinary editor may think might affect the market is seized upon with avidity and published with large headlines; often, when facts are obtained to pad out a story these facts are distorted out of all proportion, in order to back up the statement that the reporter has started out to prove. The idea of getting the facts first and drawing the conclusions later, seems to be totally at variance with the principles applied to the average newspaper office when dealing with diamonds and gems.



This is why we have so often urged the jeweler, both for his own sake and for the sake of the trade, to be ever on the watch when any reports come up that relate to the diamond trade and see to it that his local newspaper is cautioned to be careful in dealing with the ordinary rumors or even telegraphic dispatches until they are verified. The jeweler should always be willing to give the fullest information to his local newspapers, and to do this he should keep himself informed of conditions that he may be relied on as a source of accurate information at any time the subject may come up.

The big metropolitan dailies are as great offenders as the smallest of country papers in the treatment of the subject of diamonds and gems, but fortunately, as far as New York is concerned, THE JEWELERS' CIRCULAR-WEEKLY has been able to prevent the

publication of many erroneous articles th would, to a certain extent, be disastrous t the trade. One of the latest examples this occurred about a week ago, when was learned in this office that a very larg and prominent paper was to have a b story in its Sunday supplement upon a ne "syndicate" in the diamond trade, the auth speculating upon the chance of this "synd cate" lowering the price of diamonds A investigation disclosed that the so-calle "syndicate" discovered by the paper w nothing more than an agreement of thre large European firms to cut a certain num ber of carats of mêlée per month of stones of German South Africa. The cu tors were appealed to and shown (1) that th so-called "syndicate" was not a syndica in the sense as it is used in the trade, (2 that the few thousand carats of melée whi they cut had no appreciable effect upon pric here, and (3) that the matter was o and when new had no features of news i terest.

As the article had been advertised, it to be published in some form, but as result of the strenuous objections mad THE JEWELERS' CIRCULAR-WEEKLY and t information laid before the paper, togeth with a protest lodged by an official of t Jewelers Board of Trade, the paper pu lished this article in an entirely differe form from the original, and its headin stated that the price of diamonds was g higher and the market growing str every day.

Had the article appeared in its orig form it would no doubt have caused a lar number of the buying public to hold off the purchase of diamonds, for a while least, until the true situation was borne upon them by the fact that prices continu to go upward, but in the meantime th diamond sales would have been lost to t jewelry trade.

Harrisburg, Pa.

Palmyra, just east of Harrisburg, has ganized a board of trade.

Harry L. Kramer, of this city, has open a store at Plainfield, Cumberland Coun Pa.

Prof. W. P. McBride, of this city, w called to St. Mary's, Elk County, Pa., week by the sudden illness and death of aged father, Edward McBride, a success retired jeweler of St. Mary's. Mr. McBri had been in the best of health until te days prior to his death, when he suffer an attack of grippe, which later develop into pneumonia. He was born May 1, 18 in Ireland, and was a skilled watchmak having worked at his trade in Belfast, I land, and Liverpool, England. He em grated to America in 1861 and later ca to St. Mary's, where he established himself in the jewelry business. By careful ma agement and thrift he accumulated co wealth and retired from business about years ago.

W. L. Stone, of the Gorham Co., is Europe to procure at first hand a com of sticks, canes, umbrellas and parasol novelties in umbrella and parasol handl pipes, etc., from the English, French, G man and Austrian markets.

New York Notes

A. Ferguson, of this city, is now traveling for I. W. Mark, St. Paul.

Jules Franklin, 65 Nassau St., sails on the *Mauretania* for European markets today.

Ira Barrows, of the H. F. Barrows Co., 15 Maiden Lane, sails for Europe Wednesday, April 20.

W. V. Ghislin, Chicago manager of the Gorham Co., was a caller at the local offices last week.

Wm. S. Metcalf, head of the Plainville Stock Co., called at the local offices of the concern last week.

O. D. Wormser, of Jos. Frankel's Sons, 578 Fifth Ave., will sail April 20 on the *Lusitania* for Europe.

John Davison, dealer in fine china, has moved from 12 Barclay St. to the ground floor of 14 Barclay St.

R. D. Unger, of Unger Bros., Newark, sailed on the *Adriatic* Saturday for a six weeks' business trip in Europe.

Tiffany & Co. made the medals and other trophies for the 65th Regiment athletic meet held in Buffalo last week.

F. W. Gesswein has moved from 26 John St. to 16 John St. The building at the former address is being torn down.

M. Hansen has moved from Hackettstown, N. J., to New Rochelle, N. Y., where he will continue in the jewelry business.

S. S. Mansfield, manager of the Smith, Patterson Co.'s Montreal store, returned from Europe on the *Kaiserin Augusta Victoria* recently.

Louis Aisenstein, of Aisenstein & Worobock, 22 Eldridge St., has been spending a vacation at Atlantic City, N. J., with Mr. Keinzli.

F. M. and J. L. Cobb, manufacturing jewelers, Mansfield, Mass., are about to open an office in this city with Elmer Vaselet in charge.

A card received from Louis Friedlander, of R., L. & M. Friedlander, who is at present abroad, indicates that he is now traveling in India.

C. Irving Washburn has removed his office and factory from 12 John St. to 45 John St., where he has increased facilities for carrying on his business.

Samuel E. Bamber, secretary of the Hess & Culbertson Jewelry Co., St. Louis, and Park Morris, Savannah, Ga., were among the out-of-town visitors here last week.

Ralph Dreyfus, of the Dreyfus Mfg. Co., will sail for Europe Saturday on the steamer *Kaiserin Augusta Victoria* on his annual purchasing trip. He will be gone two months, during which time he will visit the principal diamond markets.

The Hegeman Corporation has taken over the lease of Chester Billings & Sons, the Fifth Avenue jewelry firm that recently failed, at the southeast corner of Fifth Ave. and 34th St. The building's lease has 14 years to run. The annual rental is $42,500.

Lazar Peisachow, against whom a petition in bankruptcy was filed some time ago and who was later arrested on a writ of exeat order and lodged in the Ludlow St. jail, was to have had a hearing before United States Commissioner Shields Thursday but it was put over for a week.

It was decided, last week, by the Board of United States General Appraisers that coral or other stones cut but not set are dutiable at 10 per cent. and not at 60 per cent., as levied by the collector. The importers, whose names are not divulged, are represented in the proceedings by the American Express Co.

Philip H. Fretz, who is said to have been formerly engaged in the manufacture of silver plated ware in New York, died recently at his Doylestown, Pa., home at the age of 64 years. He owned several farms. He was active in church work and elder of the Presbyterian Church for over 30 years.

A meeting of the Sag Harbor, L. I., Board of Trade has been held and resolutions passed endorsing and approving the Bloch Hat Pin Co., which favors this village as a site for its factory. The village trustees, custodian of the old union school property, will be asked to hold a special meeting to lease a portion of the realty to the Block concern.

The Secretary of the Jewelers Bowling League reports that tickets are selling well for the seventh annual dinner and entertainment of the league to be held May 7, 1910, at the Broadway Central Hotel. The tickets this year are $3.50 and it is hoped by those in charge that a record breaking crowd will be on hand to make the evening a success in every way.

Morris May, 170 Broadway, has given a five years' lease of his new hotel at Asbury Park to Miss Ella H. Clement, the proprietor of the Hotel Majestic, Ocean Grove. The new hotel, which was known as the Florence-by-the-Sea, has been rechristened the Winthrop, and will be opened about June 1. It is a favorite stopping place for New York jewelers.

Lee De Forest, the inventor, got a verdict for $800 and interest and costs of $400 more from a Supreme Court jury in Justice Gerard's court last week, against Attanik E. K. Nayan, a Parisian jewelry dealer. The complaint charged that Nayan accepted two installments of $400 each on some diamonds De Forest wanted and kept the installments refusing to accept further payments.

A number of New York representatives of eastern firms are visiting the factories this week, among whom are: Herbert Mason, of Mason, Howard & Co.; William Penfold, of the firm of Leary & Penfold; George Heywood, of the Horton, Angell Co.; George S. Semple, of the W. & S. Blackinton Co.; Fred. M. Cook, of Whiting & Davis Co., and George Roberts, of the Moore Mfg. Co.

The old building at 26 John St. is being torn down and a new six-story fireproof structure with white marble front will be erected on the site. S. S. Terry will be the owner of the new structure, which is being built for him by Richard Deeves & Co. A representative of Wm. A. White & Son, who are agents for the building, said last week that it would be ready for occupancy about October 1. The building will be completely equipped with every modern convenience.

Collectors of antique silver were interested in the sale at the Fifth Ave. auction room last Wednesday, to close out the estate of the late Supreme Court Justice Charles Truax. The collection contained many rare specimens of antique English, German and Dutch silverware, of the 15th, 16th and 17th centuries, as well as specimens of the early American silversmiths' art, Chinese and European porcelains, and a number of bronzes were also included in the collection.

The committee for the prevention and cure of tuberculosis of the Diamond Workers Protective Union of America will give a grand fair in Prospect Hall, Brooklyn, on Friday evening. The hall will be decorated especially for the evening and will be arranged with booths at which different things will be sold. A musical concert will also be provided during the evening. The proceeds of the fair will be applied to the fund for the prevention and cure of tuberculosis among members of the organization or their families. The committee in charge of the fair are: Messrs. Groenman, Querido and Prins.

A. M. Laird, a western pearl dealer, whose home is in Prairie du Chien, Wis., was a visitor in this town last week. He reports that a few of the pearl fishing camps along the western rivers have already opened but that the full season will not be under headway until about the middle of May. He said that a few years ago the mussel shells were piled up along the Mississippi River in large heaps but that now the supply has all been used up and that pearlers who formerly paid no attention to the shells will this year save them for sale. Mussel shells are in great demand by pearl button manufacturers at the present time and the price ranges about $24 a ton.

On the customs declaration of Isaac Weeisberg, a passenger on the Cunarder *Mauretania* that arrived Friday, was the statement that he had a package worth $15 assigned to him by a friend. He carried it in his hand as he went down the gangplank. The customs inspectors insisted on seeing it and when it was opened found a watch about the size of a quarter, made of platinum studded with diamonds. The appraisers placed a valuation of $1,500 on the watch and the duty would be $900. Weisberg was advised to have the goods sent to the Public Stores and to notify his friend. This he said he would do. The goods are not now liable to seizure under the customs regulations, as they were duly declared by a passenger.

The Board of United States General Appraisers decided, last week, that table forks made of aluminum are dutiable at the rate of 15 per cent. ad valorem, and 14 cents, each, under the Payne-Aldrich tariff law, as forks with handles of metals other than iron or steel. This decision affirmed the assessment made by the Collector of Customs. C. M. Thurnauer & Bro., the importers, claimed the articles were dutiable at 45 per cent. ad valorem, as manufactures of metal not specially provided for, or table forks at rates lower than that assessed. The claim urged by the importers was that the provision under which goods were classified covered only such articles as have attached handles, and that these one-piece forks are in fact without handles.

SAFE DEPOSIT VAULTS

New York Notes.

(Continued from page 87.)

General Appraiser Fischer finds that the forks have handles of metal other than iron or steel and overrules the protest.

Lothair Rich has just started in business at 1 W. 42d St.

D. W. Camp, Waverly, N. Y., has moved to Wyalusing, Pa.

Joseph Wasserstrom has succeeded Wm. Taub at 31 Ave. B.

Louden & Willing, Williamson, N. Y., has been succeeded by C. S. Willing

L. W. Sweet & Co., 37 Maiden Lane, will move to 170 Broadway, about May 1

Robert Schwerter, 52 Fulton St., is offering creditors a 20 per cent. settlement.

Manuel Juster, 2280 Eighth Ave., has settled with creditors at 50 cents on the dollar.

The engagement of Miss Dora Elkin, of this city, to Edwin P. Loebl, 53 Maiden Lane, is announced.

Jacob Rosenberg, 6 Maiden Lane, sailed Saturday on the *Kaiserin Auguste Victoria*. He will visit the European diamond markets.

M. Z. Jones, formerly residing in Atchison, Kans., has sold his store in Randolph, Kns., and will move back to the former place.

W. L. Lehne, for several years a jeweler of Decatur, Ind., has gone to Tiffin, O. He was recently married at the latter place to Miss B. Heilman.

The Columbian Optical Co. is about to open a store at 404 River-side Ave., Spokane, Wash. One-half of the premises will be occupied by M. M. Cohen, jeweler.

Wm. M. Anderson, Jr., with Carter, Howe & Co., was a guest Sunday of Percy Turner on board the giant Cunader *Mauretania*. Mr. Turner is the son of the commander of the Cunard liner.

W. L. Spear, McMechen, W. Va., has moved to the first floor of the building formerly occupied by the McMeehen Bank In his new quarters Mr. Spear has larger space and much better facilities.

Marcus Goldsmid, representing the L. Engel Co., Newark, N. J., and 565 Broadway, Manhattan, was operated on at Dr. Bull's Hospital, Monday, for hernia. He was compelled to cut short his western trip because of the operation.

Edwin S. Strauss, of Jacob Strauss & Sons, 14 Maiden Lane, has been severely sick with pleurisy for the last three weeks. While he is improving slowly, he is not expected to leave his room at the Hotel Hargrave, on W. 72d St., for three or four weeks.

Among the recent out-of-town visitors were: D. A. Ryland, Lynchburg, Va.; Mr. Kahl, of the F. A. Robbins Co., Pittsfield, Mass.; Mr. Dekin, of the F. L. Wilson Co., Danbury, Conn.; C. Wendell, of Jules Wendell & Son, Oswego, N. Y.; O. D. Rudd, Ilion, N. Y.; Mrs. M. Langner, Meriden, Conn.; Mr. Bond, of Lux, Bond & Lux, Hartford, Conn.; Mr. Quintard, of Quintard Bros., Poughkeepsie, N. Y.; H. J. Farrington, of the Farrington Mfg. Co., Roxbury, Mass.; A. R. Van Dett, Bennington, Vt.

A man who reached this city on the *Marcia Castle* of the Ward line Friday afternoon had in his possession jewelry valued at about $350 which he did not declare, according to the customs authorities. When asked about the jewelry he said that he had purchased it in the United States. The inspectors became suspicious and searched him and were successful, they say, in finding a sapphire brooch. Because he could not give a satisfactory explanation as to how he came in possession of the brooch it was seized.

Harry Cohan, retired diamond broker, 40 years old, committed suicide last Thursday by jumping from the five-story window of his apartment at 546 Lenox Ave. He had been suffering from locomotor ataxia for several years and had not been engaged in active business for five or six years. The man fell to the basement, a distance of six stories. Dr. Elliot, of the Harlem Hospital, said that death was instantaneous. Mr. Cohan lived with his mother, a sister and two brothers. He was unmarried.

James Augustus Freeman Knowlton, who was for 10 years head of the engraving department of the Whiting Mfg. Co., died Sunday, April 3, at his home, 82 Cumberland St., Brooklyn, of apoplexy. He was a native of Providence, R. I. He was a member of Fulton Council, Royal Arcanum, and is survived by his widow, nee Catherine V. Taylor, and son, Clifford Freeman Knowlton. The funeral services Tuesday night of last week, were conducted by the Rev. Dr. William J. Thompson, and the interment was in Greenwood Cemetery.

A member of a large banking and brokerage house in this city will have to pay a duty of 45 per cent. on four antique braeelets made in artistic bronze in the style of the 18th century. Collector Loeb returned the ornaments for duty, but it was contended before the Board of General Appraisers that the goods were exempt. The owner paid the duty, however, and took possession of the braeelets and then filed a protest with the board, relying on the claim that the articles are free of duty under Par. 717 for works in bronze more than 100 years old The decision overruled the protest.

The Jewelers Security Alliance has received a report of the robbery of Turner Bros.' store, 2106 W. Madison St., Chicago, by a sneak thief who visited the store ostensively to buy a diamond ring. He was shown one which seemed to suit him and he put it on his finger and at the same time had another in his hand. He made a dash for the door and though the jeweler followed, firing two shots at him, he escaped. The man is described as being about 25 years old, 5 feet 8 inches high and weighs about 135 pounds. He had dark hair, a sallow complexion and was smooth shaven. The rings were valued at about $250.

Nearly one hundred of the skilled silversmiths, employes of the Whiting Mfg. Co., which has just completed its $65,000 plant on Bishop Ave., Bridgeport, arrived with their families in Bridgeport several days ago and fully that many more will arrive there the early part of next week. By the middle of the month it is expected that the entire force numbering nearly four hundred hands will be located in Bridgeport. The concern, which is one of the largest silver concerns in the country, was formerly located in New York and employs skilled in high salaried mechanics. The acquisition to Bridgeport is considered a valuable one, inasmuch as it brings a first-class lot of skilled men to the town.

Another meeting of the creditors of Samuel Frackman, the jeweler at 51 Maiden Lane, against whom bankruptcy proceedings were started when he reported that he had lost $50,000 worth of diamonds in Chicago on his last trip west, was held Monday afternoon, at the rooms of the Jewelers' Board of Trade. The meeting lasted about two hours, during which time a number of creditors expressed their views and what they thought the best policy to pursue. The committee, which had previously been appointed to represent the creditors, resigned and the whole matter was again put directly in the hands of the creditors. It was, after much discussion, the majority opinion that an offer of 40 per cent. net be accepted if that settlement can be arranged.

The Board of United States General Appraisers held last week that under the provision of the tariff of 1909 bort, a variety of cut diamond, is entitled to free entry. The contention was raised by the General Electric Co. and General Appraiser Sharretts, who writes the decision for the board, sustains it in his decision. He points out that when the early decisions regarding diamonds for industrial purposes was handed down by the board the courts upheld the decisions for free entry. The board is convinced that the diamonds are not intended by Congress to be taxable at 10 per cent., as alleged by the Government. The decision said that if Congress had intended that diamonds for industrial purposes were to be regarded in the same catagory with stones for jewelry and other decorative purposes, they would have been provided for specifically in the new law with a corresponding duty. As the new law stands the board believes that the diamonds intended for drills and similar uses are free of duty.

News Gleanings.

James P. Walton, Durand, Mich., was a visitor in Detroit, last week.

Frederick Job, Wilkes-Barre, Pa., has opened a branch store at 24 Public Sq.

J. C. Mulford, formerly of Genesee, Pa., has just opened a store in Belmont, N. Y.

John T. Shea, Creston, Ia., and Miss V. Larson were recently united in matrimony, at the home of the bride.

Owing to ill health M. N. Holty has sold his interest in the firm of Holty & Swenson, Menasha, Wis., to his partner, O. S. Swenson.

W. T. Kid, Greensboro, N. C., has purchased the business of J. A. Pitcr, Union, S. C., and will move to the latter place at once.

George H. Griffin, of the Geo. H. Griffin Co., Portland, Me., is about to retire after having conducted business at that place for 20 years.

Thieves entered the store of the Leffler Jewelry Co., Gainesville, Tex., recently and stole about $1,200 worth of diamonds. There is no clue.

NOW READY

The Supplement to the Second Edition of

Trade-Marks of the Jewelry and Kindred Trades

This book with its Supplement now contains

All the known trade-marks of American manufacturers, over 5,000 in number, comprehensively classified and indexed, and, in addition, many trade-marks of English silversmiths. The Hall Marks of England are illustrated and described and historically sketched.

The trade-mark laws of the United States and rules of the Patent Office governing the registration of trade-marks.

The National Stamping Law.

State Laws, including the proposed State Stamping Law, and a list of the States in which this law has been adopted.

Every jeweler has requests for the duplication of articles or for other reasons finds it necessary to determine their origin. This book enables him to identify the maker and thus aids him in effecting sales and adds to his reputation as one well versed in his business.

Price of the Complete Book with Supplement bound in, $3.00

(The Supplement will be mailed to all previous purchasers of the second edition with our compliments.)

Send in your order on this coupon.

THE JEWELERS' CIRCULAR PUBLISHING COMPANY

No. 11 John Street, NEW YORK CITY

Newark.

J. C. Dahm, jeweler of 46 Oliver St., has moved to 276 New Jersey Railroad Ave.

The Otto Schaubacher Co. has been incorporated with a capital of $50,000 as manufacturing jewelers.

Ralph Wakefield has gone to the middle west on a trip in the interests of Burstow, Kollmar & Co., 18 Columbia St.

Smith & Sanderson have started in business as manufacturing jewelers, 12 Greene St. The members of the firm are: W. P. Smith and G. W. Sanderson.

Jos. Seideman, who has been connected with the trade for many years, recently started in business as a dealer in diamonds, watches and jewelry at 169 Halsey St.

H. I. Schneider, manufacturer of gold and platinum chains and mesh bags, has just moved from room 612 to room 619 in the Richardson building. In the new quarters he will have more room and will install new machinery and employ more help.

Notice is given that the partnership between Henry G. Lefort and Jos. E. Stegner, under the firm-name of the Newark Cut Glass Co., has been dissolved by mutual consent. All debts owing to the partnership are to be received by Jos. E. Stegner and all demands on the partnership are to be presented to him for payment.

J. J. Kraus, of the Steeber-Krauss Co., Hamilton St., has just left for a trip through the upper part of New York State. This company, which was recently delayed in its work because of a big fire in the building which it occupies, is now working again, repairs having been made to the building and the insurance claims having been settled.

Arthur H. Moore, 701 Parker St., was elected an active member of the New Jersey Automobile and Motor Club by the board of trustees, last week. About 60 others from Newark and surrounding places were elected to membership at the same time. Sidney T. Holt, 739 Broad St., was transferred from the associate to the active membership list.

Among the members of Salaam Temple, Ancient and Arabic Order of the Mystic Shrine, Newark, who left last week on the annual pilgrimage, which this year is to New Orleans, were Philip Krimke and wife. The party left New York last Thursday on the steamer *City of Atlanta* of the Savannah Line, and will leave New Orleans on April 15, arriving in New York April 19.

Charles Thevenet, an employe of F. A. Schlosstein & Co., 93 Lafayette St., was hit by a baseball near the factory as he was returning from lunch on Friday, and so badly injured that it was necessary to take him home in a cab. The ball struck the bridge of his nose. The boys who were playing ball were employed by another jewelry manufacturing concern in the same building.

Frederick H. Larter, head of the jewelry manufacturing concern of Larter & Sons, 88 Parkhurst St., was elected as one of the laymen members of the Board of Trustees of the Centenary Fund and Preachers' Aid Society of the Methodist Episcopal Church, Newark Conference, at the annual meeting of the conference held in the Central Methodist Episcopal Church, in this city, last week. His term expires in 1913.

The Empire Jewelry Mfg. Co. has just moved from 46 Oliver St. into the factory at 18 Columbia St., which was vacated a short time ago by Schmitz, Moore & Co. It is expected that the plant will be in running order in a few days. The company has twice the room that it had in its old quarters. Robert S. Garter, 35 Maiden Lane, New York City, has recently entered the firm and will have charge of the sales department.

William Smith & Co., whose New York office is at 9 Maiden Lane, have just removed their factory from 61 Park St., Providence, R. I., to the new Reusch building, 407 Mulberry St., Newark. While for the present the concern will continue to manufacture its regular line of gold chains it is probable that later it may manufacture a general line of jewelry. About 60 hands will be employed at first, this number being increased from time to time. Walter J. Smith, who had charge of the factory at Providence, will continue to have charge of the factory end in this city.

M. Hagerstrom, who recently withdrew from the Hagerstrom Co., 276 New Jersey Railroad Ave., of which he was founder and president, in company with Vernon Chapman, has just begun business at 85 Columbia St., under the firm name of Hagerstrom & Parker. They will make a line of 14-karat gold and platinum novelties, and will sell to the trade. The concern is soon to be incorporated and will begin business with $10,000. Mr. Hagerstrom has had a wide experience in the jewelry business. He worked at the bench for 18 years, and was the representative of the company, from which he has just withdrawn, in the west. Mr. Chapman was formerly the eastern representative of the Osman-Parker Mfg. Co. Both Mr. Hagerstrom and Mr. Chapman will sell on the road, although Mr. Hagerstrom will have charge of the inside work assisted by Charles Klein, formerly superintendent of the Hagerstrom Co. The company will begin with 12 hands. It will not be ready to put its goods on the market until next August.

A company of friends of A. Beucke, superintendent of the Crescent Watch Case Co., and his wife gathered at the New Jersey Automobile and Motor Club last Thursday evening to celebrate the silver wedding anniversary of Mr. and Mrs. Beucke. The gathering included about 60 people, and was most enjoyable in every way. The table was artistically and uniquely arranged, having in the center a miniature lake. Mr. and Mrs. Beucke were the recipients of congratulations from the numerous friends who were present, and they also received many beautiful gifts. After the dinner several old friends of the couple spoke informally, offering congratulations and best wishes for the future. Those present included Mr. and Mrs. Beucke, Miss Adele Beucke, Mr. and Mrs. Irving Smith, Mr. and Mrs. Chas. F. Brinck, Mr. and Mrs. Harry Flinn, Mr. and Mrs. Charles Nobs, Jr., Mr. and Mrs. Jacob Fromme, Mr. and Mrs. Arthur Cobb, Mr. and Mrs. Chas. A. Haney, Miss Leonie Nobs, Mr. and Mrs. Leo Wormser, Mr. and Mrs. Wm. Allison, Andrew Mehler, Joseph Mehler, Miss Mehler, Dr. B. Du Bois, Miss J. Du Bois, Miss E. Bond, Mr. and Mrs. Wm. Horr, C. W. Horr, Mr. and Mrs. Le Messena, Mr. and Mrs. F. Clarkson, Mr. and Mrs. P. Weber, W. Stevens, H. Beldon, Mr. and Mrs. J. Quimby, Rugust Beucke, Jr.

Connecticut.

W. T. Woodruff, president of the Seth Thomas Clock Co., Thomaston, has just returned from South Carolina.

At the annual meeting of the International Silver Co.'s directors in Meriden, April 8, the old officers were re-elected.

The E. Ingraham Co., Bristol, on Saturday, announced that it would operate its factory until further notice five days per week.

W. R. Nash, traveling representative with the New England Watch Co., Waterbury, left, April 5, on a three months' trip through the west.

E. J. Wallace recently transferred to the R. Wallace & Sons Mfg. Co., Wallingford, 29 acres of land in the district known as Cook Hill.

Some of the departments of factory "L," International Silver Co., Wallingford, are being operated 12 hours per day in order to keep up with the work of filling orders.

The Scoville Mfg. Co., Waterbury, will soon erect a new five-story brick factory, 54 by 295 feet. The plans of expansion also call for a four-story brick structure, 29 by 50 feet.

Roy T. Marihew, for some time in the employ of the Waterbury Clock Co., Waterbury, died recently at his home at that place, aged 33 years. He is survived by a widow and two children.

Plans have been completed for a new factory to be erected by the Waterbury Clock Co., Waterbury. The structure will be of brick, five stories high, and 41 by 154 feet. It will have a tar and gravel roof.

The Wallingford Co., Inc., Wallingford, has contracted for the addition of a four-story structure, 30 by 40 feet. The steadily increasing business of the concern demands the building of the addition at once. The contract was awarded last week.

The Warner Silver Co., Bridgeport, has filed a certificate of incorporation in the office of the State secretary. The concern will manufacture silver-plated ware. The capital is $5,000 and the business will be started with $2,000. The incorporators are Louis Weidlich, H. C. Weidlich and Arthur M. Comley.

St. Paul.

Max Mark has returned from his trip to South Dakota.

I. Vehon left last Friday for a business trip through the northern part of the State.

Arthur Cohen, traveler for Jacob S. Cohen Co., has returned from his Coast trip.

A new store has been opened at Oxford, Wis., by Fred Kline, Westfield, Wis. The new store will be conducted as a branch establishment, and will be under the personal charge of either Mr. Kline or his son.

Successful Policy for 50 Years

DUEBER **ILLINOIS**

¶ Also a complete line of Dueber-Hampden, Elgin, Hamilton and Illinois movements. In short, we fill orders for any kind of American Movements or Cases.

Diamonds and Diamond Jewelry, Silverware, Cut Glass and Materials. Selection packages to responsible jewelers. Prompt and accommodating service. We do not sell at retail.

WE ARE DIRECT IMPORTERS OF DIAMONDS

D. C. PERCIVAL & CO., Inc.

373 Washington St., BOSTON, MASS.

Boston.

The Waltham Watch Co.'s plant will shut down to-day for a short time.

F. G Gray, Rochester, N H., optician, is adding a line of jewelry and clocks to his stock.

A. T. Maynard, of Maynard & Potter, has been at Hot Springs, Va., for the past two weeks

Edward E. Hardy, of D. C. Percival & Co., has ben in New York on business during the past week.

C. S. Harrison, formerly with Miller Bros., Cambridge, has started in business at 3 Central Sq., in that city.

John Hall, of the New York office of Joseph Fahys & Co., was at the Boston office of the company the past week.

A. Paul & Co.'s quarters in the Jewelers' building have been undergoing a thorough renovating and redecorating during the past week.

Le Roy Nichols, salesman for the Smith Patterson Co., will leave Boston shortly to locate in the State of Washington, going to Seattle first.

Swap & Herbst have succeeded A. G Farnham, retailer, at 569 Essex St., Lawrence, Mass., and Mr. Farnham remains with them as watchmaker.

C. H. Singleton, of Adams & Singleton, has returned from a six weeks' trip west, visiting the principal cities between Boston and Denver, and booking good orders.

H. Rosenberg, formerly in the Waltham Watch Co.'s adjusting department at the Waltham factory for a number of years, is now with Kettell & Blake, of this city.

E. A. Doyle, of the neighboring city of Lynn, is having his sloop yacht remodeled and refitted with schooner rig, preparatory to putting it in commission for the coming season.

William A. Darling, watchmaker for C W. Johonnot, and secretary of the New England Watchmakers' Association, has been ill during the past week, but is convalescing.

J. F. Nelson, formerly of the firm of Nelson Bros., prominent Chelsea retail jewelers, has just returned from a Winter hunting and recreation trip to Indiana River, Fla.

W. B. Tilton, traveler for D. C. Percival & Co., who recently returned from a trip through western New England and New York State, reports Spring business good in his territory. He starts out again this week.

The United Optical Co., Webster, Mass., begins its second year in business there with the factory running night and day to fill orders in hand, and is installing additional machinery. The concern makes eyeglass frames.

Edward B. Cook, treasurer of the Woodman-Cook Co., who has been ill for a short period, is able to return to business again. Mr. Cook gives his personal supervision to the production of the company's goods at the plant in Portland.

The April meeting of the New England Watchmakers' Association was held last evening, and the exhibits entered for the prize trophy offered for best original work were shown. At the May meeting the subject for consideration will be "Watch Oils."

A piece of a boulder weighing 10 pounds was hurled by a blast nearby through the plate-glass window of the jewlery store of C M. Howard, of Milton, last Wednesday, and landed in a tray of watches in the show case, narrowly missing the proprietor in its flight, and causing a damage of about $300

Alfred E. Myers and Edward E. Franks, heretofore in business at 11 Hanover St., as Myers & Franks, dissolved partnership April 2, and the business will be continued by Alfred E. Myers alone. Mr. Franks is taking a rest for the present from business before making definite plans for the future.

Victor I Hyde, salesman, with the Shreve, Crump & Low Co., is prominent in amateur theatricals in his home city of Medford, and took a leading part in a drama given there by local talent, last week. R. Stanley Sanderson, of the same concern, has returned from a business trip to New York

The police of the nearby city of Malden are looking for an owner for three watches and several rings, chains and bracelets that were found in a woodland tract close to his home by a small boy a few days ago. It is thought that the jewelry, which was in a cloth bag, is loot hidden in the woods by amateur burglars.

Forrest Miller, who had been an employe of the Waltham Watch Co. in the factory for 45 years, died April 8 at his home in that city. Mr. Miller was prominent in Masonic and other orders, had served three terms in the Waltham Board of Aldermen and was widely known in the watch city. He was born in Boston 71 years ago.

The Massachusetts Optical Society's optometry bill, which recently received the approval of the health committee of the Legislature, is now under consideration by the Ways and Means Committee, in order that financial provision for the registration feature may be made, and a hearing on this phase of the matter will be given April 14 at the State House in this city..

A. C. Balcom, formerly of Weymouth, N. S., has entered the employ of Wilson Bros. & Co., as salesman, and Thomas J. Fagan, formerly with E. A. Cowan, is now a watchmaker for the Wilsons. President John W. Wilson states that the company's business for the first quarter of 1910 is 125 per cent. ahead of their record for the first quarter of last year, and attributes this gratifying gain to a campaign of local advertising.

Andrew J. Logan, one of the oldest employes at the Waltham Watch Co.'s factory, died April 1 after a week's illness from pneumonia. Mr. Logan and his brother, John, several years ago devised a method of tempering watch springs, which they patented. It was adopted by the Waltham Watch Co., and Mr. Logan received a royalty on the springs thus manufactured by the company. He was 76 years of age and had worked for the company 20 years.

Buyers in town during the past week include: W. K. Abbott, Winchendon; W. R. Magee, Fall River; J. P. Farrington, Kingston; F. H. Jessup, Wareham; J. F. Osborn, Haverhill; J. B. Hill, Beverly; H. P. N. Dahl, Maynard; H. S. Hewett, Brockton; C. F. Pettengill, Quincy; B. D. Loring, Plymouth; J. H. Jacques, Haverhill; John Neilson, Weymouth; Hollis S. Howe, Concord; W. C. Smith, Haverhill, Mass.; Joseph Geoffrion, Manchester; Percy Safford, Rochester; O. H. Sleeper, Exeter, N. H.

Millar & Weltch, opticians, 38 West St., are obliged to seek new quarters temporarily, as the building in which they are located is to be torn down after July 1. The firm first occupied its present store when the building was erected 40 years ago, and expects to return to the same location when the new structure is completed, about a year hence. Millar & Weltch, as successors of the original firm of Widdifield & Co., founded 90 years ago, claim the prestige of being the oldest continuously existent house in Boston in the optical line.

The Maximus Club, an organization of the retail salesmen of the Smith Patterson Co., had their annual banquet, last Thursday evening, at the Boston City Club. The guests of the evening were Joseph C. Bachelder and Henry L. Reynolds of the company. Officers were re-elected as follows. President, Frank A. Gendreau; secretary and treasurer, William R. Tuttle. Other participants were Foster F. Tabb, Walter J. Harrington, Albert P. McMullin, Warren Smith, Joseph D. Manning, Henry W Becker, Edwin E. Lyons, Le Roy M. Nichols, George S. Saunders, James H. Goss and Fred Furbush. There were songs in chorus by the party and recitations by President Gendreau and Mr. Tabb. A theatre party followed the banquet.

Traveling salesman visiting Boston during the week included: Charles L. Power, Power & Allen; Mr. Munroe, R. G. Munroe & Co.; Newton Eltinge, Jung & Klitz. Fred Hoyt, Hoyt, Obrig & Geiger Co.; Wm Kirtland, Howard & Cockshaw; Howard Whyte and Max Moser, Moser & Whyte Co.; Archie Graham, Louis Strasburger's Sons & Co.; I. Lassner, Lassner & Anderson Co.; Henry Dellerson, H. E. Oppenheimer; Frank E. Buffum, J. A. & S. W Granberry; Parker Ford, Ford & Carpenter; Benjamin F. Griscom, Bippart, Griscom & Osborn; George W. Reed, Larter & Sons; Fred Barry, L. Stern & Co.; Daniel Childs, Warren & Williams; Louis Kurtz, Cheever, Tweedy & Co.; Louis Glick, Hammel, Riglander & Co.; Frank Waite, G. K. Webster Co.; S. H. Ashe, Roy Watch Case Co.; George A. Briggs, W. L. Sexton & Co.; L. F. Clark, Cory, Clark & Noon; Charles Dunbar, Samuel Lawson; F. C. Staudinger, Charles Weller & Co.; D. Tomkins, Mabie, Todd & Co.; Charles Arena, La Secla, Fried & Co.; John R. Scofield, T. W. Adams & Co.; W. J. Harber, Enos Richardson & Co.; John J. Heiser, Geoffroy-Heiser Co.; A T. Sansbury, Sansbury & Nellis; S. A Lynch, William B. Kerr Co.; Percy Hine, Luthy & Hine; H. W Anderson, Bride & Tinckler; Mr Perley, Perley Bros.

A plan to present the new battleship *Utah* with a silver service at the hands of the school children of Utah has been indorsed by Gov. William Spry and a committee of citizens of Utah. Contributions not exceeding 20 cents and as low as one cent will be invited from the 105,000 pupils

NEVER before in the history of our Company has there been such a large demand for Railroad grade movements of our manufacture.

The reputation they have established among Railroad Men as being the "Supreme Railroad Watch" is due entirely to the careful attention given to every detail of their manufacture.

We suggest the advisability of having in stock a few of each of these grades in order to meet the demand that is constantly increasing for them.

Vol. LX. CHICAGO, WEDNESDAY, APRIL 13, 1910. No. 11.

Chicago Notes.

E. Noel is taking a vacation at Iowa City.

M. G. Shirk has discontinued his business at Spearfish, S. Dak.

E. A. Dayton, of E. A. Dayton & Co., is now making a trip west and northwest.

E. E. Swadner, with F. A Hardy & Co., returns, this week, from a trip to New York.

Jacob Lund, 3820 S. State St., was held up and robbed of $60 on the morning of April 3.

Geo. C. Gubbins, traveler for the Illinois Watch Case Co., has returned from an eastern trip.

J. A. Hardy, secretary of the Towle Mfg. Co., is visiting the Chicago office of the company.

Norbert Gunzburger, with L. & M. Kahn & Co., is still at St. Luke's Hospital and is reported doing well.

E. H. Abbott, traveler from the Chicago office of the Queen City Silver Co., is making a Wisconsin trip.

Ralph Smalley, representative of the Jas. E. Blake Co in Chicago, is making a two weeks' trip in Wisconsin.

G. W. Cureton, of the Newall Mfg Co., Providence and Newark, returns, this week, from a trip to the factories.

B. C. Allen, of Benj. Allen & Co., has returned, with his family, from a six weeks' stay at Coronado Beach, Cal.

Geo. A. Armstrong, Chicago representative for the Paye & Baker Mfg. Co., is making a northern trip this week.

F. W. Whitman, traveler from the Chicago office of the Oneida Community, Ltd., has returned from a Wisconsin trip.

A new concern will be started by some of the old employes of Lapp & Flershem, but the details have not been arranged.

Edward Simons, of Simons, Bro. & Co., Philadelphia, spent a few days here, last week, with his firm's Chicago representative.

Wm. Laiblin, of the Chicago office of R. Wallace & Sons Mfg. Co., is attending the hotel men's convention at Los Angeles, Cal.

Homer Bouchard, representing the Eisenstadt Mfg. Co., St. Louis, Mo., is here for a five weeks' stay in the interests of that concern.

Anton Kuckuk and wife, Shawano, Wis., stopped over here, recently, on the way home from a pleasure trip to Florida and southern points.

John S. Brande, Chicago representative for the Keller Jewelry Mfg. Co., returns, this week, from a trip to Wisconsin and Minnesota points.

F. M. Lunt, manager of the Chicago office of the Towle Mfg. Co., is visiting the western trade with O. F. Samuelson, traveler for that territory

W. R. Cooper, of S. H. Clausin & Co., Minneapolis, stopped over here last week on his way to attend the big Shriner's meeting at New Orleans.

N. F. Kozlow, of the Chicago office of the Wm. Bens Co., is making an eastern trip this week. Henry Lederer, Providence, R. I., will make the same trip.

Word has been received from Chas. J. Jacobs, who has been at Mt. Clemens, Mich., for the past few weeks on account of rheumatism, that he is now slowly improving.

The Taylor Instrument Co., Rochester, N. Y., have moved its Chicago store, which is in charge of J. A. Sutherland, from 119 Lake St. to room 705 Heyworth building.

Louis Mannheimer & Bro. recently bought the Lapp & Flershem stock of solid and filled case watches from the Bauman Jewelry Co. The cost value of the stock was put at $80,000.

H. E. Cobb, Chicago manager for the Daggett & Clap Co., Attleboro; W. A. Fay, with the Potter & Bullinton Co., Providence, and Frank Whiting, of the Whiting & Davis Co., Plainfield, Mass., are all visiting their respective factories.

The recent report that Edward Emrath had filed a petition in bankruptcy proved to be untrue. Instead, it is said Mr. Emrath has decided to seek a settlement with his creditors covering a period of three years. His proposition is to give his creditors a mortgage on his fixtures and tools and his real estate, and continue business and pay his creditors small amounts from time to time. This is only a tentative proposal, and has been taken under consideration by several of his largest creditors.

Judge Whitaker, in Probate Court recently, rendered his decision in the claim of Charles Lauer, an Indianapolis jeweler, against the estate of the late William Helman, allowing the firm $214.86 worth of jewelry which it was claimed Helman had on memorandum. Deducting this amount from the original invoices will leave $1,636.79, the invoice value of the estate after the Lauer allowance. Nothing remains now but to sell the remaining stock and pay the creditors whose claims have been filed with the administrator. It is believed the estate is solvent.

Cleveland.

Several trade excursions are on the tapis for May and June, and these are bound to be prolific to the trade.

T. H. Park, a Mantua jeweler, contemplates retiring from business temporarily and recuperating in Colorado.

W. J. Davies, with the Sigler Bros. Co., has gone to New Orleans to attend the annual conclave of the Shriners, he being a member of Al Koran Temple.

S. Deutsch & Son, who formerly conducted a jewelry store at 25 Colonial Arcade, and recently made an assignment, have disposed of their stock to the May Co.

George W. Scribner, of the Scribner & Loehr Co., accompanied by his wife, went to Pittsburg, Friday, April 8, for a few days' sojourn, business and pleasure being combined.

Many of the retail merchants as well as 50 representatives of the local wholesale houses are making specific arrangements to attend the retail jewelers' convention to be held at Columbus, May 2, 3 and 4.

Out-of-town jewelers here last week buying stock included: Benjamin Mosley, Willoughby; A. R. Kimpton, Oberlin; Archie McDougall, Winnipeg; B. H. Broer, Toledo; J. C. Dwyer, Newcastle, Pa.; L. J. Goddard, Ravenna; W. H. Green, Ashtabula, and M. D. Johns, Akron.

W. H. Kennon, Frank Mallet and A. Elborgen, of the Sigler Bros. Co. traveling brigade, are in active training, practicing their most winning smiles and conclusive salesmenship methods, preparatory to a road campaign in the near future. This trio is hard to beat on the road.

Traveling representatives who called on the Cleveland trade the past week included: Harry Osborne, R. Wallace & Sons Mfg. Co., Wallingford, Conn.; J. H. Cragin, Oneida Community, Ltd.; Chris. Morgan, Rogers & Bro.; A. S. Lee, E. Howard Watch Works; H. W. Hedge, New York Standard Watch Works.

Raymond Jacobs, who last August left his position as clerk with Barr & Willis, at Huntington, N. Y., taking with him diamonds valued at about $175 and $125 in cash, has been taken into custody at Bayside and brought back to Huntington to stand trial.

BUY IN KANSAS CITY

THE LOGICAL MARKET FOR THE WEST & SOUTH WEST

GOOD—BETTER—BEST

Good Service, BETTER Stocks than elsewhere and the Best the Market affords is the watch-word of Kansas City's wholesale jewelers and manufacturers, who fill orders accurately and ship promptly. Tell us your wants.

Selection Package on Request

Columbus, O.

The Chamber of Commerce will be asked this week to assist in another attempt to organize Columbus jewelers, principally for the purpose of entertainment of jewelers who will visit the State convention here early in May.

The wife of Victor Staudt, of Miller & Staudt, 232 N. High St., was surprised last week by having returned to her $25 which was stolen from her four or five years ago while she was employed at the City National Bank. She hid $25 under the rafters in an attic and a painter at work on the house stole it. This painter was converted at revival meetings recently held here by a Salvation Army woman, and sent the money back to the bank for "Miss Harrison," who is now Mrs. Staudt.

A negro preacher, who was also a messenger at the Market Exchange National Bank, was arrested last week by Patrolman Gump as he was leaving Frank B. Ross' jewelry store in Long St. and was identified as the man who stole a diamond ring from L. W. Lewis recently, while inspecting rings under pretense of making a purchase. A search of his home revealed about $500 worth of jewelry secreted in a false bottom in a dresser drawer. Most of this had been stolen from a window of the Edward C. Voeller store. The prisoner said he found this in a sack in an alley. He was bound over to await action by the grand jury.

Six indictments were returned against former State and county officials and two business men as a result of the grand jury investigation before which F. F. Bonnet, Bancroft Bros., Goodman Bros. and Harry J. Hemberger were called to testify. It is alleged that almost State wide scandal will result from an investigation of which these indictments are just the beginning and that articles of jewelry, furniture and many other things of value were given to county officials as presents by a stationery firm, bills being padded in order to pay for the presents. The persons from whom the presents were purchased are perfectly innocent, of course, as they made the sales in the regular course of business without knowing or caring for what purpose the purchases were to be used.

It behooves the opticians and the jeweler-opticians of Ohio to do some quick work if they expect to have an optometry bill passed at the present session of the Ohio legislature. Adjournment *sine die* is liable to come at any time after the passage of the final appropriation bill, and this has passed the House and is now being considered by the Senate committee on finance. Meantime the Dean optometry bill has been passed by the Senate, considered by the House committee on medical jurisprudence and on Friday last was reported out of that committee with the handicap attached, "without recommendation." The House calendar is full of bills of more or less importance and the Dean bill is near the foot. It is obviously "up to" the opticians of Ohio to let their representatives know, and that quickly, their interest in the bill. Letters and telegrams should be sent, and particularly personal interviews should be had, by each optician with the member representing his county. The bill may be pulled from the mire by quick, concerted action, and the opticians should not overlook the opportunity.

Cincinnati.

Mr. and Mrs. G. Scheiber, Memphis, Tenn., were here last week.

Mr. Lake, of the Waltham Watch Co., was a visitor among the trade here last week.

Walter Sultan, Baltimore, Md., stopped here recently while en route to Chicago, Ill.

C. Harpersberg, watchmaker at Middletown, O., has located as such with Richter & Phillips.

A. J. Heeren has bought stock here for his new store at Toledo, O., into which he will move about May 1.

Walter Mayer, Wallenstein, Mayer & Co., has left for New York, Providence and Attleboro on a business trip.

James B. Carr, of the B. H. Stief Jewelry Co., Nashville, Tenn., stopped off here on his return from New York last week.

Sig. Strauss, of Lindenberg, Strauss & Co., is combining business and pleasure in a trip to New York and Atlantic City.

Henry Dehnel, Sandusky, O., has stated to Cincinnati friends that he is greatly improved in health after a trip in the south.

C. E. Richter, of Richter & Phillips, and wife left April 10 for New Orleans, La., where they will attend the Shriners' conclave.

E. B. O. Smith has sold out his jewelry stock at Lancaster, O., at auction and will begin farming. Local jewelers bought his fixtures.

Frank Herschede is home from Washington, D. C., where he attended to business connected with the coming Ohio Valley Exposition.

Godfrey M. Braham, of A. & J. Plaut, accompanied by his wife, is buying Fall stock in New York. They will visit Atlantic City before returning.

Cincinnati friends the past week were apprised of the fact that W. G. Knight and Will G. Davis had become charter members of the new lodge of Elks just organized at Galion, O.

The local Retail Jewelers' Association is issuing cards stating that the members of this body have decided to close their stores on Tuesday and Friday evenings at 6.30 from May 1 to Oct. 1. At other times they will have their own time to close.

A. J. Miller will purchase fixtures here for his new store at Massillon, O. He has bought the corner building on Main St. there and expects to have it turned into a most up-to-date jewelry store and ready for occupancy about May 1.

J. B. Murbach, Elyria, O., stated to friends here last week that he has retired from business, having turned his store over to his son Ernest, Feb. 1. He contemplates leaving for Europe about May 1 with his wife, to stay about a year.

A telegram was received here last week saying that the entire Washburn building at Columbia City, Ind., in which L. D. Chapman & Co., jewelers, are located, was destroyed by fire. Mr. Clapham saved some of his stock. The loss is covered by insurance.

J. H. Henkes, Vincennes, Ind., who was here on business last week, has purchased the interest of his late partner, James Baker, and will conduct the business from now on as the J. H. Henkes Jewelry Co., instead of the Henkes-Baker Jewelry Co., as heretofore.

Bingaman Bros. are busy remodeling their store, which, when completed, will look very attractive with its balcony across the rear and a handsome new steel ceiling lighted with 100 electric lights. These, with the handsome new window draperies and other improvements, will add greatly to the appearance of the "little diamond palace," as it may be termed.

Out-of-town jewelers here the past week buying goods included: J. O. Shehane, Bascom, Ind.; Henry Walker, Campden, O.; Fred Bentel, Hamilton, O.; Mr. Marlett, of Marlett & Baker, and G. H. Ashton, Middletown, O.; Adam Vogt, Louisville, Ky.; Charles V. Haas and wife, Ravenna, Mich.; W. H. Hood, Corbin, Ky., and F. G. Meyer, Dayton, O.

The Federal Grand Jury, which convened April 5, brought in indictments against Charles Rosen, bankrupt jeweler of Cincinnati, and his manager, M. Levine, a brother-in-law, on a charge of trying to defraud creditors. Levine's preliminary hearing took place April 2, at Aberdeen, S. Dak., and he is expected to be returned here about April 11 to await trial. Max Schapiro and M. R. Slayback, former watchmakers for Rosen, with Harry C. Balsinger, the receiver, and Stanley Headley, attorney for creditors, have returned from attending the hearing at Aberdeen and will leave about April 16 for Los Angeles, Cal., to identify and testify in Rosen's preliminary hearing there, April 21.

Traveling representatives who called on the Cincinnati (O.) trade during the past week included George A. Jochum, C. Cornehlsen; W. C. Barry, Barry & Co.; William T. Loud, International Silver Co.; Charles F. Hartshorn, Alling & Co.; H. B. Bliss, B. M. Shanley, Jr., Co.; A. L. Hancock, C. Sydney Smith & Co.; Wallace E. Welch, Hoyt, Obrig & Geiger Co.; John A. Abel, Abel Bros. & Co.; J. P. Fagan, Unger Bros.; E. H. Eckfeldt, Eckfeldt & Ackley; W. R. Shute, Day, Clark & Co.; George A. Schultz, Snow & Westcott Co.; Carl H. Weidemann, M. De Dilectis & Co.; John P. King, Watrous Mfg. Co.; J. Laffey, Gorham Co.; Albert Shire, Konijn, Frank & Shire; Clayton Shepperd, Krementz & Co.; Thomas F. Fleming, Jones & Woodland Co.; Mr. Untermeyer, Charles Keller & Co.; B. Moskowitz, J. Shoen; Joe Rifkin, L. Heller & Son; D. Skutch, New Haven Clock Co.; T. C. Keys, L. E. Waterman Co.; S. A. Schreiber, Sterling Silver Mfg. Co.; C. B. Bartlett, Whiting Mfg. Co.; Bert Ganz, Leroy Mfg. Co.; W. H. Sherrill, Sinnock & Sherrill.

A novelty has appeared in the market in the form of a belt buckle to be known as the "no-tongue" buckle. It has been patented by Thomas J. Dunn & Co., New York. The buckle works with a sliding clip so arranged as to hold the belt tightly without the necessity of holes in the leather. The simplicity and convenience of the patent makes it a novelty which should meet with general approval. The buckles are shown in a variety of sizes and designs.

Los Angeles.

Edward Peterson, 819 W. 3d St., is preparing to install some new wall cases in his store.

Herbert L. Gruber, formerly with the E. W. Reynolds Co., has taken a position with the Bastheim, Adams & Abel Co.

Brock & Feagans have installed a gramophone in their business office, into which all their business letters are now dictated.

J. R. Day, a watchmaker, recently with Gilmore & Lee, and previously with Brock & Feagans, has opened a retail jewelry store at 4424 Central Ave.

Ed. Turner, of the E. W. Reynolds Co., is building a new home next door to that of his brother, Arthur Turner, in the Boyle Heights section of the city.

Jewelers from neighboring towns who have been here recently are: Carl G. Strock, Santa Ana; E. J. Philippi, E. J. Pollock and W. E. Johnson, all of Riverdale.

The S. S. Schepps Co. has recently installed a new covering of mirrors on one side of the store. The firm proposes also to put in new wall cases very soon.

Arthur Turner, traveling salesman for the E. W. Reynolds Co., and Miss Mabel Stearns, of this city, were married April 5 in the new home built for them by Mr. Turner, in Boyle Heights.

Hambright & Walsh are in the midst of the work of installing their new additional wall cases and extending their business into the rooms at the rear heretofore occupied by Schwarzkopf & Penniman.

Montgomery Bros. recently supplied to the Pasadena Kennel Club several gold, silver and bronze medals and a dozen silver cups to be awarded as prizes at the club's show. The medals were all designed and made by Montgomery Bros.

David Wiesenberger, New York, has arrived here and is now in charge of the store of J. Wiesenberger, his brother. Mr. and Mrs. J. Wiesenberger and Mrs. Wiesenberger's sister, Miss Cohen, have engaged passage for Europe on the *President Grant*, sailing May 4.

H. W. Harrison, who has been for some time past in the gold jewelry department of Montgomery Bros., was married a few days ago to Miss Helen Woodruff, Dayton, O., who was spending the Winter with her parents in Los Angeles. Mr. and Mrs. Harrison have gone to Seattle.

Brock & Feagans have on exhibition at their store the magnificent cup sold by them as the California polo championship trophy, a picture of which appeared some time since on the first page of THE JEWELERS' CIRCULAR-WEEKLY. It was won in the recent contest at Coronado by F. A. Gill's English team.

An important change has been made in the Bastheim, Adams & Abel Co. (Inc.). Mr. Bastheim purchasing the interest of Mr. Adams and Mr. Abel, and, it is understood, becoming practically the sole owner of the concern. The business will be continued, however, for the present under the original company's name.

Traveling representatives who have been in Los Angeles, recently, include: V. S. Riley, Mandeville, Carrow & Crane; W. R. Landram, Simons, Bro. & Co.; A. W. Van Ness, H. C. Van Ness & Co.; Albert F. Lowenthal; O. F. Samuelson, Towle Mfg. Co.; E. W. Spaulding, Allsopp Bros.; Fred H. Wilkinson, Longines; F. J. Aicher, Harry S. Aicher; Zach. A. Oppenheimer.

Henry W. Harrison, who recently drew one of the Government farms disposed of by the land office in this city, decided after all not to avail himself of the opportunity thus acquired. The Government's conditions made it impossible for him to dispose of the property, and not wishing himself to become a farmer, he relinquished his claim. Emil Shostrom, of the Donavan & Seamans Co., also relinquished his claim for the same reason.

R. H. Schwarzkopf, who, with H. A. Curry, has just returned from New York, has decided to take a rest from active business for at least three months in the hope of fully regaining his health, and has sold out his entire business to Mr. Curry. Arrangements to this end were largely made while the two gentlemen were in the east. Mr. Curry, who is an experienced salesman and acquainted with the Pacific Coast trade, will retain his headquarters in this city, but will, of course, spend the greater part of his time traveling. Mr. Schwarzkopf has not fully decided what he will do, but probably will spend a portion of his vacation in the country.

San Francisco.

Mr. Chapman, one of the Coast representatives of the Elgin National Watch Co., has left for the east.

The Pacific Jewelry & Loan Co. has opened a store at 317 Kearny St., where the entire ground floor of a new building is occupied.

Al Eisenberg, Jr., who recently returned from Europe, where he made diamond purchases for A. Eisenberg & Co., is preparing to visit the trade with a complete line of gems.

Among the visitors in San Francisco, recently, were: Richard Vaeth, Tacoma, Wash.; L. C. Koberg, Healdsburg, Cal.; Al. Lowenthal, New York, and Mr. Miller, Seth Thomas Clock Co.

W. F. Hayes is in San Francisco on an extended inspection trip over the far western lines and will go as far as Mazatlan, Mexico, and return via Seattle, Portland, Salt Lake and Denver. He will be absent four or five weeks.

Bruce Bonny, one of the principal owners of Shreve & Co., has returned home from a European trip made in company with Mrs. Bonny. They are staying in San Francisco at the present time, but will shortly move to their home across the Bay.

C. Edward Innes, formerly well known in San Francisco as a successful jewelry salesman, shot himself in a southern California city, recently, while in a despondent mood. He had been out of the jewelry business for a couple of years and had been meeting with reverses.

J. D. Abrams, who has a position with Colonel Andrews, of the Diamond Palace, is to go east shortly, to attend a meeting of the Shriners, of which he is a prominent member. It is probable that C. Sorensen, another representative of the retail trade, will also make the trip.

Walter Lord, Sacramento, Cal., formerly in business at Goldfield, Nev., was in San Francisco, recently, and made extensive purchases for his new California store. E. C. Waters, of that place, has been holding a special sale and will shortly move into larger and finer quarters.

Alphonse Judis, the well-known wholesaler, with offices in the Mutual Savings Bank building, on Market St., has returned from an extensive European buying trip and announced that he had made heavy purchases while away. He has left for a short trip to Los Angeles and the southern part of the State.

Denver.

S. Salaman, Platteville, Colo., was in this city last week making purchases.

Mr. and Mrs. Witting, Longmont, Colo., were in town, last week, buying stock.

C. A. Syman, of Syman Bros.' Jewelry Co., left here April 9 to take a position with S. A. Andrews, Tacoma, Wash.

Mr. Miller, of Seth Thomas Clock Co., paid Denver a short visit last week. He is returning from a pleasure trip to California, accompanied by his wife.

A. Blum, Cripple Creek, Colo., has filed a voluntary petition in bankruptcy in United States Court. The hearing of the creditors was recently postponed until some future date.

The Denver Nugget Club gave its first regular smoker Thursday night, March 31. There were about 200 members and friends present, and all enjoyed an excellent programme. J. C. Bloom, president, gave them a short speech of thanks in behalf of the club.

The stock of Wm. Hohneck, 13th and Broadway, which was put up at public auction on Monday, March 28, is still unsold. The stock invoiced $1,500, and the highest bid so far is $570, made by William Desrick, of this city. As yet the bid has not been approved.

The following traveling representatives visited Denver, Colo., last week: C. S. Washburn, Wm. A. Rogers, Ltd.; Frank B. Warren, Wm. Birmingham & Co., Jacob Levin, Martin Lowe & Tanssig; C. F. Goddard, Oneida Community, Ltd.; Mr. Smith, International Silver Co.

The Colorado Horological Society held its regular monthly business meeting Monday evening, April 4. Otto Halk, who is a time-lock expert, was admitted to membership. The society is going to start a balance truing class April 11, for all members, the Waltham Watch Co. having donated 100 balances for this purpose. F. H. Wilkinson, of A. Wittnauer Co., has donated a fine Longines watch to be given as a prize for the best workmanship.

The Gill-Alexander Electric Mfg. Co., Kansas City, has sold its interests to a company organized in this city, who have transferred the plant here and will conduct the business under the name of Gill-Alexander Electric Co. W. W. Alexander, junior member of the old firm, and associated with the new, is an old time watchmaker of high standing. William Lewis, one of the largest stockholders of the new company, is a member of the firm of the Lewis Jewelers' Supply Co. The company will continue to manufacture and sell its patent rights, and do any special work in its line.

Omaha.

L. E. Griffith is spending 10 days in Iowa on business.

L. A. Line, Cozad, Neb., has moved to a new location in that city.

C. A. Williams has returned from a business trip through the State.

E. E. Ernstine, Nebraska City, spent a few days here, last week, combining business and pleasure.

The wife and small daughter of R. M Scott, salesman for Albert Edholm, are sojourning in California.

G. Hastings, formerly in the jewelry business in Arcadia, Neb., accompanied by his wife, visited this city, last week.

C. L. Shook attended a State Commandery meet of the Knights Templar at Kearney, Neb., during the past week.

Louis R. Metz, vice-president of the A. F. Smith Co., has returned from a three months' trip abroad. He visited Germany, France, Spain, Italy and Egypt.

Albert Edholm received an order, last week, from the Ak-Sar-Ben, a local organization of prominent business men, of this city, to supply them with 30,000 buttons and 500 pins.

J. H. Kronkee, formerly of Albert Bros., Cincinnati, O., has taken a position with the A. F. Smith Co., as traveling representative, his territory being southern Nebraska and western Iowa.

The following out-of-town jewelers were in Omaha, last week: Elsworth Crocker, Fairmont, Neb.; Frank Comte, Springfield, Neb.; W. F. Cash, Aroca, Ia.; W. L. Smith, Malvern, Ia.; L. S. Robinson, Glenwood, Ia.; Mr. Peterson, Alliance, Ia.

On Monday, May 16, Albert Edholm will celebrate his 20th anniversary in business by holding his first annual diamond exhibit. Mr. Edholm has had 31 years' experience, 20 years of which he has been proprietor. This display of costly jewels will be loaned for the occasion by the largest importing firms of the country. The gems will be mounted in the latest designs. This will be the first exhibit of its kind ever held in Omaha.

Traveling representatives calling on the trade in Omaha recently were: Chas. E. Lochner, Hayes Bros.' Co.; Steve Smith, Garland, Fisher Co.; Leo Cahn, Borrelli & Vitelli; A. H. Fleming, Alvin Mfg. Co.; C. H. Anderson, Electrolytic Art Metal Co.; Herbert Cohn, Lewy & Cohen; Edward A. Hirsch, Nathan Hyman Co.; Chas. F. Washburn, Wm. A. Rogers; W. G. Moland, Sansbury & Nellis; Thos. E. Rogers, Riker Bros.; J. Mills Dillaway, Barbour Silver Co.; W. F. Adams, Simpson, Hall, Miller & Co.; Mr. Kellsey, Harris & Harrington; Nelson A. Ransohoff, K. & O. Co.; E. P. Staunton, Gorham Co.; A. R. Von Colson, J. D. Bergen Co.; Nelson Hagnauer, Eisenstadt Mfg. Co.; Clayton Shepperd, Krementz & Co.; E. P. Stanton, Gorham Co.; Al Bruckner, W. A. Pickard; Eugene Hess, Philipp Deutsch; Wm. Roman, Manasseh, Levy & Co.; J. B. Laurencot, Albert Berger & Co.; S. J. Summer, Providence Mfg. Co.; F. C. Winship, Wright-Rich Cut Glass Co.; W. E. McCray, Bullock Mfg. Co.; T. W. Agnew, New Haven Clock Co.; Howard M. Eddy, S. B. Champlain Co.; George Pilzer, Goodfriend Bros.; C. H. Anderson, La Secla, Fried & Co.; E. Cohn, Cohn & Rosenberger; H. E. Chapman, Otto Young & Co.; Louis Bedichimer, I. Bedichimer & Co.

Indianapolis.

William Beatty, West Lebanon, Ind., has returned from Florida, where he spent the Winter.

Charles W. Lauer, Jr., of Charles W. Lauer & Co., is spending this week in northern and northeastern Indiana.

The J. M. Boner Jewelry Co., Evansville, Ind., will move into a new room as soon as it can be made ready for occupancy.

Harry Sebel, traveling salesman with the Baldwin, Miller Co., has left a local hospital, where he submitted to a minor operation.

T. U. Bonifield, formerly in business at Warren, Ind., opened a new store at Kokomo last week, purchasing an opening stock in this city.

Henry C. Schergens, who has been confined to his home for some weeks due to a street car injury, is able to be out again and has practically recovered.

A fire in the business district of Columbia City last Friday caused a loss of about $30,000. Among those to suffer from the first were: L. D. Clapham & Co., jewelers, whose loss was $2,500, partially covered by insurance.

Lynn Smith, formerly a jeweler in Newcastle, Ind., and who has been spending the Winter with relatives in that city, has returned to the Klondike, where he has been mining for some time. He was the first Mayor of Chena, Alaska.

Among retail jewelers in the city last week were: J. F. Kiser, Muncie; Mr. Cooper, Mooresville; Charles Ham, Frankfort; John W. Hudson, Fortville; L. J. Mayer, Thorntown; J. A. Pickett, Newcastle, and S. B. Merrick, Plainfield.

Local jewelers and department stores are in the market for hat pin point tips or protectors, owing to the passage of Councilman Rubens' hat pin ordinance. This ordinance, which will become effective in a few days, prohibits the wearing of hat pins, the points of which protrude more than half an inch beyond the hat crown, unless the points are protected.

A large local dry goods company is conducting another of its characteristic watch and plated jewelry sales, which have been the cause of much discussion by the Indiana Retail Jewelers' Association and Indianapolis Retail Jewelers' Association. Formerly these sales were advertised as being part of the bankrupt stock of a Chicago concern, but this one is advertised as a mere "sale."

An involuntary bankruptcy petition has been filed against G. Sartore, who conducts the Roma jewelry store, at Windber, Somerset County, Pa. He carries a small stock and has been in business at Windber for about three years.

A man and a woman recently entered the store of Gage & Johnson, Haverhill, Mass., ostensibly to make a purchase and succeeded in substituting a bogus ring for one containing a genuine stone. The substitution was not noticed until the couple had left the store "to look elsewhere."

Detroit.

O. A. Chalk has opened a retail store at 1433 Russell St., this city.

Frank Presswell, Holly, Mich., was a buyer in this market, last week.

Al. Holland, of the firm of D. E. Holland & Son, Lapeer, was in this city, last week.

E. A. Hodge, Spokane, Wash., visited Detroit, last week. He left here for Auburn, Ind., where he was formerly in the retail business.

Traub Bros. will remodel the four-story building which they have acquired, giving a continuous show window on Woodward Ave. and Congress St. This firm has been 33 years in its present store.

Two prominent Detroit retail jewelry firms are to take possession of new quarters May 1, and will begin alterations which will add greatly to the reputation of Woodward Ave. for handsome stores. Wright, Kay & Co., who are now located on Woodward Ave., at the corner of the Campus Martius, will then secure possession of the six-story building at the northwest corner of Woodward and Grand River Aves., while Traub Bros., 118 Woodward Ave., will take over the building at the southeast corner of that avenue and Congress St.

After a period of rest Detroit Nest of Ku-Kus No. 5 awoke to activity again, last week. A meeting was held Friday night in the Stevens building, at which a number of the members were present, and officers were elected for the coming year. Nelson K. Standart is Ku-Ku King, Harry Schultz is Prince, A. E. Charlesworth is Chief, Mr. Trest is Scratcher and Capt. Evan Thomas is Keeper of the Kash. The jolly order will hold meetings at the call of the Ku-Ku King hereafter, and plans will be made at the next meeting for the proper welcoming of visiting Ku-Kus who come here for the national convention in July.

John Kelsey and Henry Wright, of Wright, Kay & Co., have returned from New York, where they made a study of the large jewelry stores. The new store will be patterned to a considerable extent after the model New York shops. It will have excellent show window space, the entire front and side of the main floor being of plate glass. A scheme of decorations and cases has been selected which will be beyond anything before attempted in Detroit. Since making the lease for this property the firm has been offered as high as $50,000 for the lease, but has refused. One floor of the new Wright, Kay & Co. building will be used for their factory and stationery department. Another floor will be occupied by the E. H. Pudrith Co., wholesale jewelers, while the three remaining floors are to be rented to other concerns. The alterations will require from six weeks to two months, so that it will be July 1 in all probability before the new store is opened.

After bringing a replevin suit against Everett Karyle, the Hoffman, Chase Co., of Springfield, O., has recovered a chain, locket and piece of silverware valued in all at $28.50, which it is alleged had been obtained by means of a worthless check. The articles were found in the rooms occupied by Karyle in a local hotel.

St. Louis.

R. Lowenstein will leave in a few days for a trip through the south.

Julius Newman has severed his connection with the Aller-Wilmes Mfg. Co.

C. L. Horace, of the Hess & Culbertson Jewelry Co., has purchased an automobile.

C. L. Stange, of the L. Bauman Jewelry Co., left last week on a trip through Illinois.

A. Rosenthal has engaged with the M. Bonn Jewelry Co. to travel in Illinois and Iowa.

C. S. Aehle, of the Whelan-Aehle-Hutchison Jewelry Co., has returned to New York.

H. F. Hines, of William Weidlich & Bro., left April 1 on a long trip to the Pacific Coast.

Emil Bloesser has transferred his labors from the Bauman-Massa Jewelry Co. to J. W. Cary & Co.

E. C. Weidlich has returned to Bridgeport, Conn., after a visit to his brother, William Weidlich.

S. B. Getzler, of Buenos Ayres, South America, has been in the city the past week making purchases.

F. W. Drosten, president of the F. W. Drosten Jewelry Co., has returned from a trip to Oklahoma.

S. T. A. Loftis, president of Loftis Bros. & Co., has returned to Chicago after a visit to the firm's branch here.

L. W. Brown, of the S. Ruby jewelry store, will go to Detroit to attend the annual convention of the Elks.

J. J. Burke, president of the Brooks Jewelry and Optical Co., left Tuesday for Chicago, to be gone several days.

Ivan Fuller, representing the Hoyt Jewelry Co., has left on an extended business trip through Missouri and the northwest.

Samuel E. Bamber, secretary of the Hess & Culbertson Jewelry Co., returned the first of the week from a trip to New York.

Mr. Stifft, representing the Arkansas Diamond Co., is in St. Louis showing samples of the Arkansas diamonds and selling stock of the company.

The Hess & Culbertson Jewelry Co has just completed 25 diamond-studded past eminent commander jewels for Ascalon Commandery, Knights Templar.

Mannie Levy, who has been in business in St. Louis for many years on his own account, is now with the Hess & Culbertson Jewelry Co. as a regular salesman.

R. O. Bolt, manager of the Mermod, Jaccard & King Jewelry Co., has returned from a trip to New York. John Benges of the same firm has returned from a trip to Chicago.

Joseph Ebeling, President of the Retail Jewelers' Association of St. Louis, will leave June 7, on a trip to Europe. He will travel on the continent the greater part of the Summer.

A. L. Bauman, president of the L. Bauman Jewelry Co., will leave the latter part of May for Europe on his annual diamond-buying trip. He expects to be abroad about eight weeks.

A special exhibition of diamonds is being given this week by the Hess & Culbertson Jewelry Co., at their store, 7th and St. Charles Sts. Some weigh 7½ carats and are cut in rare forms.

In bankruptcy proceedings against Isadore M. Kosminsky, doing business as the Rose Jewelry Co., pending before Referee in Bankruptcy Coles, the trustee has been granted leave to redeem certain pledge property.

Benjamin Kersting, president of the St. Louis Jewelers' Supply Co., left yesterday, accompanied by Mrs. Kersting, on a six week's trip through the West. They intend to return by way of Canada and British Columbia.

Herman Mauch and Martin Hacker were members of a large reception committee of local Mystic Shriners to a trainload of Shriners who arrived Friday morning, at Union station, on their way to the annual conclave to be held in New Orleans.

In bankruptcy proceedings pending against Mannie Levy, the first report of the trustee has been filed in the office of Referee in Bankruptcy Coles. The trustee has also asked leave to disclaim interest in the lease of Levy's former place of business on 7th St.

Among the out-of-town jewelers in St. Louis, Mo., during the past week were the following: F. B. Wolff, Chester, Ill.; John Wade, Highland, Ill.; Jefferson D. James, Marshfield, Mo.; Charles S. Stifft, Little Rock, Ark.; S. O. Harvell, Litchfield, Ill.; G. C. Lemley, of the Al Chenu Jewelry Co., Cape Girardeau, Mo.; S. B. Getzler, Buenos Ayres, South America; D. E. Guthrey, Raymond, Ill.

H. Felchner, secretary of the Bauman-Massa Jewelry Co., died Wednesday at his home, 3419A Hartford St. Mr. Felchner had been connected with the Bauman-Massa Co. for the past 16 years, and during all that time had only missed three days from his post. He was born in Germany, and was 42 years old. He was widely known in the jewelry trade, and was highly respected by all who knew him. The funeral took place Friday.

Traveling representatives of jewelry houses in St. Louis during the past week were: E. E. Harwood, Tushnett, Langton & Hedinger; Alfred E. Hughes, Bishop Co.; H. J. Hildebrand, H. C. Lindol & Co.; Milton S. Rodenberg, Dunn & Rodenberg; Sidney H. Israel, S. & B. Lederer Co.; D. Riddell, Adolph Strauss & Co.; J. S. Cunningham, E. L. Spencer Co.; Frank R. Schilling, D. Beiman; T. W. Frazer, Celluloid Co.; Arthur W. Joseph, Fontneau & Cook Co.; representative of the Weiss Mfg. Co.; Mr. Ross, Robert H. Ingersoll & Bro.; S. J. Summer, Providence Mfg. Co.; Frank Barton, George N. Steere Jewelry Co.; Joseph C. Wilson, Landers, Frary & Clark.

Frederick G. Heldmann, 24 years old, died Monday afternoon in a room in the rear of his jewelry store at 3851 Easton Ave., from the effects of a dose of cyanide of potassium, taken with suicidal intent. His act was due to nervous breakdown brought on by overwork. He had been in business about three years, and had been quite successful, but was ambitious to succeed in greater measure and overtaxed his strength, and had been in ill health for about two months. Heldmann swallowed the poison a few minutes after he had sung for the edification of a party of friends the song "I Am Growing Old." He sang in response to a jocular challenge. Heldmann, who was unmarried, lived with his parents, Mr. and Mrs. Henry A. Heldmann, at 4214 Kennerly Ave. In compliance with his wishes his father had his body prepared for burial by a union undertaker.

A 75-cent fob is the basis of a suit which has been brought by the Zerweck Jewelry Co., of 211 Collinsville Ave., East St. Louis, Ill., against J. T. W. Rudesill. The suit was filed in Justice Boyne's court, but when it was called there one day last week a change of venue was taken to Justice Brady's court, and it is to come up for trial Wednesday. Several weeks ago Rudesill went to the Zerweck jewelry store to buy a watch fob. He did not find exactly what he wanted, and agreed to take a 75-cent fob and wear it until the arrival of some new fobs which the jeweler thought he would like. According to Rudesill he returned several times and was told each time that the fobs had not arrived and was told to keep on wearing the 75-cent one until they did. When the new ones finally arrived Rudesill found one to suit him, but in the meantime he had worn out the 75-cent fob. Mr. Zerweck thought Rudesill ought to pay for the fob he had worn out as well as the new one. Rudesill thought differently. Rudesill thereupon refused to pay for the 75-cent one and also refused to accept the one he had intended to take. The jeweler accordingly sued him for the price of the two fobs, but inasmuch as the jeweler still has the expensive one that Rudesill was to have taken, the price of the old one is, in a sense, all that is involved.

Pacific Coast Notes.

H. C. Crowell, San Bernardino, Cal., has leased a store on D St. in the southern city. Extensive alterations will be made.

B. C. Allen, Chicago, is touring California with his wife and two children and at the present time is in southern California.

A movement has been started by the jewelers in Monterey, Mex., to close the stores on Sunday, and a number of leading retailers have already agreed to the plan.

An auction sale was held April 9 by Sheriff Barnett, of Alameda County, of the stock and fixtures of Jacob I. Cohen, Oakland, Cal. The sale was held at the premises that have been occupied by this concern at 1103 Washington St.

The new store of the Coalinga Jewelry Co., Coalinga, Cal., of which C. T Walker is proprietor, has been opened in the Amy block and traveling men who have seen it pronounce it one of the most artistic in the San Joaquin Valley. New finds of oil have brought many wealthy men to Coalinga.

J. G. Stephenson, Sacramento, Cal., has been arrested on a charge of knowing something about a fire at the place of business occupied by his firm. A fire broke out early on the morning of March 31 and an alarm was turned in by Stephenson, who declared that he had come down early to do some work and found the place on fire. There is evidence that the fire had been set by some one who wished to indicate that burglars had rifled the place and set fire to it. The firemen reached the scene earlier than the miscreant had thought possible and all the evidences of his work had not been wiped out. Insurance amounting to over $5,000 was carried on the stock. The fire loss did not amount to a great deal.

Kansas City.

Louis Hayman, recently employed in the material department of the Myer Jewelry Co., has resigned and gone to San Francisco, Cal.

Otto Knaul and Geo. Taylor, traveling representatives for the Woodstock-Hoefer Watch & Jewelry Co., are in town replenishing their trunks and cases.

The following traveling men called on the trade here last week: J. S. Cunningham, E. L. Spencer & Co.; Geo. H. Thomas, Scharling & Co.; Geo. Goldberg, Untermeyer-Robbins Co.; Geo. H. Thomas, Powell & Co.

Sam Bloom, traveling man for the Myer Jewelry Co., who returned from his trip March 31 and was operated on for appendicitis next day at the South Side Hospital, is reported to be doing nicely and will soon be able to resume work.

The following jewelers were in town last week: C. E. Tieman, California, Mo.; Ed Arnold, Holton, Kans.; Claude Wheeler, Columbia, Mo.; J. R. Delaplaine, Hope, Kans.; J. C. Stillmanks, Coalgate, Okla.; A. C. Lawrence, Dewey, Okla.; O. M. Atwood, Clifton, Kans.; J. D. Hampden, Colby, Kans.

In the election, on Monday of last week, G. H. Edwards, of the Edwards & Sloane Jewelry Co., was returned to the council by the largest vote received by any member of that body. The large vote he received was due to the splendid record he has made while serving in the upper house. The same qualities that have made him a successful business man have characterized his public service and have given him much popularity.

On Monday night of last week a brick was thrown through the heavy plate glass window in the store of the Eaton-Pease Jewelry Co., 108 E. 8th St. J. H. Baker, who saw the attempted robbery, says three men were concerned in it. The coming of a patrolman prevented its success. Two of the men escaped, but the third—Patrick Finn—ran into the officer's arms. Two gold watches, missing from the window display, were found on his person. Although the window was well filled with expensive vases, the latter escaped damage.

Diamonds valued at $3,000 were stolen from the Webb-Freyschlag Mercantile Co., recently, by two men, who entered the store ostensibly to purchase a diamond. While a girl clerk was showing one of the men the tray of diamonds the second man approached and asked to be shown a pair of silk hose, saying he was in a hurry. The first customer said he would wait. The girl put the tray back in the show case, locked it and laid the key on the counter. When she returned, about two minutes later, the customer and the diamonds were both gone, the case having been unlocked.

T. A. Hill and William Nevins were arrested recently by Sergeant Ira Bonwell, a Kansas City (Kans.) police officer, while trying to pawn a valuable diamond ring. After being sweated they disclosed the hiding place of other diamonds, valued at $1,150, which they confessed to stealing from H. S. Leffler, a jeweler of Gainesville, whose store was broken into March 27. They were taken back—having agreed to go without requisition—to Gainesville by H. P. Ware, sheriff of Cook Co., Tex., and will be tried for their crime. Mr. Leffler paid Sergeant Bonwell $150, the reward offered for the capture of the two men.

Pacific Northwest.

Albert Hansen, Seattle, is in California at the present time, combining business and pleasure.

Seth E. Laraway, Eugene, Ore., has decided that he has too much space to devote to the jewelry business exclusively, and has added a line of musical instruments.

George M. Hayden has leased a store in the new Jacobs block, at Klamath Falls, Ore., and will open a store there as soon as the place can be put in shape for him. He is having the fixtures made in Klamath Falls.

Chas. F. Easton, a pioneer retailer of Bellingham, Wash., was severely injured at that place, recently, by being knocked down by a street car and hurled to the pavement. He was crossing the car tracks behind a car and did not see the one approaching until it was upon him. He was rendered unconscious by the fall, but it is not believed that his injuries are fatal.

On April 2 L. H. Burnett, Aberdeen, Wash., left for the east on a trip that is to last for at least six weeks. He will first go to Chicago, and then to New York and other large cities to buy goods. In Washington he will visit President Taft to invite him to visit Gray's Harbor when the Alaskan trip is made. Mr. Burnett has stores in Seattle, Aberdeen and Chehalis, Wash.

Milwaukee.

David Goldman returned from a two weeks' sojourn at West Baden, recently, and is now in New York making extensive diamond purchases.

The junior member of the jewelry firm of Littlefield & Son, Delavan, Wis., was in Milwaukee, last week, purchasing fixtures for installation in the firm's new store.

Among the out-of-town jewelers who were here, last week, were: William Kaphaem, Tomahawk; J. B. Kimball, Waukesha; F. P. Beswick, Racine; and Mr. Meier, of Karst & Meier, Racine.

Franklin Thomson, secretary of the Wisconsin Retail Jewelers' Association, has returned to Milwaukee after a short trip to Texas. Mr. Thomson was accompanied by Mrs. Thomson and children, who have been spending the Winter in Texas.

Several jewelry stores of Wisconsin have been looted of late, although the plunder in no case has been exceptionally large. H. Lekachman's store, Watertown, was entered by thieves who carried away watches and jewelry to the value of $200. Entrance was made through a rear window, the burglars having procured tools from a nearby blacksmith shop. Thieves recently entered the store of William Christel, Valderdo, and secured $15 in cash and about $100 worth of jewelry.

The store of Miss Ellen L. Carson, Ashley, Ill., is reported to have been destroyed by fire.

Minneapolis.

J. N. Roettger, Richmond, Minn., was in Minneapolis, last week.

C. G. Conyne, Mandan, N. Dak., was in this city, visiting his son, last week.

George H. Johantgen returned, recently, from Hector, Minn., where he attended the funeral of a relative.

August Hanson, with C. A. Brown, Appleton, Minn., is now taking a course in engraving in Minneapolis.

Ned Dockman, formerly of Dockman Bros., has taken charge of the watch department of Jeffery & Harris.

H. W. Abraham, Wentworth, S. Dak., and H. O. Thomas, Hampton, Ia., visited the Twin Cities on business, last week.

Mr. Wennerberg, of Chicago, representative of Louis Mannheimer & Bros., spent a few days in the Twin Cities, last week.

Bernard S. Harris, of Jeffery & Harris, 204 Nicollet Ave., was married, April 5, in New York, to Miss Augusta O. Matzner, of that city.

Fred Drissler & Co., now at 412 Nicollet Ave., will remove May 1 to 610 Nicollet Ave., in the Medical block, where they will have much larger quarters than they formerly occupied.

Oscar Holmes, now of Cambridge, Minn., and formerly of Minneapolis, has the sympathy of his friends owing to the death of his wife, recently. The jeweler's only son, a six-year-old boy, is also dangerously ill.

R. M. Horr, Lemmon, S. Dak., was here, during the week. Mr. Horr was formerly in business at Prentice, Wis., and from there left for the Okanogan district of British Columbia. He recently came to Lemmon from that district.

Louis Joselwitz, with Harry H. Green & Bro., was successful in drawing a claim on the Standing Rock reservation in South Dakota. He will leave, April 20, for his claim and spend about a month there. He will go there to reside permanently in the Fall.

Louis Taussig, an Amsterdam jeweler, who is making a tour of the world for the purpose of sizing up the diamond situation as well as for the pleasure of traveling, visited the Twin Cities, last week. He reported that he had found the diamond trade generally in satisfactory condition.

H. A. Lunda, whose store at 119 Central Ave. was robbed a few weeks ago, does not expect to recover more than about half of the stock which was stolen and which was valued at $1,000, wholesale. Much of the jewelry was pawned in St. Paul, and there has been considerable difficulty in recovering it.

The following traveling representatives visited Minneapolis during the past week: A representative of Bawo & Dotter; De Lancey Stone, Shafer & Douglas; Henry Hoffa, Hodenpyl & Walker; Nat Moskooitz, Whitelaw & Zagon; Jules Laurencot, Albert Berger & Co.; S. J. Summer, Providence Mfg. Co.

Joseph H. Green, of Harry H. Green & Bro., is planning to make a trip to Paris in July. He proposes to combine business and pleasure and will spend some time looking over jewelry stocks in the French capital. On his way home he will stop in New York for the purpose of laying in the Fall stock of jewelry for his firm.

Pittsburg.

Walter Seth is suffering from an attack of grippe.

R. S. Dillon, Wheeling, has been in New York for the last few days on business connected with his house.

The name of Kraus & Ochs, Kenton, O., has been changed to Kraus & Co., because of the retirement of Mr. Ochs from the firm.

Ira E. Riedenbach, the North Side jeweler, has added an herb department to his jewelry store, having tried this as an experiment to his growing business.

Otto Heeren and Mrs. Heeren, who have been in the Isle of Pines for several months, returned to Pittsburg, last week, greatly benefited because of their trip.

P. J. Maylone, manager for the George B. Barrett Co., spent a few days, recently, in New York on business and pleasure, buying a few goods while he was in the east.

Capt. William Klein has resigned from the Hardy & Hayes Co., and will conduct a brokerage business in the future, believing that there is a profitable field in that line of the jewelry trade in this city.

Among the out-of-town jewelers in Pittsburg, last week, were the following: J. J. Schmidt, Turtle Creek; B. E. Brown, Monessen; H. R. Brown, Donora; Harry Bloser, New Kensington.

It was announced here last week that N. N. Copeland, an enterprising merchant at Brackenridge, had taken a life partner into business with him, and his friends here congratulate him. The wedding was a quiet one.

President William H. Taft will be the principal speaker at the annual banquet of the Americus Club, to be held at the Hotel Schenley, May 2, and already a number of local jewelers have expressed their intention of being present.

W. H. Bower, who was formerly located at Glassport, Pa., has opened a watchmaking repair shop for the trade in Room 312, Bessemer building, Pittsburg. Mr. Bower had lately been associated with James R. Reed & Co.

The Keystone Jewelry Mfg. Co. has moved into new quarters in the Penn building, 708 Penn Ave., a building owned by Alexander J. Hardy, and which is rapidly being filled up by manufacturing jewelers and other lines of trade.

Walter Deuble, Canton, O., who bought a building formerly owned and occupied by a bank at that place, is putting in new fixtures, a new front, and fitting up the place in modern fashion. The contract for the fixtures was let several days ago.

The Federal Loan Co. has moved to the northwest corner of Federal and Robinson street, north side. The old building the concern occupied is being razed. The new one will be elevated because of the city raising the street above the flood line.

At a meeting of the Pittsburg Association of Credit Men, held last week, it was announced that L. C. Voss had been made chairman of the delegation from Pittsburg to attend the national convention at New Orleans, May 17 to 20, inclusive, and that Charles H. Bunting of Pittsburg had been made vice-chairman of the convention.

A. A. Gillespie and his bride arrived at Gibraltar last Sunday, and from there went to Genoa, Naples and Trieste. They intend to take in northern Italy, Switzerland, France and Holland, going from Amsterdam to England, from which country they will sail for America two months hence. P. C. Gillespie, of Gillespie & Co., has been suffering recently with a severe cold.

The Jewelers' Duckpin Bowling League rolled some interesting games, Monday night of last week, the Diamonds taking all four from the Roberts team, Lochs taking three from Terheydens, and the Wattles and Vilsack teams splitting even. The Wattles team is seven games in the lead and only need to win two more games to cinch first place, while the Lochs must win all seven to defeat the Watties for that honor.

On next Monday evening the members of the Jewelers' 24 Karat Club of Pittsburg, and their wives, will be the guests of the members of the Jewelers' Duckpin Bowling League at the Davis Amusement Co.'s place in Fifth Ave., where a luncheon will be served to all following the rolling of the usual games. The word is being passed around by President Steele F. Roberts, and all the members and their wives are invited, for it is expected that an enjoyable time will be had and plans perfected for having a number of affairs during the coming season that will create interest in the club.

United States secret service men, Friday, caused the arrest of a jeweler of Indiana County, this State, who is alleged to be responsible for the passing of a number of counterfeit 50-cent pieces. The jeweler is now in jail at Indiana, Pa., and will be brought to Pittsburg. Capt. John E. Washer, in charge of the secret service here, several days ago heard that counterfeit coin was being circulated in the vicinity of Starford and detailed men to go there and investigate. The result was that the jeweler was arrested. When taken into custody, he is reported to have had a number of the counterfeit coins in his possession. Whether he is the maker of them has not as yet been ascertained at Pittsburg, but the matter is being thoroughly investigated.

The funeral of George E. Goddard, of Goddard, Hill & Co., which took place Tuesday of last week, from the residence of the deceased, was very simple in character. The pallbearers were E. W. Hill, of the firm of which Mr. Goddard was the head; James McKinney, George Heard, Louis Brennen, Mr. Plummer and Mark Shannon. The remains were interred in the Homewood cemetery. Mr. Goddard did not leave a formal will, but left a letter addressed to Mrs. Goddard, which he had written seven or eight years ago, giving all of his property whatsoever to his wife, as well as all insurance policies he held at that time. Mrs. Goddard therefore gets her husband's interests in the jewelry firm, but just what she intends to do regarding the matter has not been learned.

The following traveling representatives recently called on the trade here: Sidney H. Israel, S. & B. Lederer Co.; R. Kaufman, Ingomar Goldsmith & Co.; Simon Adler, Rosenbaum & Adler; George A. Schuetz, Snow & Westcott Co.; A. M. Brinckle, C. F. Monroe Co.; H. C. Berdan, Gorham Co.; Wm. N. Peal, Strobell & Crane; Wm. R. Eliot, Meriden Cut Glass Co.; S. W. Abbey, E. Ira Richards & Co.; H. B. Bliss, B. M. Shanley, Jr., Co.; Milford G. Fox, Gustave Fox Co.; Bert Ganz, Leroy Mfg. Co.; Alfred Nathan, Henry Baschkopf; H. C. Hubley, Geo. Borgfeldt & Co.; C. M. Davis, De Passe Mfg. Co.; Fred H. England, Frolichstein, England & Klein; Frank L. Wood, Ludwig Nissen & Co.; W. J. Harber, Enos Richardson & Co.; W. J. Lane, Kent & Woodland; Mr. Curran, A. J. Hedges & Co.; J. T. Griffith, Jr., Carter, Howe & Co.; DeForest Ely, Barbour Silver Co.; R. C. Wilde, Meriden Cutlery Co.; George A. Jochum, C. Cornehlsen.

Lancaster, Pa.

W. S. Oberlin, Columbia, is improving the exterior of his store.

The silver loving cup presented to Joseph Breneman at a birthday banquet a short time ago was furnished by Aug. Rhoades.

L. G. Haines, formerly watchmaker at M. C. Yester's jewelry store, McKeesport, Pa., has taken a position with E. Schimpff, Scranton, Pa.

T. Wilson Dubbs has been appointed by the Board of County Commissioners caretaker for the Court House clock for the year beginning April 8.

Jerome L. Kyte, Detroit, is visiting relatives here. He was connected with the Hamilton Watch Co.'s factory many years ago before he went to Detroit to engage in business for himself.

Benjamin H. Prowell, until recently of Havre de Grace, Md., has bought out the jewelry store of the late S. R. Stobg[illegible], at Marietta, Pa., which was established 40 years ago. The place has been remodeled and a fine new stock of goods installed.

During the past week a pair of itinerant jewelry vendors have been reaping a harvest in the eastern part of the county, the jewelry sold being mere trash. One of their victims swore out a warrant for their arrest for false pretense, but the fellows escaped before it was served.

Among the jewelers who recently visited Lancaster were H. R. Wertsch, Lititz; S. H. Miller, Mt. Joy; J. H. Sensenig, New Holland; George A. Hutman, Harrisburg, Pa.; Leonard Moore, Louisville, Ky.; Samuel Delaney, Memphis, Tenn.; D. G. Latchfield, Charleston, S. C.

The following traveling representatives visited Lancaster, Pa., recently: C. H. McCarty, Kastenhuber & Lehrfeld. Mr. Glasen, Quaker City Cut Glass Co.; George A. Jochum, C. Cornehlsen; Joseph B. Bechtel, Joseph B. Bechtel & Co., A. J. Mueck, C. Dorflinger & Sons, C. S. Fike, Whiting Mfg. Co.; Mr. Tunstall, Wilhelm B. Durgin Co.

W. W. Appel & Son, victims of the big fire here in February, are now in possession of their new store in the Snyder building, on N. Queen St., one of the finest in the city. The fittings and furnishings are all of mahogany, and the show cases are of the latest styles. In the rear is the optical department, and back of it is a finely appointed repair department.

Philadelphia.

John G. Bechtel, engraver of N. 9th St., is again able to attend business.

W. Boadenhamer, Hanover, Pa., is remodeling his store and dwelling.

Harry Asquith has taken a position as watchmaker with Strawbridge & Clothier.

G. A. Large, 4618 Lancaster Ave., is recovering from a serious nervous breakdown.

A. J. Doen, Camden, is home again after a pleasant trip through the New England States.

Mr. Esser, representing W. C. Greene Co., Providence, R. I., was a visitor to this city last week.

Frank Ogden, with H. O. Hurlburt & Sons, left, last week, on a pleasure trip for New Orleans.

W. C. Wicker, formerly with E. S. Radley, has opened a repair shop at 12th and Cambria Sts.

James Neilson, with the Hoover & Smith Co., started for the south Saturday as a Shrine delegate.

S. C. Levy, a retail jeweler and optician, 23d St. and Columbia Ave., is seriously ill at the Jewish Hospital.

The Philadelphia Jewelers' Club has secured new quarters over Kind's jewelry store, 1110 Chestnut St.

William Bailey has resigned his position with William H. Moore to go with George Kranich, Germantown.

G. B. Lewis, with B. F. Williams Co., is reported seriously ill at his home in Camden, N. J., with pneumonia.

Nathan Cooper, of Cooper & Miller, 8th and Sansom St., has announced his engagement to Miss Dorothy Soifer.

Greenawald & Bonnaffon, 806 Chestnut St., will remove to their new offices in the Penn Mutual building, June 1.

H. C. Birch stopped off in this city, last week, on his way to the south, where he expects to remain for some time.

M. Sickles Sons, 726 Chestnut St., have secured the second floor and will make extensive alterations and improvements.

A. A. Kerr, 1004 Chestnut St., acted as one of the judges for the Press Marathon Race, held in this city, Saturday, April 9.

Gustave Kuntz, formerly with the Sommer Clock Co., and recently dissolved, will continue in this business at 733 Sansom St.

B. F. Williams Co., 726 Chestnut St., will remove to the Commercial building, northwest corner of 8th and Chestnut Sts., about June 1.

A concern known as the Gilbert Clock Co., at Bowes building, southwest corner 8th and Sansom St., is in the hands of the sheriff.

Daniel Ungaro, engraver, 725 Sansom St., has given up this line and will engage in the poultry business at Wilburtha, Washington Cross, Pa.

George Waters, Frankfort Ave., entertained a party of jewelry salesmen at dinner, last week. George Donaldson acted as toastmaster.

The many friends of Al. Polak, at one time employed by M. Sickles & Sons, were greatly shocked to hear of his unexpected death, last week.

H. M. Shope has resigned his position with H. O. Hurlburt & Sons and will assume the management of a large fruit farm in Hummelstown, Pa.

M. Lampert, who has been traveling through the west in the interest of Henry Zimmern & Co., stopped off in this city on his way to New York.

Matz Bros., formerly associated with W. W. Fulmer & Co., have engaged in the wholesale manufacture of diamond mountings and fine jewelry at 117 S. 8th St.

Fred Barry, with L. Stern & Co., Providence, R. I., who has been spending a short vacation in town, has started on his western trip and will not return before May 20.

Frank Markey, watchmaker, 10th and Master Sts., has been drawn on the jury. Mr. Markey has fully recovered from the serious injuries sustained about a year ago.

The retail jewelers of Woodland Ave., West Philadelphia, will close their stores Thursday evenings at 6 P. M. It is expected that the other jewelers of that vicinity will follow suit.

E. A. Lewis, formerly with W. W. Fulmer & Co., has started on his trip up the State with a new line of diamond mountings and fine jewelry. Mr. Lewis recently opened an office at 117 S. 8th St.

Frank Vogel, with Earle & Co., 1030 Market St., was married, Wednesday, to Miss Emma Buebeck. Mr. and Mrs. Vogel have started on their honeymoon trip and will spend some time at Niagara Falls.

Conrad Kirchner, for many years with Isidor Sagorsky, manufacturing jeweler, 116 S. 8th St., has resigned his position to become associated with William Doebele, manufacturing jeweler, 805 Sansom St.

At a recent meeting of the wholesale jewelers and jobbers of this city, held in the offices of D. V. Brown, 740 Sansom St., plans for a movement to counteract the bad impressions given as a result of the car strike were discussed.

Preliminary steps have been taken by the Walnut St. Business Men's Association toward the establishment of a trust company on that street, to be known as the Walnut St. Trust Co. E. J. Berlet and Ferdinand Keller are taking an active interest in this new move.

William C. Williams, with C. H. O. Bryan and a well-known Common Councilman of the 18th Ward, has shared in the recent new appointments and has been assigned to the following committees: Commercial and Navigation, Prison and Correction, Gas and Soldiers' Monument.

H. A. Cain, 2924 Ridge Ave., has notified the Jewelers Security Alliance that he has been visited by a pennyweight thief, who obtained a ⅞-carat stone in a tooth setting, valued at $150, for which an imitation was substituted. A man who is supposed to have done the trick is a colored man, described as being five feet 11 inches high, weighing 185 pounds, and is about 38 years old.

Charles Dorsey and William Count, who were arrested some time ago for the robbery of the jewelry store of W. A. Scatterfield, 1607 South St., were sentenced, Friday, by Judge Carr and given terms in the county prison of two years and three years and a half, respectively. Dorsey pleaded guilty and took the witness stand for the purpose of protecting his pal, but of no avail, Count being convicted. Dorsey, in telling his story, said he had gained entrance to the jewelry store by means of the transom, and the jewelry stolen was sold at intervals in the Tenderloin district. Some of the pieces were given to his sweetheart, May Brown. The Brown woman has been jointly indicted with the young men, but it is possible she may get off from further prosecution, having already spent one month in jail.

The following jewelers were visitors to this city during the week: E. Alley, Milville, N. J.; Mr. Harrington, Harrington, Del.; Joseph S. Downie, Hatboro, Pa.; O. O. Stillman, New Brunswick, N. J.; H. S. Kratz, Soudertown, Pa.; H. Krause, North Wales, Pa.; Frank Kline, Spring City, Pa.; H. B. McFarlan, E. Downingtown, Pa.; H. B. Schanley, Quakertown, Pa.; R. W. Quicksall, Mount Holly, N. J., and Roland Oliver, Burlington, N. J.

Plans for the coming Retail Jewelers' convention, which is to be held in this city May 19-20 were perfected at the joint meeting of the committee of the Wholesale Jewelers' Association of Philadelphia and the Pennsylvania Retail Jewelers' Association. Jewelers from all parts of the country will attend the convention, which is expected to be the largest in the history of the organization. Addresses will be made by prominent members of the trade.

Buffalo, N. Y.

Max Dreyfuss, traveler for Heintz Bros., is in town.

Louis Schutt, of Schutt & Petersen, former secretary of the Buffalo Retail Jewelers' Association, is ill.

Miss Esther Friedlander, sister of Benjamin Friedlander, traveler for H. Boasberg & Sons, diamond ring manufacturers, was recently married to Abe Kauffman, of this city.

Joseph Freedman, of Freedman Bros., has just returned from Ohio. Lawrence Freedman, of the same firm, is in Michigan. Both men are very optimistic regarding the outlook of the jewelry business.

The Dwelle-Kaiser Co., which will do a general jobbing business in leaded art glass, polished plate glass, mirror plates and similar articles, has been incorporated in Buffalo. Laurens Enos is president. The concern has leased the premises at 338, 340 and 342 Ellicott St.

Among the travelers who recently visited the Buffalo market were: E. A. Reed, Reed & Barton; Rudolph Schweiger, H. Z. & H. Oppenheimer; Joseph Keller, Keller Mfg. Co.; G. G. Tibbals, International Silver Co.; Chas. T. Dougherty, Osmers-Dougherty Co.; F. C. Allen, Allsopp & Long; C. A. Holbrook, Sloan & Co.; Wm. H. Wefferling, Riker Bros.; W. H. Gregory, Strobell & Crane.

In a recent fire that did about $75,000 damage to the business section of Holland, a suburb of Buffalo, the jewelry store of P. M. Riley was completely destroyed. Much of the contents of the store was saved, but the loss will be considerable. After fighting for 11 hours the local fire department, with the aid of several engines from Batavia, was able to extinguish the flames. The entire town was in danger for a time.

THIS IS HAND!

The most successful auctioneer of high-class Jewelry in the United States.

The auctioneer that does not "knock" others to exalt himself. The auctioneer that proves his ability before you send for him. Not the oldest, but the most conservative. If he starts your sale he finishes it. No inferior assistants, but two auctioneers of character and ability to help at all large sales. A specialty of sales where the jeweler has a reputation and wishes to retain it. Only your own goods sold, and without misrepresentation. Don't believe what the others say—investigate. Don't you want a well-educated gentleman to conduct your sales, a man that **can** and **will** treat your customers as you want them treated?

$1,000 to any Charitable Institution

which you select

if I cannot prove that I have sold the largest and finest stocks of jewelry ever offered at auction in this country in recent years.

Write me to-day for my illustrated description of a "Hand" auction. It's free for the asking.

My latest great sales were the stocks of L. W. Vilsack & Co., of Pittsburg, and Edward Vail & Co., Wichita, Kansas. Their success was the talk of the jewelry trade.

JAMES L. HAND.

Have you noticed the better standard that is demanded of jewelry auctioneers since "Hand" entered the field?

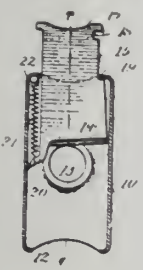
PATENT DEPARTMENT

[IN WHICH IS CONTAINED A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN. THE UNITED STATES PATENTS THAT HAVE EXPIRED AND THE REGISTERED TRADE-MARKS.]

UNITED STATES PATENTS.

ISSUE OF MARCH 29, 1910

953,225. HAT-PIN. EUGENE PLOURDE, Paterson, N. J. Filed Oct. 12, 1909. Serial No. 522,224.



The combination of a pin having an annular shoulder, a clevis swiveled on the pin and having an opening receiving the shoulder and being lim-

ited by said shoulder against movement lengthwise of the pin, a guard or holder, and a flexible connection between the guard or holder and the clevis.

953,313. CIGAR-CUTTER. JOHN H. ASTRUCK and CARMINE J. SALVIOLA, New York, assignors to John Henry Astruck, New York. Filed Jan. 17, 1910. Serial No. 538,377.

A cigar-cutter, comprising a casing, an inclosed

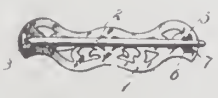
reciprocative and tiltable blade, and a spring for swinging said blade obliquely across the casing.

953,316. FOUNTAIN-PEN. FRANCIS C. BROWN, New York. Filed April 14, 1909. Serial No. 489,897.

In a fountain pen, the combination of the barrel having a reduced nozzle and an inclined internal shoulder at the inner end of the nozzle, a nib-carrying feed-bar movable lengthwise in the barrel and provided at its forward end with tongues

adapted to receive the nib between them, and with a collar arranged to engage the said inclined shoulder along its entire circumference, and means for advancing and retracting the feed bar.

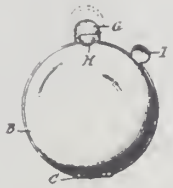
953,318. CIGARETTE-BOX. CESARE CAMPUS, New York. Filed May 22, 1909. Serial No. 497,793.



As a new article of manufacture, a shallow flat

box body, comprising inner and outer shells, means for spacing apart the bottom portions of the shells to provide receptacles for matches, the inner shell forming a receptacle for cigarettes, cigars or tobacco, and one wall of the outer shell having a series of perforations providing for the entrance of the matches into the receptacle, and a flat cover hinged to the box body and when closed extending over the same

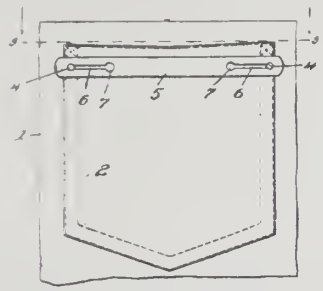
953,348. CLASP. GEORGE F. PREVEAR, Leominster, Mass. Filed Feb. 6, 1908. Serial No. 414,473.



A clasp comprising a front, a tongue hinged thereon, a keeper secured to the front and fitted to receive said tongue, the said tongue and front being composed of material which will permit the one to spring away from and toward the other, the said tongue being curved and tapered and

arranged to rest when not in use and closed, in close proximity to the inner or back surface of the front, the relation between the keeper and the tapered portion of the tongue being such that the keeper will freely receive the tongue when the clasp is not in use and will snugly receive it when the distance between the keeper and tongue hinge is lessened as in use.

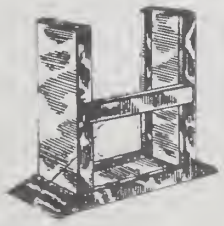
953,527. WATCH-PROTECTOR. BENJAMIN GREENBERG, Philadelphia, Pa. Filed Jan. 28, 1909. Serial No. 474,767.



A watch-protector, comprising a case formed of two correspondingly shaped members hinged together, the front member having a recess in its edge at the top and a fingerpiece projecting upwardly and forwardly from the said edge at one side of the recess, and the rear member having a

guiding flange projecting upwardly and rearwardly from its upper edge, opposite the recess of the front member, a spring normally holding the members closed, pointed and threaded pins, one secured to the rear member near the bottom and the other to the guiding flange of said member, and nuts on the said pins

953,619. WATCH-POCKET. JOHN W. HUGHES, Reading, Pa. Filed June 28, 1909. Serial No. 504,872.



In combination with a pocket, a closure for the mouth of the pocket comprising a spring strip extending transversely across the rear of the pocket headed studs carried by said strip and

projecting at the front of the pocket, and a second spring strip adapted to extend transversely across the front of the pocket and provided with longitudinal slots to receive said studs and enlargements at the inner ends of said slots for the insertion and withdrawal of the studs.

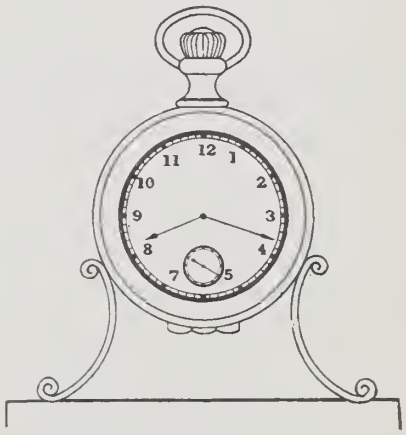
DESIGNS.

40,592. CLOCK OR WATCH SUPPORT. PARK

J. SHEPARD, Akron, O. Filed Oct. 1, 1909. Serial No. 520,597. Term of patent 7 years.

UNITED STATES TRADE-MARKS.

[The following trade-marks have been adjudged entitled to registration under the Act of Feb. 20, 1905, and are published in compliance with Section 6 of said act. Said section provides:



"Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Section 2 of this act. If no notice of opposition is filed within said time the commissioner shall issue a certificate of registration therefor, as hereinafter provided for."

Marks which are stated to have been "Used 10 years" are registrable under the last proviso of Section 5 of said act, which is as follows:

"And provided further, that nothing therein shall prevent the registration of any mark used by the applicant or his predecessor, or by those from whom title to the mark is derived, in commerce with foreign nations or among the several States, or with Indian tribes, which was in actual and exclusive use as a trade-mark of the applicant or his predecessor from whom he derived title for 10 years next preceding the passage of this act."]

Complete specifications open to public inspection before acceptance.
1909.

1,597. COMBINED PURSE AND BELT BUCKLE. De Beanpins.

Louisville, Ky.

TRADE CONDITIONS.

Leading jewelers report that March business was much better than that recorded by March of 1909, and though the fine weather had much to do with that, general business conditions are given credit for most of the advance.

William Kendrick is moving into his handsome new home on 1st St.

J. W. Sherrod, superintendent of the watch department of Wm. Kendrick's Sons, has been sick, but is now out again

F. O. Brooks, a well-known retired jeweler, died at Madison, Ind., a few days ago. He was 81 years old and was well known to the Louisville trade.

M. F. Thornton, who represents A. J. Hedges & Co., and who makes his home in Louisville, called on the members of the local trade a few days ago.

George Wolf & Co. are making a special display of hand bags, for which they are finding a strong local demand. The store of Mr. Wolf is receiving its annual coat of paint.

The Retail Merchants' Association has decided to have a four weeks' rebate season this year. It begins April 17 and closes May 14. All of the jewelers are members of the R. M. A.

Claude Steinau, son of Jule Steinau, 624 Fourth Ave., is devoting most of his time now to the advertising business, having organized the Steinau Co., which deals in novelties and badges.

Efforts are to be made by the State to list for assessment more of the diamonds that are possessed by Kentucky citizens. Hardly one per cent. of the diamonds owned in this State are now listed for taxation.

George Rieger has moved from 216 to 203 Norton building. Although on the second floor he has one of the handsomest stores in the city. Mr. Rieger, who is president of the Jewelers' Association, has been in the business 34 years. He is planning an outing for the association as soon as the weather settles.

The jewelry store of C. C. Boyd, Wickliffe, Ky., was burglarized a few weeks ago, and among the articles stolen were 13 watches, 14 rings, three watch fobs, four watch chains and seven stick pins. J. W. Williams, a young boy, was arrested at Fulton, Ky., after trying to dispose of a piece of jewelry to a negro woman, and after being questioned admitted his guilt and turned over most of the stuff that he had taken.

Sam Frank, buyer for the jewelry department of the Stewart Dry Goods Co., has returned from New York, where he made his Spring purchases. Mr. Frank, who was a member of the jewelry firm of Thalheimer & Frank, which is now out of existence, recalled the robbery of the store of that firm in 1905. "Experts do the work," he said, "because those who burglarized our place made a point of taking the high-grade stuff and leaving the cheap; of stealing the sterling and passing up the plated goods."

Watches continue to be the favorite form of gift presented to Kentuckians. A handsome watch was given to the new Catholic Bishop of Kentucky, the Rt. Rev. Denis O'Donaghue, on the eve of his departure from Indianapolis, where he served previous to coming to Louisville. L. M. Hill, former dining car superintendent of the Louisville & Nashville, who left that position to go with another road, was given a watch, while Senator Joe Bosworth was given a watch as a token of the esteem in which he is held by his friends at Middlesboro.

Announcement has been made by William Kendrick's Sons of the new store which they have leased. The lease is not effective until April, 1911, but the contract was closed last week. The firm will move from 218 S. Fourth Ave., where it has been for 34 years, to the handsome new Atherton building, on the northwest corner of Fourth Ave. and Walnut St., considered by many the best intersection in the city. Instead of having the whole building, as at present, however, only the first floor and basement will be used. This will result in the art department, which now occupies a whole floor, being somewhat restricted. William Kendrick announced to The Jewelers' Circular-Weekly correspondent that considerable extension of his lines of cut glass and silver are contemplated, and that the strictly jewelry department would also be expanded.

Rodgers & Krull believe that they have done something in connection with the recent robbery of their store of $5,000 worth of diamond rings that has never before been done in a similar case. They have had drawings made showing the exact size and appearance of the rings, these supplemented with the company's numbers and the individual settings. A cut will be taken from these and copies of this will be sent all over the country, both to jewelers and pawnbrokers, and the members of the firm believe that some trace of the stolen jewels will be found in this way. This is the second time Rodgers & Krull have suffered from thieves, a robbery of the same sort having taken place on opening day in the old Masonic Temple building, 11 years ago. The thief got away with a tray of rings then, but the value of the goods was not so great.

Among the traveling men who have called on Louisville jewelers of late are H. D. Crutcher, Hayden W. Wheeler & Co.; A. L. Hancock, C. Sydney Smith & Co.; L. E. Smith, M. B. Bryant & Co.; H. J. Fink, Heyman & Kramer; Ferguson Mead, Barbour Silver Plate Co.; Wallace E. Welch, Hoyt, Obrig & Geiger Co.; George W. Detmery, M. Schwab Jewelry Co.; Thomas E. Rogers, Riker Bros.; Mr. Stanford, Alvin Mfg. Co.; R. Kaufman, Ingomar, Goldsmith & Co.; Morris Lissauer, Louis Strasburger's Son & Co.; "Jack" Garland, Garland-Fisher Co.; Alex. Fraser, Rochester Cut Glass Co.; R. M. Sawyer, Shafer & Douglas; W. J. McKenna, Wayne Cut Glass Co.; John P. King, Watrous Mfg. Co.; Albert Hulstrum, International Gem Co.; C. A. W. Best, Pierpoint Corporation; J. S. Francis, E. & J. Swigert Co.; J. Laffey, Gorham Co.; John Marsh, Edmond E. Robert; C. A. Holbrook, Sloan & Co.; C. Inness Brown, H. G. McFadden & Co.; S. E. Dickson, Adelphi Silver Co.; Adolph Rosenthal, Henry Ginnel & Co., and Sol Roseman, A. Roseman.

A. B. Hull, Belding, president of the Michigan Retail Jewelers' Association, has purchased a new Overland touring car.

WE have recently issued a supplement to our 1904 material catalog which will be forwarded to you on application. This supplement used in connection with our 1904 catalog you will find a great help in getting correct repairs for our movements. Material for all new grades manufactured since the issue of our 1904 catalog is listed. Serial numbers showing grades of movements to 15394000 are given; table showing numbers and strengths of Hair Springs for different grades will be found a great convenience. We especially call your attention to the introduction in the supplement which explains how to get the part you want for any particular movement. A postal card request will bring one of the supplements.

THE HOROLOGICAL REVIEW

The Watch, the Customer, the Repairer and his Employer.

Written expressly for The Jewelers' Circular-Weekly.

REGRETTABLE as it is, the general belief of the public is that watchmakers are a body of harassed and overworked mechanics, and their nervous temperament is attributed by laymen to the nature of their occupation.

It is well known among men in the profession, however, that a watchmaker who understands his trade thoroughly does not find his work laborious, monotonous or detrimental to his nervous system. On the contrary, a good watch repairer finds his work interesting; he puts life into something that is literally dead and useless, and after his work has been performed the time piece again becomes an essential factor in the modern system.

It is the speed under which the repairer is demanded to execute his skill that enervates him. The indiscreet judgment, the demands of the public and, in many cases, of his employer are the things that add to his tribulations.

A good watch repairer will find pleasure in putting a watch in first-class condition if he is allowed ample time to do the work, but his employer frequently fails to prepare his customer to pay for the time that is required for such work. The employer will generally give an estimate on the repair haphazardly, and promise a satisfactory result. When he hands over the job to his watchmaker the price is plainly marked on the tag, and that suffices to instruct the watchmaker as to how much time he may spend on the watch. Let us assume the price is marked $1 for a mainspring.

The watch is taken apart, and besides the broken mainspring there is also a tooth broken in the barrel (which is very likely to be the case). That means a loss to the employer, and naturally it means that the watchmaker must put on more speed and hurry through the job.

A watch is sometimes given to the repairer by his employer with instructions to clean and regulate it. The price is placed at $1.50. When the watch is taken apart the conscientious repairer sees at once that the balance staff (that has been maltreated by a former repairer) must be replaced by a new one, jewel holes must be fitted properly, the jewel pin is several degrees too small for the notch in the fork, some train pivots must be repolished and their respective holes closed, the side shake must be taken up, and several other jobs which the repairer knows are essential in order to obtain the result demanded by the owner of the watch.

Lack of foresight on the part of his employer, however, does not justify him in doing all that is required. He is compelled to economize his time. Instead of polishing three pivots he will polish only one; he will perhaps change the jewel pin, but the extravagance of replacing the balance staff is out of reason, for that job not only requires the labor and time of the workman but also an extra money expenditure which is generally avoided by a considerate employe.

The final outcome of such jobs is detrimental to the repairer's peace of mind, and robs the boss and his employe of their fraternal understanding, for it is an inevitable occurrence that such jobs are eventually brought back to the store accompanied by that well-known song and dance that is freely given to a watchmaker if the job is unsatisfactory.

If the customer is combative he will venture to add that all his watch needed in the first place was regulating, and evidently he paid $1.50 for a job that was never executed. Such remarks are apt to put a crimson flush on the repairer's face and discourage the best of workmen. As for the boss, who has by this time either forgotten or was never aware of the fact that his watchmaker had difficulties to make both ends meet on that job, owing to the lack of time, he offers reasonable excuses to his customer—assures him of positive satisfaction, and this time without charge, if he will leave the watch for a few days' observation. Then the employer is ready to put the whole blame on his watchmaker for not properly timing the repairs.

Such are mainly the conditions that cause the discomforts of the employer and add to the trials of the man at the bench.

Every competent repairer is willing to do good work, but his desire is in many cases blocked by certain limitations and restrictions. It is impossible to obtain high-grade results from a low-grade watch. There are certain grades of watches that are not modeled for close timekeeping, and in order to obtain the results which some laymen expect from such timepieces it would require several days' labor of a skilled repairer, who would have to reconstruct the watch.

It would be a great aid to the man at the workbench if his employer would instruct his customers concerning the results to be expected from his watch.

A low-grade cylinder movement cannot be timed as closely as a 17-jewel movement, nor can a seven-jewel movement be adjusted to heat and cold or time in five positions.

Such facts must not be left unexplained to the owner of a watch. Every watch can be put in running order, but real accurate time can be obtained only from a movement that was modeled to give such time.

It seems strange that watchmakers have failed to inaugurate a system similar to that adopted in other trades. A plumber, for example, seldom gives estimates on repairs before the job is completed. He invariably takes his time in doing the job, and charges for his labor in proportion to the time rendered, regardless of the result of the job.

The watchmaker is less fortunate. If a watch is taken in to be repaired and the price is fixed at $1.50, the time spent on such a job by the repairer is generally an expenditure to the boss of 75 cents, material averages 15 cents on each repair, and benzine, oil, light and rent 25 cents, leaving 35 cents as a net profit for the "boss" under the most favorable conditions. For this sum of 35 cents he is practically requested, owing to the prevailing custom, to hand over to his customer a paid-up insurance policy on his watch for one year!

Such are the present difficulties that confront the watch repairer. He must determine how to do justice to his profession, to his boss and to the public.

The manufacture of watches in England before the advent of the manufacture of watches by machinery was carried on at Prescot, in Lancashire, and at Clerkwell. With the exception of Prescot, the whole trade of the country was in the control of Clerkenwell firms, and no matter whether a watch may be sold or given to be repaired in London or Bristol or York it had at one time or other been in the hands of the Clerkenwell artisan. Clerkenwell was often styled "The land of watches." Clerkenwell evidently takes its name from the clerks' well. The clerks here meant were evidently the inferior order of the clergy of the city of London, who enacted dramatic entertainments or mysteries at or near this well. It is on record that they met yearly at this place to act some play or history taken from the Holy Scriptures.

WALTHAM WATCHES

COLONIAL SERIES
Riverside Maximus
Enamel Dial

COLONIAL SERIES

Gold and Gold Filled Watches

These watches are a noteworthy addition to the Waltham line. They are exceptionally thin and may be had with Enamel, Silver Finish or Gilded Metal dials of artistic design. Colonial Series watches appeal to the most critical buyers. Equip your stock with these goods for Spring trade.

Colonial Series watches are to be had in five grades of movements as follows:

Riverside Maximus—23 jewels, adjusted to temperature, isochronism and five positions.

Riverside—19 jewels, adjusted to temperature and five positions.

Royal—17 jewels, adjusted to temperature and three positions.

No. 1425—17 jewels.

No. 1420—15 jewels.

All Colonial Series watches are cased and timed at the factory. They are delivered to the trade in display boxes. The retail selling price on these watches is fixed and plainly printed on the contract notice which is placed in the box with each watch before leaving the factory.

WALTHAM WATCH COMPANY
WALTHAM, MASS.

Some Calculations Applicable to Barrel Train, and Motion Work of Watches.

Written expressly for The Jewelers' Circular-Weekly by T. J. Wilkinson.

(*Continued from issue of April 6.*)

HOW TO CALCULATE THE TRAIN.

WE shall now return to our starting point. We selected a 'scape pinion of eight leaves and a fourth wheel of 80 teeth (8×10); $80 \div 8 = 10$, indicating a fast train. We have yet to figure on a center wheel, a third wheel and two pinions, namely, the third-wheel pinion and the fourth-wheel pinion, in order to complete our train. For ease in calculation, let us take the first product in the first table, viz., 6,000, and let us select 80 teeth for one of the wheels. Now, if we divide 6,000 by 80 we get 75, the number of teeth for the other wheel. We now have the two wheels, one with 75 teeth, the other with 80 teeth.

We can assign either number to either wheel, but we shall follow the table and place 80 teeth in the center wheel and 75 teeth in the third wheel. Now we have all the wheels for the train center, third and fourth and the 'scape pinion. We lack two pinions, viz., the third and fourth wheel pinions. We know from our rule that when these two pinions are multiplied together and their product again multiplied by 60 the amount then must be the same as when we multiplied the two wheels together, namely, 6,000. It will simplify the problem if we divide the 6,000 by 60, the result being 100. The question now is, What two numbers multiplied together will make 100? The only figures that will be suitable for pinions are 10 multiplied by 10; result, 100.

We will now test them and see if they conform to our rule:

$$10 \times 10 \times 60 = 6{,}000$$
$$80 \times 75 = 6{,}000$$

Our products are equal in amount and calculated according to rule.

This is the train as we have now figured it:

Center wheel, 80 teeth.
Third wheel, 75 teeth.
Fourth wheel, 80 teeth.
Pinion of third wheel, 10 leaves.
Pinion of fourth wheel, 10 leaves.
Pinion of 'scape wheel, eight leaves.

The methods employed can be applied and varied as explained to produce wheels and pinions with greater or less numbers of teeth and leaves.

We shall now continue our calculations along somewhat different lines. We have already stated the rule in order to determine the number of revolutions a pinion makes with the wheel depthing into it for one revolution of the wheel. We count the leaves in the pinion, then in the wheel, then divide one into the other and the answer is the number of times the pinion goes around to one revolution of the wheel. For example, take the train we have just figured on. The center wheel has 80 teeth and the pinion of the third wheel has 10 leaves; then $80 \div 10 = 8$. The answer represents the number of turns the pinion of the third wheel makes for one revolution of the center wheel.

Let us also determine the length of time it takes for one revolution of the pinion of the third wheel. This also means one revolution of the third wheel.

The center wheel we know makes one complete revolution in one hour, or 60 minutes. According to our calculation, the third wheel and its pinion are traveling eight times as fast. Therefore, if we divide the speed of the third wheel into the length of time it takes for the center wheel to make one revolution we obtain the rate of revolution of the third wheel: $60 \div 8 = 7\frac{1}{2}$. The answer shows us in minutes the time it takes for the third wheel to make one revolution.

We have now obtained information about the third wheel, its rate of speed in relation to one turn of the center wheel and the length of time it takes for one revolution of the third wheel. This system we shall follow out to obtain information about the remaining wheels and pinions.

The number of teeth in the third wheel being 75 and the number of leaves in the pinion of the fourth wheel being 10, let us determine the number of revolutions it makes for each turn of the third wheel: $75 \div 10 = 7\frac{1}{2}$. For every revolution of the third wheel, as the answer shows, the pinion of the fourth wheel, and with it the fourth wheel, make $7\frac{1}{2}$ revolutions.

Next, let us determine the time of each revolution of the fourth wheel and pinion.

The third wheel we have calculated makes one revolution in $7\frac{1}{2}$ minutes. The speed of the fourth wheel is as $7\frac{1}{2}$ turns to one of the third wheel. Therefore, if we divide the speed of the fourth wheel into the length of time it takes for the third wheel to make one revolution, we obtain the length of time it takes for the fourth wheel to make one revolution: $7\frac{1}{2} \div 7\frac{1}{2} = 1$. The answer shows us, in minutes, the length of time it takes for the fourth wheel to make one revolution. Remembering that to this wheel is attached the seconds hand, it confirms our answer as correct.

We have now calculated the number of revolutions of the fourth wheel to one turn of the third wheel, and as to the length of time it takes for one revolution of the fourth wheel.

We now arrive at the 'scape pinion, and with it the escape wheel, and shall as before analyze its speed and time for each revolution. The escape pinion has eight leaves, the fourth wheel into which it depths has 80 teeth: consequently $80 \div 8 = 10$, which shows that for each revolution of the fourth wheel the escape pinion makes 10 revolutions. Let us next figure the length of time for each revolution of the escape wheel. The fourth wheel, we have learned, makes one revolution in one minute, or 60 seconds. Following our rule to divide the length of time it takes for the wheel to make one revolution by the number of turns the pinion is compelled to make for each full revolution of the wheel, we obtain results as follows: 60 seconds divided by 10 ($60 \div 10$) $= 6$. The answer tells us that the escape wheel makes one revolution in six seconds.

We now arrive at a point where we can estimate the beats and incidentally find out if this part of our calculation is correct. Our figures show that there is one revolution of the escape wheel in six seconds, and also according to our figures the escape wheel makes 10 revolutions in 60 seconds. Knowing the foregoing, we shall see how many beats it makes per minute, per hour and in 24 hours.

The escape wheel possesses 15 teeth; each tooth strikes twice on a pallet jewel. Then $15 \times 2 = 30$, the number of beats produced for each revolution of the escape wheel. This wheel makes 10 revolutions in one minute. Then $30 \times 10 = 300$, the number of beats in one minute; $300 \times 60 = 18{,}000$, the beats per hour; $18{,}000 \times 24 = 432{,}000$, the number of beats in 24 hours.

We have learned how to calculate a train, how to figure the ratio of revolution, and time each wheel takes to make one revolution.

For easy reference and comparison we shall group our results together:

THE TRAIN.

Center wheel, 80 teeth.
Third wheel, 75 teeth.
Fourth wheel, 80 teeth.
Pinion of third wheel, 10.
Pinion of fourth wheel, 10.
Pinion of 'scape wheel, eight.

RATIO OF REVOLUTION.

Center wheel, one; third wheel, eight.
Third wheel, one; fourth wheel, $7\frac{1}{2}$.
Fourth wheel, one; 'scape wheel, 10.

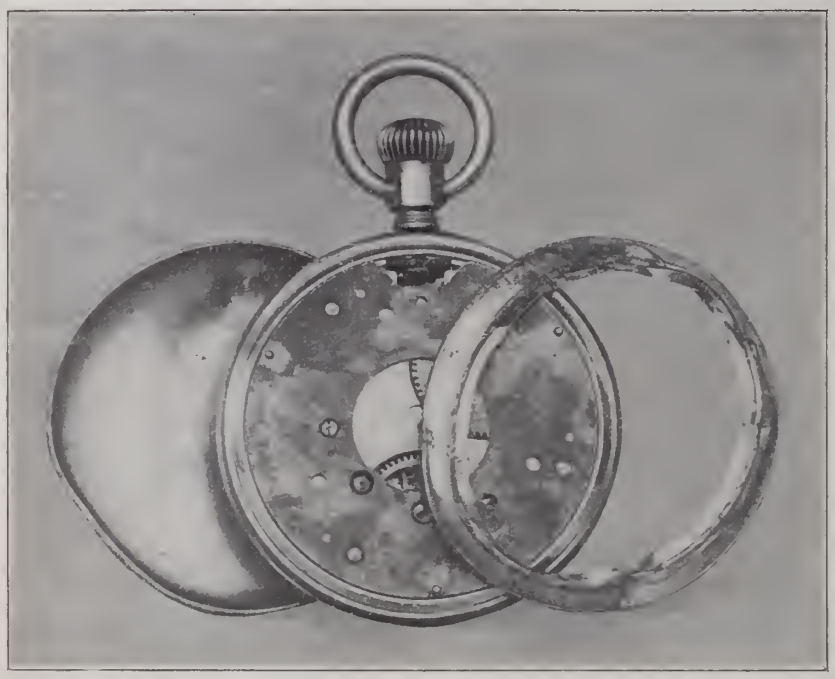
TIME OF REVOLUTION FOR EACH WHEEL.

Center wheel, one hour (60 minutes).
Third wheel, $7\frac{1}{2}$ minutes.
Fourth wheel, one minute.
Escape wheel, six seconds.

Assuming we have a barrel which makes four revolutions in 24 hours, we shall determine the number of revolutions of each wheel within the stated time:

Speed.		
1	Barrel	4 rev. in 24 hours
6	Center wheel....	24 " " " "
8	Third wheel.....	192 " " " "
$7\frac{1}{2}$	Fourth wheel....	1,440 " " " "
10	Escape wheel....	14,400 " " " "

As each revolution of the escape wheel produces 30 beats, the $14{,}400 \times 30 = 432{,}000$ beats in 24 hours; $432{,}000 \div 24 = 18{,}000$, the number of beats per hour, which we are all familiar with.



(*To be continued.*)

A well-known firm has recently constructed a stop watch which registers the tenths of seconds. The watch is fitted with an anchor escapement and can be controlled either by hand or by electricity. It is claimed to be perfectly accurate, notwithstanding the fine mechanism required.

Edward Mozart has just installed at his home in Lancaster, Pa., one of the finest cathedral clocks ever brought to that city. The case is of solid mahogany, of high artistic embellishment, and the Westminster chimes sound the quarters, half and full hours. The clock was erected by Samuel Brecher, who was sent there by Schwartz Bros., New York. The clock was made in Germany.

JUST TO SHOW THE DURABILITY OF

New England Watches

A miner in South Africa owned this watch — one of our well-known "**Padishahs.**" He lost it one day in the **Cason Gold Mine** — about 2,000 feet below the earth's surface. It was lashed into the "Koko Pans" with the gold reef and waste rock — dumped into the "skip" with six tons of reef — hauled up to the head gear and tipped into a bin holding 700 tons of rock — passed through a crusher that crushes to about the size of a tennis ball — dropped to a belt that carried it up to a sorting house, on its way passing through a huge water trommel. When found in this dilapidated condition it was **still going** and the works are in excellent condition.

The general shaking-up and jarring had no effect on the sturdy watch movement.

Odd Device for Telling Time.

THE people inhabiting the region of the Caucasus make use of a singular device for telling the time, the mechanism of which is not likely to be often deranged, as may be gathered from its simplicity.

From a piece of wood, more or less large, a triangle is carved. In one of its sides a hole is pierced, in such a manner, that the triangle, having its base horizontal at the hour of midday, the side F when exposed receives a ray of the sun, which impinges on the opposite side at t. A plumb line fastened to the point of the triangle, will then pass over the figure 12. It may therefore be understood, that according to the height of the day star, i. e., the sun above the horizon, we are obliged to incline the

ODD TIME INDICATING DEVICE.

apparatus more or less, so that the light can pass through the hole T. The plumb line by its position indicates the hour.

Inasmuch as the movement of the sun is not the same in summer as in winter, says the *Revue Internationale de l'Horlogerie*, a mean has been devised for the months of summer, and one for the months of winter. On one side of the apparatus are the figures for the hot and on the other side those for the cold season.

Even although this sun dial only shows the approximate time it is none the less an ingenious apparatus. Any one can make such a time indicator for himself. To obtain the division of the hours, it is necessary to devote a whole day, watch in hand, observing the sun and marking the positions assumed by the plumb line at the various hours.

Chili's Change of Time.

CHILI is the latest country to revise her calendar, though only to the extent of putting the hands of the clock 17 minutes back, says the *London Horological Journal*.

The transformation was accomplished with the coming of the New Year, when the gun announcing the fact was fired 12.17 a. m. (local time), and the moment was officially chronicled as midnight. The Chilian was therefore, as the *Observer* states, enabled to live (by the clock) a few precious minutes twice over. The meaning of the change was to bring the official Chilian time exactly five hours behind the time at Greenwich, England.

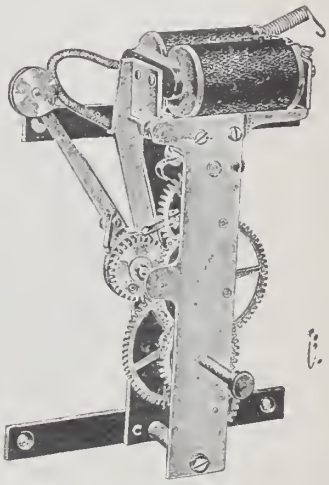
Chili has thus brought herself in line with the other countries which have already adopted Greenwich as their standard, in conformity with the movement which has been in progress for the last 15 or 20 years. India was the last to adopt Greenwich time, the system coming into force on July 1st, 1905. A few years previously Sir David Gill, the Astronomer Royal at the Cape of Good Hope, endeavored to get the Ministers to adopt a meridian of two hours east of Greenwich. The Ministers were afraid, however, of making too great a change, and compromised the matter of adopting an hour and a half. In 1903, however, Sir David Gill was successful in getting the meridian of the full two hours adopted.

A gentleman attached to the Observatory at South Kensington explained that the adoption of the Grenwich standard was of great importance. Formerly, all the places had their own observatories, and calculated their own time independently of each other. With the improved modes of communication of late years, however, it became necessary to standardize the time for the better working of the railway and steamship services.

It was the same in England before the introduction of railways. Each town had its own local time; but when the railways connected them together, it was essential to have the system regulated from Greenwich, and in a similar way the necessity has been spreading over the world with the increased facilities of traveling.

Old Grandfather Clock With Pipe Organ Attachment.

A LARGE musical clock has been exhibited in Pancoast & Spencer's show window Ashland, O. This clock stands seven feet 10 inches high, is 30 inches wide at the widest part, and 14 inches deep. The case, which is of cupboard style, is of poplar wood. The works are of copper and brass, and although the clock is 148 years old, they show very little wear. There is a pipe organ in connection with the clock, which contains 32 pipes and plays one melody each hour. There are eight different pieces all told. Three soldiers above the numerals on the clock's face perform to the music made by the pipe organ. The clock keeps good time.



The history of this ancient timepiece is interesting. It was manufactured in Germany in the year 1761—that is, 14 years before the breaking out of the Revolutionary War in this country. In 1772 it was imported from Germany by a man named Hull. It remained in the Hull family for nearly three-quarters of a century. In 1842 it was put up as the principal prize in a lottery at New Pittsburg, Wayne County, O., by a man named Hull, a descendant of the one who brought it from Germany in the preceding century, and was drawn by a man named Landis. Landis sold the clock to Dillman Switzer, who in turn traded it to Samuel Davis, father of Policeman R. A. Davis, of this city, for two acres of land in Mifflin Township. That was over 50 years ago.

Another Clock That Winds Itself.

(From *Popular Electricity.*)

THE cut shows the interior mechanism of a new kind of clock which winds itself by means of two little electromagnets. The clockwork is operated by a weight and this weight is wound up at regular intervals by the electromagnets. The method is exceedingly simple. When it is time to wind, the circuit carrying current from a battery to the coils of the electromagnets is closed by a simple means actuated by the clockwork.

The electromagnets then begin to operate like the magnets in ordinary induction coils or in a telegraph sounder, drawing down

SELF-WINDING CLOCK MOVEMENT.

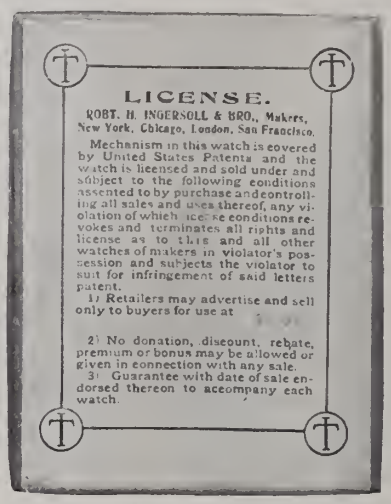
the armature and letting it go again automatically. This movement of the armature to and from the pole pieces of the electromagnets moves a lever which, by a system of pawls and ratchets familiar to mechanics, moves the winding mechanism. The current is automatically shut off by the clock when the proper amount of winding has been done.

Watch-Hat-Pins.

SUCH are the latest fashion novelties reported from Paris. A watchmaker in the Rue de la Paix conceived the idea of putting the present large size of hat pins to use by setting little watches in them. The Parisienne formerly wore her watch discreetly concealed in her belt, but now it is displayed in so many ways that it no longer has any connection with pockets, but is rather a part of the costume.

It is true, we still occasionally see it worn on a long chain around the neck, or fastened by a short chain at the waist, but it confronts us also from the handbag, from the bracelet and even from the ring on the finger. It is conspicuous in the heads of umbrellas, a fancy which adds considerably to the unpleasantness of losing that object. Watches are worn as brooches, as pendants, or they may be attached by a pin to the coat, if one is not so fortunate as to possess one in the pocket-book or the card case.

The Welsh Jewelry Co., Welsh, La., recently sustained a loss of $1,000 by fire



A fixed selling price on an article, maintained by both the manufacturer and the retailer, simplifies the whole question of salesmanship. It further largely eliminates the so-called useless shopping done by many customers.

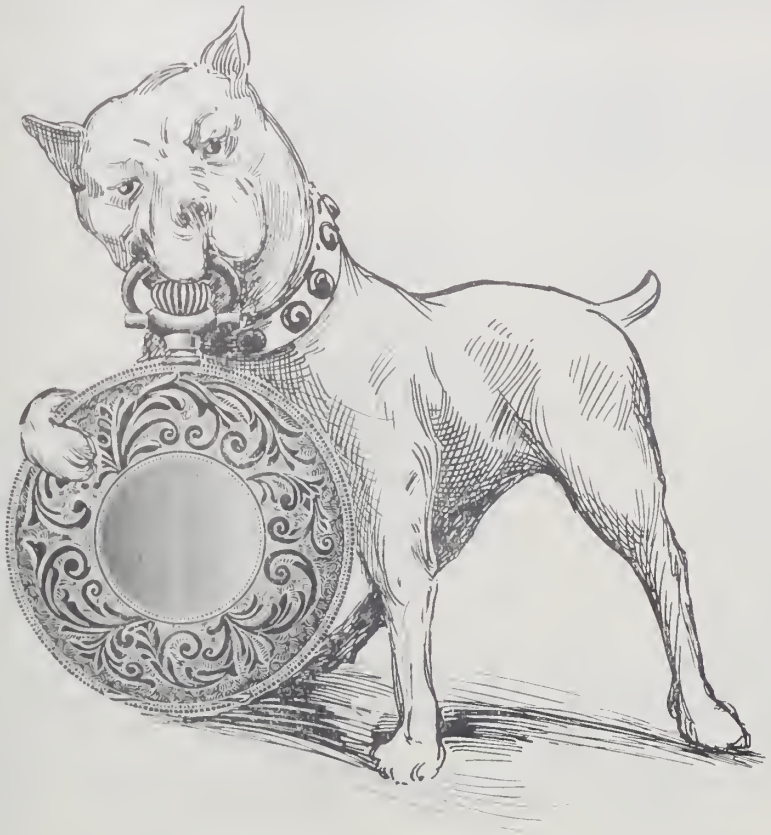
IT IS AN INEVITABLE FACT THAT ALL WATCHES HAVING A "FIXED SELLING PRICE" ARE MUCH EASIER SOLD THAN THOSE ON WHICH THE RETAIL JEWELER SETS THE PRICE."

From an article by J. P. ARCHIBALD,
President of the National Association of Retail Jewelers.

The above tag is attached to every watch that leaves our factory.

This is the Ingersoll-Trenton license label, part of every box in which the watch is sold.

A fixed selling price is not merely a help to *sales*—it adds to your *profits*, too. Your customer cannot make you reduce your price by telling you that he "can buy the same thing cheaper at Smith's" if the article you are offering is thus protected. You know it isn't so and in nine cases out of ten, you will sell him at the price asked.



Ingersoll-Trenton Watches are sold under this plan *only*. Their price protection is not merely theoretical—it does not merely cover the movement and allow the case to be sold at any price—the *complete watch* is always protected and cannot be sold by anyone at a less price than you ask.

Besides this, department stores and catalog houses are not allowed to sell these watches. They can be sold by just one class of trade and that is the *responsible jewelers*.

Isn't this *real* price protection?

THE LADY RACINE

10 Line.

Lady Racine watches have been on the American market for the past forty years and sold to the best trade throughout the country, and we have yet to hear of one jeweler who will say the Lady Racine is not a good watch and the best chatelaine watch made.

They come in both cylinders and levers. Do not be prejudiced against the cylinders, as they are entirely factory-made, very reliable, and guaranteed to give satisfaction.

Lady Racine's are made to run, keep time and last a lifetime. They come in 10 and 11 line Hunting and open face, with gun metal, silver, gold filled and solid gold cases of all styles. Finished material on hand.

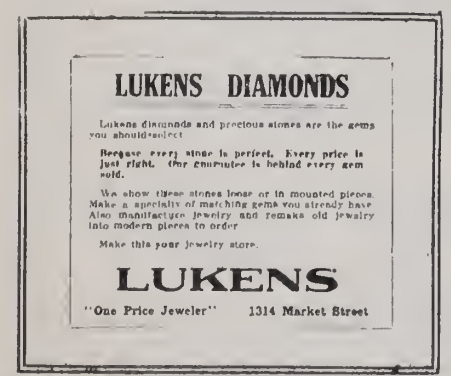
Diamond Advertising—Extensive and Intensive.

Written expressly for THE JEWELERS' CIRCULAR-WEEKLY by ROBERT FRANCIS NATTAN.



INFORMATIVE AND INTERESTING.

ADVANTAGES galore are offered to the enterprising jeweler who does some intensive advertising of diamonds, especially during April—a diamond month in more than one sense. The volume of diamond advertising, which is now so extensive, is an evidence of the fact that jewelers are seizing an opportunity by recognizing the ever-increasing demand for the birth stone of April.

As already recorded in THE JEWELERS' CIRCULAR-WEEKLY, the importations of uncut gems, principally rough diamonds, during the month of March amounted to the sum of $1,059,849. This enormous amount has never been equaled since March, 1906, when the importation of uncut gems totaled $1,062,854.35.

These figures tell the retail jeweler a significant story. They indicate not only prosperity, but also the fact that confidence is placed in diamonds as a financial investment. They tell him that a most urgent

INDIVIDUALITY WELL EMPHASIZED.

demand already exists, and that it is merely up to him to supply it. They tell him also that the investment of money in diamonds is well placed, which is about as strong an argument as can be used, particularly when the appeal is made to a prospective purchaser who does not wish to buy diamonds merely for his own personal adornment. In other words, when the appeal to human vanity fails the appeal to one's business sense impresses.

The advisability of using this argument has been urged on numerous occasions in these columns, and yet this most remunerative method of advertising diamonds is not adopted as frequently nor as efficiently as it might be.

Unstinted newspaper space should be devoted to the advertising of diamonds during

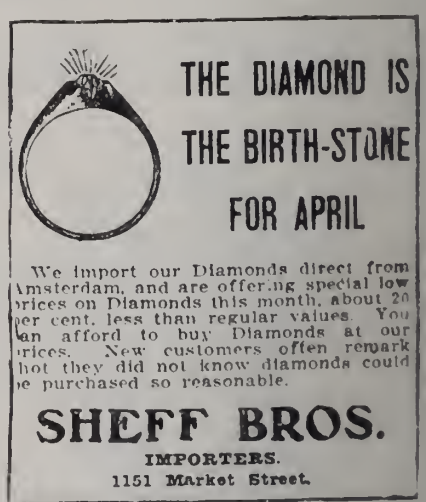
ANOTHER HANCHER TRADE BUILDER.

the month of April, when so many marriages take place. The activities of Cupid really make business for the jeweler, so that the gems may be advertised as a necessity created by the usual custom of giving the prospective bride an engagement ring or an extra gem as a bridal gift.

Do not fail to tell the public in your advertisements why it is especially advantageous to purchase diamonds at your store. This advantage may accrue from your early purchasing at a good price, from the extra fine quality of the precious stones which you carry in stock, from your reputation built upon years of reliable selling, etc., etc.

One of the functions of correct advertising is, of course, to create confidence. This confidence is created not merely by the use of large space in the right medium, but by good copy as well.

Advertising which would be correct in one territory would admit of variation in another, so that your home town conditions, clientele, industries, etc., must all be taken into consideration. The deferred payment plan of selling diamonds, which has been successfully adopted by many dealers, might not be an advisable procedure among others, everything depending upon circumstances and conditions.



This plan is much different from the old method of selling on credit. It consists of making a substantial payment in the beginning, and then a stipulated number of regular payments, fairly large in amount. A good example of this plan is shown in the announcement of W. C. Graves & Bro, Memphis, Tenn., in their announcement. They advertise diamond ear screws at $125. The announcement has been reduced from eight inches, single column.

"Diamond Excellence" is emphasized in the advertisement of the Hess & Culbert-

AN ENTERPRISING EFFORT FROM OKLAHOMA

son Jewelry Co., St. Louis, Mo., reduced from seven inches, double column. Here are advertised a variety of desirable pieces of jewelry, including solitaire diamond rings, brooches set with diamonds and other precious stones. It will be noted that a terse description is printed under each illustration, together with the price. This combination of illustration and description and

FROM WHEELING, W. VA.

price proves exceedingly satisfactory from an advertising and a selling standpoint.

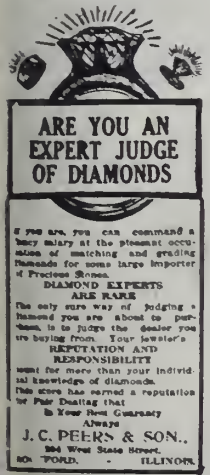
Sheff Bros., Wheeling, W. Va., use a small announcement, occupying only 2½ inches, single column, but there is offered a strong inducement to buy in the text.

In the rapidly growing city of Oklahoma

Retail Advertising Department.

Okla., the advertisement of the Hartwell Jewelry Co. appeared in a recent issue of a daily newspaper. The ad. features an unusually fine pair of twin diamonds, priced at $1,200. In the last paragraph, however, there is the judicious announcement that other twin diamonds may be obtained from $25 up. The advertisement occupied 5¾ inches, double column.

W. J. Lukens, Wheeling, W. Va., is doing good work to win the confidence of the



DIGNIFIED DIAMOND JEWELRY ADVERTISING.

purchasing public by offering his guarantee with every gem which he sells. His present announcement was used in a space of four inches, double column.

The ad. of Charles N. Hancher, of the same place, contains that subtle element of human interest which always makes a strong appeal. This jeweler is conducting a series of well-written advertisements of five inches, double column.

The obligation placed on most jewelry purchasers of putting confidence in the seller is brought out in the announcement of J. C. Peers & Son, Rockford, Ill. Theirs is a forceful ad. and is fairly well displayed. Its original space was five inches, single column.

A FORCEFUL AND LOGICAL ARGUMENT.

Some of the legendary beliefs associated with the wearing of the diamond in an engagement ring are given in the attractively arranged advertisement of the Paul, Gale, Greenwood Co., Norfolk, Va.

Herman Lange, Cincinnati, O., in a space of 6¼ inches, single column, gives a twofold reason for the purchase of diamonds, namely, the pleasure of wearing them and the advantage derived from investing in them.

The necessity of depending upon the reliability of the seller of diamonds is also emphasized in the advertisement of L. W. Suter, Seattle, Wash. This announcement is well written and well displayed. The selling policy announced in the panel on the

GOOD COPY, WORTHLESS CUT.

left, "A frank, truthful attitude toward all patrons is a feature of this house," will have good effect.

It is very evident that retail jewelers cannot be too forceful in laying stress upon their reputation for honest selling and scientific knowledge of precious stones. It would be folly indeed to emphasize qualifications which are not possessed, but considering the amount of available literature published in the trade press and elsewhere there is scarcely any excuse for ignorance, and less for lack of honesty.

The responsibility of a jeweler is great, but he can build up his own trade and earn an enviable name for the trade in general by filling that responsibility conscientiously.

Convincing Diamond Talk.

AS usual, diamonds are popular this Spring, and we have a large assortment of these beautiful gems—the best collection in the city—and all are exceptionally good values. The prices we have placed on these stones ought to make them move rapidly. We'd be delighted to show them to you. Santa Fe Watch Co., Topeka, Kans.

Diamonds are a good investment. They are constantly increasing in value and while you wear a gem it is earning you recognition and promoting a feeling of stability among your friends. The constant increase

SHOWS UP WELL.

in price will earn you a good rate of interest on your investment. A lucky purchase of about 50 diamond rings from a New York diamond importer, who was badly in need of cash, enables us to offer some fine pure white diamonds fully 25 per cent. below their market value. Come in and let us show you these bargains. Sold on weekly or monthly payments. J. H. Sides, Chestertown, Md.

To be bedecked with beautiful jewels adds a glamor to the beauty of all women. We show the finest assortment of handsome jewelry in town. Diamonds and precious stones are set in magnificent designs of rare workmanship. Our other departments contain much that is of value. Tableware, in solid and plated silver and gold, is shown in beautiful designs at reasonable prices. Our line of sterling novelties is complete. R. J. Riles Co., Jacksonville, Fla.

Good copy, good results; good results, good money; good money, good times.

ATTRACTIVE TYPOGRAPHICAL DISPLAY.

Waterman's Ideal Fountain Pen

Let Your Hand Be Your Reminder

that there are five types of Waterman's Ideal Fountain Pens. Each type is of that uniform high quality which makes the name **Waterman's Ideal** represent success in fountain pen making and selling. With one investment, one maintained price and one stock, backed by one world-reputation, one guarantee and one large organization, dealers have the great advantage of supplying the ever-increasing demand for fountain pens. The demand that has grown from the success of our Standard pens during the past quarter century.

A well assorted stock, well displayed, secures the trade resulting from our extensive advertising.

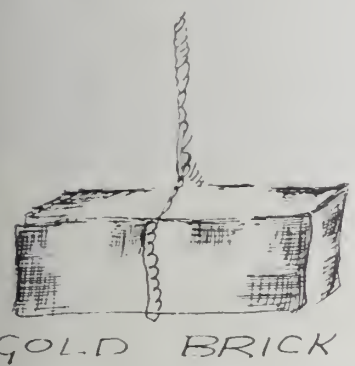
STORE KEEPING DEPARTMENT



That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

Turning Gold Brick Propositions Into Paying Investments.

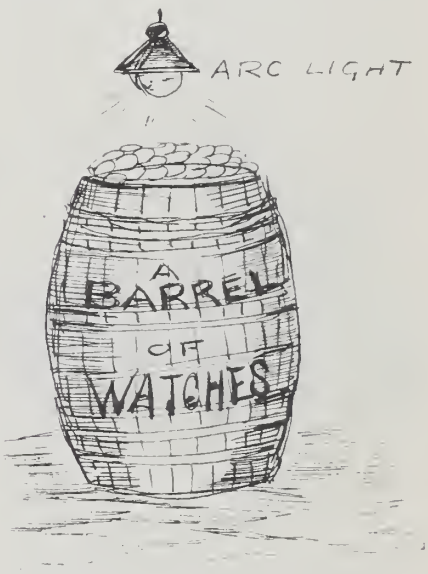
Written expressly for The Jewelers' Circular-Weekly.

A FRIEND of mine went to work in a certain jewelry store. After he had been employed a few weeks, he began looking around the storerooms. He found a number of old watches, which were called gold bricks and were secreted in the basement, among other supposed unsalable goods. The salesman examined the watches and saw at once that the watches possessed certain good features and could be sold.

Although not suitable for a business man, the salesman figured at once that the watches could be fixed up a little and sold to boys. The dusty and soiled watches

were brought up and turned over to the mechanical department of the store for cleaning. In a few days the watches were put into proper order for exhibition. Then the salesman sent off and bought six dozen new watches of the same kind. Then he fixed up a barrel with a partition near the top and piled the watches thereupon and placed the barrel in the show window with a placard announcing a barrel of watches for sale at $—— each. These watches were all sold, both the new lot and the old lot, in a very few days. An arc light was hung over the barrel so as to advertise the watches at night.

In another instance, a salesman discovered a lot of old kodaks in the storeroom of the store where he was employed. He looked through the lot and found that the lenses were good and that the kodaks would be useful if fixed up. He was told that the job lot of kodaks was a gold brick affair. But this did not prevent him from going ahead. He secured the services of the store boy, and between them the old kodaks were fitted up once more. The lenses were removed and polished. The dust which had collected on the devices was cleaned off. Some Japan coloring was obtained to touch up any scratches in the covers of the kodaks. Then the proper labeling of the goods was begun and the goods were piled up in the show window.



It was out-door picture taking season, and the kodakers were not slow in observing the kodaks placed on sale below the regular value. In a week every gold brick kodak was gone and the owner of the store was pleased.

Job lots of almost any kind of jewelry stock can be found in the gold brick assortment of the average store. Some owners of reputable stores, rather than take the chance of selling customers anything out of color, will dispose of the suspicious articles to a junk man at greatly reduced prices. I once saw a lot of gold brick car ornaments which had been purchased by a reliable concern for the holiday trade. The earrings were of ancient manufacture, and the firm thought that they might do quite a little business in novel, out-of-fashion goods. But the earrings proved to be of inferior manufacture. The firm sold the several packages of earrings at a heavy loss to an auction dealer in jewelry. The latter had the earrings reconstructed so as to do for hair ornaments. These ornaments for the hair went off briskly, giving the dealer 200 per cent. profit on the former gold brick lot of stuff.

The introduction of the slot machine in some of the country jewelry stores has developed a line of gold brick articles to handle. In one store the slot machine presented a piece of gum with every prize package of cheap collar buttons. The thing created amusement for a time, but soon proved to be a gold brick on the hands of the owner of the store. They fired the machine into the basement and let it stand until the agent came along, and the boss was shown certain papers which he had signed and the slot machine was promptly replaced in a public position in the store. There it had to remain until the expiration of the contract.

An acquaintance thought that he could derive considerable income if he fitted up half of the front of his jewelry store as a waiting room for the electric car passengers who usually stood upon the corner. Three seats were put in, a sign put up and the owner of the store soon had a gold brick on his hands.

People waiting for the cars with market baskets, muddy feet and smoking pipes, entered the store and disturbed regular

A JEWELER'S ODD SELLING SCHEME.

customers. The people waiting for cars expected the salesmen to know the time of going and coming of the cars. The owner of the store got a calling down now and then when a car was late. People asked for a drink of water and permission to leave packages, dogs, babies and umbrellas in charge of the clerks while they went somewhere else to buy goods actually carried in the store.

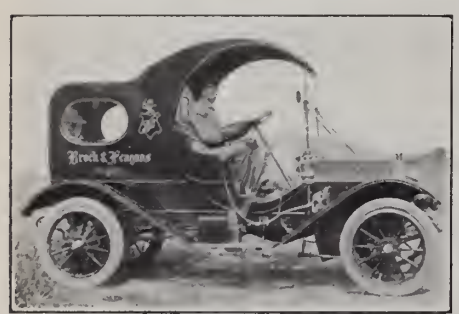
My friend put up with it 20 days and then tried to quit. The sign was removed. But the people remembered the nice waiting room and went in just the same. The settees were taken out, and that did not matter, for the folks stood up. According to last accounts this gold brick still hangs fire.

One jeweler thought that he would make money on the side with a plating outfit. He tried it. He plated some spoons and had to pay the value of them because of

Storekeeping Department.

the shabby work. He ruined some other articles belonging to customers and decided that he had a gold brick on his hands and closed out. A new salesman was hired one day and he spied the plating outfit and asked permission to do some plating. He went at it in earnest as soon as given permission, and as he understood how to do the work he changed the gold brick proposition into a profitable one for the store and earned money and gave satisfaction as long as he remained.

The introduction of the circulating library has proven itself a gold brick to some jewelers, for valuable time is taken in waiting on the book people while the more profitable patrons may be delayed. On the other hand, the circulating library has been the means of giving a high class of custom to some jewelers.



Retail Jewelers' Unique Delivery Auto.

Los Angeles, Cal., April 6.

Editor The Jewelers' Circular-Weekly:

We send you a picture which will give you a very good idea of our new delivery car, designed especially for us and along different lines from any other delivery car that we have ever seen.

The car is a two-cylinder "Duro," 26 horsepower, with three speeds forward, and

AUTO MADE ESPECIALLY FOR BROCK & FEAGANS, LOS ANGELES, CAL.

meets our requirements in every way. Directly back of the driver is a door which opens into a heavy wire mesh enclosure in which we put the smaller packages, and particularly the more valuable ones. The floor of the car extends under this enclosure so that we have the entire length of the floor space, if needed. The car is completely equipped with lamps, wind shield, and also leather curtains, so that we can enclose the driver, entirely protecting him from the storm at all times. This is not a very important matter in Los Angeles, but it is a necessary protection in many places. We find the car invaluable for our use, as we cover quite a large territory and average about 50 miles per day with our deliveries.

We have taken one of our men from the floor, who is thoroughly informed on all matters pertaining to our store and the repair departments, have given him a course in an automobile school, and placed him in charge of the car. He will be able to regulate clocks and attend to other matters pertaining to our store service. It is the first time we have been properly represented by an outside man.

After a great deal of investigation we learned from the experience of others that a two-cylinder car is more suited to delivery use than a four-cylinder one, as high speed is not required, and there is always a danger of drivers overspeeding their cars.

Very truly yours, Brock & Feagans.

The Attractive Store of Talcott Bros., Olympia, Wash.

ONE of the attractive retail jewelry establishments of Olympia, Wash., is that of Talcott Bros. The main salesroom is 29 by 44 feet and is very neatly furnished. There is a cut glass room measuring 12 by eight feet and an optical department four by 26 feet. The ceiling, which is 12½ feet high, is painted white. The walls of the room are covered with linerusta painted light blue, there being a two-inch gold border where the linerusta and ceiling meet. The cut glass room is finished with a sheet steel ceiling and linerusta walls, with drawers below the ledge for extra stock. This room is finished in glossy white and shows up very beautifully. The floors are covered with linoleum. Both gas and electricity are used for illumination.

INTERIOR VIEW OF STORE OF TALCOTT BROS., OLYMPIA, WASH.

There are two show windows, 80 by 100 inches, with side lights 48 by 80 inches and a recess doorway, five by eight, with double doors containing a long side light on each side.

Along the entire front of the establishment there is a box frame in which the awning rolls up in order to be clear of inclement weather. This box frame is just above the windows. Above that, extending across the entire front, is a prism glass, 30 inches wide, for the securing of good light. All the fixtures and furnishings are of walnut. There are four wall cases and seven show cases measuring eight feet in length and forming a horseshoe shaped case. Besides these there are four side cases, two of which measure 10 feet in length and two eight feet. In the rear of the establishment there is a handsome vault, measuring on the inside eight by eight feet. The business was founded in 1872 by C. R. Talcott, who, in 1882, admitted his son, C. N. Talcott, L. G. Talcott becoming a member of the concern in 1889.

Value of a Name.

SOME time since, a man came to us seeking light on the best method of disposing of his business. We looked into the facts. He is making a snug $25,000 profit yearly from it. It's manufacturing, by the way. But—a cross examination revealed the fact that the good will of that immense business is scarcely worth $25.

Why? Because he has been moving along the path of least resistance, doing business on a reputation, as it were. He has no brand name his neighbor next door or anybody else is familiar with. He has held a certain amount of conservative trade that buys in the same quarter year after year, but his output has been dwindling every year. He did not build for the future. He has made a good living, to be sure. Yet he ought now to be able to sell that business at a price to enable him and his family to live in luxury for the rest of their days.

He will never do it! Advertising would have made this possible. Similarly with a retail shop. Your clientele is always changing. The principal item in the good will of your business—and that fixes its real valuation—is the extent to which your shop is known. You cannot hope to make it well known by merely occupying certain premises and putting some stuff in your windows and some clerks behind the counter. That ought to be obvious to any one who thinks.—*Boot and Shoe Recorder.*

The Law and the Retailer.

By Bernhard Raymond, LL.B.,
of the New York Bar.

[EDITOR'S NOTE.—The articles published under the above caption have been written expressly for THE JEWELERS' CIRCULAR-WEEKLY and with the especial needs of the retail jeweler in mind. Considerable legal matter of a generic nature has been published in various journals, but the purpose of this series of articles is to give only what is believed to be particularly valuable and helpful to the jeweler.]

(*Continued from issue of March 30.*)

Old Agreement May Be Modified.

The provisions of a partnership may at any time be altered, explained, superseded or abandoned by the consent of *all* the partners. This consent may be shown by the acts, practises, conduct or express words of the parties.

Expiration of Partnership Term.

If the term for which the partnership was organized has expired, and no new agreement is executed, the partnership will be deemed to be governed and controlled by the provisions of the old agreement except as to the period of the partnership duration.

The original articles will also survive the change of personnel comprising the firm, evidenced by some act equivalent to an adoption by the new firm.

While a firm name is necessary, as the law recognizes no existence of the firm as a separate and distinct entity or being as apart from the association of the partners, yet a firm name, like a trade-mark, serves to inspire confidence and facilitates extension of credit besides being ornamental. It affords convenience of identification in ascertaining the individuals interested.

When once adopted it should be followed, as frequent changes affect the standing of the firm.

Penal Prohibition of "& Co."

A person who transacts business, using the name as partner of one who is not interested with him as a partner, or using the designation "and company" or "& Co." when no actual partner or partners are represented thereby, is guilty of a misdemeanor. But this section does not apply to any case where it is specially prescribed by statute that a partnership name may be continued in use by a successor, survivor or other person. (N. Y. Penal Code, sec. 363.)

The object of this statute is to prevent persons from giving credit to fictitious firms on the faith of the fictitious designation.

In an action brought to recover the sum of certain certificates of stock sold to a party, the party defended the action by setting up the statute that inasmuch as the creditor was guilty of a misdemeanor in that he carried on business under the name of "Kennedy & Co.," whereas no partner was associated with him in the conduct of his business, he could not sue for the money due him.

The court held that, since the object of the legislature was to protect persons from giving credit to persons conducting business under fictitious designations, and it is not needed to protect those who obtain credit from such persons, the person is not precluded from recovery of the amount of credit by the fact that the designation was fictitious. (Gay *vs.* Seibald, 97 N. Y. 472.)

Fictitious Firm Name.

As has been shown in the foregoing, since section 363 of the New York Penal Code makes it a misdemeanor to do business using the name of one not interested in the conduct of the business as a partner, or the designation of "and Co.," or "& Co.," when no actual partner or partners are represented thereby, it becomes important to point out in what instances it may be done without incurring the penalty provided by the above provision.

The case of Rosenheim *vs.* Rosenfield, members of a partnership engaged in the manufacture of jewelry novelties, affords a very interesting and instructive illustration. The parties used and employed in their business the name of "The R. & R. Jewelry Works."

The firm was dissolved and an agreement was entered into by which Rosenheim took the entire stock of goods and merchandise and accounts of the firm. Rosenheim was to succeed to all the right, title and interest to the partnership assets, trade-marks and good will, and it was further provided by agreement that "It is further understood and agreed that the said Max Rosenheim may have the absolute and unrestrained permission and right to use the said firm name of Rosenheim & Rosenfield Jewelry Works, and is to have all the benefits and privileges flowing therefrom; that is to say, that Rosenheim is to have the absolute and exclusive privilege of transacting and doing business under the name of 'R. & R. Jewelry Works,' and is to have the exclusive right to use all the trade-marks used heretofore in said establishment, this day dissolved.

"It is further understood and agreed that the said Rosenfield is to have no power or authority to issue, or make, or accept any notes, checks or bills of exchange, or make any other contract, or writing, or paper under the said name of Rosenheim & Rosenfield Jewelry Works; it being understood that there is no relationship of principal, or agent, or of copartnership between the said Rosenheim and Rosenfield."

After these agreements were made Rosenheim commenced and continued business for himself in the manufacture of all kinds of jewelry under and used therein the name of R. & R. Jewelry Works. An action was thereafter brought by Rosenfield and an injunction was sought to be obtained to restrain Rosenheim from using the firm name of Rosenheim & Rosenfield on the ground that the contract whereby the right to so use the firm name was void and in violation of section 363 of the Penal Code, above referred to, in that the name "Rosenfield" represented no actual partner, and forbidding any person from using in his business the name as partner of one not interested with him as partner, and declaring the act to be a misdemeanor.

The court held that this objection had no foundation in the facts of the case, for the phrase "The R. & R. Jewelry Works," although identical in its two initial letters with the initial letters of the surnames of the parties, does not as it has been used, and as it was intended by the agreement with Rosenheim it might be used, indicate that the business since carried on by him is that of a partnership with any other person.

In their use they have been followed by the name of Rosenheim as sole proprietor, as illustrated below:

"Rosenheim & Rosenfield Jewelry Works,
"Rosenheim, sole proprietor."

An arrangement which on its face carries the information that the use is not by a firm, but by an individual only, and no person from a circular or advertisement in that form could by any possibility be misled or induced to believe that the defendant Rosenheim was engaged in the jewelry business with another person as a partner of any business firm.

The words "sole proprietor" clearly expressed the fact to be that the business was solely that of himself, and that the statute was in no respect violated.

The statute, which is highly penal in its provisions, should not be extended by the construction of its words to include the case related above. (Gay *vs.* Seibold, 97 N. Y. 472.)

The Use of the Word "Bro. or Bros." No Bar to Recovery.

A suit was brought by Ludwig Baumann against Richard De Logerot. In the complaint Ludwig Baumann stated that he conducted a business under the name and style of Baumann Bros. Richard De Logerot defended the suit on the ground that the plaintiff stated himself out of court, that he conducted a business under a firm designation implying the existence of a partner, whereas in fact none existed, and therefore was guilty of a violation of section 363 of the Penal Code and could not recover for merchandise sold.

For Ludwig Baumann it was contended that the name of Baumann Bros. does not in any way (without proof) tend to legally convey to any mind the impression that a firm is intended.

The court held that even if the plaintiff violated the provisions of section 363 of the Penal Code by the use of the firm name of Baumann Bros. (which it did not decide), Ludwig Baumann has not thereby become an outlaw and lost all civil rights, and that he was entitled to enforce his claim against Richard De Logerot.

The Firm Name a Thing of Value.

While at the common law the firm name was not regarded as the property of the firm and there was nothing to prevent persons from carrying on business under any name they chose, modern commercial law realizes that the firm name is an asset, a thing of value which may be the subject of sale and assignment.

The law thus realizing that a firm name frequently is a valuable acquisition, it will not permit one firm to mislead the public by so using the name of another as to pass off themselves or their goods for that other, or that other's goods.

Continued from issue of March 30.)

COLONIAL STYLE. "It is evident that the art of a new country like the United States must be in most intimate connection with the style of art which predominates in the original country of the artist. This is the reason why styles of almost all the European states were originated in America. After a time, however, all these different styles became united with one another, forming themselves into the so-called *Colonial style.* * * * Notwithstanding the European reminiscences which they contain, the artistic creations of the XVIII. century in the United States possess undoubtedly certain characteristic national traits of their own"—Speltz.

COLOR (French *couleur, émail opposé au metal;* Latin *tinctura*). In heraldry "the *colors* used in coat armor (anciently termed *tinctures*) are 10; but the yellow and white, called *or* and *argent* (gold and silver) are said to be *metals.*"—Robson. "The chief *colors* are five in number—*azure,* or blue; *gules,* or red; *vert,* or green; *purpure,* or purple; and *sable,* or black. Others are—*tenné* (bright chestnut) and *sanguine,* or *murrey* (a dark dull red)."—Milbourne. The other three are now generally considered only as *furs.* (See *furs.*) For engraving these colors see under separate titles. A basic rule in heraldry is that *metal* is never displayed on *metal,* nor *color* on *color.* If the *charge* is *metal* the *field* must be *color.* Thus a red lion on a blue field is not heraldry. In true heraldry this was an inviolable rule. But in the new heraldry an exception has crept in by which the colors *proper* (*i.e.,* according to nature) may appear on a colored field. Thus a red rose or green leaf on a blue field is now permitted.

Colors in ceramics consist of *under-glaze, in-the-glaze* and *on-the-glaze* or *over-glaze.* As their names imply, they consist of those pigments which are used in the different processes of decoration. The *under-glaze* and *in-the-glaze colors* are those which can stand the heat of the glost oven, and in the case of some kinds of porcelain they must stand the *grand feu* (1,300° to 1,500° C.) when the glaze and biscuit are fired in one operation. *On-the-glaze* or *over-glaze colors* are, of course, more numerous than the former, as they only have to withstand the muffle oven heats that melt enamels.

COLOR TEST. One of the connoisseur's ceramic tests is so called. E. A. Barber describes the test as follows: "If on holding a piece of ware to the light it shows a mellow ivory tint it may be considered strong evidence that there is sufficient bone in its composition to entitle it to be classed as soft porcelain; but should the color possess a bluish tone it would indicate a hard or vitreous body. Where, however, the proportion of bone is small, this test would prove unsatisfactory."

COMB. Ivory *combs,* known as "liturgical combs," were part of the instruments used in officiating at mass in medieval days. The bishop's hair was combed by the deacon as a part of the ritual.

COMBATANT (her.). Fighting, or *rampant* face to face; applied to animals.—Milbourne. (See *rampant.*)

COMBED (her.). "When the comb or crest is of a color different from that of the rest of the animal it is said to be 'combed' of that color."—Milbourne.

"COMBED WARE" was a style adopted by the early Staffordshire potters. It consisted of giving the utensil a coat of *slip* of another than the body color and then "combing" it after the method of the "graining" of wood painters.

COMBON. A ceramist at Moustiers, end of the XVIII. century.

COMES, Gabriel. A Spanish goldsmith (1546).

COMMISSE CROSS (her.). Sometimes called

CROSS COMMISSE.

tau cross. Latin *commissa.*

COMMON CHARGES. "All those *charges* used in heraldry which are not included under *ordinaries* and *subordinaries.*"—Milbourne.

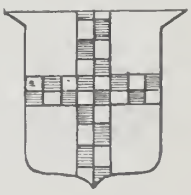
COMMUNION CUP. The chalice, after the Reformation, became known as the *communion cup.* The bowl changed from the shallow to a large and deep form. (See post-Reformation chalices under title *chalice.*)

COMPAGNON ATTENDANT MAÎTRISE. A term used by the French goldsmiths. In "1571 the Parisian goldsmiths brought it about that 300 should be the legal limit of their numbers; in 1581 followed the determination that the apprenticeship should extend over eight years, and that then the apprentice should work as *compagnon attendant maîtrise* (literally, companion waiting on his mistress) a further three years."—Bucher.

COMPÈRE, Jehan. An eminent goldsmith of Paris, 1400.

COMPLEMENT. "In heraldry, complement is a term applied to the moon when it is at the full; it is also expressed as *in her plenitude.* It is usually shown *argent,* and environed with short, straight rays. When eclipsed it is blazoned as *in her detriment,* and is *tinctured sable.*"—Milbourne.

COMPONÉE CROSS. Also called *gabony.* This heraldic cross is "divided into chequers,



CROSS COMPONÉE.

or squares, by transverse lines, forming only one row."—Robson.

COMPONY, *componée* or *gabony* (her.). "Is composed of two colors in equal divisions, in a *bordure,* or any other *ordinary;* if it consists of two ranges of chequers it is *counter-componée;* if of three, *chequy.*"—Robson.

COMPONÉE COUNTER-COMPONÉE CROSS. This

CROSS COMPONÉE, COUNTER-COMPONÉE

cross is "formed of two rows of chequers."—Robson.

COMPOSITE ORDER. This order in architecture has been called "a grafting of the Ionic on the Corinthian. The *Composite* is of a very rich character. The lower half

CONRADE, Augustin. A painter-ceramist at Nevers in the XVI. century.

CONRADES, Dominique and Antoine. "In 1578 an Italian gentleman (Dominique Conrade), a native of Albissola, who probably came to France in the suite of the Medici, obtained letters of naturalization from Henry III, and established himself at Nevers with his family. His two brothers, who, with himself, are qualified as potters, accompanied him. * * * Antoine, his son, after serving 14 years in the army, is styled in a brevet, 1644, signed by Anne of Austria and Louis XIV. *gentilhomme et faiencier de la maison du roi*, and his son Dominique has the same appointment to the queen. The secret of their fabrications appears to have been kept for 30 years, the workmen being taken from Italy."—Marryatt.

CONRAD (or *Conrarde*) of Tours. An eminent goldsmith of France, 1493.

CONSOLE (*modillion*). "The form of *console* is very varied, as are its uses and applications. It is determined by the function, and the material of which it is made, as well as the style of the period. Architectural members of the character of *consoles* are early found in the Chinese and Indian, as also in the Assyrian style; but in the Egyptian style they are wanting. Volute *consoles*, very beautifully developed, are found sporadically in the Greek style; but the Roman style was the first to make

GREEK CONSOLE, FRONT AND SIDE VIEW, NORTH DOOR OF ERECHTEUM, ATHENS.

an extensive use of these forms. The decorated ends of beams are probably to be regarded as the original model for *consoles*. The S-shaped double volute, with a large and a small spiral, is the standard form. In this *console* the line of construction and the space for the actual decoration are given in the side view, while the front, which is subordinate, is ornamented by scale motives and leaves, which adapt themselves in graceful curves to the standard form.

"When the *console* is used in the *console-band* of a cornice, or as the bracket of a balcony, its attitude is recumbent. When it supports the cornices of doors and windows its attitude is erect. No other application is known in the antique. The early Christian and Romanesque art adopted coarse copies of the antique, and also created new ones suited to the new requirements. Thus early we find those modillion forms which become typical for the wooden architecture of the Middle Ages being chiefly used beneath moulding and in corners of doors between the jambs and the lintels. Another class exhibits a central core tapered downwards. * * * This latter form is also used in Gothic art as a bracket for the statues of the saints, which were applied to piers and the arches of portals.

The Renaissance remodels the last-named *console* in its own way, but by preference to the antique form, sometimes reversing the volutes and giving the front a richer and more independent ornamentation. The combination of several smaller *consoles* to form a composite *console* occurs.

"The Baroque style, which followed the Renaissance, also made essential additions to the richness of the forms. The strict line of the volute is abandoned and frequently broken by straight lines. The *console* is shaped in front view like a pendant triangle or typographical tail-piece. Another invention of this period is the *triglyph-console*.

"The Rococo period abandons the traditional standards and sacrifices construction to picturesque license. Shell work and unsymmetrical scrolls serve as supports.

"Modern art recasts the elements of former styles without adding anything essentially new, unless we regard as a novelty the custom of placing busts, clocks and knickknacks on independent *consoles* which are used as brackets."—Meyer.

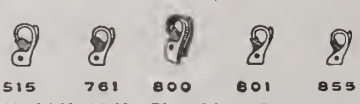
CONTOISE. (See *cointise*.)

CONTOURNÉ (her.). "Applied to animals when shown facing to the sinister."—Robson.

CONTRE-ÉMAIL (Fr.). "The side opposite the enamel (in enamel work) as a rule receives a coating of glaze, the so-called *contre-émail*. The purpose of this is to create a counterpoise against the physical effect of the process of melting and cooling of the glaze-flux that the metal causes. Usually, however, a colorless, or at least transparent, material is used as *contre-émail*, so that the kind of metal remains visible."—Bucher.

CONVENTIONAL designs are those in which the natural forms imitated are deviated from, usually in simplification, and in order to render the work more practical. The adaptation of forms to the material worked on, or to the tools used. The term is often loosely applied to convey the idea of forms not natural but accepted in art circles as representative.

COOKSON & HARDING. Owned a Staffordshire pottery in the XVIII. century.



(To be continued.)

Thieves recently cut a hole in the plate glass show window in the store of F. N. Prevey & Co., Akron, O., and stole $300 worth of miscellaneous jewelry. There is no clue.

"Character" and its consequence

The value of "character" in business cannot be over-estimated.

It should be the chief asset of Refiners such as ourselves.

For, look at it as you will, you are largely dependent on the "character" and reliability of the Refiner as regards your returns.

It is the recognition of this that leads us to the extreme of carefulness in assaying the value of each lot of Waste sent to us.

WORKSHOP NOTES AND QUERIES

[Answers are also solicited from our readers to the questions published on this page.]

No attention paid to communications unless accompanied by full name and address of the writer.

QUESTION No. 2557.—**Reid's Idea of Watch Oil.**—*Can you tell me where I can secure a copy of Thos. Reid's book which, I am informed, includes a description of a method of preparing watch oil out of olive oil?* *W. J. K.*

ANSWER:—The following on the preparation of oil is quoted from the work which you mention: "Put a quantity of the best olive oil in a phial with two or three times as much water, so that the phial may be about half full. Shake the phial briskly for a little while, turn the cork downwards and let most of the water flow out between the side of the cork and the neck of the phial. Thus the oil must be washed five or six times. After the last quantity of water has been drawn off, what remains is a mixture of water, oil and mucilage. To separate these from each other, put the phial into hot water for three or four minutes, and most of the water will fall to the bottom and must be drawn off as before. The oil must then be poured into a smaller phial, which, being nearly full, must be well corked, set in a cool place and allowed to stand for three or four months, or until the water shall have subsided, with the mucilage above it and the oil, perfectly transparent, floating on the top of the mucilage. When time has thus completed the operation the pure oil must be poured off into smaller phials and kept in a cool place, well corked, to preserve it from the air. The fat or oil which is left in the pan after making calves'-feet jelly, is taken and put into a jug or bowl and allowed to remain for some months. What swims on the surface may be skimmed off, put into a small phial and kept there for some time. This will be found to be a very fine kind of oil—at least, it has the appearance of being so. A French chemist named Jodin prepares an oil, adapted for the use of watchmakers, which resists the cold to a considerable degree, but in time it will become green at pivot holes like most other oils. Olive oil freezes at 38° or 36° F., but if put into an open glass phial and exposed to the sunshine for a little while it will not be apt to freeze until the thermometer is down to 21°. As the amount of friction, even in the best clocks, in a great measure depends upon the oil with which the various parts are lubricated, the following information may be considered of some importance. Col. Beaufoy states that olive oil may be freed from its mucilage merely by exposure to the rays of the sun for one or two years. Chevereul, an eminent French chemist, recommends another process for the same purpose. To this effect he mixes seven parts of alcohol with one of oil, which must be heated in a flask almost to boiling; the lighter fluid is then decanted and, on being allowed to cool, a little portion of fatty matter separates, which is to be removed. The alcoholic solution must be evaporated to one-fifth of its bulk, and the fluid part of the oil will be deposited colorless, tasteless and free from smell. This oil smells much like what was called Arabian oil, exhibited in 1825 in Edinburgh. The printed description given with it gave neither the name of the inventor nor any place of abode, a circumstance somewhat extraordinary, and unless a great quantity of it was to be taken none could be purchased. All old watchmakers were taught not to allow the small phial which contained the olive oil to stand in the light, much less to be exposed to the rays of the sun, because this deprived it of its yellow color, which was considered a quality of the goodness of the oil. Now some say that depriving it of that color improves it. Oil extracted from poppy seeds and properly prepared will remain uncongealed at a very low temperature. Almond, walnut and hazelnut oil, if freed from the mucilage with which these oils are frequently intermixed, may be tried for watches. It was formerly an object of inquiry to know when a jar of Florence oil was in a frozen state, which sometimes took place in severe Winters. A portion of it that remained unfrozen was taken out for the use of watchmakers. We are informed that M. Frederick Schmidt, of Stuttgart, discovered an oil for chronometers, etc., which will not freeze at minus 17° F., does not dry at 212° and boils at 512°; it is not affected by cold at upwards of 50° below the freezing point. M. S. is of opinion, in which he is confirmed by experiments, that this oil will not be affected under the Poles. The progress of pouring the water off between the cork and neck of the phial was found to have something awkward and clumsy in it. Therefore, a large phial, about 17 or 18 inches deep and two inches wide, was made with a glass stopper at the top, and another was placed at the side and close on the bottom, to let the water out, which answered the purpose extremely well; also a few long phials, with ground glass stoppers. The tall phial and its stop-cock was found very convenient in the process of washing with water and letting the water out occasionally to give room for more fresh and clean water. Oil thus prepared, and afterwards carefully managed, will perhaps be found very good. Some of it we prepared in this way and applied to the pivots and holes of the clock in the Royal Observatory, Edinburgh. This clock was taken down to be cleaned after having run nearly 12 years; the pivot holes had a little greenish and thick oil on them, but in the reservoirs it was in some degree fresh and yellow. It is singular that the washing did not deprive it of its yellow color.

An Improved Method of Electroplating.

(Lecture delivered by AUGUSTUS ROSENBERG before the Royal Society of Arts.)

THE paper which I have the pleasure of submitting to you this evening deals with a novel process whereby metals of all kinds may, with the greatest ease, and without the exercise of any skill, be coated with any other metal with strongly adherent deposits of substantial thickness, in a negligible period of time and at a minimum expense, thus affording any unskilled person means whereby he (or she) may coat, for example, with nickel, silver, tin, and other metals, with no more exertion than that expended in the use of polishing powder. It, therefore, may not inappropriately be termed a domestic electroplating process.

Before describing my new process it will be desirable to refer to the process of coating metals as heretofore practiced, and not only to consider the historic development of the art, but to examine it from the chemical and electro-chemical standpoint, and to compare results with those attained by my process.

The art of coating an article made of a base metal, such as copper and its alloys, zinc, iron or tin, with a metal of higher grade, with the object of enhancing the appearance of the article or of rendering it capable of resisting the attack of corrosive agents in the atmosphere, such as acids, gases, etc., has long been practiced.

The ancient goldsmiths went so far as to coat one noble metal with another. Cellini and Theophilus in their writing refer to the preparation of "colori per colorire clave sara dorato," and give a large number of formulæ for coating various metals. The art was also practised in Egypt, gilded statues and bronzes having been discovered in tombs in that country which were in existence long before the Christian era.

Both Pliny and Vitruvius refer to gilding processes effected by amalgamation of the metals to be deposited, and long before electro-deposition was carried out it was well known that many metals could be deposited upon other metals from their solutions by simple immersion.

Zosimus, the Greek historian in the fifth century A. D., appears to have been the first to mention the fact that the deposition of metals could be effected in this manner, as, for example, that a piece of iron would be coated with copper if it were placed in a cupreous solution, while Paracelsus, who lived in the earlier part of the 16th century, succeeded in coating copper and iron with silver by simple immersion in a silver solution, ascribing the apparent change of iron into copper, when dipped into the blue waters of Schmallnitz, in Hungary, to an actual transmutation of metals. Some years later, Bernard de Dalbirry also described a similar method, and Stisser, a professor of chemistry at the University of Helmstadt, as late as 1690

Extracts From Two Letters

unsolicited, and which give some idea of the hundreds of similar letters received lately, telling of the satisfaction watchmakers all over this world are receiving in the use of

Fulcrum Watch and Clock Oil

BEACH CITY, Ohio.
Am glad to inform you that I have your oil and am using it and I think it is about the best I have ever used.

Workshop Notes Department.

believed that by this process iron was changed into copper.

Contact electricity was discovered by Galvani in 1788. Prior to that date there had been nothing like scientific reduction of metals by electricity, and it was only in 1799 that Volta afforded the proper explanation of Galvani's discovery. Two years later Wollaston observed that "if a piece of silver, in connection with a more positive metal, be put into a solution of copper, the silver is coated over with copper, which coating will stand the operation of burnishing" ("Philosophical Transactions," 1801). This appears to be the first mention of contact-deposition. It was also known that articles of steel could be gilded by simple immersion in a dilute solution of chloride of gold.

Coming now to modern times, every one is familiar with the schoolboy feat which consists in producing the ever popular "lead tree" or "silver tree" with a solution of nitrate of silver and mercury, by suspending a piece of zinc attached to a copper wire in a solution of sugar of lead or in like manner coating the blade of his penknife with copper. Furthermore, it is known that the steel and iron tools which workmen use in copper mines are apt to become coated with a film of copper, due to contact with the water which percolates through the mines, and holds in solution sulphate of copper derived from oxidation of the mineral sulphides of copper contained in the rocks.

Dealing now with the subject from the scientific standpoint, it is to be observed that if a sheet of metal (copper, for example) be introduced into a solution which contains kathions of a metal of slighter solution-pressure (say, a heated solution of potassium silver cyanide in water with an excess of potassium cyanide) the following reaction takes place: The metalions (in this case silver-ions) are, by the osmotic pressure, reduced upon the copper sheet, and, as the osmotic pressure of the solution is thereby decreased, copper-ions are forced into the solution by the solution-pressure, while additional silver-ions are caused to separate upon the copper sheet. Hence, during the formation of the deposit a solution of metal to be coated (copper in the case in question) takes place at the same time, the reaction, however, coming to a standstill when the sheet has been covered with a coating of silver, as this prevents further solution of copper in the electrolyte.

Another explanation is that by its immersion in the silver solution the copper is negatively charged, positive silver-ions being (by reason of electric static attraction) attracted and reduced on the copper, or an exchange of molecules takes place. A deposit produced in this manner is generally known as a "deposit by immersion," or, when the electrolyte is highly heated, a "deposit by boiling." The same thing occurs when metallic objects are plated by applying, by means of a brush or by friction, an electrolyte through the medium of a paste or wetted powder which contains a metal of slighter solution-pressure than that possessed by the metal of the object to be coated. In this case the silver paste or powder generally contains a cyanide, for which reason it has very serious drawbacks.

Since the more electro-positive metals of the volta series possess a greater solution-pressure than those below them in the list, it may be briefly stated that electro-positive metals when immersed in suitable solutions of electro-negative metals reduce the latter, and under certain conditions become coated with them so that a coherent deposit is formed.

If a copper sheet dipping in a potassium-silver cyanide be touched with an electro-positive metal (for instance, a zinc bar, rod or sheet), the latter dipping also in the electrolyte, an electric current is generated which deposits silver-ions on the copper sheet, while at the surface of the zinc rods zinc-ions are forced into the solution.

However, even when the copper sheet has been covered with a coherent deposit of silver, the reduction of the latter goes on in so far as the silver, which is reduced upon the zinc, also prevents further migration of zinc-ions into the solution.

The contact process, as above described, can, therefore, only be applied to a limited extent. On the one hand, the formation of uniformly heavy deposits upon the metallic objects is excluded because, by reason of the greater current-densities appearing at the point of contact with the contact metal, a heavier reduction of metal takes place there than on the parts further removed from the point of contact, unless the position of the latter be frequently changed. On the other hand, the constant increase in the quantity of dissolved contact-metal in the electrolyte constitutes a drawback, and is the cause of the electrolytes, as a rule, giving out before their content of metal is exhausted. Finally, the reduction of metal upon the contact-metal is an undesirable feature.

One of the many weak points in the primitive contact-process is the useless reduction of metals, which rapidly renders the bath poor in metal, necessitating frequent refreshing or regeneration, which, as a rule, cannot be readily effected. Hence the contact-process is in practice very uneconomical. It must be borne in mind that the formation of the deposit ceases as soon as reduction of metal upon the contact-body takes place, and this explains why there can be produced only very thin deposits, which fail to afford the necessary protection against atmospheric influences, and which are not sufficiently resistant to mechanical attack. There are, however, many other disadvantages attendant on the use of the contact-process; for instance, working with almost boiling hot baths, and the constant evolution of steam, which is injurious to the workmen and to the workrooms.

Briefly, the contact-process is suitable only for coating (or, more correctly speaking, coloring) objects with another metal, when solidity of the deposit is not called for. As just stated, no deposit of any appreciable thickness can be obtained by the contact process in consequence of the contact metal becoming quickly covered with a deposit. Aluminum, it is true, relinquishes the deposit metal in coherent laminæ, the heavy evolution of hydrogen bringing about this result. But this shows how large are the quantities of metal which are deposited upon the aluminum, and that deposition by contact necessarily entails a waste of metallic salts, which considerably increases the cost. Further, in order to use over again the same piece of aluminum which has served as contact body, it is necessary to remove the deposit from the aluminum body, employing for this purpose a mixture of nitric and sulphuric acids, so that, in addition to the loss of the metal, consumption of acids occasions a further expense.

Iron objects brassed or coppered by the last-mentioned method possesses a neat appearance, but soon commence to rust. For this reason objects so prepared cannot be put into competition with objects thickly brassed or coppered by means of an external source of current; for, as already pointed out, reduction only goes on till the electro-positive metal has been provided with a coherent coating of the electro-negative metal; so it is plain that such deposits can be only very thin and cannot be increased by continued action of the electrolyte, unless recourse be had to other means. Moreover, because of the thinness of the deposit the metals are not protected against atmospheric influences; they may even be rendered more liable to oxidation.

As contact-metals, zinc and aluminum are chiefly used. In an acid solution zinc is more active than aluminum. But aluminum when in an alkaline solution is more highly electro-positive than zinc, while it possesses the advantage of not bringing into the electrolyte a metal reducible by the current.

Before electro-depositing a metal, it is in general experience necessary that the article upon which the deposit is to be produced should be submitted to a cleansing operation, as the presence of the slightest impurity, such as grease or oxide, is sufficient to prevent the adherence of the two metals. This cleansing operation varies with the metals operated upon. In the case of objects made of copper or its alloys this operation is the most complicated, and calls for the greatest care. But in the case of other metals, such as silver, lead, iron, tin, etc., the cleansing is partly mechanical and partly chemical, and the deposition of metals upon them is generally more difficult and not so firm.

(To be continued.)

The smoky appearance of silver appears when the silver has been badly tarnished and the cyanide cannot reach the silver through the coating of the tarnish. When the pieces appear that way they should be scratch-brushed with a fine brass wire circular brush, using bran or licorice water as a lubricant. The pieces will then have to be burnished or polished, after which they should be washed clean from the rouge in strong soap suds, rinsed in cold water, then dipped into clean boiling water and dried with a soft towel. Silver that is not very badly tarnished can be dipped in cyanide dip, then rinsed in cold water and washed as above.

TO THE TRADE:

"A principle which we have always fought for has been to keep the market open for all watch cases, no matter of what manufacture, believing it to be for the best interests of the trade to allow them to buy the watch cases which they consider the best on the market and by so doing stimulate all manufacturers to their best efforts, with a view of establishing a high standard of excellence. The Dueber Watch Case Mfg. Co. in all its many years of existence has never sought to dictate to any jobber what watch cases he should use. It has never used, directly or indirectly, any method of coercion or force to either restrict the product of any watch case manufacturer, or to force the production of its cases upon any wholesale or retail jeweler to the detriment of any other manufacturer of watch cases. It employs the 'open door' policy in selling merchandise and believes that the trade should be open to all manufacturers and jewelers alike and to that end will bring all its energy to bear for the good of the entire trade."

THE DUEBER WATCH CASE MFG. CO.

CANTON, OHIO.

POINTER No. 130

Catalogs that sell your product mean unlimited success. They make the country your market.

Building business by means of a Catalog requires a definite plan, carefully formulated, persistently executed.

Success has crowned our efforts because we are more than Catalog builders—we are suggestors, designers and pushers.

We employ trained men, specialists in Catalog work, who know how to sell goods through the medium of printer's ink. Our Catalogs are the products of this trained organization.

They illustrate your goods and carry the story to the people, keeping them in close personal touch with you, though located in the most distant hamlet.

We offer you service that is different—a satisfied customer every minute during the busy Holiday season.

Remember
We make Catalogs.
Have a definite plan, then success is assured.
Start something—then push the start.
Put it up to men who know your market.
Attractive Catalogs arouse the people's interest.
We work with our customers not merely for them.

RESENT SLEDGE HAMMER METHODS

BLACKSMITHS should have a monopoly of the Sledge Hammer; it is out of place in the jewelry trade.

The hammer is a good instrument for driving a spike, but a poor one for driving a Man. In fact men—real MEN—refuse to be driven at all. They *resent coercion.*

This Company approaches the trade in a totally different attitude. In selling

Wadsworth Watch Cases

the appeal is made simply to the Good Judgment, the Natural Requirements and the Best Interests of dealers. In a word, the keynote is MERIT. And it is the trade's appreciation of this that spells Success!

Such being the case, the business enjoys a HEALTHY growth, an HONORABLE growth and a STEADY growth—without the Sledge Hammer.

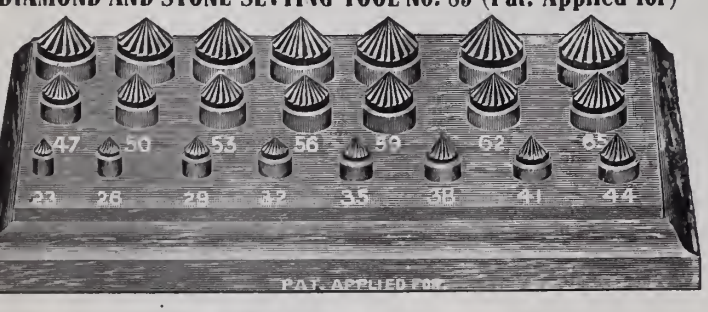
ECHARCO IMPROVED WATCH GLASS CABINET, No. 85

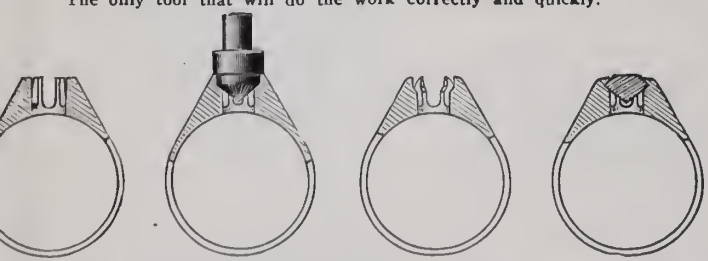
The NEW FEATURES of this Cabinet are the SKELETON DRAWERS, making an accumulation of dust and chips impossible, and the very easily read LABELS of white celluloid on the drawer fronts. The Cabinet has nine drawers, giving 1,632 spaces. It is 29½", high, 24" wide and 13" deep. The construction of drawers, arrangement of partitions to economize space and weight, and the novel method of showing contents on the drawer pulls are all novel and practical ideas and very well carried out. The Cabinet is made of oak and finely finished, and is the lightest and strongest case on the market. Spaces are provided for the small sizes of Lentilles and Genevas, and for Antiques, which no other Cabinet provides for, making it the most complete and convenient Cabinet ever offered to the trade.

Price, $16.00



PEGWOOD SHARPENER, No. 3

A new attachment, designed for use on a watchmaker's lathe, which sharpens pegwood to a hair point without breaking, and at the same time gives the point the proper concave shape. The tool is held in the lathe by an arbor fitting into a regular wire chuck as shown in the illustration, being steadied by the rest shown. The stick of pegwood is rotated by hand while the tool is revolved in the lathe, producing a fine, long, flexible point. With this tool the watchmaker can prepare enough pegwood for a day's or a week's work in a few moments, and have every piece uniformly and evenly sharpened.



The tool is mechanically perfect, made of the best material, is durable and cannot get out of order. For sharpening the cutters the use of a fine Arkansas oil stone slip is necessary. Coarser abrasives should not be used.

Price, each, $2.00

DIAMOND AND STONE SETTING TOOL No. 85 (Pat. Applied for)

The only tool that will do the work correctly and quickly.

These tools, invented by a stone setter of many years' experience, will do the work they are intended for with absolute perfection, whether in the hands of an experienced or inexperienced workman. In eight seconds after adjustment in lathe will cut a smooth seat for any stone from 1/16 to 2 carats.

Tools are made of polished and hardened steel and are indestructible. Will fit in chucks Nos. 80 and 44.

The greatest labor saving device ever invented in the line of stone setting cutters. Put up in neat block and box.

Price, Per Set, $5.50

OCTOPUS ENGRAVING BLOCK ATTACHMENT No. 85

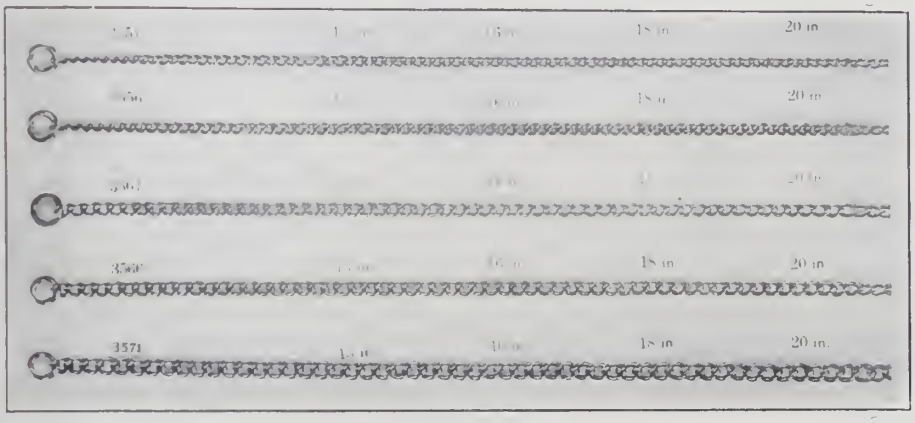
Pat. May 11, 1909

Illustration is exact size of Attachment

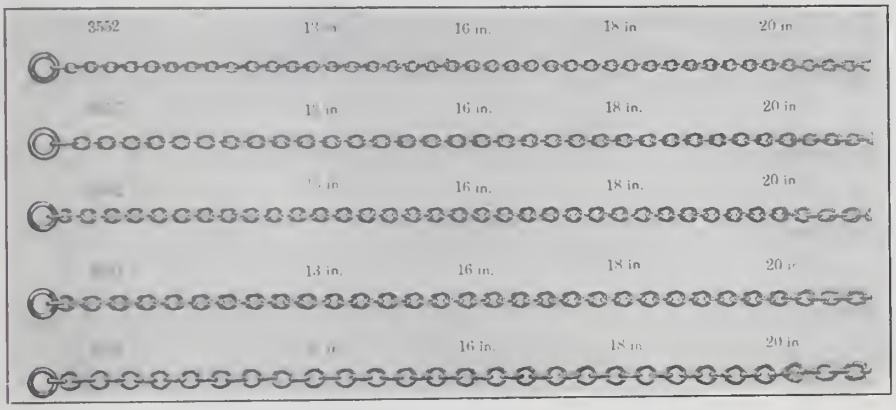
In order to perfect an attachment that would fit any engraving block, and, at the same time, *hold everything* that came within the spread of the engraving block jaws, long study was required to design the combination of gripping surfaces that are assembled in such a small space.

This has long been considered an impossibility, but the Octopus Attachment now stands to disprove this pessimistic assumption. Our claim of pre-eminence for the Octopus Attachment lies in its general construction and simplicity of operation. Its predominating features are *efficiency, rapidity, economy* and *adaptability* to the wants of the engraver, who, for years, has been in need of an attachment that would relieve them of the encumbrance incurred by the use of the numerous pegs and other appliances, and, furthermore, admit the many articles of jewelry and silverware that have previously been found impossible to hold.

The four adjustable pegs, as shown in the illustration, are inserted in the peg holes of the engraving block, and the guide rod retains the two jaws in perfect alignment to each other while in operation.



A partial list, showing articles that can be clamped and where held in this attachment, is sent with each tool—a thoroughly well made tool and finely nickel plated.



Price each $4.50.

There is always a demand for a medium priced line.

A line with a reputation.

A line made by a house of unquestioned integrity.

The D. F. B. Co. line is all this, combining with QUALITY and popular price, superior FINISH and artistic DESIGN.

Our improved method of finishing insures the wearing qualities and results in a finish UNSURPASSED by any.

We sell the Jobbing Trade only

The Matinee Lorgnette Locket and Chain

Something *new, ornamental* and *useful* as the locket contains a mirror and place for picture. This is our latest creation and has jumped into favor from the start as our salesmen now on the road showing an extensive line of these goods are meeting with great success. Our "If for ANY Reason" guarantee on all our goods, the *strongest guarantee* ever placed on a piece of plated jewelry assures you of getting the *standard* of *quality* and *workmanship.*

Put yourself in touch with our new season's line, as it contains a new and complete assortment of *bracelets, lockets, fobs, vest chains, coat chains, pendants, guard chains,* and *neck chains.*

We sell the wholesale trade only.

Watch for our new line of genuine platinum plate pendant necks, mounted with white stones.

Bigney Building :: :: :: ATTLEBORO, MASS.

1000 BAGS DAILY

It is estimated that there are fifty million women in the United States. Not over two million have mesh bags. **We** must supply the other forty-eight million with machine-made mesh bags.

The reason why machine-made Mesh Bags are better than hand-made Mesh Bags is

that we use **much harder wire** than used on hand-made bags, and machines harden it still **more in** working, making wire **stiff and strong,** no **rough joints to catch,** and wear the dress. Stronger and better than soldered mesh.

We also make the only **ABSOLUTELY SOLDERLESS FRAME EVER MADE,** other **so-called solderless** frames have joints or some parts soldered.

We are the **sole** manufacturers of machine-made mesh with **solderless** frames.

WHITING MFG. CO.

Removal to Bridgeport, Conn.

It is with much pleasure and satisfaction that we announce to the trade that our new factory, erected at Bridgeport, Conn., is now completed and in operation.

The plant, situated on the line of the New York, New Haven & Hartford Railroad, in East Bridgeport, is devoted exclusively to the manufacture of sterling silverware. The buildings are constructed and equipped on the most up-to-date lines, with a view to the maximum of efficiency, which will be evident in the prompt filling of orders and quick handling of the general business of our customers.

The Bridgeport factory will be the general business headquarters of the Company where all orders and correspondence should be addressed.

The New York Salesroom will be maintained as heretofore, in the Silversmiths Building, 15 Maiden Lane.

1835 R·WALLACE

SILVER PLATE THAT RESISTS WEAR

Our new Marquette Pattern

is the perfect embodiment of those features which, combined, give to 1835 R. WALLACE Silver Plate a far greater selling value than is possessed by any other plated-ware. This design, notable for its grace and simplicity, is one that will appeal to cultured tastes.

Another point. It isn't sufficient to consider only *how much* silver is deposited on a piece of plated flatware—*how* it is deposited and how it is *finished* are equally important. Our method of applying *sectional plating in a separate solution* on all parts most exposed to wear, increases the wear-resistance three fold, and renders 1835 R. WALLACE Silver Plate the very best.

We guarantee that every piece of 1835 R. WALLACE Silver Plate will give absolute satisfaction and we agree to replace every piece of goods bearing the 1835 R. WALLACE trademark, that does not give satisfactory service in any household.

You take no chances in selling 1835 R. WALLACE Silver Plate that *resists* wear, for we stand behind it absolutely.

Send for our catalogue in which this new "Marquette Pattern" is included

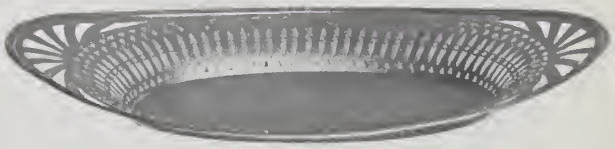
MADE IN 3 SIZES.
½-PINT, PINT, AND QUART



Our Decreased Selling Cost Gives You Greater Value

We offer you high quality sterling silver and silver deposit ware at lower prices than you have ever before paid. Selling direct by Mail from the home office makes this possible. Owing to the decrease in the cost of marketing our goods we have revised the listing on our entire line.

TRADE W MARK

There are no expenses of salesmen to be considered in the price quoted you. Every piece represents only the manufacturing cost plus one fair profit. The purchasing power of your money is increased. You can carry the same volume of stock at a greatly reduced cost, or substantially add to your line at small expense. The result is

15% to 20% More Profit to You

3347
APPLIED BORDER.

We maintain the same standard of excellence in design and workmanship. Every piece of our sterling silver and deposit ware is made in the same careful manner that has won and held your confidence for fifteen years. The illustrations are characteristic of the value of all of our line. The pierced design on the bread tray is new and original with us and is decidedly attractive.

We make this pattern in many different sizes and shapes. The serviceable pitcher shown has a scroll border with shield for monogram, and is priced exceptionally low. The deposit is guaranteed to show pure white inside and last the life of the piece.

Our catalogue will prove the advantages to be gained by our new price list. We will be glad to send you a copy. Write for it to-day. You can

Woodside Sterling Company

170 Broadway NEW YORK

REENFORCED SILVER PLATE

Makes Permanent Customers

Customers that come back and bring their friends. When your silver plated flat ware is marked "SIMEON L. & GEORGE H. ROGERS COMPANY," you can stake your reputation on its superior wearing quality.

Our reputation as leaders in plated ware of real intrinsic worth and durability is your assurance. No other line will pay you as well or give your customers as much satisfaction.

Our Sectional Process reenforces the parts of spoons and forks most exposed to wear with a triple deposit of silver, thereby more than doubling the service obtained by the old method of uniform plating.

A trial will prove this line a most attractive proposition

REIGN OF LOW COLLARS

PIERROT COLLAR PINS

THE MODISTES of Paris announce the continuance of Low Collars—requiring appropriate Pins. To collars of this nature various names are being given, such as "Marceline," "Pierrot," or "Columbine" Collars; but in principle they are the same as the familiar Dutch Collar. This house is headquarters for the correct and artistic Pins in innumerable designs. French Grey with Coral, Amethyst, Sapphire, etc. The same stones also are set in Gilt mountings. Oriental Effects charm by their novelty and characteristic beauty. All add to Summer comfort the touch of grace and finish.

Artistic Candlesticks in Pompeian Green

Many Forms and Sizes—Inexpensively Priced

THE ANTIQUE impressiveness of these Candlesticks is added to by their variegated tones of Pompeian Green, an effect which causes them to appear as if excavated from the ruins of the famous buried city. They have been very heartily welcomed wherever introduced. Other finishes include Butler and Polished Brass, and Butler and Polished Silver. Many graceful designs in various sizes. Artistic Candlesticks are most popular ornaments, especially when moderate in price.

VOL. LX. WEDNESDAY, APRIL 20, 1910. No. 12.

Fine Silver Craftsmanship in Caskets.

ILLUSTRATED on this page and on the front cover are three splendid caskets designed and executed by one of the foremost German precious metal craftsmen, Prof. Fritz von Miller, in Munich. His family name is not unknown in this country, for a large number of monumental works in bronze in the United States were executed in the foundry of Ferdinand von Miller, the father of the present artist.

Fritz von Miller created numerous conspicuous examples of craftsmanship during his busy career, many of which were ordered by crowned heads. He is no longer a young man, for already in 1868 he was appointed Professor of Metalwork at the School of Decorative Arts in Munich, but his productiveness has shown no diminution.

Among his earlier creations is the fine document casket which was presented by the members of the German Diet to their president or speaker, Dr Simson. This piece, which is shown on the cover, is still under the ban of the reawakened renaissance, while his later works show more personal style, with a leaning to the Romanesque and Gothic. This very large casket is executed in ebony and ivory. On the four corners we perceive allegorical figures in oxidized silver as shield bearers. All the remaining ornamentations are gilt and partly enameled. The figure of Justice surmounts the whole.

CASKET PRESENTED BY EMPEROR FRANCIS JOSEPH TO HIS DAUGHTER.

CASKET OF IVORY, EBONY AND SILVER MADE AS WEDDING GIFT TO FAMOUS SINGER.

The second casket was a wedding gift to the famous singer, Miss Stehle. This casket is also of ebony, silver and parcel-gilding.

The third casket illustrated above is of ebony and silver and was a present of Emperor Francis Joseph of Austria to his daughter, Princess Gisela of Bavaria.

The faultless technique and true artistic spirit of all his works bear proof of Fritz von Miller's ability.

C. A. B.

A dispatch from Paris, April 9, stated that the Appeal Court upheld the sentence of six years' imprisonment, $600 fine and five years' subsequent banishment passed on Lemoine, the "diamond maker," for swindling Sir Julius Wernher, head of the De Beers Co. Thus ends the long-drawn-out comedy of a famous hoax. Lemoine obtained $320,000 from Julius for his alleged invention for the manufacture of diamonds. He conducted experiments before experts, producing diamonds which, it was afterwards discovered, he had bought in Paris. Lemoine was first arrested for fraud in January, 1908, but he was released on bail and fled. Last year, imprudently venturing back to Paris, he was again arrested.

Complete Set K with Platinum Borders including case $28.15

Complete Set K with Gold Borders including case $19.45

Price is always an important factor, but when buying Mother-of-Pearl Jewelry, the first and most essential features to consider are construction and workmanship.

For years we have made a careful study of the constant wear and strain brought to bear on Mother-of-Pearl Link Buttons, Shirt Studs and Vest Buttons, and in producing our Line, we have strongly re-enforced every detail of construction to endure the hardest kind of service.

An inspection of these features will prove that our prices are consistent with the value given.

The automatic features of the Larter Automatic Shirt Studs and Vest Buttons appeal to all men because of their unequaled convenience in operation.

Complete Set K illustrated above is only one from our large stock of salable patterns that our travelers and mail order department now have ready for delivery.

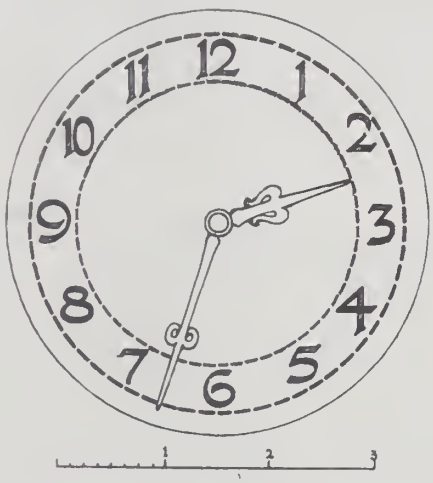
REPOUSSÉ WORK AND CHASING

ILLUSTRATED AND DEMONSTRATED BY AN EXPERIENCED ARTISAN

(*Continued from issue of March 10, 1910.*)

CLOCKS AND CLOCK CASES (CONTINUED).

IT is advisable, however, in any case, to make the door as large as possible in order that the works may be easily got at for periodical cleanings or repairs. There is no reason why the door should not be made to almost comprise the entire back of the case, just leaving a small margin all around. It should be made to fit down flush with the surrounding margin of the case, and every care should be taken to fit it accurately, in order to make it as dust-proof as possible. Before fitting the door a narrow strip of metal should be soldered all around the *inside* of the case in such a way as to project slightly and form a ledge for the door to close down on to.



MAKING THE DIAL AND HANDS.

The dial and hands, which, of course, form the chief feature of the clock case, can be made and decorated in many different ways. The numerals of the hours may be either embossed, engraved, enameled or inlaid, but these four methods are again open to innumerable variations.

If it is decided to emboss the numerals, a good plan is to carry out the same idea as that used for the lettering below the dial, and keep the numerals enclosed as it were in a band running right around the dial, or each numeral could be kept separately within a little sunken square or panel. If, on the other hand, the figures are engraved, it will be necessary to cut up the back ground into a small diaper pattern, in order to make the figures sufficiently prominent. If somewhat thicker metal be used the body of the figures can be cut back about 1/32 inch below the face of the metal, and the cavities thus cut out can be filled in either with enamel or another metal. If a metal filling, however, is decided upon, the metal used for inlaying must of necessity be softer than that used for the dial, so that it can be easily driven in and spread out without in any way distorting the outlines of the figures.

For inlay and enameling it is, of course, necessary to consider the general color scheme of the whole, and very fine effects may be obtained by using various-colored metals and enamels in harmony together. If, for instance, the dial be made out of fine silver, and the numerals filled in with a deep blue translucent enamel, the effect will be very rich, with the additional advantage that the figures will stand out very prominently at a considerable distance. Another fine effect of a different type may be obtained by making the dial in bronze, and inlaying the figures in fine silver. There are so many varieties of treatment, however, that a little experimenting is sure to give interesting results, the only two points of importance to bear in mind being that the figures must stand out clear and distinct, and that they should be of good shape, and not resemble the distorted examples one meets with on some so-called "New Art" clock cases; in fact, the one point almost implies the other, as grotesqueness very seldom tends to legibility. Even if not grotesque, however, it is far better to keep the figures severely simple, with just a good outline, than to overload them with florid endings and decorations. The hands can be made of either steel, bronze or brass; copper should not be used, as this is far too soft a metal for the purpose.

With regard to the small group on the top of the case indicated in the elevation drawing shown previously, this is merely a suggestion, and anything else may very well be used as a terminal; but it is essential to

DETAILS OF DIAL AND HANDS.

have a terminal, as without it the whole case will look rather squat and undignified.

HOW TO MODEL THE GROUP.

To make the small group which represents a figure of Time and Pegasus a model in hard wax will have to be made in the first place. A rough sketch of the size it is required to have the group should be made, and the armature or skeleton can be bent to this. It should be explained that this armature is absolutely essential, and acts as a support for the wax to be modeled around. It can be made of various pieces of wire and metal bent to the main lines of the group and tied and soldered together wherever necessary. The wire used should be just thick enough to make the whole as rigid as possible, without in any way interfering with the surface modeling of the smaller parts. This chiefly applies to the legs of the horse and the extremities of the figure. The small pedestal on which the group stands can very well be modeled at the same time, and both group and pedestal can be eventually cast together. In carrying out a small group of this description the difficulties of casting should always be borne in mind and simplified wherever possible by avoiding straggling semi-detached pieces, and keeping the whole as compact as possible; for instance, the whole group can be immensely strengthened by allowing the tail of the horse to sweep around between the legs, and in this way joining both legs and tail into one mass, and making the connection between group and pedestal much stronger than would otherwise be the case. The wings of the horse should also be joined to the pedestal.

When the model is completed it can be piece moulded in plaster, and after these have been taken apart and thoroughly cleaned and dried they can be fitted together again and secured with binding wire ready for casting. A soft metal composition consisting principally of lead, zinc and bismuth is used, and when melted it is poured through a channel cut previously in the plaster moulds. This composition is very well adapted for pattern casting, as it casts very sharply and cleanly. When the metal has cooled the mould can be taken to pieces, and should come away quite readily from the metal, providing that the various pieces of the mould have been well smoked before fitting them together preparatory to casting. The seams of the casting can then be removed and the whole chased up wherever necessary. It will be found that this soft metal casting will make an excellent pattern for hard metal casting, and for small work is greatly preferable to a plaster pattern, which is always liable to get damaged, or even broken in moulding from.

When the bronze or silver casting has been chased up it can be either soldered on to the roof of the case or else it can be fitted with a screw and nut and screwed on.

W. S.

(*To be continued.*)

French Industrial Art Exhibition Recently Held at Copenhagen.

A FRENCH industrial art exposition, with the assistance of the French as well as the Danish government, was recently held at Copenhagen in the halls of the Art Academy, instituted by the Comité Francais des Expositions à l'Etranger (Paris, 42 Rue du Louvre). The precious metals and medaling art sections included about 100 exhibitors, among them leading Parisian jewelers and goldsmiths, like Christofle & Co., G. R. Sandoz, A. Aucock and a representative group of the "collectivité of jewelry." The handsome catalogue, printed in Paris, owing to its containing the correct addresses of all exhibiting firms, may be of interest.

The Queen of Denmark bought a costly diadem *Libellule* from the only exhibitor of Danish birth, Edgar Beuse, a jeweler who, in his younger days, settled in Paris, where he is now proprietor of a large jewelry workshop.

Charles Sauer, Aberdeen, S. Dak., will shortly move into a newly furnished store in the Galette building, at that place. The premises will be thoroughly overhauled and remodeled for his use.

Columbia City, near Ft. Wayne, Ind., recently suffered from a serious fire which caused a total loss of $40,000. The blaze, which started from an overheated stove, destroyed many stores before it was under control, and among the sufferers were two jewelers, L. D. Clapham & Co., and A. H. Woodworth.

Reconstructed Rubies and Sapphires

The Heraldic Menagerie Briefly Described and Explained.

By Clement W. Coumbe.

FOREWORD.

If you go into any of the public libraries you will find the busiest corner is where the books on heraldry are exposed. Ladies, of course, predominate, but there is more than a sprinkling of men—real men, not milksops. In Europe for several years the noble art of heraldry has been intensely popular. And we are becoming gradually Europeanized. Our European ancestry are becoming increasingly interesting, and crests and coats-of-arms are figuring on our carriage-door panels, watch cases, letter paper, etc. And if our wealthy public wants heraldry let the jeweler supply it.

It is high time not only the jeweler should know the elements of heraldry, if he hopes to cater to the wealthy. Even the jeweler's salesman should know the difference between *sejant, rampant* and *couchant,* when a customer demands that pose engraved on a locket, watch case, etc. Of course, the seal engraver who is not fairly well versed in heraldry is behind the times, as is the die-sinker.

To the ambitious young salesman who presides over jewelry show cases but has "had no time to *waste* on frills and refinements." This means YOU. Come and take your first cultural plunge with a few minutes' immersion in the gentle and genteel art of heraldry. An attempt has been made to take the chill of *learning* off, anyhow it means dollars and cents to you some time.

There are several heraldic systems, such as the French and the German, as well as the English. This deals with the English. Now, the art of heraldic blazoning in Great Britain has been in a decadent state for some centuries. Its animals lack life and run too much to picturesqueness. They are truly the *tame* creatures we find behind the bars of a menagerie. Hence our title has a double intent, for these creatures are not like our fathers "used to make," they are innocent of the *jungle,* just menagerie creatures. The Germans have upheld their armorial art, and their escutcheons teem with active, mobile vigor. Their lions, tigers, eagles, etc., are all howling, clawing animals of prey. They are just ready to leap out of their pages and make a meal of the spectator's carcass. We are struggling recently to stroke the furs the wrong way, and give a touch of ferocity to our sleek, sophisticated creations, and, in instances, we have produced a second class imitation of the Teutonic breed of real wild, roaring beasts that should strike terror into the enemy's camp when seen as crests on helms or as charges on shields, as was their intent and wont. Among the cuts presented herewith, you will recognize a few that *mean business,* a few that are of the stereotyped kind, in fact assorted samples of animal patterns, and, paradoxically, the oldest are the freshest.

INTRODUCTION.

STEP up, ladies and gentlemen. Step in and view the most stupendous, miraculous, comprehensive conglomeration of unquestionable, authenticated, mythological, paradoxical phenomena ever installed between book covers. The "Heraldic Menagerie," ladies and gentlemen, is patronized by all the crowned monarchs, all the nobility and all the ladies and gentry of all the courts of Europe. This marvelous congeries of animal creations took 800 years to corral under one roof!

Here we are shown the beasts that are and the beasts that ain't. And the latter look as natural as the former. Step in, ladies and gentlemen, and see the ferocious beasts. You need not *pale,* though some of their *dispositions* are *sinister,* for the *bars* can't *bend.* The *charge* is 25 cents less than a *quarter.* Step in.

THE HERALDIC LION.

In cage No. 1—I mean Fig. 1—you see the king of beasts and beast of kings, Leo

FIG. 1.—HERALDIC LION, RAMPANT. (AFTER G. SCRUBY.)

the Great. Regard him with a photographic eye and a retentive memory, for else he will get away from you and get mixed up with the others, and later you will want to call all the herd of lions on this page by their first name. Poised on his hind foot, the other three are clawing at the invisible prey. He is closer to the devouring act than we will see any of his fellows. It was in this pose that he first came on to the heraldic scenes, and he so pleased the kings in this early act that they took him for their own exclusive company. As you see him he was immediately known as the heraldic LION, and was the emblem and device of kings, who "bore" his figure on their coats-of-arms. Henry V. is said to have had a lion as *supporter,* but at Westminster his tomb shows an antelope and a swan as *supporters.* Scotland, still an independent kingdom, used that lion alone on its shield. But if one lion is good enough for kings, two must be better. And Henry VII. used two white lions for a time.

But the majestic beast was later adopted by the higher nobility, and lords and peers were soon using the king of beasts for their heraldic symbol. If they used the exact identical Simon pure animal that their king did they would be quickly accused of assuming the royal prerogative. It would be a pretty to do for others to use the royal insignia; that was impossible. It became necessary to change the form of the device. Now, lions are not always eternally devouring their prey. There comes a time in the life of Mr. Lion when he has to walk around and make sure there is a prey-dinner available. So some nobles selected lions taking a walk; others took the brute in other daily acts. But still the fact remained that the lion was a regal device, and no other *lions* could breathe on the same earth. The nobles were up against a "corker." It was the *animal* those fellows wanted, however, and if they could not get the animal, name and all, because it belonged to their master, well, they would let the blooming name go to and still capture the animal. They called their own creatures *leopards.* So simple. Every old lion that did not happen just at that time to be clawing the circumambient with three claws was a *leopard.* Now this is more interesting to THE JEWELERS' CIRCULAR-WEEKLY readers than they are aware, perhaps. You remember those English Goldsmiths' Co. hall-marks that depict a lion clear as a spade is a spade, and you likewise remember those lions on the backs of spoons, etc., are termed *leopards* in spite of themselves; also you remember you keep asking yourself, or some other self, why is a lion a *leopard* when its on a spoon? And now you know.

Well, the next chapter in the lions romance started from the fact that kings took a liking to the artistic *leopards* their lordships were blazoning on their shields (they fitted the shield and left room for other devices or more lions), so they started in to use *leopards* also. This was, to say the least, confusing, for the *leopard* was a *leopard* still, even if it was a lion. But the king did not relish the idea of bearing around him lions that his neighbors called *leopards* while *he* had a right to the name lion. So the names were modified to lion-leopards, or lions leopardé, and everybody was happy once more, with their pet lions and *lion-leopards* strewed about their persons.

Gradually, however, the gigantic fact appears to have dawned upon these progressive heraldry developers that those poses of the majestic bruteship might be used as nails whereon to hang a set of names. Great scheme—no sooner said than done. And quickly the royal air-clawing beast became a lion *rampant,* and a wholesale christening *bee* soon gave us a full den of lions, *guardant, passant, statant, sejant, couchant, salient, coward,* and a set of hydrids, such as *passant guardant, statant guardant,* etc. It is a pretty herd, and now let us learn each fellow's proper name. Just dig up your knowledge of French and the task is awfully simple.

First of all, suppose we watch the feet of the king of beasts. We have had him doing the great claw act, and have learned he is heraldically *rampant.* And this *rampant* title entails the owner's looking straight ahead of him—*you only see one eye.*

Now, if that *rampant* chap will only put his four paws all on mother earth for a

FIG. 2.—LION STATANT.

second he becomes *statant* (see Fig. 2). Next give him a gentle prod from behind and he will start walking off the page by

FIG. 3.—LION PASSANT.

lifting one front leg, and you have him *passant,* as in Fig. 3. When our wild friend

MEMORANDUM ORDERS FILLED AT ONCE

170 Broadway, corner Maiden Lane - - - NEW YORK

gets good and tired of standing with one paw extended to no purpose he will probably lie down, as in Fig. 4. Then you have

FIG. 4.—LION COUCHANT.

him *couchant*. And if you keep him restful he is likely to go to sleep and pose as a lion *dormant*, as in Fig. 5. When he has had

FIG. 5.—LION DORMANT.

his nap he will sit up and show you how a lion *sejant* looks when he is in the correct attitude, as in Fig. 6. And if you have

FIG. 6.—LION SEJANT.

both got sufficiently used to one another for you to put him through poodle stunts such as sitting up and "begging," you have him *sejant erect*, as in Fig. 7. If, on the con-

FIG. 7.—LION SEJANT ERECT.

trary, the brute has tired of your company and prefers you *inside*, he will probably jump on to his hind legs and rear with his two front feet up, clawing at you; then it's time for you to know he is *salient*, or *saliant*.

For some reason unknown to the writer Charles Boutell, in his "English Heraldry," calls the pose in Fig. 4 *sejant* instead of *couchant*, and Fig. 5 he styles "*couchant* or *dormant*." Fig. 6 he calls *sejant rampant*, instead of *sejant*.

You must have noticed that all of these lions possess only *one eye*. But if you have escaped with your life from his *salient* claws, and will jump on one side, you will learn that the heraldic *heads* are movable, as well as the legs, that have done all the business so far. And when he turns his head to look at you his pose is *guardant*, as in Fig. 8, where he is *statant guardant*,

FIG. 8.—LION STATANT GUARDANT.

or in Fig. 9 *passant guardant*. You look him full in the face, and see *both eyes*, in the *guardant* attitudes. Don't forget this. At the same time, don't get this *guardant*

FIG. 9.—LION PASSANT GUARDANT. CREST OF CROFTS OF CROFT CASTLE.

pose confused with the attitude *affronté*, as in the latter case the creature is also looking out of the page, but his entire figure is posed that way, so he is not twisting his head, but looking straight ahead at you.

Another pose that heraldic lions sometimes take is that of looking backwards over their shoulders; they are then *reguardant* lions—no, horrors! never a *rampant* lion or a *reguardant* lion, but a lion *rampant*, or a lion *reguardant*. In heraldic blazoning first comes the name of the subject and *then* the particulars.

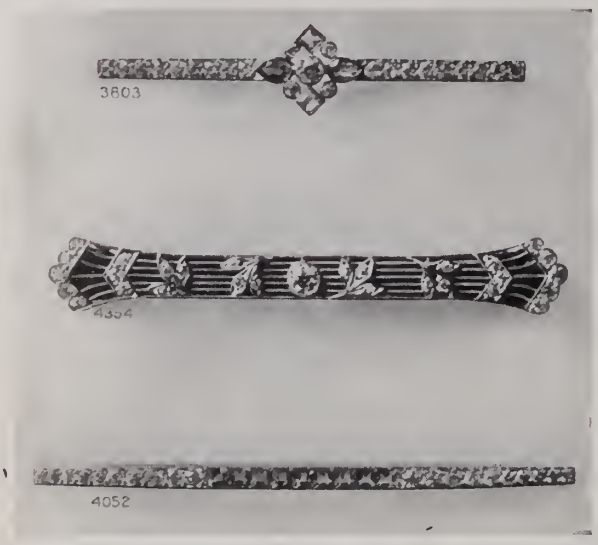
The last attitude of our lions heraldic is a most unnatural one, common in the menagerie but rare in blazonry. When the hitherto majestic beast has been sufficiently "broken" to put its tail between its legs it is known as *coward*. Although it is a favorite sport of United States citizens to twist that tail you will rarely find kinks in it; it is, as of old, usually "in the air," not between the legs, as shown in Figs. 4, 5 and 6, which show lion couchant, tail cowed; lion dormant, tail cowed, etc.

There is a peculiar lion seen in armorial bearings carrying a double or forked tail behind him; he is said to have a *queue fourchée* (forked tail).

So you see you have to watch his tail as well as his legs and head if you wish to call the heraldic lion by his first name.

When lions are forced to appear reduced in size, as when several are in one composition, they are sometimes called *lioncels*. When the term *lioncel* is used alone please remember it implies a small lion *rampant* always. The term *rampant* is generally shortened in blazoning into *rampt*, or *rmpt*.

And now we have the whole den of lions cornered. Let us say a few words as to their make-up. The true heraldic lion is a bag of bones. Unlike the menagerie beast, he is never fed. But that is not the cause of his distressfully starved appearance. He was born that way, and loses his heraldic power when flesh gets on to his bones. Thinness is the essence of their being. Those attenuated animals were affecting a purpose. The need was for a device of the largest size possible in the restricted space of the shield or *coat*, so that they could be seen and *read* (blazonry meant first the reading of the armorial devices of an approaching warrior). The herald's duty was, after a *blast* (German *blasen*) of his horn, to call aloud the make-up of the wearer's devices on shield, surcoat and helm, or *crest*. Now, how the deuce can you or any other man stick three or more fat, stuffed animals on a little shield and yet use it as a signal for the herald to read? But if you shrink Mr. Lion down to mere skin and bones (no stuffing) you leave room between them for the background of the shield and the composition is legible.



But those early heralds were intensely practical; that is why they made their animals *elastic*. They just stretched them out lengthways so as to take up all the width they had at their disposal, thus making a big show with mathematical economy of space. In the shield of Prince John of Eltham, still existing in stone at Westminster Abbey (done in the year 1336), as

FIG. 10.—SHIELD OF PRINCE JOHN OF ELTHAM, A. D. 1336.

shown in Fig. 10, we have heraldic perfection that is a never-ending source of admiration and emulation among disciples of the gentle art. This is consummate artistry. Three clear and distinct beasts and plenty of background to keep them from clawing one another. And look carefully at the beauty of the proportions; each differs to suit the space at disposal. And a large part of the shield is lost by that claim of a *bordure* of France. (See the *fleur-de-lis*.)

While on the topic of lions on *coats-of-arms*, let us mention the lion *statant* on the seal of Edward III., which shows it as a crest on a *cap of maintenance*, and later it appeared on a royal crown. The very ancient arms of Aquitaine were "Gules, a lion *guardant*"; Prince John, Lord of Ireland,

had two of them engraved as on his shield in his official seal.

The earliest authoritative date of the lion heraldic is probably about 1180. Traditionally, the lion was a Norman insignia far earlier than records. On the second Great Seal of Richard I. he carries a shield with *three* lions, which have been the coat-of-arms of England ever since. And at the present time it takes no less than *six* lions to satisfy the British heraldic quarterings.

"In days of old, when knights were bold and barons held their sway" the feudal "captains" were great sports. Sport and slaughter were ever uppermost in their minds. Perhaps the noted French writer's definition well represents the sentiment of those days. He said when the English sportsman gets up on a lovely Spring morning he looks out at the sunny landscape and says: "My! What a glorious day. Let's go out and kill something." We will find some blood-curdling acts in these pages to please those who love a gory tale. Here we have (Fig. 11) "a lion's head *erased*

FIG. 11.—LION'S HEAD ERASED. CREST OF MAJOR HARRY NORTH.

argent gorged with a collar *nebuly, sable.*

It is the crest of Major Harry North. That word *erased* tells the horrible tale. It means butchered so viciously that the bleeding cut is all *jagged.* When they cut off heads or other living members to place on crests and make a clean job of it, by leaving a straight, smooth cut it is known as *coupé,* as is seen done to the hindquarters of the poor lion in Fig. 12. This cruel ex-

FIG. 12.—LION COUPÉ, OR COUPED.

ample is called "demi-lion per pale indented sable and gules." Which ugly fact translated into the less barbarous United States parlance reads: A golden lion halved and then the front part painted black as the devil, with a zigzag border. (The S. P. C. A. did not exist those days.

So much for lions, now let us switch off to heraldry's second greatest animal.

(To be continued.)

The jewelry store of C. M. Bankston, Winona, Miss., was broken into on the night of April 13 by thieves, who were finally frightened away by people passing the establishment. Outside of the damage done to the glass of one of the front doors, which was broken by the robbers, Mr. Bankston suffered no loss.

Jewelers Win Important Suit Against Pawnbrokers With Whom "Memorandum" Goods Had Been Pledged.

A jury before Justice Erlanger, of the New York Supreme Court, Trial Term, Part XIII, Wednesday, brought in a verdict in favor of Marsellus Pitt & Co., 170 Broadway, New York, in their suit against R. Simpson & Co., pawnbrokers at 143 W. 42d St., to recover goods pledged with the defendant concern by J. Edward Boeck in 1906 and 1907. The jury awarded the plaintiff the property named in the complaint or $5,000, on the ground that it had been obtained on memorandum and title to it had never left the jewelry firm.

The complaint in the case alleged that between Dec. 21, 1906, and May 2, 1907, the pawnbrokers became possessed of a diamond and pearl ring valued at $850; two loose pearls weighing 23¼ grains and worth $550 and a pearl necklace consisting of 65 pearls and valued at $3,600, all belonging to the plaintiff, and that although on or about Oct. 15, 1907, a demand was made for the goods, they were wrongfully held. A judgment was asked against the defendants for the recovery of the goods or $5,000, together with the costs of the action.

The answer to the complaint denied that at the times mentioned the plaintiff was entitled to possession of the goods. The defendants admitted having the goods named in the complaint, but denied the other allegations. In the answer the contention was made that the goods were pledged by J. Edward Boeck, who was the agent of the plaintiff concern with unrestricted general power to sell articles of jewelry supplied to him by the plaintiff concern. It was explained that on the ring an advance of $400 had been made, and that $175 and $1,200 had been advanced on the two loose pearls and the pearl necklace, respectively. The defendants asked that possession of the goods be awarded to them until the payment of the loan.

During the trial, which occupied part of two days, a number of witnesses were called by both sides. Mr. Pitt, of Marsellus Pitt & Co., was questioned at some length in regard to transactions between his firm and J. Edward Boeck and in regard to the understanding in the trade as to memorandum transactions. Mr. Pitt said that Boeck claimed he wanted to show the pearl necklace to a Mrs. Hearn, and it was delivered to him strictly on memorandum, as was the other jewelry involved in the case.

Mr. Cadmus, an employe of the plaintiffs, who was conversant with the transactions in question, was called as a witness and questioned in regard to the memorandum bills and the Boeck transaction.

Mr. Joanne, of Wm. S. Hedges & Co., explained the meaning in the trade of a memorandum transaction.

Mr. Meehan, manager of R. Simpson & Co., was a witness for the defense and testified that the goods in question had been pawned at previous times by Boeck, and he gave the dates of the previous transactions of this kind.

In summing up the case the attorney for the pawnbrokers claimed that the plaintiff had not shown that R. Simpson & Co. came into the case until a demand was made for the goods. It was argued that Boeck was a factor or agent of the plaintiff concern and that the right to sell carried with it the right to pledge. It was not claimed, the attorney said, that the goods came wrongfully into the possession of the defendants. The wrong was predicated on Simpson's refusal to give up the goods. The goods were not stolen by Boeck, but came rightfully to him, it was argued; and, further, that when a demand was made for the goods advances had already been made by the pledgee. He claimed that his client had a special property right to the amount of the advances, and asked that the complaint be dismissed.

The attorney for the jewelers argued that the person taking goods on memorandum was not the owner's agent with unrestricted power to sell, but had only authority to exhibit the goods to possible customers, and no sale could be completed nor title pass from the owner until either the money had been accepted or the sale to the customer on credit had been acquiesced in by the owner of the goods. As that is all the power conveyed by a memorandum bill the goods cannot be pledged, it was claimed.

The memorandum bill in question was similar to many others used in Maiden Lane, and read as follows: "Goods described are sent to you for your inspection. They are the property of Marcellus Pitt & Co., and are to be returned to them on demand."

The judge directed a verdict for the plaintiff, and the jury so found.

It is understood that an appeal will be taken to a higher court at once.

It was said by Mr. Swan, of Reeding, Greeley & Austin, attorneys for the jewelry house, that the case was a clear memorandum case, and was tried on its merits as to what a memorandum transaction really is, and if finally won will establish the meaning of the memorandum beyond question. Blandy, Mooney & Shipman were the attorneys for the pawnbrokers.

The Japanese Cultured Pearl

Did you ever consider its possibilities as a substitute for the costly Oriental Gem?

It must be remembered that it is by no means an artificial pearl, but is the natural product of the cultured pearl-oyster, and presents a variety of specimens that compare in beauty with the finest of pearls.

A Japanese Pearl will be used without prejudice or hesitation by the most fastidious of pearl lovers.

It serves the purposes of the most expensive jewel at a cost that is but a fraction of its value.

New Jersey Retail Jewelers in Convention.

Members of the State Society Hold Second Annual Meeting at Newark Listen to Interesting Addresses, and Elect Officers and Committees.

NEWARK, N. J., April 14.—The first annual meeting of the New Jersey Retail Jewelers' Association was held yesterday at the Continental Hotel, in this city, and was attended by a representative delegation of jewelers from different parts of the State. Officers for the ensuing year were elected and a number of new members admitted to the society. J. P. Archibald, president of the American National Retail Jewelers' Association, attended the meeting and spoke at some length.

Notices of the meeting were sent out by the secretary of the New Jersey State Association some time before the convention and in response the jewelers began to gather for the meeting in the hotel, where at 2.30 P. M. the session was called to order by President F. W. Rowe, Trenton. Badges and programs were distributed and the secretary then read the minutes of the last two meetings. The New Jersey association was organized a year ago at Trenton, N. J., and a meeting was held during the week of the fair in Trenton.

The secretary's report showed an increase in the membership of the association since the last meeting. He reported that he had sent out about 500 letters during the year and had received favorable replies from a number of jewelers. The treasurer's report then followed.

President Rowe, in addressing the members, said that the society is on the right track to become a power for good in the trade. He then reviewed the formation of the society and made a plea for a greater membership in the association. "What we need is members. You can reach a man best by talking to him, letters do not have the same influence," said the president. Newark, being a great jewelry center, the association looked there for support. He then reviewed briefly the advantages to be gained and the good work that can be accomplished by united effort in the association.

H. L. Rickey, first vice-president, endorsed the sentiments of President Rowe in a short speech. He spoke of the need of co-operation and told of the good resulting from the meetings of the Jewelers' Club of Trenton, where co-operation has proved the keynote of success and where all the jewelers are on friendly terms. "If you can't make a sale send your customer to some brother jeweler," advised the speaker.

Secretary Fort, Treasurer Lyons and Second Vice-President John Harris were among the other speakers called upon by President Rowe.

President J. Archibald, of the National Association, was the next speaker. He was received with applause by the meeting and spoke for some time. In his opening remarks the National president told of the formation of the New Jersey association despite the fact that the day of the first gathering in Trenton a year ago was very stormy. At first the prospect was far from encouraging, but the result of the day's work proved successful and the society was started with a great deal of enthusiasm.

He next spoke of the Jewelers' Club of Trenton and the good work it is doing, explaining that the jewelers' clubs are the units of the entire movement and that the success of the entire National association depends on the spirit of good will and co-operation fostered in these clubs. He said that there are at present over 20 such clubs in the country and that at Pittsburg the club is only a year old and has a membership of 150. Before the formation of the

F. W. ROWE, RE-ELECTED PRESIDENT.

Pittsburg club the conditions in that city in the jewelry trade were worse than anywhere else in the country, but to-day there is hardly a jeweler in Pittsburg of any importance who does not belong to the club.

The speaker said that there are about 300 legitimate jewelers in New Jersey and that he hoped to see at least 100 of them in the State society by another year.

Mr. Archibald next discussed briefly the advantages to be gained by organization in the State and cited numerous questions of importance to the retail jewelers and told briefly of some of the things accomplished by the National association. He advocated a fixed selling price and said that the association was against having all watches sold to the retailer in cases. The effect on the department store of a fixed selling price is that the business is turned to the jeweler, where it belongs, it was explained. The speaker said that this is the last year for him as head of the National association.

Mr. Archibald spoke of his visits throughout the country and pointed out that home competition is what does the harm to the retail jeweler. He said the time is not far distant when a jeweler who wishes to join the association will have to send in his application and then wait to see if he is accepted.

The speaker next took up the matter of fraudulent advertising and talked on this subject for a time. He paid a compliment to the trade press and then went on to a discussion of the trade-mark adopted by the National association. In conclusion he said that the word "competitor" has been eliminated in the association and in its place is used the term "business associate." He then introduced Col. John L. Shepherd, of the Keystone Watch Case Co.

Col. Shepherd spoke for a short time in his pleasing style and was warmly received. He told the jewelers that there is no profit in competition based on enmity. He said he had been impressed with the remarks of Vice-President Rickey and that he, too, believed the word brother is much better than competitor. The New Jersey association ought to be one of the best in the country, said the speaker, and in conclusion told one of his pleasing stories.

The meeting then elected officers for the coming year. President F. W. Rowe, Secretary Geo. E. Fort and Treasurer I. D. Lyons were reelected. The other officers elected are: First vice-president, C. J. Brotherly, Newark; second vice-president, Charles Hartdgen, Newark; third vice-president, Sidney T. Holt, Newark; fourth vice-president, C. W. Bowman, Summerville; fifth vice-president, Otto Roggenkemp, Elizabeth.

Charles Hartdgen, Newark, and John Harris, Trenton, were elected delegates to the National convention in Detroit, Mich., next year. President Rowe and Sidney Holt were chosen alternates.

A committee on membership was appointed as follows: C. J. Brotherly, Sidney Holt, C. W. Bowman, A. Kohn, O. T. Fenton.

It was decided to hold the next annual meeting in Newark in a two days' session and it was left for the officers to fix the dates. There was some discussion of a meeting in conjunction with the State Optical Society and the matter was referred to the executive committee.

Representatives of a number of jewelry and watch houses were on hand, among whom was J. T. Montgomery, New York representative of M. A. Mead & Co., who, just before the meeting adjourned, spoke to the jewelers for a few moments on advertising and the benefits to be derived therefrom. Other representatives were: "Del" Lee, representing the E. Howard Watch Co.; Mr. Russell, representing the South Bend Watch Co.; Mr. Barymore, representing the Robert H. Ingersoll & Bro., and a representative of N. H. White & Co.

The retail jewelry store of W. Rave, Sandusky, Tex., was entered recently, by burglars, who stole $1,600 worth of stock. The loot included 70 finger rings set with various kinds of precious stones.

Wm. Smith, Des Moines, Ia., died at his residence, 1021 Eighth St., recently, following an illness of several days, of typhoid fever. He was born in Chillicothe, O., in 1861, and leaves a widow and four sisters.

Members of the Jewelers' 24-Karat Club of New York Make Merry at Beefsteak Dinner and Monthly Meeting Held Recently.

The 24-Karat Club of New York justly prides itself on the splendor and general excellence of its yearly banquets, but it is doubtful if any member of the club would say that he ever had the same amount of solid enjoyment and genuine fun out of one of those functions that he experienced at the annual beefsteak dinner, held Tuesday evening at "Castle Cave," 271 Seventh Ave., New York. The beefsteak dinner was preceded by a meeting of the club, which was held in the room in which the dinner was served.

Members and guests of the club began to arrive shortly after 6 P. M., and were shown to the basement of the "Cave," where they were supplied with caps and aprons and spent a short time in social chatting. After some time spent in "swapping" stories and, in a general survey of the place, which included a menagerie composed of a big owl in a wire cage, which did not seem inclined to share the festive spirit, the announcement was made by "Charlie" Brinck that the time had arrived for the preliminary meeting to begin. He succeeded with little difficulty in inducing the jolly jewelers to find their respective places in an adjoining room, which was arranged for the occasion.

The tables were linen covered wine boxes, before each of which were two chairs, arranged in long rows facing each other. In the center of the first row was seated President Kaiser with ex-President Power on one side and Secretary Stebbins on the other. Each place was marked with a card bearing the name of the member for whom it was intended.

When all had found their respective places the long rows of white-garbed men wearing their caps in every conceivable style presented a most unique and pleasing appearance, the effect being heightened by contrast with the gloomy stone walls and frowning rafters around and above them. At one end of the room was a piano, and there the professional entertainers and musicians were assembled.

After a time President Kaiser succeeded in restoring a semblance of order and formally opened the meeting. The minutes of the last meeting were read and accepted, and several new names for membership announced, which were received with applause and accepted. Under the head of reports of committees Mr. Brinck reported upon the annual outing, which is to be held at the Hotel Port-au-Peck, Long Branch, this Summer. J. Warren Alford, as chairman of the committee on sports, reported "progress."

Leo Wormser, on behalf of the 24-Karat Club, presented "Charlie" Brinck with a fine shirt set, including links and studs set with moonstones and enclosed in a leather case. His presentation speech was brief and to the point. He said that last year the club presented Mr. Brinck with a diamond ring and that there was a surplus left from the fund at that time which had been used for the gift. He closed by paying a tribute to the much appreciated work of Mr. Brinck, who replied in a few well-chosen words, voicing his appreciation and thanks for the gift.

After the meeting had been declared adjourned a toast was proposed to Col. John L. Shepherd, "the grand old man of the jewelry trade," as he is affectionately called. It was received with spirit, and everyone rose to do honor to the "Colonel." In response to calls for a speech from all parts of the room Colonel Shepherd said that he appreciated what President Kaiser had said of him in proposing the toast, and added that although he was perhaps older in years than many present, he was the youngest man there in spirit. He then told one of the best of his inexhaustible store of humorous stories, which caused a burst of laughter. In conclusion Colonel Shepherd told you members to "paint all the rainbows you can on the trouble of the other fellow, and they will shine all the brighter for you."

The menu, which started with a round of cocktails, consisted principally of bits of delicious steak served on slices of bread, followed by lamb chops and fried chicken. With the courses celery was served (probably as a nerve restorer), and in addition was the usual generous supply of liquid refreshment. Soon after the feast began a toast was proposed to "Charlie" Brinck, and the same honor was paid THE JEWELERS' CIRCULAR-WEEKLY, both of which were drunk in true 24-Karat style.

By this time T. Arthur Baker and his corps of assistants had begun to rouse the echoes of the gloomy room with popular songs, in the choruses of which all joined with a will. Among the songs were "Yip-I-Addy-I-Ay," "Has Anybody Here Seen Kelly?" "I've Got Rings on My Fingers," none of which proved more popular than that old standby of the club, "Annie Rooney." The choruses of the songs were printed in pamphlets and distributed at the different tables. The spirit and zest with which the jewelers sang testified to the pleasure that part of the entertainment gave them.

Toasts were drunk to President Kaiser, to Mr. Beuckè, superintendent of the Crescent Watch Case Co., who just celebrated his silver wedding; to Fire Commissioner "Matt" Stratton, Newark, N. J.; to ex-President Powers, and others.

When coffee was served everybody was supplied with a big wooden pipe and a pouch containing a box of fine tobacco. The pipes were filled and lighted and the attention of the jewelers was then taken by an excellent programme of song, monologue, music and magic, the entertainers, including Mr. Baker, James Devins, monologist; "Musical Huehn"; John F. Heaney, "The Irish Alderman," and F. D. Hewes, the man of magic, who performed a number of up-to-date tricks which kept the jewelers guessing.

After the regular programme of entertainment had been exhausted, Colonel Shepherd was called upon and told a number of mirth provoking stories. "Matt" Stratton also told a story, as did Alfred Krower and Frank Sloan.

The dinner broke up shortly after 10 o'clock, and all joined in declaring it the most successful affair of the kind ever given by the 24-Karat Club.

Echoes from the Cave.

Was the alibi proven?

* * *

Why didn't Warren dance?

* * *

Adolph Schwob was there and enjoyed it all.

* * *

Leo Wormser was busy but found time to get in on the "eats."

* * *

John W. Sherwood had a smile and a pleasant word for everybody.

* * *

L. P. Carpenter looked happy and made good on the steak and chicken.

* * *

Charlie Power was on the job and did justice to the good things provided.

* * *

Harry Larter was one of the happy crowd. He is 24-karat fine every time.

* * *

The pipes and pouches made acceptable souvenirs of a most pleasant evening.

* * *

Everybody missed "Gus" Sloan. He is usually at every dinner of the club.

* * *

Percy Savory started a coin matching contest and, as usual, got away with the money.

* * *

President Kaiser will surely need a new gavel after the work the one he used received.

* * *

Alfred Krower looked almost as happy as he did the night when the big cup was presented to him.

* * *

Charlie Brinck showed everybody his gift. He was much pleased and wanted everybody to know it.

* * *

"Matt" Stratton said it was easier to put out a fire in Newark than to tell the 24-Karat Club a story. Yes?

* * *

Vice-President Gough lost his glasses, but it was not true that Brother Wormser did it in order to sell him a new pair.

* * *

George Stebbins was seen going around industriously puffing at the bowl of his pipe. He said the stem didn't work.

* * *

Mr. Manheimer sat up close and enjoyed the efforts of the professional talent. He surely appreciates a good story.

* * *

Last year the ladies were present but the jewelers seemed to enjoy themselves equally as well this time without them.

* * *

The Jewelers' Safety Fund Society and the Jewelers' Protective Union were represented by the assistant secretary, Fred L. Goddard.

* * *

No "smoke went up the chimney," but a big cloud arose from the many pipes just the same. The jewelers for once forgot their "national anthem."

* * *

Leo Wormser, chairman; Charles L. Power, Chas. R. Jung, Wm. I. Rosenfeld and Percy Savory are to be congratulated on the successful outcome of their efforts.

* * *

Col. Shepherd maintained his record as the prince of story tellers and the king of good fellows. Could anyone else have brought order out of chaos as he did, simply by telling a story?

* * *

Brother Hollister came down to New York especially for the feed. When he heard it was to be "on the club" he just couldn't resist. At least that's what he told his friends and "Jack" Beecham backed him up.

Exports of American Clocks, Watches, and Jewelry, Etc., to Canada and Siam.

WASHINGTON, D. C., April 16. Consul Frank Deedmeyer, of Charlottetown, Prince Edward Island, furnishes the following statistics, covering the trade of Canada in foreign clocks, watches and jewelry, showing that the imports from the United States exceed those of all other countries.

The imports of jewelry into Canada for the fiscal year 1908-9 amounted to $1,000,592, of which $689,659 came from the United States, against $181,914 from the United Kingdom, $63,324 from Germany and $59,077 from France. Much of the trade consists of plated ware of the cheaper quality. In Prince Edward Island there is an active demand for bracelets, pins, hat pins, brooches, neeklaces of inexpensive stones, belt buckles, watch chains, silver and plated table ware and silver-mounted articles.

The demand for the well-known watch movements made in the United States, especially in gold-filled cases, is growing. The imports of watches, cases and movements into Canada during the fiscal year 1908-9 amounted to $786,422, of which $538,336 were imported from the United States. The following statement shows the imports from the principal countries during the year:

Description.	*Total imports.*	*United States.*	*United Kingdom.*	*Switzerland.*
Finished watches.	$43,517	$16,157	$11,273	$10,559
Cases and parts of watches....	73,213	48,287	2,380	16,272
Movements, bars and sleeves....	669,692	473,892	8,721	145,468
Total	$786,422	$538,336	$22,374	$172,299

The imports of clocks and parts thereof during 1909 amounted to $315,287. The imports from the several countries were as follows: United States, $250,788; Germany, $37,254; United Kingrom, $15,794; France, $6,479. Just now there is an active demand for medium-priced mantel clocks.

In Prince Edward Island gold-filled watch cases, men's and women's, and highly ornamental mantel and alarm clocks are in greatest demand.

FOREIGN ELECTROPLATED WARE IN DEMAND IN SIAM.

Vice-Consul-General Carl C. Hansen, of Bangkok, furnishes the following information concerning the demand for electroplated ware in Siam:

Betel chewing is quite common in Siam, for which a set of five vessels, and a tray to hold them, are in use. These were formerly manufactured in the country, of beaten gold, silver and copper, or of earthenware, of various sizes and designs, but this industry has been superseded by electroplated ware from foreign countries, notably from German, wherein are reproduced exact imitations of the ancient patterns of these utensils as well as of other hollow ware.

The imports of plated ware into Siam for the fiscal year ended March 31, 1909, amounted to $152,022, of which $73,441 was from Germany and $17,453 from the United Kingdom, the balance coming from various countries. There were no imports from the United States.

There is an increasing demand in Siam for silver-plated hollow ware of all kinds—knives, forks, spoons and other table ware and for ornamental purposes, the Siamese gradually adopting methods of living common to western civilization.

Meeting of the Executive Committee of the Maryland Retail Jewelers' Association.

BALTIMORE, Md., April 13.—The executive committee of the Maryland Retail Jewelers' Association, Inc., met, last night, in the association's quarters in the Royal Arcanum clubhouse, Lexington and Saratoga Sts., to formulate, among other things, plans to increase the membership and to listen to reports of certain members who have been doing good work in this line. It seems that certain of the retail jewelers cannot yet understand the benefits to be derived from such an association and the need of a strong body, and these jewelers are withholding their aid, although the prospects of their soon becoming members as active as those now in the association seem to be good.

That the efforts of the society are bearing fruit in regard to the formation of the "one price" system is evidenced by the fact that one of the most prominent and popular of the Charles St. jewelers has caused to be displayed in prominent places throughout his store cards bearing the words "Strictly One Price." This, in itself, should start the ball rolling and the stopping of unreasonable competition should follow.

An entertainment committee to consist of Messrs. Bartholomee, Euler and Smith was appointed by President Schirm, and with them the plans for the coming annual outing were discussed, as were those pertaining to certain pleasant surprises in store for the members.

At the meeting the subject of jewelry peddling was broached. This is the greatest evil the retail jeweler has to contend with and information was brought out, emanating from good authority, that there were 287 pocket dealers now doing business in Baltimore and these men will sell anything at any time, on the street or any other place possible, from a three-karat diamond in a setting down to a collar button of the plated variety, and it does not matter what the customer may desire, it is forthcoming, if not from the pockets of the dealer the article seems to be ready for delivery in the store of some wholesaler. President Schirm said that the elimination of pocket sales should be the aim of, and receive the aid of every jeweler in the State and such publicity be given the matter that will tend to bring this about. One man or firm or a dozen cannot do more than harass this competition, but the joint onslaught on the part of all would make pocket-dealing unknown.

An invitation is extended to all legitimate dealers to attend the meetings of the association.

C. L. LENZ.

Albert Brown, a jeweler of Lincoln, Ill., and Miss Ada F. Demling, Atlanta, Ga., were married, April 14, at the home of the bride's parents, Mr. and Mrs. Charles Demling, prominent and wealthy farmers. Mr. and Mrs. Brown will reside in Lincoln.

Bankruptcy Petition Filed Against J. Edward Boeck, Now Serving Sentence for Swindling Jewelers.

A petition in bankruptcy was filed last week against J. Edward Boeck, who is at present serving a prison sentence of seven years at Sing Sing for having obtained between $30,000 and $40,000 worth of pearls and other jewelry from New York jewelers and then leaving the country for China. He ventured back to San Francisco in 1908 and was arrested at that time.

It was announced from St. Paul, Minn., some time ago that J. C. Lounsberry, who died there, left about $500,000, and that J. Edward Boeck, as his nephew, was one of the heirs. The estate was at once attached for $14,353. The attorneys for the creditors who filed the petition in bankruptcy against Boeck took the measure to prevent preferential payments to the attaching creditors. The creditors filing the bankruptcy petition were: Mary G. Boeck, of Glenside, Pa., $80,000 on a judgment obtained last December in Philadelphia for money loaned; Leonora J. C. Boeck, of the same address, $475, money loaned, and Wm. H. McDaniels for $90, loaned in 1908.

United States Marshal Henckel sent a deputy to Sing Sing Prison to serve the papers in bankruptcy on Boeck.

Lesser Bros., attorneys for the petitioning creditors, have obtained an order from Judge Hand restraining further decision on a judgment for $13,343 which was obtained against Boeck.

Boeck formerly had an office at 170 Broadway, and was an art connoisseur and agent extraordinary to millionaires, and claimed to have connection with the Chinese Government.

Negro Captured After Bold Attempt to Steal Watches from Washington, D. C., Jeweler.

WASHINGTON, D. C., April 14.—Salvatore Desio came near being the victim of an evidently well-laid plan to relieve him of a portion of his stock to-day, but the robbery was prevented and the thief captured. A colored man entered Desio's new store at 926 F St. N. W., and asked to be shown some high-priced watches. The clerks were somewhat suspicious of the man, so turned him over to Mr. Desio personally, who brought out a watch valued at $50 for the stranger's inspection; also one worth about $25. The man asked to be shown another one to enable him to make a selection, and as Mr. Desio went to another counter to get the third watch the negro started to make his exit, the two watches in his hand. George Reed, traveling for Larter & Sons, who was standing nearby awaiting an opportunity to show his line to Mr. Desio, saw the thief and followed the man, shouting "Stop thief!" at the top of his lungs. Others took up the chase up F St. N. W., down 10th St. to E St., to 9th St., and then to Pennsylvania Ave, where the thief was caught and arrested after a struggle.

The prisoner is 5 feet 6⅝ inches, weighs 175 pounds, and is well built. He has the ordinary negro features, and is said to be a waiter by occupation.

It is reported that there is a good opening for a jeweler at Evansville, Minn.

ATTLEBORO, MASS.

37 Maiden Lane NEW YORK 910 Heyworth Bldg. CHICAGO

National Association of Manufacturing Jewelers Organized and Committees Appointed.

PROVIDENCE, R. I., April 13.—A largely attended meeting of the manufacturing jewelers of this section of the country was held yesterday afternoon at 42 Weybosset St., this city, and organized what is to be known as the National Association of Manufacturing Jewelers. More than 50 manufacturers representing this city, North Attleboro, Attleboro, Plainville and other New England towns, are interested in the new association.

The meeting was the outcome of a movement inaugurated nearly a year ago for the purpose of answering grievances that the National Jobbing Jewelers' Association claimed to have against some manufacturers for selling direct to dry goods and department house concerns, and other matters. At that time the Manufacturing Jewelers' Board of Trade of this city as well as the New England Manufacturing Jewelers' and Silversmiths' Association were asked to take these matters up, but these associations thought that they could do nothing as associations.

Robert E. Budlong, who at that time was president of the Manufacturing Jewelers' Board of Trade, was appointed a committee by that organization to look into the matter, which he did, but no action concerning it was taken. Mr. Budlong became interested in the subject and made a special study of the conditions and the complaints and felt that there should be some medium through which any differences or contentions on the part of either the jobbers or manufacturers could be discussed and adjudicated on an equal plane. He has given the matter considerable careful consideration and late in December invited a number of manufacturers to meet with him and discuss the situation.

As a result the meeting of Tuesday afternoon was called. Mr. Budlong presided at the temporary organization and explained the purposes and scope of the proposed association. He emphasized the fact that the purpose of the association was co-operative and not antagonistic to the jobbing associations and that it was for the purpose of considering any matters presented by the National Association of Jobbers as well as to present to the latter association any matters from the manufacturers' standpoint.

In a statement issued after the meeting it was announced that the National Association of Manufacturing Jewelers had been formed for the purpose of discussing the distribution of their products to the wholesale watch and jewelry trade through mutual co-operation and to the better interest of both. It is the intention to obtain a clearer understanding and more equitable adjustment of some of the problems in methods and expenses now involved in marketing goods. The purpose is entirely co-operative and not antagonistic or aggressive.

A partial organization was effected with Robert E. Budlong, of the S. K. Merrill Co., of this city, as president; Harold E. Sweet, of the R. F. Simmons Co., Attleboro, secretary and treasurer. These, with Fred D. Carr, secretary of the Ostby & Barton Co., this city; Ira Barrows, of the H. F. Barrows Co., North Attleboro, and David L. Lowe, of the D. F. Briggs Co., Attleboro, constitute the executive committee.

Several committees were appointed for the consideration of various matters and several of the points that have already been presented to the manufacturers by the jobbers' association were discussed, but no definite action taken. Another meeting will be held in a short time, at the call of the chair, to complete the organization, adopt by-laws and rules and be in a position to take up any matters coming before it in a regular form.

District Attorney in Los Angeles, Cal., Says Court Will Be Asked to Dismiss Case Against Jeweler and Wife.

LOS ANGELES, Cal., April 13.—The District Attorney's office late yesterday afternoon gave the information that the charge against Albert Fink and his wife, Julia Fink, brought by the Southern Pacific Railroad Co., accusing them with guilt in connection with the disappearance of some $10,000 or $12,000 worth of jewelry from the trunk checked to San Francisco by Harry Adams, a traveling salesman for A. Fink & Co., would not be pressed, but that the court would be asked to dismiss the case. This action naturally follows the outcome of the examination of the Finks under a similar charge by the Hartford Fire Insurance Co., when the prosecution was so overwhelmingly defeated by the testimony of some 16 witnesses who swore that Mrs. Fink was in this city at the time when she was alleged to have been in San Francisco.

There is a very general impression here that there was no justification for the charge. Those who know Mrs. Fink declare she is a kindly, upright, domestic woman who would not under any circumstances be party to such a transaction as was charged. Mr. Fink's reputation here also has always been good, and even if disposed to "switch" the checks, as alleged, it is difficult to see how he could possibly have carried out the scheme without detection.

Mr. Adams had the trunk checked early in the afternoon, receiving this check at the baggage room at the Southern Pacific station. The next train, on which the trunk presumably went, did not leave till late in the evening, so the trunk was probably in the station nearly all the afternoon. The number on the baggage-master's book corresponding to that of the check held by Adams when he arrived in San Francisco was recorded, it is said, as calling for the suit-case instead of the trunk, showing that the record was either entered or changed after the checks had been changed. The numbers of the checks were identical except for the last figure, that of the one ending in "3" and the other in "8," a circumstance that lends interest to the case.

Burglars broke into the retail jewelry store of I. Samuels, Owego, N. Y., recently, and escaped with about $200 worth of jewelry. The thieves gained entrance through the front door, which the jeweler believes he neglected to lock.

Jeweler of Baltimore, Md., Robbed of $500 in Broad Daylight.

BALTIMORE, Md., April 14.—J. C. Justis, 30 E. Baltimore St., was to-day the victim of one of the boldest robberies in the annals of the police department. Mr. Justis had called at the Continental Trust Co. and had drawn $500; four $100 and two $50 bills, and was on his way to a store, on the second floor at 208 E. Baltimore St., to make a purchase.

Mr. Justis crossed Baltimore St., just a little east of the regular crossing and stopped to look into a window on the first floor. Upon turning to enter the doorway to get to the store he was accosted by two men, one of whom grasped him around the waist from behind while the other took him by the arm and turned him around so that he faced the street. One of the men mumbled something to the effect that they had mistaken Mr. Justis for another party, and passed out of the doorway.

Mr. Justis for the moment was bewildered, but quickly realizing that the two men had made an attempt to rob him, put his hands in his pockets only to find that they had been successful.

The robbery took place at noon in one of the most crowded thoroughfares of the city and almost in sight of the traffic squad policeman who directs the traffic at the corner of Baltimore and Calvert Sts.

The police department was immediately notified and instructions have been issued for the apprehension of certain men.

Burglars Break Into Optical Store and Steal Supplies Valued at $1,500.

BOSTON, Mass., April 13.—The store of A. E. Covelle, optician, at 350 Boylston St., was entered by burglars between midnight and 2 o'clock this morning, and optical goods valued at $1,500 were stolen. A policeman on his rounds found the front door of the store unlocked.

The burglars had pried open the door with jimmies, the marks of the tools of two sizes being found on the door. They worked in the full glare of a street electric light, and with a light burning in the store, as it is the custom of the firm to keep the place lighted all night. The robbery was one of the most daring that has been perpetrated for many a day in this city.

The articles taken were mainly from the show window at the front of the store, and comprised a number of binoculars, valued at $100 each, opera glasses to the value of $350, several aneroid barometers, lorgnettes and other goods. It is evident that the thieves were familiar with the value of the various things taken, for the selection was made with expert discrimination. Goods in the rear of the store were not disturbed, and the safe evidently was not touched.

"The Blackstone," a splendid new Chicago hotel on Michigan Boulevard, overlooking Lake Michigan, which was opened to the public April 16, has a silver service which has been commented upon most favorably. The service was designed and made by the Gorham Co., New York and Providence.

Death of Robert W. Dean.

PROVIDENCE, R. I., April 15.—Robert W. Dean, treasurer of the Brown & Dean Co., gold refiners, 102 Richmond St., this city, died suddenly at the Seymour hotel yesterday, while on his way to his home in this city from a three months' sojourn for his health at Fort Mead, Fla.

Mr. Dean was born in Worcester, Mass., Oct. 24, 1867, and received his education in the public schools of that city. After graduating from the high school he entered Williams College, Williamstown, Mass. After two years of foreign travel he came to this city, and in October, 1891, associated himself with Samuel Brown, who had had long experience in connection with the gold and silver refinery business,

THE LATE ROBERT W. DEAN.

and formed the concern of Brown & Dean, the latter being the solicitor.

In April, 1895, Herbert A. Capron, who recently died, was admitted to the firm, and in the following month the concern became incorporated in Rhode Island under the style of The Brown & Dean Co., of which Samuel Brown was elected president, Robert W. Dean treasurer, and Herbert A. Capron secretary. After the incorporation of the business, Mr. Dean became interested in several other enterprises in this city, including the Crocker Tile Co., the Rhode Island Motor Co. and the Household Furniture Co. Upon the advice of his physician he had recently withdrawn from the first two concerns. He was a member of the Pomham Club.

It had been Mr. Dean's custom for several years to spend his winters in Florida, where he had a cottage. He had been enjoying his usual health until about two week's ago, when a complication of troubles attacked him and it was decided to return to his home. Last Sunday, accompanied by his wife, his brother, John M. Dean, and his sister, Mrs. Middlebrook, he started north. At Philadelphia he had a bad turn but managed to reach New York Tuesday afternoon. Here Mr. and Mrs. Dean took up their quarters at the Seymour Hotel. The former was apparently so much improved that his brother and wife left him and continued on to this city.

Wednesday afternoon they received word that pleurisy had developed and a few hours later that the administration of oxygen had been resorted to. Mr. Dean died about 7:30 o'clock yesterday morning. He leaves his widow, one brother and three sisters. His father and mother, John and Hannah A. Dean, died some years ago.

P. J. Cummings, Attleboro, Mass., Found Guilty of Using Mails to Defraud.

BOSTON, Mass., April 14.—Patrick J. Cummings, of this city and Attleboro, jewelry manufacturer, charged with using the mails to promote an agency scheme with intent to defraud, was found guilty in the United States Circuit Court before Judge Dodge to-day.

It is claimed that Cummings had made contracts with persons in various parts of the country. The scheme, as related by witnesses at the trial, involved the payment, by those with whom he made agency contracts, of $1,200 to secure the outfits furnished. Salaries of $150 per month were promised, it was asserted, but complaint was made that the jewelry furnished was of little value and that the contracts were not fulfilled by Cummings.

He has declared his intention to carry the matter to the Court of Appeals.

Schedules in Bankruptcy of Jeweler Who Is Now Serving a Sentence for Forgery.

CHICAGO, April 14.—Schedules in bankruptcy of G. Frangi more, who is now serving a 14 years' sentence in the Louisiana State Penitentiary for forgery, give the following list of creditors: Less than $50, Walter Frazer Brown, S. Glickauf & Co.; $50 to $100, B. Schuette, S. Lazarus & Co., Wm. L. Gilbert Clock Co., Meyer, Joseph & Co.; $100 to $150, Illinois Show Case Co., Nessler, MacKenzie & Co., J. De Mariano & Co.

The largest creditors are: A. C. Becken Co., $211; Emil Braude & Bro., $342; I. Castagnetta & Son, $179; A. M. Johnson, $307; Alex. Labsevitz, $454; Hilton S. Herzog, $350; C. J. Rochr & Co., $254; Despres, Bridges & Noel, $681; Rockford Watch Co., $154; Stein & Ellbogen Co., $315; Jacob Strauss & Sons, $850; Leon Hirsch, $293.

Jeweler of Atlanta, Ga., Sued for $25,000 Damages by Former Employe.

ATLANTA, Ga., April 16.—A suit for $25,000 alleged damages was filed here this week in the superior court by D. A. Tobias, a jeweler on Alabama St., against his former employer, Nat Kaiser, a diamond broker at 15 Decatur St., charging slander and libel. A suit for a similar amount was on the same grounds filed against N. L. Ullman, who is interested in the firm of Nat Kaiser & Co.

In his petition Tobias charges that Ullman has been circulating remarks reflecting on his (Tobias') character, to injure him because he is now a business competitor. Owing to the prominence of all parties the suit has been much discussed here.

Death of Charles Zens.

ST. LOUIS, April 19.—Charles Zens, dean of St. Louis watchmakers, died to-day at his home, 2129 Sidney St., after a long illness of Bright's disease. He was 62 years old and had been in business in St. Louis for about 40 years. He was born in Los Angeles, but was taken to Dusseldorf, Germany, when two years old, and learned the watchmaking trade there with other members of his family, all of whom were watchmakers. After he returned to America and settled down in St. Louis he was for a good while with the Bauman-Massa Jewelry Co. For several years Mr. Zens was in business with Charles Durkee under the firm name of Durkee & Zens, at 1012 Olive St. About 12 years ago a

THE LATE CHARLES ZENS.

severe attack of illness prevented him from giving his attention to the business, and it was closed out. He then associated himself with Louis Robin in the Globe-Democrat building, and these two had been together ever since. His wife died just five years ago. He leaves one son and two daughters, Casper Zens, Miss May Zens and Mrs. Lizzie Krite. He had been seriously ill for the past six weeks. For a week past his death had been almost momentarily expected.

Coleman E. Adler, New Orleans, La., has for some time made a display of silver coin jewelry. In order to make an attractive exhibit, he had a replica made in his own factory of the New Orleans Mint. It is a miniature building over eight feet wide and six feet high, and is an excellent representation. Not only the building but the guard house, the grounds and even the names of the streets on which the Mint is located are portrayed. In front of the building is a fine display of coin jewelry, and against the building are bags of silver dollars, as they are turned out by the Mint. On top of the building a United States flag waved, being kept in constant motion by a concealed electric motor. In the other window was a stuffed camel with elegant trappings and bearing a miniature Shriner in full regalia.

Although true Black Opal is scarce, we have a notable stock in all grades received by us in a rough state direct from the mines and cut in our lapidary shop in New York.

Our prices are necessarily less than those obtaining in Europe and the fact that no two stones are alike makes this gem very attractive as a profit getter.

WE ARE SPECIALISTS IN BLACK OPALS

All the wonderful changing colors of the Solar Spectrum vibrate through "Black Opal," some in small pin point markings, others in harlequin, peacock and formal designs.

Some stones exhibit broad flashes of red, blue, green and purple while others exhibit cloud effects and sunsets such as Turner painted and only a Ruskin could describe.

Burglars Loot Safe of Jewelers in Newark, N. J., of $1,000 Worth of Stock.

NEWARK, N. J., April 15.— Some time between closing hours on Tuesday and the following morning, burglars entered the jewelry factory of Schueler & Grieser, 93 Lafayette St., unlocked the safe and took the contents, valued at more than $1,000. The windows and doors of the factory were apparently untouched, the only evidence of the burglars having been there being a few scratches on the safe door.

The watchman, who was in the building during the night with his dog, heard nothing and saw no one enter the building. The safe was an old-fashioned one, and Richard Schueler, one of the partners, was the only person having a key to it. There had formerly been another key, but this was lost about nine months ago. The firm used to be known as Schueler Bros., Mr. Grieser having purchased an interest in the business last January.

Because of the dull season the members of the firm had done all the work required, no employe having worked there for the past two months. The theft was discovered when Mr. Schueler arrived at the factory, Wednesday morning. He put his key into the lock of the safe and started to unlock the door when it swung open. The other partner arrived soon afterward and they reported the matter to the police. Detectives were put on the case but up to the present have not discovered the thief or thieves.

The gold stolen weighed 1,000 dwts. Of this 214 dwts. was six karats and the remainder was ten karats fine. The other goods stolen were 62 gold lockets, round and heart-shaped, and of different sizes, 90 scarf pins, each containing a small stone, 18 hollow-shell scarf pins, 12 scarf pins of various patterns, 12 baby pins containing pearls, 10 chatelaine bags of various designs 60 heart-shaped watch charms, 24 brooches, cuff buttons, studs and miscellaneous articles, 18 diamond chips and two bottles of melted gold filling.

Chicago Judge to Correct Abuses in Appointment of Receivers in Bankruptcy Cases.

CHICAGO, April 18.—Judge George A. Carpenter, of the United States District Court, has made it known that in future he will not appoint receivers for bankrupts except when necessary and after a full exposition of the facts in the case. Last week he refused to appoint three receivers, much to the surprise of the lawyers interested.

Judge Carpenter's decision is especially interesting in view of the action of Congressman A. J. Sabath, who has demanded a Federal inquiry into court methods in bankruptcy proceedings.

S. E. Lesher, Bucyrus, O., is about to move to Kissimmee, Fla. He is preparing to close out his business at the former place.

S. H. Sorensen, who recently purchased an interest in the business of H. E. Madsen, Kimballton, Ia., will shortly take a trip to Europe.

Death of Peter J. Richrath.

Peter J. Richrath, an expert watch and chronometer maker who was in business in the Maiden Lane district for many years, died suddenly at his home, 281 President St., Brooklyn, Monday morning, at 7 o'clock. Death was caused by a weak heart and a general decline in health due to advanced age. He was at his office at 68 Nassau St. about 10 days ago, and had not been considerad seriously ill. His demise came as a great shock to his many friends

THE LATE PETER J. RICHRATH

and acquaintances in the New York watch trade

Mr. Richrath was born Aug. 2, 1833, at Cologne, Germany, and came to this country when a young man. He worked two years as a journeyman watchmaker and then started in business for himself in 1853 in the old building at 68 Nassau St. From there he moved across the street to what was then 69 Nassau St., where he remained for 38 years. He then moved back to his present address. His son, Julius J. Richrath, has been associated with him in business for a number of years.

Mr. Richrath will be remembered by his many friends as a man of kindly disposition and one who always looked on the bright side of life.

The funeral will be held to-night from his late home. Besides his son, Julius, deceased is survived by a widow. The interment will be in Greenwood Cemetery.

Death of Jonathan S. East.

PHILADELPHIA, Pa., April 13.—Jonathan S. East, for 40 years in business in Boyerstown, Pa., and well known to the trade in this city, died at his home, April 8, and was buried in Fairview Cemetery, of the same place, April 13.

Mr. East taught many apprentices the art of watch repairing and kindred lines. The following is a partial list of successful business men who were taught by him: E. M. Stauffer, East Greenville, Pa.; E. S. Gehman, Bally, Pa.; C. W. Ritter, Pottstown, Pa.; H. B. Schanely, Quakertown, Pa.; A. B. Yorgey, Reading, Pa.

The Waite-Thresher Co. Buys Real Estate and Will Erect a New Fire-Proof Building.

PROVIDENCE, R. I., April 16.—The Waite-Thresher Co., manufacturing jewelers, 61 Peck St., this city, has purchased a valuable piece of real estate at the corner of Chestnut and Pine Sts., on which it is planning to erect a modern fireproof building for use in connection with its business. The property has a frontage of 154½ feet on Chestnut St. and 80 feet on Pine, and contains about 17,000 square feet.

The building will be three stories in height, with stores on the first floor. There will be an entrance at the corner of Pine and Chestnut Sts., and another on Abbott Park Pl., toward which the building will face on one side. The sole purpose of the concern in making this purchase has been to obtain a suitable and commodious shop for a rapidly growing business.

Oregon Retail Jewelers' Association Completes Plans for Convention in May.

PORTLAND, Ore., April 14.—The executive committee of the Oregon Retail Jewelers' Association has completed plans for the annual meeting that is to be held here May 10 and 11, with headquarters at the Imperial Hotel. The Portland jewelers, wholesalers and retailers, are planning to entertain the visitors and a very successful convention is anticipated. One of the matters to be discussed will be the proposition of going after the national convention of the Retail Jewelers' Association of America with the idea of bringing it to Portland in 1911. A movement along this line has already been commenced. One of the important subjects to be discussed will be that of selling jewelry through misrepresentation.

A determined effort will be made to secure the passage of a law by the next State legislature making it a felony to make falsified sales of jewelry. The passage of such a law would be the first step, it is believed, toward getting a State stamping law similar to that in effect in many other States of the Union.

The wholesalers have promised the retailers their support if a bill along these lines is introduced in the legislature next session. More than 100 jewelers are expected to be present at the convention.

Attachment Filed Against Mendlow Bros., Lynn, Mass.

LYNN, Mass., April 14.—The assets of Mendlow Bros., of this place, have been attached by Boston creditors. No official statement of the inventory has been made, but a satisfactory offer of settlement is expected this week when the meeting of creditors will take place.

The concern started in business in 1899 and comprised Nathan and Julius Mendlow. The latter died four years ago and the business has since been continued by his brother under the old firm style. Besides a line of jewelry, the concern carried a stock of photographers' supplies, picture frames, etc. The owner of the business was considered energetic and industrious and a good business man.

Thief Gets Diamond Ring by Making a Substitution with a Copied Tag.

PHILADELPHIA, Pa., April 13.—Last Wednesday another of the operations which have been credited to the pennyweight thief was perpetrated on the firm of H. O. Hurlburt & Sons, wholesale jewelers at 114 S. 10th St., by a man who is described as rather stout, clean shaven, well dressed and apparently 30 years of age. The old system of copying the tag was used in this instance in order to get a ¾-karat diamond ring valued at $140. According to Mr. Gaylor, a representative of the firm, the man asked to be shown some diamond rings, at the same time mentioning that it was his sister who was interested in the purchase. After selecting a valuable specimen he held it in his hand and seemed to examine the tag more closely than the ring. Then he returned the ring to the tray, and after making inquiries as to Mr. Gaylor's lunch hour said he would come back the next day.

On the following day the man returned to the store during Mr. Gaylor's absence. He said that Mr. Gaylor had waited upon him the day before. The salesman, who happened to be Mr. Jump, tendered his services, at the same time drawing out the tray with the ring. After selecting the stone the man said he would return later in the day with his sister, at the same time, it is supposed, substituting the dummy ring.

Because of the similarity of the tag the change was not noticed. Upon taking stock later in the evening the loss was discovered and immediately reported to the Pinkerton headquarters.

Mr. Gaylor went to the Pinkerton headquarters to look over the pictures in the rogues' gallery, hoping to identify the thief. While not successful in this, he came upon the photograph of a colored man who had been in their store earlier in the week, which he at once recognized. The Pinkertons informed him that this colored man was wanted in Trenton, N. J., for a theft committed earlier in the week, and had up to this time evaded capture. The negro is described as of smiling face, clean shaven, rather heavy and about 40 years of age.

C. F. Moon, Cle Elum, Wash., Files a Voluntary Petition in Bankruptcy.

SEATTLE, Wash., April 13.—The trade here has been notified that C. F. Moon, of Cle Elum, has filed a petition in bankruptcy, with assets of $3,400 and liabilities amounting to $4,100. According to a dispatch from Cle Elum, Mr. Moon intends to move to this city as soon as the receivership details have been settled.

The business was begun in July, 1906, when Mr. Moon succeeded H. E. Whitman. Before going to Cle Elum the bankrupt was formerly employed in this city.

Death of J. M. Lewis.

PHILADELPHIA, Pa., April 18.—J. M. Lewis, a well-known jeweler, of Lambertville, N. J., dropped dead Sunday at his home. The deceased was 70 years of age and had been identified with the jewelry business in this locality for the past 40 years. Mr. Lewis was a member of the Elks and other promient fraternal organizations

Buffalo, N. Y.

S H. Brick has opened a store at 968 Broadway.

L. E. Powell, of S. O. Bigney & Co., Attleboro, Mass., was in Buffalo last week visiting the trade

C. J. Fisher's store was damaged by water and smoke as the result of a fire in the Glenny building last Saturday.

Louis Meyers is now located at 271 Main St. He has closed his jewelry store at 183 Main St., where he was located for 21 years.

Among the recent visitors in Buffalo were the following: G. R Kingan, Angolo; W. H. Fuller, Silver Creek; C. H. Betts, Tonawanda.

A party of bowlers known as Capt. Herman Finch's jeweler team, recently took the first prize in an important bowling event at local alleys.

Louis J. Heintz, of Heintz Bros., recently sent cards from Japan to relatives and friends in this city. Mr. and Mrs. Heintz are making a tour of the world.

John Stadlinger, jeweler, is a member of the jury in the case of a West Seneca, N. Y., official being tried for grafting. The trial has been conducted in this city.

George R. Fox, Buffalo optometrist, was the guest of honor at a recent dinner given by the Rochester Optometrical Society. Mr. Fox gave an address on the adjusting of glasses.

Lawrence Freedman, of Freedman Bros., recently announced his engagement to Miss Vivian Ely, of Grand Rapids, Mich. Joseph Freedman has just started on a trip to eastern Pennsylvania.

King & Eisele will be represented on the trade excursion to be conducted late this month under the auspices of the Buffalo Chamber of Commerce and Manufacturers' Club. Several cities and towns near Buffalo will be visited.

A. E. Sipe, diamond importer, who is a member of the Buffalo Automobile Club, is pleased with the announcement that that organization will erect a mammoth club house a few miles from the farm which Mr. Sipe recently bought in Erie County.

Reinsch & Kreinheder, diamond merchants in the Brisbane building, have dissolved partnership, and the business will be conducted at the same place by Louis E. Reinsch. Edwin J. Kreinheder has retired from the firm because his entire time is taken up as Deputy County Treasurer of Erie County, N. Y.

Among the traveling representatives who recently visited Buffalo were: Charles Miller, Ansonia Clock Co.; F. W. Juengling, Sessions Clock Co.; Mr. Kneeland, G. T. Sutterly Co; P. W. Hine, Luthy & Hine; C. E. Bride, Bride & Tinckler; A. E. Lavigne, Mathey Bros., Mathez & Co.; A. D. Manning, D. Wilcox & Co.; T. E. Bowne, E. Ira Richards & Co.; Wallace E. Welch, Hoyt, Obrig & Geiger Co.; H. C. Barnum, Shafer & Douglas; L. E. Smith, M. B. Bryant & Co.; Mr. Buck, Rogers & Hamilton Co.; J. W. McClannin, Wilcox Silver Plate Co.

The bill of Senator Davis of Buffalo providing that pawnbrokers shall keep certain books and permit their inspection by sheriffs and officers of police departments recently passed the State Senate at Albany. At a hearing on the measure Senator Hinman became humorous at the expense of Senator Davis. "What puzles me is," said Senator Hinman, "won't the pawnbrokers be too busy under the bill keeping books to permit them to do business?" Senator Davis made an explanation which could not be heard, but which apparently was satisfactory.

New Orleans, La.

The travelers of Leonard Krower were all in town for the Shriners' convention to entertain friends and customers, last week.

The Shriners' convention brought a number of jewelers to the city. Not only have the wholesalers been benefited, but the retailers have done exceedingly well.

Alfred T. Krower, of the firm of Leonard Krower, has returned from a Mexican trip after an absence of several weeks. He reports very favorable business conditions.

T. Hausmann & Sons had a fine display in their window last week. It depicted an Arabian scene and was very well executed. They also had a beautiful Shriner emblem in front of their establishment, which was illuminated at night.

Cleveland.

H. W. Burdick, senior member of the Bowler & Burdick Co., has been confined to his house by illness.

Buyers who purchased largely in this city the past week included W. H. Deuble, Canton; E. D. Davis, Kent; Wm. Kutz, Bellevue; E. E. Critz, Elyria; Geo. F. High, Medina; F. R. Montgomery, Sandusky; C. E. Whittaker, Clyde.

Among the traveling men here recently were: J. N. Stanley, Landers, Frary & Clark; George W. Whittmore, Sessions Clock Co.; Arthur Bradshaw, Meriden Britannia Co.; Edgar Huhn, Scofield, Melcher & Scofield; L. H. Powell, American Cutlery Co.; G. S. Fisher, Furbish, Swift & Fisher; W. J. Gow, George N. Steere & Co.; Max Jacobi, Manchester Mfg. Co.; John Marsh, C. A. Marsh & Co.; George Kettelty, A. H. Bliss & Co.; Geo. Richter, N. Barstow & Co.; R. W. Nussbaum, Nussbaum & Hunold.

The Hodnett & Speer Co., Danville, Va., have moved to a large corner store in the Masonic Temple building, which they have leased for a number of years. They have had the store refitted and have added new fixtures. The firm now has one of the finest stores in the State of Virginia.

The formal Spring opening of the store of George T. Brodnax, Inc., Memphis, Tenn., was held during the early part of this month. The store was attractively decorated with the choicest flowers, including Easter lilies, pink and white carnations, roses, stately palms and other plants. During certain intervals an orchestra seated in a floral bower, dispensed music and each visiting guest was given souvenirs, consisting of jonquils and carnations.

Louis Sandoz has opened a store in McIntire, Ia.

A. Davisson recently began business at Hymar, Ind.

J. B. Paxton will soon open a store at Storm Lake, Ia.

Carl Bachman has started in business at Fitchburg, Mass.

A new store has been opened at Dana, Ind., by R. H. Manzey.

Frank G. Schuler has began business at 4536 Frankford Ave., Philadelphia, Pa.

Charles Smith has opened offices at 715 Sansom St., Philadelphia, Pa., as a lapidist.

V. L. Sear, Amarillo, Tex., has commenced business on his own account at that place.

R. F. Parks has gone to Tucumari, N. Mex., where he will engage in business for himself.

H. D. Parks has engaged in the retail jewelry business in the Columbus Memorial building, Chicago, Ill.

Eugene Schrader has opened a new jewelry engraving establishment at 1104 Heyworth building, Chicago, Ill.

The National Loan Co. is opening a pawnshop and jewelry store in the Park Theater building, Indianapolis, Ind.

N. L. Seif, April 15, opened an office in the Mead building, New Canaan, Conn. Mr. Seif was formerly located in New York.

A line of novelties and standard articles will be carried by "Harman" in the Shapiro Music Store, 434 7th St., N. W., Washington, D. C.

H. D. Parks, formerly jewelry and diamond buyer for Lapp & Flershem, who was with that concern for 29 years, has engaged in the retail jewelry business in room 603 in the Columbus Memorial building, Chicago.

The Clinton Mfg. Co. has been incorporated in Pittsfield, Mass., with a capital of $10,000, to manufacture combs and jewelry. The officers are: President and treasurer, Ellis Hey, Boston; clerk, J. W. Manon, Pittsfield.

The Slade Mfg. Co. has been incorporated with a capital of $100,000 at Providence, R. I., to manufacture, buy, sell and exchange metal goods. The incorporators are: Frank Slade, Eugene A. Eddy, of Greenwich, and James H. Higgins, Pawtucket, R. I.

Frank A. Fleisher, Marysville, Pa., is about to discontinue business at that place to accept a position as a traveling representative.

A novel method of smuggling jewelry was recently discovered. It consists of concealing the articles in magazines and obtaining second class mail rates on the package. A broad investigation of mail matter has been inaugurated. The discovery was made a short time ago by Surveyor of Customs, Charles W. Clark, of Kansas City, Mo.

Your Best Customers Will Buy This Pin

You will make no mistake in placing a trial order for this latest and exclusive novelty in feminine jewelry.

THE PSYCHE BOW

is artistically designed by our own artists and exquisitely made by expert workmen. It fills the requirements of this season's fashionable mode.

ONE OF OUR MANY DESIGNS

The bow here illustrated is one pattern from our extensive line. Every Psyche Bow is 14-K. Gold mounted in genuine stones. They come in pearls, diamonds, sapphires, topaz and other attractive combinations.

An Exceptionally Good Feature is our Patent Clasp

It enables the wearer to use the pin for any jabot, or as a beautiful hair ornament. A simple turn of a button at the back unclasps it.

Considering the excellence of quality the prices are remarkably low—ranging from $18.00 upward, according to mountings.

Place a trial order to-day or write for full particulars.

HOWARD & COCKSHAW

218-220 FOURTH AVENUE NEW YORK

Proposed Amendment to the Bankruptcy Laws.

WASHINGTON, D. C., April 13.—There have been several hearings by the Senate Committee on the Judiciary on the Swager-Shirley bill for the amendment of the bankruptcy laws—a movement which is being watched with considerable interest and which has resulted in the appearance of many widely-known men, representing widely diversified industries and fields of business activity. Hon. James M. Olmstead, a referee in bankruptcy, Boston, Mass., was the first speaker in favor of the pending bill which, he thinks, will dovetail into the present act, making it more symmetrically perfect. And this, as a matter of fact, is Representative Shirley's own view of the matter.

It is proposed to correct the abuse of receivership proceedings as they have existed in some parts of the country, to make a distinction between a custodian receiver and an operating receiver. The method pursued under the amendment of 1903 did not tend to clear up this difficulty, especially under the construction placed upon it by the courts, placing no limit upon the account allowable. Hence the following proposed amendment:

"Where business is conducted by trustees, marshals or receivers, as provided in clause 5, section 2, of this Act, the court may allow such officers such additional compensation for such services by way of commissions upon the moneys disbursed by them; and in cases of receivers or marshals, also upon the moneys turned over by them or afterwards realized from property turned over in specie by them to the trustees or upon money or property turned over to creditors, or to the bankrupt or alleged bankrupt, or other person under order of the court, such commissions not to exceed 6 per cent. on the first $500 or less, 4 per cent. on moneys in excess of $500 and less than $1,500, 2 per cent. on moneys in excess of $1,500 and less than $10,000, and 1 per cent. on moneys in excess of $10,000; provided, that in case of the confirmation of a composition such commission shall not exceed one-half of one per cent. of the amount to be paid creditors of such composition; provided, further, that before the allowance of compensation notice of application therefor, specifying the amount asked, shall be given to creditors in the manner indicated in section 58 of this Act."

It is thought this will provide a practicable, just, workable and eminently satisfactory solution of the vexed question of additional compensation for the conducting of business in bankruptcy. It is considered as of quite as vital importance that the additional compensation of receivers, etc., for conducting the business shall be placed upon a percentage basis as that the compensation of trustees for the performance of their ordinary duties shall be so placed. The evils of leaving such additional compensation to the discretion of the courts are too obvious and well known to require explanation. This amendment will also tend to prevent long-drawn-out receiverships, it is claimed.

It is proposed to allow corporations, except municipal, railroad, insurance, trust and banking corporations, to become voluntary bankrupts; this has been the case under all our bankruptcy acts previous to the present one, and this prohibition has resulted in expensive receiverships and additional burdens of delay and expense upon bankrupt corporation estates.

It is further proposed to change the rather peculiar classification of those who may become bankrupts to prevent the present confusion and litigation as to what corporations are included. It is also proposed to reduce the amount of indebtedness to $500 or possibly $300, for which one may be adjudged an involuntary bankrupt.

It is also proposed to introduce a new scheme of arrangement for settlement so as to permit official settlements between creditors and debtor, immediately after the filing of even an involuntary petition, on notice and a proper investigation by the court. This would send the debtor out into the business world again free from the stigma of bankruptcy and would isure a more speedy settlement than is possible under the present law.

While the laws as to the discharge of dishonest debtors was strengthened by the amendment of 1903, it is felt that it should be still more strengthened; first, by settling beyond doubt that the trustee is sufficiently a party in interest to object to a discharge; as the matter stands at present objections have to be filed by individual creditors, if at all. It is claimed that if the trustee, as representative of all of the creditors, can assert the objections the expense can be spread over all, and thus many fraudulent bankrupts would be refused discharges who would otherwise escape.

Further, creditors are protected against an improper use of their funds by the following proviso to the effect that a "trustee shall not interpose objections to a bankrupt's discharge until he shall be authorized so to do at a meeting of creditors called for that purpose."

A further strengthening of this part of the act would be to make the giving of a false mercantile statement in writing as a basis of credit an objection to discharge. As the law now stands it is an open question whether a false credit statement, to be available as an objection to a discharge, must not have been made to the creditor who extended the credit and at the time of the extension of such credit.

It is still further proposed to strengthen the law by providing that a petition in bankruptcy shall not be dismissed until after notice has been given to the creditors, "and to that end the court shall, before entertaining an application for dismissal, require the bankrupt to file a list, under oath, of all his creditors, with their addresses, and shall cause notice to be sent to all such creditors of the pendency of such application, and shall delay the hearing thereon for a reasonable time to allow all creditors and parties in interest an opportunity to be heard."

Despite the amendment of 1903, with respect to private liens, the supreme courts of some of the States are still holding, in effect, that liens withheld from record, possibly for years, may not be preferences in bankruptcy, even if they are not recorded until within a few days before bankruptcy; so that all that a careful creditor need do is to take a chattel mortgage at the time he begins business with the debtor, keep it off the records as long as he wants to, provided he does not do so by agreement with the debtor, and then record it years afterwards and just on the eve of bankruptcy. Under those decisions the creditor must be able to prove that at the time of the transfer the debtor was insolvent, etc., all of which is practically impossible. This it is proposed to obviate by inserting the following definite provisions:

If a bankrupt shall have "procured or suffered a judgment to be entered against him in favor of any person or have made a transfer of any of his property, and if, at the time of the transfer or of the entry of the judgment or the recording or registering of the transfer, by law recording or registering thereof is required, and being within four months before the filing of the petition in bankruptcy or after the filing thereof and before the adjudication the bankrupt be insolvent and the judgment or transfer then operate as a preference, and the person receiving it or to be benefited thereby, or his agent acting therein, shall then have reasonable cause to believe that the enforcement of such judgment or transfer would effect a preference," it shall be voidable by the trustee and he may recover the property or its value from such person, etc.

Oliver G. Fessenden, chairman of the Committee on Bankruptcy of the National Association of Credit Men of New York, who also represents the diamond and watch interests, in both of which he is a large wholesale dealer, was an interested attendant at the hearings. He stated that this association represents a membership of 14,000 and an investment in legitimate business interests of more than $500,000,000. All of the members are in favor of the bankruptcy law and the amendments as proposed by the Shirley bill. He favored the proposition to allow a man to compromise with his creditors before going into court. He stated that, under the present administration of the law, practically all of many estates goes to the attorneys and the receivers, and in almost 99 out of 100 cases an attorney is appointed a receiver in preference to a business man, which is often a serious mistake.

For instance, if it were in the case of a bankrupt diamond merchant, the attorney can know little, if anything, about the business interests involved. The usual method is to appoint an attorney as receiver, and he, in turn, appoints his attorney, and neither will know anything about the business.

It would be far better if the judges of the courts would appoint as receivers business men familiar with the line of business in which the bankrupt was engaged, and in this way much more would be realized for the creditors than is the case under present methods. Men now appointed are regarded almost in the light of "professional receivers," who get as many claims as they can, hold out as long as they can and stave off the creditors.

If the bankruptcy law is really intended to be for the benefit of the creditors, and is rightfully enforced, it is the best law in the world.

This view of the matter, the more frequent appointment of business men as receivers, is accepted not only by Representative Shirley, but by F. W. Hinrichs, chairman of the Committee on Bankruptcy of the State Bar Association of New York, although it was opposed by Judge Hand. Judge Hough is also in favor of business men being appointed who are well and honorably known in their respective professions. Howard Marshall, president of the New York Credit Men's Association, is also in favor of this suggestion and of limiting of fees. The Commercial Law League of Minneapolis opposes the latter proposition.

Receivers Appointed for Oppenheimer & Stern, New York.

Oppenheimer & Stern, manufacturing jewelers, 41 Maiden Lane, New York, have had a disagreement which resulted, last Thursday, in the appointment of Bernard Strauss and Milton B. Rosenbaek as receivers for the firm by Judge Greenbaum, of the Supreme Court.

A suit was brought by Julius Oppenheimer against Marcus Stern for a dissolution of the partnership, which was formed Jan. 1, 1906. The receiver's bond was fixed at $25,000.

The liabilities were stated to be $27,000 and the assets from $30,000 to $35,000.

A meeting of the creditors was held at 87 Nassau St., Friday. A committee of three, composed of David Mayer, Samuel Hess and Max Kassler, was appointed to investigate the matter further and to confer with the partners.

A second meeting was held Monday afternoon, at which time the committee reported that there were assets of merchandise, $13,000; equity in notes, $1,000; accounts, $8,000; fixtures, $2,750, and other firm assets of $3,900, making a total of $28,650, at cost price. The liabilities are now said to be $29,000.

Mr. Stern made an offer of settlement with creditors based upon a general release on a basis of 70 per cent. in full payment, payable 10 per cent. in cash and the balance in 24 equal monthly installments, two-thirds of which is to be satisfactorily indorsed. This offer was subsequently increased to 75 per cent., payable 10 per cent. cash and the balance in 24 monthly payments, the last two-thirds of which should be satisfactorily indorsed, in which case the assets would remain in the joint possession of Mr. Stern and trustees to be appointed.

An alternate proposition was to the effect that if Stern could secure indorsement for the entire 75 per cent. the business would be turned back to him.

Another meeting is being held as THE JEWELERS' CIRCULAR-WEEKLY goes to press.

When the business was started, in January, 1906, a capital of $4,800 was claimed. Mr. Oppenheimer had previously been employed as a salesman by J. Wodiska for nine years and Mr. Stern had been in business for 22 years before. At one time he was a member of the firm of Stern & Brandt, which met with financial difficulties in 1893. Stern afterward paid up the old debts and continued alone.

Death of Charles A. Turpisch.

Charles A. Turpisch, a well-known and highly respected retail jeweler, died at his residence in Stapleton, S. I., on Thursday morning, aged 58 years. Funeral services were held at his late residence Sunday and the interment was in the Lutheran Cemetery.

Mr. Turpisch was born in Germany, where he learned the jewelers' trade, and upon coming to this country when a young man engaged in the business in New York. About 15 years ago he moved to Staten Island and opened a small store on Bay St., between Canal and Water Sts. As the business increased he found it necessary to secure more room, and at the time of his death he owned a large and handsome store. About two years ago he was taken ill, and went to Europe in the hope of regaining his health, but his trouble baffled the best medical skill.

He was a member of Staten Island Lodge, B. P. O. Elks; Excelsior Lodge No. 1133, Knights and Ladies of Honor; the Assurance League of America, the Einigkeit, and the Staten Island Quartette Club. He is survived by a widow, two sons and a daughter, who have the sympathy of many friends in their bereavement.

Death of James M. Hopper.

LONG BRANCH, N. J., April 15.—James M. Hopper, a veteran retail jeweler who had been in the business in this city, Freehold and Philadelphia, Pa., died Wednesday of last week at the home of his daughter, Mrs. Chas. H. C. Clark on Liberty St., in this city. He passed his 81st birthday April 2.

Mr. Hopper was a son of James M. and Ann C. Hopper, and was born in Philadelphia, April 2, 1829. In 1838 his father went to Freehold, this county, where he opened a jewelry store, the remainder of the family remaining in Philadelphia. In 1846 the other members of the family also went to Freehold, and young Hopper at once began learning the jeweler's trade with his father.

Mr. Hopper was one of the founders and a member of Simpson M. E. Church. He had served as a justice of the peace, was elected a commissioner from the First Ward in 1882, and served as a member of the Long Branch Board of Health for three years, succeeding the late James P. Connolly.

Death of Marcus Singer.

Marcus Singer, a retail jeweler at 652 Third Ave., New York, who had been in business in New York for some years, died last Wednesday at his home, 591 Lexington Ave., of pneumonia after an illness of only six days.

Mr. Singer was born in Ungarn, Hungary, Aug. 1, 1861, and came to this country when a young man. He commenced business for himself about 1887 on the East Side in New York, and later opened a place of business at 652 Third Ave. He had a branch store at 144 E. 42d St., for a time, which was discontinued.

The funeral was held from his late home Thursday, and interment was in Washington Cemetery.

Deceased is survived by a widow, two sons and a daughter.

The deceased is survived by eight children.

The Iowa Retail Jewelers' State convention will be held June 28, 29, 30, and July 1, at Des Moines. This will be a joint convention of the jewelers and the optometrists of the State. This combination will enable every jeweler and optometrist to attend both conventions by making the one trip. The executive committees of both associations are now busy getting up the programme, which will be one of the strongest and most attractive ever prepared. The Iowa Retail Jewelers' Association has made a good gain in membership since the last annual convention. New members are joining constantly.

Death of William F. Smith.

DES MOINES, Ia., April 13.—The funeral of William Frederick Smith, a wholesale jeweler in the Des Moines Life building, who died Monday from typhoid fever, will be held this afternoon at 2.30 from the residence, 1021 8th St.

Mr. Smith was a resident of Des Moines for the past 17 years, coming here from Chillicothe, O. He was taken sick three weeks ago. Deceased was a member of the Woodmen Lodge and also of the Iowa State Traveling Men's Association. Rev. Leamer, of St. John's Lutheran Church, will have charge of the funeral services, and interment will be made at Woodland Cemetery.

Mr. Smith was one of the best known wholesale jewelers in Iowa. For many years he traveled as a jewelry salesman for W. A. Lumbard, and started in business for himself as a jobber in August, 1898. In the 12 years he was engaged here he built up a good business and stood high in his trade and in the business community.

Games Rolled by the Jewelers' Bowling League of New York.

The following were the scores of the teams of the Jewelers' Bowling League of New York in the games rolled last week at the Universal alleys, Brooklyn:

W. E. Wallace, Moscow, Idaho, has admitted a partner into his business, the firm style becoming Wallace & Griffin.

Philadelphia.

John Battin, of Battin & Co., visited the trade last week.

J. D. Sallade, Norristown, Pa., has recovered from his recent illness.

E. C. Jump, with H. O. Hurlburt & Sons, is seriously ill at his home.

George Baily, Uniontown, Pa., is now located in his attractive new store.

R. C. Wilde returned last Wednesday from a successful trip through the State.

R. F. Chapman, Atlantic City, N. J., is planning a pleasure trip to the Adirondacks.

Frank G. Schuler has opened a new retail jewelry store at 4536 Frankford Ave.

Furtwangler & Rhea, Greensburg, Pa., have remodeled and enlarged their store.

Sargent Engle has accepted a position as engraver with C. Brown, 727 Sansom St.

C. S. Kepner, Chester, Pa., is making arrangements to occupy his new home at Chester.

Aisenstein & Gordon, retail jewelers, have removed from 4th and Lombard Sts., to 331 South St.

The Ideal Plating Co. has removed from 722 Sansom St. to larger quarters at 121 N. 9th St.

T. S. Mitchell, 56 N. 8th St. and 37 S. 8th St., is home again after a trip through California.

M. C. Williams, Trenton, N. J., is confined to his home with inflammatory rheumatism.

Suit has been instituted in the local courts by Jacob Espen and others against Ferdinand Keller.

Harry Smith and William C. Robertson will return from Europe in the latter part of this month.

James Righter has resigned his position as watchmaker with Henry Bolte, Jr., Atlantic City, N. J.

J. Miller has sold out his place in Lansford, Pa., and has started in the same line at 2542 Eighth Ave., New York.

H. A. Henze, formerly with Richard M. Cooper & Sons, has accepted a position as watchmaker for Strawbridge & Clothier.

Louis Solfinger, with C. R. Smith & Son, is recovering from his recent attack of the grippe, and expects to report for business soon.

Harry Bedichimer, of I. Bedichimer & Co., manufacturers of emblem goods, has returned from a six weeks' western business trip.

A meeting of the Pennsylvania Retail Jewelers' Association was held Monday evening, April 18, at the Philadelphia Jewelers' Club.

J. E. Caldwell & Co. have this week an attractive window display of loving cups and other trophies, suggestive for the coming athletic events.

Charles Smith, lapidist, until recently associated with his brother at 715 Sansom St., has opened an office of his own at 713 Sansom St.

Daniel Barbour, with Charles Muth, 1632 Columbia Ave., is recovering from an operation recently performed for appendicitis at St. Agnes' Hospital.

Owing to the unsettled condition of the car strike the meetings of the Horological Club have been postponed until conditions become more peaceful.

E. J. Berlet, of Maxwell & Berlet, has again been elected to serve as president of the Walnut St. Business Association. This is Mr. Berlet's third term.

Louis Gibbons, of W. W. Fulmer & Co., 8th and Sansom Sts., who has been covering the western territory, returned last week and reports excellent business.

R. W. Broadbent, Wilmington, Del., has been unable to attend to business for the past month on account of an acute and painful attack of sciatic rheumatism.

H. E. Ogden, with R. L. Saunders, will soon assume charge of the 8th St. store. Mr. Saunders in the meantime will devote himself exclusively to the new branch store on 13th St.

J. G. Buseman, 2828 Germantown Ave., has been appointed a member of the banquet committee of the United Business Men's Association. The banquet is to take place April 27.

Blair & Crawford, 12th and Chestnut Sts., have taken a 10 years' lease of the store property at the southwest corner of Walnut and 13th St., and will occupy the premises about July 1.

The Board of Governors of the Philadelphia Jewelers' Club have sent out announcement cards for the annual shad dinner, which will be given Tuesday evening, May 17, at 6.30 o'clock on the roof garden of the new Hotel Bingham.

The important art collection of the M. Johnson-Brown Co., New York, will be placed on sale, next Wednesday, Thursday, Friday and Saturday afternoons in the Philadelphia Art Galleries of M. Thomas & Sons, 15th and Chestnut Sts.

S. P. Dayton, 2026 E. Tioga St., has disposed of his business to D. M. Raiser, formerly connected with Wm. G. Earle & Co. Mr. Dayton has been compelled to retire because of ill health, and will leave shortly for Los Angeles, Cal., where he will remain definitely.

In the fire which burned out more than 100 merchants at Middletown, last week, several jewelers suffered losses. The jewelers were M. Ferneiser, the Klahr jewelry store and M. Fair. The fire destroyed five buildings belonging to Mr. Ferneiser.

The bill incorporating Riverside as a city has been signed by Governor Fort, of New Jersey. The Philadelphia Watch Case Co. and the Riverside Metal Co., the largest companies here, will be benefited by this change, and it is expected that T. Zurbrugg, president of the watch case company, will be a popular candidate for mayor.

Maxwell & Berlet have made and designed for the Haddonfield Chapter, Daughters of the American Revolution, a unique silver tablet, which is to be applied to a mantle. The tablet is mounted on wood which had been submerged in the waters of the Delaware River for 138 years and was part of the British Frigate, *Augusta,* sunk by the Americans off Red Bank, N. J., Oct. 22, 1777.

J. E. Caldwell & Co. have been awarded the contract for the cup, known as the Saboroso Cup, which is to be presented by Vetterlein Bros., cigar manufacturers, to the member of the Philadelphia or Athletic Club player who averages the highest batting record on the termination of the season's games. The cup is built of solid silver and stands 24 inches high. The trademark of Vetterlein Bros. is beautifully enameled in colors.

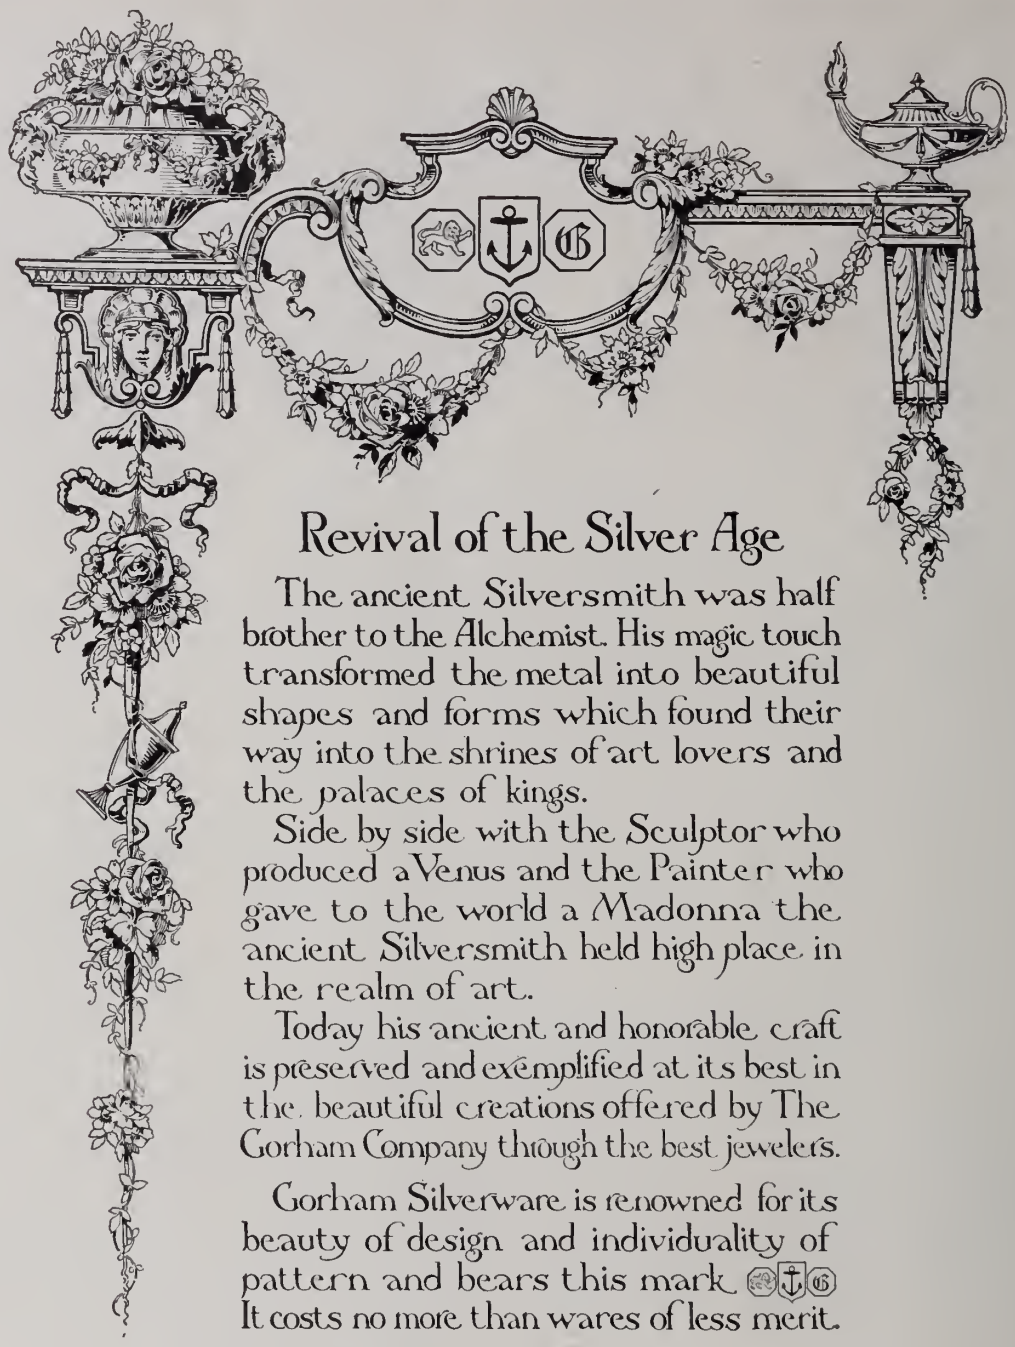
Frank Schenuit, 2631 Germantown Ave., sailed April 19 on the *Kaiser Wilhelm der Grosse,* for Germany where he will visit his family, and later tour through France, Italy, Switzerland and England, returning about the middle of July.

Through brave efforts and hard work on the part of employes of W. H. Hoskins & Co., stationers at 904 Chestnut St., a fire that threatened to sweep the entire block was promptly extinguished. The fire, which started in the cellar of the building shortly after 9 o'clock Saturday morning, was discovered by the watchman, Alexander Ford, who traced the smoke to a pile of rubbish which was blazing in the basement. The emergency brigade soon had the fire under control, and by the time the firemen arrived the fire was out.

The following jewelers were visitors to this city during the week: M. Landes, of Fahler & Landes, Allentown, Pa.; G. A. Bowen, of T. H. Bowen & Co., Bridgeton, N. J.; A. Liachovitz, Shamokin, Pa.; C. Custer, of Kerper & Custer, Pottstown, Pa.; A. Gutowitz, Lewis, Del.; Max Freemin, Steelton, Pa.; C. C. Vogt, Allentown, Pa.; H. S. Kratz, Souderton, Pa.; R. W. Quicksall, Mt. Holly; A. Smyth, representing K. Bracher, Newark, N. J.; D. H. Krause, North Wales, and W. K. Schlotterer, Schwenksville, Pa.

Harrisburg, Pa.

Appraisers of the stock of Frank B. Mace, who recently purchased the store of S. C. Doudore, New Berlin, have been appointed by the court.



A special meeting of the local Business Men's Association was held, last week, for the purpose of considering matters pertaining to the credit rating system recently adopted.

H. S Eyler, Waynesboro, is exhibiting in his jewelry store a portion of a broken shell and some minie-balls found imbedded in the walls of an old house, recently razed, in that town. It is thought that these are relics of the Battles of Antietam or Gettysburg.

Daniel A. Donovan, an optician at 211 N. 3d St., was arrested, last week, charged with administering "knock-out drops" to a young girl, whose identity has not been revealed. He was committed to jail by Alderman Hoveiter in default of $3,000 bail for a hearing.

Harrisburg jewelers are anticipating a better Spring and Summer trade than during the corresponding period in 1909, basing their expectations on the improved condition of business, as reflected in the recent announcements of 6 per cent. increases in wages made by the Pennsylvania and Philadelphia & Reading Railway Cos. and the Pennsylvania Steel Car Co., which employ thousands of wage earners of Harrisburg and vicinity.

L. A. Waller, Waynesboro, Miss., has completed plans to move to a new territory at Belzoni, Miss.

Revival of the Silver Age

The ancient Silversmith was half brother to the Alchemist. His magic touch transformed the metal into beautiful shapes and forms which found their way into the shrines of art lovers and the palaces of kings.

Side by side with the Sculptor who produced a Venus and the Painter who gave to the world a Madonna the ancient Silversmith held high place in the realm of art.

Today his ancient and honorable craft is preserved and exemplified at its best in the beautiful creations offered by The Gorham Company through the best jewelers.

Gorham Silverware is renowned for its beauty of design and individuality of pattern and bears this mark It costs no more than wares of less merit.

The Gorham Co.

Jewelry Failures During March.

THE failures in the jewelry trade during the month of March were nearly all for small amounts and, according to the figures compiled by R. G. Dun & Co., the number was less than in the corresponding months of the two previous years, while the total amount of liabilities was less than in any March during the past five years. According to the table of failures by branches of business compiled for a recent issue of *Dun's Review*, there were during March 24 insolvencies in the jewelry and clock trades with liabilities of $118,263, showing an average of but $4,929. How this compares with the previous years is shown in the same table, which gives for March, 1909, 31 failures with liabilities of $198,673; March, 1908, 32 failures with liabilities amounting to $653,035; March, 1907, 19 failures with liabilities of $148,651, and in March, 1906, 15 failures with liabilities of $262,522.

That the first quarter of this year does not compare so favorably as the month of March with past years, as far as the jewelry trade is concerned, is due to the fact that two recent failures—one in New York and one in Chicago—added $1,000,000 to liabilities. According to the same authority, the insolvencies in this trade during the first three months of the year were 99, with liabilities of $1,794,024, as compared with 122 in 1909, when the liabilities were $982,591; 125 failures in 1908, with liabilities of $2,474,735; 70 failures in 1907, with liabilities of $650,734, and 64 failures in 1906, with liabilities of $652,631.

Important Suit Involving "Memorandum."

AGAIN a jewelry firm has been successful in the courts of New York in litigation against pawnbrokers to recover jewelry obtained on memorandum from the complainants in the action and later pledged with the defendants. This suit, which is reported in detail in another column of this issue, was tried in the New York Supreme Court practically on the question of the law involved, the verdict for the jewelers, though rendered by a jury, being directed by the judge.

The jewelry over which the controversy arose was obtained by a man, now serving a term in prison, on the ordinary memorandum agreement, which provided that the goods remained the property of the jewelry house, that they were entrusted for inspection only and were to be returned to the owners on demand. The same man obtained a quantity of jewelry from other merchants, and practically all of the jewelry he so obtained he pledged and disposed of in other ways. For this he was arrested and sent to prison, but the criminal court refused to order this particular jewelry restored to the owners, and an action in replevin was commenced.

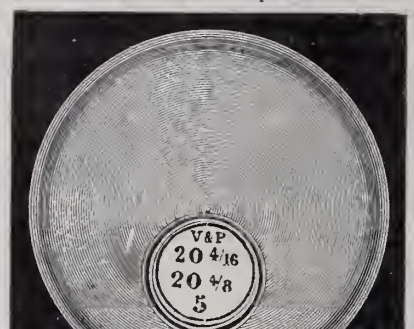
The pawnbrokers did not deny having the jewelry or receiving it from the convicted man, but set up the contention that the thief had practically acted in the capacity of agent for the jewelers, and under the memorandum agreement had discretionary power to sell or dispose of the articles; therefore (under the Factors Act) the pawnbrokers claimed they were protected, as the power to sell implied the power to pledge, and they at least had a lien for the amount of their loan.

On behalf of the jewelers it was claimed that the memorandum transaction was pure bailment, and under the agreement title never left the jewelry house; that both in its theory and practice the memorandum transaction remained a bailment and that had the man returned the purchase price instead of the jewelry they could have refused to accept it and still demand the articles; therefore the sale did not begin or title pass until after a sale had been ratified by the owners of the jewelry and the money accepted or the terms of credit arranged. This was the theory accepted by the judge, who directed a verdict for the jewelers.

System is as essential in advertising as it is in any department of one's business.

An Article on Heraldic Terms.

TO conduct a successful jewelry business calls for a general and special knowledge of many branches of trade and art, and in addition at least a superficial knowledge of many subjects which directly or collaterally relate to the products which the jeweler may handle. Among these subjects heraldry is not the least important, though it is one of those about which very little is known, at least by the smaller dealers. The lack of knowledge of heraldry is in great part due to the fact that the information needed is not easily obtained, and when it is obtainable, can only be gleaned from works which cover many points the jeweler does not care about, and he must read and study much to get little of value to him.



Owing to the number of inquiries that have been received from time to time as to the meaning of simple heraldic terms, we have had prepared a short article upon the heraldic animals with whose forms and names the jeweler may come in contact, treating the same in a simple manner. The article is prepared in such a way that from the cuts alone the jeweler or his employe can quickly get the meaning of certain terms, such as *rampant, statant, passant, sejant,* etc., while a glance at the text will give him some fundamental facts that will help him in understanding their origin and meaning. The article, which will run over three issues of this journal, treats the subject in a popular and even jocular vein, taking up the animals used in heraldry and describing them as one would describe an ordinary menagerie. However, this sugar-coating of the pill of dry fact should not make the article any less instructive.

The animal most frequently met with by jewelers in heraldic devices as well as the mark on silver—the lion—is taken up in the first instalment, which appears in this issue on pages 61 and 63.

23 MAIDEN LANE
NEW YORK

Lancaster, Pa.

George E. Fahys, New York, was in Lancaster last week.

Richard Bronslow, Scranton, was in Lancaster last week making purchases.

Oliver P. Dolby has gone to Columbus, O., with a view of opening a shop there.

John J. Bowman, of Ezra F. Bowman's Sons, paid a visit last week to Philadelphia.

Abram Edelstein, a jeweler of Paterson, N. J., last week visited his brother, Marcus Edelstein.

James E. Greene, Emigsville, Pa., has opened a store on E. Philadelphia St., York, and will operate it and his Emigsville store.

Franklin Moore, who has been visiting his old Canadian home, near Ottawa, for the past three weeks, has returned to Lancaster.

Edward Lutz, who went south several months ago for his health, spending most of his time near Asheville, N. C., has returned home much benefited by the trip.

Benjamin C. Channel, a watchmaker in Lancaster nearly 25 years ago, now a resident of Boston, paid a visit, his second in all these years, to Lancaster relatives last week.

At a sale held near Columbia last week was a pair of silver candlesticks of the colonial period that brought $25. The purchaser was a Philadelphia collector of bric-a-brac.

Michael B. Formley, of Richmond, who was taken ill on a railroad train en route to Elmira, and had to get off at Lancaster and go to a hospital, was able to leave for home last Friday.

G. F. Peusch, a traveling representative of the Vallorbes Jewel Co., left last week for a trip to the Pacific Coast, and while going overland will visit the trade in the larger cities. He will be gone about three months.

Among the jewelers who were recently in Lancaster were A. T. Heberling, of Parksbury; Noel P. Duff, Pittsburg; Oscar Loebling, Chicago; Dennis Smiley, Baltimore; John O. Parkway, near Wilmington; George L. Hepp, Lititz.

Charles A. Wyant, of Bethlehem, Pa., has entered the local technical school as a student. F. R. Keener, of Sunbury, Pa., who was on the sick list, has returned to the school, and H. B. Roll, Pittsburg, and Harrison Hackenberger are now on the sick list.

Four boys who were arrested last week at Columbia as suspicious characters, confessed to having robbed a show case of a jewelry store at 5132 Lancaster Ave., Philadelphia. Their story was investigated, but the owner of the store refusing to prosecute, the boys were released.

Lancaster, Pa., was visited recently by the following traveling representatives: Mr. Singer, Diamond & Singer; J. G Stiles, Ilgen & Wakefield Co.; H. L. Weeks, J. Russel & Co.; Emil Lennis, Moser & Whyte; A. Holzinger, Fred. Kaufman & Co.; Walter J. Mays, McIntyre, Magee & Brown; Charles Platt, Theodore W. Foster & Bro. Co.; S. A. Lynch, William B. Kerr Co.; Mr. Jacobsson, Jacobsson Bros.; C. S. Fake, Whiting Mfg. Co.; Henry G. Young, Gibson-Krugler Co.; Mr. Bassinus, Forquignon Sales Co.; Willis B. Ehlers, Ehlers & Co.

New York Notes.

David Mayer, 14 Maiden Lane, returned Friday from the European diamond markets on the *Lusitania*.

S. K. Jonas, 37 Maiden Lane, sails for Europe and the Antwerp diamond markets Saturday on the *Vaterland*.

W. S. Pitcairn, 44 Murray St., is a member of a party which will sail early in May for Europe on the *Caledonia*.

Marcel M. Mirabeau, of Lissauer & Co., accompanied by his wife, sailed yesterday for Amsterdam, Paris and London.

John Davison, 11 Barclay St., is preparing for his annual visit to the English china factories. He will leave May 4.

F. S. Gilbert, of North Attleboro, Mass., was among the eastern manufacturers seen in the Maiden Lane district during the past week.

H. H. McBride, of the New York office of the United States Glass Co., has been at the headquarters of the concern in Pittsburg for several days.

Herbert Steiner, of the Steiner Mfg. Co., Providence, R. I., spent a few days in town last week, making his headquarters at the New York office, 530 Broadway.

H. F. Wichman, of H. F. Wichman & Co., jewelers of Hawaii, who has been spending some time in this city, sailed Saturday for Europe on the North German Lloyd line.

Louis Strasburger, founder of Louis Strasburger, Son & Co., who died Aug. 21, 1909, left an estate valued at $714,505, according to an appraisal filed in the transfer tax office last week. With the exception of a piece of real estate valued at $75,000, the property was all personal.

The assets of Anton S. Borg, a jeweler who was recently declared a bankrupt, were offered for sale last week by Charles Cohn, receiver in bankruptcy. The assets consisted of watches, clocks, jewelry, fixtures and a safe. The goods were on exhibition Friday and Saturday at 119 West St. The receiver reserved the right to reject any and all bids.

Walter D. Ballou, of B. A. Ballou & Co., was in town last week at the local headquarters. The offices in New York have been enlarged by the addition of an adjoining room, one-half of which will be used for a private office for J. R. Moore, the New York representative, and the other half of which will be used as a shipping and supply room.

The first of a series of bowling matches between Newark and New York jewelers was rolled last week at the Oxford alleys, Newark, and resulted in a victory for the Newark rollers, who won three games and totaled 2,810 pins during the night, while the New York team accounted for 2,661. A second series will be rolled on the Universal alleys in Brooklyn, April 30. The New York team was composed of the following: Messrs. Roll, Schaller, Windorf, Woodrow and Meht.

A petition in bankruptcy has been filed againt Edward Rorke & Co., importers of china, crockery and glass ware at 40 Barclay St., by these creditors: A. H. Heisey & Co., $62; Lehigh Valley Glass Co., $159; Knowles, Taylor & Knowles Co., $243, and Edwin M. Knowles China Co., $123. It is alleged that the corporation is insolvent, made preferential payments of $2,000, transferred merchandise and accounts of $4,500, and on April 11 allowed a receiver to be appointed by the Supreme Court. Judge Hand has appointed John W. McCaffery receiver in bankruptcy.

A sample case, which was said to contain $1,200 worth of jewelry, was left on the sidewalk at the corner of the Hoffman House one day last week by a salesman for an eastern house. The case was taken by Patrolman Walsh to the police station, where it was opened and found to contain a large quantity of gold cuff buttons and a miscellaneous assortment of stick pins, hat pins and brooches. Half an hour later a man, who said he was J. S. Kilkenny, of Providence, R. I., reported the loss of his sample case, which he said he had left in front of the Hoffman House. When he had fully described the case he was allowed to take it away.

Through an advertisement inserted for a customer last week by Theodore B. Starr, a jeweler at 206 Fifth Ave., a pearl necklace valued at $10,000, which had been lost, was recovered. The woman, whose name has not been made public, accompanied by her husband, was taking the necklace to the jeweler to have some slight repairs made, and in alighting from a cab in front of the store the box containing the gems was dropped. The loss was discovered a few minutes later and a search made, but the box had disappeared. It was later found by the driver of a taxicab, who received a reward of $500 for returning it to the owner. The necklace was intact and in perfect condition when returned, with the exception of two claws of a setting, which were slightly bent.

"Ye Handicrafters' Club" opened last week its annual Spring exhibition of craft work in the club rooms at 14 Nevins St., Brooklyn, where more than 50 exhibitors were represented by hundreds of exhibits, including jewelry, pottery, book binding and leather goods of all sorts, together with metal work, stencil work, etc. The exhibit of hand-made jewelry takes up a large case and shows work in convenional treatment. Exhibits of the Rokeby Shop, Cincinnati, show fine work in designs, especially in brooches, etc., by Mary Peckham, who etches designs on semi-precious stones that are used in completed work. From the Providence Art Club is a unique chain of silver and small amethysts, worthy of note. Oval belt buckles in horn work set in copper or silver, the horn being colored to harmonize with the color of the metal used, are also shown, togcther with combs made from horn. The exhibit of pottery is also of much interest.

Henry A. Dickinson, whose body was found in a room in the Hotel Stratfield, Bridgeport, Conn., last Friday night, was president of the Federal Silver Co., which has a modest place of business at 169 Chambers St. Mr. Dickinson was last seen alive by Dr. G. Skiff Ford, the hotel physician, who had been treating him for several days for insomnia. When the room in the hotel was found locked the hotel attaches began an investigation, but it was not until some time later that the body was discovered. The man had committed suicide by shooting himself close to his right temple with a 32-caliber pistol. A card found on his person stated that he was a life member of the New England Society of New York. Only 68 cents in money was found in his clothes, but shares of stock and bonds of a face value of several millions of dollars, distributed among manufacturing, mining and water works projects, were discovered among his effects. The Federal Silver Co. it was learned on inquiry at the office at 169 Chambers St., supplies silverware for premiums. The suicide was a widower and had no children. The Federal Silver Co., of which Mr. Dickinson was president, has a capital stock of $50,000, and F. B. Miller is secretary and treasurer.

The Customs officers made a strict examination of the baggage belonging to Mr. and Mrs. F. M. Rangel, two first-class passengers from the Isthmus of Panama, who arrived in this city last week on the *Alliance*, and discovered several pieces of antique jewelry, which were estimated to be worth about $10,000. The Customs officials were informed of the arrival of Mr. and Mrs. Rangel by a cable from a steamship captain who, Mr. Rangel claims, has a grudge against him. When the ship arrived at the pier Deputy Surveyor O'Connell was waiting for it. Mr. Rangel said that he was on his way to Paris, and that he expected to get away the next day in the *Provence*, but had neglected to put his baggage in bond, and made no objection when the inspectors began an examination of his trunks. In one of the trunks the inspectors found half a dozen antique gold altar ornaments studded with diamonds and rubies, the largest of which was about three inches in diameter, and, according to Mr. Rangel, cost $2,000. The passenger said that he had no intention of disposing of any of the jewelry here as he could get much higher prices for it in Paris. All the trunks were ordered sent to the Public Stores. Mrs. Rangel produced several pearl necklaces with diamond clasps, a crescent diamond brooch and a pair of diamond bracelets, all valued at about $3,000. She said that she had kept them about her for security, and that she used them on occasion and had no intention of parting with them. They were put in a bag and sent with the trunks. Mr. Rangel said that he had made 12 trips to South America, and after each trip he had brought up to this port a lot of jewelry and curios which he had collected and had no reason for selling his stuff here as he could do better abroad. He had never been held up before, and had on occasion passed his baggage through in bond, which he said he regretted that he had not done this time. After a long hearing before Deputy Surveyor Smyth at the Customs House, the jewelry was returned to Mr. and Mrs. Rangel. No proof of intent to smuggle was produced, while there was proof that they had declared the jewels as en route for Paris. An order was issued for the Rangel baggage, and it was put on the French liner *Provence*, upon which the Rangels continued their journey.

Among the recent accessions at the Metropolitan Museum of Art are: Two prehistoric flint knives (gift of J. Pierpont Mor-

gan); pitcher, Mesopotamian, 12th century; small Albarello, Persian, 13th century; small bow, Syro-Egyptian, 11th century; vase, Persian, 13th century (gift of Messrs. Kouchakji Frères); three majolica bowls, Byzantine, eighth to 10th century (purchase); inkstand and salt cellar, German, 16th century (purchase); two silver medals and dies, Hudson-Fulton Celebration Commission, by Chester Beach (gift of the Commission); two gold, four silver and two bronze copies of the Elder Hudson-Fulton medals, by J. E. Roiné (gift of Thomas L. Elder); bronze arbitration medal of the Building Trades Employers' Association, by George Beck (gift of George Beck); gold badge and bronze plaque of Francis Joseph of Austria; three bronze plaques, J. Petschek, Hans Graf Wilczek, Singing Society; two bronze medals, Joseph Lewinsky, Gen. Frederick von Beck, by Rudolph F. Marshall; bronze medal, The American Numismatic Society, Archer Milton Huntington, by Emil Fuchs; silver medal (restrike), Benjamin Franklin, by A. Dupré (gift of Mrs. Edward D. Adams); 33 pieces of silver, English, 18th and 19th centuries (purchase); bronze statuette, Water Nymph, by B. L. Pratt (purchase). Among the loans is a sandstone statue, Flora, by Giovanni da Bologna; alabaster statue, Toilet of Venus, by Giovanni da Bologna; marble statue, Youth Leaning on a Dolphin, School of Michel angelo (lent by Capt. Philip M. Lydig).

The Unique Art, Glass and Metal Co. has moved from Park Row to 36 W. 28th St.

R. H. Frederick, Spring Valley, N. Y., has moved his jewelry business into larger quarters.

Robert Champitt will take charge of H. D. Merritt Co.'s local office at 12 John St., next week.

E. E. Souden, of F. A. Hardy & Co., Chicago, was in town last week calling on old friends.

Ralph Dreyfus, of the Dreyfus Mfg. Co., sailed for Europe Saturday on the *Kaiserin Auguste Victoria*.

Mr. Mumford has resigned his position as western representative for Williams & Payton, 180 Broadway.

P. W. Harrison, of Deykin & Harrison, silversmiths of Birmingham, England, was a recent visitor in this city.

Frank Somes and Robert Curran, salesmen for Arnold & Steere, visited the factory at Providence last week.

Herman Bernstein, of the Standard Purchasing Co., 49 Maiden Lane, made a trip to the eastern factories last week.

Earl Viall, representing F. H. Sadler & Co., 180 Broadway, is making a trip through New York State for his concern.

W. E. Cotts, of the Goldsmiths Stock Co.'s stationery department, Toronto, Can., was seen in the Maiden Lane district last week.

The Manufacturing Jewelers' Board of Trade has completed arrangements for opening its branch offices in the Silversmiths building, and it will be opened next week.

The firm of Isaac Lewis & Sons in this city, has been incorporated to deal in glassware of all kinds. The incorporators are: Frank J. Stevens, Bronx; Jacob Echardt, Brooklyn, and William Pfeiffer, Bronx.

Ludwig Nissen, of Ludwig Nissen & Co., has been appointed a member of the executive committee which will have charge of the arrangements for the reception of ex-President Roosevelt upon his arrival in this city.

Edward Bastheim, of Bastheim, Adams & Abel, Los Angeles, Cal., has notified his local friends that he has purchased the interests of Messrs. Adams & Abel, and will conduct the business personally in the future.

Several prominent Cincinnati jobbers were in town during the past week, among them being Walter Mayer, of Wallenstein, Mayer & Co.; S. Strauss, of Lindenberg, Strauss & Co., and Godfrey M. Braham, of A. & J. Plaut.

Colonel Charles Hildrith Blair, who was at one time president of the Ithaca Calendar Clock Co., but of recent years has been a practising attorney in this city, died at his home on Staten Island, recently. He had been ill but a short time. Colonel Blair was graduated from the College of Arts and Sciences and was a member of the Psi Upsilon fraternity. His widow and three sons survive.

By the falling of a sign from the building on the northwest corner of Broadway and 34th St., fronting Herald Sq., at 1.30 o'clock Saturday morning, several persons narrowly escaped injury and the plate glass show window in "Lucios" jewelry store was smashed. The jewelry in the dismantled show window was guarded by the police until the proprietor was notified and other guards could be provided.

James M. Hopper, a jeweler of Long Branch, N. J., died last Wednesday in his 83d year. He was born in Philadelphia, Pa., and when a young man went to Freehold, where he conducted a jewelry store. Later he moved to Long Branch, N. J., and engaged in business there. He was one of the organizers of the Simpson Memorial M. E. Church and for many years a member of the choir. Eight children survive.

Detective Frank Peabody, of the Central Office, Friday night arrested a man known to the police as Daniel Cherry, at Eighth Ave. and 28th St., who, the police say, has an international reputation and is wanted for the alleged robbery of diamonds, valued at $4,000, from a jeweler in Albany. The police say that Cherry's picture is in the Rogues' Gallery and that he has served a term in prison in Holland for robbing a bank messenger.

At the second day of the Pope sale last week a beautiful and richly jeweled bronze and onyx clock, the face studded with tiny jewels, was sold, as were a graceful bronze group of three storks and a large and brilliantly toned Imari plaque. Among the other articles sold were Japanese egg shell china tea set and a number of fine vases and jars. The sale was conducted at the Fifth Ave. Art Galleries, and was the collection of Sir George Pope.

At the regular monthly meeting of the board of directors of the Jewelers Board of Trade last Thursday the following firms were unanimously elected to membership: L. Adler & Son, Dieges & Clust, Isidor Hochberger, Ilgen & Wakefield Co., Mutual Alliance Trust Co., New York (associate), New York; Kreis & Hubbard and Manistee Watch Co., Chicago; Austin & Stone, Attleboro, Mass.; John L. Des Lauries, Boston, Mass.; Leedin Novelty Co., Newark, N. J.; C. B. Norton Jewelry Co., Kansas City, Mo.; Parisian Jewelry Co., Boston, Mass.

A spectacular fire last Thursday on the seventh floor of the Fox building, at 338 Pearl St., did slight damage to the offices of J. F. Newman and W. W. Hurd, jewelers of 11 John St., whose factory is on the sixth floor of the structure. Otherwise the fire was confined entirely to the seventh floor. This is the third fire to occur in this building, which was erected about 30 years ago. The flames are supposed to have started from spontaneous combustion in a printing establishment on the seventh floor. The clock on the building was still going after the fire, although its face was black and cracked.

Hyman Meyrowitz, 23 years old, who was discharged from the Auburn State Prison last Wednesday, after serving a sentence of two and one-half years for grand larceny, was rearrested and brought to this city. His rearrest was caused by Paul B. Paris, who charged the prisoner with stealing 12 cases of gold and plated jewelry, valued at $3,500, from Cohn & Rosenberger, 536 Broadway. Meyerowitz claims that the jewelry was recovered upon information which he furnished the New York authorities. He said that he was promised leniency when his prison sentence expired. The jewelry was stolen from a truck, Sept. 17, 1907.

David Kaiser, president of the Jewelers' 24-Karat Club of New York, entertained the officers of the club at a luncheon Friday at the Drug and Chemical Club. Matters of interest were talked over and plans for future social events discussed. It was suggested that the 24-Karat Club give a "shad" dinner next year in place of the annual beefsteak dinner, and this suggestion will be considered later. Those present were: Wm. T. Gough, vice-president; W. H. Wheeler, treasurer; George T. Stebbins, secretary, and the following directors: Charles F. Brinck, John L. Shepherd, John W. Sherwood, Harry C. Larter, Leo Wormser, Charles R. Jung and Charles L. Powell.

In sustaining a protest filed by Paul Masson, the Board of United States General Appraisers, last week, made a ruling under the new tariff dealing with the classification of vest chains and so-called "dummy" watches. General Appraiser Fischer, who writes the decision, holds that the provision in Par. 448, Tariff act of 1909, for "all other articles of every description, composed wholly or in chief value of silver, German silver, white metal, brass or gun metal, designed to be worn on apparel or carried on or about or attached to the person," is to be limited to such other articles as are of the same kind as those specified in the paragraph. The specification referred to deals with such articles as are in any way ornamental or serviceable as articles of adornment. Dummy watches, only useful as playthings to amuse children, are not of that character, and are dutiable, according to the General Appraiser, as "toys." The decision

(New York Notes continued on page 91)

Successful Policy for 50 Years

The *Independent* and *Non-Retailing* Watch House of New England

THIS HOUSE confines its operations to strictly WHOLESALE dealings, conducts its operations on a LARGE SCALE and makes it a point to handle the BEST GOODS in all lines. This policy brings Success—to us—and to our customers.

New York Notes

(*Continued from page 89.*)

of the board establishes a precedent so far as the law of 1900 is concerned.

"Frederics" has opened a new jewelry store at 1 W. 34th St.

R. A. Breidenbach sailed Saturday on the *Kaiserin Auguste Victoria* for Europe.

Charles Huck has severed his connection with Goodfriend Bros., 9-11 Maiden Lane.

Le Roy Thompson, with C. Ray Randall, 7 Maiden Lane, visited the factory at North Attleboro last week.

Ralph Lewis, formerly with Herzfelder & Kohn, 6 Maiden Lane, has severed his connection with that firm.

Max Moser, of Moser & Whyte Co., 15 Maiden Lane, sails to-day on the *Lusitania* for the European markets.

G. Percy Clap, of the Daggett & Clap Co., has returned to New York after spending six weeks in the Attleboros.

Willis Fuller, formerly of Miller, Fuller & Whiting, is representing the Allison Mfg. Co., Attleboro, Mass., in this city.

J. Kohn, of Herzfelder & Kohn, 6 Maiden Lane, sailed Thursday on the *Provence* to visit the European diamond market.

Henry E. Oppenheimer, of Henry E. Oppenheimer & Co., returned from Europe, last Wednesday, on the *Kaiser Wilhelm der Grosse* after spending some time abroad.

E. Ira Richards & Co., 68 Nassau St., will move from 68 Nassau St., to the new Liberty Tower, corner of Liberty and Nassau Sts., as soon as the building is completed.

N. P. Friedman has opened an optical establishment in the arcade of the Silversmiths' building. He occupies the booth formerly used by Mr. Lowenstein as a jewelry store.

The body of George Weiss, an aged watchmaker, was found in his room at the Garfield House, 48 Bowery, Sunday night. It is thought that the man had been dead some time.

Henry Sessler will open a new jewelry store at 1341 Broadway on May 1. In the store will be installed facilities for resetting diamonds and repairing and finishing jewelry.

John T. Langill, treasurer of the Langill Fountain Pen Co., died at his home, 121 3d St., Brooklyn, this week, in his 65th year. He is survived by two sons and two daughters.

The Jewelers' Security Alliance received a telegram Monday morning announcing that the window in the store of F. W. Berkeley, Homestead, Pa., had been broken with a brick early Sunday morning and two trays of rings stolen.

One of the quaintest booths at the coming Actors' Fund will be "The Old Curiosity Shop," where, among other things offered for sale, will be a pearl girdle which belonged to Helen Fawcett and a set of amethysts worn by Charlotte Cushman.

Warren Granbery, of J. A. & W. S. Granbery, 13 Maiden Lane, is having a new motorboat built at a local ship yard, which he will enter in the big races during the coming season. The boat will take the place of the *Irene II.*, which has won so many races for Mr. Granbery in the past three years.

A new firm composed of Morris and Julius Wechsler will begin business May 1 at 8 Maiden Lane under the style of Wechsler Bros., as importers of diamonds, pearls and other precious stones, and makers of diamond jewelry. Morris Wechsler was formerly for 11 years with Goodman Bros. Julius Wechsler was in another line of business. They acquired the lease and fixtures of Goodman Bros., who are retiring from business.

On Friday evening, Samuel Heller, of L. Heller & Son, gave a dinner to the New York office staff at Reisenweber's, Columbus Circle, which was attended by about 25 employes accompanied by their wives and sweethearts. A. W. Hoyt was toastmaster and J. Heller made a presentation speech in which he presented Samuel Heller with terra-marine glasses. Samuel Heller accompanied by his family, sailed for Europe yesterday on the *Rotterdam*.

S. Reyman, Mount Vernon, N. Y., is congratulating himself on his narrow escape from being shot last week when a revolver was accidentally discharged in his store. The bullet drilled a hole in the wall just above the jeweler's head, and but for the fact that he was leaning over at the time would probably have hit him. A New York policeman had just purchased a revolver from the jeweler and was examining it when the accident occurred. The jeweler extracted the bullet from the wall and will keep it as a relic.

For the purpose of retiring the $1,847,000 six per cent. certificates of indebtedness maturing July 1, and for the further development of the property, the directors of the Silversmiths Co. have authorized a new issue of $3,000,000 certificates of indebtedness, of which it is proposed to sell $2,000,000 immediately, which will run for 10 years and bear interest at five per cent. Holders of the present certificates are offered the option until April 25 to subscribe to the new five per cent. issue at par, and such amount as is not taken by them will be offered to stockholders at par.

Charles Downs, who has represented several eastern concerns in the past, and who was last connected with the Bristol Mfg. Co., 7 Maiden Lane, has been in poor health for a number of years, suffering with cancer. He recently expressed a wish to return to his old home in England, and the Brotherhood of Traveling Jewelers donated $150 toward his expenses, although he was not a member of the organization. Frank Somes, George Schaffer and William Chambers also interested themselves in his behalf, and in one day collected $112 from representatives of different concerns along Maiden Lane, which they turned over to Mr. Downs. He started Saturday for his home in England.

Charles S. Stifft, Little Rock, Ark., is in town, and has with him some of the diamonds found in the one American diamond mine of which he is part owner. This is the property of the Arkansas Diamond Co., which controls 56 acres of land in the diamond bearing district. Mr. Stifft said that the largest diamond found thus far weighs 6½ carats and that about 800 diamonds have been found thus far. He said that the enterprise had gone beyond the experimental stage and as soon as funds are secured the plant will be installed, and the work of mining for diamonds will begin on a large scale. The cut diamonds he had with him are of different colors and of very fine quality. He also had a quantity of the rough diamonds as they come from the property.

The Jewelers' Security Alliance received information from the Hamilton Jewelry Co., Benton Harbor, Mich., Monday, to the effect that a young man who had been spending several months in that town, and who had always paid for his purchases by checks which were honored, made a purchase Saturday evening, April 10, from the jewelry store to the amount of $76, for which he gave a check. He also made purchases from 10 or 12 other business houses in the same town, and on Sunday disappeared. When the checks were presented for payment the holders found that there were no funds to meet them. The Hamilton Jewelry Co. said, that in Benton Harbor the young man traveled under the name of Jesse Mellett, but has passed as Jesse Reeder. He is described as being 29 years of age, five feet and seven inches tall, and weighing about 136 pounds. He is of slim build, has gray eyes and light hair and wears light clothes and a derby hat. He sometimes walks with a slight limp and smokes cigarettes, which have caused the first and second fingers of his right hand to become badly discolored.

The Jewelers' Protective Union has been sending out to traveling salesmen a letter explaining carefully the distinction between the Jewelers' Protective Union, which is an organization to protect its members from loss, and which, in case of theft, endeavors to convict the thieves, and the Jewelers' Safety Fund Society, which insures members' goods; the validity of the latter society's policy is entirely unaffected by any action of the Jewelers' Protective Union. The letters also enclose two pamphlets—one of which contains a list of hotels and their facilities for protecting traveling salesmen's stocks, and the other gives revised instructions to salesmen, of value in case of emergency. The salesmen are told what is best to do in case of loss of baggage and how best to avoid loss. The Jewelers' Protective Union reports that salesmen are showing a stronger spirit of co-operation than ever before and are sending in suggestions, many of which have been acted upon. The Jewelers' Safety Fund Society has been sending out letters saying that it is now in a position to insure goods while in the possession of brokers and also when in the custody of clerks, agents or servants for delivery to office or factory or for delivery to customers, manufacturers or repairers, and also while in their custody for selection or repair. A new form of policy has been devised to insure the property of members under such conditions.

M. A. Worcester & Co., Lidgerwood, N. Dak., have dissolved, L. W. Worcester having retired. His interest in the business has been purchased by J. H. Coven. The business will be continued under the name of M. A. Worcester & Co.

Pittsburgh's Jewelry Stocks were never so complete as they are now. The best of everything is here waiting to be culled by the wide-awake retail jeweler. To those who make this their buying center Pittsburgh needs no introduction. To those who have never bought here we suggest an introductory order from each of the following wholesale and manufacturing jewelers.

GODDARD, HILL & CO.

Pittsburg.

C. S. Wiley spent a few days of last week at Elizabeth

Charles Holyland, the engraver, holds the Pennsylvania record for making high scores in rolling duckpins.

J. C. Crawford is enlarging his line of goods, and reports a steady increase in business throughout the territory he serves

W. L. Vilsack, formerly in business in Wood St., has opened an office in the German National Bank building, Wood St. and Sixth Ave.

Capt. Wm. Klein, who resigned, last week, from the Hardy & Hayes Co. to go into business for himself, has opened an office in room 501, Ferguson building.

Otto Heeren, of Heeren Bros. & Co., who returned a week ago from the Isle of Pines, where he spent the Winter, will leave for Europe the last of this month on a buying expedition.

Sam F. Sipe returned last Thursday from Kokomo, Ind., where he had been attending the funeral of Mrs. S. C. Moore, the mother of Mrs. Sipe. Mrs. Sipe was at her mother's home when the death occurred.

Steele F. Roberts, president of the Jewelers' 24 Karat Club, has received quite a number of letters during the last week, complimenting him on the able address which he delivered at the club's second annual banquet a few weeks ago.

Among the out-of-town visitors in Pittsburg last week, buying goods, were: L. L. Swan, New Castle; John Linnenbrink, Rochester; F. B. McKinley, Washington; P. C. Yester, McKeesport; J. P. Manson, Jeanette; J. R. Thorn, Toronto.

Paul J. Gillespie leaves to-morrow for New York on business for Gilespie Bros. A. A. Gillespie, who is on his wedding trip, became an uncle on the same day he was married. Gillespie Bros. are sending out their Spring catalogue to customers of their house.

The Guarantee Title and Trust Co., of Pittsburg, of which J. Alexander Hardy, of the Hardy & Hayes Co., is a director, has merged its interests with the Duquesne National Bank, making one of the strongest financial institutions in the city. Mr. Hardy retains his place on the board of the trust company.

The Jewelers' Duckpin Bowling League rolled the closing games of the series Monday night at the Davis alleys, the occasion being one of a social character. The members of the Jewelers' 24 Karat Club and their wives attended the function, the full particulars of which will be given in next week's issue of the JEWELERS' CIRCULAR-WEEKLY.

The stock of Charles W. Morgan, the missing Butler St. jeweler who disappeared last January, and against whom an involuntary bankruptcy petition was filed a few weeks ago in the United States District Court was sold last week by the South Side Trust Co., receiver for Morgan, to B. Wolf; the price obtained was $1,925. The court has confirmed the sale, and it is expected that a settlement can shortly be made with the creditors. Nothing has been heard of Morgan since he left Pittsburg, and the man's disappearance is still as much of a mystery as ever. The police, however, believe that he is still alive.

The Pittsburg Chamber of Commerce is making elaborate arrangements for its next trade extension excursion, which is scheduled for the last week in May, and which will include a tour of Western Pennsylvania and other sections. Sam F. Sipe is the chairman of the publicity committee, and a number of out-of-town papers have been printing his picture because of the splendid work which his committee is doing to advertise Pittsburg and her merchants. The Pittsburg business men have found these tours extremely profitable. It is expected that fifty firms will be represented on the excursion, including several local jewelry houses.

A traveling salesman for a New York house walked into a Pittsburg store the other day and said: "Want anything in my line?" not telling the buyer what his line was, what he had to sell, whom he represented, or anything else. The buyer was compelled to ask for information. It was then that he told what he was selling. The Pittsburger did not buy, but the salesman was confident, for as he walked out he said: "Well, when you need anything in our line we will get the business anyhow." That statement made the buyer smile, for in relating the incident he remarked: "Maybe he will, but there are others." This particular buyer was prone to admit that he is not a mind reader, and when a man wants to sell goods he had better show his line and not be too confident that his house will get the business.

Among the traveling representatives who called on the trade here last week were the following: H. B. Rogers, Rogers & Co.; John A. Abel, Abel Bros. & Co.; J. F. Dean, Reed & Barton; A. B. Barnes, H. M. Quackenbush; J. P. Fagan, Unger Bros.; W. J. Parker, Osmun-Parker Mfg. Co.; Mr. Curran, A. J. Hedges & Co.; J. T. Griffith, Jr., Carter, Howe & Co.; Sidney H. Israel, S. & B. Lederer Co.; Alfred E. Hughes, Bishop Co.; Milton Goldberg, J. J. White Mfg. Co.; Mr. Powell, S. O. Bigney & Co.; Mr. Fisher, Furbish, Swift & Fisher; E. V. Hutten, H. & E. O. Belais; James A. Goewey, David Kaiser & Co.; Mr. Tuthill, Saunders, Meurer & Co.; George W. Whitmore, Sessions Clock Co.; Albert Greene, Utley, Jr., & Co.; E. E. Holbrook, Ferdinand Bing & Co.; Fred T. Barry, Louis Stern & Co.; George E. Taylor, Wilcox & Wagoner Co.; S. Newman, B. Hyman & Co.; A. Kaufman, Ingomar, Goldsmith & Co.; W. J. Lane, Wm. H. Ball & Co.; S. E. Coggins, Towle Mfg. Co.; Wm. F. Koch, American Morocco Case Co.; Herman Hamburger, S. Pitzele; John J. Moffitt, Battin & Co.; Jul. F. Sehuman, Jr., Wm. Kinseherf Co.; Mr. Bachman, A. Joralemon & Son.

Henry Berger, right-hand man to August Loeh, the North Side jeweler, and Mrs. Berger, last week, entertained the members of the Jewelers' Duckpin League at their home in Bellevue, a prettily appointed supper having been provided for the guests. It appears that Mr. and Mrs. Berger promised that if the Lochs finished first or second in the race of the Jewelers' Duckpin Bowling League all of the members of the league would be entertained at supper. The Lochs finished second. Mr. Loeh was present as an honor guest. A feature of the occasion was the presentation of a unique trophy to Mr. Parlet, of E. P. Roberts & Son, who holds the record for having made the highest scores during the season. It was the handiwork of Mr. Berger, who took an ordinary ball such as is used in duckpin games and placed a duckpin on top, fastening it to the ball by an iron rod and a ring. The pin bore the coat-of-arms of the Jewelers' 24-Karat Club and the individual scores made by Mr. Perlet in certain games, as well as a miniature photograph of the man to whom it was presented. The pennants of the Roberts and Loch houses were tastefully painted on the pin, which is covered with gold leaf. The ball bore the names of all members of the teams in the league painted in black upon gold letters.

Columbus, O.

C. E. Gallagher, 19 E. Gay St., is having a new front added to his store.

The first meeting of the creditors of M. J. Daniels, jeweler and pawnbroker, will be held Wednesday of this week in the office of Frederick N. Sinks, receiver.

Goodman Bros. have donated a loving cup to the Buckeye Lake Yacht Club as a prize for catboat races during the coming Summer.

L. W. Lewis and all of his clerks have been called to testify before the Grand Jury this week in the case of the State vs. Hicks, the colored man accused of stealing a diamond from the Lewis store.

Albaugh & Pickering are displaying in their show windows two large Masonic rings, each eight inches in diameter, which were carved out of wood by Mr. Albaugh. A large class of Masons, about 75 in all, will take the Scottish Rite degree next week, and the rings are used as timely advertising.

The Columbus Clock Co., with an authorized capital stock of $150,000, was incorporated in Columbus last week, and will take over the Rochelle Clock & Watch Mfg. Co., Rochelle, Ill. Columbus men took $25,000 worth of stock, and there will be an exchange of stock in the old company for stock in the new. The incorporators of the new company are John Zuber, Herman Falter, Charles Isaly, Henry Isaly and William Reel. J. T. Mathison, jeweler, is also interested in the new company. The Rochelle plant will be moved to Columbus and will occupy the building at City Park Ave. and Thurman St., which was occupied by the old Columbus Watch Co. E. A. Bazzell, manager of the Rochelle company, will continue as manager of the Columbus company. The company now employs about 100 men and turns out gilt and traveling clocks and small goods, but on its removal to Columbus it will also manufacture pendulum clocks and alarms. The output, now said to be 500 a day, is to be increased to 1,000 a day.

Fielding & Denton, Douglas, Ga., recently sustained a small loss by fire. There was no insurance.

D. C. Williams, Odon, Ind., has admitted a partner in the business, making the firm style Williams & Joliff.

Fourth Avenue and Wood St. PITTSBURGH, PA.

Boston.

Minot G. Daniels, Stoneham, is closing out his stock at auction.

George H. Burns, Ayer, Mass., and Mrs. Burns, are on a trip to California.

S. Epstein, of the Illinois Watch Case Co., visited the Boston trade last week.

Frank B. Chace, material jobber, is on a business trip through eastern New England.

Lawrence F. Bentley, son of E. E. Bentley, is now connected with the Bentley Jewelry Co.

Albert Dueber, of the Dueber-Hampden Watch Co., was in Boston visiting the trade last week.

The wedding of Arthur Stern, a Lynn jeweler, is announced to take place to-day in that city.

Dr. A. G. Somers, optician, of the Jewelers' building, has returned to his office after a brief illness.

J. Frank Galvin, traveler for John C. Sawyer, has just returned from a trip through New York State.

A. G. Herbert, Acushnet Ave., New Bedford, Mass., has been holding a clearance sale at auction during the past week.

Arthur Mertz, of Mertz Bros., Newark, N. J., was in Boston last week on his first trip here since his illness of last year.

B. S. Gainsborg, of the New England Jewelers' Co., is on a buying trip this week to Providence, New York and Newark.

Vice-President Charles G. Perry, of the Ripley-Howland Mfg. Co., went to Atlantic City last week on a brief recreation trip.

Joseph Cowan has returned from a western trip and is preparing to start May 1 for a tour of Ohio valley and Lake cities.

Carl Bachman, who has just graduated from the horological school at Waltham, will start in business shortly in Fitchburg, Mass.

Henry W. Patterson went to Marblehead Neck over the week end to stay at his shore cottage, which he will shortly open for the Summer.

Miss Gertrude McPherson, buyer of plated jewelry for the Smith, Patterson Co.'s retail store, is on a trip to New York and Philadelphia.

Charles S. Patten, salesman for the Shreve, Crump & Low Co., went to his camp at Wrentham, Mass., over the Patriot's Day holiday.

The first baseball game of the season in the jewelry trade will be between the married and single men's nines of Shreve, Crump & Low Co.'s establishment.

H. L. Houghton, who handles optical goods and trade findings of various kinds, has been on a business trip to New York and Philadelphia during the past week.

Robert A. B. Cook, of Phipps, Durgin & Cook, attorneys for the Jewelers Board of Trade, was married April 14 to Miss Emilie F. Reardon, Baltimore, in that city.

Wellesley College friends of the late Prof. Sophie Jewett are subscribing to a fund for a stained glass window in her memory, to be placed in the Memorial Chapel on the college grounds.

Ezra C. Fitch, president of the Waltham Watch Co., has arrived home from Europe and was at the office of the company April 11 for the first time in a number of weeks. Royal Robbins, treasurer of the company, who has been on an outing trip to Bermuda and the West Indies, has also returned, and was at the office of the company in Boston again last week.

Friends of A. Mendelssohn are pleased to learn that his wife is recovering rapidly from a serious illness of the past fortnight, the result of a critical surgical operation which she had to undergo.

C. W. Sweetland & Son, manufacturers' agents, furnished the splendid set of prize cups recently awarded to successful bowlers of the Retail Furniture Dealers' Association Bowling League in this city.

Alanson Bigelow, Jr., of Bigelow, Kennard & Co., accompanied by Mrs. Bigelow, sailed April 12 from Boston on a European buying trip. He will travel through England, France, Germany and Italy.

Mrs. Distelhurst, bookkeeper for Henry G. Morris, has been ill for the past two weeks, but is now able to be at her desk again. Lewis Wilkes, salesman for the same house, has just returned from an eastern Maine trip.

Joseph A. Williams is taking a two weeks' recreation trip, having left Boston Saturday for Atlantic City, Washington and other points south, intending to return by way of Philadelphia, New York, the Hudson river and Albany.

L. H. Hamlin recently purchased the jewelry and optical business of I. J. Carpenter, 2046 Massachusetts Ave., Cambridge, and intends later to make a number of changes in the interior of the store. He will carry a nice line of jewelry.

The schooner yacht *Chanticleer,* owned by President Ezra C. Fitch, of the Waltham Watch Co., will be one of the first of the large yachts to go into commission in Massachusetts waters this season. The refitting work at the builders is now nearly finished.

The Knickerbocker Silver Co. has given up its Boston office on Congress St., and Mr. Anderson, salesman for the concern in this territory, will make 13 Winter St. his headquarters when in the city. The orders for goods will be filled direct from the factory hereafter.

Ernest Langford went to Plymouth, Mass., the latter part of last week to open up his Summer cottage there and enjoy a fishing trip extending over April 19, which is known as Patriots' Day and is a legal holiday in Massachusetts, commemorating the battles of Lexington and Concord.

Buyers in town during the week included: George T. Springer, Portland, Me.; Frank Plummer, Dover, N. H.; S. W. Baker, Rockland; A. E. L. Scotton, Ipswich; George H. Gutteridge, Maynard; E. F. Welch, Westboro; H. F. Beaudry, Rockland, and B. D. Loring, Plymouth, Mass.

Mrs. William T. Eaton, of the Ashmont district, who died April 14 at the City Hospital as the result of a burning accident at her home, which caused also the death of her daughter, is well remembered by oldtimers in the jewelry trade. She was at one time bookkeeper for Harwood Bros., her maiden name being Abbie F. Tuttle.

Lawrence F. Percival, of D. C. Percival & Co., has just placed an order for a first class racing yacht with B. B. Crowninshield, the noted designer. The yacht will probably be built at East Boothbay, Me., by Rice Bros., and, like the previous racers owned by Mr. Percival, will perpetuate the name he has given each, as the *Sally XI.*

Henry M. Rich, jewelers' auctioneer, sold at auction last week the bankrupt stock of William A. Thompson. The articles comprised gold jewelry and fancy stones of various kinds, and brought somewhat under the appraised value. Arthur W. Cross, who occupies the rooms in the Jewelers' building which were formerly Mr. Thompson's quarters, was one of the active bidders.

The E. Howard Clock Co. has recently installed extensive watchman clock systems for the Walworth Mfg. Co., Boston; the Great Falls Mfg. Co., Somersworth, N. H.; the Schwarzschild & Sulzberger Co., Portland, Ore.; H. W. Butterworth's Sons Co., Philadelphia, Pa., and St. Luke's Hospital, New York. The company has also set up a double dial post clock for E. M. Henderson, jeweler at Coney Island, N. Y., and a double dial post clock for M. L. Goldstone, New York.

The Smith-Patterson Benefit Association, composed of employes, held its annual meeting April 12 and elected officers as follows: President, James Kingman; vice-president, Henry L. Reynolds;; secretary, D. J. Manning; treasurer, George W. Saunders; executive committee, William R. Tuttle, Thomas Hodgdon, Fred R. Furbush, Edward Eldredge, William H. Prescott; visiting committee, Miss Florence C. Morgan, Miss H. I. Teale, Albert Johnson, Fred Sargent.

At the continued hearing April 12 on the case of A. R. Grover, charged with larceny of diamonds from S. B. Kantor, the presiding judge found probable cause and held Grover for the Grand Jury. Since he was arrested on this charge Grover has been confronted with a number of other complainants, and is said to have made restitution or settled, in order to avoid complicating his case.

Travelers visiting Boston the past week included: E. H. Cox, Sussfeld, Lorsch & Co.; W. H. Sparks, Seth Thomas Clock Co.; J. L. Bennett, Illinois Watchcase Co.; Theodore Parker, Smith & Crosby; C. F. Willemin, Sulzberger Bros.; E. W. Martin, Martin-Copeland Co.; C. E. Mott, J. B. Bowden & Co.; C. F. Sweazy, Champenois & Co.; John R. Scofield, T. W. Adams & Co.; J. Schwob, Adolphe Schwob; Charles Theurer, Crane & Theurer; William B. Peck, Crossman Co.; William Huger; H. C. Ward, Durand & Co.; Frank J. Keller, Keller Mfg. Co.; E. E. Allsopp, Wordley, Allsopp & Bliss Co.; Charles T. Dougherty, Osmers-Dougherty Co.; Julian G. Hall, Carrington & Co.; R. H. Schley, Sloan & Co.; W. J. Harber, Enos Richardson & Co.; W. N. Peal, Strobell & Crane; Louis L. Lawton, Jones & Woodland Co.; J. D. Varley, Allsopp Bros.; Frederick Lapham, Carter, Howe & Co.; H. E. Slater, Whiteside & Blank; V. L. Burgessor, Krementz & Co.; Alfred Reeves, Eckfeldt & Ackley; Mr. Wentworth, Fairchild & Co.; Wallace Campbell, Day, Clark & Co.; Frank E. Delano, Van Dusen & Stokes Co.; R. W. Simpson, Jr., Riker Bros.

Providence.

TRADE CONDITIONS.

The manufacturing jewelry business is, as a rule, somewhat slack, although there are a number of concerns that are working on a full schedule. Many have put into operation the Saturday half-holiday schedule, usually put into effect for the months of July, August and September. All, however, are optimistic and prophesy good business in the Fall. Many feel that the improvement is close at hand.

The salesmen are spending their time at present in arranging their sample cases for the general invasion of the west, which will begin in a week or 10 days for the Fall trade. Many new and attractive designs have been added to the majority of the lines, and much is expected therefrom.

William Loeb is on a trip through the middle west.

Fritz L. Kraus left, last week, for an extended western trip for the Smith Bros.

Maurice Ettlinger was a visitor in New York in the past week in quest of new goods.

Frank M. Silva has returned from a several months' trip through southeastern Europe.

Edward B. Hough, of the Wightman & Hough Co., is back from a short visit to Jamaica.

George A. Schultz is showing Snow & Westcott Co.'s line to the trade of the middle west.

Max Vineberg, of the Western Jewelry Co., Montreal, Can., was a visitor in this city Thursday.

Frederick Barry has started on a western trip for L. Stern & Co., and expects to be out about a month.

C. Sydney Smith & Co. are receiving good orders from A. L. Hancock, traveling in the middle west.

S. J. Sumner is making a short trip among the trade in the middle west for the Providence Stock Co.

W. A. Fay, Chicago representative of the Potter & Buffinton Co., is on a visit to the firm's factory in this city.

Tannenbaum & Co. have added a large line of imitation pearls to their other lines of imitation precious stones.

Retailers in this city received a visit in the past week from a representative of the Rogers Silver Co., Meriden, Conn.

Martin L. Read is now doing business as the M. L. Read Co., at 95 Pine St., in watch, clock and jewelry repairing.

Henry D. Sharpe, of the Brown & Sharpe Mfg. Co., has been re-elected a director of the Providence Institution for Savings.

Sarah B. Sturdy has been appointed by the Municipal Court of this city as administratrix of the estate of Rolf E. Sturdy.

John F. Allen is back from a European trip on which he bought his Fall stock of imitation precious stones and other goods.

N. F. Kozlow, in charge of the Chicago office of the William Bens Co., has been visiting the factory here in the past week.

The Crown Novelty Co. has removed from Leominster, Mass., to this city, where it will continue in the same line of business.

Frank Cutter, who has been suffering from a nervous breakdown for several weeks, is reported as considerably improved.

The Hiler Jewelry Co., which operates jewelry departments in a number of department stores throughout the country, will take, May 1, the jewelry department in the Bailey Co.'s store in Cleveland, O.

Joseph W. Heller has just registered at the office of the State Board of Public Roads a 24-horsepower Black Crow touring car.

Arthur O. Ostby, superintendent of the Ostby & Barton Co., accompanied by his wife, is spending a couple of weeks at Atlantic City.

Horace W. Steere, of Arnold & Steere, has joined the ranks of the autoists and has purchased a 40 horse-power Thomas Detroit touring car.

Emile Dreyfus has taken office room with Martin Low & Taussig, 402 Lederer building, Mathewson St., with a line of Parisian metal findings.

William G. Lind, with the T. W. Lind Co., left, last Wednesday night for New York, whence he will go to Cranford, N. J., for a brief visit.

Charles H. Fuller, of George H. Fuller & Sons Co., Pawtucket, has just added a 25-horsepower Renault limousine automobile to his garage.

June 1 is the date set for the wedding of Miss Helen Wall, eldest daughter of Mr. and Mrs. A. Tingley Wall, to E. Donaldson Clapp, Auburn, N. Y.

Edgar W. Martin, of Martin-Copeland Co., accompanied by his wife, will leave for Europe about May 1 for an automobile trip of several weeks.

Capt. William E. Taber, Pembroke S. Eddy and Charles Henry were among those who attended the 43d anniversary of Prescott Post, G. A. R., Friday evening.

The Rueckert Mfg. Co. is fitting up its branch shop in the James E. Blake factory building, Mill St., Attleboro, and expects to have the plant in operation in 10 days.

The T. R. Kilkenny Co., who recently removed from 109 Friendship St. to 289 Thurber's Ave., have added nearly $7,000 worth of machinery to their plant, including a modern coloring department.

Thomas R. Kilkenny will leave, April 25, for an eight weeks' trip as far west as Denver, in the interests of T. R. Kilkenny Co. At Denver he will be met by his partner, who will proceed to the Pacific Coast.

L. J. Hellman, who has been the representative for M. F. Williams & Co. for the past five years, has resigned to engage in the manufacturing business in Chicago. He will be succeeded by Isidore Himmelreich.

At 9.30 o'clock Wednesday night the firemen were called by a still alarm for a fire between the floors of the building at 95 Pine St., occupied by Linton & Co., manufacturing jewelers. The damage was slight.

C. E. Easton, the New York representative of Martin, Low & Taussig, has been at the office of the concern in this city the past week, stocking his sample case with new goods, preparatory to calling on the trade.

W. Stone, of the Gorham Mfg. Co., is making a tour of England, France, Germany and Austria in search of novelties in umbrella and parasol handles, also pipes, etc., and to secure a stock of sticks, canes and umbrellas.

Many of the manufacturing jewelers in this city and vicinity who sell W. F. Smith, Des Moines, Ia., were sorry to hear of his death Monday last from typhoid fever. He had dealt with the eastern manufacturers for many years.

David Bernkopf, of the Leeder & Bernkopf Co., has returned from a 10 weeks' trip in Europe in search for seasonable novelties. William F. Leeder, of the same firm, has left on a trip to Bermuda for a rest. He will return in 10 days.

The Manufacturers' League was formed, Monday evening, with eight clubs for a series of baseball games during the season. Included in the league are teams representing the Gorham Mfg. Co., the B. A. Ballou Co., Inc., and Williams & Anderson.

J. J. O'Neill, of Eddy St., has put on the market a novelty that is taking well. It is a pin for women bearing the emblem of the Benevolent and Protective Order of Elks, upon which are either the words, "Wife," "Sister," "Daughter" or "Mother of an Elk."

Mr. and Mrs. William H. Manchester have sent out cards for the celebration of the 25th anniversary of their marriage, on Thursday evening, April 21, at their home on Governor St. The affair will be a very quiet one, extending only to the immediate families and a few close friends.

At the meeting of the Advisory Council of the New England Manufacturing Jewelers' and Silversmiths' Association, held Thursday in the rooms of the association in the Wilcox building, 42 Weybosset St., the report of the treasurer of the recent annual banquet was presented and discussed.

The wedding of Wesley Cornell Martin, son of Mr. and Mrs. Edgar Martin, at the home of the bride's parents, Mr. and Mrs. Nils Olsen, S. Angell St., this city, Tuesday evening, was one of the leading social events of the season. The ceremony was performed by Rev. Henry I Cushman in the presence of a large gathering of relatives and friends.

An iron awning frame, at the entrance of F. M. Kirby & Co.'s store on Mathewson St., fell the other day, striking Miss Elizabeth Baxter, rendering her unsconscious. At the same time the frame smashed two large plate glass windows. A few days before, the fabric attached to the frame was burned and it is thought that the fastenings were weakened at that time.

Frank Slade and Eugene A. Eddy, East Greenwich, and James H. Higgins, Pawtucket, have filed articles of association at the office of the Secretary of State as the Slade Mfg. Co., Providence, with a capital of $100,000, common stock, in shares of $100 each. The concern is for the manufacturing, buying, selling and exchanging of brass, copper tubes, sheeting rods and other metal goods.

The regular monthly meeting of the directors of the Manufacturing Jewelers' Board of Trade was held Friday in the rooms of the association, 42 Weybosset St., at which there was a good attendance. President Fred D. Carr presided, and three new members were added to the list, increasing it to 257. Horace M. Peck, manager, reported on the opening of the branch office in New York.

More than 300 of the leading merchants and business men of this city and vicinity gathered in the rooms of the Providence Board of Trade, last Wednesday evening, to make arrangements for the convention

of the Atlantic Deeper Waterways Association in this city next September. Among those present were Henry G. Thresher, Mayor Henry Fletcher, George H. Holmes, Charles H. Fuller, Pawtucket; James Smith, Frederick W. Allred, William A. Schofield and John O. Neil

E. C. Bliss was in New York in the past week

Barton A. Ballou, of B. A. Ballou & Co., Inc., has been elected vice-president of the Rhode Island Humane Education Society.

J. Thomas Inman, Attleboro, has been appointed trustee of the estate of John MacDonald, Barrington, by the Superior Court.

The Sanitax Brush Co., 2351 Wabash Ave., Chicago, has been advertising in the local newspapers for a stamper on toilet ware, who can get up his own forces

The fifth annual dance of the Shepard Beneficial Association was held in Free Masons' Hall, Tuesday evening. John Shepard, Jr., was among those in attendance.

The trade of Parks Bros. & Rogers, through the western territory, are receiving calls from Everett I. Rogers, of the firm, and Harry Kenyon, the firm's western representative.

Representative Harry Cutler, of the Cutler Jewelry Co., has returned from Washington, D. C., where he met President Taft and also attended the convention of the Order of B'Nai Brith.

Lawrence C. Martin, vice-president of the Martin-Copeland Co., has gone to Europe on a two months' tour of the Continent. He sailed on the *Kaiser Wilhelm* on Tuesday from New York for Cherbourg.

The Outlet Buyers'-Managers' Club, the oldest organization of its kind in the United States, was entertained at the Hof Brau Wednesday evening by Joseph and Leon Samuels, proprietors Harry Cutler was one of the speakers.

Ludwig J. Roehr, president of the Bassett Jewelry Co., was a passenger on the *Kaiser Wilhelm* for Cherbourg on Tuesday. He will be absent in Europe for about two months, during which time he will visit the principal points of interest on the Continent.

John Shepard, Jr., celebrated the 30th anniversay of his store by a banquet given in this city Monday evening, at which all the officers, buyers and heads of departments were present. A special car was at the accommodation of the guests from Boston.

Owing to an inadvertency the name of S. J. Sumner was given as a representative of the Providence Stock Co., in last week's issue of THE JEWELERS' CIRCULAR-WEEKLY. The representatives of the concern are only D. N. Jacoby and G. J. Lederer. Mr. Sumner being associated with an entirely different firm.

Among the foreign importations received during the week through the Providence Customs House were the following: From Bremen, one package of hat pins and three of imitation precious stones; from Hamburg, one package of manufactures of metal and four of imitation precious stones; from Havre, one package of manufactures of metal; from Liverpool, seven packages of manufactures of metal and one of emery wheels; from London, six packages of antimony; from Naples, one package of manufactures of marble.

Seventeen men quit work in the American Enameling Works, on Neville St., Friday, alleging that they were on a strike for higher pay. A telephone message was sent to the Seventh Police Station by the company, asking protection, as the workmen, mostly Armenians, hung about the gateway and threatened violence. Lieutenant Tyler and a posse went to the shop, where two men continued at their work. The treasurer of the firm stated that he did not know what the grievances of the help were, as no complaints or demands had been made.

Among the buyers in the city in the past week were the following: Harry Parkinson, of E. D. Gilmore & Co., Chicago; L. C. Goldsoll, of the Jeffrey Jewelry Co. and of the Jackson Jewelry Co., Chicago; Charles Cohen, of A. L. Friedman & Co., New York; J. Floersheim, of Floersheim & Co., Chicago; Herman Hammond, of Nordman Bros. Co., San Francisco; S. J. Pichel, of Samtag & Hilder Bros., New York; M. Daniel Brown, of the M. D. Brown Co., Baltimore, Md., and M. L. Schwab, of Guthman, Solomon & Co., New York.

J. G. Kilkenny, representative of the Colonial Jewelry Co., had a near robbery of his sample case while in New York the past week. He was on the way home from a short western trip and set his bag down in front of a cigar store while he stepped inside to purchase some Havanas. While he was making his purchase a patrolman came along, looked wise at the sample bag, and, seeing no one about, picked it up and started for the police station with it. A few minutes later Mr. Kilkenny emerged from the store and was surprised to find his grip had disappeared. Inquiry disclosed the manner of its disappearance, and the owner soon obtained possession of it.

Canada Notes.

Thomas S. Porte, Campbellford, Ont., has renewed the chattel mortgage that he gave to L. G. Young, of the same town, for $275.

Mitchell & Tillotson, auctioneers, New York, who recently conducted a sale for Ambrose Kent & Sons, Ltd., Toronto, Ont., begin a sale to-day, April 20, of the stock of George Robinson, Calgary, Alberta. This sale was ordered by the Canadian courts.

A verdict of $1,500 was brought in, last week, by the jury who heard the case of Louis Rey, watchmaker and jeweler and consul for Switzerland, who claimed $15,300 from the civic authorities of Montreal as damages for being struck by a stray bullet fired by a constable who was chasing a runaway prisoner along Cadieux St. at the time that Mr. Rey was standing at the door of his store talking to Mrs. Rey. Application was at once made by the city attorneys for a reserve case to the Court of Review.

Springfield, Ill.

On April 16 fire originating from defective wiring caused a loss estimated at $500 to the plant of Buoy & Davedeit, manufacturing jewelers. Smoke and water did most of the damage.

A marriage license was issued, April 15, here, to William C. Buoy and Emma Hoover, both of this city. The groom is a member of the firm of Buoy & Davedeit, manufacturing jewelers.

Attleboro.

S. O. Bigney was in Chicago last week visiting his office there.

The Guinti & Pike Co. has changed the firm name to the Guinti Mfg. Co.

A. G. Slocum has moved his jewelry store from the Postoffice Block to County St.

George Roberts has returned from a trip taken in the interests of the Horton Angell Co.

W. L. Bushee, Thomas Moore and George Allen, Jr., were in New York last week.

J. A. Lucas, Chicago representative of A. Bushee & Co., is ill in Chicago with typhoid fever.

George Heywood, New York representative of the Horton Angell Co., was at the factory last week.

Edgar A. Remington, of Carter, Qvarnstrom & Remington, is rapidly recovering from his recent illness.

The school committee was organized last week with Harold E. Sweet, of the R. F. Simmons Co., as chairman.

F. M. & J. L. Cobb, manufacturing jewelers of Mansfield, are preparing to open a New York office with Elmer Vaselet in charge.

The Holbrook Mfg. Co., now located in the W. H. Saart building, will move to the Robinson building, just vacated by the J. M. Fisher Co.

R. R. Swan has withdrawn from the firm of Thompson, Swan & Thompson. The firm will continue to do business under the name of Thompson & Patterson.

The members of the Austin & Stone bowling team, who were the winners in the Shop League, were tendered a banquet at the Park Hotel last Tuesday evening by Manager Standish, of the Hub alleys. The members of the winning team are French, Laffan, Harris, Nolan, Doran and Captain Bulley.

While working over a swift revolving emery wheel last Thursday morning at the factory of the Bay State Optical Co., Stephen J. Clulee, one of the members, was hit in the eye by a flying section. He was taken to the Boston Eye and Ear Infirmary, where it is feared that he will lose the eye.

The Board of Trade has received a letter from the Adams Express Co. in regard to their protest about the increase in rates to New York. The company says that this matter is now in the hands of the Interstate Commission, and that it is expected to make a report within a few days. It was added that whatever the Commission reports will be accepted by the company, which hopes the jewelers will not fail to accept it.

Edward A. Sweeney, president of the W. H. Wilmarth & Co., Inc., announced last Saturday that he would be a candidate for Representative from the district comprising Attleboro, North Attleboro, Norton and Seekonk. The suggestion of Mr. Sweeney becoming a candidate came from the manufacturing jewelers of the two towns, who desire to show their appreciation of the work done by him during the passing of the Tariff bill.

The Jewelers' Circular Pub. Co.

11 John Street New York

Newark.

C. J. Bioren, of Bioren Bros., 173 Washington St., is on a trip through the south.

Irving J. Schwartz, of L. Barnett & Co., 481 Washington St., is on a trip through the middle west.

Clare Glander, representing J. D. Dalzell & Co., 23 Marshall St., is on a trip to Philadelphia, Baltimore and Washington.

About 20 Newark jewelers attended the beefsteak dinner of the Jewelers' 24-Karat Club at Castle Cave, New York, Tuesday evening, April 12.

Walter A. McGowan has started in business as an engraver, chaser and etcher at 244 Market St. Several years ago he was engaged in the same business.

Isidor G. Holland, of the firm of Holland & Stein, 47 Market St., is on a pleasure trip to Washington, D. C. He will stop at Lakewood, N. J., for a few weeks on his return.

In referring to the Hagerstrom & Chapman Co., in the last issue of THE JEWELERS' CIRCULAR-WEEKLY, an error was made in calling the firm name Hagerstrom & Parker. The name should read as above.

The United Watch Mfg. Corporation has been incorporated with a capital of $50,000. The office is at 15 Exchange Pl., Jersey City, and the incorporators are Albert Wyss, Ernst Wyss and John R. Turner.

Last Friday morning a fire destroyed the one-story frame building at 125 Tyler St., which was occupied by Worthington & Raymond, makers of jewelers' soldering blocks. It is thought that the fire started in the rear of the building, but from what cause is unknown. The loss was about $900.

Edward M. Childs, representing Kohn & Co., Camp and Orchard Sts., in the south and on the Pacific Coast, sails, this week, on the steamship *Moltke*, of the Hamburg-American line, for a tour of two months and a half in Europe. He will travel through Spain, France, Austria, Germany and Russia.

The Leedon Novelty Co., High St. and Boyden Pl., reported to the police, last Wednesday, that 60 dozen round mirror glasses were stolen from their loading platform some time between the previous Saturday night and Monday morning. The goods were valued at $108. The thieves have not yet been found.

Sydney C. Straus, formerly of the Layman-Straus Co., 91 Oliver St., will hereafter represent the firm of Moore & Son, 22 Green St., in the southern territory. Arthur H. Moore, of the firm, who has been ill with the grippe since last December, has recovered and is back at his desk. He will leave on a trip through the south in a few weeks.

Incorporation papers have just been filed for the firm of Hagerstrom & Chapman, manufacturers and dealers in jewelry, watches, opera glasses, etc. The authorized capital stock is $50,000, of which $10,200 has been paid in. The registered office is at 85 Columbia St., and the incorporators are Louis Rose, Maurice Hagerstrom and Vernon S. Chapman, all of Newark.

Frank H. Hanson, principal of the Market St. public school, gave an interesting lecture on Norway and Sweden to the members of the Credit Men's Association at the Board of Trade rooms, Tuesday evening of last week. The lecture was illustrated with many interesting stereopticon views. At the business meeting preceding the lecture 14 new members were elected to the association.

Somebody got into the jewelry store of Vincinco Campania at 120 Brunswick St., Jersey City, last week, and stole $72.50 worth of jewelry, which is the value placed on four silver watches and four gold watches and 12 gold charms that were taken. When Campania went to open his store he discovered the fanlight over the front door open. He reported the matter to Inspector Larkins, who has assigned detectives to the case.

On the complaint of G. Gootenberg, a Paterson, N. J., jeweler, William W. Harrison has been arrested on a charge of false pretenses, it being alleged that he gave a worthless check in payment for jewelry. According to the story told by the jeweler, Harrison entered his store several days ago and selected a scarf pin, the price of which was $11. He did not have the necessary amount of money with him, but had a check for $20. Mr. Gootenberg, believing the check to be good, gave Harrison the pin and $9 in cash. When the check had been deposited in the bank it was returned to the jeweler as worthless, Mr. Gootenberg alleges.

Samuel R. Sessing, a jeweler who lived in Newark for over half a century, died at his home, 315 Lafayette St., Sunday, April 10, after an illness covering a period of eight weeks. Mr. Sessing was 66 years old. He was born in Sullivan County, N. Y., but had resided in Newark since he was a boy. He was a member of the Third German Presbyterian Church since its organization, and was an elder of the church for more than 40 years, being the first and only superintendent of the Sunday-school. He was one of the organizers of the Men's Club of the church and active in its affairs. Mr. Sessing was also a member of Success Lodge No. 11 of the Ancient Order of United Workmen. He is survived by his widow, Johanna Sessing, three sons and a daughter. The funeral services were held, last Wednesday afternoon, on the 42d anniversary of his marriage. Services were first held at his late home and then at the Third German Presbyterian Church. Interment was at Fairmont Cemetery.

Connecticut.

Walter H. Young has returned to Wallingford from a business trip in the interests of Factory "L," International Silver Co.

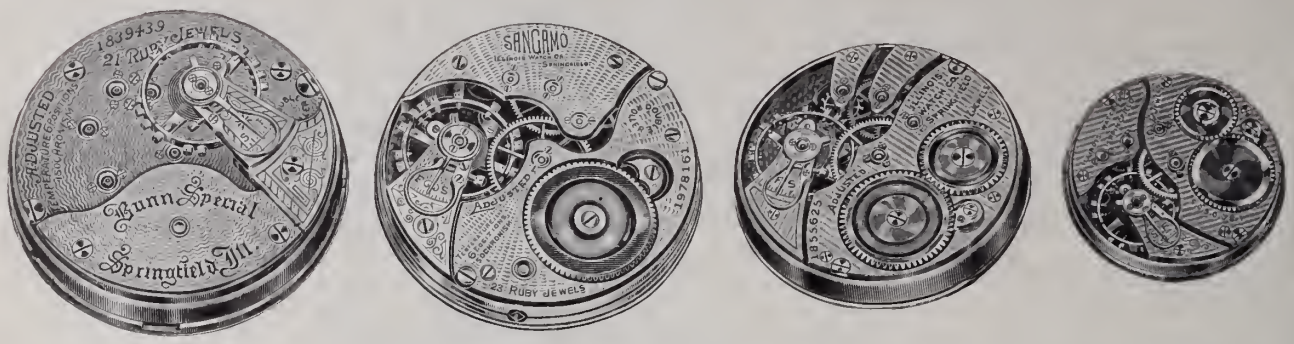
Charles H. Tibbits has been made chairman of the committee to purchase more land for the fire department, in Wallingford.

Wm. Park, foreman of the plating department of Factory "E," International Silver Co., Meriden, left recently, with his wife for a six weeks' trip to Scotland.

Charles Johnson, who for over 35 years has been in the employ of the American Silver Co., Bristol, was buried from his home at Plainville, April 11. The deceased died in the New Britain Hospital, after a short illness of intestinal trouble. He was 72 years of age.

Estimates are being made for the building of a new factory and storehouse for the E. Ingraham Co., Bristol. The building wil be of brick, 75 by 60 feet, and four stories high.

George Lewis, who for over 40 years was in the employ of the E. Ingraham Co., Bristol, has just retired from active business. He entered the employ of the concern as a day laborer and gradually advanced to the superintendency of the movement department.



U. T. Harrison, for several years in the employ of the Forbes Silver Co., died recently at his home in Northford, of a complication of diseases. Mr. Harrison was 54 years of age. He at one time represented North Branford in the General Assembly and was a past-master of Corinthian Lodge, A. F. and A. M.

The Standard Electric Time Co., Waterbury, has decided to leave that place and locate in Foxboro, Mass. The company will sell its present factory at 23 Jefferson St., Waterbury, and the work of moving the machinery to the new location will be completed, it is expected, by June 1. The concern has agreed to take the Waterbury employes to Foxboro.

The excavation for the new addition to the plant of the Barbour Silver Co., on Colony St., Meriden, was started last week. The plans call for the erection of a building four stories high, 43 by 120 feet, of modern mill construction, well ventilated and lighted. There will be a connecting building with the old factory with fireproof staircase and a fireproof bridge connecting each floor. Another addition will be erected on the George St. side to be used as a casting shop. The annealing room of the old building will be remodeled.

Roland S. Kolb, of the Parker, Kolb Co., which formerly conducted a jewelry store in the Arcade, Bridgeport,, was the principal witness in the Civil Superior Court on the morning of April 14, when the suit of Clarence D. Anderson against Dwight A. Parker and others had a hearing. It is claimed that in June, 1907, Mr. Kolb had borrowed $1,200 from Anderson and gave a number of diamonds as security. The articles were then said to be worth $1,255, but the plaintiff says he afterward learned that they were worth only $600 and the money loaned had not been paid, and the plaintiff asked for damages. On the stand the witness declared that he made no statement to Mr. Anderson which he did not believe to be true. The diamonds, it was asserted, were purchased from Isaac Bush, now located in New York. Dwight A. Parker was also a witness and testified in regard to purchasing the diamonds from Brush who, he said, sold them at less than their actual value in order to render a favor to the defendants. A late dispatch announced that the case was decided in favor of the defendants, the Parker, Kolb Co., by Judge H. J. Curtis.

L. L. Peddinghaus, Marietta, O., is making extensive improvements in his store on Front St.

Vol. LX. CHICAGO, WEDNESDAY, APRIL 20, 1910. No. 12.

Chicago Notes.

A. G. Schwab, Cincinnati, O., was a visitor here last week.

L. H Schafer has returned from a business trip to Michigan.

G. A Le Roy, of the Western Clock Mfg Co., was here last week.

Geo. Weidig, of Joseph Fahys & Co., visited Cincinnati, last week.

S. Wechter, of S. Wechter & Co., will sail for Europe in a few days.

Diamond men here, last week, were: Cy. Price, S Lindenborn, J. Grocn.

W. S Hyde, formerly of Geo. E. Marshall, is in California for his health.

S. E Eppenstein, of the Illinois Watch Case Co., is on a trip to New York.

Ben Hammond, of the Bell Jewelry Co., San Antonio, Tex., was here this week.

Claud Seymour, of Otto Young & Co., is back from a month's trip to California.

Henry Lederer, of Henry Lederer & Bro., Providence, R. I., was here last week.

James Donnelly, Pacific Coast traveler for Sproehnle & Co., has returned to Chicago.

Mr. and Mrs. J. T. Brayton have opened their Summer home near Burlington, Wis.

J. F. Kiser, of the Muncie Jewelry & Plating Works, Muncie, Ind., was here last week.

L. W. Williams, representing Theo. W. Foster & Bro. Co., is back from a trip through Iowa.

F. C. Gerbing, engraver, will move, May 1, from 78 State St. to room 1508 in the Masonic Temple.

Roy I. Daniels, representing Max Deutz, has removed from room 1020 to room 1608, Republic building.

E. S. Miller, formerly jewelry buyer for Loftis Bros. & Co., is now connected with George E. Marshall.

R. Isaacson, manufacturing jeweler at 78 State St., will remove May 1 to room 1508 in the Masonic Temple.

Chas. Hoefer, of the Woodstock-Hoefer Watch & Jewelry Co., Kansas City, Mo., spent a day here last week.

A. Hirsch, accompanied by his wife, son and daughter, will sail for Europe on the *President Lincoln*, April 23.

During the absence in Europe of Max Noel, of Despres, Bridges & Noel, his territory is being covered by A. B. Troeger.

Hugh E. Krug has returned from the east and is now on a visit to the factory of Fessenden & Co., Providence, R. I.

Chas. T. Wittstein & Co., jewelry jobbers, have removed from the Columbus Memorial building to room 1308 in the Champlain building.

William Selig, representing Martin Mayer, manufacturer of fine jewelry, at Mayence, Germany, was here, last week, calling on the trade.

No adequate bids having been received for the assets of the Trinity Clock Co., the court has authorized the receiver to sell the estate at public auction.

A. L. Sercomb, Chicago manager of the International Silver Co., has returned from a two months' trip to California, accompanied by Mrs. Sercomb.

Albert Mayer, of Joseph Mayer & Bros., Seattle, Wash., passed through here, last week, on his way home from a four weeks' trip east Mrs. Mayer accompanied him.

T. L. Combs, president of the Nebraska Retail Jewelers' Association and member of the executive committee of the A. N. R. J. A., paid a visit to Chicago last week.

Harry E. Farquaharson, 42 Madison St., will represent Leary & Penfold throughout the west to the coast. He will also represent E. D. Gilmore & Co., of Attleboro.

News was received here, last week, of the sudden death of W. F. Smith, jewelry jobber of Des Moines, Ia. The news was a great shock to Mr. Smith's friends here.

Frank Newcomb, northwest traveler for the M. S. Fleishman Co., who was operated on four weeks ago for appendicitis, has entirely recovered and is now again on the road.

John Warren, with the Elgin National Watch Co., has returned from a 10 days' trip to Minneapolis and St. Paul. J. H. Carr has recently been engaged by the Elgin Co. to travel.

A telegram from New York, last week, apprised E. V. Wendell, of the Western Watch Case Mfg. Co., of the fact that he was a grandfather, a son having been born to his daughter, Mrs. Gans.

Emile Homberger has severed his connection with the American Swiss Watch Co. and is now in Europe on business connected with a new Swiss watch company, which will soon open in New York.

The firm name of M. A. Pokras & Co., manufacturing jewelers, in the Masonic Temple, has been changed to Pokras Bros. The personnel remains the same, the firm being composed of J. and M. A. Pokras.

Kreis & Hubbard, who make a specialty of umbrellas for the jewelry trade, will open a New York office in the Silversmiths' building, on July 1. J. H. Ott, southern representative of the company, will be in charge.

The Kandler school of engraving will move, this week, from 1104 Heyworth building to suite 1830, 1831 and 1832 in the McCormick building. Mr. Kandler will conduct a jewelry and art shop in addition to his school.

Dr. C. L. Morris, traveler for F. W. H. Schmidt, was in the Julien Hotel at Dubuque, Ia., when it caught fire recently. Dr. Morris had a close call, but managed to climb down the fire escape from the fourth floor.

Alvin Stern and Frank Kiss were arrested in Pittsburg, last week, on complaint of State's Attorney Wayman, who charged them with obtaining jewelry to the value of $700 from J. S. Townsend, 1554 Wabash Ave.

J. Ziegler, of J. Ziegler & Co., is ill at the Luther Hospital at Eau Claire, Wis. While on one of his business trips Mr. Ziegler was taken ill with the grippe. It is reported that he is doing well and will soon be able to continue his trip.

J. R. Chapman, Oshkosh, Wis., was here, last week, on business pertaining to the new store of J. R. Chapman & Co. The new location is across the street from the old one, and the store will be modern in every particular. The store, which is 124 feet long, will be fitted in solid mahogany and will be fully equipped with an optical room, a diamond room and a complete manufacturing department. The opening will take place June 1.

J. A. Lucas, one of the best known jewelry salesmen in Chicago, died, April 11. Funeral services were held with Masonic rites from Boydston's Chapel on the 14th, the remains being afterward cremated and sent to his native town, Provincetown, Mass. Mr. Lucas was long a sufferer from rheumatism and this eventually led to his death. He came to Chicago about 20 years ago, representing T. I. Smith & Co. Before his death he represented A. H. Bliss & Co. and A. Bushee & Co.

Among the out-of-town retail jewelers here, last week, were F. A. Marcan, Belvidere, Ill.; R. J. Taupert, East Las Vegas, N. Mex.; Henry G. Goldsmith, Davenport, Ia.; John P. Hess, Fond du Lac, Wis.; E. Thayer, Rockford, Ill.; T. L. Combs, Omaha, Nebr.; Carl Oesterle, Joliet, Ill.; Mr. Richards, of the Maschmeyer-Richards Silver Co., St. Louis, Mo.; T. J. Dale,

Kenosha, Wis., and W. J. Taylor, Ord, Nebr.; Arthur Rovelstad, Elgin, Ill.; Hal B. Smith, Logansport, Ind.; P. S. Harris, of the Harris-Goar Co., Kansas City, Mo.; J. H. Ramsey, Aledo, Ill.

Stockholders of Butler Bros., Inc., wholesale dealers in general merchandise, approved at their special meeting, last week, the financial plan formerly outlined. Every share of the $4,500,000 stock was represented in the meeting. The capital is to be increased $5,500,000 to a total of $10,000,000. Of the new issue, $3,150,000 will be distributed as a stock dividend to present holders, and $2,250,000 will be sold at par. A balance of $100,000 will be retained in the treasury to be distributed among deserving employes at private terms. Of the stock to be sold at par, $50 a share will be payable May 2 and $50 on Feb. 11, 1911. Butler Bros.' shares are quoted in the local market at 460 bid and 470 asked.

Clarence E. Conley was arrested here last week charged with an attempt to defraud Benj. Allen & Co. out of some diamonds. One day last week a boy presented the business card of a retail jeweler, Joseph O. Lane, 76 E. 31st St., on the reverse side of which was a written order for some diamonds. Manager John Cox telephoned Mr. Lane, who pronounced the order a forgery. The police were then notified and the boy was held until they arrived. He was then followed, and when Conley saw the officers he ran until he was caught, a few blocks away, after several shots were fired at him. He claimed the card was given to him by another man for him to present, but that he was afraid to do so and hired the boy instead. He proved a prior good character and was discharged.

Omaha.

T. L. Combs & Co. have resumed the remodeling of their store, having just concluded a special sale.

Fred Brodegaard and wife have returned from a two weeks' trip spent in Chicago, Buffalo and New York.

Mr. Hastings, Central City, Nebr.; Alfred Christofferson, Wausa, Nebr., and Mr. Scarr, Portsmouth, Nebr., were in Omaha, last week, purchasing stock.

Mr. Sorenson, Viborg, S. Dak., has purchased a half interest in a store at Kimballton, Ia., and was in the city, last week, purchasing stock. Mr. Sorenson leaves shortly for a two months' trip abroad.

Last Saturday a reunion of the A. F. Smith Co's traveling representatives was held here. The following left, Monday, on their respective trips: Harry Fluer, for the Pacific Coast; J. H. Krone, southern Nebraska; J. P. Byrne, northern Nebraska, and Ferd Smith, western Iowa.

The following traveling representatives called on the Omaha jewelers, last week: H. C. McConnell; D. L. Nesler, Gray-Howes Co.; a representative of J. Bulova Co.; W. R. Berth, Wm. B. Durgin Co.; W. E. McCray, Bullock Mfg. Co.; John P. King, Watrous Mfg. Co.; P. H. Winterberg, Louis Manheimer & Bros.; Frank T. Barton, Geo. W. Steere Co.; Chas. E. Lochner, Hayes Bros. Co.; W. F. Adams, Simpson, Hall, Miller & Co.; Chas. F. Washburn, Wm. Rogers; R. A. Talbot, Alvin Mfg. Co.; Mr. Goldberg, J. J. White Mfg. Co.; Henry Hoffa, Hodenpyl & Walker; C. H. Davison, Kohn & Co.; Mr. Hirsch, Leon Hirsch; T. W. Agnew, New Haven Clock Co.; Hubert Somborn, Bawo & Dotter; Rudolph Schweiger, H. Z. & H. Oppenheimer; F. B. Newburger, Chas. Keller & Co.

Denver.

W. W. Hamilton, of W. W. Hamilton Jewelry Co., has left for a short business trip.

David Davis has returned from a five weeks' rest at the Boulder Sanitarium, much improved in health.

M. G. McQueary, Dexter, Colo., and P. P. Clotworthy, Estes Park, Colo., were in town last week calling on the trade.

Wm. Crocker, of Cunningham & Crocker, Silverton, Colo., was in town last week, accompanied by his wife on the way east.

The following jewelers visited Denver, Colo., last week: Morris Bolock, Hot Springs, S. Dak.; Henry Curtis, Jr., Littleton, Colo.

Abe Heitler, of J. C. Bloom & Co., who is spending several weeks in Hot Springs, Ark., is very much improved and will be ready to return to business in a couple of weeks.

The following representatives called on the trade here last week: Samuel Newhouse; Mr. Donnaly, Sproehnle & Co.; Mr. Dana, Riker Bros.; Mr. Newberger, Chas. Keller & Co.

M. D. Goldner has taken a position with C. H. Clark & Co., of this city. Mr. Goldner was formerly with C. C. Stone & Co., Ft. Collins, Colo., and came originally from Birmingham, Ala.

N. C. Neilson, now with the Boyd Park Jewelry Co., will take a position with the firm's Salt Lake store, after a two weeks' vacation. O. T. Hoberecht, with this firm, has been engaged by J. I. Hansen.

Sam Hirst, Pueblo, Colo., has opened a new branch store at 205 N. Main St., in that city, and put in a new line of stock and fixtures. The store is conducted under the name of the Crescent Jewelry Co.

Wolfe Hansen, head watchmaker with the Boyd Park Jewelry Co., of this city, will take a position with Michael O'Keefe & Co., May 11, owing to Boyd Park's closing out. Mr. Hansen was previously employed by Mr. O'Keefe until he went over to Boyd Park, where he has remained for about three years.

A balance truing class was started Monday evening, April 11, by the Colorado Horological Society, and much interest is being shown. About 15 students began, under the supervision of E. Sunelman, who was for several years with the Hamilton Watch Co., and now occupies a position with A. J. Stark & Co., of this city.

H. Weinberg, 1715 Lorimer St., received a severe shock April 12, when, upon visiting his basement he found his son, Cyril, lying on the floor in an unconscious state. The young man had been working in the basement near a tank of gasolene which had sprung a leak and, not thinking of the deadly effect of the fumes, was soon overcome. The victim was soon revived after medical attention.

Minneapolis.

A. E. Paegel attended the gathering of the Mystic Shrine in New Orleans last week.

M. C. Alford, Huron, S. Dak., with his bride, visited this city last week on his return to Huron.

Paul Erickson, with the Reed-Bennett Co., in the northern territory, was in this city during the past week.

Peter Alstad, formerly with White & MacNaught, Minneapolis, has entered the employ of Mr. Wooley, St. Paul.

R. M. Horr, who has bought the Meyers business at Lemmon, S. Dak., has been in the Twin Cities buying stock for his new enterprise.

W. R. Cooper, of S. H. Clausin & Co., attended the annual conclave of the Mystic Shrine at New Orleans and visited Chicago on his return.

M. L. Cohen, of M. L. Cohen & Co., who has been traveling through the south for the past two months, is expected to return to Minneapolis next week. Louis Marker, salesman for the firm, is confined to his home by injuries he sustained in a recent accident.

The following traveling representatives visited Minneapolis during the past week: Paul Smith, Roger Williams Silver Co.; Mr. Gibson, Gibson-Krugler Co.; Mr. Lawrence, Reed & Barton; Mr. Wilcox, International Silver Co.; Judas Hermann, Hermann & Co.; A. H. Cohen, A. H. Cohen; Mr. Gallagher, Sproehnle & Co.

After an absence of three months, due to a severe attack of rheumatism, William Cohen is back in the store of L. J. Wolk & Co. During his illness Mr. Cohen visited the springs at West Baden in Indiana, and later went to Shakopee, Minn., where he took mud baths at the Mudcura sanitarium. He derived much benefit from the latter and is now in good health.

The T. M. Roberts Co-Operative Supply Co., Minneapolis, which carried a line of jewelry and watches, was recently declared a bankrupt by a jury in the United States court at Minneapolis. Suit was brought by creditors of the concern. The company demanded a jury trial and, while admitting liabilities of about $250,000, claimed to have assets in excess of this amount. It failed, however, to convince the jury.

M. L. Cohen & Co., 29 Washington Ave. S., have adopted a unique form of advertising. In his younger days Joseph Cohen had a fad for collecting old coins and made an extensive collection. In going through his safe the other day he ran across a number of paper bills of denominations ranging from three cents to $4, such as were in use prior to 1863, in the United States. These he placed on exhibition in one of his show windows, where they are attracting considerable attention. Later he proposes to exhibit a number of ancient gold, silver and copper coins in the same way.

I. G. Vanzandt, Jonesboro, Ill., has removed to Puxico, Mo.

B. H. Prowell, Marietta, Pa., has purchased the stock and fixtures of the late S. R. Stibgen, on Market St., at that place

Los Angeles.

Ed. Turner, of the E. W. Reynolds Co., has gone on a business trip to Arizona.

Hambright & Walsh have engaged Mr. Van Buren, formerly with H. F. Wallace, to visit the city trade for them.

Wm. M. Kinney has been kept away from his store for a number of days on account of the serious illness of his father-in-law.

S. B. Bailey has inaugurated the plan of having a special sale every Monday, offering at reduced rates one or two special articles.

Wm. Petry is now doing business in his new location, rooms 905 and 906 Broadway Central building. He is well pleased with the new place.

H. A. Curry, who recently bought out R. H. Schwarzkopf, is now located in the Westminster Hotel, where he will probably maintain his headquarters hereafter.

Hambright & Walsh, who are now getting settled in their enlarged quarters, will have their business office in the room in the rear, formerly occupied by Schwarzkopf & Penniman.

Mark Williams, head shipping clerk for the E. W. Reynolds Co., has been compelled to go to the hospital to have an operation performed. Walter Lawrence, his assistant, takes his place.

Wm. H. Lessner, formerly in the Whitley Jewelry Co.'s manufacturing department, who not long ago opened a store on W. 3d St., between Spring and Broadway, has discontinued business.

Out-of-town jewelers who have been in the city recently include: L. C. Sawin and M. J. Kaliher, Whittier; A. E. Springborg, Redlands; J. H. Padgham, Carl G. Strock, Santa Ana, and T. L. Finch, Covina.

A. F. Baranger, traveling salesman for H. F. Wallace, has just returned from a trip through Arizona, New Mexico and as far as Trinidad, Colo. He will soon start out again for an extended trip up the coast.

Traveling representatives in Los Angeles, recently, include: Henry H. Jacobson, Jacobson Bros.; John O. Slemmons, J. B. Bowden & Co.; W. L. Mason, Hayden W. Wheeler & Co.; A. W. Bennett, W. E. Graves; Mr. Talbot, Lewis Mfg. Co.

Arthur Turner, traveling salesman for the E. W. Reynolds Co., has returned from his wedding trip to San Francisco and is now in his new home. Among the handsome presents given at the time of his wedding was one from the employes of the E. W. Reynolds Co.

H. W. Byron, a jeweler at 226 Mercantile Pl., reported to the police, a few days ago, the robbery of his show window. He stated that during the night a thief threw a stone through the glass, shattering it, and then stole five small diamond rings. The loss does not aggregate more than about $75 on the rings and a similar amount on the plate glass.

Samuel and Simon Pearlin, recently sentenced to seven and five years, respectively, in the penitentiary and released on probation, are now working, in accordance with the conditions imposed by the court, for H. Blumkin. Paying at the rate of $50 a month as required by the court, it will take them over four years working steadily to pay off their indebtedness.

A shrewd swindler named James A. Woodbury recently got the better of the Whitley Jewelry Co. to the extent of $393, the amount of a fraudulent check passed upon them. Two or three banks and several other business houses were also victims of the same man. Woodbury has disappeared. He leaves a wife here, to whom he was married but a short time ago. She promptly returned a diamond which he had bought and given to her.

M. R. Thomas, 404 W. 7th St., has sold his business to F. C. Dukeman. Mr. Thomas has been in the jewelry business here for the last 10 years, and close application has worn on his health. He intends to take an outing with his wife in the mountains for a time and afterward return to this city and engage in the money-loaning business. Mr. Dukeman has for several years past been engaged in the jobbing business with his brother, E. B. Dukeman, with offices in the O. T. Johnson building.

Mr. McKinley, manager of the stationery department of Brock & Feagans, designed and furnished to the committee in charge of the banquet of the Hotel Men's Mutual Benefit Association of the United States and Canada, a decidedly unique souvenir. It consists of a miniature suit case about six inches by three by one and a half, and complete in every detail. It is made of fine imported Japanese wood mounted with the finest of brass fittings and lined with fine satin. Inside this is placed a finely engraved booklet giving the date and occasion of the banquet, the menu, toasts and names of speakers. The front cover shows at one end an old-time inn with guests arriving by stage coach. In contrast with this, on the opposite end is a thoroughly up-to-date hotel with all modern improvements. The case is so made that when the booklet is removed it can be easily used as a jewel case. Three hundred of these souvenirs were furnished.

Milwaukee.

A. A. Goetz, Mukwonago, Wis., has made several improvements in his store. His quarters have been remodeled, a new safe has been installed and the stock enlarged.

Fred L. Schultz, Cambria, Wis., has leased the E. O. Roberts store and will move his stock into the new and larger quarters, May 1. New cases and new fixtures will be installed.

Rudolph Steller, formerly located at 1048 Teutonia Ave., is now located in a newly completed building about a block from his former location. The new quarters are much larger and better lighted. New cases and new fixtures have been installed, and Mr. Steller has enlarged his stock.

Something novel in the way of ring settings is being displayed by Norman Whiteford, a former jeweler of Chicago and now a pearl fisher in Wisconsin. Mr. Whiteford recently caught a 6-pound muskallonge, gouged out an eye, petrified it by a secret process and now has it set in a ring.

O. S. Swenson, of Holty & Swenson, Menasha, Wis., has purchased the interest of M. N. Holty and is now conducting the business under his own name. Mr. Holty, who retired because of ill health, will probably locate at Chicago. Mr. Swenson and Mr. Holty had been in partnership for about a year.

Pacific Coast Notes.

B. Frese, Lemoore, Cal., has purchased a lot at that place and is having a building erected for his store.

On Tuesday, April 12, Clarence P. Jacobs, Vallejo, Cal., celebrated his first anniversary in business at that place.

The new building being erected for F. Schneider's store at Riverside, Cal., is about completed and will be occupied some time this month.

E. H. Smith, who came to Orange, Cal., recently, from Indiana, has opened a store at that place. He is showing in his window a mastodon's tooth that is attracting a great deal of attention.

Since taking over the business of D. S. Binford, at Whittier, Cal., Lee C. Sawin has made a number of substantial improvements and has greatly increased his stock. New machinery has been installed in the repair department, and this is being made a feature of the business.

The San Diego Gem Co., San Diego, Cal., has just received its first shipment of art craft jewelry from the Chicago Art Craft Shop. The company does its own mining and ships the gems to Chicago, where the metal workers fashion a separate and distinct mounting for each stone.

The experiment is being tried at Monterey, Mexico, of closing the jewelry stores there on Sunday, a decided departure from the present custom, and it is believed that the plan will prove to be successful, as the leading firms in the business have signed the Sunday closing agreement.

B. F. McMurray, Hanford, Cal., has purchased the stock and business of H. C. Chute, Tulare, Cal., and has already taken charge of this store. Mr. McMurray has been in the employ of A. E. Gribi, Hanford, for the past three years as watchmaker and jeweler, and has had much experience in this line. Mr. Chute is planning to make a trip to Mexico to look over that country.

J. Jessop & Sons, San Diego, Cal., have begun the excavation for a $15,000 building at the southwest corner of 6th and B Sts. The block is to be of brick and reinforced concrete construction. It is being built for rental purposes. Jessop & Sons expect to remain in their present location and not occupy the new structure themselves. The sum of $80,000 was paid for the site, which is 100 by 100 feet. Armand Jessop, a member of the firm, has been reelected a member of the board of directors of the Coronado city public schools. He has served one term previously.

The Illinois State Jewelers' Association convention will be held in Springfield, May 24, 25 and 26. Arrangements have not been completed for the entertainment of the 300 delegates and members that are expected to attend, but it has been decided to hold a big banquet at the St. Nicholas Hotel the last night of the convention. Speakers of prominence in the trade will address the meetings. The afternoons will be devoted to sight seeing. Ladies who accompany the delegates will be entertained. The convention headquarters will be in the St. Nicholas Hotel.

St. Louis.

William Mark has moved his store from 1105 Olive St. to 916 Olive St.

B. Stiffelmann, of M. Stiffelmann & Co., will leave, next week, on a trip to St. Paul.

W. J. Beard has gone on a trip through Missouri, Illinois and Iowa for the Aller-Wilmes Mfg. Co.

W. A. Gill will open a diamond store, May 1, in the Gill building, at Broadway and St. Charles St.

August Schaller, watchmaker for Frank W. Baier, is still confined to his home by an attack of eczema.

Samuel E. Bamber, of the Hess & Culbertson Jewelry Co., has returned from a business trip to New York.

E. A. Schoenle, of the Maschmeyer-Richards Silver Co., has just returned from a trip through the Southwest.

Frank Dexter, a new traveling salesman for the Earl Pearl Works, is getting acquainted with the St. Louis trade.

J. K. Hydar, of the Brooks Jewelry & Optical Co., will leave in a few days on a trip through Michigan and as far as Canada.

Herman Mauch and his wife, and a party of friends, spent several days, last week, at the Oasis Club, on the Illinois River.

Frederick W. Haverkamp, of the Elliott Jewelry Co., returned from a week's vacation, which he spent visiting relatives at Troy, Mo.

M. T. Graham, Fort Smith, Ark., came to St. Louis last week, by way of Nashville, Tenn., to call on St. Louis manufacturers and jobbers.

A. Maschmeyer, of the Maschmeyer-Richards Silver Co., has gone to New Orleans on a vacation trip. He will be gone two weeks.

Dan Golding is conducting an auction at the store of Ball & Putnam Jewelry Co., Joplin, Mo. It started last week and is proving successful.

Louis Kurtzeborn, formerly associated with his father and brothers in the jewelry firm of A. Kurtzeborn & Sons, has gone into the automobile business.

E. C. Weidlich, Bridgeport, Conn., spent a few days here with his brother, William Weidlich. He went from here to Chicago, but will return in about three weeks.

Al. P. Wolff, traveler for the Elliott Jewelry Co., returned from a trip through Illinois and has gone to his old home at Evansville, Ind., for a week's vacation.

Albert Weyl will move his store from 1005 Pine St. to 205 N. 7th St., the building occupied by Mannie Levy up to the time of his failure a few weeks ago.

F. W. Drosten, president of the Frederick W. Drosten Jewelry Co., left Saturday night for Oklahoma to look after his investments in oil and timber lands in that region. He will return in a few days.

Thomas Humphreys has purchased a touring car. Mr. Humphreys was last week elected a vestryman of Trinity Episcopal Church, but on account of pressure of business felt compelled to decline.

On Thursday, the citizens of St. Louis will present to Jack O'Connor, Captain-Manager of the Browns, an exceptionally fine loving-cup. It is the product of the Hess & Culbertson Jewelry Co.

Theodore Eagle, who has been in business for over 25 years at the same location, the northwest corner of Broadway and Walnut St., is preparing to move into the Lincoln Trust building at 7th and Olive Sts.

George Oberting, of the Blankenmeister-Oberting Jewelry Co., has returned from a trip through Kansas and Nebraska and George Oberting, Jr., has returned from a trip through Kentucky, Tennessee and Missouri.

In bankruptcy proceedings pending against Mannie Levy, the trustee, has waived the examination of the bankrupt. Morris G. Levinson has filed a claim with Referee in Bankruptcy Coles for $75 attorney's fee.

The stock of the Levy Jewelry Co., which was sold at auction after bankruptcy proceedings were begun and bought by S. Ruby, is being offered for sale by Mr. Ruby at his store on 6th St., near Washington Ave., at reduced prices.

Oscar Blankenmeister, secretary of the Blankenmeister-Oberting Jewelry Co., has been appointed one of the official umpires of the Interstate Baseball League. Mr. Blankenmeister has played on several semi-professional teams in past seasons.

Goodman King, president of the Mermod, Jaccard & King Jewelry Co., has been appointed by Mayor Kreismann a member of an executive committee that is to make arrangements for the National Farmers' Convention that is to be held here, May 2 to 8.

Charles Hennkens, of Dorio and Hennkens, watch case makers, 317 Olive St., who went to Cincinnati recently for his health, has been operated on there and reports received by friends in St. Louis are that he is doing well and expects to be able soon to return here.

Edward Bornmueller, of the L. Bauman Jewelry Co., and Louis Kurtzeborn went to New Orleans to attend the annual meeting of the Mystic Shriners. Herman Mauch intended to go, but was unable to get away because he was serving on a jury in the United States Court.

The E. Dienstbier Jewelry Co., which has moved from Broadway and Pine St. to 6th and Locust Sts., has one of the prettiest little stores in the city and is extremely well satisfied with the change. In the new location the firm has a much larger and more attractive store than in the old.

John G. Pfeffer, father of O. J. Pfeffer, president of the St. Louis Clock & Silverware Co., died Thursday at his home, 3919 Nebraska Ave., aged 87 years. He was a veteran builder of church organs and was credited with having built more of them than any man in the West. He had been a resident of St. Louis 52 years.

Herman Mauch is chairman of a committee that is arranging for a steamboat excursion to the annual State encampment of the Knights Templar, to be held at Hannibal, June 24 and 25. The steamboat Cape Girardeau has been engaged for the trip. It will leave St. Louis on the 23d and return on the 26th. Many St. Louis jewelers are members of the organization, and most of them are expected to go.

E. Maritz has filed with the Secretary of State an application to have the name of the Maritz-Kober Jewelry Mfg. Co. changed to the Maritz Jewelry Mfg. Co. Samuel Kober, formerly secretary of the company, is no longer actively connected with it. The company is installing a set of heavy show cases in order to make a display of its manufactered products.

H. Estinghausen, president of the Attleboro Jewelry Co., returned Friday from a 10 weeks' trip to Old Mexico. He found business conditions in that country not as good as in former years, but improving. The number of jewelry stores in the country has greatly increased in the last year or two. Mr. Estinghausen will remain in St. Louis for a few weeks.

William Weidlich & Bro. have added two traveling salesmen to their field force. L. E. Puellman, until lately with the Mermod, Jaccard & King Jewelry Co., went out Thursday on a trip through Missouri and Iowa. H. H. Markley, who has been associated with his father, E. Markley, in the jewelry business at Marianna, Ark., is getting ready to go out for the Weidlichs through Illinois and Kentucky.

Amos Rogers, watchmaker for F. H. Niehaus, has returned from Madisonville, Tenn., where he went to attend the funeral of his father, Dillon Rogers, who had been in the jewelry business there for 20 years. Another son is Dillon Rogers, Jr., who is taking a graduate course in optics at the Northern Illinois College at Chicago. The business will be continued by Frank Rogers, a third son, who had been associated with his father.

Diamonds owned by I. M. Kosminsky, bankrupt, formerly in business as the Rose Jewelry Co., on Franklin Ave., between 6th and 7th, were offered at auction at 513 Olive St., Thursday, by A. C. Wilson, the trustee. The highest bid, made by Thomas Humphreys, of the Lucios Jewelry Co., was $1,300. As the stones had been appraised at $2,600 all bids were rejected. Mr. Humphreys will look over the diamonds and may increase his bid to a point that will meet the approval of the court.

It is expected that at least 10 St. Louis jewelers will go to the annual State convention to be held in Kansas City, in June. It is not known yet who they will be. The desirability of sending at least that number was suggested at the last meeting of the St. Louis association and members were urged to lay their plans to go. The following have been named by President Joseph Ebeling as official delegates of the association: Herman Mauch, Otto Buder, John F. Zettler, Joseph Ebeling and E. C. Zerweck.

Charles S. Stifft, one of the owners of the Reynolds-Stifft diamond mine in Pike County, Ark., who has been in St. Louis disposing of stock in the company, says that the Arkansas field is larger than the Kimberly mines and is almost as large as the combined Kimberly, De Beers, Dutoits and Bulfontein mines in South Africa, and he says he believes it to be even richer. He has been exhibiting in St. Louis a large number of diamonds which he says came from the Arkansas field. They are in all colors, from pure white to almost black.

In response to requests from many jewelers the officers of the Retail Jewelers' Association of St. Louis have under consideration a plan for giving a steamboat excursion on the Mississippi River in June, for jewel-

ers and their friends. An option has been taken on the excursion steamer *City of Alton* for an open date. The proposition was discussed at the last meeting of the association, at the Jefferson Hotel, but action was deferred to the next meeting. It is practically certain that the excursion will be given, and if it is given it is even more certain that it will be a success.

Among the out-of-town jewelers here during the past week, were: T. H. Edwards, Clarksville, Mo.; Jacob Bersche, Waterloo, Ill.; E. Zimmerman, Stonington, Ill.; L. A. Holdener, Belleville, Ill.; C. F. Gardner, Sorento, Ill.; Al. Gerber, Edwardsville, Ill.; C. S Scanlin, Indianapolis, Ind.; C. S. Stifft, Little Rock, Ark.; N. P. Jensen, Marissa, Ill.; B. Massie, Granite City, Ill.; M. T. Graham, Fort Smith, Ark.; Fred Herold, Jerseyville, Ill.; W. H. Jahn, Pacific, Mo.; W. D. Davis, Granite City, Ill.; August Kalbitz, Jr., Red Bud, Ill.; F. O. Leidel, Troy, Ill.; William Nulland, Bolton Jewelry Co., Fulton, Mo.

St. Louis pawnbrokers are going to try to have the courts reduce their assessments. Seven of them, the Michaels Loan & Mercantile Co., the Friedman Loan & Mercantile Co., the Central Loan Co., B. Barnett & Co., S. Van Raalte & Co., William Kranke and Julius L. Freund, applied to the Circuit Court, Saturday, for a writ of certiorari against the Board of Equalization and asked that the records of the Board of Equalization and of the assessor's office be brought into court for review. They state that they made their returns at 70 per cent of their valuations and that the board of assessors have increased them arbitrarily.

If a man comes into a jewelry store, orders a fob and is given another one to wear until the one that he has ordered arrives, and there is delay in the arrival of the one ordered and when it comes it is not satisfactory, and in the meantime the loaned fob has been worn out, there is nothing coming to the jeweler, according to a decision of Justice Brady of East St. Louis, in the suit of the Zerweck Jewelry Co., of East St. Louis, Ill., against J. T. W. Rudesill for 75 cents, the value of a fob loaned to Rudesill while one priced at $3.50 was coming. The decision of the justice in Rudesill's favor was on the theory that it was not his fault that the long delay resulted in the fob being worn out.

Among the traveling representatives in St. Louis during the past week, were: C. B. Bartlett, Whiting Mfg. Co.; Mr. Curran, A. J. Hedges & Co.; W. G. Moland, Sansbury & Nellis; F. J. Spellman, New England Watch Co.; Mr. Berth, William B. Durgin Co.; C. H. Davison, Kohn & Co.; Charles E. Lochner, Hayes Bros. Co.; W. C. Barry, Barry & Co.; C. P. Young, Whiteside & Blank; A. J. Parker, Osmun-Parker Mfg. Co.; John P. King, Watrous Mfg. Co.; William Roman, Manasseh, Levy & Co.; Thomas E. Rogers, Riker Bros.; George H. Thomas, Scharling & Co.; J. Mayer, Mauser Mfg. Co.; John A. Herschede, Herschede Hall Clock Co.; W. R. Shute, Day, Clark & Co.; Joseph J. Sideman, Redlich & Co.; E. H. Eckfeldt, Eckfeldt & Ackley; Albert E. Motteram, Frank M. Whiting & Co.; Joseph Guntzburger, I. Guntzburger & Son; Rodney B. Carr, Wordley, Allsopp & Bliss Co.; Frank E. Wallis, T. W. Adams & Co.; Mr. Powell, S. C. Powell & Co.; Jerome M. Lissauer, Arnstein Bros. & Co.; Mr. Rutherford, Taylor & Co., Inc.; Frank L. Wood, Ludwig Nissen & Co.; A. T. Teague, Link & Angell; W. H. Osborne, R. Wallace & Sons Mfg. Co.; Mr. Fisher, Furbish, Swift & Fisher; W. S. Metcalf, Plainville Stock Co.; Fred H. England, Frolichstein, England & Klein, Inc.; G. Rodenberg, J. A. Dunn & Co.; Lee Powell, S. O. Bigney & Co.; George S. Benedict, Rochester Spectacle Co.; G. Fred Perry, F. H. Sadler Co.; H. J. Hildebrand, H. C. Lindol & Co.; Alfred E. Hughes, Bishop Co.; Mr. Meyer, I. N. Deitsch, Frank Dexter, Earl Pearl Works; Joseph Rifkin, L. Heller & Sons; Jacob Marks, Kossuth Marks & Co.; A. S. Warmwood, Illinois Watch Co.

Kansas City.

D. V. Warren, Pretty Prairie, Kans., is taking an optical course in this city.

H. R. Berger has moved his stock of jewelry from Brisbee, Ariz., to El Paso, Tex.

Mr. Carpenter, of Bevan & Carpenter, Haviland, Kans., is in Kansas City studying optometry.

Edward Stone, formerly of Blue Rapids, Kans., has purchased the store of W. M. Meeks, Artesia, N. Mex.

Steve Smith, representing Nevin Bros., and others, left this city, last week, for a visit to his Missouri customers.

C. W. Brocaw, Carmen, Okla., notified the trade here, recently, that his safe was blown open the night of April 2.

Fred Cateron, Nebraska representative of the C. B. Norton Jewelry Co., has been in the home office several days of last week.

C. G. Chapman, of the watch repairing department of J. R. Mercer, was in New Orleans, last week, with the rest of the Shriners.

Silberberg Bros., El Paso, Tex., have just moved into their new store building, which is equipped with new fixtures and show cases.

Chas. H. Bard, Sedalia, Mo., was in this city, last week, having been called to Independence, Mo., on account of the death of a relative.

H. W. Porter, Porter & Wiser Jewelry Co., will leave for New York, on a combined business and pleasure trip the early part of June.

Sam Bloom, traveler for the Meyer Jewelry Co., who has been in the hospital, undergoing an operation for appendicitis, has recovered sufficiently to be removed to his home.

W. L. Harris and son, Neosho Falls, Kans., were in the city last week, buying for a new store which they are opening in Colony, Kans. The store will be in charge of the son.

E. L. Donaldson, with the Edwards & Sloane Jewelry Co., has returned from a trip over his Texas, New Mexico and Arizona territory. He will stay in to help with the invoice.

Among the traveling representatives who called on the trade here during the past week, were Mr. Cobb, W. R. Cobb & Co.; Russell Talbott, Alvin Mfg. Co.; Mr. Willis, Gorham Mfg. Co.; Mr. Barker, R. Wallace & Sons Mfg. Co.; H. New, Henry Baschkopf; J. S. Cunningham, E. L. Spencer Co.; Geo. H. Thomas, Powell & Co.; F. E. Hyatt, Philadelphia Watch Case Co.; T. W. Agnew, New Haven Clock Co.

The following jewelers called on the trade in this city, during the past week: Frank Schroder, Paola, Kans.; W. H. Meyer, Lawson, Mo.; S. J. Huey, Excelsior Springs, Mo.; C. Weber, Lexington, Mo.; M. Berkson, Atchison, Kans.; W. F. Berry, Moulton, Ia.; Scott Taylor, Oswego, Kans.; C. L. Dockhorn, Oskaloosa, Kans.; O. M. Atwood, Clifton, Kans.; E. E. Russell, Altus, Okla.; C. E. Tieman, California, Mo.; Mr. Armel, of Armel Bros., Holton, Kans.; C. J. Keil, Clinton, Mo.; J. M. Coffman, Salisbury, Mo.; W. J. Mulnix, Holden, Mo., and C. E. Anderson, Pleasanton, Kans.

Indianapolis.

C. H. Gabbert has taken a position with E. C. Stokes.

Mr. and Mrs. J. H. Reed spent last week at their country home in Brown County.

Horace Comstock has returned from a three days' fishing trip along White River near Noblesville.

Henry A. Winn has returned from Newman, Ill., where he was called by the serious illness of his mother.

Joseph E. Reagan, of the Baldwin-Miller Co., has been elected a director of the Indianapolis Trade Association.

Carl Rost has obtained a permit to remodel his prospective storeroom at 25 N. Illinois St., at a cost of $2,000.

George Keifner and Charles W. Lauer, Jr., travelers for Charles W. Lauer & Co., spent last week in Illinois territory.

Ikko Matsumoto has made a number of alterations and improvements in his establishment in the American Central Life building.

A two weeks' fishing trip at Lake Maxinkuckee is being enjoyed by Julius C. Walk and C. J. Kiefer, who go to the lake twice a year for fishing.

The Baldwin-Miller Co. is preparing to issue a house publication, to be known as the Monogram Messenger, the first number to be published within a few days.

Out-of-town jewelers in the city, last week, included E. T. Barnes, Spencer; T. U. Bonnifield, Kokomo; Will Axline, of Bauchert & Axline, Noblesville; J. O. Lutz, Zionsville; P. J. Nay, Knightstown; D. H. Almond, Zionsville; J. A. Meissen, Cicero; John W. Hudson, Fortville; John Kennard, Rushville; C. N. Hetzner, Peru; M. E. Chastain, Roachdale; G. C. De Camp, Shirley, and J. F. Kiser, Muncie.

An important decision was handed down by the Supreme Court, last week, to the effect that corporations outside of Indiana, not certified to do business in this State, need not establish an agency in Indiana before suing on contracts. The substance of the argument of the defendant or appellee was that an agency would have to be established in every county in the State where a bill of goods was sold before suit could be brought to obtain the fulfilment of a contract.

Cincinnati.

George Fruh, the Brighton jeweler, is reported as seriously ill with heart trouble.

Loring Andrews, of the Loring Andrews Co., is visiting New York and other eastern cities.

William Pflueger and J. B. Osthoff, of Joseph Noterman & Co., have left on their respective trips west and north.

The local order of Ku-Kus held a meeting April 15, when six new members were received. The meeting closed with a lunch and bowling.

George J. Gruen, of Gruen Sons & Co., and wife, will sail April 23 on the *Berlin* for Naples, Italy, where they expect to remain until Aug. 1.

M. J. Greenwald has moved one of his stores from 32 Arcade to 528 Race St. He will continue the business of his other two stores, as heretofore, in the Arcade.

L. Gutmann & Sons, owing to increased business, are remodeling their safes and adding to their lines. They are now sending out three trunks with each of their representatives.

J. E. Beck, for many years a jeweler at Martin's Ferry, O., has sold out his business there and gone to Baltimore, Md., where he has purchased a jewelry store at 101 Liberty St.

The following jewelers were here attending the opening baseball game in the past week: Herman E. Promnitz, Van Wert, O.; Frank L. Miller, Wilmington, O.; Frank L. Horning, Brookville, Ind.; R. E. Friese, Springfield, O.; J. Jashenosky, Hamilton, O.

Out-of-town jewelers who were here buying stock the past week included: J. H. Noyes, Osgood, Ind.; H. E. Cover, Bantam, O.; A. J. Wahlrab, Dayton, O.; Frank L. Horning, Brookville, Ind.; J. G. Laupus, Seymour, Ind.; G. H. Ashton, Middletown, O.; D. Adler & Son, Lexington, Ky.; Lee N. Schlenker, Eaton, O.; Fred Bentel, Hamilton, O.; C H. Creighton, Franklin, O.

Barker & Freiseus are now completely settled in their new store at 35 E. 5th St. It is a handsome and up-to-date store. The windows are beautifully draped in pale blue and white hangings. The interior of the store is fitted with new mahogany fixtures and cases, the latter being filled with the newest lines of silver, cut glass, clocks and jewelry. Across the rear extends a balcony which is used as an office. Only one side of the store is fitted with cases. The opposite side has the appearance of a reception room. Cards were out, announcing the opening, April 19.

Traveling representatives who called on the Cincinnati trade during the past week included: H. H. Deutsch, Ciner & Seeleman; George Weidig, Joseph Fahys & Co.; C. A. Holbrook, Sloan & Co.; W. G. Moland, Sansbury & Nellis; W. H. Osborne, R. Wallace & Sons Mfg. Co.; John J. Moffitt, Baton & Co.; Mr. Buckholz, Wolf & Knell; Leo Cahn, Borrelli & Vitelli; H. E. Vincent, Simpson, Hall, Miller & Co.; Rodney B. Carr, Wordley, Allsopp & Bliss Co.; Thomas E. Rogers, Riker Bros.; W. J. Lane, Kent & Woodland; Frank L. Wood, Ludwig Nissen & Co.; Mr. Curran, A. J. Hedges & Co.; W. H. Gregory, Strobell & Crane; A. J. Parker, Osmun, Parker Mfg. Co.; E. V. Hutton, H. & E. O. Belois; C. B. Bartlett, Whiting Mfg. Co.; W. S. Metcalf, Plainville Stock Co.; J. M. Torbert, Simeon L. & George H. Rogers Co.; Mr. Morgan, Rogers & Bro.; A. Rutherford, Taylor & Co.

At a hearing in the case of the Duhme Jewelry Co. and the intervening suit of Mrs. Clara G. Keck, widow of the late Herman Keck, of the Herman Keck Mfg. Co., Judge Sater, of the United States District Court, refused to let Trustee R. de V. Carroll, of the Herman Keck Mfg. Co. and the Duhme Jewelry Co., take over the Duhme assets. Mrs. Keck filed her claim against this company in February, 1909, in the interests of her son. On this account the public auction of the assets of the two companies, advertised for April 19, was set aside on April 12, until a further hearing is had. Trustee Carroll then followed with a petition in the Federal District Court on April 13, to have the Herman Keck Mfg. Co. declared the owner of the Duhme stock in order that a contemplated sale of that stock may be carried out. Maxwell & Ramsey are now acting as attorneys for the trustee. J. B. Frankel and Joseph W. O'Hara now act as attorneys for the creditors.

Toledo.

Charles E. Paff, Jr., who has conducted a jewelry store on Cherry St. for about two years, has moved back to Summit St., where he was formerly in business.

W. F. Broer, secretary and treasurer of the Merrill-Broer Co., has just returned from a six weeks' trip to the Bermuda Islands. This constitutes his annual vacation trip, aside from automobile trips which he often takes with his friends.

The Merrill-Broer Co. is renovating its display rooms in the Smith & Baker building. The concern expects soon to add to its floor space, the extra room being for the display of clocks. In the five years that it has been in business the firm has doubled its floor space.

J. J. Freeman, of J. J. Freeman Co., who, with his wife, has been sojourning in California, writes to friends that they expect to be gone about three months. Norman Hascall and R. S. Freeman, of the same firm, have been in New York on a business trip. Owing to the absence of J. J. Freeman, Mr. Hascall will have to forego the pleasure of his usual vacation.

The business of the Judd, Gross Co. has just been incorporated, and hereafter S. S. Jordan and W. H. Dawson will be connected financially with the firm. Both have spent years in the employ of Mr. Judd, who started the business more than a quarter of a century ago. Mr. Judd will be connected in an advisory capacity only. He is Wintering in Europe and letters received from him indicate a pleasant trip.

Indications point to a concerted effort on the part of the pawnbrokers of the city to resist the city administration's determination strictly to enforce the license ordinance applying to them. License fees were due April 1, and are slow in coming in. This for years has been a bone of contention between the pawnbrokers and the city. The former declare it is illegal, and the latter each year tries to collect the license, but so far has been unsuccessful. It has been estimated that the lax enforcement of the pawnbrokers' law and other license regulations in the past has cost the city considerable money.

San Francisco.

Herbert Pembroke, son of A. J. Pembroke, of Berkeley, one of San Francisco's thriving suburbs, is now in southern California on a short trip.

Alphonse Judis, of the Alphonse Judis Co., has just returned from a trip to Los Angeles, where he went to show some of the goods purchased on his recent European trip.

Arthur Elston, of Elston Bros., is now traveling in the northwest, but has not been covering the ground as rapidly as he had hoped, having been detained through sickness for a week in Portland. This firm has two men out on the road and one in the San Francisco field.

A. I. Hall & Son have completed the addition to their floor space in the Jewelers' building, and will shortly have this filled with stock. When the improvements have been completed this firm will probably have the largest amount of floor space at its disposal of any wholesale house of the kind in the city, or on the coast.

George Lewis, of Shreve & Co., has been spending considerable time assisting the finance committee of the Panama-Pacific International Exposition. Plans are being made for opening subscription books to the public shortly to secure an initial fund of $5,000,000. The local jewelers are much interested in the proposed exposition, as they would be immensely benefited by the bringing here of the crowds that would attend the fair.

Chas. Patterson, well known in the local wholesale trade, surprised his friends here, recently, by announcing that for the past two months he had been a benedict, having been married at San Rafael to Miss Winnifred Lane, of Berkeley. While Mr. Patterson will still be interested in the diamond trade, he will devote the bulk of his attention to the practice of law, having been admitted to the bar, and will make his home at Visalia, Cal.

Pacific Northwest.

L. Harmison, Hoquiam, Wash., after having been in business at that place for five years, has decided to sell out.

Will Hanscom, proprietor of the Hanscom Jewelry Store, Pendleton, Ore., has purchased a new automobile adapted both for business and for pleasure.

John Steffeson, 46 years old, who had been employed by the Hartwell Jewelry Co., Oklahoma City, Okla., died recently at a hospital in that city from the effects of a ruptured blood vessel. Mr. Steffeson was a native of Sweden, but has been in this country many years, and came to Oklahoma City last Fall. He has been ailing for several months with what was believed to be rheumatism, but the autopsy disclosed the true nature of the illness which resulted in his death.

News Gleanings.

James E. Green has gone from Emigsville, Pa., to York, Pa.

Joseph Sarphie, Woodsville, Miss., has moved to Hattiesburg, Miss.

J. A. Holmgren, San Leandro, Cal., has removed to San Jose, Cal.

Harry M. Conrath, formerly of Lovejoy, Pa., is now at Indiana, Pa.

Bickford & Orris, Earlham, Ia., have sold out to C. L. Morrison.

James F. Duffey recently removed from Buford, Ga., to Manchester, Ga.

E. E. Coder recently moved from Kalkaska, Mich., to Sutton's Bay, Mich.

L. K. Jacks has purchased the business of Ross R. Day, Little River, Kans.

A. H. Johnson has bought the business of Lyman R. Barnett, Glendive, Mont.

C. C. Addington, Gates City, Va., has moved to Appalachia, in the same State.

Fire recently did considerable damage to the store of Leo Gantert, Yoakum, Tex.

H. Eckward has purchased an interest in the business of C. L. Jones, Bartlesville, Okla.

According to the Bernardsville (N. J.) *News*, a jeweler is very much needed in that village.

Woolley & Mitchell, Traer, Ia., have dissolved. H. M. Woolley will continue the business alone.

Ben. Overstreet, Farmer City, Ill., has sold out to S. E. Kelly, who will take possession July 1.

A. F. Frech, Newark, N. Y., has moved to the Columbian Block, where he has larger quarters.

An involuntary petition in bankruptcy has been filed against C. G. Radebaugh, Clarendon, Ark.

Leon Levi, Baltimore, Md., has just awarded the contract for the remodeling of his store at 307, 309 W. Lexington St.

The administrators of E. B. McClelland's estate are closing out the stock in the store, 106 University block, Syracuse, N. Y.

Burglars some time early April 16 broke into the jewelry store of Percy H. Safford, Church and Main Streets, Fitchburg, Mass., and took away a large amount of silverware. Mr. Safford was unable to figure his loss. The safe, which contained several hundred dollars and several diamonds, was not disturbed.

Insurance adjusters were busy in Middletown, Pa., last week, and all the debris from the fire of April 9 is being removed to make way for new building operations. At a citizens' meeting the chairman appointed Jeweler Walter Fuerneisen as one of a committee of five to assist in the framing of a building regulation ordinance. Both Jewelers E. H. Klahr and Walter Fuerneisen succeeded in opening their safes, the former finding all the contents in good condition. He has placed all the valuables taken from the safe in the Farmer's Bank. Mr. Klahr will reopen his jewelry store in the Wolf property on N. Union St. in the near future. Mr. Fuerneisen, contrary to expectations, found the contents of his safe practically ruined. His total loss will be close to $20,000, with $7,900 insurance. Mr. Fuerneisen is not dismayed, however, and expects shortly to announce the reopening of his store in a new location.

THE VERDICT OF THE JURY

Read the following letter of Ambrose Kent & Sons, Toronto, Canada, for whom we made the Largest and Most Successful Sale ever made in America

Messrs. Mitchell & Tillotson,
35 Maiden Lane, New York.

Gentlemen:

We wish to express to you the satisfaction we feel in the manner in which you conducted our sale during the past nine weeks.

Before deciding on your services we made a thorough investigation of the records of many of the foremost men in this line and we are glad to say that you have made a complete success of our sale, disposing of practically our entire stock and fixtures invoiced at over $150,000.

We believe this sale has been one of the largest and most successful ever made in Canada, and we wish to again express our entire satisfaction with the results of the same and the manner in which it was conducted. From the first day to the last the store was packed with people, and, we might add, the last three weeks were among the largest of the entire sale.

We take great pleasure in recommending you to the trade, knowing you are fully competent to handle the largest and finest stocks, and that your style of salesmanship will meet with the approval of the most exacting.

Yours sincerely,
Ambrose Kent & Sons, Ltd.,
Per Fred. A. Kent, Mgr.

We are open for dates for June and July and for advance dates for Fall and Winter. We are at present closing out the Doll Jewelry stock at Calgary, Alberta, Canada.

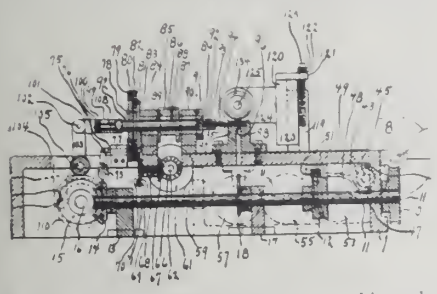
UNITED STATES PATENTS.

ISSUE OF APRIL 5, 1910.

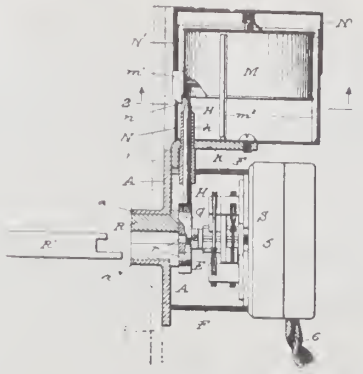
953,752. AUTOMATIC PINION-CUTTING MACHINE. ANDREW H. NEUREUTHER, Peru, Ill., assignor to the Western Clock Mfg. Co., La Salle, Ill. Original application filed May 21, 1907, Serial No. 374,934. Divided and this application filed Oct. 8, 1908. Serial No. 456,818.



In an automatic pinion-cutting machine, a runway, apertures through said runway, a notch in

said runway, a lever pivotally connected on said runway, a projection on said lever, which projection enters the runway adjacent to said notch and a spring on said lever to maintain its projection in said runway.

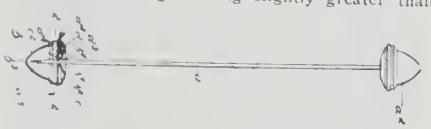
953,753. AUTOMATIC PINION-CUTTING MACHINE. ANDREW H. NEUREUTHER, Peru, Ill., assignor to the Western Clock Mfg. Co., La Salle, Ill. Original application filed May 21, 1907, Serial No. 374,934. Divided and this application filed Oct. 17, 1908. Serial No. 458,287.



In an automatic pinion-cutting machine, an arbor slidably mounted in a shouldered sleeve journaled

in the frame of the machine, two staking abutments in the path of said arbor and means for intermittently reciprocating said arbor through one and into the other of said abutments.

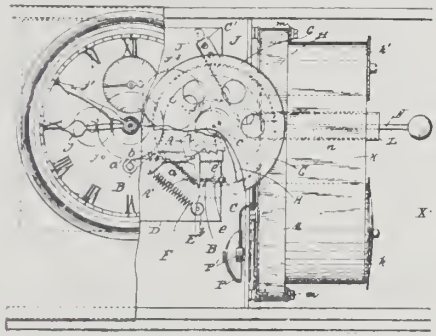
953,802. TIME RECORDING AND INDICATING APPARATUS, WORKMAN'S TELLTALE AND THE LIKE. FREDERIC M. RUSSELL, Willesden, London, England. Filed June 15, 1908. Serial No. 438,662.



In a time recording or like apparatus, the combination with a clock mechanism and a time printing disk, rotated continuously thereby, of a second time printing disk mounted concentrically with the continuously rotated disk, a cam on the continuously rotated disk, a ratchet wheel secured to the second disk, an arm, a pivot for the arm eccentric to the disk's axis of rotation, a pawl pivoted to the arm intermediate its ends, a nose on the pawl engaging the ratchet wheel, a spring tending to keep the pawl in engagement with the ratchet wheel, a projecting piece on the arm engaging the cam, a spring tending to keep the arm in engagement with the cam, a tail piece on the pawl, and an adjustable stop in constant engagement with

the tail of the pawl until the arm is released from the cam and permitted to return.

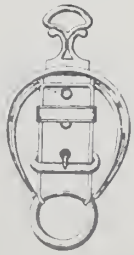
954,287. SAFETY ATTACHMENT FOR HAT-PINS, ETC. GEORGE HOFFMAN, Valley Stream, N. Y. Filed Aug. 28, 1909. Serial No. 514,991.



A safety attachment for pins comprising a hollow casing provided with a conical recess at one end having an aperture at its apex into which the pointed end of the pin is adapted to be passed, the interior of the casing being provided with a spring tongue having one end secured thereto, the free end of which tongue bears on the pin when the latter is inserted into the device, the length of said spring tongue being slightly greater than

the distance from the point of its attachment to the pin when the latter is inserted into the device, and a laterally movable plunger slidably connected with said tongue within the casing and having a handle portion which passes outwardly through the side of the casing and the inner end having a portion which bears on the inner inclined surface formed by said conical recess to move said tongue longitudinally of the pin and in the direction of the point thereof, when said plunger is moved inwardly.

954,403. TIME-RECORDER. JOSEPH G. SWALLOW, New York. Filed Aug. 6, 1909. Serial No. 511,537.



The combination of a time-recorder and a marker

therefor with an electric switch and means whereby the switch mechanically actuates the marker.

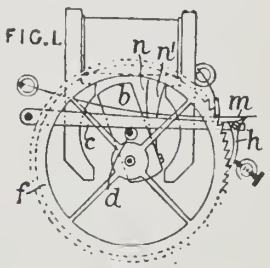
DESIGNS.

40,398. WATCH FOB OR SIMILAR ARTICLE. THOMAS F. PRYOR, JR., Newark, N. J.

Filed Jan. 17, 1910. Serial No. 538,546. Term of patent 14 years.

40,599. SPOON, FORK OR SIMILAR ARTICLE. JOHN R. DEAN, Wallingford, Conn.,

assignor to the International Silver Co., Meriden, Conn. Filed Feb. 7, 1910. Serial No. 542,653. Term of patent 7 years.

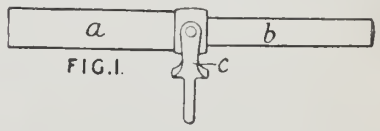


BRITISH PATENTS.

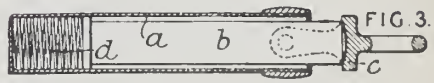
(ABRIDGMENTS OF SPECIFICATIONS, 1908, FROM *The Illustrated Official Journal.*)

ISSUE OF MARCH 31, 1910.

26,239. ELECTRIC CLOCKS. T. J. MURDAY, Hounslow, London. Dec. 4.



In a secondary clock, a pivoted lever *c* carrying a driving-pawl *h* rests on a cam *d* fixed to the arbor of the centrally-pivoted armature *b* of an electromagnet. When the magnet is energized, the lever *c* is raised by the cam, and when the current ceases the parts are returned to the normal posi-



tion by the pressure of a spring *m*, a ratchet-wheel *f* being thereby driven by the pawl *h*. Springs *n*, n^1, adapted to strike against the pole-pieces of the magnet, are attached to the armature to limit its motion. In a modification, the driving-pawl *h* is attached directly to the eccentric *d*, the lever *c* being then dispensed with.

26,266. WATCH CHAIN GUARDS, SLEEVE-LINKS, ETC. M. MURAMATSU, care Nosawa & Co., London. Dec. 4.

A bar for watch chain guards, sleeve-links, etc., is made in two parts, *a*, *b*, Fig. 1, one of which *b* slides within the other, and is pressed outwards by a spring d, Fig. 3. A stirrup *c* with a ring for attaching the bar to the chain fellow-link, etc., is

pivoted to the outer part, and when turned at right-angles holds the part *b* within the outer part *a* to facilitate the insertion of the bar through a button-hole. The stirrup is slightly countersunk where the inner part *b* bears against it.

UNITED STATES PATENTS THAT HAVE EXPIRED.

UNITED STATES TRADE-MARKS.

[The following trade-marks have been adjudged entitled to registration under the Act of Feb. 20, 1905, and are published in compliance with Section 6 of said act. Said section provides:

"Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Section 2 of this act. If no notice of opposition is filed within said time the commissioner shall issue a certificate of registration therefor, as hereinafter provided for."

Marks which are stated to have been "Used 10 years" are registrable under the last proviso of Section 5 of said act, which is as follows:

"And provided further, that nothing therein shall prevent the registration of any mark used by the applicant or his predecessor, or by those from whom title to the mark is derived, in commerce with foreign nations or among the several States, or with Indian tribes, which was in actual and exclusive use as a trade-mark of the applicant or his predecessor from whom he derived title for 10 years next preceding the passage of this act."]

TRADE-MARKS PUBLISHED APR L 5, 1910

Ser. No. **45,304.** (CLASS 28. JEWELRY AND PRECIOUS-METAL WARE.) Shreve & Co., San Francisco, Cal. Filed Oct. 13, 1909.

Particular description of goods.—Gold and silver table ware, tea sets, dishes, bowls, candlesticks, trays, knives, forks, spoons, rings, pins, brooches, bracelets, fobs, necklaces, watch cases, chains, match-boxes, hat-pins, combs, sleeve-links and bar buttons, collar-buttons, toilet and manicure articles, trophies, medals, cups, vanity-cases and purses.

Ser. No. **48,026.** (CLASS 28. JEWELRY AND PRECIOUS-METAL WARE.) Allison Mfg. Co., Attleboro, Mass. Filed Feb. 25, 1910.

SNOWFLAKE

Particular description of goods.—Jewelry for personal adornment.

A Correction.

The allegations made by the prosecution in the case of the Hartford Fire Insurance Co. against Albert Fink and his wife, of Los Angeles, Cal., and published in the Jewelers' Circular-Weekly of March 16, were erroneous in implying that Mr. Fink had kept overnight the check for the trunk which was afterward robbed.

Harry Adams' testimony in court was to the effect that Mr. Fink asked him for the railroad scrip that he might get a pocket-book in which Adams could carry both the check and the scrip, and that he (Adams) afterward laid the scrip and check in the safe, which was open, while an office employe was gone—only about 10 minutes, according to Adams—to procure the book. While the employe was gone Adams was about the office, but paid no particular attention as to the presence of anyone about the safe.

As noted in the Jewelers' Circular-Weekly, April 6, Mr. Fink and his wife were later exonerated of the insurance company's charges, when the case came to trial.

Washington, D. C.

A. O. Hatterly, who has been confined to his home with rheumatism, is now able to attend to business.

Reed S. Baker, 938 F St., had an exhibit of binoculars and other materials for the huntsman and camper out at the Sportsman's Show, held last week.

Mr. Greenberg, formerly of this city, now in the employ of G. W. Hurst, of Warrenton, Va., is looking for a suitable site for a jewelry store. Mr. Grenberg would open up in any city which would have the appearance of being a good field.

"Harman" of Baltimore, Md., and Durham and Henderson, N. C., has obtained one half of the store occupied by Shapiro Music Co., at 434 7th St., N. W., and has opened a jewelry department there. The store was filled with flowers sent by admiring friends to mark the opening.

Clarence Howlett, alias Wilson, alias Oliver Reeves, arrested through the efforts of Jacob Gammerman, 424 North Calvert St., Baltimore, was recently brought before Mr. Justice Gould in the Criminal Court, to answer to the charge of stealing $20,000 worth of jewelry belonging to Mrs. Frederick Bugher, of this city, and on pleading "not guilty" was held in $5,000 bail to await trial.

Among the traveling men in town during the week were A. Smith, L. P. White & Co.; Mr. Leopold, H. O. Hurlburt & Sons; A. Holzinger, Fred Kaufman & Co.; Mr. Kellman, Alvin Mfg. Co.; Henry Fein, Henry Fein & Co.; William Froehlich, Sterling Silver Mfg. Co.; L. S. Tyndall, American Standard Jewelry Co.; Mr. Masterman, Masterman & Fuchs; Mr. Manning, D. Wilcox & Co.; Mr. Spies, Whiting Mfg. Co.; Mr. Fisher, Baltimore Silversmith Manufacturing Co.; A. M. Brinckle, C. F. Monroe Co.; George Reed, Larter & Sons.

Salvatore Desio has finished all arrangements in his new store at 926 F St., N. W. The building is a three story one; the first floor is given over to the jewelry sales department. Large wall cases containing large jewelry pieces are on either side and a row of show cases are on the left side. The store is lighted from five drop light clusters, the lights of which are covered by globes of Tiffany glass. The floor is of mosaic. The show window is bow-shaped with marble base and has a sloping dark wood floor draped with royal purple velvet; a lace drapery covers the upper part of the window. Above the window is a row of 15 electric lights and a large electric sign is also used. The second floor is given over to the manufactory, and the third floor to packing and store rooms. Mr. Desio was formerly located at 1012 F St., N. W.

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

Washington, D. C., April 13.—The following were the exports of jewelry, silverware, optical goods, clocks, watches, and kindred lines from the port of New York for the week which ended Wednesday, March 30:

Bangkok: 10 cases clocks, $120.
Belize: 7 cases clocks, $110.
Buenos Aires: 1 case jewelry, $215.
Bremen: 2 cases watches, $1,683.
Calcutta: 42 cases clocks, $520; 15 cases clocks, $613.
Cape Town: 19 cases clocks, $189; 2 cases plated ware, $134; 1 case optical goods, $131.
Colon: 5 cases clocks, $124.
Genoa: 1 case jewelry, $500.
Havana: 6 cases jewelry, $552; 29 cases clocks, $660.
Havre: 1 case jewelry, $200; 1 case precious stones, $346; 1 case watches, $883; 3 cases optical goods, $1,872.
La Paz: 2 cases plated ware, $247.
Liverpool: 9 cases plated ware, $588; 9 cases jewelers' sweepings, $11,500; 1 case watches, $900; 39 cases clocks, $622; 3 cases optical goods, $110; 1 case optical goods, $749; 1 case precious stones, $280; 3 cases jewelry, $728; 3 cases silverware, $819; 2 cases watches, $2,000.
London: 40 cases clocks, $1,005 106 cases clocks, $3,404; 10 cases watches, $1,600; 1 case silverware, $500; 13 cases watches, $4,842; 8 cases clocks, $303; 16 cases optical goods, $2,127.
Madras: 23 cases clocks, $620.
Manila: 1 case silverware, $115; 28 cases clocks, $945.
Matanzas: 16 cases clocks, $297; 1 case plated ware, $104.
Montevideo: 20 cases plated ware, $2,089; 73 cases clocks, $719; 10 cases plated ware, $311.
Naples: 3 cases jewelry, $1,000.
Rangoon: 10 cases clocks, $265.
Rio de Janciro: 32 cases plated ware, $1,915; 85 cases clocks, $1,345; 3 cases jewelry, $372; 19 cases clocks, $326; 11 cases jewelry, $1,586.
Savanilla: 3 cases plated ware, $254.
Singapore: 34 cases clocks, $341.
Sheffield: 54 cases clocks, $2,312.
Stockholm: 2 cases clocks, $100.
Sydney: 121 cases clocks, $1,262; 10 cases optical goods, $1,231; 269 cases plated ware, $3,296; 438 cases clocks, $6,476; 3 cases watches, $762.
Tampico: 2 cases thermometers, $113; 2 cases plated ware, $130; 2 cases clocks, $161.
Valparaiso: 3 cases plated ware, $304.
Vera Cruz: 3 cases plated ware, $331; 48 cases clocks, $1,210.
Vienna: 1 case jewelry, $600.
Wellington: 5 cases clocks, $245.

In speaking of the new catalogue of the South Bend Watch Co., a writer in the *Trade Journal Advertiser* says that it is "very beautiful and contains some remarkably fine examples of engraving. It is seldom that one sees such fine work and skill as is displayed in the cuts of the watches. The yellow is close to a real gold and the tinting is extremely striking. Here is a case where the beauty of the cuts and the expensiveness of the catalogue throughout really offers the best kind of salesmanship for this particular proposition. This catalogue is issued solely for distribution among the legitimate retail jewelry trade, although it is expected that often it will be shown across the counter to a prospective watch buyer. For this reason the descriptive pages makes no mention of prices, the prices being classified in a certain section of the book, where they are all together. It has all the taste, richness and beauty which a watch catalogue should possess. Its advertising value lies largely in the very favorable impression it is bound to create."

WE have recently issued a supplement to our 1904 material catalog which will be forwarded to you on application. This supplement used in connection with our 1904 catalog you will find a great help in getting correct repairs for our movements. Material for all new grades manufactured since the issue of our 1904 catalog is listed. Serial numbers showing grades of movements to 15394000 are given; table showing numbers and strengths of Hair Springs for different grades will be found a great convenience. We especially call your attention to the introduction in the supplement which explains how to get the part you want for any particular movement. A postal card request will bring one of the supplements.

ELGIN NATIONAL WATCH COMPANY,

THE HOROLOGICAL REVIEW

Some Calculations Applicable to Barrel Train, and Motion Work of Watches.

Written expressly for The Jewelers' Circular-Weekly by T. J. Wilkinson.

(*Continued from issue of April 13.*)

(PART II.—CONTINUED.)

IN our last paper we commented on the fact that in selecting the wheel to which we assign any one of two given sets of numbers suitable for its teeth we were at liberty to place the 80 teeth in either the center or third wheel. In that paper we assigned the 80 teeth to the center wheel. For the purpose of illustrating the point that when we calculate a new train it becomes, so far as figuring is concerned, a matter of indifference whether we place the teeth and pinion in the reverse order to that to which we then assigned them.

The following shows the position of the numbers as stated in our last contribution:

Center wheel ..... 80 teeth
Third wheel ..... 75 teeth
Third wheel pinion ..... 10 leaves
Fourth wheel pinion .... 10 leaves

The pinions being each of the same number of leaves, no change of position can affect them.

To prove the foregoing we shall change the teeth of the wheels and show that the new arrangement only changes the time and revolution of the third pinion, which includes the third wheel, and the revolution of the fourth wheel.

This is the new arrangement of the train:

Center wheel ..... 75 teeth
Third wheel ..... 80 teeth
Fourth wheel ..... 80 teeth
Pinion of third wheel.... 10 leaves
Pinion of fourth wheel... 10 leaves
'Scape pinion ..... 8 leaves

The effect is as follows:

Center wheel, one revolution; time for one revolution, 60 minutes.

Third wheel, 7½ revolutions; time for one revolution, eight minutes.

Fourth wheel, eight revolutions; time for one revolution, one minute.

'Scape wheel, 10 revolutions; time for one revolution, six seconds.

The original arrangement of the train gave the following results:

Center wheel, one revolution; time for one revolution, 60 minutes.

Third wheel, eight revolutions; time for one revolution, 7½ minutes.

Fourth wheel, 7½ revolutions; time for one revolution, one minute.

'Scape wheel, 10 revolutions; time for one revolution, six seconds.

These tables show that in the upper arrangement the third pinion revolves 7½ times to one turn of the center wheel, and in the under table the third pinion, which means also the third wheel, revolves eight times to one revolution of the center wheel.

The time for one revolution of the third wheel in the upper table is 7½ minutes, and in the lower table eight minutes.

The effect of the change on the fourth wheel is in the number of its revolutions; the upper table shows eight and the lower 7½ for each revolution of the third wheel.

The ultimate results, namely, the time of revolution for the fourth wheel and the 'scape pinion, being in no wise affected. In connection with this part of our subject we herewith insert some tables of trains which we shall analyze.

LEVER TRAINS, 18,000 BEATS.

Center wheel.	*Third wheel and pinion.*	*Fourth wheel and pinion.*	*'Scape pinion.*	*Quotient. 'Scape pinion divided into fourth wheel.*
80	75-10	80-10	8	10
80	60-8	60-10	6	10
72	60-9	70-8	7	10
64	60-8	80-8	8	10
64	60-8	70-8	7	10
64	60-8	60-8	6	10
64	56-8	70-7	7	10
60	56-8	60-7	6	10
60	56-8	70-7	7	10
60	48-8	60-6	6	10
56	45-7	60-6	6	10
48	45-6	60-6	6	10

LEVER TRAINS, 16,200 BEATS.

Center wheel.	*Third wheel and pinion.*	*Fourth wheel and pinion.*	*'Scape pinion.*	*Quotient. 'Scape pinion divided into fourth wheel.*
64	60-8	72-8	8	9
64	60-8	63-8	7	9
64	60-8	54-8	6	9
64	56-8	63-7	7	9
60	56-8	54-7	6	9
60	56-7	63-8	7	9
60	48-8	54-6	6	9
56	45-7	54-6	6	9
48	45-6	54-6	6	9

LEVER TRAINS, 14,400 BEATS.

Center wheel.	*Third wheel and pinion.*	*Fourth wheel and pinion.*	*'Scape pinion.*	*Quotient. 'Scape pinion divided into fourth wheel.*
64	60-8	64-8	8	8
64	60-8	56-8	7	8
64	60-8	48-8	6	8
64	56-8	48-7	6	8
60	56-8	56-7	7	8
60	56-8	48-8	6	8
60	48-8	48-6	6	8
56	45-7	48-6	6	8
48	45-6	48-6	6	8

We desire to call attention to three sets of trains selected from the foregoing tables:

Center.	*Third.*	*Fourth.*	*'Scape.*	
64	60/8	80/8	8	= 18,000 beats
64	60/8	72/8	8	= 16,200 beats
64	60/8	64/8	8	= 14,400 beats

We have here the representatives of three different trains. A study of their similarities and differences will be profitable. First, we shall multiply the center and third wheels together and also the third and fourth pinions. Following the rule before stated,

$$64 \times 60 = 3{,}840$$
$$8 \times 8 \times 60 = 3{,}840$$

Clearly no difference exists in the parts of the train under consideration, as our multiplication of the parts prove. When, however, we come to the fourth wheel a comparison shows that the number of teeth in each of these wheels differ. We also note that the leaves of the 'scape pinions are the same in number. The difference, as we have now pointed out, in the trains under consideration is due to the different number of teeth in each fourth wheel. We also call attention to the fact that the leaves of the 'scape pinion divided into their respective fourth wheels produce 10, 9 and 8 as quotients:

$$80 \div 8 = 10;\ 72 \div 8 = 9;\ 64 \div 8 = 8.$$

These quotients are indicative of 18,000, 16,200 and 14,400 beats to the hour. Hence we can readily tell the class of train.

A resumé of the rules and their application will assist toward an easier reference.

To find the number of revolutions a pinion will make for one revolution of the wheel depthing into it:

RULE.

Divide the number of leaves into the number of teeth and the quotient is the number of turns the pinion makes for one revolution of the wheel.

Example: Center wheel has 80 teeth, the third pinion 10 leaves.

$$80 \div 10 = 8$$

The answer shows that the third pinion makes eight revolutions to one of the center wheel.

Burglars broke into the store of F. H. Smith, Fairport, N. Y., a short time ago and stole several articles of jewelry and two valuable watches.

WALTHAM WATCHES

COLONIAL SERIES
Riverside Maximus
Enamel Dial

COLONIAL SERIES

Gold and Gold Filled Watches

These watches are a noteworthy addition to the Waltham line. They are exceptionally thin and may be had with Enamel, Silver Finish or Gilded Metal dials of artistic design. Colonial Series watches appeal to the most critical buyers. Equip your stock with these goods for Spring trade.

Colonial Series watches are to be had in five grades of movements as follows:

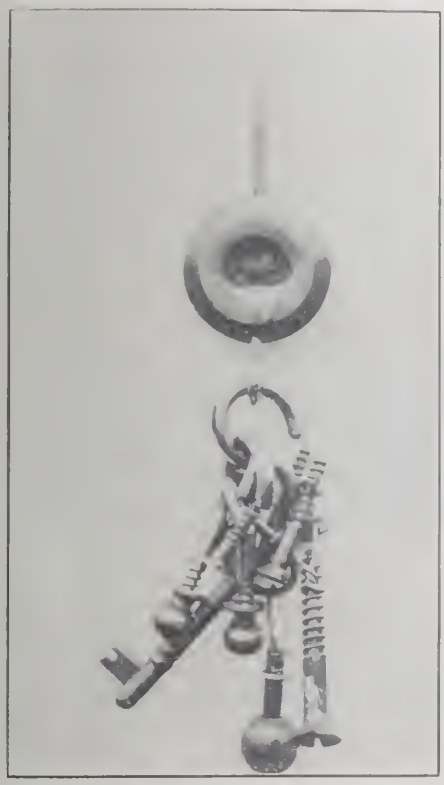
Riverside Maximus—23 jewels, adjusted to temperature, isochronism and five positions.

Riverside—19 jewels, adjusted to temperature and five positions.

Royal—17 jewels, adjusted to temperature and three positions.

No. 1425—17 jewels.

No. 1420—15 jewels.



All Colonial Series watches are cased and timed at the factory. They are delivered to the trade in display boxes. The retail selling price on these watches is fixed and plainly printed on the contract notice which is placed in the box with each watch before leaving the factory.

WALTHAM WATCH COMPANY
WALTHAM, MASS.

Unique Pendulum Weights.

THE accompanying photograph is one of the few freaks which occasionally find their way to the repair shops. This is the pendulum of an old clock sent to Strawbridge & Clothier's, Philadelphia, Pa., for repairs. You will see that it has been lengthened and weighted with odds and ends of rusty screws, keys and wires, to give it the proper regulation.

It apparently has stood this test for

UNIQUE PENDULUM WEIGHTS.

years, and only after a period of deliberation has it finally been sent to the repair shop.

Smallest Watch in the World.

PRINCESS CANTACUZENE, of St. Petersburg, who was Miss Julia Dent Grant, of New York, has come into possession of the smallest watch in the world. It was made for the last Empress of Brazil on her direct order to W. Gogelin, one of the most famous of all Geneva watchmakers. Gogelin spent three years at the task, and permanently weakened his eyes straining to fit the watch together. He received $25,000, which he held to be a small price.

The watch is exactly one-fifth of an inch in diameter and is set in a circle of small diamonds in a gold ring. It is wound with an old-fashioned key and keeps excellent time. The princess is said to have bought the watch for less than its original value, although several European museums were in the market for it.—*Exchange.*

W. L. Hindman, South Bend, Ind., has moved to 226½ N. Michigan St. The new quarters were remodeled to suit the requirements of the business and afford ample opportunity for successful work.

Snags Frequently Met in Repairing Electric Clocks.

Written expressly for The Jewelers' Circular-Weekly by R. D. Hickok.

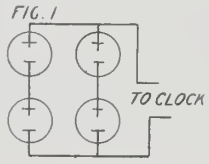
EVERY jeweler who solicits business in the repairing of electric clocks should equip his shop with the necessary tools and instruments and should acquire a knowledge of the rudiments of electricity. The first equipment for the shop should be an accurate volt meter, not one of the cheap pocket kind, but a standard instrument of precision, which can be purchased for $25. Experience will teach that the money was well invested. A suitable instrument for this purpose will be one with a 15-volt capacity, reading tenths of a volt.

Among the snags first met with in repairing electric clocks will be battery troubles. The writer's experience has shown that this is the most prolific cause of trouble found in the repairing and maintenance of electric clocks. No repairer would think of trying to make a clock run when the mainspring or weight was developing no more than half its power, but the same repairer will frequently try to make an electric clock run when the battery is nearly discharged and showing less than half its required voltage.

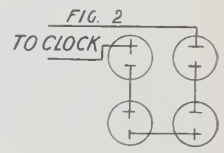
In examining an electric clock the first test that should be made should be to take a voltage reading of the battery with the standard volt meter. If dry cells are used they should show 1.5 volts per cell; wet cells, commonly known as sal ammoniac cells, should show 1.3 volts. The test should also be made of the voltage of the cells when they are discharging through the magnets of the clock. Remove the dial of the clock and close the circuit for a few moments. Observe the voltage of the battery. If the volts drop to less than one volt per cell they are either discharged or are overloaded.

If new cells show less than the one volt per cell on this test, more cells should be added. They should not be connected in series, but should be connected in groups, as shown in the illustration.

This method will cause the cells to do half the work per cell as before; that is, give off half the amperage, and thus double their life. If the two cells were added in series, as in Fig. 2, the result would be to double both the voltage and amperage, which would exhaust the cells much sooner.



In that class of electric clocks where the circuit remains closed if the clock stops because the battery does not lift the weight, or from winding spring, the battery will be discharged if the clock stops for only a few hours. We have in mind an instance of this kind where the clock had just been put in order by the repairer, but stopped in a few days from a loose connection in one of the wires.



Finding the clock stopped, the repairer in looking for the trouble at once found the loose binding screw, and after tightening this and finding everything else in good order he was greatly surprised that the clock would not run because the battery would not lift the weight. He was at a loss to understand this, as he had put in new batteries just a few days before. The secret of the trouble was that the loose connection had been sufficient to stop the battery from lifting the weight, but still allowed enough current to flow to exhaust the battery.

After putting in new cells the clock ran perfectly. If the repairer had used a volt meter to test the battery as soon as he found the loose connection he would have at once discovered that the battery was discharged.

In the above mentioned incident it will be noted that the primary cause of the stoppage of the clock after the repairer had put it in order was a loose connection. This is one of the most frequent "snags" met with in repairing electric clocks.

Although electricians are thoroughly familiar with the fact that a bad connection is an abomination, the clock repairer, who

is seldom an electrician, does not know that every circuit must be perfect in every connection and that in every place where wires are connected by binding posts or screws that the connection must be mechanically perfect and that if two wires are connected by twisting them together that the joint should be soldered and that the flux used should be a non-corrosive substance, such as resin dissolved in alcohol. The repairer cannot be too particular about this part in putting an electric clock in order. The internal connections should receive as much attention as the external connections leading to the battery. See that all nuts are down tight and that they are not corroded.

The platinum contacts on the circuit-closing device should also receive careful attention. If corroded or pitted from sparking they should be dressed up with a fine file or polished with fine sandpaper. Never use emery, as it is liable to imbed itself in the platinum and cause it to cut after the clock is set up. Care should be taken to see that no oil or grease is allowed to remain on the contacts after the cleaning is done.

The usual methods of cleaning are applicable to electric clocks. If benzine is used see that it is kept from the magnet windings. I believe that electric clocks as a class are as well constructed and in many cases better than the old style spring or weight kind, and if the repairer will give them the treatment that an electric device requires he will look upon the "new-fangled" electric clock as a decided advance in clock construction rather than a nuisance to be avoided.

Jacob Adelstein, Plymouth City, Md., has moved to Baltimore, Md.

JUST TO SHOW THE DURABILITY OF

New England Watches

A miner in South Africa owned this watch—one of our well-known "Padishahs." He lost it one day in the Cason Gold Mine—about 2,000 feet below the earth's surface. It was lashed into the "Koko Pans" with the gold reef and waste rock—dumped into the "skip" with six tons of reef—hauled up to the head gear and tipped into a bin holding 700 tons of rock—passed through a crusher that crushes to about the size of a tennis ball—dropped to a belt that carried it up to a sorting house, on its way passing through a huge water trommel. When found in this dilapidated condition it was **still going** and the works are in excellent condition.

The general shaking-up and jarring had no effect on the sturdy watch movement.

A Clock for the Show Window.

(Translated from *La France Horlogere.*)

THE Sunday following June 15 is established as the date after which fishing is permitted in France. M. Antony Jacques, clockmaker at Grenoble, who probably is a fervent "disciple of the rod," has conceived the idea of commemorating this event by a creation of his genius. And his imagination (which our readers, on several occasions, have had occasion to appreciate) has fathered the show-window piece, "the fisherman's clock," of which an illustration is shown herewith.

It is a bold fisherman who is seated at the brink of a pond, with the intention of catching a fish, if it be not cold or a sun stroke. We may note that he is seated right by the side of a signboard, on which is inscribed in large letters, "Fishing is forbidden." Look out for the field keeper; he

AN ATTRACTIVE SHOW WINDOW CLOCK.

will come. Indeed, he has arrived, this representative of the law. But he awaits the opportune moment for showing himself; as a matter of fact, this moment, if you like, shall be midday. But how is this moment to be determined, for neither the fisherman nor the field keeper has a watch?

If you will look carefully at the edge of the pond, you will see young reeds of a peculiar shape; look at them again and you will notice that they are the figures of the hours, skilfully cut out. You can even distinguish the half-hours, but how about the hand—the fisherman's float represents it; which, in an original manner indicates the time, by moving the line over the water, represented in this instance by a mirror. By what miracle is this float caused to move? Is there some gigantic pike that has caught itself on the hook and pulls it along? No. The designer of this showpiece has merely placed, under the mirror, a magnet that attracts it, for we must not neglect to explain that the float, although painted red, is of iron, while the wire of the line is very light. The public may demand to know by what mysterious power the float is thus caused to indicate the time.

Just for our readers, says *La France Horlogere*, we will not hesitate to expose the trick of Mr. Antony Jacques.

An alarm movement is hidden behind the rocks; on the pinion of the center of this alarm there is attached a long screw thread of elongated design, the pitch of which is very easy, so as to allow the magnet to slip, which is attached by means of a pin of an insulating substance, which traverses its two arms and slides in the thread of the screw; care is taken to place the bend of the magnet at the bottom, and its two extremities above (to attract the float), as near as possible to the glass. The mechanism works as follows: When the movement is going, one turn of the wheel will be a complete turn of the screw in which the magnet slips, representing one hour (say two centimeters); little by little the magnet will be drawn toward noon and attracts the float. But at midday, a surprise; the magnet drops on the center wheel, a release is effected and from behind the rock, as uncompromising as the law he represents, appears the field keeper. He proceeds to denounce, perhaps even to arrest the fisherman.

The alarm stops at this psychological moment. Nothing happens. It is necessary to rewind the mechanism, replace the float at its starting point, say 1 o'clock, and again conceal the field keeper behind his rock. And the amused public collecting in front of the shop front follows the movements of the float of the good fisherman.

And who can tell, there may even be people who, the more comfortablyto await the advent of noon, and the arrival of the field guard, will enter the watchmaker's and make a purchase. "That is what is to be demonstrated," as is said in connection with geometrical propositions.

Horological Notes.

A NEW town clock will shortly be erected in Huntington, N. Y. The clock will have illuminated dial and an 800-pound bell.

An interesting electric clock, run by a single dry cell, and quite independent of external connection, has just been put on the market in England. A heavy balance wheel is kept in motion by an electro magnet, mounted diametrically across it. As the balance wheel swings against the action of the coiled spring a stud on the axle makes contact with a light spring, thus completing the electric circuit and energizing the magnet, which acts for a moment upon the balance wheel. This impulse is given once every four seconds. It is said that a dry cell will run the clock for 1,000 consecutive hours. The movement is noiseless, and the clock may be placed in any position without interfering with its running.

Twenty-four-hour Clocks.

IN the last telegraph treaty, which was revised at the congress held at Lisbon last year, the participating governments agreed to use the figures 1 to 24 for the hours when marking the time on telegrams. It is beyond question, therefore, that clocks with a 24-hour dial will gradually conquer a large territory, and they have in fact come extensively into use in Belgium and Italy. Contrivances for facilitating the transition from the old to the new system may accordingly claim a certain amount of interest, says the *Deutsche Uhrmacher Zeitung*, and in view of this consideration we bring before the notice of our readers a new device of this nature.

A 24-hour circle, Fig. 1, is divided into

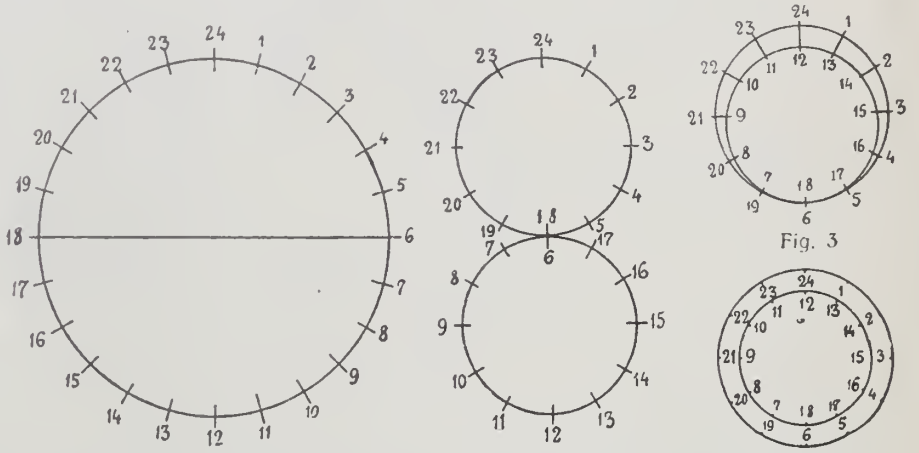

Fig. 1 Fig. 2 Fig. 3 Fig. 4

TWENTY-FOUR-HOUR CLOCKS USED IN CERTAIN COUNTRIES WHEN MARKING THE TIME ON TELEGRAMS.

two equal parts, a night arc (19—24 and 1—6) and a day arc (7—18). If we now take two circles with the numbers arranged as in Fig. 2 and make them touch at the numbers 6 and 18, these circles will form a loop in the shape of the figure 8, the upper and lower portions constituting the night and day circles, respectively. By placing the day circle within the night circle, as in Fig. 3, the series of numbers from 1 to 24 forms a self-contained loop and can be read consecutively from 1 to 24, all the day periods (7—18) lying in the inner, all the night periods in the outer circle. When this principle is applied practically, the dial is constructed as in Fig. 4, the numbers being arranged in concentric circles. It would be an advantage to mark the night numbers on a darker background.

If clocks provided with such dials were already on the market their introduction into all civilized countries would be greatly accelerated in view of the decision to which we have referred.

Walter L. Roberts, Wilmington, Del., is now settled in commodious quarters at 839 Market St., to which place he moved, recently, from 8 E. 7th St.

A man was arrested in York, Pa., April 16, on a charge of stealing $600 worth of jewelry from J. L. Wygant, of Gaysburg, Pa., by whom he had been employed. Nearly all the loot was found at the man's home.

The McIntyre

¶ Not a watch that will sell itself, but one with sufficient Good Talking Points, enough Real Quality to make its sale an easy matter.

A "ONE QUALITY ONLY" WATCH

¶ intended for the man who counts worth, not price. Built to win the admiration and the respect of the most particular trade; the crowning achievement of a long cherished ambition to produce in America, with American workmen and American methods, something just a little better than the world's best.

¶ We believe that we have created something that will set the Watch World to thinking. Its introduction comes after a decade of labor in the perfection of the model and in securing Letters Patent both at home and abroad.

Such a watch, YOU can sell

¶ Fixed retail prices that insure to you, such a margin of profit as you are justly entitled to.

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

Little Lessons of Experience.

Written expressly for The Jewelers' Circular-Weekly by a Practical Storekeeper.

LAST year one merchant learned a valuable lesson by seeing the other fellow's side. His wife had purchased an article in a prominent store and desired to exchange it. By chance the husband accompanied her on the errand, and, being himself one of the "old school," was surprised at the polite manner in which the transaction was handled. He made a mental note and decided to modernize his own place and adopt the "cheerfully exchanged" idea.

He said to himself: "One has to extend this courtesy to most customers who demand it; why not offer the privilege to all buyers?"

The result was surprising. Instead of increasing the number of exchanges, the privileges seemed to reassure the buyers and the actual number of customers who exchanged their purchases was less than formerly. The merchant ascribes this to that peculiarity of human nature which leads the majority of us not to care about doing things we are allowed to do.

Another odd development was noted. Almost all parties who did exchange goods spent more money on the second visit than the original article had cost. It seemed as though the people felt more confidence in a firm whose clerks were instructed to inform all purchasers: "If, for any reason, you are dissatisfied with your purchase, you are privileged to exchange it or have your money refunded."

Store Manners.

Why do merchants spend thousands of dollars advertising their wares and then often, through short-sightedness, drive away people who have been attracted by the announcement?

It is a peculiar fact that the average man when he finds his volume of business increasing has a tendency to develop "chestiness," and because he is attracting a limited number of the more prosperous people to adopt a superior manner towards other customers.

Hard as it is to win new trade, the task of holding them requires still more of an effort, and neither of the foregoing propositions is to be compared with the difficulties attendant on striving to bring back any customers who have discontinued buying because piqued at some real or fancied grievance. While one should be especially careful of impressions made on newcomers, one must never neglect or slight old customers.

A diplomatic word can prevent many unnecessary disputes. One's employes should be trained to avoid pertness and always to try to understand matters from the customer's point of view.

Just prior to the recent holidays a poorly dressed man called several times at a certain establishment and priced an expensive article. In many stores his appearance would have tempted the salesman to have quoted figures without troubling to remove the article from the show case, and even the manager of this store took care that the man was under surveillance during his visit. During the rush of holiday business the same man called, and, producing a well-filled purse, paid for the goods and asked that the parcel be delivered at his address. It then developed that this party was a well-known contractor and builder.

Another instance: On a busy day a customer who wished a trifling article called to buy it, and, noticing that there was a rush of trade, apologized for taking up the clerk's time. He was informed that in this store the rule was to try to please all buyers. In passing out the customer stopped to admire something which was being shown to another party, and later in the day returned to buy several pieces of the costly ware, remarking that he liked to deal where people were disposed to treat all buyers with equal courtesy.

Some men succeed in a moderate way, and could they use the same judgment in serving customers that they expend in planning to attract them, would be surprised at the financial value of good manners in a store.

Repairing Department.

The foundation of a good repair business is promptness. Never tell a man you will have an article ready and then disappoint him. It is better to arrange for him to call later, when you are sure you can deliver. A good repair business is profitable in more ways than one. It attracts people to an establishment which would never interest otherwise. These customers continue to come in, and after a while begin to patronize other departments as well as the repair shop. It is really difficult at times to refrain from smiling at the valueless articles that people have repaired, yet one must always bear in mind that these old relics are valued for their association, and therefore one should try to have repair jobs done right. Care exercised in these matters is generally appreciated.

One should always avoid excessive charges. Some judgment is required in stating cost of this work, and when one is in doubt an estimate is safer than a fixed price.

Recently a man called at a store that does repairing. He had a small job and was surprised when the completed work was delivered to him and charges were somewhat less than he had been led to expect. The confidence born of this small transaction led to quite a few of this man's fellow employes in the office being recommended to the same establishment, and ultimately resulted in the merchant's realizing large profits as a result of fair dealing to a newcomer.

To Regulate Show Window Crowds.

NOT long ago a great West End firm was summoned for having a too attractive shop window, which caused crowds to assemble to watch the fascinating display, says the London *Globe*. For years past tradesmen have complained of the attitude of the police toward them, and of the hindrance to trade caused by the fact that the enterprising man is penalized for making his show window a thing to be much admired.

In consequence the London shop-keepers have at last resolved to combine to protect their own interests, and an important meeting will be held to discuss the subject and to appoint the deputation to wait on the Commissioner of Police, with a view to obtaining the official regulation of shop window crowds. The complainants point out, with some reason, that the theaters are not fined for attracting crowds 50 yards long before their doors are opened.

The crowds are regulated by the police, who marshal the theater-goers in long rows along the curbstone, instead of allowing them to stand in unwieldy crowds round the doors till they are opened. Something of the same sort, they claim, should be done for the tradesmen whose shop windows attract crowds which are considerably smaller.

Storekeeping Department.

An Interesting Business Book.

"BUSINESS ADMINISTRATION." The principles of business organization and system and the actual methods of business operation and management based on a series of lectures delivered at the University of Michigan by Carl C. Parsons, supplemented by investigations of the editorial staff of *System*. Published by the System Co., Chicago, Ill. Bound in cloth, 232 pages.

THIS is a comprehensive treatise on the topic suggested in the title and contains a fund of information. Among the interesting chapters are: The Evolution of Business Systems, Principles of Business Organization, Administration, Accounting the Handling of Orders, Credits, Collections, Traffic and Shipping, Buying, Receiving and Stockkeeping, Cost of Production, Routine of Production, Methods of Paying Employes, Advertising, Sales Management, Retailing and Mail-Order Selling.

As will be seen the scope of the book is extensive, every chapter being filled with information and suggestions. The subject on advertising, that most important topic which is now considered so essential in the scientific marketing of a product, is especially interesting, and includes a card index system by which the advertiser can keep a simple and accurate record of the publication in which he buys space and also a record of the number of inquiries from orders received as a result of his advertising in the different periodicals.

In speaking of the duties of a selling organization the author says, among other things: "Three things the sales organization must do in the successful execution of its work. First of all, it must create an interest in and a demand for the product it has to sell. Second, it must arrange for the distribution, and, third, it must actually sell the article. In substantially every case the first requirement will be effected through an advertising campaign conducted either by the sales manager himself or by an advertising manager closely associated with him. Twenty years ago this phase of sales work was scarcely considered in placing a new article on the market. The salesman was given his catalogue and his order book and sent forth dependent upon the effectiveness of his own tongue to make both the first impression and also the closing argument.

"To-day such methods are so obsolete as to be practically unknown, while advertising has become so mighty a power in multiplying the efficiency of the selling force that it is absolutely essential to successful sales promotion."

The chapter includes information on preparing follow-up material, requisites of an advertising booklet, choosing a medium among publications, keying advertisments, figuring advertising cost, and so on. Retailers will read the chapter on "Retailing" with much profit. "Traffic and Shipping" is another chapter which will be found very helpful.

In a word, the enterprising merchant will find the volume a most desirable acquisition to his business library. R. F. N.

Japanese Precepts on Business.

LUCK hovers around the house of smiles.

There is no mercantile success without fine diplomacy.

The hard business machine works quicker when greased with the oil of human and kindly consideration.

The best way to conduct a business is to follow the example of the traveler who, with a heavy burden upon his shoulders on a long journey, neither hurries nor stops, but slowly moves forward.

A good speech is a short one, so is a letter.

The sample, the advertisement and the sign over the store should tell the truth perfectly.

When asked for the chisel, give the hammer also.

Of all enemies, your own negligence is the very worst

Wealth and happiness are the productions of effort.

To get a large return from men, overlook small faults in them.

One's business ability can be measured by one's borrowing capacity.

No risk, no prize; he who dare not go to the tiger's den cannot get a cub.

Make your rules and regulations simple and let your system stay unchanged, for it will inspire confidence.

When men borrow money they smile like Buddha; when men return money, their attitude is painfully evil.

First choose the right time, next the right place and then unite your forces in harmonious operation.—*Canadian Pottery and Glass Gazette.*

See next week's issue for original displays for Graduation Day.

Display by an Enterprising Jeweler of Harrisonburg, Va.

HERE is an effective window display made during the Easter season by John W. Taliaferro, Harrisonburg, Va. The show windows themselves are very attractive, being backed by plate glass mirrors. Extending diagonally across the window was an arch supported by two silvered columns. Entwined around these and the arch were Easter lilies, while a "dove of peace" was suspended from the ceiling. Purple and white baby ribbon hung down from an arch and was tied at each column.

"Lady Virginia" was represented driving four cute little bunnies that hauled a wagon laden with watches. Purple crosses adorned the bottom of the window. On these crosses

WINDOW DISPLAY MADE RECENTLY BY J. W. TALIAFERRO, HARRISONBURG, VA.

were displayed rings and diamond jewelry.

In the opposite window a special display of silverware was made. The artistic use of lilies and violets made the window show up very beautifully.

The concern has been established for about 30 years, Mr. Taliaferro being the official watch inspector for the B. & O. and Southern railroads. His business has been built up considerably by enterprising methods, over 3,500 watches of one make having been sold during the past five years. The store was remodeled only a short time ago.

Mr. Taliaferro is a firm believer in timely window displays and newspaper advertising, and attributes much of his success to these two factors

F. W. Edwards & Son, Rochester, N. Y., have purchased a part of the Cornwall building in order to secure more frontage for their store. The portion of the building which has been purchased is now occupied by E. W. Sheer & Co., jewelers, and by another concern.

There are no other lines in the market that are more particularly adapted for the Jewelry trade than

Marseilles Pottery, Its Origin and History.

THE factories of ceramics in the city of Marseilles must date back at least to the end of the 17th century, if we rely on an inscription on the reverse of a dish found by Baron Davillier and which bears the name A. Clerissy, à Saint-Jean du désert à Marseille, with the date 1697.

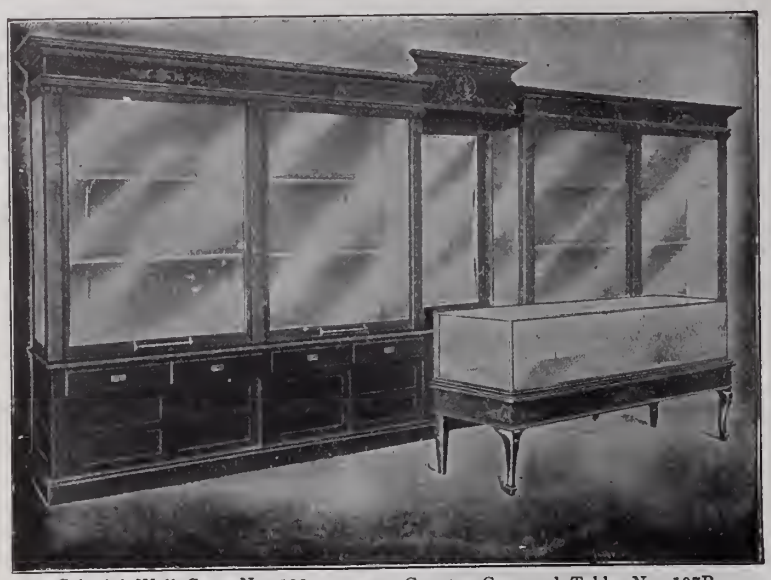
ODD ORNAMENTS. MARSEILLES FAIENCE.

This Clerissy was, there is great reason to believe, a predecessor of the one who was found among the manufacturers of Moustiers and who, having in 1743 obtained letters of nobility, had ceased to manufacture in 1747.

Towards the middle of the following century the manufacturers of faience established at Marseilles, outside the gates and at La Joliette numbered 10, and their output was considerable, for during the year 1766 alone their exports to the French West Indies were not less, according to the abbé of Expilly, than $100,000.

The most celebrated of these factories was that of Honoré Savy, about 1750, who received in 1777, on the occasion of the visit of the count of Provence to Marseilles, the title of "Manufacturer to the King's Brother." Next in order was the factory of Joseph-Gaspard Robert, whose faiences are often set off with gold and sometimes bear, on the reverse side, the initials of the maker; then those of the widow Perrin, whose products are frequently marked with a monogram composed of the letters "V. & P."

The faiences of Marseilles offer, as has often been remarked, numerous points of resemblance with those of the Moustiers, while still preserving a character distinctively their own, a character which they take, not from their rock-work shapes, which sometimes recall the style of Strasburg, but rather in the use of certain colors, such as green, originated by Savy and which is known by his name, and also the use of manganese mixed with cobalt blue. As to the *fleur de lis*, which is often found on the bottom of pieces of the 18th century (and which has been thought to be a distinctive mark of the factory of Savy growing out of his patent in 1777), it is used, it must be conceded, on products of widely different origin, and if it sometimes characterizes work coming from Marseilles it would be a great error to attribute to them any monopoly of this mark, which appears to have been common to several centers of manufacture, principally in the south of France.



TUREEN, MUGS, ETC. MARSEILLES FAIENCE.

Glass and Crystal Ware for Siam.

ACCORDING to Vice-Consul-General Carl C. Hansen, of Bangkok, the average imports of glass and crystal ware into Siam for the last five years has amounted to $133,564 yearly, the amount for the last fiscal year reaching $151,621. The share of the leading countries in these imports were as follows: United States, $1,071; United Kingdom, $39,282; Germany, $36,323; Belgium, $10,857; France, $8,814; Japan, $4,843; and all other countries, $50,431.

Glass ware is now used for many purposes for which formerly beaten silver vessels were used, such as betel sets, the various vessels and trays for the temple service, and cups and vases for holding flowers. Formerly glass windows were rarely seen in the houses and shops of Bangkok, but

An Interesting Art Clock.

AN art clock of the 17th century of peculiar construction was owned by Nicolas Grollier de Serviére of Lyons, a lover of mechanical contrivances famous for his collections. In 1719 his grandson wrote a description of the entire collection, with copper engravings. The hour figures of this clock were written around the edge of a water basin. Shortly before the completion of an hour an artificial tortoise sprang from the water and swam around the basin, coming to a stop exactly at the hour and in front of the corresponding figure. The minutes were indicated by a lizard climbing up a pillar. At the top of the pillar a mouse slipped out of a hole as many times as the number of hours elapsed.

Mark Ridout, for some time employed as jeweler by L. J. Mosher, Owatonna, Minn., has purchased the business of L. H. Fuller, at Waterville, Minn.

An Anniversary in the History of Porcelain Manufacture in Copenhagen.

THE first of January of this year completed the quarter-century since Prof. Arnold Krog, of the Royal Porcelain Manufactory, of Copenhagen, took the position of its art director. He was born in the village of Frederiksvaerk, in the province of Zeeland, amid picturesque natural surroundings, which he learned, even as a child, to love. After leaving school he chose the profession of an architect, and entered, after some further study, the Royal Academy of Art in Copenhagen, where he was received into the circle which centered around such artists as Tuxen and Kroyer, the architects Nyrop and Bosch, and the poet Drachmann.

The year 1884 was a turning point in Krog's career, for at this time he was persuaded to undertake the task of director of art in the Royal Porcelain Manufactory. The rank which the manufactory held was that of any ordinary porcelain works. It was reserved for Krog to create the new style which is now making its way all over the world, and which all manufacturers of porcelain are imitating or developing.

"Earn thine inheritance anew, wouldst thou possess it." The admonition of the poet has been faithfully taken to heart by this Danish artist, and as faithfully obeyed. He has never been content to rest upon the achievements of the past, or simply to modify and develop what was already at hand. The beautiful material which, in its early days, lent itself so incomparably to the gay and capricious rococo style has had a renaissance in the master's hand, but with what a difference! The beauties of his native land are reflected in his work, true to form and color. The pale sky of the north, the changeable tones of the landscape, led of necessity to the use of under-glaze colors, and thus to the new style, which seems to portray dreamy and poetic moods, with a touch, perhaps, of sadness. We feel the spell of days long past, and that which speaks to us is the true old Germanic spirit.

The style of which Krog was the creator originated, as every new style must, in necessity, and it had the effect of a revelation. Denmark gave it a name, but it is not merely Danish—it is Germanic.

The influence of Japanese art upon Krog has been pointed out, says the *Keramische Rundschau*. It is doubtless true that the fine Japanese pottery which he saw in Paris taught him to see with different eyes. But in no degree did he imitate it; it was only the means of directing his attention to the rich treasures of his native land, which still awaited a discoverer. These treasures he has scattered with a lavish hand. His art has its foundation, not in the Orient, but in the North.

Some critics have tried to bring the Copenhagen under-glaze painting into contrast with the older and more brilliant enamel painting, to the disadvantage of the former. But why compare two such absolutely different tendencies in art? Have we less pleasure in the fragrance of the violet because the orchid surpasses it in vividness of color? Krog himself has never attempted to claim any superiority for his technical methods. On the contrary, this master of the process of sharp-burning (great fire) has of late years turned his attention to the enamel colors which he is accused of having brought into disuse. He has diligently studied the products of the Copenhagen factory from the end of the 18th century, and exerted himself to revive the former processes. This, however, could not suffice. He must go forward, building a new ceramic art on the foundations of the old, to which end his instinctive feeling for beauty of outline will show him the right way.

We may hope that his creative genius will open new paths to the art of enamel painting. It may be that the master of under-glaze painting is destined to raise enamel, which he has been unjustly accused of neglecting, to the same artistic height which has thus far characterized all his work.

WORKSHOP NOTES AND QUERIES

[Answers are also solicited from our readers to the questions published on this page.]
No attention paid to communications unless accompanied by full name and address of the writer.

QUESTION No. 2558.—**Waterproof Paint for Metal.**—*We have some metal statuary which we place outdoors during the Summer months. Can you give me a formula for making a waterproof paint suitable for this metal?* *W. P.*

ANSWER:—A paint suitable for this would be three parts of Venice turpentine; one part of mastic is put into heated turpentine and to this are added 96 parts of linseed oil. The whole is heated on a water bath until the odor of the turpentine has completely disappeared. With 115 parts of this varnish rub down 20 parts of well burned, freely ground clay, 80 parts of the best Portland cement, 10 parts zinc white and five parts of red lead. After the whole has been well ground and thoroughly mixed together add 25 parts of oil of turpentine. This will make a serviceable waterproof paint suitable for many metal ornaments

QUESTION No. 2559.—**Acidulous Oil.**—*How can oil be freed from acid?* *K. R.*

ANSWER:—To four ounces of the best spermaceti oil, add four grains of Kali acratum, in five ounces of distilled water, shake well for a day or two, then pour the whole into a covered tumbler and, when exposed to the light for three or four weeks, the pure oil will float on the top and may be skimmed off by a teaspoon. This oil, it is said, neither dries nor turns green.

QUESTION No. 2560.—**Cleaning Gold Enameled Jewelry.**—*How can I clean gold enameled jewelry, such as badges and class pins, without cracking the enamel?* *C. G.*

ANSWER:—Gold enameled jewelry is usually well enameled, so there is little danger of the enamel cracking off during the cleaning. Wash the jewelry in warm, strong soap suds, to which is added a little ammonia. With a soft cloth, or, better, a sponge, wash the piece for several minutes until every part looks clean; then rinse in cold water to remove all the soap suds. Next wire the jewelry on a soft wire and dip in a cyanide dip; rinse off again in water and, finally, dip in clean hot water, or denatured alcohol. Finish by drying in clean saw dust. The above operation usually cleans the jewelry unless it is very badly tarnished. If badly tarnished, the pieces require scratch brushing with a fine matted brass wire scratch brush revolving on a lathe and lubricated with plenty of licorice or bran water. The pieces should be held against the scratch brush lightly, or so that the ends just touch the gold. The use of licorice or bran water will prevent the wires from scratching or matting the pieces. After this the pieces should be washed in soap suds, rinsed, dipped in hot water or alcohol and dried in saw dust. Very often the gold will appear dull after this and the pieces require polishing on a cotton flannel wheel and a little rouge, or crocus, after which the pieces are again washed as explained above.

An Improved Method of Electroplating.

(Lecture delivered by AUGUSTUS ROSENBERG before the Royal Society of Arts.)

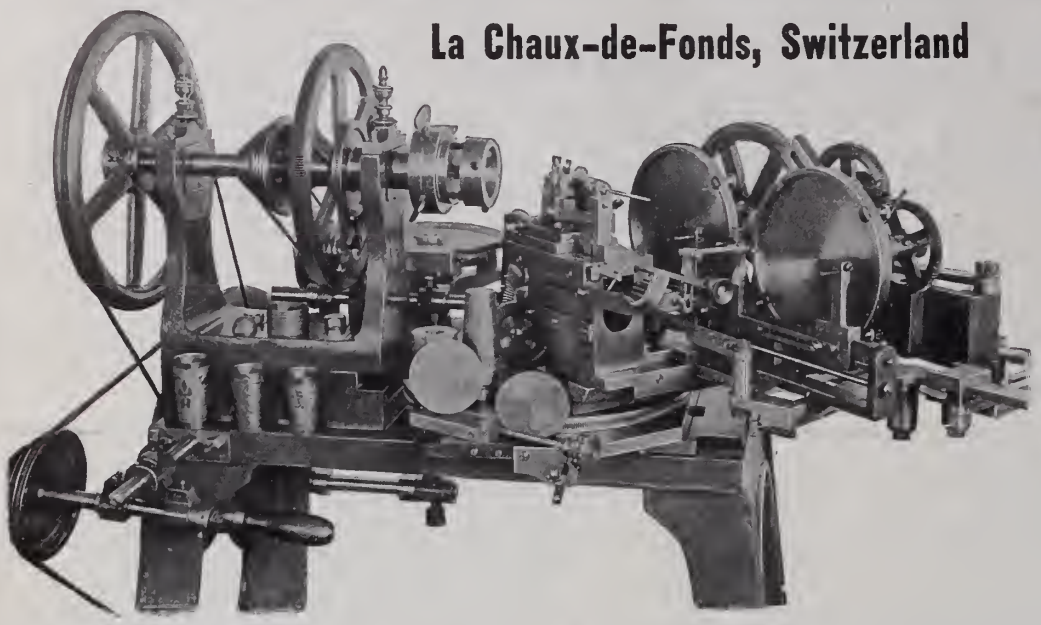
(Continued from issue of April 13.)

NOW, in view of the fact that the previously described processes can only be carried out by persons who have been specially trained, I some years ago set myself the task of endeavoring to devise a process which should enable any one without any technical training or scientific knowledge (in fact, any person of ordinary intelligence, or even a child) to produce an electrolytic deposit. The task was no light one, for the reason that to attain success it was absolutely necessary that (1) no heating or baths, no cyanide, mercury, or other poisonous ingredients should be employed, and (2) that the use of a multiplicity of powders or liquids should not be required. Furthermore, it was necessary that the process should be quick in its action, produce a thick, coherent and bright deposit, require no after treatment, and contain no free acids or other injurious ingredients likely to injure the person or clothes or stain the hands. Lastly, it was necessary that the objects to be coated should not require to be chemically cleaned, that in the case of iron or steel the objects should not require to be previously coppered, and, above all, that the method should be so cheap as to be within the reach of all.

I first commenced operations in the year 1900, and soon realized that the task I had set myself was beset with difficulties, the elucidation of which called for numerous experiments. As a consequence, it was only towards the latter part of the year 1902 that I found myself on the right track (and even then the results I obtained were not wholly satisfactory), so that the close of the year 1903 had arrived before I could congratulate myself on the fact that my work was beginning to show practical results. Even at this time I was unable to attain the success with cobalt and nickel that I had achieved with the other metals. In fact, it was only in 1905 that I was able to deposit all those metals which are generally deposited, including nickel, as well as various alloys, in such a way as to fulfil all the conditions I had laid down for myself in 1900.

It would occupy too much time to enumerate the different experiments I was obliged to carry out, but I should like to refer to one interesting discovery which I made during my work, and of which I make great use in the processes I am about to describe. I found it is not necessary to use a salt of the metal to be deposited, but that in certain cases the metal itself in its elementary form could be used. By the elementary form I mean either the pure uncombined element or the commercial (oxidized) form. In a process of this kind the possibility of thus making use of the element itself I believe to be entirely new; salts of the metal to be deposited appear to have been exclusively employed hitherto. Nevertheless, in some cases I find it preferable either to employ only a salt of the metal to be deposited or both the metal and its salt.

The new method consists in the use of a mixture of pulverulent materials, to which I have given the trade name of "Galvanit," and the deposition process involves in each case but a single operation, consisting in the application of a powder by means of a rag or brush and rubbing the object to be coated in the presence of moisture. No preliminary chemical treatment is required, such as dipping in caustic alkalies or pickling in strong acids. Provided the objects are reasonably clean and bright, they can be plated without such preliminary treatment. For in the rubbing with a rag or brush, concurrently with the deposition process, there is brought about a cleansing and polishing of the surface of the newly produced metallic deposit.



For deposition of each particular metal there is required a corresponding powder containing the appropriate ingredients. Zinc, cadmium, nickel, cobalt, tin, silver, antimony, bismuth, gold, platinum—in fact, all metals generally deposited by the "battery" process can be deposited from powders by the Galvanit process. Further than this, alloys such as brass, gun-metal, German silver, cadmium-silver and a number of others, can be similarly deposited.

Speaking generally, a powder containing any given metal can be used to deposit that metal on objects of any metal whatever, even if the metal to be plated is identical with that contained in the mixture; *e.g.*, zinc upon zinc, silver upon silver, etc. This was impossible under the old contact-process. The mixtures employed invariably comprise, first, some form (whether elementary or combined) of the metal to be deposited; secondly, an electro-positive metal in the uncombined form; and, thirdly, a substance which is capable of producing an aqueous electrolyte when brought into contact with moisture.

With regard to the electro-positive metal to be employed, magnesium is the most electro-positive metal which it is practicable to use; and it is of general application. In some cases, however, a less electro-positive metal such as aluminum, zinc or cadmium works well enough. The choice of the electro-positive metal which is to serve as the anode depends both upon the metal to be deposited and also upon the nature of the receiving surface or cathode to be coated. Thus, zinc can be used for depositing nickel on iron or steel, but not for depositing

Workshop Notes Department.

nickel upon copper or brass; whereas, on the other hand, magnesium will work well in both cases.

If the metal to be deposited is present in the form of a salt, this salt, in conjunction with the moisture, serves as the electrolyte. Therefore, two ingredients will theoretically be required, the salt and the electro-positive metal: but in practice we find that by mixing a salt, say tin chloride, with an electro-positive element, such as zinc or magnesium, a violent reaction takes place, evolving great heat, and the mixture is spoiled for practical purposes. Even if this reaction did not take place the deposition would be too rapid, and the coating would be uneven and of a bad color, or, as they say in the trade, "burnt on." Therefore I find it advantageous to add to the mixture certain substances which are relatively inert, such as chalk, soapstone (*talcum*), kieselguhr, boracic acid, dextrine, etc. These substances act first as a diluent, and secondly as a polishing medium; and as the materials employed possess an inherent tendency to react upon one another, these substances act as a coating and prevent premature action.

It was while experimenting to overcome this difficulty of premature action that I found that it is not necessary to use a salt of the metal to be deposited, but that the metal itself can be used instead. The reaction involved is, that if the metal be originally present as a salt, then the electro-positive metal simply displaces it, so that it becomes deposited upon the object forming the cathode. If, on the other hand, the metal be originally present in the elementary form, then it first becomes transformed into a salt of the metal, and is thereafter displaced and deposited on the cathode. In this case it is only theoretically necessary to make a mixture of the following ingredients: (1) The metal to be deposited in its elementary state; (2) a salt, preferably a salt of ammonia; and (3) the electro-positive metal. But here, again, we meet the same difficulty as in the mixture previously mentioned. It is essential to keep the mixture dry and to prevent the salt acting on the electro-positive metal.

I will now give an example of a practical mixture containing the metal to be deposited in a metallic state instead of a salt, say, for example, such a highly electro-positive metal as zinc:

ZINC FORMULA.

Zinc	15	parts	by	weight
Ammonium sulphate	5	"	"	"
Magnesium	1	part	"	"
Chalk	10	parts	"	"
Soapstone	2.5	"	"	"

The ordinary zinc dust of commerce is quite good enough for our purpose, notwithstanding the considerable proportion of oxide and other impurities which it contains. If we wish to deposit some other metal instead of zinc, say cadmium, we simply substitute in the mixture metallic cadmium in place of the zinc. The talc serves the purpose of preventing the mixture from absorbing moisture, either when stored or when exposed to the action of the atmosphere for very long periods of time. The chalk in the above formula is useful as a diluent or filling and as a polishing agent. It is, moreover, useful as a source of alkalinity. I have found that the same conditions which, in wet processes, render acid baths preferable for some cases, and alkaline baths for other cases, are to some extent applicable to the Galvanit process; and, accordingly, I sometimes find it desirable to add acid or alkaline ingredients, as the case may be, so that the compositions may have either an acid or alkaline reaction in the presence of moisture.

A point which should be mentioned here is that the nature of the electrolyte modifies the color of the metal coating deposited; for the color of the deposit may be caused to vary from a dull blackish tinge to a bright white luster, according as the electrotype employed varies from alkaline to acidic.

As acid ingredients I would instance powdered organic acids or boracic acid, and as an alkaline ingredient dehydrated sodium carbonate. The ingredients which are to be intimately mixed together form the constituents which are essential so far as the actual deposition process is concerned, and which may, therefore, be termed "essential active ingredients."

Briefly stated, the new deposition process depends upon a principle which I may call self-excitation, *i.e.*, upon the reaction which immediately ensues between one ingredient (the electro-positive metal) and the other ingredient (the metallic salt) so soon as the addition of moisture to the mixture converts the latter into an electrolyte. In this reaction the electro-positive metal constitutes the anode, and the object treated the cathode; and as Galvanit contains a quantity of finely powdered electro-positive metal, it makes innumerable contacts with the cathode surface, and acts as so many minute anodes.

These innumerable minute anodes gradually dissolve, and in dissolving set up in the liquid little local calculations of electric currents. The circuits are so excessively small, so exceedingly near together, and so numerous that they cannot be separately observed, and the surface of the metal becomes the seat of innumerable concomitant voltaic and electrolytic actions. Thus the potential or stored-up energy of the elementary substances in the powder is converted into electric current, and as these currents leave the liquid they throw down from the metallic salt in solution a thick film on the cathode, and it becomes plated over with a deposit.

A probable explanation of the formation of the metallic deposit is that the water is decomposed, the salts in contact with the cathode are reduced to the metallic state by the nascent hydrogen, and the acid thus formed is prevented from corroding the deposited metal, both by the motion applied and by being immediately removed into the mass of the liquid by diffusion.

In order to make clear the particulars wherein lies the difference between my contact-process and previous contact-processes, it is desirable briefly to compare certain features of the present process with those characterizing prior processes. In previous contact-processes there always existed a great resistance, as is found when bringing two metals into contact at their upper ends, either by means of a wire or otherwise, and immersing their lower ends in the liquid, or by allowing the metals to touch each other in the solution. Under these circumstances a current passes from the positive metal, through the liquid, into the negative metal, producing electrolysis; the current returning by the external circuit. The positive metal also acts simultaneously by simple immersion-process.

This contrivance also enables the negative metal to receive an electrolytic deposit in a liquid which it does not decompose by "simple immersion," because the second metal offers a second path of return for the re-entering current. The facility with which a liquid can be decomposed is influenced by the length of the liquid portion of the circuit, for this is the part in which the greatest resistance exists to the passage of the current. This has been shown by Gladstone and Tribe, who decomposed water by immersing in it a zinc plate previously coated with a loose deposit of spongy copper; whereas two plates of those metals connected together and immersed at a short distance from each other in the liquid would not decompose it. They have thus shown that the dissociation of a binary compound may take place at infinitesimally short distances when it would not take place where the layer of liquid is enough to offer resistance to the current. ("Proceedings of the Royal Society," Vol. XX., p. 219.)

My new-contact method works on the principle thus discovered by Gladstone and Tribe. In my process, as in their experiments, the resistance is greatly diminished, and therefore the strength of the current is increased by making the lengths of paths in the circuit indefinitely small. They also observed that a copper-zinc couple separated zinc from an aqueous solution of zinc sulphate. ("Journal of Chemical Society," Second Series, Vol. XI., p. 453.) The decomposability of liquid electrolyte is generally increased by heat, and I found this also to be the case with Galvanit. Although a rise in temperature is not necessary to the successful use of Galvanit, in some cases a quicker and thicker deposit of metal can be obtained with the aid of heat. To accomplish this we have three methods at our disposal:

(1). To heat the article before applying "Galvanit";

(2.) To select the ingredients of our mixture so that while they are decomposing they evolve sensible heat;

(3.) To use magnesium as the electro-positive ingredient.

To illustrate these last two methods, I will instance a powder for deposition of nickel, consisting of the two ingredients theoretically necessary, viz., the electro-positive metal and a salt of nickel. The formula is: Nickel ammonium sulphate, 20 parts by weight; magnesium powder, two parts by weight. When a moist rag is dipped in this powder and rubbed upon a cathode, say, a copper penny, simultaneously with the deposition, considerable heat is evolved, so that the cathode becomes quite warm.

(To be continued.)

ESTABLISHED 1857

BOSTON NEW YORK CHICAGO SAN FRANCISCO

THE BEST JUDGES

are the most critical as to the cutting, when considering the worth of a diamond—it's the cutting that makes the diamond brilliant—it's because of its brilliancy that the diamond is so highly prized.

The diamonds we offer are cut in our own cutting works, and no effort spared to see that they are cut right. The price we ask for them—the actual cost of the rough stone, plus the workmen's wages, with our modest profit added.

BE CAREFUL

Where you send your old Gold and Silver

Every Jeweler knows that Old Gold is worth four cents per karat. The point is, however, to have your Gold graded properly. If you send it to anyone who has not the requisite knowledge and experience in testing, he will be sure to give himself the benefit of the doubt.

And again, if you send your Gold to a refiner who will not give you a valuation without first melting and refining same, you would be compelled to accept his valuation, whether satisfactory or not, as all complaints could be met by the stereotyped reply, "Your Gold is melted and you received all it was worth."

Here is where you see the advantage of

OUR PLAN

If you send your old Gold, Silver, filled and plated and platinum to us, we will value same immediately and send you a check, draft or money, as preferred.

If our offer should not prove satisfactory (which is a very rare occurrence), we will *return the shipment* in exactly the same condition as received and pay all charges.

THE KELLER JEWELRY MFG. CO.

FACTORY: 251 N. J. R. R. Ave., Newark, N. J. **64 Nassau Street, NEW YORK**

TO THE TRADE:

"A principle which we have always fought for has been to keep the market open for all watch cases, no matter of what manufacture, believing it to be for the best interests of the trade to allow them to buy the watch cases which they consider the best on the market and by so doing stimulate all manufacturers to their best efforts, with a view of establishing a high standard of excellence. The Dueber Watch Case Mfg. Co. in all its many years of existence has never sought to dictate to any jobber what watch cases he should use. It has never used, directly or indirectly, any method of coercion or force to either restrict the product of any watch case manufacturer, or to force the production of its cases upon any wholesale or retail jeweler to the detriment of any other manufacturer of watch cases. It employs the 'open door' policy in selling merchandise and believes that the trade should be open to all manufacturers and jewelers alike and to that end will bring all its energy to bear for the good of the entire trade."

THE DUEBER WATCH CASE MFG. CO.

CANTON, OHIO.

WE ISSUE CATALOGS THAT INSURE THE SUCCESS OF YOUR BUSINESS

There are many features in connection with our Catalog Proposition which are worthy careful consideration. Let us send you samples and explain how we can increase your business from 50 to 100 Per Cent.

This Firm Has Used Our Catalog System For Six Years.—NOTE WHAT THEY SAY ABOUT IT.

STORE OF HENRICKSEN JEWELRY CO., DULUTH, MINNESOTA

(COPY OF ORIGINAL LETTER)

THE ARNSTINE BROS. COMPANY, Cleveland, Ohio. DULUTH, MINN., February 14, 1910.

Gentlemen: It gives us great pleasure to express our opinion as to the benefit and result through the use of your Catalog. For the last six years we have used it with pronounced success, believing it has aided materially in increasing the business each year over the previous one. You are certainly to be complimented on your thorough knowledge of the catalogue business, as your accurate system and mode of improvements in issue from time to time come up to the expectancy and demand of the most critical. The goods are of a high-grade and placed before the customer in a tempting manner, and we at all times feel the working power of the Catalog.

It is all very gratifying and speaks volumes for the good work your catalogs have done for us. We can state that our last book was admired by all recipients, a great many taking the trouble to write or telephone to thank us for them.

Wishing you success in your future labor, we are,

Respectfully,

As the Watch Ticks Time Away

The Wadsworth 25-Year "PILOT" Case

HOW MANY TIMES does a watch tick in twenty-five years? You don't have to answer it. It is enough to think of it, and even that almost makes one tired. So many years of constant "tick-tick" might wear out the movement at last, leaving only the

WADSWORTH 25-YEAR "PILOT"

Watch Case to survive it. Looking at the question another way, the child in the picture would have time to grow up and maybe have a child of its own who will hold the same "PILOT" case and listen to the ticking of the watch. The case to recommend.

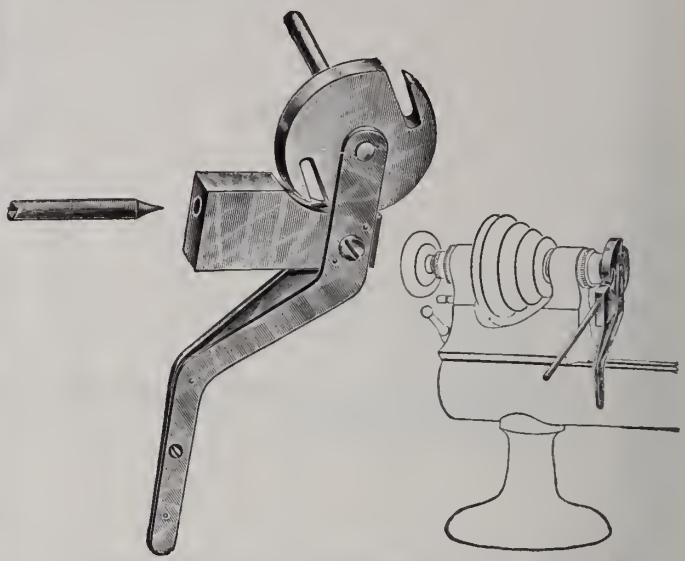
DIAMOND AND STONE SETTING TOOL No. 85 (Pat. Applied for)

The only tool that will do the work correctly and quickly.

These tools, invented by a stone setter of many years' experience, will do the work they are intended for with absolute perfection, whether in the hands of an experienced or inexperienced workman. In eight seconds after adjustment in lathe will cut a smooth seat for any stone from 1/16 to 2 carats.

Tools are made of polished and hardened steel and are indestructible. Will fit in chucks Nos. 30 and 44.

The greatest labor saving device ever invented in the line of stone setting cutters. Put up in neat block and box.



Price, Per Set, $5.50

SETS OF ECHARCO GRAVERS

containing the most useful shapes and sizes, including handles. Put up in neat Morocco Box:

No. 126.....Sets of 6.....$2.75
No. 127 ..... " " 12.....$4.75
No. 128..... " " 18..... $6.50

Cut is about half size.

PEGWOOD SHARPENER, No. 3

A new attachment, designed for use on a watchmaker's lathe, which sharpens pegwood to a hair point without breaking, and at the same time gives the point the proper concave shape. The tool is held in the lathe by an arbor fitting into a regular wire chuck as shown in the illustration, being steadied by the rest shown. The stick of pegwood is rotated by band while the tool is revolved in the lathe, producing a fine, long, flexible point. With this tool the watchmaker can prepare enough pegwood for a day's or a week's work in a few moments, and have every piece uniformly and evenly sharpened.

The tool is mechanically perfect, made of the best material, is durable and cannot get out of order. For sharpening the cutters the use of a fine Arkansas oil stone slip is necessary. Coarser abrasives should not be used.

Price, each $2.00

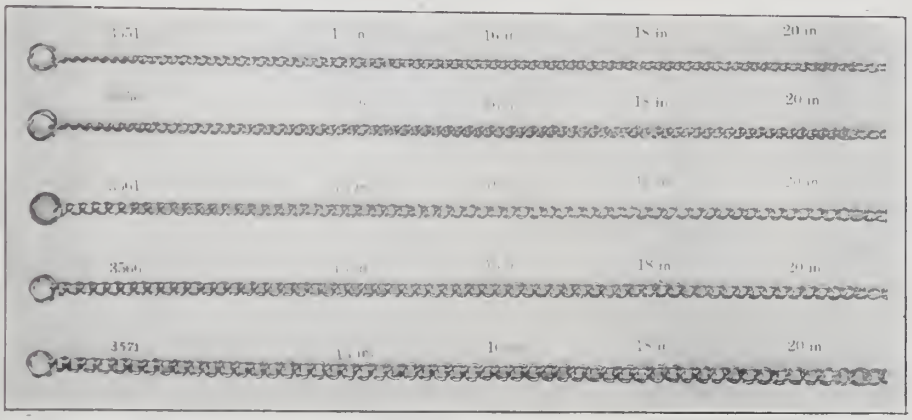
OCTOPUS ENGRAVING BLOCK ATTACHMENT No. 85

Pat. May 11, 1909

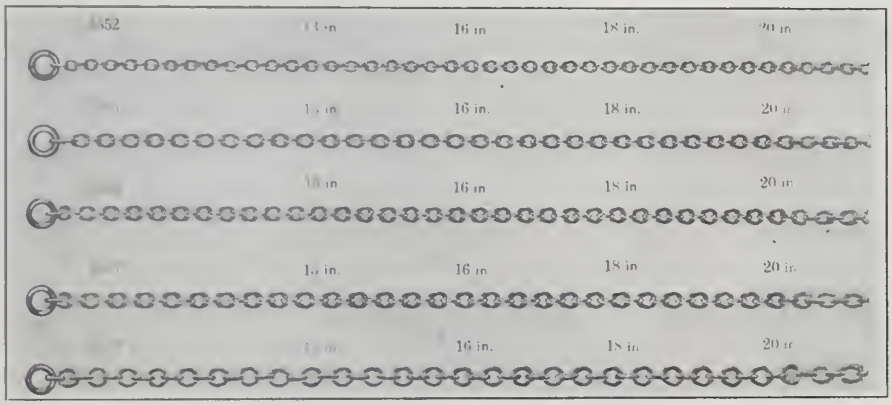
Illustration is exact size of Attachment

In order to perfect an attachment that would fit any engraving block, and, at the same time, *hold everything* that came within the spread of the engraving block jaws, long study was required to design the combination of gripping surfaces that are assembled in such a small space.

This has long been considered an impossibility, but the Octopus Attachment now stands to disprove this pessimistic assumption. Our claim of pre-eminence for the Octopus Attachment lies in its general construction and simplicity of operation. Its predominating features are *efficiency, rapidity, economy* and *adaptability* to the wants of the engraver, who, for years, has been in need of an attachment that would relieve them of the encumbrance incurred by the use of the numerous pegs and other appliances, and, furthermore, admit the many articles of jewelry and silverware that have previously been found impossible to hold.



The four adjustable pegs, as shown in the illustration, are inserted in the peg holes of the engraving block, and the guide rod retains the two jaws in perfect alignment to each other while in operation.



A partial list, showing articles that can be clamped and where held in this attachment, is sent with each tool—a thoroughly well made tool and finely nickel plated.

Price each $4.50.

An Economical Process Means Lower Price

Quality that Courts Comparison

Quotations that Defy Competition

A **REVOLUTION** in chain making has been achieved by the **radical improvement in manufacture** perfected and operated at this factory. All other methods are now obsolete in comparison. Goods thus made are known as

New Process Chains

All rolled plate. Each link separate and perfect (no figure-**8** links). Remarkable for **mobility and elasticity.** Will not kink. Excellent as these chains are, their prices are surprisingly moderate. At your jobber's. Look for trade-mark on tissue.

Warm Weather Sellers
SIMMONS GOLF CHAINS

Simmons golf chains are first class warm weather sellers because they are designed especially for warm weather wear.

They are seasonable chains—that is, chains that can be worn without a vest—and, in consequence, they appeal to the buying public.

The safety fastener, which is our own patent and cannot be had with any other chain, is simple, practical and absolutely secure.

It is easily and quickly adjusted to trousers band or coat and when on, cannot be pulled off.

Furthermore, having no prongs it will not tear or wear the clothing.

In a word it is the most satisfactory security device for watch chains yet invented, and is enthusiastically endorsed by all who have worn it.

Simmons Golf Chains are made in a wide variety of chain patterns, and are for sale by all reliable jobbing and wholesale jewelry houses.

Suggestion—Try a trial dozen.

1000 BAGS DAILY

It is estimated that there are fifty million women in the United States. Not over two million have mesh bags. **We** must supply the other forty-eight million with machine-made mesh bags.

The reason why machine-made Mesh Bags are better than hand-made Mesh Bags is

that we use **much harder wire** than **is** used on hand-made bags, and machines harden it still more in working, making wire **stiff and strong,** no **rough joints to catch,** and wear the dress. Stronger and better than soldered mesh.

We also make the only **ABSOLUTELY SOLDERLESS FRAME EVER MADE,** other **so-called solderless** frames have joints or some parts soldered.

We are the **sole** manufacturers of machine-made mesh with **solderless** frames.

Genuine Variety in Designs

The number of our producing plants makes possible a wide variety of designs. This is true in the sense not only that the actual number of patterns is great but that the variation in style is marked. That is, the variety is genuine and one design is not merely the modification of another. This is largely due to the fact that the designing is done at places so widely separated from one another.

We call attention to our patterns in

STERLING SILVER

Our Decreased Selling Cost Gives You Greater Value

We offer you high quality sterling silver and silver deposit ware at lower prices than you have ever before paid. Selling direct by Mail from the home office makes this possible. Owing to the decrease in the cost of marketing our goods we have revised the listing on our entire line.

TRADE W MARK

There are no expenses of salesmen to be considered in the price quoted you. Every piece represents only the manufacturing cost plus one fair profit. The purchasing power of your money is increased. You can carry the same volume of stock at a greatly reduced cost, or substantially add to your line at small expense. The result is

15% to 20% More Profit to You

3347
APPLIED BORDER.

We maintain the same standard of excellence in design and workmanship. Every piece of our sterling silver and deposit ware is made in the same careful manner that has won and held your confidence for fifteen years. The illustrations are characteristic of the value of all of our line. The pierced design on the bread tray is new and original with us and is decidedly attractive.

We make this pattern in many different sizes and shapes. The serviceable pitcher shown has a scroll border with shield for monogram, and is priced exceptionally low. The deposit is guaranteed to show pure white inside and last the life of the piece.

Our catalogue will prove the advantages to be gained by our new price list. We will be glad to send you a copy. Write for it to-day. You can

The Matinee Lorgnette Locket and Chain

Something **new, ornamental** and **useful,** as the locket contains a mirror and place for picture. This is our latest creation and has jumped into favor from the start, as our salesmen now on the road showing an extensive line of these goods are meeting with great success. Our "If for ANY Reason" guarantee on all our goods, the **strongest guarantee** ever placed on a piece of plated jewelry, assures you of getting the **standard of quality** and **workmanship.** ¶ Put yourself in touch with our new season's line, as it contains a new and complete assortment of **Bracelets, Lockets, Fobs, Vest Chains, Coat Chains, Pendants, Guard Chains** and **Neck Chains.**

We sell the Wholesale Trade Only. ¶ Watch for our new line of Genuine Platinum Plate Pendant Necks, mounted with white stones

Our Trade Mark "The Rose" stands for quality and excellence

REIGN OF LOW COLLARS

PIERROT COLLAR PINS

THE MODISTES of Paris announce the continuance of Low Collars—requiring appropriate Pins. To collars of this nature various names are being given, such as "Marceline," "Pierrot," or "Columbine" Collars; but in principle they are the same as the familiar Dutch Collar. This house is headquarters for the correct and artistic Pins in innumerable designs. French Grey with Coral, Amethyst, Sapphire, etc. The same stones also are set in Gilt mountings. Oriental Effects charm by their novelty and characteristic beauty. All add to Summer comfort the touch of grace and finish.

Manufacturer of

Fine Leather Goods

Exclusively for the Jewelry Trade

Our Line

This Year is Stronger Than It Ever Has Been

Just one of its many new features, interesting to the jeweler, is the Louis XVI. styles, in which is shown a number of engraved handles that are interesting to the fine trade. ¶ To be insured against competition, to be exclusive, and to be assured of a handsome profit,

"MAIDEN BALTIMORE"

recommend and display our **"Perfect Detachable Handle Umbrella".** ¶ We are the sole makers of the patented device which makes it different from the other styles on the market. Its talking points are simple and convincing. ¶ Our salesmen visit every part of the country, and if you will write us at the Baltimore address we will arrange to have you see these styles that have been made **exclusively** for the jewelry trade. ¶ We stand back of everything we make and will replace every piece that fails to give entire satisfaction.

Manning-Bowman Coffee Percolator

PERFECTED "NEW CONSTRUCTION"

Starting with *cold water,* through its automatic circulating process, you will have perfect coffee, near the boiling point, in a few minutes. It also works equally well when starting with hot water. By this method the coffee is never boiled, but is distilled, which is *the secret* of making delicious coffee. The GLASS COVER is so constructed that it *will not break* while in use. This important feature is not possessed by percolators of any other make.

COFFEE GOODNESS IS IN THE MAKING

The choicest blends of coffee can be spoiled in the making and any coffee can be made a clear healthful beverage if prepared in the

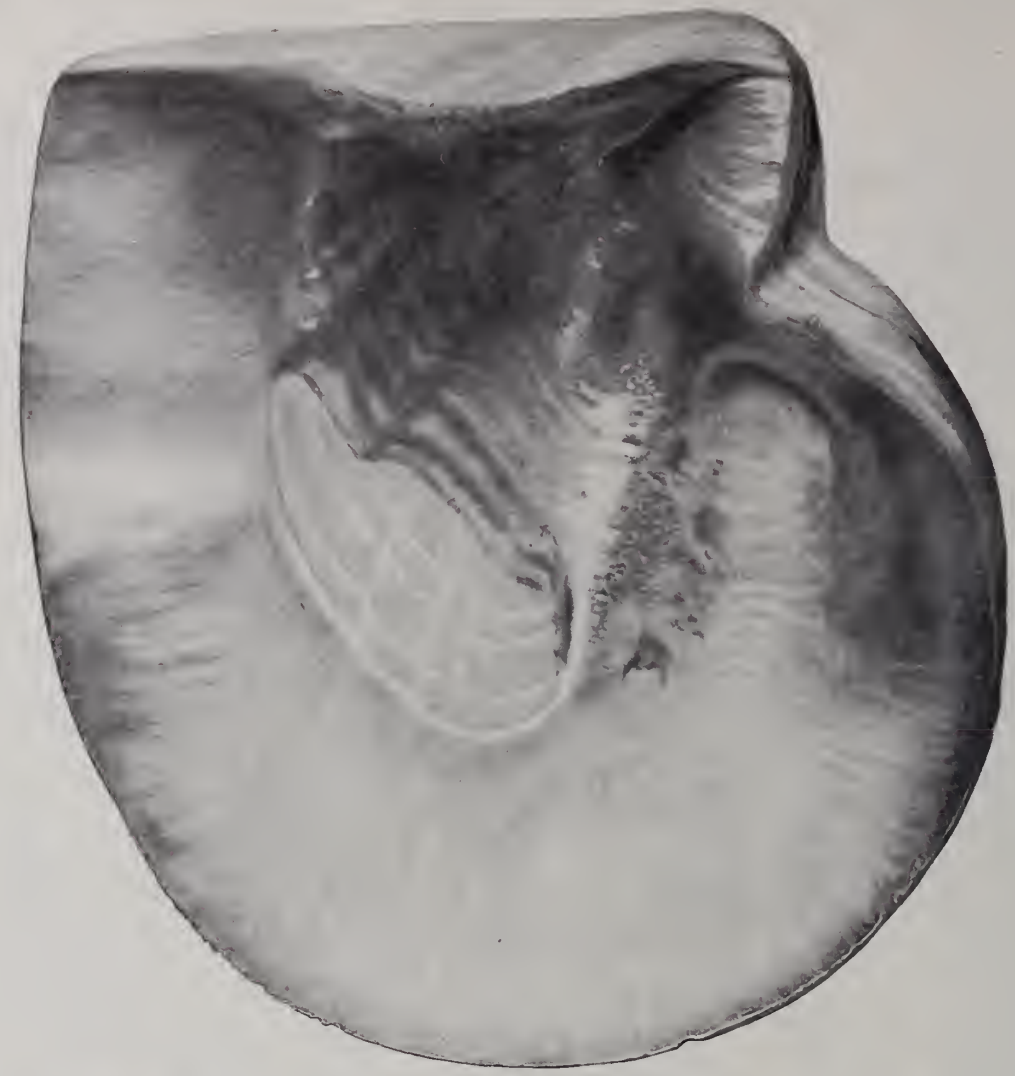
Interesting Silver Work at the Frohne Sale in Copenhagen.

THERE appears to be of late no dearth of acution sales of art antiques; probably the extraordinary high prices attained recently at different sales may have had something to do with this. In Copenhagen, during the week from Feb. 7 to 15, in the halls of the Academy of Arts, the important collection of the deceased builder, J. W. Frohne (a native of Fleusburg), comprising antiquities and art objects was offered for sale, foreign museums and dealers being conspicuously represented. The auction catalogue was prepared on the basis of Mr. Frohne's own notes, by Emil Hannover, director of the Danish Industrial Art Museum.

A cable dispatch stated that this sale would be "the largest and most interesting auction of old silver and china ware held in Europe within 10 years." As is usual with such reports, this was a gross exaggeration, but nevertheless the Frohne collection comprised many unique and valuable specimens of great interest. It included quite a number of silver objects, 13 ecclesiastical pieces, 30 jugs, more than 70 beakers and goblets, rings, smelling bottles, spoons, etc., as well as some enamels and works in rock crystal, and finally a collection of over 400 pairs of "candle snuffers" that at one time were an indispensable, now wholly obsolete, household apparatus. The buyers of these snuffers were mainly the Danish museums and the clock jobber, Schmidt, of Copenhagen. The prices, even for the silver ones, did not exceed 100 crowns each, including the saucer.



The collection also embraced a large amount of pottery of every description, of which we shall speak separately later, it being our present object to confine our attention to the silverware, of which we give two group illustrations, one on the front cover, the other on this page.

The principal event was on Friday, Feb. 11, a contest over the great silver cup which was at one time the property of the bakers' guild at Fleusburg. This cup, numbered 893 in the catalogue, is shown in the center of the group on the front page of this issue The Danish catalogue describes it as follows: Round foot with hammered floral ornamentation, baluster-shaped central portion, with three openwork ornaments; smooth high bowl with two rows of rings, from which are suspended 24 shields; high-domed lid with semi-circular panels or fields showing children; in the fourth place a crowned pretzel, over which is poised an angel, with a wreath at the side, and two women with sheaves, all in high relief.

TANKARDS, MUGS, CUPS, ETC., IN THE FROHNE COLLECTION.

The interspace is filled with relief figures. The lid terminates in a knob, on which is a winged sphere with a nude boy holding a flag. On the bowl is engraved a crowned pretzel, surrounded by a wreath of foliage flanked by two lions. The inscription on the bowl reads: "Drink and eat. Forget not God. As God wills, better envied than lamented; 1673." On the cup are engraved the names of 32 past masters, 24 of whom have donated shields. Altogether there are suspended on the cup 43 shields, from the years 1655-1814. Finally, there belongs to it a goblet, smooth, engraved with a

ORIENTAL MOTHER-OF-PEARL

The Mother-of-Pearl used in our Link Buttons, Larter Automatic Shirt Studs and Vest Buttons is not of the ordinary kind — it is cut only from the choicest parts of the finest quality Oriental Shells. Our method of hand-polishing these select pieces brings out a most beautiful lustre and color, and when mounted as men's jewelry, it produces an effect that appeals to all careful dressers.

The exceptional fine quality of Mother-of-Pearl — our Moderate Prices — and the many advantages of Larter Automatic Shirt Studs and Vest Buttons are creating business for all dealers who carry our Line of Mother-of-Pearl Jewelry.

Many new patterns have been added to this line, and our travelers and mail order department now have large stocks ready for delivery.

death's head, from which spring three ears (of grain) above three roses. Inscription: "Dethleff Sommer, Alderman, 1760. What God provides for me remains untouched by envy.' The height of the cup is 18¾ inches (47 cm.), and of the goblet 3½ inches (9 cm.). The weight of cup, goblet and shields is about 200 ounces.

This superb piece, after a lively contest with a gentleman from Cassel, was acquired for the museum in Fleusburg for 13,600 crowns by Director Sauermann. Frohne bought it at the time for 420 crowns. Of the remaining articles may be mentioned especially a heavy silver girdle richly ornamented with animals, birds, etc., in relief, as well as with pearls, enamel and turquoise, and at the back a piece of velvet with 12 buttons, showing open-work arabesques and pearls; this was sold to go to Germany for 870 crowns. Of the tablespoons, which sold at from 200 crowns down to 18 crowns, the choicest specimens went to the museums. One spoon, with a heavy six-sided shaft terminating in a cherub's head, whereas the bowl bore at the point the figure of an apostle, with engraved lily coat-of-arms, brought 340 crowns. The smelling bottles fetched 50 to 100 crowns.

HOW THE ARTICLES IN THE FROHNE COLLECTION WERE EXHIBITED.

As regards the silver mugs, one shaped like a cask, parcel gilt, dating from the first half of the 17th century, was knocked down for 1,000 crowns (Augusburg mark), and one for 1,100 crowns, from about 1680 (Nurenberg mark), resting on three eagle claws with balls, went to Germany. The Lund Museum at Lund obtained for 1,710 crowns a cylindrical jug resting on three large spheres, with repoussé ornamentation; above this three reliefs, with a woman's head, and in the lid a medallion of Queen Udrica Eleonora (mark Goteborg. 1728). For 1,430 crowns there was sold to go to Norway a cylindrical jug supported on three crowned lions, which was made in Norway.

The Danish Art Museum acquired, among other articles, for 900 crowns a goblet with engraved arabesques and garlands of fruit (mark Copenhagen, about 1620). The Danish National Museum paid 2,600 crowns for a jug of Danish origin, with legendary decorations, inscriptions and the date 1665. A chalice with the Nurnberg mark sold for 830 crowns, while another with the Luneburg mark and the dates 1600 and 1659 fetched 1,000 crowns.

Altogether Frohne's auction brought in about 335,000 crowns, which, when we consider that the American equivalent of a Danish crown is about 27 cents, does not seem to be very much.

The dispatch above referred to also stated that an arrangement had been entered into among the dealers to keep prices at the sale down. It is difficult to say how much truth there may be in this, but the modest prices obtained, in comparison with those secured at other recent art sales—the Lanna sales, etc.—would indicate that it is possible that some such thing might have taken place.

CHAS. A. BRASSLER.

The Product of the Colonial Salesman Compared with that of the Present Day.

IN referring to the recent exhibit of early American silver at the Metropolitan Museum of Art, New York, a silverware designer, A. F. Saunders, writing in the *Metal Industry*, makes an interesting comparison between the products of the colonial silversmiths and those of the firms of the present day, taking this occasion to praise the simple, clean-cut workmanship of our early craftsmen in the precious metals.

"Considering the few simple tools used, the crude methods and the unsettled conditions of the times, these productions are of all the more value to us, as examples of both beauty and honest workmanship," says Mr. Saunders, though he insists that in many respects our modern silversmithing compares most favorably with the old, and even excels it in some ways.

"We are beginning to appreciate the value of simplicity, both in outline and decoration. Of course we are catering to the tastes of a vastly more cosmopolitan people than were these colonials, and we incorporate more originality in design, as they, of course, naturally followed the prevailing styles of the mother country.

"However, when we compare from a purely esthetic standpoint the difference in our methods of working, especially where machinery does a large part, we lose that true individuality so pronounced in their hand work. The danger common to a mechanical process is its suppression of the relationship which should constantly exist between the craftsman and his material. The only method that renders adaptation entirely natural is that of a tool held in the hand throughout the entire execution from the form or outline to the finishing of its ornamentation; the constant contact and study required, counsels and teaches the craftsman at every turn.

"True beauty results from that repose which the mind feels when the eye, the intellect and the affections are satisfied. The only sound standard when considering design adapted to ornamentation is that which requires that the decoration shall increase the beauty of the object without limiting its usefulness, as the ornamentation of an article is something which is not always necessary to its use and is necessarily bad if it interferes with or limits use in any way. An excess of ornament adds nothing to the beauty of an object; it is rather an ostentatious vulgarity usually adopted to cover faulty construction. To a thorough understanding of these principles we can attribute the charm of true craftsmanship, whether it be of the 17th or the 20th century.

"Ornamentation was used very sparingly on all silver work made during the colonial period; it was usually carried out in engraving, flat chasing or sometimes in repoussé, yet always in complete subordination to the chaste sweep of the outline. These methods of application were most proper, as one of the most important principles of design is that all ornament should be worked out of the solid material, not added upon it. This cannot be said of much of our modern production; even in what we call high-class wares, machine-made stampings or castings are to an extent used. Better by far use some simple engraved, chased or hand-etched motif. Until we become educated to true appreciation of real handicraft work our efforts will lack that individualism present in the work of our colonial ancestors and which is being sought for more and more every day."

Robert F. Wilbur, Red Bank, N. J., is adding a new front to his store, and making extensive improvements in the interior.

Wm. Jeffries and George Lewis, two negroes, were recently taken into custody accused of burglary, including the breaking and entering of the store of Byron Burns & Son, Tolono, Ill. They have been held in bonds of $1,000 each and committed to the county jail.

Roman Pearl Necklaces

The Heraldic Menagerie Briefly Described and Explained.

By Clement W. Coumbe.

(*Continued from issue of April 20.*)

THE HERALDIC EAGLE.

Next comes the eagle; let him scream. This king among the feathered tribe always appeals to our reverence, for is he not our well-beloved National bird? Early in history the eagle appears as the badge or ensign of the Roman Caesars, hence he stands for the badge of empire.

The presence of this emperor among the feathered tribe in heraldic bearings may be generally considered as a hint at Germany. For the German *Kaisers* early took the emblem from the Roman *Caesars*, together with the royal title of *kaiser*, and both indicate the claim as successor to the Roman Empire. The double-headed eagle is both German and Russian, and hints heraldically at the ambitions of both these powers, for eastern as well as western Empire (the heads facing in *opposite* directions). Americans love, honor and respect their eagle, but not more so than do Germans. For here we have Austria (that country was once, you know, the heart of Germany) putting the crown of empire on the bird's duplicated head (Fig. 13). And the Ger-

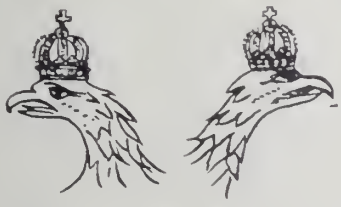

FIG. 13.—AUSTRIAN IMPERIAL EAGLE.

mans sometimes canonize his emperorship with the *nimbus* (and the bird is then known to heralds as *nimbed*) of the church, as shown in Fig. 14. At the same time they

FIG. 14.—GERMAN IMPERIAL EAGLE, NIMBED.

carry on their vivisectionist tortures on the noble bird, for we find the living demi-eagle everywhere where the sign goes: *"Deutsch wird hier gesprochen."* You recognize him,

FIG. 15.—DEMI-EAGLE, DISPLAYED.

no doubt, in Fig. 15, and the eagle's head *erased* is a commonplace reproach facing the Bergh society members, as in Fig. 16.

You have often wondered, of course, why the real heraldic eagle has its wings builded so sparse of feathers and why spread out

FIG. 16.—EAGLE'S HEAD, ERASED.

to show a poverty of feathers that the worst moulting spell would not justify. Those wings are, dear friends, what the heralds call *displayed* (a badly plucked *display* you may say). Well, do you remember what was said on another page about the starved condition of the true heraldic lion. The same conditions necessitate reducing the wing feathers. Just put that bird on a shield, then walk off and you will be surprised how far you can see him distinctly. Try your own aquiline emblem and you will quickly see your eagle is a lost blotch, while the herald's shield shows up those thinned feathers distinctly, and the knight using that device can be blazoned from the watch tower while the natural bird of prey is still lost in the distance.

And now will you be good and respect those few feathers? Now you know what a good many otherwise clever artists do not: that the eagle-bird (like the American) can be correctly blazoned for a crest on a helmet, as is the German Emperor's, but is absurdly out of place on the *shield*.

THE SWAN.

But, next to the eagle, perhaps the most popular bird with royalty was and is the swan. Its presence, so frequently met with by American tourists when they visit the lower reaches of the Thames River, soon becomes a familiar feature in the aristocratic localities. Those Thames' swans are the ancient sole prerogative of Royalty and the Free City of London. This lovely feathered creature is a favorite *supporter* in coats-of-arms of those of high lineage (see the swan *supporter* of the house of Warwick in Fig. 17). *Supporters* in

FIG. 17.—WARWICK SWAN SUPPORTER.

heraldry are, you know, those effigies that lean on, or loll around the sides of shields pretending to hold them up, but generally (tired, I guess) they are found doing their level best to upset the blooming shield, or else drive it into mother earth.

THE GRIFFIN.

The Griffin, also called *gryphon*, is not only much used in *coats-of-arms*, but is a favorite form among artists, architects, and, separately, or in company of dragons, is daily met in our general pursuits. The griffin is half eagle and half lion. In Fig. 18

FIG. 18.—GRIFFIN SEGREANT (GERMAN).

you have a German griffin, it is called a "griffin *segreant*, wings displayed." When a griffin is in the pose known as *rampant* in a lion it is said to be *segreant*. It has a lion's body, wings and head of an eagle, an eagle's legs on its fore-quarters. But both the eagle and the griffin are frequently met with minus body and wings and *sans* legs. And when you see such a head, you, like others, may be in doubt as to whether you are up against an eagle's noddle or a griffin's. Well, please remember that a griffin has *long* ears—and there you are. As a civilized American citizen you know eagles don't wear long ears.

THE DRAGON.

Allied to griffins, but very different in appearance, are the dragons. The form of heraldic dragons is a bit indefinite. Some run to big scales, like the Chinese *lung*. Others have a wrinkled hide more or less of the alligator type. The English dragon, and most others for that matter, have four legs. But foreign heraldry often depicts what we know as a *wyvern* for their dragon—that is a two-legged beast. Again in foreign heraldry some dragons wear a short head, like the demon heads in ancient Assyrian sculptures. The German heraldic

FIG. 19.—GERMAN DRAGON (LINDWURM).

dragon is fairly well represented in Fig. 19.

But if His Royal Ugliness, the dragon, is not much like His Royal Hideousness, the griffin, nevertheless Their Imperial Highnesses, the Public, have made up their minds they are as much alike as two slices of bread and butter, and there you are again. And those versed, ever so little, in

heraldry have to grind their teeth at the absurd blunders made by newspaper reporters and writers generally when they make their usual mix-up, in spite of the fact that their characteristics are entirely different. The griffin has the eagle-head true to nature, all but the ears; the dragon has nothing like the eagle about its head, nor like anything else on the face of this earth. The heraldic dragon's head is a real what-is-it. It must have taken several generations of creative geniuses to have brought forth what we know as a dragon's head.

Look at the picture (Fig. 19) and if you can define that head, well, you can have it.

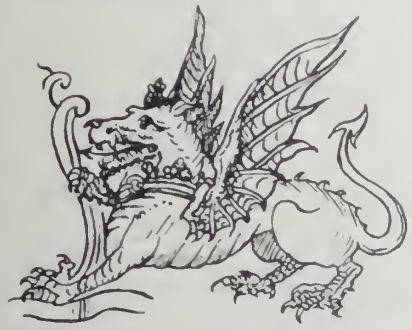

FIG. 20.—ENGLISH DRAGON AS SUPPORTER IN ARMS OF NORTHAMPTON

Has it the true lines of beauty of the rhinoceros? Does it look like a distant relative of the crocodile? A crocodile would tearfully deny the likeness. Its neck (where does the neck end and body begin?) is scaled like a snake, the legs—it has four—are scaled, and its back is spiked. The tongue is barbed, as is (in late work) the tip of the tail; the ears are—its own, and it has *bat-wings*.

Heraldic artists never cease declaring that the dragon is one of heraldry's greatest beauties, and they have certainly spent time and money depicting the creature. The cut (Fig. 19) is that of the German *lindwurm*, it has, however, been used by English artists as a superior example of dragon, so we must take it for granted that its birth and ancestry are all O. K. Dragons, however, are rarely represented as *coward* (tail between its legs) in our heraldry, as is this.

And you have been told just what a griffin consists of and what goes with the make-up of a dragon. So now describe either of them! Can you? Anyhow, a week or two from now not a mother's son of you will be able to tell the other from which if you happen to meet up with a dragon and griffin strolling arm and arm around your block. Ask your friends to help you, and you will find them just as sadly ignorant as yourself. And yet you know how nice it is in viewing architecture, looking over coats-of-arms, or admiring lovely symbolical paintings, to be able to display your learning before your best girl by telling her that's a dragon and that ain't, also why.

So let's go over it all again in another way, so the repetition will get the thing wedged into the memory tight enough to stick—at least for a time. It's so easy, and you will be the only one in the crowd that has this vast store of learning in ancient lore.

Well, when you chance to bump into the close presence of his ferocious beastliness, just seize his *wings* first. If they are *feathers*, it may be a *griffin*, but, absolutely, can't be a dragon; how can it? If they are *bat's-wings* the thing can't be a *griffin*, but stands a good chance of being a *dragon*. Now let's hit it again. If it's a griffin any fool ought to know it must have an eagle's head (except those jackass ears). If it has a what-do-you-call-it sort of a thingamy head with a bad looking horn on its snoot point, why, of course, naturally, that's a dragon as plain as the nose on your face. And now you know all about it, at least for a few days.

Henry II used the dragon as a badge and later as a supporter. Two dragons are the supporters of the shield in the coat-of arms of the city of London.

THE WYVERN.

There is a certain variety of draconic beast, called in English art the wyvern, or wivern. This fictitious beast has a dragon's head and only two legs. The body declines into the tail like that of an alligator or lizard. Its bat-wings are the same as the dragon's. As before stated, some countries call this animal a dragon. At times the wings are missing. Its beauties are fairly well disclosed in Fig. 21. The cockatrice is

FIG. 21.—WYVERN HOLDING A FLEUR-DE-LIS.

a wyvern with a cock's head. The basilisk differs from the cockatrice only in having the end of the tail terminating in a serpent's head, thus giving it the unique feature of containing two business ends.

But when we are through with the lion "leopards" we might suppose there are no others of the *real* leopard type. On the contrary, the leopard can't get away from its spots, and we find him often as a *supporter*, as in the arms of Dorset, Fig. 22.

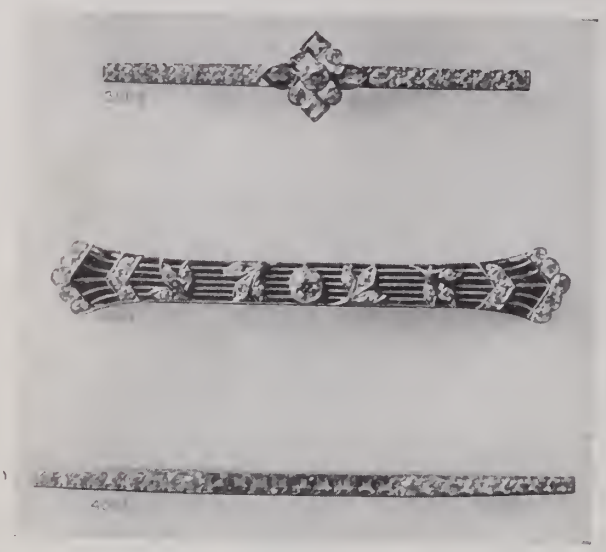
FIG. 22.—SPOTTED LEOPARD SUPPORTER, ARMS OF DORSET.

It is not shown here, but this animal does not carry a tuft on its tail, as does a lion-leopard, any more than the animated leopard.

And now we again go into the heraldic torture chamber. The young, or small eagle is known as an *eaglet*. But some rascally humans have robbed some of these eaglets of their beaks and talons. Animals in heraldry displaying talons, beaks, claws, horns, teeth, etc., are "armed." If you will glance at Fig. 23 you will see those eagles

FIG. 23.—ARMS OF THE DUCHY OF LORRAINE.
Or on a bend gules between a gannet in chief azure and a martlet in base sable, three alerions argent.

"in bend" are *unarmed*, their claws and beaks being absent, they are called "alerions." Please remember the rooster is "armed" of its spurs, the bull of his horns. But the stag (the male is a *hart* in heraldry) is *attired* of its antlers, which are called "attires." The pretty creature is too timid to be *armed* in the eyes of the hunter, his horns are simply beautiful adornments in which he is *attired*.



THE STAG.

Every American likes his venison as well as did the old hunting nobility. Let us talk stag a little. The male is known as *hart* (as stated) and the female as *hind*. The former is *attired*, the latter is not, as is shown in that pitiful beast in Fig. 24, which

FIG. 24.—CREST OF CAMBERWELL.
"In front of a crosier erect gules, a hind lodged argent, gutté de sang and pierced through the neck with an arrow fesswise sable."

is blazoned "a hind lodged argent, *gutté de sang* and pierced through the neck with an arrow fesswise sable." See the pitiful bleed (*gutté de sang*—covered with drops of blood)! The stag being ever a favorite in the chase, heraldry has a special language for this antlered game. When the fleet-footed one stands sideways and turns its head to look at you, it is "at gaze" (with

is called "cabossed." The tiger's head in Fig. 25 is *cabossed*.

Programme of the Convention of the Ohio Retail Jewelers' Association at Columbus, May 2, 3, and 4.

COLUMBUS, O., April 23.—Following is the programme for the annual convention of the Ohio Retail Jewelers' Association, to be held at the Southern Hotel, Columbus, May 2, 3 and 4:

Monday morning, May 2—Registration and getting acquainted. Afternoon, 1.30, convention called to order by F. D. Ausman, St. Mary's, president; reading of minutes of last meeting; annual report of the secretary, A. L. Thoma, Piqua; treasurer's report; president's annual address; report of delegates to national convention at Omaha; report of committee on trade interests; report of committee on trade qualities; report of committee on membership; appointment of committees; 4 p. m., "Selling Plans," J. R. Stebbins, Ashtabula; discussion and round-table talks. Evening, theater party.

Tuesday morning—9.30, "Forethought and Afterthought," H. C. Carpenter, South Bend, discussion led by J. G. Kapp, of Toledo; 11 o'clock, "Thin Watches," Fred G. Gruen, discussion led by B. F. Phillips, Akron. Afternoon session—1.30, "Precious and Semi-Precious Stones," J. B. Osthoff, discussion led by Mr. Goodman, Columbus; 2.30, address by J. P. Archibald, president of the National Retail Jewelers' Association; 3.15, "Retail Jewelers as Ship Builders," A. L. Sackett, discussion led by J. R. Stebbins, of Ashtabula; 4 o'clock, "Watch Springs," C. T. Higginbotham, South Bend, discussion led by Albert Zoellner, Portsmouth. Banquet at 6 p. m.; F. D. Ausman, toastmaster.

Wednesday morning—10 o'clock, report of resolution committee; communications and bills; unfinished business; election of officers; new business; adjournment.

The badges for the convention have been donated by the Thoma Bros. Co., of Cincinnati.

W. S. W. Blake, Kenmare, N. Dak., has gone out of business.

The Waltham Watch Co. Begins Suits Against Catalogue Houses Which Sold Movements at Cut Prices.

The Waltham Watch Co. has instituted a suit in the United States Circuit Court for the Southern District of New York against Sears, Roebuck & Co., a mail order house, for the enforcement of the Waltham price contracts. The bill of complaint alleges that Sears, Roebuck & Co. had violated the contract conditions under which certain railroad movements of the complainant company are sold, and has infringed certain patented improvements owned by the Waltham Watch Co. and embodied in the railroad movements made by it.

The complaint asks, among other things, for an injunction restraining the defendant from selling complainant's movements at less than the fixed minimum retail prices, and directing that all of complainant's movements now in defendant's possession be surrendered.

The bill of complaint sets forth a brief history of the complainant company from its inception as the Waltham Improvement Co., in 1854, down to the present time. It recites the ownership in the complainant company of certain letters patent covering important inventions which are embodied and conjointly used in the so-called railroad movements; that among such railroad movements are three models distinguished by the trade-marks "Vanguard," "Crescent St." and "Riverside."

The bill of complaint further shows that all such railroad movements embodying useful inventions which are protected by letters patent have for the last three years been sold under restricted licenses and contract conditions, both to jobbers and retail dealers; that this policy of selling its movements has been widely advertised and is known to the trade generally, and that the plan for controlling the sale and fixing the minimum retail selling prices of complainant's watch movements has been adopted for the benefit of the retail dealers in watches at large and is necessary for their protection.

The complaint further alleges that the defendant, with full knowledge of the complainant's exclusive rights under the letters patent and with full knowledge that complainant's movements were sold subject to the provisions of a restricted license and under contract conditions fixing, among other things, the minimum retail selling prices of the movements, infringed the licenses and violated the contract conditions by advertising and offering for sale and by selling "Vanguard," "Crescent St." and "Riverside" railroad movements made by the Waltham Watch Co. at prices below the minimum retail prices established by the complainant under its licenses and contracts.

The bill of complaint further shows in detail the methods adopted by the Waltham Watch Co. for the enforcement of its restricted licenses and contracts, in connection with the sale and use of its contract movements, including the insertion of a printed contract notice in every box containing such a movement, and the attachment of the printed conditions of sale to each invoice rendered to a jobber, and, in turn, the attachment of the printed conditions of sale to every invoice rendered by the jobber to the retailer.

A similar suit, based upon substantially the same facts, has been brought by the Waltham Watch Co. in the Northern District of Illinois against Montgomery Ward & Co., Chicago.

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., April 20.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the port of New York for the week just ended:

Adelaide: 23 cases clocks, $437; 4 cases optical goods, $569.
Bahia: 2 cases optical goods, $587; 2 cases jewelry, $808; 57 cases clocks, $1,636.
Bremen: 1 case jewelry, $335; 3 cases watches, $2,250; 2 cases precious stones, $191.
Buenos Aires: 16 cases plated ware, $2,221; 82 cases clocks, $1,833; 1 case watches, $130; 1 case optical goods, $125.
Calcutta: 28 cases clocks, $640; 48 cases clocks, $678; 56 cases clocks, $1,645.
Cartagena: 3 cases plated ware, $204.
Colon: 3 cases watches, $232; 37 cases clocks, $794; 1 case watches, $103.
Constantinople: 1 case silverware, $2,000.
Copenhagen: 1 case optical goods, $340.
Trinidad: 30 cases clocks, $488.
Hamburg: 3 cases jewelry, $529; 6 cases optical goods, $753.
Havana: 17 cases clocks, $385; 4 cases jewelry, $375; 1 case plated ware, $141; 33 cases clocks, $441; 2 cases jewelry, $336.
Havre: 1 case pearls, $160; 1 case plated ware, $146; 1 case precious stones, $630; 1 case optical goods, $125.
Kingston: 1 case watches, $123.
Lisbon: 12 cases clocks, $315.
Liverpool: 7 cases jewelry, $703; 1 case precious stones, $1,523; 1 case watches, $100.
London: 50 cases clocks, $1,244; 1 case optical goods, $849.
Melbourne: 20 cases plated ware, $1,088; 4 cases watches, $587; 245 cases clocks, $4,425; 2 cases scopes and views, $110; 6 cases optical goods, $1,099.
Para: 2 cases optical goods, $162; 3 cases watches, $361; 75 cases clocks, $1,681.
Surinam: 347 cases jewelry, $1,599.
Tampico: 10 cases clocks, $255.
Vera Cruz: 11 cases clocks, $406.
Wellington: 4 cases plated ware, $214; 71 cases clocks, $599.
Zurich: 2 cases optical goods, $102.

The Japanese Cultured Pearl

Did you ever consider its possibilities as a substitute for the costly Oriental Gem ?

It must be remembered that it is by no means an artificial pearl, but is the natural product of the cultured pearl-oyster, and presents a variety of specimens that compare in beauty with the finest of pearls.

A Japanese Pearl will be used without prejudice or hesitation by the most fastidious of pearl lovers.

It serves the purposes of the most expensive jewel at a cost that is but a fraction of its value.

Trophies Presented to Teams of Jewelers' Duckpin Bowling League of Pittsburg.

PITTSBURG, Pa., April 20.—The members of the Jewelers' 24-Karat Club of Pittsburg, their wives, sweethearts and friends were the guests Monday night of the Jewelers Duckpin Bowling League at the Davis Alleys in Fifth Ave. The last games of the season were rolled and the greatest enthusiasm was manifested by the 100 or more persons present. All of the teams had their rooters on hand. The teams finished in the following order: Wattles first; Lochs second; Terheydens third; Diamonds fourth; Vilsacks fifth, and Roberts sixth. There was quite a contest between the Terheydens and the Diamonds as to which team would finish in third place, but as the Terheydens took three of the four games played Monday night the Terheydens took that honor.

Steele F. Roberts, president of the Jewelers' 24-Karat Club, was present and distributed the prizes, but before he did so he made a neat speech, saying that the bowlers of the League are certainly entitled to great credit for the splendid record they have made during the season. He said:

The oldest and youngest jeweler are one to-night in the charming fellowship which make them all of equal age—a bunch of jolly good fellows. Athletics encourage manliness and stamp out indolence, indifference and a whole host of evils men are heir to. Every healthy man generates steam faster these days than under ordinary conditions he can work off, and good, clean, honest sport like bowling is a safety valve and uplift to every man physically, mentally and morally.

You have learned the hard lesson that training, faithful work and practice is necessary to win, for bowling requires thought, direction and perfect poise to make a satisfactory score. You can't feel rattled over the sale you fell down on and expect to make a spare; you can't think about your best girl down in Bellevue and expect to make a strike. You have to forget the girl and other things for the time being and concentrate your thought and energy into knocking those 10 little ducks off the map. I understand there is to be some prize money distributed to-night, and it has struck me that as you wealthy jewelry bowlers do not need money, it might be a good plan to divide this purse among your wives. (Laughter and applause from the women.) Just think how for six long months they have sat up nights waiting for hubby's return from the bowling league; and even if the games did last until 12 or one o'clock in the morning they made no complaint. (Laughter.) So I will entertain a motion at any time that the wives get the money; and if some of the bowlers are not married, that is not the women's fault, for don't you know that any woman will jump at the chance to marry a jeweler. (Laughter.)

There are other things to be presented here to-night which to the winners represent a hundred fold more than their money value. How fitting that these silver trophies are representative of your trade and vocation as jewelers and silversmiths—a calling which you should look upon with pride and ambition as the most honored of all professions. To you winners of these trophies I venture to say that in all your experience you have never seen stock as beautiful as these loving cups; beautiful because they are to become yours; yours to have and to hold, and to enjoy for all time to come. How sweet the joys of victory and success, and in its plaudits how soon we forget the toil and labor and defeats endured to reach the goal.

Think of the exercise you have had and the splendid physique you have attained. Ask your wives and sweethearts if bowling in the 24-Karat League has not made you a much handsomer and more able-bodied man than ever before (laughter and applause). And now I suppose the winners are anxious to know about these cups that are to be presented."

Mr. Roberts then presented the trophies on behalf of the league. The Wattles club having finished first in the race by a good margin, J. C. Crawford of that team, who had rolled the best score of the team, was presented the handsome prize. Charles H. Holyland, of the Diamonds, was presented a cup for making the high average of the season. Mr. Holyland is the champion bowler of the 24-Karat League and is also one of Pittsburg's best bowlers. Last year he rolled the remarkable average of 126 for three games in the Greater Pittsburg League in individual average, with the splendid record of 100 flat for 100 games. Charles P. Parlett, of the Roberts team, on Nov. 29, last year, rolled the two highest scores totaled in Allegheny County and brought the Jewelers' League to the notice of all of the bowlers of the city, his score being 161. He holds the four-game record of 178 pins. He, too, was presented with a handsome trophy. The next and last cup went to F. Clayton Stitt for making the high individual scores for the season.

The cups were beautiful and during the entire evening were displayed on a table in front of the seats the guests of the occasion occupied. At the conclusion of the presentation of the cups a light lunch was served. A most enjoyable time was spent.

At this gathering steps also were taken to organize two baseball clubs of 15 members each, to play during the coming Summer. Several outings will also be arranged for; the local jewelers have determined to keep together as well as get together to have a good time.

Bids Received and Solicited by Government Department to Supply Various Articles.

WASHINGTON, D. C., April 23.—The Bureau of Supplies and Accounts, Navy Department, is calling for proposals until May 3, 1910, for a supply of goggles for the Washington Navy Yard, in pursuance of a recent order enforcing their use in all hazardous branches of the work, mention of which appeared, at the time, in THE JEWELERS' CIRCULAR-WEEKLY.

The Bureau calls for 248 pairs plain front goggles, 121 pairs front and side goggles, 22 pairs all round goggles, 104 pairs wire gauze goggles, 8 pairs oxyacetaline, dark amber goggles, 10 pairs special goggles.

These protectors are to be made of the lightest material possible, are to be perfectly sanitary and susceptible of being sterilized, and to be well ventilated. The glass is to be tough, absolutely clear and even so as not to, in any way, interfere with the vision, to be far enough away from the face to be worn over corrective glasses if necessary, and to be large enough to completely cover the eye on all sides. The frames are to be of nickel-plated steel and to be so constructed as to admit new lenses in case of damage.

WASHINGTON, D. C., April 23.—The Supervising Architect has received the following proposals to furnish clock systems in the United States Public Buildings at Colorado Springs, Colo.; East St. Louis, Mo.; Peoria, Ill.; Tacoma, Wash., and Tuscaloosa, Ala.: Fred Frick Clock Co., Waynesboro, Pa., $4,405, Nov. 1; Hall Automatic Clock Co., Chicago, $4,017.30, Aug. 15; E. Howard Clock Co., Boston, Mass., $3,691, Aug. 1; Magneto Co., New York, $4,180, June 15; Self-Winding Clock Co., Brooklyn, N. Y., $4,712.85, three months; Standard Electric Time Co., Waterbury, Conn., $2,985, 120 days.

Boy Who Robbed Watertown, N. Y., Jeweler, Arrested at Newport, R. I., After Enlisting as a Naval Apprentice.

PROVIDENCE, R. I., April 22.—Charged with the theft of diamonds valued at $1,100 from a Watertown (N. Y.) jeweler, Leslie Tooley, 20 years of age, a newly enlisted naval apprentice, was arrested at the Naval Training Station at Newport by Chief of Detectives Singleton, of the Watertown police. Waiving extradition, the youthful prisoner left for Watertown, last night, in charge of that officer to face trial.

Chief Singleton told the Naval authorities that Tooley, whose home is in Watertown, entered a jewelry store in that city, Jan. 26, and, choosing a moment when the store was left unguarded, seized the jewels and made his escape in a carriage drawn by a horse that he also stole from the jeweler. The horse he abandoned 17 miles from the city. The next day he informed the jeweler by mail where to find the animal.

Tooley enlisted at Boston, Feb. 8, and was transferred to the Newport Station four days later. While in Boston, the lad told the police, he sold four stones for insignificant sums to persons unknown. In Newport a short time later he sold for $15 a gem worth $75.

WATERTOWN, N. Y., April 23.—Leslie Tooley, the young boy who stole diamonds valued at $1,100 from H. W. Radder's jewelry store on Jan. 26, is under arrest here, has pleaded not guilty to grand larceny, first degree, and is held without bail for examination on May 2.

Tooley was a friend of the Radder family and had the run of the store. On Jan. 26 Mr. Radder went to deliver some stock. The boy took about 10 unset diamonds from the safe and left the city. Circulars were sent out asking young Tooley's apprehension; he kept out of the hands of the police, but his friends frequently received post cards from him.

About one week ago Tooley, garbed as a naval apprentice, got off a train near here and walked into the city, going to the home of his "girl," on the North Side. She was then entertaining another young man, who was at once despatched for Tooley's mother. All advised him to return to Newport. He was provided with money and left the city under cover of darkness. The police were finally stirred to action and Tooley was located at Newport. He waived extradition and was evidently glad to return home.

Tooley says he only took five of Jeweler Radder's diamonds. He says he pawned one in Carthage for $15 and sold the others in a pawnshop in Boston for $63. The police learned that the pawnshop had changed hands and there was a bill of sale showing four unset diamonds. The police, however, were unable to get the jewels.

Young Tooley spent some time in New York before enlisting at Newport.

LETTERS TO THE EDITOR.

A Full Statement as to the Charges Against and Exoneration of Mr. and Mrs. Fink.

Los Angeles, Cal., April 20, 1910.

Editor The Jewelers' Circular-Weekly:

I desire to submit through your journal a statement of the facts in the case of the complaints recently filed against myself and wife by the Hartford Insurance Co and the Southern Pacific Railway Co. in the matter of the claims made by me against those corporations for the loss of one of my traveling man's trunks containing upwards of $11,000 worth of diamonds, precious stones, loose and mounted, and other valuables.

On Dec. 29, 1909, Harry Adams, a traveling man in my employ, arranged to take a northern trip to San Francisco, Sacramento, Red Bluffs and other northern points, and on this trip was entrusted with a trunk containing some $11,000 worth of diamonds, pearls and other merchandise. Mr. Adams' instructions were to proceed to San Francisco, see the wholesale trade in that city prior to Jan. 1 and on Monday, Jan. 3, to work Sacramento and then proceed to different points in central California with his stock. Jan. 3 (Monday) being the first business day after Jan. 1, I received a letter from Mr. Adams stating that the trunk had been lost in transit and that he had been unable to locate same. I immediately notified him to fully investigate the matter and try and locate the trunk, which he was unable to do.

In the regular course of business I filed a claim against the Southern Pacific Railway and also against the Hartford Insurance Co. under a traveler's policy which I held with said company. The matter ran along for some little time and the trunk was at last located in San Jose, but it had been looted of its most valuable merchandise. The claim on the insurance company was pressed and the insurance company caused the arrest of both myself and wife upon the following statement of facts:

They alleged that Mr. Adams, after having checked the trunk, returned to the office and placed the check, together with his transportation, in the office safe for a few moments where, they attempted to prove, another check was substituted by me for the check of the trunk. Their hypothesis then was that I sent my wife to San Francisco, where she opened the trunk, extracted the valuables and afterwards checked the trunk to San Jose, where it was found some weeks later.

Upon the preliminary hearing it was conclusively proven: (first) that Mrs. Fink was not in the office at the time Adams returned with the check; (second) that the check was not out of Adams' hands during the time he was in the office, but, on the contrary, always under his control; (third) that Mrs. Fink was not out of Los Angeles during any of the time when the prosecution attempted to prove her in San Francisco.

The prosecution's case was based entirely upon an alleged identification of Mrs. Fink. This alleged identification was made by the porter and express man of the Golden West Hotel in San Francisco, both of whom swore that the woman who had the trunk in charge was heavily veiled and wore goggles and was otherwise disguised. Neither the porter or express man saw the woman for more than a few minutes. Upon the preliminary hearing some 15 or 16 witnesses swore that Mrs. Fink was in Los Angeles at the exact time when she was supposed to have been in San Francisco. They not only swore to her being in Los Angeles during the time she necessarily must have been in San Francisco to have looted the trunk as the insurance company alleged, but substantiated their statements by business and social appointments which they had with Mrs. Fink on that date.

Upon the hearing of the complaint of the Hartford Insurance Co., the justice dismissed the charge, stating that he did not believe any case whatsoever had been made out as against either of the defendants. After a full investigation of the matter the District Attorney moved for the dismissal of the second charge based upon the complaint of the Southern Pacific Railway Co.

The foregoing is a brief but absolutely correct statement of the facts surrounding the case, which I feel, in justice to myself, is entitled to your most conscientious consideration. Very truly yours,

Albert Fink.

Columbus, O., Jeweler Says He Lost $9,000 in Gambling After Bankruptcy Proceedings Were Started Against Him.

Columbus, O., April 25.—M. J. Daniels, bankrupt jeweler and pawnbroker, gave the astonishing testimony last week, before Referee-in-Bankruptcy Sinks, that he lost $9,000 playing $10 limit poker and shooting $100 limit craps, at Hot Springs, Ark., immediately following the involuntary suit filed against him after he had made an assignment. Daniels made the statement that he had $9,000 in cash, and that this would not pay his debts. Regretting that he could not meet the demands of his creditors, he decided to go to Hot Springs to try to win enough money to settle with all of them. He lost all of the $9,000, he said, except that much of it which he used to pay the expenses of his trip.

Nathan Gumble, of the firm of Gumble & Gumble, attorneys representing many New York creditors, in the "grilling" he gave Daniels, accused him of telling untruths, and so insisted that the gambling story was untrue that Daniels' attorney appealed to the referee, asking that the attorney be confined to questioning direct without argument.

Attorney Gumble set forth to the referee that to his knowledge Daniels had received $31,000 from a brewing company in payment for a saloon and restaurant Daniels owned and for a 99-year leasehold on the building in which the saloon was located. The attorney also said he had claims for $16,000 worth of diamonds which Daniels purchased. He questioned Daniels for more than two hours as to his disposition of this $31,000 and moneys he received in auction sales conducted in his pawnbroker's shop.

Daniels said he had used the money to pay debts, and gave the names of persons to whom he said he had given certain sums in payment of notes, leaving him only the $9,000 with which he left Columbus for Hot Springs. This first examination was on Thursday, and on request of the attorneys for the creditors Daniels was ordered to produce his books, his bank books, check books and canceled checks and notes which he had paid. The referee ordered them produced at 9 o'clock Friday morning and insisted on his order in spite of Daniels' request for more time.

At the Friday hearing Daniels raised from $9,000 to $10,000 his losses at Hot Springs. He appeared in court with his canceled checks, notes, etc. Being questioned concerning checks to M. Kridel and S. Weiner, both pawnbrokers, he said he had put up diamonds as security. The checks were dated just before Daniels left for Hot Springs, and he said he took some diamonds with him, selling them at the Springs for between $900 and $1,000, all of which he also lost in gambling. He was questioned also concerning notes to N. Scheingold, a furniture man, for $4,500, marked paid; a check for $1,809 to S. Levensohn, a $20 a week clerk who worked for him, which he said was money he had borrowed from Levensohn. Daniels was examined all morning, but nothing of particular interest to the creditors was elicited.

The hearing was adjourned until Monday to allow the summoning of Kridel, Weiner, Scheingold and officials of the bank at which Daniels did his banking.

The claims against Daniels thus far proved are as follows: M. Harris & Bros., $173; Zach A. Oppenheimer, $1,257; Arnstein Bros. & Co., New York, $1,580; Diamond & Singer, $718; Cohn, Abraham & Co., $2,626; Wm. Seckels, New York, $2,495; Ingomar Goldsmith & Co., $2,547; B. H. Davis's Son & Co., $1,378; Veit Hirsch & Co., $911; H. H. Oppenheimer, $2,073; Oppenheimer & Stern, $1,042; T. A. Robinson, $130; Jacob Hassell, $240; Samuel Petrovitzky, $120; Sam F. Sipe, $746; Martinez Cigar Factory, $199; J. R. Wood & Son, $906; Singer Bros., $56; Klein Bros., $71; Bonner Mfg. Co., $115; Diamond Point Pen Co., $30; Benedict Mfg. Co., $145; A. Roseman, $782; Rohde & Co., $60; Jacob Strauss, $701; Sproehnle & Co., $346; Fred Kaffeman, $184; S. Pitzele, $144; H. Lesch Jewelry Co., $253; J. W. Booker & Co., $155; Charles P. Goldsmith & Co., $480; Columbus Railway & Light Co., $24; Henry Strauss, $109. The total is $22,863.34.

The assets found by the receiver are said to be about $2,300. Charles P. Outhwaite was elected trustee.

Involuntary Petition in Bankruptcy Filed Against S. E. Myers Co.

An involuntary petition in bankruptcy was filed yesterday afternoon against the S. F. Myers Co., 49 Maiden Lane, New York, by these creditors: Rosenberg & Daniel, $159; Nebenzahl & Munk, $797, and J. F. Ansorge, $50. Full particulars will be printed in next week's issue.

Thomas Swift, of the firm of Thomas Swift & Sons, gold beaters, died in Rochester, last week, at the age of 76 years. He was the pioneer gold beater of America, and the firm is the only one between New York and Chicago.

Meeting of the Retail Jewelers' Association of the District of Columbia.

WASHINGTON, D. C., April 23.—The Retail Jewelers' Association of the District of Columbia, Inc., held their regular monthly meeting in the rooms of the Washington Chamber of Commerce, 12th and F Sts., N. W., Wednesday. Vice-President Hutterly presided, and after roll call, reading of the minutes, etc., the name of Charles Schwartz was presented for membership. He was declared admitted.

For use upon all their correspondence the members of the association are to be provided with rubber stamps bearing the following: "Member of the Retail Jewelers' Association of the District of Columbia, Inc.," and the use of same, together with the door-plate being distributed by the A. N. R. J. A., is advocated.

The report of the progress of the incorporation of the association was presented by Darr, Peyser & Curtin, counsellors; the necessary papers having been filed with the proper authorities, the association now stands incorporated in the District of Columbia.

The association thoroughly disapproves of the extension of the parcels post in that it is not for the benefit of the local dealer, whatever his line may be.

At a previous meeting a complaint from one of the members relative to the soliciting by firms of other cities of the patronage of both public and private schools for class pins, badges, etc., used at their graduation exercises was taken up, and the attention of the Chamber of Commerce was brought to the matter, with the result that the following letter was received by the association:

Whereas, The schools of the District of Columbia are maintained by taxes paid by local merchants and business men, as well as by the share paid by the federal authority;

Whereas, The schools, private and public, through their committees, solicit the business men for advertising in various publications as well as for prizes and donations; be it

Resolved, That the Retail Trade Committee of the Chamber of Commerce strongly urge upon the Board of Education, the principals of the public and private schools, and the pupils themselves, the fairness of dealing with local merchants.

The letter further recommends that copies of the resolutions be sent to all concerned.

The members after adjournment broke up into groups to discuss current events and planned to place themselves on record at the next general meeting as greatly opposed to the methods of a western manufacturing firm in dealing with the trade and also catering to the consumer direct, even selling their wares on the instalment plan.

Paris Pearl Market.

PARIS, April 12.—During the entire month of March an exceedingly quiet tone prevailed throughout the market. No transactions in any way remarkable were noticed. Many of the most important dealers of this city left Paris early in the month for the Easter holidays. Few foreign buyers were present and very few orders from abroad came in. All these circumstances tended to stop speculation and resulted in practical inactivity; nor was the news from Germany or Italy encouraging, owing to the fact that a number of failures were reported among firms dealing in this city, and this resulted in local firms being more cautious and less anxious to extend their accounts.

Despite all these conditions, however, prices have remained firm and the market in all lines of pearls has been well sustained, especially in fine pearls which remain very dear. It is generally expected that during the month of April conditions will prove better and brighter, as a number of foreign buyers are expected here.

The market for colored stones has also been fairly quiet. G. K.

Further Curtailment Ordered at Plant of the Waltham Watch Co. Until Surplus Is Reduced.

BOSTON, Mass., April 21.—The directors of the Waltham Watch Co. at their recent meeting for April, held at the company's Boston office in the John Hancock building, decided upon further changes and curtailments at the factory in Waltham, which went into effect to-day.

About 800 employes are placed on half time and nearly 100 more are laid off indefinitely. Notices posted convey the information that those employes who are assigned to half time will work from 7 a. m. until noon six days one week, and five days the next, thus alternating until further notice. In the finishing room 110 are affected, jeweling 75, pinion polishing 69, hairspring 65, flat steel 61, train making 50, dial B 50, punch 45, gilding 35, escape 25, adjusting B 25, dial A 20, balance 7.

The curtailment follows a series of shutdowns since the beginning of the year, attributed to overproduction in the previous season of the 18-size watch in particular and of some other sizes, and production of the 18-size will be suspended temporarily until the surplus stock has been reduced. It is stated that the company will devote its energies more especially to the manufacture of its higher grade lines hereafter.

President Fitch is quoted as saying apropos of the curtailment:

The natural solution of the problem as presented by the accumulation of a large surplus stock such as the Waltham Watch Co. has on hand is a complete shut down until the surplus is disposed of through sales. This company realizes that a long vacation will mean a very great hardship on its employes and it is their welfare which keeps us from closing the factory immediately for a long shutdown.

Spring orders have been very poor and we have piled up the largest surplus stock that we have ever had since the company was organized. Last Fall orders were coming in so rapidly that the factory was placed on a full working basis. Then came a slump in market conditions which made it necessary to curtail our production. There has not yet been any recovery from this period of dulness. We expected that there would be after the 1st of January.

Next Fall I confidently look for the beginning of a period of market prosperity in the watch trade. There is bound to be a sharp reaction from the present conditions, and this reaction is due to come in the Fall. Trade conditions are always poor in the Summer months and it will be nothing unusual if very poor market conditions prevail through June, July and the first part of August. The last two weeks in August we look for a betterment in the watch market which will mean large orders for the company.

I will positively deny that there is to be a wholesale discharge of hands. Any rumors to this effect cannot be too strongly contradicted. Such a rumor that there would be 1,000 hands laid off by the company is absurd and has no foundation whatsoever.

Our surplus stock consists mostly of 16 and 18 size watches. We have a fairly brisk demand for men's 12-size watches and for the various sizes of women's watches. We will devote our output to these latter goods entirely, and will not manufacture any of the 18 size watches and comparatively few of the 16 size.

While I cannot say as to the exact causes of the financial and business depression which seems to be sweeping over the country, I believe that the era of the automobile has something to do with it. Many persons are anxious to purchase and own automobiles and the expense of maintaining them is perhaps more than some can bear.

Bankruptcy Schedules of Samuel Frackman Filed in the United States Court.

Schedules in bankruptcy of Samuel Frackman, the manufacturing jeweler at 51 Maiden Lane, New York, who claims to have lost $50,000 worth of diamonds on his last trip west, and against whom a petition in bankruptcy was filed recently, were filed, Thursday, in the United States District Court, New York. They show liabilities of $154,022, of which $137,946 is in unsecured claims and $14,427 is in contingent claims, being notes of customers, nearly all of which were discounted by the Market and Fulton National Bank. The assets are placed at $28,492, consisting of notes, $1,841; accounts, $23,418; cash in banks, $3,182, and stocks and fixtures in the hands of receiver, amount not given.

Joseph Frackman is named as a creditor for $1,099 and Morton Frackman for $550. They are sons of the jeweler and their claims are for unpaid salaries.

The other creditors, whose claims are unsecured, are: The Potter & Buffinton Co., $2,433; R. A. Breidenbach, $1,738; Ostby & Barton Co., $3,586; Albert Lorsch & Co., $7,997; Stern Bros. & Co., $2,913; Arnstein Bros. & Co., $6,404; H., Z. & H. Oppenheimer, $2,012; Shiman Bros. & Co., $4,463; Hodenpyl & Walker, $2,608; L. Heller & Son, $6,411; Finkelstein Bros., $1,674; J. Bochner & Co., $1,148; Saunders, Meurer & Co., $1,536; L. Barnett & Co., $1,227; Atlas & Fisher, $2,182; Rosenberg & Daniel, $1,937; D. Teicher, $1,063; A. Suderov, $4,933; Frank & Sass $1,543; G. L. Houseman, $277; L. Beilenson, $7,255; T. Schisgall, $638; S. Schisgall, $1,500; S. Hess, $2,707; William Naigles & Co., $3,182; B. H. De Jong, $1,314; Meyerowitz Bros., $5,223; S. Pitzele, $1,186; Emile Spiro, $1,643; Stein & Hochberger, $886; Nebenzahl & Monk, $9,003; Levinson & Friedlander, $4,318; Goldsmith Bros., $6,183; I. Grodzenski, $2,416; Van Antwerpen, Van den Bosch & Co., $1,937; S. Pian Time-Payment Jewelry Co., $6,437; Rudolph Noel & Co., $2,701; Barnett Bros., $3,184; Herzfelder & Cohen, $2,917; Kleinberg & Probstein, $2,024; Veit Hirsh & Co., $2,237; B. Himmelbaum, $3,003; M. H. Mann & Co., $3,127; I. Hochberger, $3,384; H. Nordlinger's Sons, $1,034.

It is understood that about 75 per cent. of the creditors have agreed to a composition in bankruptcy at 12 cents on the dollar.

Mr. Frackman was adjudged a bankrupt last Friday, and the case has been referred to Referee in Bankruptcy William Allen for further hearing.

C. G. Breneman has purchased the repairing department of G. Rudisill, Altoona, Pa.

BIG AMERICAN PEARL FOUND.

Pink Beauty Weighs 187 Grains and Is Valued at $20,000.

An American pearl, weighing 187 grains, has arrived in the Maiden Lane district from the Western fisheries. It is almost round, and is reported by New York dealers to be the largest perfect fresh-water pearl ever seen in this city. It is of a beautiful pink color, and is valued at $20,000 by Maurice Brower, the dealer who purchased it. The pearl was found in the White River, Arkansas, and sold to a Western dealer, who brought it here.

Jewelers Board of Trade in New York Effects Arrest of Men Accused of Conspiring to Cheat Government and Defraud Jewelry and Other Merchants.

Mobile, Ala., April 22.—Through the efforts of the Jewelers Board of Trade in New York evidence has been gathered which resulted to day in the simultaneous arrest of a number of men in this section who are alleged to have conspired to defraud the Government and also a number of manufacturers and jobbers and to have withheld assets from a referee in bankruptcy. United States District Attorney W. H. Armbrecht, of this city, was appointed special assistant to the Attorney-General of the United States to prosecute the matter and has caused the arrest of Jesse H. and Daniel H. Shreve at San Antonio, Tex.; A. C. Shreve, Tuscaloosa; R. J. Shreve, James E. Shreve, Hillard Shreve, George H. Shreve, John Johnson, William Franklin, at Montgomery, and Samuel Copland at Scottsboro, Ala. Seven of the men are brothers and it is claimed that the men have fraudulently obtained hundreds of thousands of dollars worth of jewelry and other goods from all parts of the country.

It is charged that the men conspired to withhold from the referee in bankruptcy assets of the City Jewelry Co. of Montgomery, Ala. It is also alleged that they purchased from wholesale houses throughout the United States valuable jewelry, silverware and other merchandise with which to fit out a store and then took unlawful means to retain the goods.

It is claimed that the men have been working for several years and a part of the story goes back to the time when the City Jewelry Co. of Montgomery was incorporated, April 16, 1909, with a capital stock of $15,000, alleged to have been fully paid in. In a statement submitted to the Jewelers Board of Trade, New York, at that time, the officers of the corporation were said to be J. H. Shreve, president; J. L. Ivey, vice-president, and D. H. Shreve, secretary and treasurer. The corporation claimed assets of $19,463 and no liabilities.

In September of last year the owners of the business claimed to have moved practically all the stock from Montgomery to Greenville, Ala., where they said they placed it in the store of J. H. Shreve for a special sale. Mr. Shreve was also president of the Union Mercantile Co. at Greenville, Ala. His store at that place burned on the night of Sept. 26 and was not protected by insurance.

Following the fire the City Jewelry Co. began to be pressed by creditors and the outcome was a petition in bankruptcy filed against the concern by two newspapers in Montgomery and by a creditor represented by the Jewelers Board of Trade.

The board became interested in the case and quietly started an investigation through its attorneys. About Oct. 1 the officers of the City Jewelry Co. admitted in writing the insolvency of the corporation. It was found that the concern had less than $1,500 in stock on hand. A receiver was appointed and an effort made to replevin a number of claims, but nothing could be accomplished. It was estimated at the time that the concern owed about $20,000, which, together with the assets claimed when the business was started, showed a net loss of between $35,000 and $40,000 in a few months.

The Board of Trade was not at all satisfied with this condition of affairs and instructed its attorneys to leave nothing undone which would aid in bringing all the facts to light. To further this end the financial committee of the board met and voted a sufficient sum of money from its "fighting fund" to cover the expense involved by the investigation.

The stock and fixtures of the City Jewelry Co. were sold for $1,500, but when the schedules in bankruptcy were filed the liabilities were placed at $15,640 and assets of $7,000 were included.

The whole matter looked so suspicious that a meeting of the largest creditors was held in New York, at which time the Board's attorney from Montgomery, Ala., explained the situation. He reported that several examinations had been held with unsatisfactory results and that the whole situation looked bad. In his report he stated that while no definite offer had been made at the time, it was probable that a fair offer of settlement would be submitted if the Board did not prosecute the case criminally. If the Board did decide to prosecute, the attorney was of the opinion that all the assets would be used by the "gang" in defending the suit. It is most gratifying to state that the creditors unanimously voted to give up hope of obtaining anything from the failure and proceed with the prosecution. The finance committee than made another heavy draft on the Board's "fighting fund."

President Rothschild, of the Board, recently appointed a special committee composed of Ludwig Nissen, of Ludwig Nissen & Co., New York; Harry Cutler, of the Cutler Jewelry Co., Providence, R. I., and Alfred Krower, of Albert Lorsch & Co., New York, to obtain the appointment of a special United States prosecuting attorney in order that the case might not be delayed because of the large amount of current business in the office of the local District-Attorney. The committee called on Attorney-General Wickersham, who in turn took up the matter with thoroughness and dispatch, sending a special investigator to Alabama. It is understood that the Attorney-General instructed his representtive to report directly to him.

It was learned upon investigation, so it is claimed, that the whole transaction was of a decidedly suspicious nature and evidence was gathered which indicated that the matter was of greater moment than was at first suspected. The prosecution became convinced that large quantities of jewelry and other goods were being shipped about the country to avoid turning them over to the proper authorities after the petition in bankruptcy had been formally filed.

As the investigation proceeded additional facts of an interesting nature were uncovered from time to time. It was found extremely difficult, however, to obtain information, as it appears from what the attorney representing the Board of Trade, says, that the people in this section of the country were afraid to testify against the "gang," fearing their power and influence. The Board of Trade was convinced, however, that the conspirators had organized to rob the commercial world, fire buildings to cover up supposed losses and to rob the insurance companies, defy trustees in bankruptcy, and use the United States mails to fraudulently obtain goods and then intimidate and drive out men who tried to investigate.

The special committee of the Board composed of Messrs. Nissen, Cutler and Krower having been instructed to seek aid from the Federal authorities at Washington made a trip to the capital with the results indicated. Some of the best men in the employ of the Government were detailed on the case. Plans were formulated and an active campaign begun and when the members of the gang had all been located and sufficient evidence obtained, the signal was passed along and a number of the accused were all arrested at the same time.

The action of the Board of Trade taken in behalf of its members without expense to them will probably result in exposing one of the worst commercial swindles ever carried on in this country. It is estimated that the gang has gotten away with at least $300,000 worth of jewelry and other goods in the last few years.

The trial of the apprehended men will be watched with interest throughout the country.

M. D. Rothschild, president of the Jewelers Board of Trade, New York, said yesterday that the above report was correct and they had nothing to add. He explained that the members of the Board contribute to a "fighting fund," to be used expressly for the purpose of prosecuting dishonest debtors whenever the evidence in the case is clear and chances of conviction good. The Board is desirous of impressing upon the trade the fact that it is endeavoring to make it as costly a proceeding to defraud a member of the organization as it now is for a burglar to interfere with a jeweler protected by the Jewelers Security Alliance.

Montgomery, Ala., April 23.—Following an investigation by Government officials for several months, Geo. H. Shreve, James E. Shreve, A. C. Shreve and Jesse H. Shreve, Daniel H. Shreve, R. J. Shreve and Samuel Copland, all well known in this city, and John Johnson and Will Franklin, two negroes of this city, were arrested in different parts of the country simultaneously at 12 o'clock Friday. The arrests were in connection with the failure some time ago of the City Jewelry Co., a Montgomery establishment, and were brought about at the instigation of K. W. De Belle, Special Agent of the Department of Justice, and William Armbrecht, United States District Attorney for the Southern District of

Although true Black Opal is scarce, we have a notable stock in all grades received by us in a rough state direct from the mines and cut in our lapidary shop in New York.

Our prices are necessarily less than those obtaining in Europe and the fact that no two stones are alike makes this gem very attractive as a profit getter.

WE ARE SPECIALISTS IN BLACK OPALS

All the wonderful changing colors of the Solar Spectrum vibrate through "Black Opal," some in small pin point markings, others in harlequin, peacock and formal designs.

Some stones exhibit broad flashes of red, blue, green and purple while others exhibit cloud effects and sunsets such as Turner painted and only a Ruskin could describe.

QUALITY—STYLE

Alabama acting as a special assistant to the Attorney-General.

With the exception of the arrest of Jesse H. Shreve and Daniel H. Shreve in San Antonio, Tex., all the other arrests were effected by deputies under instructions from United States Marshal B. E. Walker.

The affidavit upon which the men were arrested was sworn to before United States Commissioner Judge John A. Elmore by Special Agent De Belle and with the exception of Jesse H. Shreve and Daniel H. Shreve the bonds for the defendants were set at $5,000 each. The bond of the two Shreves arrested in Texas was set at $7,500. Geo. H. Shreve and Johnson, one of the negroes, were the only defendants securing bond Friday night. The others were remanded in the care of the marshal.

Briefly stated the men are charged with conspiracy to force the City Jewelry Co. into bankruptcy and with concealing goods to the value of $20,000 from the trustee in bankruptcy. According to the allegations of the Government officers the City Jewelry Co., of which Jesse H. Shreve was president, was incorporated for the purpose of defrauding wholesale jewelry houses.

The burning of the jewelry store belonging to Jesse H. Shreve in Greenville, Sunday night, Sept. 26, 1909, figures prominently in the allegations made against the defendants. It is the contention of Mr. Armbrecht and Mr. De Belle that "dummy" packages were shipped to the Shreve store, through the express offices, the value on which was placed at a figure high enough to give the impression that they contained valuable articles of jewelry.

The Government officers charge the defendants with shipping cheap jewelry to the Greenville store and disposing of $20,000 worth of missing jewelry through other channels.

The City Jewelry Co. went into bankruptcy two days after the fire at Greenville. The following October the Trade Supply Co. was organized at Andalusia by H. C. Shreve, R. T. Shreve and a third party, who is not charged with having any part in the crime of which the Shreve brothers are accused. It was at this store that the Government investigators claim to have found some of the identical jewelry said to have been shipped to the Greenville store and which was supposed to have been destroyed at the fire.

The affidavit sworn out by Special Agent K. W. De Belle against the men charges that they conspired to commit an offense against the United States in combining together in anticipation of the involuntary bankruptcy of the City Jewelry Co., to conceal certain property belonging to the corporation. It is further alleged that these men conspired to purchase and order from various firms throughout the United States large quantities of diamonds, watches, silverware, jewelry and other goods usually handled by retail jewelers and to cause such firms to deliver the merchandise to the City Jewelry Co., and thereafter to remove a large quantity of the goods to the value of $20,000 from the store of the City Jewelry Co., at Montgomery, Ala., and to conceal these goods in anticipation of the involuntary bankruptcy of the concern.

It is also alleged that the men removed from the store at Montgomery a large number of packages containing cheap jewelry and other merchandise of little value, by express, marked at a high value, to Jesse H. Shreve at Greenville, Ala., and represented to creditors of the corporation and to the trustee in bankruptcy that the packages contained diamonds, watches, silverware, etc., to the value of $20,000, when in truth they were dummy packages. It is claimed that they represented that valuable packages had been burned by the fire, which destroyed the store of Jesse H. Shreve at Greenville, Ala., while in fact the merchandise in question were concealed in some place unknown to the Government.

The affidavit then goes on to enumerate certain articles of jewelry which are claimed to have been secreted by the alleged conspirators among which are a number of gold chains and a quantity of diamond and pearl-studded jewelry.

It is also alleged that a number of boxes and packages were shipped during the month of September, 1909, by Samuel Copland to A. C. Shreve by express from Montgomery, Ala., to J. H. Shreve, Greenville, Ala., and that other merchandise was moved about from place to place at different times to avoid having it fall into the hands of the proper authorities.

Carelessness of "Pennyweight" Thief Makes Philadelphia Jeweler $150 Richer by His Visit.

PHILADELPHIA, Pa. April 20.—An instance in which a "pennyweight" thief proved to be the victim rather than did the jeweler upon whom he planned to prey has just come to light.

The thief called at the store of J. E. Caldwell & Co., looked over the line of rings and left, saying he would return the next day to complete the purchase of a three-stone ring which had taken his fancy. He inquired when the salesman who waited upon him would be back from lunch.

With this knowledge he returned the next day at the time the clerk was away. He asked for the absent clerk, and was informed he was at his lunch, and another clerk volunteered his services. The man again left, saying he would return later. During this conversation it is believed he made the substitution.

Some time later Mr. Crawford, of the firm of Blair & Crawford, while on his way to lunch happened to notice a piece of glittering jewelry in a gutter, and upon picking it up was surprised to note that the ring contained three genuine diamonds and still bore the price tag. The tag was quite soiled, but the initials "J. E. C." were discernable. Upon Mr. Crawford's return to his own store he communicated with J. E. Caldwell & Co. by telephone, informinb them of his find. They seemed to know nothing of their loss, but investigation proved that the ring was indeed theirs, and lying in the slot in the ring tray reposed another ring of much less value, but worth about $150. The stolen ring is valued at approximately $1,300.

On his first visit to the store the thief paid considerable attention not only to the workmanship of the ring, but to the price tag, and upon the dummy was found an exact counterfeit of the firm's tag. Had it not been for Mr. Crawford's find the loss would not have been discovered for some time.

This thief is believed to be the same man who victimized H. O. Hurlburt & Sons, though positive information cannot be obtained at this writing as to whether or not two men were implicated or whether a colored man is alone involved. A complete account of the loss of H. O. Hurlburt & Son was contained in the last issue of THE JEWELERS' CIRCULAR-WEEKLY. A colored man is wanted by the police of Trenton, N. J., for the perpetration of a similar act.

Police on the Lookout for Clever Jewelry Thief Wanted at Sacramento, Cal.

The police of various cities are now trying to locate William F. Kelley, alias William F. Gorman, one of the three burglars who broke into the store of Emil Steinman, Sacramento, Cal., last February, and in

WM. F. KELLEY, ALIAS GORMAN.

company with two companions got away with jewelry to the value of $400.

The burglars gained an entrance through the cellar of the store and cut a hole through the floor and the bottom of the show window. One of the men, supposed to be Kelley, stood on the sidewalk with a string, which was passed through a grating to the burglars in the cellar, who were reaching through the hole and stealing the contents of the show window. If a passer-by approached the watcher he pulled the string, thus notifying those in the cellar.

By chance a pedestrian noticed the hand coming through the hole and notified the police. The men made their escape, but one named Collins was arrested, Feb. 4, and sentenced to five years in the penitentiary.

Kelley is still at large and is described as being about 25 years old, five feet eight inches high, weighing 161 pounds. He has fair complexion and black hair. He has a scar on his little finger and right side of upper lip.

LOUIS J. MONTAGNON, Secretary-Treasurer

Death of Joseph Henry Fanning.

PROVIDENCE, R. I., April 25.—Joseph Henry Fanning, a retired manufacturing jeweler and one of the oldest and widest known members of the guild in this city, died at his home, 168 Cypress St., at 5.45 o'clock yesterday afternoon, after an illness of about a month. He was one of the last of the old school, when almost everything was done by hand labor and every man was a journeyman in the broadest sense of the term through a thorough apprenticeship and early training in the shop and at the bench.

Mr. Fanning was born in this city in 1830 and his education was received in the public schools and the Providence High School. After concluding his schooling Mr. Fanning went into the jewelry business and in 1851 he started in business for himself, establishing the firm that for nearly half a century was prominently known throughout the country. On first entering business Mr. Fanning confined himself to the manufacture of pins and ear drops, as they were then called, both jet and plain, but gradually added other lines of goods, for many years manufacturing bracelets, ribbon and hair chains, hooks, bars and swivels, and also lockets and chains.

In 1856 the late Alfred S. Potter was admitted into the firm, which became Fanning & Potter and so continued until the time of Mr. Potter's death, Dec. 11, 1888, with the exception of from 1860 to 1868, while A. O. Baker was a member of the firm, when the name was Fanning, Potter & Co. Mr. Baker withdrew in 1868, when the old firm was resumed. Mr. Fanning withdrew from active business about 10 years ago, although for several years previous to that he had been gradually closing out his business.

The financial troubles of 1857, those occasioned by the breaking out of the Civil War in 1861 and the great business troubles that periodically depressed the country from 1873 to 1890, were all passed through by Fanning & Potter and during the entire existence of the concern it maintained a high standing in the trade. In prosperity and adversity Messrs. Fanning and Potter steadfastly remained together and during the 32 years of their business associations were in the truest sense of the expression partners.

Two children survive Mr. Fanning—a son, Martin S. Fanning, who is principal of the Oxford St. Grammar School, of this city, and a daughter, Mary E. Fanning, also of this city. Mr. Fanning was a communicant and vestryman at St. James' Episcopal Church, a member of the Providence Central Club, of St. John's Commandery, K. T., and was formerly president of the New England Manufacturing Jewelers' Association, now the New England Manufacturing Jewelers' and Silversmiths' Association.

For many years Mr. Fanning was in public life, both as a member of the City Council and of the Providence School Committee. He was for many years president of the Society for the Prevention of Cruelty to Children, a work in which he was deeply interested. In 1882 he was elected to the Common Council from the old Seventh Ward of this city and every year until 1887 was re-elected to the same position. In 1887 he went to the Board of Aldermen for one term. While in the Council he was a member and chairman of the committee on parks and was known as the "father" of Arbor Day, having been among the first to agitate and advocate the movement.

Although in failing health for about a month, Mr. Fanning was not confined to his bed until last Saturday. He failed rapidly from that time until his death

Death of Samuel F. Morrill.

CONCORD, N. H., April 23.—Samuel F. Morrill, who passed away last night at his home 8 S. State St., was one of the most prominent members of the jewelry trade in this city and was head of the firm of Morrill Bros., the oldest house in this line in Concord. The news of his death was received with universal regret.

A native of Dover, Mr. Morrill first saw the light in 1837. His boyhood was spent in his native town and he remained there until about 18 years ago. He came to Concord in 1856, and has been a resident of this city almost continuously since that time. Among his friends here he obtained an enviable reputation both as a citizen and merchant, and though averse to holding public office he served one term in the legislature.

Mr. Morrill learned the trade of jeweler as an apprentice in the concern of Carter & Witford, who were then located in what is now the Eagle block. When he had mastered his trade he went south for a few years and while there in 1861 was drafted for the Confederate army, but deserted and came north. Later, for a short time, he was engaged in the retail department of a silverware concern in Hartford, Conn. He then returned to Manchester and started in business for himself under the style of S. F. Morrill & Co. on a site where the postal telegraph building office now stands. The business remained there until the Morrill building was completed in 1876, when the house moved to the ground floor of that structure. About this time the present firm of Morrill Bros., composed of the deceased and John F. Morrill, was formed and has continued in business here ever since.

Mr. Morrill was married in 1863 to Sarah Parker of this city, and she with a daughter and his brother are his only survivors.

Death of Michael H. Curran.

SPRINGFIELD, Mass., April 23.—After a short illness from pneumonia Michael H. Curran, a well-known jeweler of this city, passed away at his home, 73 Sherman St., Monday morning. He was taken ill last Saturday, but despite medical aid he grew rapidly worse until the end.

Mr. Curran, who was 58 years old, has been in the jewelry business for more than 30 years. He started as a peddler, but built up a good trade, and about 10 years ago opened a nice store in this town. He was industrious, able, conscientious and a good salesman, although not a practical watchmaker and jeweler. He stood high in the community and had many friends.

Mr. Curran's store was formerly in the Court Square Theater building, but for the past few years the business had been located in the Whitnery building, on Washington St.

The deceased is survived by a widow and a son, James E. Curran, and a daughter, Mrs. E. A. McClintock.

Interesting Case Decided in Favor of Fixed Selling Price.

On a motion for a preliminary injunction in the case of Robt. H. Ingersoll & Bro. against Jacob J. Schmuckler, which came up, last week, before Judge Lacombe in the United States Circuit Court, New York, a perpetual injunction was granted enjoining and restraining the defendant or his agents from directly or indirectly causing to be sold or offered for sale, except as licensed by the complainants, any watches embodying the invention of letters patent Nos. 787041, 855950 and 926329, and more particularly from directly or indirectly dealing in complainants' watches, including the Yankee watches, except at prices in strict conformity with the Ingersoll schedule. It was further decreed that the complainants recover from the defendants cost of the suit.

The complaint in this action, filed some time ago, set forth the ground upon which the firm of Robt. H. Ingersoll & Bro. claimed title to the patents, and alleged that the defendant had infringed these patents in that he had been cutting prices in the selling of the watches. It was claimed that the alleged violation was being carried on in the face of an agreement between the two parties as to the selling price of the watches. A restraining order was granted pending the argument of the preliminary injunction.

Robt. H. Ingersoll & Bro. say that so far as they know this is the only suit ever brought by a manufacturer against a jobber, compelling him to sell to the retail trade at a fixed price. Heretofore, they say, actions have in other instances been brought against a retail dealer who is cutting the established price.

The prompt decision of the court in this action is of general interest throughout the trade, as it establishes beyond question that Robt. H. Ingersoll & Bro. are able to protect prices on their watches. This case is the last of a large number of cases of a similar nature, all of which have terminated in a similar way.

Death of Lincoln Sheridan.

ST. CHARLES, Minn., April 20.—The recent death of Mr. Lincoln Sheridan came as a shock to this community. He was a leading citizen and a prominent jeweler here for many years. Just a week before his death, April 9, he had taken to his bed, going down with what he thought was grippe, but proved a fatal case of diabetes.

Lincoln Sheridan was born in Hacketstown, N. J., in 1864. In 1876 he came west with his mother, going to Plainview. Somewhat later he entered the employ of Frank Lanager, who then ran a jewelry store at Plainview, and remained with him until he had learned the business. Selecting Mazeppa as a likely point, he started up for himself. Later he moved to Eyota, coming from there a few years later to St. Charles in 1891.

Your Best Customers Will Buy This Pin

You will make no mistake in placing a trial order for this latest and exclusive novelty in feminine jewelry.

THE PSYCHE BOW

is artistically designed by our own artists and exquisitely made by expert workmen. It fills the requirements of this season's fashionable mode.

(PATENT APPLIED FOR)

ONE OF OUR MANY DESIGNS

The bow here illustrated is one pattern from our extensive line. Every Psyche Bow is 14-K. Gold mounted in genuine stones. They come in pearls, diamonds, sapphires, topaz and other attractive combinations.

An Exceptionally Good Feature is our Patent Clasp

It enables the wearer to use the pin for any jabot, or as a beautiful hair ornament. A simple turn of a button at the back unclasps it.

Considering the excellence of quality the prices are remarkably low—ranging from $18.00 upward, according to mountings.

Place a trial order to-day or write for full particulars.

HOWARD & COCKSHAW

218-220 FOURTH AVENUE NEW YORK

Conditions Still Remain Quiet in Amsterdam Diamond Market.

AMSTERDAM, April 16.—Conditions in the diamond market here have remained about the same during the past three weeks. Business is still quiet, as only a very few buyers have visited the city of late, outside of the local and European people who come here regularly, but the latter have been absorbing a considerable amount of goods and factories are all working full time. There is a scarcity of workmen here which causes wages to go higher every week. This, of course, is not without its influence on the prices of the cut goods, which are high and even show a tendency to go higher still, despite the lessening demand.

At present there is a large call for *piqui* and badly spotted goods, small brilliants and eight facets. Roses, with the exception of very small sizes, are not in demand. The finer clean goods, whose sales have fallen off, remain firm in price, because these are all held by strong firms.

The Syndicate sells rough goods here regularly every week, and prices show no change. A silly rumor to the effect that some rough had been sold at lower prices was current among the workmen, but proved absolutely untrue.

As far as the general condition of the market is concerned, cutters here feel tranquil and show no alarm at the fact that business is a little dull at present. During the first two months a large number of important buyers were here and bought heavily, and it is not expected that they will renew their purchases until the stocks already bought are disposed of. This will occur within a short time, when a large number of American and European buyers will be here again for goods for late Summer and Fall trade.

The retail trade in Europe has been fair of late, the best reports coming from Germany and Austria, and most of the buyers here during the last week were from those countries. Among the principal firms who have been represented in this market were: M. Kahn, Stuttgart; L. Strauss, Paris; Kohn & Hacs, Vienna; M. Kahn & Co., Paris; B. Rappaport & Fils, Paris; D. L. Davis Bros., London; Ryrie Bros., Toronto, Canada; Ad Cohen & Son, Birmingham; Baekes & Strauss, London; E. Bautelji & S. Segaar, Paris; J. Bellak, Vienna; J. Green, London; Saril & Kahn, Antwerp; Arnstein Bros. & Co., New York; Wm. Kurth, Vienna; S. Freedman, Antwerp; A. Worms, Paris; M. Bassot, Paris; Gasell & Co., Pforzheim; L. Trier, of N. M. Oppenheim, Frankfurt; Marchand Fréres, Paris and New York.

Market Prices for Silver Bars.

The following are the quotations of silver bars in London and New York as reported last week:

	London.	*New York selling price, .999 Basis.*

" 22	24 3-4d.	.55⅞
" 23	24 3-4d.	.55⅞
" 25	24 11-16d.	.55¾

E. L. Steirwald, Gosport, has sold out to G. A. Keller.

Police Want Man Who Cleverly "Switches" Rings Which He Orders "C. O. D."

SAVANNAH, Ga., April 22.—The police throughout the country have been asked to aid in the arrest of W. P. Duke, alias "James Parris," who also travels under other assumed names, who, in company with J. W. Napier, Jr., it is alleged, swindled agents of the Southern Express Co. in Kershaw and Bamberg counties, South Carolina, by exchanging imitation for genuine diamond rings while examining packages sent to them, for which they were to pay on receipt. Napier was arrested and is under $2,500 bond. The police are now anxious to locate his partner.

A circular has been sent out by the Southern Express Co. offering a reward of $200 for the arrest and detention of Parris and giving the following description of the man: He is slender, about 30 years of age; five feet six to eight inches tall; clean shaven; sharp features; small face; red complexion; prominent upper front teeth. He wore nice looking dark suit; black derby hat, and his weight is about 135 to 145 pounds.

Lambert Bros., retail jewelers of 58th St. and Third Ave., New York, state that two men attempted to obtain a diamond ring from them for which they were to pay upon delivery by the express company, but they refused to submit any goods under these conditions. The letter written by Lambert Bros. in reply to their request was found by the police in the grip which was dropped by Duke at the time he made his escape.

It was explained that the scheme which the two men are alleged to have worked was the old one to obtain the goods from jewelers in distant towns and then substitute imitation stones for the genuine ones, finally returning the rings with the statement that they did not exactly meet with approval.

When his partner was arrested Duke disappeared, but in his hurry dropped a grip in which were found letters indicating that J. W. Napier and W. P. Duke were owner and manager, respectively, of Napier's Carnival Shows, which were exhibited through towns in South Carolina in 1909-1910. Letters also indicate that W. B. Duke is from New York or Long Island City.

Jewelers are warned against sending Duke goods by express, and the police are asked to notify J. Hockaday, general manager of the Southern Express Co., Savannah, Ga., should Duke be apprehended.

Jewelers' Gold Bars Withdrawn and Exchanged at New York.

Week Ended April 27, 1910.

The U. S. Assay Office reports:

Gold bars exchanged for gold coin	$382,077.11
Gold bars paid depositors	79,384.35
Total	$461,461.46

Of this the gold bars exchanged for gold coin are reported as follows:

April 18	$88,385.70
" 19	55,670.95
" 20	91,835.79
" 21	62,888.03
" 22	57,446.00
" 23	25,850.64
Total	$382,077.11

Chas. F. Wood, Summit, N. J., Files Petition in Bankruptcy.

SUMMIT, N. J., April 21.—A petition in bankruptcy showing liabilities of $185,000 has been filed with Referee Atwood L. DeCoster, of Newark, by Charles F. Wood, of this place. The petitioner is a member of Chas. F. Wood & Co., Inc., dealers in diamonds and jewelry, 15 Maiden Lane, which succeeded to the old partnership of Charles F. Wood & Co. after that firm made a settlement with creditors on a basis of 40 cents on the dollar, in 1908.

Among the unsecured creditors named in the petition are Mayor George F. Vreeland, $10,815; William W. McCollum, Millburn, $5,406; George H. Williams, Summit, $5,406; Henry P. Twombly and D. Arthur Young, both of this city, each $5,406; William Z. Larned, this city, $10,000; Julius A. Falk, this city, $10,081; Peter T. Wood, Newark, brother of the bankrupt, $10,831; City Solicitor Corra N. Williams, $5,000. There are many other creditors.

Following the petition of Charles F. Wood comes the announcement that Elmer E. Wood, Newark, and John B. Wood, Summit, brothers and partners of the first named, have also instituted bankruptcy proceedings. Their petitions have been referred to Referee Edwin G. Adams.

When the firm of Charles F. Wood & Co. failed, in April, 1908, the liabilities were placed at $525,000 and the assets were said to have been about $240,000. A settlement was proposed on a basis of 40 per cent., payable as follows: 15 per cent., with interest, Jan. 20, 1909, and 10 per cent., with interest, July 20, 1909, in unindorsed notes, bearing interest from Sept. 1, 1908, and payable by the corporation. The remaining 15 per cent. was in notes, payable in January, 1910, and made by the individual partners of the late firm and indorsed by some friends.

The indorsers were to be secured by the stock of the new firm, but when the notes fell due Jan. 20 none was paid. About $60,000 worth went to protest. Some of the indorsers have paid up rather than have any publicity, but others are fighting suits that have been instituted in the New York courts for payment. They allege that misrepresentations were made concerning the real situation of affairs at the time of the making of the notes.

Mr Wood, in speaking about the bankruptcy petition, said that it was the old trouble, and that matters had reached a point where he had to go into bankruptcy. He said that the unsecured creditors were all for contingent liabilities, and the liabilities outside of the family amounted to about $60,000. He added that he was unable to meet a payment which became due in January on the old indebtedness, and that the only thing left to do was to go into bankruptcy.

He explained that this was an individual petition and not a petition against Chas. F. Wood & Co. Mr. Wood's attention was called to a newspaper story which intimated that he was interested in the Beachwood Park Co., and that he had stock in that concern to the value of $25,000. He said that he only owned one share of stock in this concern.

We solicit a trial order **KRONER & HYMAN**, 48 Maiden Lane, New York

Philadelphia.

Michael Muferowitz, New York, was a recent visitor.

Councilman Bolte, an Atlantic City jeweler, was here last week.

Weinrich Bros. Co. have moved from 1211 Filbert St. to 12th and Arch Sts.

Col. J. Warner Hutchins, who has been traveling abroad, is expected to return about May 15.

F. E. Ogden, with H. O. Hurlburt & Sons, will return this week from New Orleans.

Charles Koshland, wholesale jeweler at 702 Chestnut St., is ill at his home with the grip.

Edward T. Stotesbury, vice-president of the Keystone Watch Case Co., will sail for Europe May 3.

L. A. Thomas, formerly with Nelson & Co., Camden, N. J., has accepted a position with C. E. Lewis.

Mr. and Mrs. C. Walter Sheppard, 520 N. 10th St., have sent out cards announcing the birth of a son.

E. A. Farnum, of H. M. Jacobson & Son, 1120 Chestnut St., has been transferred to the Washington office.

Benjamin Reistine, gold plater, 129 S. 7th St., is about to dispose of his business on account of ill-health.

W. L. Roberts, Wilmington, Del., is now located in his new store and is very much pleased with the outlook.

George A. Bicknell, representing F. S. Gilbert, North Attleboro, Mass., was here on business during the week.

George E. Morrill, with H. O. Hurlburt & Sons, had a hurried call to Boston last week because of the illness of his mother.

Charles E. Lewis, jeweler and optician at 4600 Frankford Ave., has sent out cards to his patrons announcing his 36th anniversary.

The store of N. Chaker, 10 S. 4th St., was entered Thursday by thieves and 16 dozen of gold-filled rings and other pieces of jewelry were carried away.

The sympathy of the trade is extended to George Donaldson, well known to the trade, on account of the death of his wife, which occurred April 20th.

S. C. Mussina, Williamsport, Pa., will sail for Europe June 1. Mr. Mussina will be absent about three months and will travel extensively during that time.

The Pennsylvania Retail Jewelers' Association has sent out invitations to the fifth annual convention to be held May 19 and 20 at the Continental Hotel.

F. A. Colladay, son of F. A. Colladay, 52d St. and Girard Ave., was painfully burned last week on the face and hands while repairing a clock with gasoline.

Bert Lewis, with the B. F. Williams Co., 726 Chestnut St., is receiving the sympathy of the trade on account of the death of his wife, which occurred Monday, April 17.

It is rumored that S. Martin, Germantown Ave., is about to dispose of his business and will retire. Mr. Martin has been in the jewelry business for many years.

H. S. Kratz, Souderton, Pa., was instrumental last week in making the Cantata of the Emmanuel and Zwingli churches a success. Mr. Katz trained the large chorus for the event.

The first meeting of the creditors of the Futernik Co., Inc., bankrupts, will be held Monday, May 9, in the offices of the referee, David Werner Amram, Real Estate Trust building.

During the heavy wind and rain storm last Sunday a new burglar alarm which had been placed in the window of I. Weiss, 711 Sansom St., sent in a false alarm, summoning Mr. Weiss and the police.

Theodore Beck has returned from New Orleans, where he was one of the guests of the Shriners. Mr. Beck has brought back with him souvenirs which might be classed as a miniature managerie.

A large number of silver cups and medals were shown to advantage in the windows of J. E. Caldwell & Co. during the week. The articles, which were made by this firm, are to be awarded as prizes by the Atlantic City Country Club at their Spring Golf Tournament, April 28-30.

Mrs. Sandmen, wife of the late Joseph Sandmen, who was a well-known traveling jeweler, announces her engagement to Mr. Bucarach, a merchant of this city. Mrs. Sandmen was formerly associated in the jewelry business with her father, Frank Lingg, a retail jeweler at 11th and Spruce Sts.

A window in the store of Joseph Gumpert, 1218 Ridge Ave., was broken last Monday evening by a thief, who was surprised in the act by the police and chased for many squares before he was caught. The stolen jewelry was recovered. Several shots were fired, one of which lodged in the shoulder of a policeman.

The jewelry store of Frank Lingg was entered last Wednesday by a colored man who asked to be shown some diamond rings. While the jeweler's attention was otherwise engaged the man substituted a dummy ring for one of the most valuable rings in the tray. After making other inquiries the man withdrew from the store before the loss was discovered.

The following jewelers were visitors to this city during the week: George W. Beck, Vineland, N. J.; F. W. Freeman, West Chester, Pa.; C. L. Lewkowitz, Atlanta, Ga.; J. S. Downie, Hatboro, Pa.; D. H. Krause, North Wales, Pa.; H. B. McFarlan, E. Downingtown, Pa.; E. K. Bean, Sautelle, Pa., R. W. Quicksall, Mount Holly, N. J., and Percy Savory, with Wadsworth Watch Case Co.

Harry Egolf, of 52d and Arch Sts., was arrested last Thursday, suspected of having stolen a package of rings and other jewelry valued at $500 from the United States Express Co. Egolf, who is an employe of the company, has been under suspicion for two weeks. During that time a number of packages were tampered with and others were lost entirely. Detectives O'Sullivan and Callam made the arrest.

An attractive window display was that seen last week at the store of the Bailey, Banks & Biddle Co. The exhibit consisted of a collection of varied prizes to be presented at the Third Annual Roadability Run which is to be held at Atlantic City, N. J., Saturday, April 30. Fully 150 cars will participate in this event. The Mayor Stoy Cup is featured as the first prize. J. Archibald Paul, of the Bailey, Banks & Biddle Co., has entered his car, "The Franklin."

What might have been a successful robbery was cleverly averted last Thursday morning by the timely arrival on the scene of the watchman for Van Dusen & Stokes Co., 1123 Chestnut St. The watchman was startled by noise of broken glass, and upon investigating found that a piece from the corner of the store window had been cut away. A tray of diamonds, which had been left in the window over night, is supposed to have been the attraction, but the thieves were frightened away before getting the stones.

The arrest of Jack Kellar, aged 30 years, on Friday, in a jewelry store at 2d and Market Sts., after he had tried to dispose of some broken pieces of silver, was due to the suspicions of the Market St. jeweler. The broken silver led the jeweler to suspect that something was wrong and, while he talked to Kellar, a clerk was sent to the corner for a policeman. Kellar answers the description, it is claimed, of a man who recently tried to pawn a silver tray which was part of the loot stolen from a private residence in West Orange, N. J. He denies the charges and is being held for a further hearing.

After an exciting chase, John Hummelwright was arrested Monday, charged with the theft of a number of gold watches and other articles from M. Sickles & Sons, 726 Chestnut St. Joseph Waxman and Abe Joseph were also arrested. The detectives claim that Hummelwright, who is about 17 years old, has been taught to steal by Waxman and Joseph. The prisoner, it is charged, grabbed a tray of watches and ran away. The shouts of "Stop thief" attracted the attention of the officers, who gave chase and finally captured the trio. Harry Barry and Ed. Sickles, of the firm, who gave chase, caught one of the men in Green's Hotel across the street from the store.

The traveling representatives visiting the trade during the week were: Charles S. Morse, the Winthrop Mfg. Co., Attleboro, Mass.; Mr. Thompson, C. Roy Randall & Co., North Attleboro, Mass.; L. S. Sweetland, the Allison Mfg. Co., Attleboro, Mass.; C. W. Herman, the Waterbury Clock Co., New York; C. J. Rech, Jr., C. Rech & Sons, Newark, N. J.; C. F. Willemin, Sulzberger & Co., Providence, R. I.; R. M. Hoxie, Mason, Howard & Co., Attleboro, Mass.; Charles G. Parker, Bates & Bacon Mfg. Co., Providence, R. I.; W. H. Thornton, H. A. Kirby, Providence, R. I.; Max Z. Stein, Doran, Bagnall & Co., and William Holme, Ballou & Co., Providence, R. I.

The firm of Price & Tompkins, Mattoon, Ill., dissolved partnership recently, E. L. Price retiring. Mr. Tompkins will continue the business at the same location and will collect all outstanding accounts and assume the liabilities of the firm.

Richard Miller, a jeweler of McPherson, Kans., accompanied by his wife, will sail to-morrow for Germany on the North German Lloyd steamship *Zieten*. They will visit Mr. Miller's old home in Fulda and will spend several months abroad, returning home about the first part of September. During Mr. Miller's absence the business will be in charge of W. H. Widiger and Miss Cora Martin.

GORHAM SILVER

THE WINNING ARGUMENT

¶ The Trade-Mark which indentifies the Sterling Silver productions of The Gorham Company is a recognized guarantee of standard of metal ($^{925}/_{1000}$ fine). It is the guarantee also of advanced artistic design and superior workmanship.

GORHAM QUALITY

is so widely accepted, the meaning and value of the mark are so widely known, that no explanations are necessary when productions bearing this mark are shown to prospective purchasers. The mark is an accepted evidence of quality and in itself, is an argument that secures immediate approval and makes the salesman's duty easy.

¶ The policy of the Company permits jewelers to offer its wares at prices comparing favorably with those of less well known and less meritorious productions.

MERCHANTS generally are indirectly interested in the suggestion of the Post Office authorities that the rates on second-class mail matter be increased, because there is little doubt that such increase in rates would necessarily be followed by an increase in the subscription prices of the principal trade papers and magazines which merchants and manufacturers must read, as many are absolutely essential to them in the proper conduct of their business. The proposed increase in second-class matter was based on an apparent deficit of nearly $17,500,000 in the Post Office Department account of last year, which, without any real reason, was attributed to the carrying of second-class periodicals and not to any defects or deficiencies in the management of the department itself. However, the Postmaster-General's recent report on the receipts and expenditures of the first half of the fiscal year indicates that there will be a decrease in this deficit of over $10,000,000 in the current year as a result of radical reforms introduced at the beginning of the year in the methods of handling the postal business. As the reorganization of the department is still in process, there is reason to suppose that this apparent deficit can and will be decreased still further, if not turned into a surplus. All of which bears out the statement, made so often, that the excessive cost of the Post Office Department is not the result of handling second-class mail, but due to the laxness and unbusinesslike methods of the department itself. We think that the result of the reforms already instituted is sufficient answer to the cry against the second-class rate and indicates so clearly the fallacy of the reasoning of those who have been fighting for the increase that it needs no further comment.

The Woman Who Gives Away Diamonds.

FROM time to time the daily newspapers of the larger cities, and often in some of the smaller towns, have published stories running all the way from a paragraph to a column in length, telling of a woman, described as a "prominent society leader," who is the owner of an American diamond "mine," often referred to as being located in Arkansas. The story goes on to relate that so many diamonds have been located on the property owned by this woman that she has given large quantities of the rough as presents to her friends as favors at card parties or other social functions.

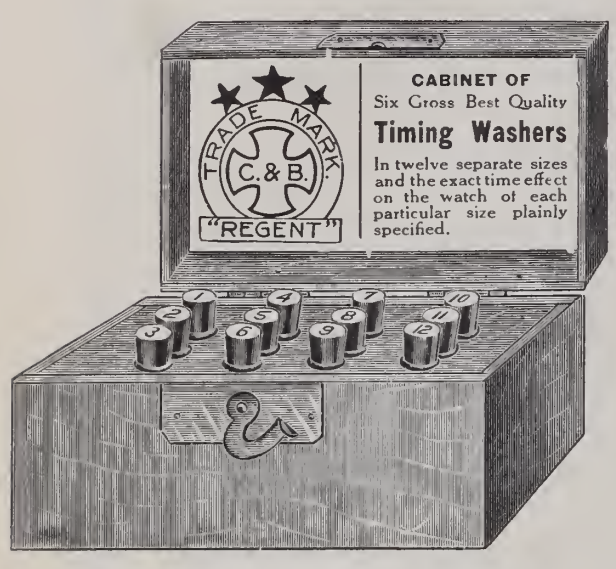
Attempts to either locate the woman in question or find out how these stories have originated have so far proved unsuccessful. In nearly every case where THE JEWELERS' CIRCULAR-WEEKLY has tried to run down the story at the hotel where the woman is supposed to have stopped and given out the diamonds, the management disclaimed any knowledge of her or of anyone possessing this particularly generous characteristic.

Though apparently the woman seems to be a creature of the imagination of the reporter, there seems to be no reason why these stories, similar in all their details, should appear in different cities at different times, and if they are inspired by a "press agent" their purpose is not obvious, as no attempts to sell stocks in the supposed diamond mine have as yet come to our attention.

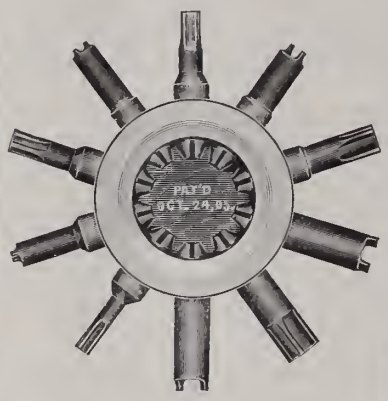
The readers of The Jewelers' Circular-Weekly have plenty of orders to place. Advertise to them if you wish them to do business with you.

Should any reader of THE JEWELERS' CIRCULAR-WEEKLY learn of the origin of these stories in his town, or be put in the way of obtaining any information in connection with them or the party referred to, he is requested to communicate with the editor.

Variation in the Carat Weight.



IT seems strange that there is so little apparent interest among jewelers and gem dealers in regard to the movement for a uniform of decimal carat weight, inasmuch as the variation in the actual weight of the carat, as used as a basis of gem measurement in different countries, is so large as to make a real and not theoretical difference in the weight of a large stone as measured by the standard carats of different localities. What is more, there is a difference not only in the standards of the carats used in various sections of Europe, but there is probably an even greater difference and almost an entire lack of uniformity in the actual weights of the small metal weights used by jewelers and importers to determine the heaviness of gems. Attention to this subject has never been more clearly called than in the article by Leonard J. Spencer, M. A., F. G. S., of the mineralogical department of the British Museum, which was published last month in the *Mineralogical Magazine* and is now reprinted in pamphlet form. Mr. Spencer's article is entitled "Notes on the Weight of the Cullinan Diamond and on the Value of the Carat-Weight," but it is, in effect, one of the best arguments for a universal standardization of the carat weight that has yet been placed before the trade.

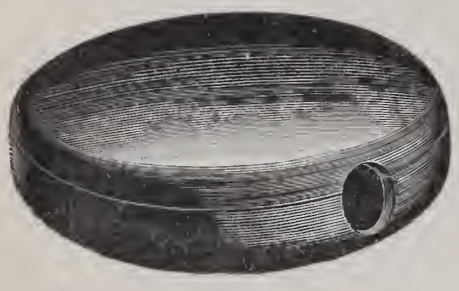


In speaking of the Cullinan diamond in its rough form, Mr. Spencer shows that a doubt exists not only as to its weight in carats, but also as to the exact equivalent, compared with standard weights, of the carat-weights in which this is expressed. Quoting from various descriptions of the gem he shows that its weight was given by the different authors at all the way from 3,024 to 3,032 carats, the variation of those apparently expressing it in English carats running from 3,024¾ to 3,032 carats. The 3,032 figure was probably taken at the mine before the stone was thoroughly cleaned, but the weight taken at the Johannesburg office of the Premier Mining Co was 3,024¾ carats, while at the London office it was found to be 3,025¾ carats, a full carat difference. When weighed by the cutters in Amsterdam, just before cutting, it was placed at 3,019¾ Dutch carats, which is equivalent to 3,025 English carats. Mr. Spencer made an examination of the carat weights with which the stone had been

Some Things of Interest to You

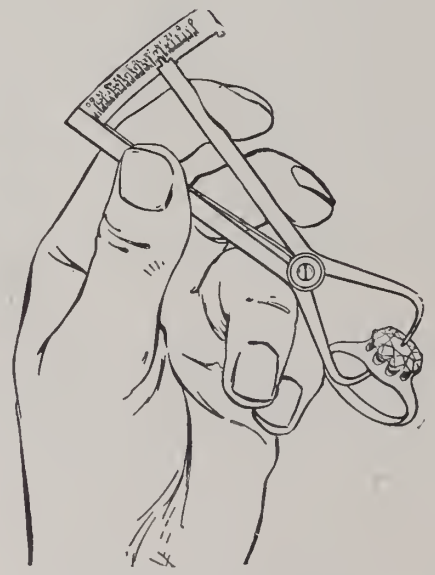
Cabinet Timing Washers

No. 12. Price $1.50



10-Prong Sleeve Wrench

Price 50 cents

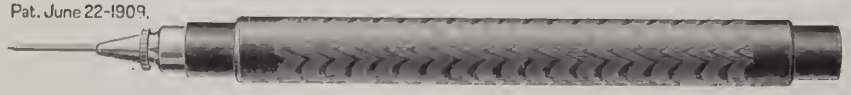


Duplicates of these can be ordered by number on card put up in ½ gross papers. If not otherwise stated, 15 cents per ½ gross, or 2 papers 25 cents.

Ajax Insulators

Made in all sizes

Price $2.15 per Dozen



Diamond Gauge

Price $3.75

Automatic Fountain Watch Oiler in Rubber Case

Price $1.50

This Oiler has a gold feeding needle which will not corrode the oil, and an automatic valve inside the Oiler head to shut off and regulate the supply of oil as needed. Press gold needle against pivot or jewel-hole and valve will open and close when released. The gold needle deposits the oil directly in the oil-cup and around the pivot, in place of on top of the pivot or around the jewel-setting as is the case with ordinary oiler.

CROSS & BEGUELIN

23 Maiden Lane - - - NEW YORK

weighed at the London office of the Premier company, comparing these with known weights, and says that the carat weights used showed considerable signs of wear owing to the rough use to which they are subjected; it is probable that nearly five years ago, at the time of the weighing of the Cullinan diamond, they were appreciably heavier than they are now.

The author also calls attention to the fact, not generally understood, that in addition to the difference between carats of various countries there are slight differences in the English carat alone. The value usually given in the text books for the English carat is 205.409 milligrams, while many of the carat weights used by the London jewelers are 205.3 mg. Mr. Spencer speaks of having compared against gram weights eight different sets of carat weights actually in use in London, and obtaining values for the carat varying from 203.2 to 206.3 milligrams (a difference of about 1/64 of a carat). The majority were near 205.3, which seems to be the one in general use. This variation was probably due to the fact that the weights are not handled with any degree of care. The more carefully handled and adjusted set of carat weights in the British Museum give the carat as 205.410, but these weights were first supplied in 1851, and the firm which made them now produces carat weights which agree with the Board of Trade definition at 205.304 mg.

After calling attention to these and other points of difference in what should be an invariable standard in our trade, the author concludes by saying that the adoption of the metric carat of 200 milligrams will be an excellent solution of the problem, and by its universal use the existing confusion would be avoided. The difference between the old and new units is only slight, the metric carat being less than the present carat; this means that the weight of a particular stone would be expressed by a slightly larger number when weighed against metric carats than when it is weighed against the present standard weights. One of the greatest advantages that would be gained would be the discarding of the awkward fractions which now must be used in gem weights in favor of decimal fractions, which can be added without trouble.

Games Rolled by the Jewelers' Bowling League of New York.

The following were the scores of the teams of the Jewelers' Bowling League of New York in the games rolled last week at the Universal alleys, Brooklyn:

April 18.—Tiffany & Co.	844	867	924
vs. Wm. Barthman	897	886	938
April 20.—Solidarity Watch Case Co.	775	867	812
vs. Joseph Fahys & Co.	859	852	927
April 22.—J. J. Donnelly	821	759	877
vs. Cross & Beguelin	840	993	888

New York Notes

Henry Zimmern & Co. have moved from 77 John St. to 118 William St.

The American Watch and Diamond Co. has moved from 3 Maiden Lane to 6 Maiden Lane.

Simon Adler, of Rosenbaum & Adler, 65 Nassau St., sailed, yesterday, on the *Kronprinzessin Cecilie* for Europe.

The second day sale of the Edwin Babcock Holden engravings at the American Art Galleries, Friday, realized $10,107.

J. A. Goldberg, manufacturer and jobber in diamonds and jewelry, has moved his office from 77 John St. to 118 William St.

Goldmuntz Bros., 87 Nassau St., will move the New York office to more commodious quarters at 6 Maiden Lane, May 1.

O. J. Somers, of O. J. Somers & Co., 87 Nassau St., has fully recovered from his recent illness and expects to leave shortly on his regular trip.

Asher Green, with M. J. Averbeck, sailed, last Wednesday, on the *Lusitania* on a combined business and pleasure trip. He will be away for about two months.

J. Miller, who has been in business for 20 years in Lansford, Pa., has opened a place of business at 2542 Eighth Ave., as a dealer in diamonds, watches and jewelry.

Holland & Stein, jobbers in watches, clocks and jewelry, who were formerly located at 47 Market St., Newark, N. J., will move to 199 Canal St., this city, about May 1.

Frank M. Whiting & Co. will move their New York office from 320 Fifth Ave. to the Silversmiths' building, 15 Maiden Lane, May 1. Lester B. Smith will be in charge of the office.

Diamonds, precious stones and jewelry which were pledged by Alfred H. Smith & Co. with Henry McAleenan and M. L. Goldstone, will be sold at public auction tomorrow at 113 Leonard St.

I. Ollendorf, of the I. Ollendorf Co., accompanied by his wife and daughter, will sail for Europe Saturday. They will tour the continent and visit the exposition at Brussels, returning in about four months.

The Cohn Mfg. Co. and the Diamond Cut Glass Works have moved from 71 Nassau St. to more commodious quarters at 87 Nassau St. Lawrence Cohn, of the concerns, has returned from a trip in the south.

The foundations are almost completed for the new fireproof building being built for the Ansonia Clock Co. on the south side of 12th St., east of Seventh Ave., Brooklyn. The building will be seven stories high.

Mr. Stewart has taken as a partner W. A. Crocker, and the cut glass establishment at 88 W. Broadway is now being conducted as Stewart & Crocker, Inc. They deal in foreign and American glass ware and cut glass. Mr. Crocker has previously been in the glass ware business in this city for himself.

R. T. Haines Halsey, of this city, gave a lecture on American silversmiths of the 17th and 18th centuries at the Borough Hall, St. George, Staten Island, Saturday evening. Mr. Halsey gave an interesting lecture under the auspices of the Jewelers Board of Trade on the same subject at the Metropolitan Museum of Art some time ago.

The April *Bulletin* of the Merchants' Association of New York has been issued, and contains the proceedings of the association. Among other things mentioned are: The "Dock Improvement Fund," "Action in Regard to Fraudulent Sales by Auctioneers," "Cold Storage Bills," and other matters of general public interest.

The Diamond Workers' Association issued a souvenir program for the fair held last week which contains some interesting matter in regard to diamonds. The souvenir program also explains the meaning of the "copper wire end fund," as it is called, which is used for the prevention and cure of tuberculosis.

The Gorham Mfg. Co. has started a suit in the United States Circuit Court against Anthony J. Schmidt and Wm. H. Schmidt, who are in business as A. Schmidt & Son at 8 W. 40th St., alleging an infringement of the complainants' trade-mark of a "lion, an anchor and the letter G." The allegations in the complaint are substantially the same as those in the previous suits instituted by the complainant to protect its trade-mark.

R. Blackinton & Co. have taken additional room on the 11th floor of the Silversmiths' building, 15 Maiden Lane, a part of which is used as a private office for J. R. Morss, the New York representative, and the rest as a shipping and supply room. The addition gives the concern more space for the salesroom and better facilities. Walter D. Ballou, of R. Blackinton & Co., was in town recently and it was erroneously stated at that time that he was of the firm of B. A. Ballou & Co.

An order denying a motion to set aside a verdict for a new trial of the case of Marsellus, Pitt & Co. against R. Simpson & Co., which was reported in the last issue of THE JEWELERS' CIRCULAR-WEEKLY, has been signed by Justice Erlanger in the Supreme Court, trial term part 13. The suit was brought by Marsellus, Pitt & Co. to recover a quantity of jewelry and pearls pawned by J. Edward Boeck, who obtained them from the jewelers on memorandum. The case was won by Marsellus, Pitt & Co. and it is understood an appeal will be taken by the pawnbrokers.

A new firm has been formed by S. W. Conner and F. W. Settle which will begin business May 1 at 68 Nassau St. as dealers in diamonds, pearls and precious stones under the style of Conner & Settle. Mr. Conner was connected with Lewis, Kaiser & Luthy and later was for many years with F. W. Lewis and the estate of F. W. Lewis. Mr. Settle was for over 20 years with Smith & Knapp and Smith & North, and later in business for himself. The offices of the estate of F. W. Lewis have been moved from 1 Maiden Lane to the offices which will be occupied by the new firm.

The L. E. Waterman Co. has started an action in the United States Circuit Court against the Modern Pen Co., 22 Thames St., New York, alleging that its trade-mark has been infringed by the defendant in selling fountain pens marked or stamped with the words "A. A. Waterman & Co." An injunction is asked restraining the defendants from selling or advertising any fountain pen of other manufacture than that of the plaintiff under the name of "Waterman," or any imitating name which might confuse the public into believing that the fountain pens so sold are fountain pens manufactured by the plaintiffs. Damages in excess of $250,000 are claimed.

A valuable Egyptian bronze statuette was stolen from the Metropolitan Museum of Art last Wednesday. It was afterward found in a pawnshop on the Bowery and returned to the museum authorities. The statuette was stolen from Gallery 15 on the first floor where it stood alone in a glass case. The museum authorities are at a loss to account for the theft as the galleries are carefully guarded while open to the public and there has been no recent attempt to steal any piece of art. The statuette, which is valued at $1,500, is a standing figure 9¾ inches high representing the goddess Neith. It was draped in a close fitting garment reaching about the ankles, and a high Egyptian headdress surmounted the face.

The Appellate Division of the New York Supreme Court heard arguments in the case of the Mosler Safe Co. against the Maiden Lane Safe Deposit Co. last week. The appeal was from a judgment for $39,975 entered in the lower court on the verdict of jury in favor of the plaintiff. Three causes of action were stated in the complaint. The first was for recovery of a balance of $3,055, alleged to be due to the plaintiff under a contract for a fireproof vault; the second was for the recovery of $5,362, the price of a burglar and fire proof safe, and the third was for the recovery of a balance of $24,846 for a fireproof and burglar-proof vault. The Maiden Lane Safe Deposit Co., which is in the building at 170 Broadway, is patronized freely by jewelers.

A jury before Supreme Court Justice Dugro returned a verdict for $2,500 last Wednesday for Marcus Kreisburg, a diamond merchant, in his suit against an attorney named Schepper. The diamond merchant fell from a car in 1902 and broke his kneecap and retained the lawyer to bring suit for $2,000. About two years later Schepper got a ring for $305 from Mr. Kreisburg and told him at that time that the suit was coming on in good shape. Kreisburg said that the lawyer's check for the ring proved to be worthless and that he thereupon investigated and found that the railroad company had gotten judgment against him for $68 costs. Kreisburg sued the lawyer for $5,000. The jury gave him the $2,000, the $68 costs and the price of the ring with interest to date, and liberty to collect.

An itinerant jewelry peddler named Jacob Horowitz when before Magistrate Dooley recently claimed that Patrolman Oliver T. Raymond, of Traffic Squad D, who lives in Brooklyn, had obtained a diamond ring worth $100 from him on April 14 for the purpose of having it appraised and that he neither paid for it nor returned it. The policeman, according to the story told the magistrate, took the ring and promised to have it with him next morning after having obtained an estimate on its value. Horowitz said Raymond told him the following morn-

(Continued from page 89.)

ing that he had sold the ring to a friend and would have the money in a day or so. This explanation did not satisfy the owner and he demanded an accounting at once. The next day the peddler asserted that the policeman told him that the ring was in pawn, whereupon he went after a warrant. The version of the affair given by the policeman threw a different light upon the matter. He asserted that he had purchased the ring outright of Horowitz and paid an instalment on the price set. Afterward the peddler, he claimed, came around to his house and wanted the diamond back again. The magistrate paroled the policeman for a further hearing in the matter later.

Jacob J. Schmukler, 131 Canal St., has made an addition to his salesrooms.

A. Hirsch, Chicago, sailed for Europe, Saturday, on the *President Lincoln*.

E. C. Abel, of Abel Bros. & Co., 58 Nassau St., has been seriously ill at his home.

George Steere, a Pawtucket, R. I., manufacturer, was here, Thursday, en route for Canada.

David Beer, of Bernheim & Beer, 49 Maiden Lane, returned from a business trip, to-day.

Zimmern Bros., formerly at 35 Maiden Lane, will move to larger quarters at 37 Maiden Lane.

The Waltham Watch Co. has declared a preferred 3 per cent. semi-annual dividend, payable June 1.

Woodbury Melcher, of Scofield, Melcher & Scofield, Plainville, Mass., was in New York, last week.

Albert Levy, assistant buyer for I. Lewkowitz, 269 Sixth Ave., has gone to Europe for three months.

F. Klein recently started in business at 99 Forsyth St. as a manufacturer of diamond mountings.

Sidney Lee, of T. H. Lee & Son Co., Ltd., Toronto, Can., was in town, last week. He sailed for Europe on Saturday.

Mitchell & Tillotson, auctioneers, 35 Maiden Lane, are conducting a sale for George Robinson, Calgary, Alberta.

Mr. Bennett, eastern buyer of jewelry for the T. Eaton Co., Toronto, Can., was looking for lines in New York, last week.

S. E. Eppenstein, Chicago representative of the Illinois Watch Case Co., was at the New York offices of the concern, last week.

Max Oppenheimer, Oppenheimer, Brussell Importing Co., Flatiron building, is at present abroad making purchases of Fall stock.

Miss Gertrude McPherson, buyer for the Smith, Patterson Co.'s retail department, Boston, Mass., has been spending a vacation in town.

Cooper Bros., manufacturers of mountings, 54 Forsyth St., have taken the floor opposite their old location to afford them more room.

Mr. Stern, of Stern & Aronowitz, 71 Nassau St., has just returned from a successful business trip of eight weeks through the southern territory.

Paul J. Gillespie, of Gillespie Bros., Pittsburg, Pa., and Loring Andrews, of the Loring Andrews Co., Cincinnati, O., were among the out-of-town visitors in this city, last week.

Fred Carpenter, formerly a traveler for the W. & S. Blackinton Co., 180 Broadway, returned, last week, from a Winter vacation spent in Florida.

George J. Gruen, of D. Gruen, Sons & Co., Cincinnati, O., accompanied by his wife, sailed from here, last Saturday, for Naples on the *Berlin*.

The jewelry stock of Wm. Myerhoff, 2254 Third Ave., is being sold at auction by the Brooklyn Purchasing Syndicate. Mr. Myerhoff is retiring from business.

Mr. Braham, buyer for A. & J. Plaut, Cincinnati, O., who has been in town for the last week, went to Providence, R. I., Saturday, to buy his Fall lines.

The Sunday edition of the Brooklyn *Eagle* published a column story on a patent obtained by J. L. Gonard for cutting diamonds with the top facet concaved.

Harry H. Levine, who is manager of A. Schustrov's jewelry store at 2131 Third Ave., has returned from his honeymoon trip at Niagara Falls. He was married April 10 to Miss Ray Einbinder.

Lieberfreund Bros., manufacturers of solid gold lockets and diamonds, have moved their office from 75 Nassau St. to 14 Maiden Lane. The factory is still located at the old address.

Capt. Arthur F. Crosby, secretary of the Roosevelt Reception Committee, announced, last week, a special committee to formulate plans for the coming celebration, Ludwig Nissen being one of the five members of this committee.

Monday afternoon, about 4 o'clock, a fire was discovered in a supply room used by Abel Bros. & Co. John Abel and W. J. Andrews succeeded in getting the fire under control before the firemen arrived. The damage was slight.

The John Hasselbring Mfg. Co. has been incorporated to manufacture and deal in gold and silverware, plated goods, etc., with a capital of $75,000. The incorporators are: Dr. Chas. Ermentraut, G. Hasselbring, H. E. Reich and Gertrude Hasselbring.

A party of North Attleboro jewelers arrived in this city, last Wednesday, from Massachusetts, in an automobile. The party consisted of Andrew Morris, of G. C. Hudson & Co.; A. H. Riley, of Riley & French, and Jasper Codding, of the Codding & Heilborn Co.

The final games between the teams representing the Jewelers' Bowling League in this city and the Jewelers' League of Newark will be rolled, Saturday evening, at the Universal alleys, in Brooklyn. The first series rolled in Newark was won by the Newark team in three straight games.

Charles T. Evens, president of the New York State Retail Jewelers' Association, will be in New York the first week in May in attendance at the sessions of the Grand Lodge of Free and Accepted Masons, as the representative of Utica Lodge No. 47, of which he is serving his second term as master.

The Bloch Protective Hat Pin Co., with a capital of $50,000, has elected officers as follows: E. H. Bloch, president; David Meyer, vice-president; George Kiernan, treasurer; W. H. Van Nostrand, secretary. The concern will manufacture protective hat pins, invented by Mr. Bloch, at Sag Harbor.

Additions are being made to the watch case and silverware manufacturing plant of Joseph Fahys & Co., in Sag Harbor. A large stock room is going up in the inner court yard, and the main factory, at Division and Washington Sts., will be raised to a height of four stories, or more than 100 feet above ground level.

Charles Zemp, a Hoboken jeweler, accompanied by his wife, has returned from a trip in the south and west. While away Mr. Zemp collected a large number of American gems which he is going to transform into jewelry, shaping, grinding and polishing them in his own workshop, which he is about to enlarge.

Isador Lichenstein, for 30 years identified with the jewelry industry and for the last 15 years with H. Nordlinger's Sons, has started as a general accountant, to audit and write up books periodically for jewelers. Mr. Lichenstein is well known throughout the Maiden Lane district and his many friends wish him success.

As a memorial to the late Theodore B. Starr, the New York jeweler, who spent his Summers in Ridgefield, a room in the Danbury Hospital has been endowed by Mr. Starr's sons, Louis Morris Starr and Howard W. Starr, of New York. The amount of the endowment is $5,000, and the money has been invested and the income will be received by the hospital.

Lee and Herbert Reichman, of Reichman Bros., 65 Nassau St., sail for Europe, May 3, on the *Kronprinz Wilhelm* for a visit to the diamond markets. This is Herbert Reichman's first trip abroad. He will visit Antwerp, Amsterdam, Paris, London and other cities on the continent. They expect to be away about six weeks.

Two negroes got into a disagreement last week and one of them gashed the other in the face with a razor in front of the Chatham National Bank, where the victim was employed as a porter. The other negro, who has been employed by a Maiden Lane jewelry house, was also hurt by being kicked. He was arrested by Detectives Monahan and Sommers and held in $1,000 bail on charge of felonius assault. Bail was furnished.

Bennett C. Silver, formerly in the jewelry business, who has been on trial before Judge Swann in General Sessions for five days, charged with blackmail, may never be tried again. Last week the jury was discharged after failing to reach an agreement. The men stood nine to three for acquittal. The indictment set forth that Silver had sent a "Black Hand" letter to Mrs. Rebecca Cohen, demanding $2,000.

The Gorham Mfg. Co. has brought two additional suits against firms who are alleged to be infringing upon their trademark of an anchor, lion and the letter "G." The firms against whom the latest actions have been started are: G. V. Millar, trading as George V. Millar & Co., Scranton, Pa.; Mrs. J. Azeez, trading as T. Azeez, Atlantic City. The allegations in these suits are substantially the same as those in the prior suits.

While trying his new automobile near the Harriman estate at Arden, last Sunday,

(New York Notes continued on page 93.)

POLICE DEPARTMENT

CITY OF LOUISVILLE

$500 REWARD

HARRY FREEMAN, alias HARRY DIEHN, alias NEWMAN, alias EDWARDS
WANTED FOR LARCENY, FIVE THOUSAND DOLLARS

DESCRIPTION:—Age about 30 years; 5 ft. 6; 126 to 130; smooth face; dark hair; sallow complexion; brown eyes; was dressed in a dark suit of clothes; soft black alpine hat; black bow tie; high turned down collar.

This man is a well known penny-weighter; and has been arrested in several large cities for stealing diamonds.

Bertillon measurements, pictured here December 22, 1900.

Head Length 18	**Head Width 14.7**	**L. MID. F. 12.2**
L. Lit. Finger 9.1	**L. Foot 26.2**	**L. Forearm 47**
Trunk 86.5	**Teeth—One lower tooth out**	

This man has been identified as sneaking a tray of diamonds from a jewelry store in this city March 31, 1910, to the value of $5,000, description of which is as follows:

Please make a careful search for this man, and search pawn shops for jewelry. He may be picked up under an alias. He is well known throughout the country.

Wire all information to

JOHN P. CARNEY, Chief of Detectives

New York Notes.

(Continued from page 91.)

J. S. Van Wezel, a diamond cutter of New York, had a narrow escape from death when the car was thrown from the road down a 40-foot embankment. In the machine at the time were Mr. Van Wezel, his wife, a brother in-law and a chauffeur. As the auto fell they were thrown into a growth of thick bushes, and this fact alone saved them from death or serious injury. The car was almost completely wrecked.

The Alvin Mfg. Co.'s Fifth Ave. store has again been favored with the Riding Club's entire order for loving cups and prize trophies.

The Oscar Trilsch Co., manufacturers of jewelers' boxes, has moved from 7 Maiden Lane to the Silversmiths' building, 15 Maiden Lane

Abraham Roseman, 9 Maiden Lane, will sail Saturday on the *Amerika* for London. From there Mr. Roseman will go to Antwerp and Amsterdam to visit the diamond markets, returning about June 1.

Daniel W. Janowitz, 60 years old and well-known by many in the jewelry trade, died in Baltimore, Md., last Thursday, of intestinal troubles. Mr. Janowitz's brother, Harry Janowitz, conducts a jewelry store at 12 E. 125th St.

Albert Asch, said to be a retired jeweler, died in his home, at 486 Lenox Ave., from heart disease after a short illness Monday. He was born in France in 1853 and came to New York when a young man and engaged in the jewelry business. He is survived by his widow.

Schedules in bankruptcy of Benjamin Hebald, formerly a jeweler at 206 Broadway, New York, were filed in the United States District Court Friday. They show liabilities of $9,407 and assets of $2,130, including stock of $2,000 and $30 cash on hand and in the bank. Among the creditors named in the schedule whose claims are unsecured are: Aisenstein & Woronock, $206; Baum Bros., $676; Herman J. Dietz, $1,415; J. Friedenheimer, $103; Goldmuntz Bros., $1,011; Max Goldstein, $1,600; Leon Hirsch, $123; Robt. H. Ingersoll & Bro., $125; F. Kastners & Sons, $733; Korones Bros., $220; Levinson & Friedlander, $601; Laubheim Bros., $208; Ralph Metzger, $371; Reich & Rottenberg, $197; Morris Schiff, $122; S. Silberfeld, $800; J. R. Wood & Sons, $152; W. H. Terhune, $142.

The case against K. Finberg, a jeweler at 18 E. Broughton St., Savannah, Ga., charged with receiving stolen goods and with violating a city ordinance by not keeping a proper record of goods received in his establishment for repairs, was heard about a week ago. Finberg was alleged to have taken a watch from W. B. Runyon, a boy now held on the charge of burglary, knowing that the watch had been stolen and of failing to furnish tickets with a proper record of the goods received. The first charge failed and was dismissed, but the charge of violating the city ordinance was made out, and a heavy fine was imposed, after which sentence was suspended on condition that a proper record be kept in such cases in the future.

Harrisburg, Pa.

Steps have been taken to organize a business men's league in Pleasant View, a suburb of this city.

A. N. Ely, Williamstown, this county, is proud of his flock of 28 chickens which produced 628 eggs in march.

Announcement was made in this city last week of the engagement of Howard Moyer, Reading engraver, to Miss Mary Flemming, of that city.

William F. Day, Millersburg, this county, went to Greenfield, O., last week to investigate a proposition to engage in the jewelry business in that town.

M. Guy Lantz has resigned his position with L. M. Hartman, York, and purchased the store of Theodore Cranmer, in Glen Rock. He will assume charge May 1.

Among the honorary members of the Harrisburg Choral Society, which gave its annual concert last Friday evening are Jewelers C. Ross Boas and Joseph Closter.

Mr. and Mrs. F. E. Commings celebrated their 41st wedding anniversary at their home, 14 N. 4th St., last week. Mr. Commings is the city's oldest jeweler. There was a large attendance of friends.

Frank Gaskins moved into his enlarged and remodeled jewelry store in the Dugan building, in Sunbury, this week. The depth of the storeroom has been increased 18 feet and a new show window and entrance installed.

The store of Myer Baturin, which was recently sold to L. W. Kay at bankrupt's sale, is again open for business. Baturin has not been called for sentence as yet for receiving stolen goods and unlawfully concealing them.

Harrisburg friends attended the wedding in Mercersburg last week of Charles A. Keepers, Greencastle, and Miss Grace Steiger, Mercersburg. After the reception Mr. and Mrs. Keepers departed on a wedding journey.

An important meeting of West End citizens will be held Wednesday evening of this week to consider several propositions from clock manufacturers for the placing of the Camp Curtin memorial clock in the tower of the Camp Curtin school building.

H. C. Claster and L. W. Kay were the purchasers of the United States Hotel, this city, at public sale in front of the court house last Saturday, the property being knocked down to them for $39,000. The sale was the result of bankruptcy proceedings instituted against the former owner, Max P. Johnson.

Walter Fuerneisen appeared before Middletown Borough Council last week and requested that some action be taken on two electric light coupon bonds held by him and which were badly charred in the recent fire which burned him out. The council authorized the issuance to Mr. Fuerneisen of two new bonds. Mr. Fuerneisen will rebuild the store building formerly occupied by the Bander grocery and erect a large edifice for a moving picture show. E. H. Klahr, who also contemplates rebuilding, reports that his safe was fireproof, but unfortunately was not waterproof, and the water getting into the hot safe created a steam which has rusted all the fine jewelry, watches, etc., that were in the drawers. He is, therefore, busy trying to get the same in as good repair as possible.

Connecticut.

C. O. Magnuson has resigned his position at R. Wallace & Sons' Mfg. Co.'s factory, Wallingford, and left for Cuba, where he will reside permanently in the future.

George H. Dyson, of the Porter & Dyson Co., New Britain, recently addressed the chemistry class of the New Britain High School. His lecture was entitled "Precious Stones" and was listened to with much interest.

Charles F. Monroe, Meriden, founder of the business which bears his name, recently celebrated the 30th anniversary of his business career in Meriden. Mr. Monroe enjoys a large circle of friends and is prominent in social and municipal affairs.

The annual entertainment and dance of the aid association connected with the New England Watch Co., Waterbury, was held at the Buckingham, April 22. An excellent entertainment was furnished and an orchestra of 10 pieces supplied the music.

The contract for building a large addition to the factory of the R. Wallace & Sons Mfg. Co., Wallingford, has just been awarded and calls for a four-story building of mill construction adjoining the main factory on Quinnipiac St., about 40 feet from the end of the building, forming a wing and extending to the east for a distance of about 128 feet.

A man giving his name as Edward Howard, alias F. C. Howard, alias Harry Reed, was recently taken into custody in Hartford, charged with having stolen a diamond ring valued at $190 from the Ford Co., New Haven, April 12. The ring was found on him, it is alleged, when he was taken into custody, the diamond having been removed. His case has been continued until April 30. The police of Hartford, on the afternoon of April 22, obtained possession of the accused's grip and found therein four two-carat sapphires, together with a bill from a firm of New York jewelers for six two-carat sapphires.

Items from Here and There.

M. W. Billings, Sabinal, Tex., has disposed of his interests at that place to L. L. Lockley.

Evick Lund, Grand Meadow, Minn., is fitting up a room in the First National Bank building for a jewelry store, and will move there, May 1.

Samuel F. Morrill, of Morrill Bros., Concord, N. H., died, recently, at his home at that place, aged 72 years. Mr. Morrill was born in Dover and came to Concord in 1856.

Spirit J. Vasaly has sold a half interest in the Diamond Sign jewelry store at Little Falls, Minn., to Earl Wetzel. Mr. Vasaly will continue the management of the business.

The jewelry store of P. W. Folsom, Ashland, Nebr., was broken into recently by thieves, who stole several watches which had been left to be repaired. A few other articles were also taken.

Providence.

Mrs. Hoyt, of 639 Social St., Woonsocket, is calling for 500 pursemakers.

Henry Lederer, of Henry Lederer & Bro., was a recent visitor to the trade in Chicago.

Earl B. Williams was in New York, last week, representing the D. M. Watkins Co.

John T. Clark has moved his enameling establishment from 77 Page St. to 119 Pine St.

The D. R. Child Co.'s factory at Swansea was closed in the latter part of last week.

Edwin L. Mumford has resigned his position as western representative of Williams & Payton.

Stern Bros., 51 Maiden Lane, New York, are calling for meshmakers on German and sterling silver.

Anson D. Manning is calling on the trade of the middle west in the interests of D. Wilcox & Co.

Samuel D. Macpherson, of the Macpherson-Rouband Co., left Wednesday last for a trip to Europe.

James Arthur, of the Fulford & Hobart Co., was in New York, last week, on business for the firm.

The S. & B. Lederer Co. is receiving good orders from Sidney H. Israel in the middle western circuit.

The Providence Metal Spinning Co. is working nights on orders from the local jewelers and silversmiths.

Walter Henry, superintendent for the E. L. Spencer Co., has gone to Europe for an extended tour with his wife.

Herbert Steiner, of the Steiner Mfg. Co., was at the New York headquarters of the firm, 530 Broadway, last week.

Frank Somes and Robert Curran, salesmen for Arnold & Steere, have been on a visit to the factory in this city.

The Myers Engraving Co., which recently started at 117 Point St., is being driven by emblem and jewel work.

J. H. Hill has resigned as foreman for H. J. Astle & Co., and accepted a similar position with E. C. Bliss Mfg. Co.

Aldridge G. Pearce, of Frank T. Pearce Co., has returned from the annual convention of the Shriners at New Orleans.

Milton Goldberg was calling on the trade of the middle west in the last week in the interests of the J. J. White Mfg. Co.

Mr. and Mrs. Ralph S. Hamilton are in New York for a short stay. They made the trip from this city in their touring car.

B. S. Gainsborg was in the city in the early part of the week placing orders for the New England Jewelers' Co., Boston.

Peter Turner has resigned his position with Tannenbaum & Co. and accepted a position with John F. Allen, stone dealer.

Samuel J. Weeden has returned from an extended stay in the south on account of his health, and is now at his home at Riverside.

Mr. and Mrs. William H. Manchester observed the 25th anniversary of their wedding at their home on Governor St., Thursday evening.

Harvey J. Flint's 18-foot racing boat *Bat* was launched Friday afternoon and Mr. Flint is preparing to spend his leisure time on the water.

Arnold C. Messler, of the A. C. Messler Co., has just registered a 29-horsepower Mitchell runabout with the State Board of Public Roads.

John F. Allen has recently purchased a 26-horsepower touring car in which he intends enjoying frequent spins into the country during the coming Summer.

William A. Copeland, Sr., of the Martin-Copeland Co., sailed, last Tuesday, from New York on the *Wilhelm der Grosse* for Europe, to be gone about five weeks.

Mr. and Mrs. William L. Mauran, who have recently returned from Europe from their honeymoon, entertained a small party at the Agawan Hunt, Friday afternoon.

Hugh E. Krug, western representative of Fessender & Co., has been visiting the factory of the firm in this city. He has just returned from a trip to the Pacific Coast.

Nearly 100 couples attended the annual social of the Ostby & Barton Beneficial Association at the Lilly Academy, Monday night. A card of 22 numbers was danced.

Some person threw a stone at the window of Louis Green's retail jewelry store, 246 N. Main St., just after midnight Tuesday, demolishing it. An investigation was made, but nothing was missing.

An automobile, owned by Sidney Williams, caught fire in front of the Union Station shortly before 6 o'clock Wednesday evening, but was extinguished before any serious damage was done.

Arthur Stone, president of the Metal Products Co., called on the firm's trade in New York and vicinity last week. E. E. Craddock, the manager, also visited the trade in New York and vicinity.

Mr. and Mrs. Arthur Ostby, superintendent of the Ostby & Barton Co., and William P. Chapin, of Chapin, Hollister Co., and wife are at the Marlborough-Blenheim at Atlantic City for 10 days.

A call has been made, the past week, in the daily nawspapers for an experienced locket maker, gypsy and band ring maker, two good bench hands and a man capable of taking charge of a jewelry shop in Montreal, Can.

Among the travelers in this city in the last week were the following: Max L. Blatz, of the Modern Pen Co., New York; Edward Horton, of Mandeville, Carrow & Crane, Newark; George A. Jochum, of C. Cornehlsen, New York.

Col. Emery J. San Souci, as a member of Governor A. J. Pothier's staff, attended the housewarming of the new home of Mr. and Mrs. John H. Hanan, 1073 Fifth Ave., New York, Wednesday evening. He was accompanied by Mrs. San Souci.

George N. Messenger is now associated with Martin, Low & Taussig. He recently resigned his position with John F. Allen, with whom he had been for 10 years. In the preceding 10 years he was with Julius Eichenberg and Max Mayerheim.

The American Roll Gold Leaf Co. was incorporated by the Secretary of State last week. The incorporators are Claramon Hunt, North Attleboro; Charles D. Winsor, of this city, and Courtland F. Allen, Wrentham, Mass. The capital stock is $150,000.

Mr. and Mrs. Wasley C. Martin, who have been spending a part of their honeymoon at Richmond, Va., and Washington, are now at the Marlborough-Blenheim, Atlantic City. They will go to New York in a few days and on April 30 Mrs. Martin will be one of the patronesses at the Alpha Delta Phi dance at Yale.

The plaintiff's motion for a new trial in the case of A. D. Katcher & Bro. against Max Udin, who recently went into bankruptcy, was heard before Presiding Judge Stearns in the Superior Court Saturday and denied.

Armand Dreyfus was a passenger on *La Lorraine* from New York on Wednesday last for Paris. Mr. Dreyfus is the Paris representative of Emile Dreyfus' line of jewelers' stampings, etc., at Martin, Low & Taussig's office in this city.

Among the buyers who were calling upon the manufacturers of this city and vicinity in the past week were: T. C. Bunch, of William Hengerer Co., Inc., Buffalo, N. Y.; Miss Henrietta Graf, of Berg Bros., New York, and H. Weinrich, the J. A. Schwartz Co., Philadelphia.

The Scovill Mfg. Co., Waterbury, Conn., in which a number of jewelers in this city and vicinity are financially interested, is to erect a new five-story brick building, 295 feet in length and 54 feet wide. The plans of expansion also call for a four-story brick structure, 29 by 50 feet.

Providence Council, United Commercial Travelers of America, gave a dance, Friday evening, at the Elysium. The committee in charge included Bernard McCulla, C. F. Normand and L. W. Parks. The aides were A. Kilkenny, Frank Davenport, C. A. Reilly and G. R. Ide.

Articles of association have been filed with Secretary of State J. Fred Parker by Max S. Lazarus, David Blacher and Joseph Monschein, all of this city, under the firm name of the United Jewelry Co., for the manufacture, purchase and sale of novelties and jewelry, with headquarters in this city. The capital stock of the new concern is $6,000.

Felix R. Wendelschaefer, proprietor of the Providence Opera House, has been elected president of the Narragansett Hotel Co., having purchased the half interest in the business of Sylvanus Stokes, who was in partnership with Timothy E. Phelan. Mr. Stokes has resigned from the company and Mr. Phelan will be the active manager and treasurer.

James G. Smith, of the T. W. Lind Co., has the sympathy of the trade in the death of his wife, Wednesday last. She was the mother of James A. Smith, who occupies a responsible position with the Metal Products Corporation, and of Mrs. Thomas S. Morris, wife of a salesman representing Smith Bros.

Rudolph G. Schutz has been granted a patent on an improved process for making seamless plated tapers for rings. One of the specifications, which constitutes a strong feature, is that the gold plate is the thickest on the small part of the blanks, which will be on the inside of the ring when it is arbored up, where the greatest wear occurs, coming as it would on the inside of the hand.

At the annual meeting of the Slocum Light Guard Association, Wednesday evening, Joseph A. Stringer, foreman for the Snow & Westcott Co., was elected president. Among those present were Gen.

George A. Forsyth, with Thornton Bros.; John J. Butler, superintendent of Waite Thresher Co.; Joseph Auty, Jr., with H Kirby, and William J. Glasheen, foreman for J. W. Richardson & Co.

The co-partnership existing between Fred J. Mills and W. Hunter Brown, engaged in the manufacturing jewelry business at 100 Stewart St. under the firm name of Brown & Mills, has been dissolved by mutual consent. The business has been taken over by Mr. Mills, who will continue as an individual under the same firm name. He will assume all liabilities and debts and receive all moneys due.

To meet the demands made by increased business, the Gorham Mfg. Co. has contracted for a new building at its Providence works. It is to be of fireproof construction, 80 feet x 122 feet, thus adding nearly 10,000 square feet of floor area to the already impressive plant. It is expected that the building will be ready to occupy in July. Additional electric power in the shape of a new direct connected power unit is also under contract.

At the regular weekly meeting of the advistory council of the New England Manufacturing Jewelers' and Silversmiths' Association, held at the rooms, 12 Weybosset St., Thursday afternoon, there was a good attendance. It was announced that at the next meeting the matter of technical education would be discussed, with an address by W. Washington Dove, teacher in designing, modeling and carving at the Providence Technical High School.

Frank P Crandall, night watchman in the Irons & Russell building, Chestnut and Clifford Sts., found volumes of smoke in the hallway while he was making his rounds at 9.40 o'clock Thursday night. He summoned the nearest fire company and the firemen found a lively blaze in progress in the shop of the Providence Art Metal Co., on the first floor, but soon extinguished it. The damage was slight. The blaze started near a forge in which a fire had been left.

Harry E. Farquharson, who has represented the E. A Potter line in the west for the past five years, has severed his connection with that concern. He has taken an interest in the firm of Leary & Penfold, of this city. Mr. Farquharson will carry the Leary & Penfold line of gold filled jewelry, together with the E. D. Gilmore & Co. solid gold line, throughout the west and will have complete sample lines at the Chicago office, 902 Heyworth building, at all times.

Among the foreign importations received through the Providence Customs House in the past week were the following: From Bremen, 19 packages of imitation precious stones; from Hamburg, one package of silverware, one of imitation precious stones and two of buttons; from Havre, two packages of imitation precious stones and one of manufactures of metals; from Liverpool, 20 packages of manufactures of metals; from Southampton, one package of manufactures of copper and two of glass ware.

James O. Bowers, the engineer at the plant of George H. Fuller & Sons Co., manufacturers of jewelers' findings on Exchange St., Pawtucket, is about the happiest man in that city as he was the recipient of $1,000 in cash a few days ago. Mr. Bowers is about 78 years old, and has been engineer for the Fullers for nearly a quarter of a century. A few days ago he was at his work as usual when Charles H. Fuller, of the firm, called him to his office and asking him if he had not been working there 20 years said: "Here's $1,000 for you. When you feel that your work is too hard for you to stand any longer let me know and I will get another man for your place and you can stay and superintend him." Neither Mr. Fuller nor Mr. Bowers are doing any talking about the incident, but the story has leaked out.

Canada Notes.

F. K. Romawske, Lumsden, Sask., is giving up business.

R. H. Jupp & Co., Orillia, Ont., are retiring from business.

H. Robinson, West Lorne, Ont., is succeded by Ward & Bole.

C. F. Forrest, watchmaker, Morden, Man., is putting in a stock of jewelry.

R. Robinson, of Broadview, Sask., has sold his business to A. E. Sheppard.

A. Vandewater, formerly of Yarker, Ont., is opening up business at Napanee, Ont.

G. F. Thompson has purchased the business of F. C. St. John, Minnedosa, Man.

A. C. MacNicol, Fort William, is moving into more comodious quarters at 61 Cumberland St.

H. J. Gougnard, Dalhousie, N. B., has assigned. The first meeting of creditors was held Friday.

Traveling representatives in Toronto, last week, included: Ben Strauss, of Backes & Strauss; I. Michalson and Max Deutz.

Robert D Baker, Milton, Ont., has renewed the chattel mortgage given by him to the Imperial Optical Co., of the same place, for $24.

Out-of-town jewelers calling on the Toronto trade, recently, included J. Goodyear, New Liskeard; James H. Newton, Owen Sound, and W. S. Frost, Orillia.

The scarcity of female help in Toronto is severely felt in connection with the lighter lines of manufacturing, including jewelry. At a luncheon held by the manufacturers of this city, last week, a plan was formulated to meet the difficulty by organizing a company, capitalized at $50,000, to build and equip a working girls' home to be managed by a committee selected from the shareholders and the Y. W. C. A. Thomas Roden, of Roden Bros., was chairman of the meeting, and was appointed a member of the organization committee.

Wm. P. Sedgwick, Bath, N. Y., was the subject of an interesting article which appeared in a recent issue of a local daily, describing the careers of prominent men in business at that place. For more than 40 years Mr. Sedgwick has occupied the same building in Liberty St., which he built himself, since 1864.

A committee of the State Jewelers' Association of Minnesota, consisting of Ray Swarthout, Pine Island; Fred Buck, Goodhue; A. R. Hawkinson, Mazeppa; Albert Sugg, Zumbro Falls, and J. L. Williams, Zumbrota, recently held a meeting in the last named town for the transaction of business connected with the association.

Attleboro.

Edward L. Gowen has purchased a new Packard automobile.

S. O. Bigney, of S. O. Bigney & Co., has returned from a western trip.

A letter remains unclaimed at the local post office for W. G. Herring & Co.

Robert H. Moore, of the Allison Mfg. Co., has returned from a trip to New York.

Harry Hull, of Barden & Hull, left for the west, this week, with a line of new samples.

D. S. Spaulding, Mansfield, has been elected vice-president of the Mansfield Co-operative Bank.

Elmer E. Vaslett, salesman for F. M. & J. L. Cobb, has opened an office at 338 Broadway, New York.

Charles S. Morse, representing the Winthrop Mfg. Co. in New York, returned to that city with his new line of samples last week.

J. M. Fisher & Co., who have moved into the new Leach & Garner factory, are sending out post-cards of the new building to the trade.

Eugene Engley, formerly Attorney-General of Colorado, and a brother of William Engley and Mrs. Albert Bushee, of this town, died last week.

Joseph Finberg and Mrs. Finberg have received a letter of thanks from the seleetmen of Attleboro for the donation of land for a public playground.

The Freeman, Daughaday Co., Chartley, is now occupying its new addition to its packing room, which measures 70 by 70 feet and is two stories in height.

John Robinson, formerly salesman for the Peerless Mfg. Co., Sherbrooke, Can., left, last week, to accept a position with a large manufacturing concern in Montreal.

The Remington Co., a new manufacturing concern, has engaged John A. Cunningham, a well known salesman, to cover the western trade, and Henry S. Gilson the eastern trade.

James E. Williams died suddenly, Saturday afternoon, at the factory of the Bay State Optical Co. He had called to visit an employe when he was stricken with a hemorrhage of the stomach. He was 53 years of age and leaves a wife and two sons.

Judge Lawton has handed down a decision denying the motion of Philip E. Brady, counsel for the defense, for a new trial of the case of Joseph Aranyi, New York, against Walter G. Allen and other jewelry manufacturers of Attleboro. The case was originally brought in the Attleboro District Court, where a decision was rendered for the defense. It was tried again before a jury at the March sitting of the Superior Court and a verdict of $500 was returned for the plaintiff. This verdiet stands, according to the decision of Judge Lawton. Aranyi was an expert jewelry worker and designer, and made a contract with the defendants to get out a special line of jewelry novelties. He was dismissed and claimed that he suffered loss in consequence. The defendants set forth that the goods were not satisfactory.

M. G. Shirk has closed his store at Spearfish, S. Dak., and moved to his ranch, about 90 miles north of Sturgis.

Successful Policy for 50 Years

WE ARE DIRECT IMPORTERS OF DIAMONDS

D. C. PERCIVAL & CO., Inc.

373 Washington St., BOSTON, MASS.

Boston.

Walter B. Snow was recalled, last week, for service on the Federal Grand Jury.

Frank Milhening, of the house of J. Milhening, Inc., Chicago, was in Boston part of the week.

M. N. Smith, of the Smith, Patterson Co., has been on a brief outing trip, the past week, to Woodstock, Vt.

Carl D. Smith, of the Smith, Patterson Co., sailed from Europe for home, last week, and is expected in Boston to-day.

John C. Sawyer went to his Summer home at Kenberma, on the South Shore, over Sunday, preparatory to opening it for occupancy early in May.

E. O. Maxwell, until recently employed at the Waltham Watch Co.'s factory, has just returned from a recreation trip in Maine, and enters the employ of Gurney Bros. at Brockton, Mass.

Charles W. Davidson, of the Thomas Long Co., goes abroad in June, and will meet the party of tourists in Europe with whom Mrs. Davidson has been enjoying a travel trip since early in the year.

Miss Madge Sharp, who relinquished her position in the repair department of the Smith, Patterson Co., last week, was presented with a gold watch and pin as a token of esteem by her fellow employes.

C. H. Crump, of the Shreve, Crump & Low Co., sailed, yesterday (April 26), from Boston for a European tour. He will spend the Summer abroad, and combine travel for recreation with business trips to principal trade centers in England and on the Continent.

F. W. Dodge, for several years watchmaker for J. C. Sawyer, has severed his connection with the concern, and is now assistant manager for the Wade Mining Machine Co. He is succeeded at Sawyer's by Mr. Maver, formerly with the Smith, Patterson Co.

Warren B. Call, treasurer of the Horace Partridge Co., committed suicide, April 19, at the Hotel Essex, in this city. Mr. Call had been with the company since he was a boy, and is remembered by many in the trade, as the concern when located on Hanover St., several years ago, carried a line of jewelry and silverware. He was 50 years of age.

The executive committee of the Boston Jewelers' Club held a meeting, April 21, at the office of Vice-President Francis S. Sherry, in the Jewelers' building, and decided to hold the annual Spring outing of the club Tuesday, May 17. The members will meet at the Hotel Somerset at 3.30 p. m. and go in automobiles to Ferncroft Inn at Middleton, Mass.

The E. Howard Clock Co. recently installed a master and secondary clock system for the Winnipeg branch of the Royal Bank of Canada; an hour-striking tower clock for A. Baumgarten, president of the St. Lawrence Sugar Refining Co., of Montreal; an hour-striking tower clock with four glass dials and electric illumination regulator for the Congregational Church at Orleans, Vt.; a special design wall clock for the Boston Lodge of Elks, and five electric clocks for the Oakville Co., of Oakville, Conn.

Horace N. Noyes, of Haverhill, prominent jeweler and clubman, is negotiating for an aeroplane with the Burgess-Curtiss Co., Marblehead, which recently has had a number of experimental flights tried out at Plum Island, near Newburyport, with machines of its manufacture. Mr. Noyes will go to Plum Island to receive instruction in handling the aeroplane. In a recent interview on aerial navigation Mr. Noyes expressed the firm belief it will not be many years before aeroplanes are as numerous as automobiles are now.

Louise Jones, a 17-year-old girl, who lives with her mother, Mrs. Mary J. Carter, of Pembroke St., this city, was before the Municipal Court Monday, for a hearing on charges preferred by Herbert W. Fosdick, an instalment jewelry salesman for the Bentley Jewelry Co., of the Jewelers' building. Miss Jones is accused of the larceny of a satchel containing jewelry and diamonds valued at upward of $3,700. The case was postponed until next Friday, and Miss Jones is admitted to bail in the sum of $5,000. She denies all knowledge of the theft.

The Thomas Long Co. has just renewed for a long period the lease of the building which it occupies, and has begun extensive alterations and improvements to provide additional room for the business. Two stories will be added, and the ground floor will be extended 15 feet to the rear. When the alterations are completed an entire floor will be utilized as a wholesale department salesroom. On the second floor the glassware and art novelties department is to be enlarged and greatly improved with mirrors and new fittings, electric lights, etc. New heating apparatus will be installed for the entire building.

Traveling representatives visiting Boston the past week included Benjamin F. Griscom, Bippart, Griscom & Osborn; Jacob Schorsch, Enrich, King & Schorsch; William B. Peck, Crossman Co.; William A. Lee, Lee, Dodd & Co.; E. F. Simons, Simons, Bro. & Co.; George W. Read, Larter & Sons; Harry Ward, Durand & Co.; Alex. Chase; George A. Jochum, C. Cornehlsen; Joseph Sinclair, F. Baumeister; Anstin M. Hill, Hill & Schmidt; Joseph F. Imfeld, Hendrick & Co.; H. N. Van Bergen, Snow & Westcott Co.; Fleetwood Lanneau, Battin & Co.; E. Cooper Stone, Brassier Co.; H. W. Anderson, Bride & Tinckler; J. W. Woertz, C. Sidney Smith; Mr. Bishop, Bishop & Bishop; Mr. Hutton, Geoffroy & Co.; John Curran, A. J. Hedges & Co.; Arthur Connett, Link & Angell; F. A. Howard, F. M. Whiting Co.

Lancaster, Pa.

Charles O. Musser has gone to Boston on a business trip.

J. S. Munroe has gone to Pittsburg to spend a couple of weeks.

John J. Bowman, of Ezra F. Bowman's Sons, paid a business visit to Philadelphia last week.

Fred. A. Wheeler, with the Non-Retailing Co., has returned from an extended business trip to the south.

F. A. Fleischer, Marysville, Pa., visited Lancaster last week. Another visitor was Henry Wertsch, of Lititz.

C. G. Stehman, Denver, Colo., is spending a few days here before sailing from New York for England, where he will remain some months.

James K. Bartwell, St. Louis, was in Lancaster last week on business, and from here he went to New York and Boston. His wife and little son accompanied him.

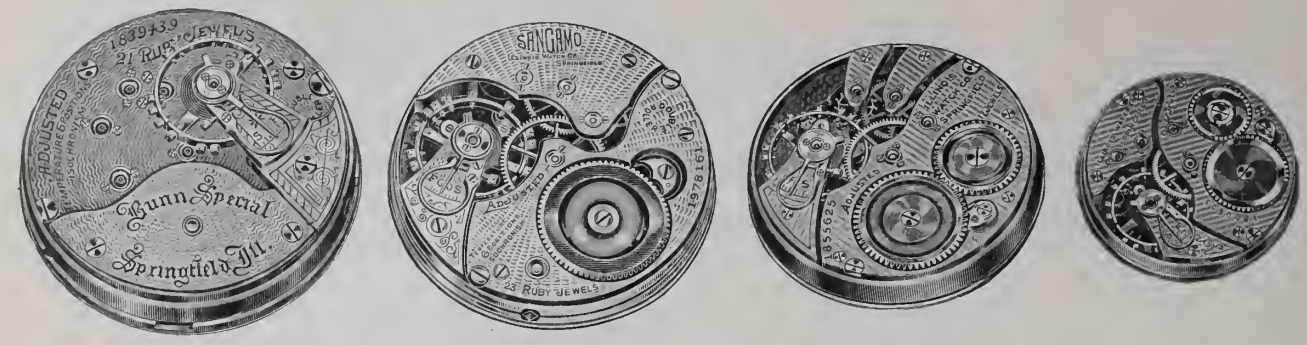
Morris Peterman has gone to St. Louis, Mo., to take charge of the repair department of a prominent jewelry establishment with which he was employed several years ago.

Guy K. Herr, a graduate of the local technical school, late with Charles J. Kinzer, Bluefield, W. Va., who has retired from the jewelry trade, has taken a position in Norfolk, Va., with the Paul-Gale-Greenwood Co.

F. A. Ziegler, a native of Lancaster, who learned the jewelry trade here and moved to Louisville, Ky., many years ago, died there last week, aged 62 years. The body will be brought to this city for interment, as his relatives reside here.

Samuel E. Fegley, formerly watchmaker for S. Kurtz Zook, and his brother, H. N. Fegley, optician, formerly with W. F. Jones, Martinsburg, W. Va., have formed a partnership and opened an establishment of their own at 52 N. Prince St.

A letter received here a few days ago from a former Lancastrian, Daniel W. Shenk, who went to Seattle, Wash., several years ago, announces that he has formed a partnership with another young easterner and will engage in the jewelry business.



A. F. Hostetter, a director of the Non-Retailing Co.; Charles F. Miller, president of the Hamilton Watch Co.; John J. Bowman, of Ezra F. Bowman's Sons, and Dr. W. G. Fox were among the patrons of the great concert given in Fulton Opera House on the evening of April 21.

C. P. Renver, Canton, O., formerly with the Hampden Watch Co., has entered the jewelry and watch work department of the Ezra F. Bowman Technical School. Chas. M. Wiant, son of a jeweler of New Bethlehem, Pa., has also entered the school as a student of the watchmaking department.

The youngest salesman of goods in the jewelry line was in Lancaster last week, John P. Dorcas, 14 years of age, who was selling the smaller articles of silver table ware. Salesmen of this character are not allowed to work here, but on account of the boy's age the police shut their eyes, and the little fellow, in the course of a couple days, reaped quite a harvest. He went from here to Reading.

Lancaster was lately visited by the following traveling representatives: W. L. Blackinton, Artisan Metal Mfg. Co.; Lewis W. Gibbons, W. W. Fulmer & Co.; R. F. Houghton, Waterbury Clock Co.; Louis Cahen, Wilcox & Waganer Co.; R. B. Zeltmacher, J. B. Bowden & Co.; Arthur Totten, Brown & Mills; L. Michaels, Pollock & Michaels; C. E. Hunt, Shafer & Douglas; Mr. Linton, E. H. H. Smith Silver Co.; Edwin Stout, Archibald-Klement Co.; I. Mills Dillaway, Barbour Silver Co.; P. A. Redfield, Charles M. Robbins Co.; H. N. Mandeville, Arch Crown Mfg. Co.; Mr. Cohen, Lewy & Cohen.

Charles Honey, who formerly conducted a jewelry repair shop in Falconer, N. Y., is now owner of a store in Sweetgrass, Mont.

1. SUPERIOR QUALITY

2. LOWEST COST TO DEALERS

and

3. ESTABLISHED RETAIL SELLING PRICES

on all grades

Are three of the true business reasons that have induced the great majority of the successful Watch and Jewelry Merchants to feature and push the sale of

ILLINOIS SPRINGFIELD WATCHES

If you are not already an advocate of Illinois Watches it will be to your interest to thoroughly investigate the line.

Vol. LX. CHICAGO, WEDNESDAY, APRIL 27, 1910. No. 13.

Chicago Notes.

W. T. Hixson, El Paso, Tex., spent last week here.

Mortimer C. Adler, of Chas. Adler's Sons, was here last week.

Geo. Schwob, son of Adolphe Schwob, visited J. W. Tice, last week.

Roy King, with the Ostby & Barton Co., is on a trip to the northwest.

O. A. Starke, of the Star Watch Case Co., spent two days here last week

W. H. Alger, with the North American Watch Co., visited St. Louis, last week.

Milton Rodenberg, of Dunn & Rodenberg, was here last week, calling on the trade.

Gus Rodenberg, of James A. Dunn & Co., was here, last week, calling on the trade.

Ernest M. Lunt, Chicago manager of the Towle Mfg. Co., is on a trip to the Pacific Coast.

H. J. Vondervellin, Rockford, Ill., will soon move from 124 S. Main St. to 213 S. Main St.

L. J. Finch, representing the R. F. Simmons Co., is on a visit to the factory at Attleboro, Mass.

F. D. White, representing the C. O. Sweet & Son Co., Attleboro, Mass., is on a visit to the factory.

Mortimer J. Savory has been engaged by the Newall Mfg. Co. to look after the Chicago city trade.

The two Burnett brothers, who operate stores in Seattle and Aberdeen, Wash., were here last week.

Frank Waugh, representing the E. Kirstein's Sons Co., Rochester, N. Y., was here last week.

Edw. L. Lewis is the new representative of the Wm. Bens Co., Providence, R. I., *vice* N. F. Kazlow.

John W. Sherwood, vice-president of the Solidarity Watch Case Co., paid a visit to Chicago, last week.

B. Budweiser, representing the pipe house of I. M. Frank & Co., has returned from a trip to Europe.

A. W. Huggins, of A. I. Hall & Son Co., San Francisco, Cal., is here this week and will make a trip east.

John Hagen, 4707 State St., suffered a stroke of paralysis of the right hand, last week, and is confined to his home.

M. E. Kinsley, sales manager for the Oneida Community, Ltd., left for the factory at Kenwood, N. Y., last week.

The family of C. L. Lande, retail jeweler at 3518 State St., was recently increased by the addition of a baby girl.

Chas. J. Jacobs, of the Knickerbocker Silver Co., returned from Mt. Clemens, Mich., last week, much improved in health.

Harry J. Flower, formerly in the jewelry business on State St., has opened a jewelry department in the store at 88 Madison St.

W. R. Cooper, with S. H. Clausin & Co., Minneapolis, Minn., stopped over here, last week, after a visit to his relatives at Mason City, Ill.

S. J. Hammond, jewelry buyer for the Nordman Bros. Co., San Francisco, Cal., stopped over here, last week, after a month's trip east.

Wm. G. Rattray, diamond buyer for Norris, Alister Co., was in a railroad wreck near Jackson, Miss., last week, but escaped uninjured.

Geo. H. Spies has bought 165 feet of property facing the lake on Sheridan Road, near Winona St., and will lay out a tennis court there

Reuben H. Mason, of the Potter & Buffinton Co., was here last week on a visit to W. A. Fay, western representative of the company.

M. A. Cohen and F. C. Emerson, travelers for Rettig, Hess & Madsen, came in from their territories, last week, and left again for the road.

L. Kohn, formerly with A. Hirsch & Co., is now representing Henry Lederer & Bro., Providence, R. I., in room 503 of the Heyworth building.

Rudolph Geisler, credit man for Norris, Alister & Co., has returned from a nine weeks' trip to Beaver, Tex., where he is interested in a plantation.

E. P. Sundberg, Fargo, N. Dak., accompanied by Mrs. Sundberg, stopped over here, last week, on their way home from a two months' tour of the south.

R. Rueping, a sub-tenant in 1104 Heyworth building, has leased the suite and will have as sub-tenants H. M. Heyman and A. Wehde, who will move from room 1103.

The engagement is announced of Miss Irene Eppenstein, youngest daughter of M. C. Eppenstein to Leo Simonson, New York City. The wedding will take place May 30.

Richard Miller, McPherson, Kans., stopped over here last week, accompanied by his wife. Mr. and Mrs. Miller will sail for Europe this week for an extended tour.

L. B. Hale, formerly with Wm. Weidlich & Bro., St Louis, Mo., has been engaged by the Watson & Newell Co. to travel out of the Chicago office for North and South Dakota.

Mrs. R. M. Lander, mother-in-law of W. A. Fay, of the Potter & Buffinton Co., died suddenly last week. The remains were taken for burial to her native town of Bloomington, Ill.

J. M. Becker, of the watch case manufacturing concern of J. M. Becker & Co., sailed for Europe, last Saturday, on the *Lapland* for a two months' visit to Germany, France and Switzerland.

The assets of the Trinity Clock Co. were sold last week at auction for $5,500 to Wm. H. Johnson, a lawyer in the Marine building. S. Winternitz, the auctioneer, got $550 for his labor and an allowance of $67.50 for advertising.

Henri Didisheim, formerly manager of the western office of Hipp. Didisheim & Bro., left for New York, last week, to remain there permanently. The Chicago office is now managed by his former assistant, John Le Fruit.

Herbert E. Cobb, representing the Daggett & Clap Co., W. A. Fay, representing the Potter & Buffinton Co., and Frank Whiting, representing Whiting & Davis, now in room 405, Columbus Memorial building, will move to room 801 in May.

Gus Rodenberg and his son Milton, Providence, R. I., were both entertained at dinner at the home of Theo. Jacobs, 1516 Grand Boulevard, Saturday evening. Mr. and Mrs. S. B. Goldberg, formerly of Cincinnati, O., were also guests.

The Adams & Abel Co., Los Angeles, Cal., has sent notices to the trade here that it has severed its connection with the Bastheim, Adams & Abel Co., and is engaged in the jobbing jewelry business at 640 S. Broadway, Los Angeles.

Wm. T. McLain, for the past nine years with the retail jewelry department of Marshall Field & Co., and chief assistant to Mr. Wietz, has severed his connection with that concern to become head of the jewelry department in Gimbel Bros., New York city.

Julius Armbruster, with the Illinois Watch Co., was here last Saturday. The Illinois Watch Co. is building a new addition to their factory, 20 x 100 feet, with two stories, the upper floor of which will be used as a new timing and adjusting room.

R. J. Wilson, western representative of

the Chas. E. Hancock Co., Providence, R. I., will sever his connection with that concern as soon as his successor is appointed. Mr. Wilson will represent the Homan Mfg. Co., after his connection with the Hancock Co. ceases.

Frank J. Behrendt, Chicago representative of the Homan Mfg. Co., will sever his connection with that concern to become a partner of Ferdinand Hotz, diamond merchant at 92 State St. Mr. Behrendt was formerly head of the diamond department of Otto Young & Co.

Notices were posted at the Elgin National watch factory at Elgin, Ill., April 19, announcing the plant would be closed from April 21 to May 2. Three thousand employes are affected by the order. There are eight working days in the period of closing. It was stated that during the shut-down stock would be taken.

Things are booming in the Illinois Retail Jewelers' Association. A. W. Johanson, Paul N. Lackritz, Geo. B. Elbe and Geo. H. Tucker have been touring the city in the latter's automobile and have secured 50 new members for the association. The annual meeting at Springfield, May 24, 25 and 26, promises to be a big success.

An involuntary petition in bankruptcy was filed against Lewis W. Anderson, Ottawa, Ill., last week. Mr. Anderson, who conducted a store at 209 W. Madison St., in that town, carried a stock of about $8,000. He was formerly a watchmaker to R. H. Trask, and opened a store in Ottawa in the Summer of 1908. His principal merchandise indebtedness is said to be held by one jobbing house in this city.

Fred A. Hegner, retail jeweler at Blue Island, Ill., was the victim of a daring robbery, last week. While he was in his living apartments above his store, which was in charge of a clerk, two strangers entered his place. While one of them engaged the clerk in conversation at the rear of the store the other opened one of the show cases and stole a tray of diamonds valued between $2,800 and $3,000.

Robert Slade, Jr., formerly head of the watch department of Lapp & Flershem, for 23 years with that concern, and Frank S. Weadley, formerly head of the silverware department, who was with Lapp & Flershem for 16 years, have formed a copartnership under the name of Slade & Weadley to do a general jobbing jewelry business. They will occupy part of the premises formerly occupied by Lapp & Flershem in the Powers building, 156 Wabash Ave. Both are young men who are highly thought of in the trade, and everyone wishes them success.

Among the out-of-town retail jewelers here last week were: L. J. Crawford, Burlington, Wis.; Wm. F. Van Schreeven, with Henry R. Holman, Sioux City, Ia.; Chas. W. Fey, Peoria, Ill.; L. J. Yeoman, Waukegan, Ill.; Walter Mellor, Michigan City, Ind.; A. C. Wortley, Kalamazoo, Mich.; Oscar C. Cobb, Iowa Falls, Ia.; J. Ramser, Rock Island, Ill.; W. J. Gamm, Madison, Wis.; H. H. Truckenbrod, Mendota, Ill.; A. H. Frandsen, Monmouth, Ill.; W. H. Carew, Streator, Ill.; L. Ratzesberger, Milford, Ill.; G. E. Carlson, Ashland, Wis.; Geo. Ochring, of Ochring Bros., McGregor, Ia.

Los Angeles.

R. E. Lomax, 4327 Central Ave., has opened a new store in the Hooverton section of this city.

F. A. Marcher, president of the Pacific Gem Co., has been spending some days in Riverside, where he went on a business trip.

E. Gerson has just received word from Mrs. Gerson announcing her arrival in Paris. She is traveling abroad with relatives.

Clarence E. Diebenkorn, of the E. W. Reynolds Co., has just made a trip to Santa Ana and other southern California towns.

L. W. Clark, who for some time past has been in the watchmaking department of W. M. Kinney, is now with R. E. Lomax, 4327 Central Ave.

H. S. Harris, formerly in business at 615 Kearny St., San Francisco, is about to open a store on W. 3d St., between Spring and Broadway, this city.

E. B. Nicoll, treasurer of the Carl Entenmann Jewelry Co., has bought a new automobile in which he and Mrs. Nicoll are enjoying frequent rides.

H. A. Curry, who recently bought out R. H. Schwarzkopf's business, has started out for a trip over the Pacific Coast, to be gone a month or more.

Feder & Co., who are at 344 S. Spring St., have opened a new store at 549 S. Broadway. Mr. Feder will not, however, discontinue his business on Spring St.

Among the jewelers who have been here recently from neighboring towns are W. H. Hilts, San Diego Jewelry Co.; E. B. Smith, Santa Ana; C. P. Kryhl, Santa Ana.

The S. S. Schepps Co. is displaying a very handsome necklace of abalone (blister) pearls and opals set in solid gold. It is the company's own design and manufacture.

Philip T. Hoeffer, formerly in business in this city on W. 7th St., but who has for some time past been in Mexico, has returned and opened a watch and jewelry business at 1908 S. Main St.

Percy H. Greer, this city, has just concluded an auction sale of jewelry for Samuel D. Henkin, Pasadena. Mr. Greer has recently been on an extended trip up the coast as far as Vancouver.

Jos. Jaeger, of Jaeger Bros., Portland, Ore., is spending about two weeks in this city, having stopped here on his return from New Orleans, where he attended the national gathering of the Shriners.

The Whitley Jewelry Co. has sold a large solid silver cup to the members of the Los Angeles fire department to be presented to retiring Chief Lipps. It is appropriately engraved with fire department insignia, etc.

The S. S. Schepps Co., Inc., has filed a petition in the Superior Court for the dissolution of the incorporation. The business will hereafter be conducted by S. S. Schepps and J. T. Harris as a partnership concern.

P. J. Koke, traveling representative of Hambright & Walsh, has just returned from a successful trip through the north coast section and will soon leave for an extended trip covering most of the western States.

A. T. Werner has sold his business at 503 W. 7th St. to Oscar Jackson, an Englishman who has been in this country about one month. Mr. Jackson was formerly in the jewelry business in Belfast, Ireland.

Chas. Adams and C. C. Abel, who recently retired from the Bastheim, Adams & Abel Co., have rented a large room in the front of the fifth floor of the Forrester building, on Broadway, and will soon be open there for business.

The Pacific Gem Co. has secured an unusually fine lot of tourmalines which are now being cut in the shop. Among the stones are some exceptionally large specimens showing two colors. A lot of about 100 pounds was purchased.

Oakes & Wulze, formerly located at 226 Mercantile Pl., have moved to their new quarters at 209 O. T. Johnson building. Mr. Oakes has just returned from a trip through the southern part of the State and reports excellent business.

The following traveling men have recently been in Los Angeles: J. Longwell, Henry M. Abrams Co.; Albert E. Lee; P. Johnson, T. B. Clark & Co. and Whiting Mfg. Co.; A. J. Casse, John R. Keim; A. R. Cooper, M. Schussler & Co.

Newton Moore, 354 S. Broadway, and Fred Detmers, optician in the same store, have gone on a trip to San Francisco and Sacramento, combining business with pleasure. E. B. Josephson is in charge of Mr. Moore's business while he is away.

The Donavan & Seamans Co. sold to the New York delegation of the Hotel Men's Mutual Benefit Association, while in this city, a very beautiful diamond horseshoe scarfpin. It was presented by the hotel men to the conductor of the special train which brought them here from New York.

Pacific Northwest.

R. A. Moore, Hemet, Cal., is offering his business for sale. He intends to move soon to southern Oregon, where he will engage in ranching.

The Red Cross Drug Co. has purchased the show cases and fixtures of the Carleton Jewelry Co., Marshfield, Ore., and the jewelry firm is now out of business.

Newman & Allen is the name of a new firm in business at Twin Falls, Idaho. The Swin & Aldrich building has been leased and fitted up and a stock is now arriving from the East. Mr. Newman, senior member of the firm, is from Stanton, Nebr., and Mr. Allen is from Omaha. Mr. Allen is an expert watchmaker and will have charge of the repairing department.

Louis Burnett, one of three brothers who own and operate stores in Seattle, Aberdeen and Chehalis, Wash., and who was a member of the Alaska-Yukon Exposition, attracted considerable attention recently, while on his way to New Orleans to attend the annual meeting of the Mystic Shriners. At Kansas City he missed his train, his party having left some time before. He hired a special train and overtook the party at Leavenworth.

The work of installing the new electric clock on Public Sq., Wilkes-Barre, Pa., has practically been completed. The clock is located just outside of the Wilkes-Barre Deposit Savings Bank, and has an illuminated dial.

St. Louis.

Adolph Kroeger has taken a position as salesman with the Elliott Jewelry Co.

Frank P. Nims has opened his new store at Warrenton, Mo., and has one of the prettiest establishments in the State

William Lutz, an expert watchmaker, has begun business in room 813, Holland building, and will make watch repairing for the trade a specialty.

E. W. Bornmueller, of the John Bolland Jewelry Co., has returned from New Orleans, where he attended the annual convention of the Shriners.

Al. P. Wolff, of the Elliott Jewelry Co., returned from a vacation trip to Evansville, Ind., and started on a business trip through Illinois and the south, last week.

The Jewelry Jobbers' Association of Missouri held a meeting Tuesday evening of last week at the Columbia Club. All of the members except three were present.

B. Stiffelmann, of M. Stiffelmann & Co., will start in a few days on a trip through Missouri and Iowa and go as far as St. Paul. He will be gone about three weeks.

M. Hurwitz, East St. Louis, Ill., has employed J. J. Layton to take charge of his watch-repairing department, and W. H. Mills is now doing the outside work for the same firm.

S. M. Strain, of the Jackson Jewelry Co., Jackson, Mo., and J. W. Strain, Carrollton, Ill., met in St. Louis and spent a day here before starting together on a visit to their old home in Virginia.

Henry Freund, of H. Freund & Bro., New York, has been in St. Louis during the week on business and pleasure. As soon as he returns to New York he will start for Europe on a diamond-buying trip

The Masonic Club of St. Louis, which has a membership of over 250, has leased the entire fifth floor of the Hess & Culbertson Jewelry Co.'s building at 7th and St. Charles Sts., and will fit up clubrooms there.

The Gill building, Broadway and St. Charles St., erected recently by W. A. Gill, jeweler, as an office building, is to be remodeled into a hotel. The alterations will cost $25,000. Mr. Gill will open a diamond palace in the corner store of the building.

George Oberting, Sr., of the Blankenmeister-Oberting Jewelry Co., has gone on a trip through Indiana and Illinois. George Oberting, Jr., is taking the Kentucky and Tennessee route. Lawrence Oberting is in Missouri. A. L. Blankenmeister has returned from a trip through Kansas and Oklahoma.

W. M. Pyle, of the Pennsylvania Watch Case Co., of York, Pa., who was formerly with the Illinois Watch Co., Springfield, Ill., came here during the week on business. He formerly had many friends here, but this was the first visit to the city in several years. He renewed old acquaintances.

The work of furnishing the enlarged quarters of the Elliott Jewelry Co., in the Globe-Democrat building, has been completed and the establishment presents an attractive appearance. A number of new safes have been installed and the stock carried by the firm has been greatly increased.

Joseph C. Morefield, until recently manager of Loftis Bros. & Co., was arrested April 25 on the charge of embezzling diamonds. He was discharged by the firm March 28 following the disappearance of a tray of $1,000 worth of diamonds. Other arrests are expected. Morefield says he is innocent.

Among the out-of-town jewelers in St. Louis, during the past week, were: M. T. Graham, Fort Smith, Ark.; Dr. H. A. Bennett, Kinmundy, Ill.; Fred Simon, Collinsville, Ill.; E. H. Goulding, Alton, Ill.; L. M. Stram, Jackson Jewelry Co., Jackson, Mo.; J. W. Strain, Carrollton, Ill.; Louis Gardner, of Barnett Bros., Edwardsville, Ill.; R. Radunsky, of Radunsky Jewelry Co., Joplin, Mo.; Z. J. Glascock, Jonesboro, Ill.

The funeral of Charles Zens took place on Thursday from the family residence, 2139 Sidney St. Louis Robin, with whom Mr. Zens had been associated for 12 years; J. J. Burke, president of the Brooks Jewelry & Optical Co., and William F. Kemper, vice-president of the Gutfreund-Kemper Supply Co., were among the pallbearers. Many jewelers attended. Mr. Zens was a member of the Knights of Columbus, the Knights and Ladies of Honor and the St. Vincent de Paul Society.

The executive committee of the Conventions Bureau, of which Goodman King, president of the Mermod, Jaccard & King Jewelry Co., is a member, is having a good deal of trouble completing the program for the visit of President Taft, May 4. As the President is coming to address the National Farmers' Convention, it was the desire to have him attend a barbecue at the Delmar race track in the afternoon. The Business Men's League made other arrangements. It was finally put up to the President. He disapproved of the barbecue arrangements as he does not want to attend any great assemblage.

Creditors of Edward H. Kniepkamp have been notified that a first and final dividend of approximately 5 per cent. has been declared in the United States District Court on all claims heretofore allowed against the estate, and it will be paid by Leo Wolfson, trustee of the bankrupt estate, at his office, 708 Ortel building, on and after April 27. The affairs of Mr. Niehaus have been undergoing adjustment for several months. The principal creditors, who petitioned for the bankruptcy proceedings, were the Eisenstadt Mfg. Co. and the St. Louis Clock & Silverware Co., here, and Heintz Bros., Buffalo, N. Y.

A jury in Judge Fisher's division of the Circuit Court, Thursday, gave Samuel Gold a verdict for $2,400 in his $30,000 damage suit against the S. Pian Time Payment Jewelry Co., 1100 to 1104 N. 9th St. The suit was for libel. The trial lasted two days and there were many witnesses on both sides. The grounds for Gold's claim for damages were six advertisements printed in the *Vorsteher*, a Yiddish newspaper. Gold and the Pian company are business rivals. The advertisements alluded to a jeweler with a certain physical disability. Gold was not named, but he claimed that the language of the advertisements was sufficiently plain to leave no doubt that he was meant. He asked $3,000 actual and $2,000 punitive damages on each publication.

Traveling representatives in St. Louis, last week, included: Geo. L. Paine, Geo. L. Paine Co.; Mr. Foster, M. L. Ernst; Lee Powell, S. O. Bigney & Co.; G. Rodenberg, J. A. Dunn & Co.; Mr. Fisher, Furbish, Swift & Fisher; Mr. Richards, Standard Button Co.; W. H. Alger, North American Watch Co.; Charles E. Howes, E. L. Logee & Co.; George T. Bynner, Kautzmann & Co.; Louis A. Blackinton, W. & S. Blackinton Co.; F. E. Hyatt, Philadelphia Watch Case Co.; Milton S. Rodenberg, Dunn & Rodenberg; Sidney H. Israel, S. & B. Lederer Co.; Mr. Duncan, C. Ray Randall & Co.; Maurice Kohn, Silbermann, Kohn & Wallenstein; D. N. Jacoby, Providence Stock Co.; Mr. Wilkinson, J. J. Sommer & Co.; I. S. Richter, N. Barstow Co. and Doran, Bagnall & Co.; Mr. Foster, Milton L. Ernst; W. F. Maintien, Maintien Bros. & Elliot; Mr. King, Ostby & Barton Co.; James R. Palmer, Henry A. Kirby; William J. Anton, Durand & Co.; F. F. Gibson, Gibson-Krugler Co.; Harry B. Rogers, Rogers & Co.; G. W. Bleecker, Martin-Copeland Co.; I. J. Rosenthal, Rothschild Bros. & Co.; F. R. Horton, Carter, Howe & Co.; George A. Schuetz, Snow & Westcott Co.; Mills Smith, R. Blackinton & Co.; M. L. Barnard, Larter & Sons; George F. Johnson, G. A. Henckel & Co.; John J. Moffitt, Battin & Co.; Fred H. England, Froelichstein, England & Klein; W. S. Metcalf, Plainville Stock Co.; Russell A. Talbot, Alvin Mfg. Co.; G. Fred Perry, F. H. Sadler Co.; Mr. Duncan, C. Ray Randall & Co.; H. S. Noyes, Bates & Bacon; C. A. Rogers, Irons & Russell Co.

Cleveland.

Albert Zang was in Ravenna, the past week, looking over the stock of F. C. Parks with a view of purchasing it.

J. F. Sarratt, Steubenville, is contemplating retiring from business and has given an option on his stock and fixtures to outside parties, the option expiring June 1.

J. P. Hale, Akron, has moved into a handsome new store, with a replenished stock. The store formerly occupied by him has been rented by B. Wingerter, of the same city.

Among the buyers in the city the past week were W. J. Higgins, Shelby; Ralph Hogan, Akron; Robert Miller, Lorain; E. F. Nolf, Wadsworth; H. S. Summer, Akron, and Harry Downs, Bellevue, O.

William J. Davies, of the Sigler Bros. Co., has returned from the annual conclave of the Shriners at New Orleans. He expresses himself as greatly pleased with the reception accorded the Shriners, and says the hospitality extended the "knights of the fez" by the southerners has seldom, if ever, been equaled.

Among the traveling salesmen calling upon the trade in Cleveland, last week, were Otto C. Hanish, Geo. H. Fuller, Son & Co.; J. W. Sherwood, Solidarity Watch Case Co.; John A. Davis, Wm. Rogers Mfg. Co.; P. H. Wilkinson, J. J. Sommer & Co.; D. Skutch, New Haven Clock Co.; C. L. Drown, Ostby & Barton Co.; Donald Le Stage, H. D. Merritt & Co.; George Remington, Maintien Bros. & Elliott; Fred Brigham, Cheever, Tweedy & Co.; L. Tappan, D. F. Briggs Co.; S. A. Schreiber, Sterling Silver Mfg. Co.; F. Somes, Bates & Bacon; Mr. Bullock, Horton, Angel Co.; Mr. Remington, Carter, Qvarnstrom & Remington.

Cincinnati.

J. F. Kaiser, Muncie, Ind., is remodeling his store.

Nick Ollinger, the upper Vine St. jeweler, was married April 20.

Wallace Miller, of the Miller Jewelry Co., is spending a couple of weeks in New York.

Henry Hahn and wife are at Atlantic City, N. J., where they expect to remain until June 1.

H. I. Jacobson, of A. & J. Plaut, has moved into his new home on Floral Ave., Norwood, O.

A. J. Heesen was here, last week, arranging for fixtures and stock for his new store at Toledo, O.

H. A. Bedel, Jackson, O., who was reported as improving after several months of illness, had a relapse.

J. Charles Becker, local manager for the Philadelphia Watch Case Co., was in the east on business, last week.

A. Herman and Mayo Loeb, of Herman & Loeb, have started on their respective business trips south and east.

Joseph Kehn, of the E. & J. Swigart Co., celebrated his 20th wedding anniversary with a reception to a large number of friends.

B. Eiseman, southern representative of Hahn & Oppenheimer, and family, spent last week here as guests of N. Leavendorf, of this firm.

C. N. Hetzner, Peru, Ind., passed through here on his return from New Orleans, La., where he attended the Shriners' conclave.

Frohman & Co. are congratulating themselves on their narrow escape from fire last week. The blaze was in the floor below their quarters and did not reach them.

Albert C. Wallenstein, of Wallenstein Mayer & Co., has been elected manager, captain and pitcher of the local Wholesale Jewelers' Baseball League, recently organized.

The Cincinnati Wholesale Jewelers' and Manufacturers' Association held its regular quarterly meeting at the Sinton Hall, April 21. The usual supper was much enjoyed.

Harry Gilsey, of S. and H. Gilsey, also owner and president of the Shamrock baseball team, was in Huntington, W. Va., last week. His team played with the Huntington team.

When L. E. Dornseifer arrived at his store at 4012 Hamilton Ave., one morning, last week, he found that it had been entered by burglars and $117 worth of goods had been stolen.

J. B. Osthoff, of Joseph Noterman & Co., is on the programme of the Ohio Retail Jewelers' convention, to be held at Columbus, O., May 2-4. His address will be on "Precious Stones and Semi-Precious Stones."

Frank Voiron, Ft. Wayne, Ind., has reported that his house was entered by burglars while he and his family were sleeping. His gold watch and chain, his fourth degree Knights of Columbus charm and his son's diamond stud and gold watch were taken.

L. D. Clapham, Columbia City, Ind., has informed friends here that last week his store was damaged by fire to the amount of $1,500. The loss is covered by insurance. The fire started in a restaurant next door, which was totally destroyed. Mr. Clapham is rebuilding and will soon be ready for business again.

Max J. Greenwald, who some time ago purchased the Gem Jewelry Co.'s store at 32 Arcade, now feels that his business is becoming too burdensome, so he is closing out at auction the "Gem" stock at 528 Race St., where he moved the goods, as no auction sales are allowed in the Arcade. He will continue his other two stores in the Arcade as heretofore.

Out-of-town jewelers who were here last week buying goods included: C. A. Gossard, Washington C. H., O.; Ed. De Voss, and Frank Miller, Wilmington, O.; J. L. Michael, New Vienna, O.; C. Arnold, with N. T. Arnold, Owensboro, Ky.; J. W. Jones, Mt. Sterling, Ky.; William Shire, Paris, Ky.; Jesse Yoke, Decatur, Ill.; Walter Wilhelm, Portsmouth, O.; C. F. Held, Falmouth, Ky.; E. E. Mosiman, Bluffton, Ind.; D. W. Bixel, Bluffton, O.; A. M. Stamm, Williamsburg, O., and Dr. Vaughn, Morrow, O.

William S. P. Oskamp, of the Oskamp Jewelry Co., has bought of M. M. Robertson the property on the northwest corner of Race and 7th Sts. A handsome new eight story building was recently put up on this lot, which measures 30 feet on 7th St. by 97 feet on Race St. The Oskamp Jewelry Co., and the Oskamp Automobile Supply Co. now occupy the ground floor under a 15 years' lease. The building is of a new construction, being steel, embedded in concrete and fireproof. It is understood that the purchase price was upward of $100,000.

It is expected that a decision will soon be handed down by the United States District Court on the question whether or not the Duhme Jewelry Co. is an independent corporation and run by separate funds from those of the Herman Keck Mfg. Co. Two days last week the court heard motions in regard to this question on the part of the Keck family, who are heirs and stockholders in both concerns, and ask that the assets of these companies be separated. Three petitions, declaring the Duhme Jewelry Co. is an independent corporation and not a branch of the Keck Mfg. Co., were filed April 19 by Amanda Keck, Emma Keck and Mrs. Clara G. Keck. The petitions state that the Duhme firm is perfectly solvent with assets of $250,000 and liabilities of $65,000.

Traveling representatives who called on the Cincinnati trade during the past week included: A. Talbot, Alvin Mfg. Co.; Max Loebnitz, Deuber, Hampden Watch Co.; Ernest Block, Louis Stern & Co.; William F. Koch, American Morocco Case Co.; William J. McQuillin, Mount & Woodhull; A. T. Teague, Link & Angell; James R. Palmer, Henry A. Kirby; J. T. Griffith, Jr., Carter, Howe & Co.; William J. Anton, Durand & Co.; C. H. Davison, Kohn & Co.; Julius F. Schuman, Jr., William Kinscherf Co.; J. F. Dean, Reed & Barton; H. R. Blackman, Enos Richardson & Co.; George F. Johnson, G. A. Heuckel & Co.; Jos. J. Sideman, Redlich & Co.; Mr. Frost, the Matthews Co.; L. H. Smith, Bippart, Griscom & Osborn; C. M. Davis, Depasse Mfg. Co.; W. J. Miller, Seth Thomas Clock Co.; Mr. Frink, Thomas Brogan Co.; "Johnnie" Marsh, C. A. Marsh & Co.; Milton Goldberg, J. J. White Mfg. Co.; Mr. Frothingham, Frothingham & Co.; Mr. Hildenbrand, H. C. Lindol & Co.; J. J. Somers, J. J. Somers & Co.; Mr. Israel, S. & B. Lederer; Mr. Boyden, Ostby & Barton; Mr. Powell, S. O. Bigney & Co.; Charles B. Crane, Bliss Bros.; Mr. Foster, Milton L. Ernst; Donald Le Stage, H. D. Merritt Co.; Henry E. Hart, Albert Lorsch & Co.; Mr. Sweetland, Allison Mfg. Co.; A. Rutherford, Taylor & Co.; Maurice Kohn, Silberman, Kohn & Wallenstein; A. Goldsmith, L. D. Bloch & Co.; Mr. Duncan, C. Ray Randall & Co.; C. L. Drown, Ostby & Barton Co.; R. Delerson, E. Oppenheimer & Bro.

Detroit.

J. T. Eddington, Pontiac, is remodeling his store.

Otto Loomis was a buyer in this market, last week.

H. H. Howey, Ortonville, was in this market, Friday.

C. E. Montfort, Utica, was here, recently and says trade is good in his locality.

George D. Hamilton, South Lyon, came in to make purchases a few days ago.

Fred Flachsmann, 819 Gratiot Ave., is contemplating a trip abroad some time this Summer.

Mr. Gartrell, formerly with W. F. Kling, Adrian, has accepted a position with Fred N. Pauli, Pontiac.

Harold A. Bruch, Allentown, Pa., who was here, several years ago, for a course in the Landis engraving school, visited Detroit, last week, accompanied by his wife.

Henry Caspary and John Danz, who formerly occupied joint quarters on Congress St., near Woodward Ave., have moved to a new location on Lafayette Boulevard, near Shelby St.

Floyd E. Hess was arraigned recently at Detroit, on a charge of stealing a gold watch belonging to Russell & Foland, Mt. Pleasant, from the mails. He was released on $500 bond. Hess is a railway mail clerk.

Two men entered the store of Wm. Kinske, 3186 Jefferson Ave., one day last week, while Mr. Kinske was outside of the building and asked for him. Mrs. Kinske went to the back door to call her husband and the men grabbed three watches and ran out. One of them was captured, but the others escaped.

A notice from Galveston, Tex., last week, stated that a steel safe lost in the inundated ruins of Indianola during the tidal wave of 1875 had been found by the use of a powerful magnet. The safe, it was reported, contained about $60,000 worth of jewelry and money which belonged to James Williams, a jeweler who lost his life in the wreckage of his home at the time of the wave. Neither the records in this office nor of the Jewelers Board of Trade contained any mention of a jeweler of that name in business at the time of the tidal wave.

Denver.

L. W. Walker, 771 Jason St., is spending a month's vacation in California.

J. I. Hoffman, Ft. Collins, Colo., has left for California for a vacation of several weeks.

W. W. Hamilton, W. W. Hamilton Jewelry Co., has returned from his trip around the Horn.

The stork visited the home of Roy L. Smith at Delta, Colo., last week, bringing a baby boy.

Chas. Ingersoll, of Robt. H. Ingersoll & Bro., was in the city, last week, making a social visit.

Jas. E. Lewis, of the Lewis Jewelers' Supply Co., has left for a 10 weeks' trip to the northwest.

The Colorado Retail Jewelers' Association will hold its annual convention here the week of June 27.

Leo Supe has taken a road position with Chas. Wathen & Co., this city, and leaves, this week, for an extended trip.

The Peters Jewelry Co., Brigham City, Utah, has sold out to M. J. Holt, formerly with S. E. Needham & Co., Logan, Utah.

Chas. F. McMullin, Brush, Colo., has entered into negotiations with Wm. P. Jones, Ft. Lupton, for the purchase of his store. It is expected the deal will be closed this week.

The store of C. O. Hunter, deceased, Ft. Collins, Colo., has been bought by E. O. Jones, who had been engaged as watchmaker for a number of years with Mr. Hunter.

Roy Steward, of F. P. Steward & Son, Loveland, Colo., was married, last week, to Miss Stella Marie Keller, of that city, and after a short honeymoon will reside in Loveland.

L. K. Hallock, a manufacturing jeweler, formerly in business here for himself, has taken charge of the manufacturing and repairing department of A. Hahn's store in Durango.

H. L. McLaughlin, of the W. W. Hamilton Jewelry Co., has returned from a 10 weeks' trip in the northwest, and reports business excellent. Mr. McLaughlin was accompanied by his wife.

L. F. Cornwell, Pueblo, has received the appointment of general time inspector for the Denver & Rio Grande and Missouri Pacific railroads. This position was formerly held by Mr. Huguenin, St. Louis, Mo.

Henry Lindeman, the stone man, has left for New Orleans for the Shriners' convention. Afterwards he will take a trip through the Gulf of Mexico and return by Galveston. The business is being conducted by Miss Brown.

The Morris Cohn Jewelry Co., this city, has bought the store of Ben Cohn & Bros., Leadville, Colo., and is conducting the store there under the same name, with William Hert as manager. Mr. Hert was formerly of the Denver Watch Case Co.

J. C. Bloom & Co. sold the badges that the Shriners will use in New Orleans during their convention, and have just delivered to the Elks here the badges they will use at their convention in Detroit. The firm also sold a large number of loving cups to be used in a contest held here in the Central Christian Church.

H. O. Jackson, president of the American Clock Co., Chicago, has located permanently in Denver and has fitted up a fine shop at his residence, 560 Sherman Ave. Mr. Jackson is now in the south, engaged in some work which will detain him there about 30 days.

The following out-of-town dealers were here during the past week: W. H. Dow, Ft. Morgan; H. G. Petty, Ft. Collins; W. H. Brannan, Loveland; Lloyd E. Gardner, Longmont; I. O. Glazier, Greeley; Mrs. E. A. Eaves, Idaho Springs; Mrs. I. L. Morgan, Ft. Morgan; L. F. Cornwell, Pueblo.

The Denver Nugget Club held its regular monthly meeting, April 12, but bad weather prevented a large attendance. The addresses on precious stones and the art of engraving, which were to be delivered by Henry Lindeman and A. F. Wehrle, were postponed until the meeting in May.

The following traveling representatives were in the city, last week: W. C. Wood, International Silver Co.; Geo. E. Connors, Robt. H. Ingersoll & Bros.; Monroe Block, Goldsmith & Harzberg; Mr. Tylor, Ansonia Clock Co.; Hubert Sumborn, Bawo & Dotter; Mr. Mayer, Mauser Mfg. Co.; Albert E. Levy, Marchand Frères; Mr. Edwards, Whiting Mfg. Co., and Chas. Offerman, C. A. Marsh & Co.

Toledo.

R. S. Freeman, refractionist with the J. J. Freeman Co., spent last week in New York.

Last week the Judd-Gross Co. conducted a two day sale in glasses, said to be the greatest eyeglass sale ever held in Toledo.

The I. Kopelman Co. has moved from lower Summit St. a few blocks nearer the center of the city. The store has been refitted and improved.

The George Kapp Co. has been incorporated and is composed of George Kapp, William K. Kapp, John Kapp, H. B. Stone, J. George Kapp, Jr., A. M. Schlipf, Frank A. Kapp and A. P. McKee. Every branch of the business has been enlarged, and much more attention has been given to the optical department.

The jewelry and optical business heretofore conducted by Isador Judd and Elias Gross, under the name of Judd & Gross, at 245 Summit St., was recently incorporated by Elias Gross, Isidor Judd, Leota Gross, Samuel Jordan and W. H. Dawson. The capital of the company is $35,000, of which $20,000 is preferred. Mr. Jordan and Mr. Dawson will be stockholders of the company. They have been connected with the business for a number of years.

C. G. Mitchell, who has been connected with the L. Beckmann Co. for some time as the vice-president and had charge of the optical department, has sold his interest in the company and now occupies half of the store in which L. P. Christiancy conducts a jewelry business, at 507 Madison St. Mr. Mitchell has always taken a more than ordinary interest in optical affairs of the city, and has been influential in bringing the opticians together and organizing for mutual benefit. C. W. Dean, who was with Mr. Christiancy, has taken Mr. Mitchell's place with the L. Beckmann Co. Since Mr. Dean severed his connection with Mr. Christiancy, C. H. Parker occupied his place for a few months, but is now with W. A. Rankin, of Superior St.

Milwaukee.

C. F. Graff, Elkhorn, Wis., was a recent visitor to Milwaukee.

William J. Gamm, Madison, Wis., has returned from Hot Springs, Ark., where he has been taking a few weeks' vacation.

Louis W. Bunde, president of the Bunde & Upmeyer Co., has returned from a short business trip to New York, where he visited the company's eastern branch office.

E. J. Jensen, 434 11th Ave., has increased his force and enlarged his quarters. John Randall, formerly with O. H. Nehs, is now associated with Mr. Jensen as watchmaker.

The handsome new residence which E. H. Warnke, president and manager of E. H. Warnke & Co., is erecting in the Milwaukee east side, is fast nearing completion.

It is expected that within a few days the stock of the Fred W. Teschner Jewelry Co. will have been disposed of at public auction. The creditors have had charge of the sale at quarters recently opened on 3d St.

The finest business corner at Boscobel, Wis., has been purchased by Miss Mame E. Contoit, a jeweler at that place. Miss Contoit does not contemplate moving her jewelry establishment to the newly acquired building at present.

The Bunde & Upmeyer Co. has presented a handsome gold plate to be attached to the organ given to Plankinton Hall in Milwaukee's new $500,000 Auditorium by Miss Elizabeth Plankinton. The plate recites the fact that the instrument was given to the Auditorium by Miss Plankinton in honor of her late father, John Plankinton. At a recent meeting of the government board of the Auditorium the Bunde & Upmeyer Co. was honored with a resolution of thanks.

The matter of itinerant merchants, fakirs and dishonest competitors was the leading topic of discussion at the recent monthly meeting of the Milwaukee Jewelers' Club, held at the Hotel Blatz. The campaign which has been started against this undesirable element in the trade by the retail merchants' division of the Merchants and Manufacturers' Association, under the direction of James A. Fetterly, special investigator, called forth much favorable comment from the jewelers and the support of the club to the movement was promised. Plans were also suggested for the coming annual convention of the Wisconsin Retail Jewelers' Association, which meets in Milwaukee, July 12 to 14. At least 400 delegates are expected, and it is hoped to make the convention one of the most successful in the history of the association.

John F. Mahla, a jeweler employed by R. E. Brackertt, Lansing, Mich., who disappeared recently from that town, is believed to have committed suicide, as he left a note for his employer indicating that he would take his life and is also said to have taken a revolver with him when he went. Mahla came to Lansing a year and a half ago.

Kansas City.

E. W. Sparks has bought out the store of Krueger & Doyle, Shelbina, Mo.

E. A. Reinholdt, in the employ of the Hassig Jewelry Co., has been on the sick list for a week.

J. D. Crum has embarked in the jewelry business at Onaga, Kans. He was in this city, last week, buying new stock and fixtures.

C. B. Norton, of the C. B. Norton Jewelry Co., and Leo. H. Ludwig, of the Edwards & Sloane Jewelry Co., left Sunday night with the Kansas City Commercial Club on a trade extension trip through Kansas and Oklahoma.

The following jewelers were in town, last week: J. W. Schmandt, Holden, Mo.; Mr. Baird, Greenwald & Adams, Tucson, Ariz.; W. S. Noble, Drexel, Mo. C. J. Keil, Clinton, Mo.; H. S. Zinn, Hutchinson, Kans.; G. H. Church, Oak Grove, Mo.

The trustee in bankruptcy of C. L. Treachray, 2330 Summit St., reports no available assets for the creditors. His schedule showed about $300 household goods, etc., which were exempt under the law. The liabilities were about $2,500.

C. C. Hoefer, of the Woodstock-Hoefer Watch & Jewelry Co., and G. F. Taylor, traveling representative in northern Kansas of the same company, attended the optical convention at Topeka, Kans., April 19 and 20. Mr. Taylor is now in the house preparing for another trip.

The following representatives called on the trade here during the week: H. S. Noyes, Bates & Bacon; Frank T. Barton, Geo. N. Steere Co.; D. W. Chisholm, Bugbee & Niles Co.; George L. Paine, Geo. L. Paine Co.; Charles E. Howes, E. L. Logee & Co.; Milton S. Rodenberg, Dunn & Rodenberg; E. E. Harwood.

Minneapolis.

The wholesale jewelers' and supply houses of the Twin Cities have begun closing their places of business at one o'clock on Saturdays.

The Henry Bockstruck Co., St. Paul, has succeeded to the business of Henry Bockstruck, at 11 E. 7th St. The incorporators are Henry Bockstruck, L. M. Sinclair and Joseph Jungbauer, all of St. Paul. The capital stock is $80,000.

The completion of the new St. Paul Hotel in St. Paul, has been marked by the installation of some exquisite silverware made especially for the institution. The hotel cost $1,000,000 and has been in course of construction for over a year.

The receiver of the T. M. Roberts Co-operative Supply Co., Minneapolis, has been conducting a reduction sale in the jewelry and other departments. Whether the business will be reorganized and continued is still undecided, although efforts are being made to form a new company, with additional capital.

A jobbers' association in St. Paul has arranged to furnish merchants an opportunity to secure a reduced fare to the city during certain periods by paying the reduction to the railroads themselves. This is limited to merchants, and their ticket certificates must be indorsed by the organization and validated before they are able to secure the return ticket at the reduced figure.

Indianapolis.

Christian Bernloehr will sail for a three months' trip to Europe on June 12.

The street clock of Julius C. Walk & Son is being overhauled and painted.

I. Grohs, of the I. Grohs Jewelry Co., is making a trip through Indiana this week.

A. P. Craft, president of the A. P. Craft Co., spent part of last week in Chicago.

Julius C. Walk and C. J. Kiefer are spending two weeks at Lake Maxinkuckee.

Alfred Pahud, Jr., has taken a position as house salesman with Charles W. Lauer & Co.

A new pawn shop and jewelry store is being opened by Emil Mantel in W. Washington St.

Charles W. Lauer, of Charles W. Lauer & Co., made a trip through Illinois last week on business.

Berg & Graf are opening a new store at 50 Virginia Ave. and will conduct both a retail and manufacturing business.

Charles W. Lauer, Sr., who retired from the wholesale jewelry business some time ago, has returned home after a visit of several months in California.

Jewelers and other merchants of Princeton have petitioned the city council to pass an ordinance fixing the daily license fee of transient street salesmen at $10 a day, in place of the $1 a day license now charged.

Owing to the sale of the building in which they are located, Chris. Bernloehr & Bro. have been notified they will have to move before July 1. They are disposing of some of their fixtures preliminary to moving into new quarters.

Among Indiana jewelers in this city last week were: Charles G. Wildt, Veedersburg; J. F. Kiser, Muncie; August Anderson, North Salem; J. A. Miessen, Cicero; John W. Hudson, Fortville; M. A. Chastain, Roachdale; F. Pennington, Knightstown, and J. G. Laupus, Seymour.

Lee F. Dresser, a well known jeweler of Michigan City, was married to Miss Helen C. Bosserman at the home of the bride's parents in Laporte, April 19. The bride is the daughter of Charles Brosserman. After the ceremony Mr. and Mrs. Dresser left in an automobile for a trip to Chicago.

Several jewelers and merchants of Terre Haute have been swindled to the extent of $1,000 by a man giving his name as J. A. Allen and representing himself to be engaged in secret service work. Allen's plan was to purchase merchandise and tender a check. Inquiry at the bank revealed he had $3,000 on deposit. However, he withdrew the account and left the city before the checks could be presented for payment.

The city administration will take steps at once to improve the fire department to such an extent that Indianapolis can obtain a better classification in insurance rates. Insurance interests have made an investigation of the city and report that if the city will spend about $150,000 improving the fire department a reduction of 15 cents on each $100 worth of mercantile insurance will be granted. Mayor Shank states that these improvements will be made and the insurance companies held to their promise.

San Francisco.

F. E. Jenkins, Santa Paula, Cal., has been here looking over the new lines.

L. H. Smith, with A. L. Hall & Son, has been making a trip through Lake County and Northern California.

The Muhs & Lochbaum Co., dealers in jeweler's trays and boxes at 114 Kearny St., has installed new signs at its place of business.

Burr W. Freer, of the Burr W. Freer Co., is still away on his eastern trip, but is expected back within a few days. His travelers will then start out on the road.

Stockton St. merchants are planning to erect an arcade with a roof of glass, extending from Market St. to Geary St. It is believed that this would be an immense attraction to this district, and several firms in the jewelry business would be benefited.

Walter G. Tucker, who opened a store some time ago at the corner of Golden Gate Ave. and Leavenworth St. has decided that location was not adapted to the jewelry business and has removed his stock. A permanent location will shortly be announced.

Mr. Sorensen, of the Sorensen Co., is expected home from his eastern trip in a short time. He made the journey to New Orleans with a company of Mystic Shriners, of which order he is a member, and later went to the leading eastern markets, where he has been purchasing goods for his firm.

The Koenig building, at the corner of Post and Kearny Sts., has become the home of quite a colony of jewelers, and several others are considering the advisability of moving there. Ed. Forestier is now well settled there. O. Kelso is also there, as is Leon S. Raabe, a watchmaker, and Neil S. Malloy, an engraver.

A. B. Watson, who for some time has been located on an upper floor of the Phelan building, has decided that a ground floor location is almost an essential requirement for a successful watchmaking business where the public is catered to, and has taken a lease on a store now being finished in the Spreckles building, on 3d St., near Market St. This will be occupied about May 1.

C. J. Auger, one of the young members of the retail trade who is becoming well known in business circles in San Francisco, has just been honored by being elected president of the board of directors of the French Hospital Society, at the first meeting of the new board. Mr. Auger, who has been connected with the hospital society for several years, held a banquet in honor of the new and the retiring boards.

An assignment was made by J. S. Lehrberger & Co., this city, recently. The concern conducted a wholesale jewelry business at 704 Market St. The business being owned by J. S. Lehrberger alone, the company being nominal. Mr. Lehrberger has carried on the style since the dissolution of his partnership with Julius Wise, with whom he conducted business for six or seven years. They were burned out in the big fire and afterwards opened in Oakland for a short time, but later removed to this city. The concern has handled a cheaper grade of jewelry and watches. Mr. Lehrberger personally has never before been in financial difficulties, he being always well regarded in the local trade.

Omaha.

H. W. Howe has purchased the stock of L. Slama, Humboldt, Nebr., and will consolidate it with his own.

John T. Cooper, engraver, received an order, last week, to supply and engrave a handsome solid brass memorial tablet.

Alfred Brodegaard, of Fred Brodegaard & Co., is spending 10 days in Kansas City.

Geo. Ryan has been confined to his home for a week on account of illness.

C. H. Ender, Cotesfield, Nebr.; J. W. Bell, Winot, Nebr.; Metran Moore, Tekamah, Nebr.; W. H. Reeves, Manilla, Ia., and M. M. Huck, Schuyler, Nebr., visited the jewelers of this city, last week, and purchased stock before returning home.

Arthur Metz, secretary of the A. F. Smith Co., accompanied by his wife, sailed April 23 on the *Frederick the Great* for a four months' trip to Europe. They will land in Naples and will travel through Italy, Switzerland, Germany, Spain and France, returning about Sept. 1.

After attempting to sell a diamond ring in this city to jewelers, W. E. Marsh, with many aliases, was arrested and, in the District Court, sentenced to serve five years in the state penitentiary for grand larceny. A jeweler in Nebraska City named Mikkelsen shipped a diamond ring to Marsh at Mynard. While examining the ring Marsh substituted a cheap one for it, unobserved by the agent, and then refused to accept the ring, claiming it was not of the right color. Mr. Mikkelsen arrived in the city and identified the ring in Marsh's possession and the arrest followed. Eight other rings were found on the accused.

The following traveling representatives called on the jewelers of this city, last week: H. New, Henry Baschkopf; F. C. Allen, Allsopp & Long; Geo. D. Laurence, Reed & Barton; Samuel Kober, Jacob Strauss & Sons; Robt. J. Kelly, Warner Mfg. Co.; R. B. Carr, Wordley, Allsopp & Bliss Co.; Archibald Rutherford, Taylor & Co., Inc.; I. W. Friedman, I. W. Friedman; I. H. Parks, Parks Bros. & Rogers; M. F. Thornton, A. J. Hedges & Co.; F. F. Gibson, Gibson, Krugler Co.; Frank E. Wallis, F. W. Adams & Co.; R. Wakefield, Burslow, Kollmar & Co.; John H. Baker, Jacobson Bros.; George A. Schuetz, Snow & Westcott Co.; George H. Thomas, Scharling & Co.; Hartford Sterling Co.; W. C. Barry, Barry & Co.; John P. King, Watrous Mfg. Co.; Hubert Somborn, Bawo & Dotter; W. S. Willis, Gorham Co.; Henry Hoffa, Hodenpyl & Walker; Edw. F. Memphis, W. J. Feeley Co.; Chas. Hanni, Sussfeld, Lorsch & Co., and F. R. Horton, Carter, Howe & Co.

A dispatch from Terre Haute, Ind., stated that a swindler had obtained $1,000 worth of jewelry and other merchandise in that city by means of checks that later proved to be worthless. The man is said to have deposited $3,000 in a local bank, and it was there when the jewelers and other merchants inquired as to his account. By adding to his purchase he delayed the presentation of the checks, and when the checks were finally presented it was learned that the swindler had withdrawn his deposit and left the city.

Pacific Coast Notes.

John P. Luxmore, of E. R. Hubbard, Lompoc, Cal., has been spending a short vacation at Oceano.

W. C. Lean, San Jose, is preparing to make an extensive trip abroad and will leave within a short time.

G. J. Deane, Newman, Cal., is preparing to make extensive changes in his store and will shortly occupy more room.

B. C. Allen, a prominent wholesaler of Chicago, is in California with his family and is combining business with pleasure.

Mosgrove & Co., who recently moved from Angel's Camp to Fresno, have become settled at the latter place, and are reported to have a very good location.

Alfred Kramm has purchased a half interest in the business of H. R. Condy, at Grass Valley, Cal., and will take charge of the store. Mr. Condy will move to Sacramento.

Leroy Calvert, Azusa, Cal., has purchased the stock and fixtures of T. M. Gillenwaters, of that place, and has leased a store in a building recently completed. Mr. Calvert was formerly in business at Hillsboro, O.

Carl G. Strock, Santa Ana, Cal., has installed a ship's chronometer in his window and made arrangements with the Western Union Telegraph Co. to put in a clock service. Clocks will be installed by him at the corner of 4th and Main Sts., in the post office, and in the Cafateria, and will be kept in running order by him.

As a result of the recent compromises whereby all opposition to the grant of patents was withdrawn, the United States Land Office has granted the United State Diamond Mining Co. title to over 76 acres of land at Cherokee, Cal. This represents the land recently in dispute. From the land in question there is an actual record of approximately 300 diamonds found. Since the suits were compromised, a short time ago, three stones have been found there.

Springfield, Ill.

When the Illinois Retail Jewelers' Association meets at Springfield in annual convention, May 24, 25 and 26, a strong protest will be made against the parcels post. President F. A. Marean has written letters to all members of the State association, urging them to attend the State convention and register a protest by voting against the parcels post system. He declares if the system is adopted it will cause about half of the small jewelers to quit business.

Many improvements are being made by the Illinois Watch Co. A large two-story addition, 100 feet long and 50 feet wide, of brick, is being erected and will be used as an addition to the dial house. All the walks leading to the building are being repaired and straightened and a cement walk three blocks long being placed along the west side of the factory grounds. Low spots in the factory yard are being filled in, and when the improvements are completed the grounds will be the finest park of any similar place in the city.

J. A. Brady, Jr., Jackson, Ala., has removed to Pecos, Tex.

New Orleans, La.

S. P. Schuessler, a jeweler and optician of Baton Rouge, La., has the deep sympathy of his friends in this city, owing to the death of his wife, Mrs. Alma Hebert, who passed away at the New Orleans Sanitarium here, April 15. The funeral services were held, April 17, and the interment, which was private, was in Magnolia Cemetery. Mrs. Schuessler was 37 years old.

W. O. Hart, this city, has presented to Louisiana State University a copy of the Great Seal of the Confederate Government, adopted Feb. 22, 1862. The seal bears the figure of Washington on horseback, taken from the statue at Richmond. Around the figure is a wreath of laurel. The history of the seal is a strange one. After its adoption by the Confederate Government the original was destroyed. Many copies, however, appeared, one of which was procured by a jeweler in New Orleans. From this copy he struck off many more, but hid them on the approach of the Union army. Last year the owner of the jewelry store moved his place of business, and in cleaning up found the seals. Mr. Hart was notified of the find, and immediately procured the seals. It is one of these that Mr. Hart has presented to the university. The seal is on exhibition in the university library.

Buffalo, N. Y.

Louis Meyers, formerly at 183 Main St., is now settled in his new home, 273 Main St., where he has better facilities for his jewelry business than ever before.

B. M. Henschel, secretary of the Standard Jewelry Case Co., has been acting as grand juror for the past few weeks and was chosen secretary of that body by his associates.

Simon Cohen, 331 Main St., contributed a gold watch; J. Clegg, 14 Seneca St., contributed a scarf pin, while A. E. Sipe, 399 Main St., contributed solid gold cuff buttons to the prizes to be awarded at the *Times'* Marathon, the entries for which will close the last day of this month.

About May 1, the Standard Jewelry Case Co., now at 327-331 Washington St., will be established in new quarters at 137-139 Broadway, where the concern will have nearly four times the space that it now occupies. In the short time that the company has been in business it has built up a large trade, and the new facilities will enable it to fill its orders with greater dispatch and in a more satisfactory manner than has heretofore been possible.

L. W. Lewis, Columbus, O., is looking for a new location, and will move his stock as soon as he finds a suitable one, as his present quarters, on which his lease expires May 1, will be rented to other persons.

The S. K. Merrill Co., Attleboro, Mass., is showing a new line of lockets in a variety of unique and pleasing designs. The large lockets are meeting with approval. There are also a number of oblong and other shapes which are proving popular. Some are shown in rose and green gold finish. The company has been getting out post cards, showing the lockets in colors.

NOW READY

Trade-Marks

Of the Jewelry and Kindred Trades

Up-to-date and new

This book with its Supplement contains

All the known trade-marks of American manufacturers, **to-date,** over 5,000 in number, comprehensively classified and indexed, and, in addition, many trade-marks of English silversmiths. The Hall Marks of England are illustrated and described and historically sketched.

The trade-mark laws of the United States and rules of the Patent Office governing the registration of trade-marks.

The National Stamping Law.

State Laws, including the proposed State Stamping Law, and a list of the States in which this law has been adopted.

Every jeweler has requests for the duplication of articles or for other reasons finds it necessary to determine their origin. This book enables him to identify the maker and thus aids him in **effecting sales and adds to his reputation as one well versed in his business.**

Handsomely and substantially bound in silk-ribbed cloth, stamped in silver—**an ornamental and valuable book for the reference desk.**

Price with Supplement bound in, $3.00

Address_____

Washington, D. C.

L. Carl Jeleuko, Baltimore, and Mrs Jeleuko are visiting freinds here

The death of the little daughter of Ray L Parsons is reported. Mr Parsons has the heartfelt sympathy of the entire trade.

Mr. Brown, of Brown & Armstrong, E St., N W., is seriously ill at his home, suffering from an attack of typhoid fever.

One of the prizes to be awarded at the Horse Show is the "Meyer" Cup, donated by S. N Meyer & Co., 1231 Pennsylvania Ave., N. W.

Mr. and Mrs. John A Kormal, whose wedding took place April 11 at the home of the bride's parents, have returned from their wedding tour through Baltimore, Philadelphia and New York.

Castelberg's National Jewelry Co is again making a good showing with a fine window display. A recent display contained a 40-carat diamond, which, though not a pure stone, attracted a great deal of attention

G. D. Parsons has established the Washington Watchmakers' Institute at 715 Mount Vernon Pl The school is not only for those desiring to take up watchmaking, but for those advanced in the work who have trouble with any one or more branches of the business. Mr Parsons' experience covers a period of 42 years.

Charles W. Phipps, jeweler, lost another high-priced watch as a result of some one breaking his window, last week The thief simply singled out the watch, which had just been received at the store and placed in the window, as his booty, paying no attention to the other articles therein, some of which were valuable The window is a large one and suffered similarly about two years ago, when the thief obtained six watches and was never apprehended.

Among the traveling men in town during the past week were: "Andy" Smith, L. P. White & Co.; Mr. Leopold, H O. Hurlburt & Co.; F. C. Standinger; E. F. Charles Theurer, Crane & Theurer; William Huger, William Hnger & Co.; representative of N. Halpert & Co; C. Kellman, Alvin Mfg. Co.; Leopold Jacobson, S. A Wohlgemuth; C. J. Rech, Jr., C. Rech & Son; Arthur H. Moore, Moore & Son; J. E. Simonson, Ludwig Nissen & Co.; A. Holzinger, Fred Kaufman & Co.; J. G. Rindell, Champenois & Co.; Leo. Goldschmidt, Henry Freund & Bro.; Frank G. Moyer, American Watch Case Co.; Mr. Crane, Mandeville, Carrow & Crane; W. A. Huginni, Concord Watch Co.; Mr. Whitford, Standard Electric Time Co.

The retail merchants of Washington, D. C., whether they are members of the Chamber of Commerce or not, are to be organized into an association for the mutual benefit of themselves and of the general buying public. This organization will use every endeavor to keep as much of the business of the city as possible in the hands of the local tradesmen. A committee of which A. D. Prince, treasurer of the local jewelers' association, is a member, was appointed to call upon the commissioners of the district to see if it is not possible to keep such contracts as those for police and firemen's uniforms, which heretofore have been given to outside concerns, in this city. This is in direct line with the matter of the supply by outsiders of class pins, trophies, etc., to the public and private schools and regarding which a complaint was lodged with the Retail Trade Committee of the Chamber of Commerce. An effort will also be made to prevent traveling salesmen coming to this city and selling direct to the consumer.

Pittsburg.

Otto Heeren, of Heeren Bros. & Co., sails, this week, for a tour of several months in Europe.

The 13-months-old baby of F. F. Aul, of the Geo. B. Barrett Co., which had been seriously ill, died last week.

J. R Thorn, Toronto, and Harry Bloser, New Kensington, were among the out-of-town jewelers in Pittsburg, last week, buying stock.

R. L. Kirkpatrick, Butler, attended the Shriners' convention held in New Orleans recently and visited other sections of the south while he was visiting the Crescent City.

S Maltinsky has disposed of the stock at his Braddock store and will now continue most of his efforts in the development of the business at his Smithfield St. store, in this city.

S. Van Wezel, Antwerp, spent several days of last week in Pittsburg with Sam F. Sipe, who took his friend to the Carnegie Steel Works at Homestead, to show him how "hades" looks with the lid off. Mr. van Wezel expressed wonderment at the sight.

William G. Ingham, who was manager of the Geo. B. Barrett Co., as well as buyer for a number of years, but who resigned recently, is now with Goddard, Hill & Co., both as an inside and outside salesman. Mr Ingham not only enjoys a large acquaintance but has many friends in the trade.

F. S Miller, an optician in the employ of August Loch, 817 Federal St., North Side, died last Tuesday morning at the home of his sister in Mt. Lebanon and was buried Thursday. Mr. Miller had not been able to work for some time, owing to ill health. Death was caused by tuberculosis. He was about 38 years old and single.

Kingsbacher Bros. have taken possession of their handsome new building in Liberty Ave., and which they occupy exclusively and have without doubt one of the prettiest appearing stores in Pittsburg. A new front was built in the structure before the firm moved in, this being of yellow glazed terra-cotta. The handsome show windows also are an added feature and the interior has been handsomely fitted. Kingsbacher Bros. secured a long-term lease on this building before they moved in the Keenan building at Liberty Ave. and 7th St.

A. C. Graul, Sharpsburg, formerly president of the Pennsylvania Retail Jewelers' Association, was a speaker, last week, at the annual banquet of the Pittsburg Association of Optometrists, held at the Seventh Ave. Hotel, and spoke of "Organization." He told the opticians that it was necessary for them to organize or be legislated out of business. There were 54 present at the banquet, which was attended by some of the out-of-town jewelers and opticians. W. T. McConnell, president of the organization and manager of the optical department at Boggs & Buhl, was the toastmaster of the occasion. P. C. Yester, McKeesport, also spoke, and told the dealers that it was absolutely necessary to have laws passed to safeguard the interests of the opticians in Pennsylvania. Others well known to the trade also made addresses. Eight new applications for membership were received.

An unknown thief threw a brick through the show window of the jewelry store of Frank W. Berklet, 412 Ann St., Homestead, one morning last week, and then rifled the window of its contents, securing two trays of rings and other jewelry valued at between $400 and $500. Berkley reported the robbery to the Pittsburg, as well as the Homestead, police and Captain of Detectives William Elmore is watching the pawnshops in the hope of getting some trace of the thief. The identity of the man is not known. Mr. Berkley's store is only a block from the Homestead lockup.

Henry Held, whose place of business was at 1118 Carson St., South Side, and whose action in recently filing a petition in voluntary bankruptcy in the United States District Court, in this city, was noted at the time in the JEWELERS' CIRCULAR-WEEKLY, was arraigned Friday for a hearing before Alderman George L. Bleichner and held for court in the sum of $500 bail on a charge of larceny by bailee. The complaint was laid by Mrs. Louise Hingstler, of the South Side, who asserts that she took a watch to Held to have it repaired; that it was valued at $45; that he gave her another watch in exchange, while she left the timepiece with him and that when she demanded the return of the watch that he refused to give it up. Held denies her accusation and says that the woman did not leave the watch to be repaired, but that she traded it. He will fight the case.

The following traveling representatives called on the trade at Pittsburg last week: Walter Untermeyer, Untermeyer-Robbins Co.; Edgar Huhn, Scofield, Melcher & Scofield; Jacob Sommer, J. J. Sommer & Co.; Mr. Somes, Bates & Bacon; John A. Abel, Abel Bros. & Co.; W. G. Moland, Sansbury & Nellis; Mr. Crane, Mandeville, Carrow & Crane; P. M. Friedlander, Levinson & Friedlander; W. N. Peal, Strobell & Crane; J. Williams, Fera & Kadison; Mr. Vaughn, New England Watch Co.; Lewis P. Cook, S. Sternau & Co.; J. S. Cunningham, E. L. Spencer Co.; Albert Matteram, Frank M. Whiting & Co.; Theodore Parker, Smith & Crosby; M. V. Decker, Plainville Stock Co.; Charles P. Crane, Bliss Bros. Co.; Wm. Bosselman, T. Quayle & Co.; C. B. Nickerson, Ostby & Barton Co.; Donald DeStage, H. D. Merritt Co.; C. L. Brown, Ostby & Barton Co.; Mr. Sweetland, Allison Mfg. Co.; H. E. Barkman, F. H. Cutler & Co.; Charles Boss, American Cuckoo Clock Co.; E. S. Viall, F. H. Sadler Co.; F. S. Ottley, Riker Bros.; Frank T. Ryder, Walter E. Hayward Co.; E. A. Reed, Reed & Barton Co., and W. J. Harber, Enos Richardson & Co.

G. E. Plummer, who purchased the business of the Spooner Jewelry Co., Spooner, Wis., has renovated the store and rearranged the interior.

North Attleboro.

Howard Gardner has returned from a trip to Chicago.

R. H. Booth, salesman for Sturtevant & Whiting, left, Sunday, for the west.

A. B. Chase left last week for a business trip in the interests of Boss & Baldwin.

George Fox, salesman for the A. L. Lindroth Co., left last week for the West.

J. W. Sutherland, salesman for the H. H. Curtis Co., was at the factory last week.

Edward Booth has resigned his position as patternmaker for B. S. Freeman & Co.

Ira Barrows, of the H. F. Barrows Co., sailed last week for Europe on a pleasure trip.

Le Roy Thompson, salesman for C. Ray Randall & Co., was at the factory last week.

Chas. T. Paye was the guest of G. K. Webster at his New Hampshire camp last week.

Herbert J. Straker and Frank H. Cutler enjoyed a fishing trip, last week, at the Cape.

William F. Maintien, of Maintien Bros. & Elliott, is enjoying a vacation in California.

C. V. Harrison, New York, was in town Saturday, calling upon the local manufacturers.

The Sturtevant & Whiting factory is closed this week for the annual stock-taking.

Andrew Flagg was in New York last week in the interests of the A. L. Lindroth Co.

Chas. Wolfson, New York, was here last Tuesday, placing orders with the local jewelers.

Louis D. Barrows launched his new motor boat at his Summer home at Wareham last Sunday.

The T. I. Smith Co. is occupying the addition to their factory, which has just been completed.

Willis Fuller, formerly of the Miller, Fuller & Whiting Co., is representing the Allison Co., in New York.

Chas. E. Stanley, New York representative of the Estate of O. M. Draper, was here last Friday and Saturday.

The controversy over the will of the late O. M. Draper has been assigned to a hearing in Boston before the Supreme Court.

Wilfred Boucher left last Friday for Toronto, Ont., where he has accepted a position as foreman with H. & A. Saunders.

A. E. Motteram, salesman for F. M. Whiting & Co., was in town Saturday for a short time and then left for a western trip.

One of the large firms manufacturing mesh purses said, last week, that it has business enough to keep the factory running until Christmas.

C. Ray Randall & Co., Riley & French, G. C. Hudson & Co., and W. & S. Blackinton Co. resumed work on Monday after 10 days' of stock-taking.

Word was received here last week of the death in Chicago of J. L. Lucas, who for a number of years was the representative of the T. I. Smith Co.

The Webster Co. is planning to erect a large addition to their present factory, 89 feet in length and three stories high. This is necessary on account of their increasing business.

Emil Miller, of E. F. Miller & Co., Providence, R. I., was one of the judges at the indoor hose contest of the local firemen, last Friday evening.

Engineers Thompson and Wood, of the Boston & Providence Interurban Railroad, were in town last week, making surveys of the proposed route through the center of the town.

Edwin L. Munford has resigned his position as western salesman of Williams & Payton, New York. Mr. Munford was formerly with W. H. Bell & Co., and Miller, Fuller & Whiting.

At the last meeting of the selectmen Wednesday evening the Board refused to grant the Adams Express Co. a pony express license to carry liquors into the town. While the main reason for the refusal was the desire to curtail the liquor traffic, it is said that the company's action in increasing the express rates between the two Attleboros and New York was used as an argument why the license should not be granted.

Newark.

A Geiger, diamond setter, recently moved from 355 Halsey St. to 23 Marshall St.

T. D. Mayfield, enameler, has moved into new quarters in room 604, Richardson building.

A. W. Van Ness, San Francisco, Cal., who represents the William B. Kerr Co., is making his yearly visit to the factory.

M. Alexander, Richardson building, has just secured Harry P. Lanz to represent him in Pennsylvania and the middle west.

Harris & Weisgerber have succeeded to the firm of Huber, Weisgerber & Harris, makers of fine jewelry at 112 Arlington St.

C. J. Bioren, of Bioren Bros., Washington St., has just returned from a trip to Philadelphia, Baltimore and Washington. He found business better than on his former trip.

F. H. Felger, representing F. & F. Felger, 42 Washington St., has just started for a trip through the middle west. F. C. D. Bonnor, of the same firm, is on a trip through New York State and Pennsylvania.

No trace has yet been found of the thief or thieves who broke into the safe of Schueler & Gieser, 93 Lafayette St., last week and took all the stock and manufactured goods. The firm has not yet been able to resume its work.

John C. Eisele, of Eisele & King, bankers and brokers, was the principal speaker at the noonday luncheon of the Newark Association of Credit Men held last Thursday noon at the Hotel Broad. His subject was "Business Opportunities."

Thomas Allsopp, of Allsopp & Allsopp, 18 Columbia St., sailed to-day for a trip to Europe. He will be gone over two months and will visit London, Paris and other cities. George Bearsley, of the same firm, is on a trip through the middle west.

The Elm Mfg. Co., against whom a suit has been filed in chancery in the District Court, is seeking a settlement with its creditors on the basis of 25 cents on the dollar. R. C. Dick, who recently entered the firm, says that if the settlement is accepted it will continue in business. It is claimed that the indebtedness of the firm is $20,000 and that the valuation of the equipment and stock is about $15,000.

B. M. Schwarckopf, representing C. Rech & Son, 481 Washington St., has just started on a trip through the south and west. H. A. Curry has been secured to represent the firm in the middle west in place of Rudolph Schwarckopf, who has retired from the road.

No trace has been found of the goods stolen from the factory of the Steeber, Kraus Co., 67 Hamilton St., on Easter. Small quantities of gold had been missed at different times before. About a dozen tools were taken, most of them the personal property of John C. Steeber.

Frank Kursh has withdrawn from the Frank Kursh & Son Co., 18 Columbia St., leaving his son, George F. Kursh, in charge of the business. Frank Kursh, until the last few years, was in business in Philadelphia. He was originally with Dutz & Winsel, Philadelphia, which later became Winsel, Pierce & Co., and then Pierce, Kursh & Co. When the present firm was organized a factory was opened in Newark. He will return to Philadelphia to reside permanently.

The Wheeler Jewelry Co. has moved from 24 Boudinot St. to larger quarters at 93 Lafayette St. J. E. D. Wyngaert, formerly of Scofield & Wynbaert, has entered the company and, with Richard Faux, founder of the Wheeler Jewelry Co., will conduct the business. In addition to a regular line of jewelry they will make combs, buckles and mesh bags. Mr. Wyngaert will spend part of his time on the road. When running full time the firm will employ 30 hands.

Suggestions for getting loan exhibitions of the art of Newark silversmiths and goldsmiths, the products of the Trenton potteries and examples of old American silver, borrowed from homes are made in the annual report of the Newark Museum Association. At the end of the first year of its history the report shows that there has been a lively interest in the museum. The Rockwell exhibition of Japanese art objects was the biggest purchased, costing $10,000.

The funeral of W. A. Wirth, manufacturing and wholesale optician, Broad St., Newark, whose home is in Roselle, N. J., was held from his late home on Monday, April 18. In accordance with his wish, his body was cremated at the Rosehill Crematory, Linden, N. J. Announcement has been made that his business will be carried on under the management of M. E. Messersmith. Mrs. W. A. Wirth, the widow, retains Mr. Wirth's interest in the business.

The banquet committee of the New York District, F. S. of E., have completed arrangements for the banquet which will follow the quarterly meeting of the Engravers' Union, which is to be held in Newark on May 28. The committee of arrangements is composed of Thomas McKee, of Wallington, chairman; Elmer Thompson and T. S. Livsey, of Passaic; Alexander Murray and Walter S. Cherry, of Newark. Mr. Murray is president of the New York District.

"CHATS ON OLD SILVER" By E. L. Lowes. Cloth, 320 pp., 8 x 5½ inches. With a colored frontispiece, 54 full-page illustrations and numerous line drawings in the text. Published by Frederick A. Stokes Co., New York. Price, $2.

IF many semi-technical subjects are these days over-written this cannot be said of gold and silver smithing. Assuredly no subject contains in its recital more interesting historical episodes, lovelier artistic conceptions and greater cultural attractions than this one of the arts embodied in the precious metals. Another worth-while publication on the history of gold and silver smithing recently off the press is Mrs. Emily Leigh Lowes' "Chats on Old Silver." Worth while because it is a tale interestingly told, and being fairly comprehensive of the leading facts and thoroughly illustrated, it deserves a careful reading at the hands of the jeweler as well as the lay public.

Part I is dedicated to "Marks and Makers." Part II is devoted to "Ancient and Medieval Gold and Silver." Part III systematically discusses and illustrates plate styles of the different periods. Part IV contains "Miscellanea," devoting six pages of text to Paul Lamerie and his work, "Frauds and Forgeries" covering an equal space; and the "Old Royal Plate of the Tower of London" has two pages, followed by some of the treasures of ancient gold and silver in public museums.

As will be seen from this summary of contents, the author by no means restricts her theme to silverwork. In fact the principal topic in the earlier part, after the subject of Hallmarks is covered, is almost exclusively on the goldsmith and his creations. This *golden* start is, however, a very forgivable offense, for it is of golden interest; later the story is diverted into *silver* channels more continuously. Those silversmiths who have not ready to hand the full facts and illustrations of the hallmarks of Great Britain and her silversmiths' marks will find here valuable matter. Here are reproductions of the marks of assay towns, both closed and active at present. The shapes of the punches of London date letters, together with the old English silver marks (date letters), cover 13 pages and include London, Birmingham, Chester, Edinburgh, Dublin, Exeter, York and Norwich.

From page 53 the interesting history, both legendary and *accepted*, of the goldsmith's art is related in the eloquent style such a mass of dramatic elements so well admits. The golden story of Hebrew, Egyptian, Greek, Roman and Celt is set forth. A special chapter of five pages tells of the Mexican and Peruvian and other workers in the precious metals on our Continent. A vivid panoramic sketch continues the story—Rome, its decay and treasure trove; Byzantium, with its wealth of costly church equipment; then the wave of destructive activity of Leo and Iconoclast; busy days down again for the goldsmiths. And so the merry changes of history go on. The busy workshops of the metal workers ring to the urgent orders of the religious devotees, and the churches become gorged with golden emblematic representations in utensil and furniture, sparkling in the splendor of rubies, etc. The abodes of wealth catch the fever for beauteous effect in the precious metals, and the nation is pompous in glittering splendor. The barbarian rages without, battle and, later, pillage sweeps away or destroys the lovely work of several centuries in a twinkle, or a wave of "reformation," "reconstruction" or other variant of religious revolution starts the masses of gold, silver and gem work to the melting pot; tons follow tons of the precious metalwork representing the artistic expression of a century, and leaving to us only a few ounces of buried treasure, dug up in recent days, to stay permanently (it is to be hoped) in museums, where neither priest nor populace can again destroy.

The Christian Church produced and the Christian Church destroyed; the kings produced and their battling hordes reduced. And so we read and read and wander from the shores of the Mediterranean to the monastries and shrines of the cold shores of Great Britain and Ireland with their Celtic art in serpentine gold répousse; Augsberg and Nurenberg give up their tale of treasure; Sassanian, Romanesque, Renaissance; all are duly discussed. The whole golden galaxy passes before us till at page 123 we arrive at a chapter devoted to "Ecclesiastical Plate," and we begin our wanderings again in fields of silver for the most part.

Dispersed throughout the book are sets of quotations of prices of works fetched at auctions that are useful to collector and dealer alike. Some "shop" talk is also offered the uninitiated.

Mrs. Leigh informs her readers that: "A 'Costard' was a drinking cup, a 'chaffar' a cup or bowl used for minced 'partrich' and a 'Conscience' a little silver pot with two ears." She also declares: "Porringer does not mean a porritch-pot, nor yet is a caudle-cup made to hold that unsavory sounding beverage. The 'porringer' is simply an old English term for a drinking vessel with handles, and the caudle-cup is practically the same. Both were used indiscriminately for drinking wine or various hot drinks which found such favor in those days." This is information many of us had not received before.

A little later she says: "The porringer was the 'standing-cup' with handles without the stand, if we may call it so, and superseded the beaker and tumbler cup in general use. The sides were generally straight, though occasionally we find them wider at the bottom and narrower at the top, like the caudle-cup." All of which is interesting as throwing what to the writer would appear a new light on the subject for most of us.

How useful, by the by, it would be if some one (authoritative) would tell us in clean and clear terms and illustrations what's what in shapes? What is the difference between pitcher, ewer and jug shapes? The tankard, mug, goblet forms; where can we find out all about them?

C. W. C.

O. T. Erhart, La Crosse, Wis., whose store was recently robbed of $200 in cash, has placed high grade steel bars over his side and rear store windows.

J. D. Crum is a new jeweler in Onaga, Kans.

N. Glain will shortly start in business in Lake City, Minn.

M. J. Hess opened a store in Harrisonburg, Va., recently.

The Remington Co. recently started in business in Attleboro, Mass.

Cohn Bros. have opened a store at 341 Northampton St., Easton, Pa.

A new store has been opened by Newman & Allen at Twin Falls, Idaho.

N. L. Seif has opened a store in the Meade building, Stamford, Conn.

Berg & Graf have started in business at 50 Virginia Ave., Indianapolis, Ind.

Herman Lindstrom on May 1 will open a jewelry store on Main St., at Bemidji, Minn.

R. Schartz has just engaged in business as a watch and jewelry repairer in New Paltz, N. Y.

Auclare & Co. have opened a retail jewelry store at 1520 Woodward Ave., Grand Rapids, Mich.

Slade & Weadley have engaged in the jobbing jewelry business at 156 Wabash Ave., Chicago.

Emanuel Rockmaker is a new jeweler in Freeland, Pa., where he has opened an attractive store in the Timony building.

Lord & Gage is the name of a new firm in Harrisburg, Pa. The concern will open a department store at 215 Market St.

O. M. Pugh, until recently in the employ of a jewelry concern in Kewanee, Ill., has begun business on his own account in Geneseo, Ill.

Reymond Lanz, son of Gustave Lanz, Norristown, Pa., has completed arrangements to engage in business for himself at 511 W. Marshall St., in the same city.

In Columbia, Tenn., a new retail jewelry store was opened by Cotham Bros. The firm consists of J. W. and W. H. Cotham. Until recently the latter was engaged with the James Bros. Jewelry Co.

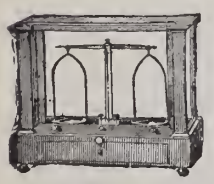
The United Jewelry Co. has been incorporated in Providence, R. I., with a capital stock of $6,000. The incorporators are Max S. Lazarus, David Blacher and Joseph Monschein, all of Providence.

The bill introduced in Congress by Mr. Coudrey, making it a misdemeanor to expose a public clock that is not within two minutes of the correct time, has been found to be unnecessary, as the bill applies only to the District of Columbia, whose commissioners have at present full power to act in such matters. Under the present regulations permits are granted for public clocks in compliance with certain conditions, one of which is that the removal of the clock may be required upon its failure to indicate correct time. The commissioners see no necessity for the proposed legislation such as Mr. Coudrey offers.

AMERICA'S LEADING JEWELRY AUCTIONEER

JAMES L. HAND,

14 Maiden Lane . New York



If contemplating an auction sale you should know that it costs you no more to secure the services of "HAND," the most reliable and competent auctioneer of high class jewelry in this country, than it does to hire a "has been" or an auctioneer of little ability. Don't you feel confident that the auctioneer that conducted the Vail sale at Wichita, Kans., the Duhme sale at Cincinnati, the Sturgeon sale at Detroit, the Mawhinney & Ryan sale at Omaha, the Lefferts sale at Council Bluffs, the Patterson sale at Port Huron, the Vel ack sale at Pittsburg, and many others as successful, can sell any stock no matter how large or fine? Can't you trust a man with such wide experiences and recommendations with the sale of *your* stock?

Have you noticed the better standard that is demanded of jewelry auctioneers since "Hand" entered the field?

My present sale is for Mr. Harvey Fritz, of Oil City, Pa. It's a great success, too. The services of myself and three well trained assistants are awaiting you. Wire or write. Just write for my "Auction Folder," it tells all about it.

JAMES L. HAND.

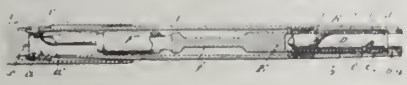
PATENT DEPARTMENT

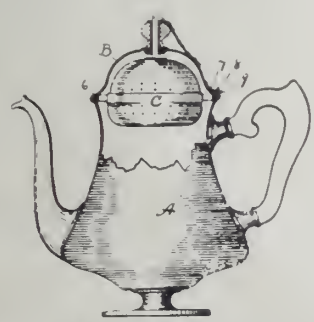


[IN WHICH IS CONTAINED A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN. THE UNITED STATES PATENTS THAT HAVE EXPIRED AND THE REGISTERED TRADE-MARKS.]

UNITED STATES PATENTS.

ISSUE OF APRIL 12, 1910

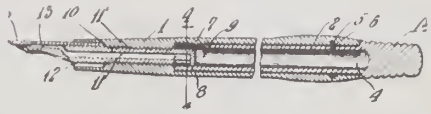
954,415. FOUNTAIN PEN. CLAES W. BOMAN, New York, assignor to Eagle Pencil Co., New York. Filed Sept. 9, 1909. Serial No. 516,835.



In combination with the main body of the handle, the rear handle section detachably connected therewith, a cylindrical barrel with closed sides and front end fitting and housed in the rear

handle section, and capable of longitudinal movement only therein, a nib-carrying bar attached to the closed front end of the barrel, a screw rod fitting and housed in the barrel and swiveled in the rear handle section so as to be capable of rotary motion only therein, and a pin in the barrel which engages the screw thread in said rod

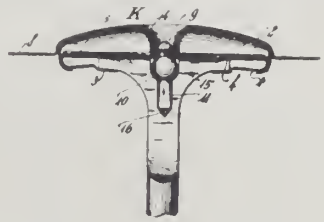
954,502. TEA OR COFFEE POT. GEORGE E. CURTISS, New Britain, Conn., assignor to Landers, Frary & Clark, New Britain, Conn. Filed Feb. 15, 1909. Serial No. 477,872.



In a tea or coffee pot, an upwardly projecting cylindrical top having a front and back, and an inwardly projecting shoulder below said top, a dome-shaped cover, a cylindrical neck projecting downwardly from said cover, fitting and adapted to be received within said cylindrical top, adapted to be supported by said shoulder when in normal position while brewing and storing tea or coffee and having a front and a back, a tea ball adapted

to be housed within said dome-shaped cover, the line of gravitation for the combined cover and tea ball housed therein being outside the supporting base of the same during the act of pouring tea or coffee so as to tend to tilt the said cover on its said front, and separate the said backs of said cover and top, the said front of said cover adapted to engage with the said front of said top during said act of pouring tea with said shoulder, and means for preventing the said separating of said backs comprising a backwardly directed finger on said back of said cover adapted to engage with a laterally opening eye mounted on the top edge of the said back of said top.

954,514. FOUNTAIN PEN. PAUL J. HELMER Cucamonga, Cal. Filed April 1, 1909. Serial No. 487,316.



The herein described fountain pen comprising a body having inner and outer telescoping tubular sections, the outer section having at one end a large cylindrical bore to receive the other section, said bore being formed adjacent to its open end with an annular groove, an annular packing ring seated in said groove to frictionally engage the inner section, said outer section being also formed with a reduced screw threaded bore and with a pen receiving socket, said inner section having its outer end closed and formed with an enlarged portion to provide a finger piece and an annular stop shoulder for engagement with the outer section, the other end of said inner section having a portion removed, whereby the remaining portion of said inner end forms a valve seat, a tubular feed-

ing member externally screw threaded to engage the threaded bore in the outer member, the inner end of said feeding member being closed and of cylindrical shape and having in one of its sides a valve opening, said valve opening being adapted to be controlled by said valve seat when the inner section of the body is rotated in the outer section of the same, and a pen-point arranged on the outer portion of the feeding member and in the pen-receiving socket of the outer section of the body.

954,505. COLLAR STUD. PAUL EPPELEIN, Ratisbon, Germany. Filed Dec. 17, 1907. Serial No. 406,891.

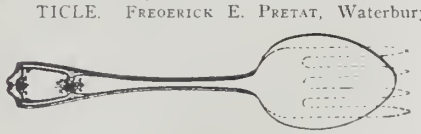
A button comprising a shank provided with a recess, a tiltable head mounted on said shank, a

locking pin adapted to be passed through said head and extend into the recess of said shank to lock the said head relatively to the shank and means for yieldingly retaining the said locking pin in the said recess.

954,568. SETTING FOR PRECIOUS STONES. VICTOR A. GEBHAROT, Cincinnati, O. Filed Dec. 6, 1909. Serial No. 531,540.

A setting for a cluster of small stones compris-

ing a disk or plate to hold the stones, with a framework secured to the plate and depending therefrom to resemble the facets of a brilliant below the girdle.

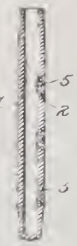


DESIGNS.

40,619. SPOON, FORK OR SIMILAR ARTICLE. HENRIK HILLBOM, Wallingford, Conn., assignor to R. Wallace & Sons Mfg.

Co., Wallingford, Conn. Filed Feb. 17, 1910. Serial No. 544,525. Term of patent 7 years.

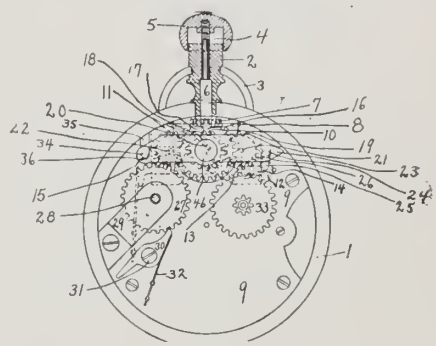
40,620. SPOON, FORK OR SIMILAR ARTICLE. FREDERICK E. PRETAT, Waterbury,



Conn., assignor to International Silver Co., Meriden, Conn. Filed March 7, 1910. Serial No. 547,947. Term of patent 7 years.

ISSUE OF APRIL 19, 1910

955,205. FOUNTAIN PEN. FELIX RIESENBERG, New York. Filed Jan. 24, 1910. Serial No. 539,794.



In a fountain pen, an ink font of opaque material, having a portion of its interior wall of color distinct from that of the link, and perforated in the side opposite said portion and provided

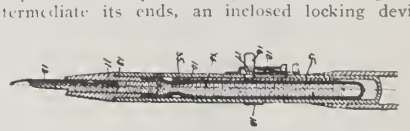
in said perforation with a lens adapted to focus light on the wall of the font opposite said lens.

955,336. STEM WINDING AND SETTING MECHANISM FOR WATCHES. GEORGE KERN, Peru, Ill., assignor to The Western Clock Mfg. Co., La Salle, Ill. Filed Feb. 15, 1910. Serial No. 544,087.

In a stem winding and setting mechanism for watches, a movement plate, a member slidably mounted on the movement plate, an inclined plane

on said member, a pendant, a stem slidably and rotatably mounted in said pendant, means on said stem co-acting with said inclined plane moving said member and forming a lock with said inclined plane.

955,453. PIN. SIGMUND FISCHER, Cranston, and WALTER H. PRUEFER, Providence, R. I. Filed May 25, 1909. Serial No. 498,219.

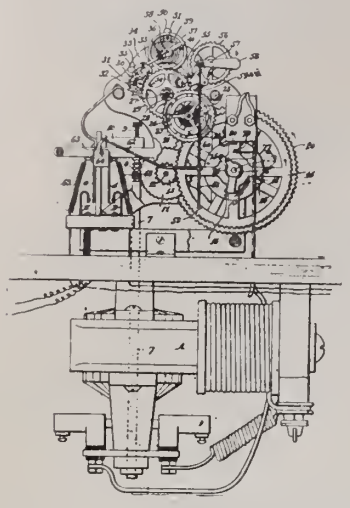


In a pin of the character described, the combination of a front plate with a back plate, the latter having a catch member formed integral on one edge thereof, the neck portion of said member

being bent over and back upon the face of said plate, the face of said neck portion being pressed inward substantially flush with that of the back plate, said neck portion being carried inward from its edge nearly to the center of said plate, leaving a substantially continuous unbroken margin whereby the edge of said front plate may be rolled continuously around that of said back plate.

955,475. FOUNTAIN PEN. BERT RENTZ, Wells, Minn. Filed April 29, 1909. Serial No. 493,007.

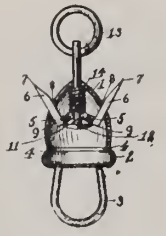
A fountain pen comprising a barrel, a flexible ink receptacle within said barrel, a push pin operating through said barrel and engaging said ink receptacle, said pin having an annular groove intermediate its ends, an inclosed locking device



located externally of and slidable upon said barrel and provided with forked terminal engaging in said annular groove and locking the pin in position when the locking device is located in one position, and a housing for said locking device.

955,538. MASTER CLOCK. MAX W. OBERMILLER, New York. Filed Aug. 24, 1909. Serial No. 514,458.

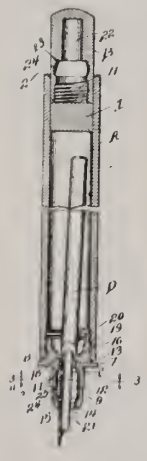
In combination with a time train including a clock spring for driving the same; a reversing switch, mechanism controlled by the time train for



actuating the reversing switch, winding mechanism including a winding spring for driving the reversing mechanism and means between the reversing mechanism and the time train to wind the clock

spring at each current reversal the same amount as it is unwound in driving the clock train between current reversals.

955,596. POCKET ARTICLE GUARD. Samuel Korf, Chicago. Filed Jan. 2, 1908, Serial No. 408,926. Renewed Sept. 14, 1909. Serial No. 517,746.



A guard for pocket articles having a hollow body, apertures in said body a loosely mounted catch device having independent prong members adapted to be projected through the apertures in said body, a rod surrounded by said prong mem-

bers, a head on said rod, a shoulder formed within the hollow body, said loosely mounted prong members adapted to be seated on said shoulder and on the head of the independent rod, said prong members adapted to be tilted and projected through the apertures in the body by contact with the head of the independent rod, when the rod is actuated.

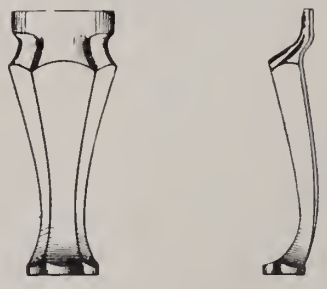
955,675. FOUNTAIN PEN. Ernest E. Morlan, Columbia, Mo. Filed March 10, 1909 Serial No. 482,422.

In a fountain pen, the combination of a barrel,

a plug mounted therein and having an annular flange projecting beyond the barrel, there being a groove formed between the flange and the end of the barrel, a chambered nipple on the plug, a pen arranged in the chamber of the nipple, and an ink-feeding device movably mounted in the plug for supplying ink to the hollow side of the nib.

Designs.

40,640. HAT PIN. Henry W. Schwalb, New



York. Filed Feb. 5, 1910. Serial No. 542,328. Term of patent 3½ years.

40,641. HANDLE FOR SPOONS, FORKS OR SIMILAR ARTICLES. William C. Bowlen, Providence, R. I., assignor to Rogers,

Lunt & Bowlen Co., Greenfield, Mass. Filed Feb. 18, 1910. Serial No. 544,714. Term of patent 14 years.

40,642. LEG FOR A COFFEE URN, CHAFING DISH OR SIMILAR ARTICLES. Edward A. Gutermann, Meriden, Conn., as-

signor to Manning, Bowman & Co., Meriden, Conn. Filed Feb. 15, 1910. Serial No. 544,137. Term of patent 7 years.

UNITED STATES TRADE-MARKS.

[The following trade-marks have been adjudged entitled to registration under the Act of Feb. 20, 1905, and are published in compliance with Section 6 of said act. Said section provides:

"Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Section 2 of this act. If no notice of opposition is filed within said time the commissioner shall issue a certificate of registration therefor, as hereinafter provided for."

Marks which are stated to have been "Used 10 years" are registrable under the last proviso of Section 5 of said act, which is as follows:

"And provided further, that nothing therein shall prevent the registration of any mark used by the applicant or his predecessor, or by those from whom title to the mark is derived, in commerce with foreign nations or among the several States, or with Indian tribes, which was in actual and exclusive use as a trade-mark of the applicant or his predecessor from whom he derived title for 10 years next preceding the passage of this act."]

TRADE-MARKS PUBLISHED APRIL 12, 1910.

Ser. No. **48,018.** (CLASS 27. HOROLOGICAL INSTRUMENTS.) The Western Clock Mfg. Co., Peru, Ill. Filed Feb. 25, 1910.

Particular description of goods.—Clocks and watches.

Ser. No. **48,028.** (CLASS 28. JEWELRY AND PRECIOUS METAL WARE.) W. G. Clark & Co., North Attleboro, Mass. Filed Feb. 26, 1910.

Particular description of goods.—Cuff buttons, bracelets, lockets, chains, pins, collar buttons, shirt studs and tie clasps made from precious or plated metal.

TRADE-MARKS PUBLISHED APRIL 19, 1910.

Ser. No. **48,344.** (CLASS 27. HOROLOGICAL INSTRUMENTS.) The Western Clock Mfg. Co., Peru, Ill. Filed March 11, 1910.

CHANTECLER

Particular description of goods.—Clocks and watches.

TRADE-MARKS REGISTERED APRIL 19, 1910

77,530. CERTAIN JEWELRY. E. I. Franklin & Co., North Attleboro, Mass.
Filed Sept. 20, 1909. Serial No. 44,811. Published Feb. 15, 1910.

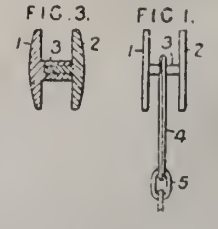
77,531. CERTAIN JEWELRY. E. I. Franklin & Co., North Attleboro, Mass.
Filed Sept. 20, 1909. Serial No. 44,812. Published Feb. 15, 1910.

77,526. ENGRAVING TOOLS AND IMPLEMENTS HAVING CUTTING EDGES. F. W. Gesswein Co., New York.
Filed Dec. 28, 1905. Serial No. 15,710. Published Feb. 15, 1910.

77,537. TOOLS FOR WATCHMAKERS' USE. Henry Zimmern & Co., Inc., New York.
Filed April 17, 1908. Serial No. 34,186. Published Feb. 15, 1910.

77,597. SILVER-PLATED WARE COMPRISING FLAT AND HOLLOW WARE. Wm. A. Rogers, Ltd., New York.
Filed May 25, 1905. Serial No. 6,569. Published Nov. 7, 1905.

77,598. SILVER-PLATED WARE COMPRISING FLAT AND HOLLOW WARE AND CUTLERY. Wm. A. Rogers, Ltd., New York.
Filed July 28, 1905. Serial No. 10,950. Published Nov. 7, 1905.



BRITISH PATENTS.

(Abriogments of Specifications, 1908, from *The Illustroted Official Journal.*)

ISSUE OF APRIL 6, 1910.

26,738. WATCH GUARDS AND CHAINS. C. Franklin, Hereford. Dec. 9.

A watch guard or chain is provided with a reversible device for attaching it to the dress, comprising a front plate 1, Fig. 1, a back plate 2, and

a distance piece 3 rigidly connected to the plates. A split or solid link 4 is threaded over the piece 3 for attaching to the chain 5. Both of the plates

may be inserted in the buttonhole, etc., and may be of any shape or design. The rigid member may be made in two parts, Fig. 3, to be screwed together. One plate may be attached to the rigid member by a ring or swiveling joint

26,748. INDICATORS FOR MOTOR ROAD VEHICLES. D. G. Joy, Stevenage, Hertfordshire. Dec. 10.

An indicating instrument for a motor road vehicle measures of the distance traveled, rate of travel, time, rate of petrol consumption and gradient. The engine draws petrol from a tank of definite capacity, filled when empty from the train tank, the level in the subsidiary tank being indicated by means of a float therein rotating a pointed P on the petrol scale of the indicator as the

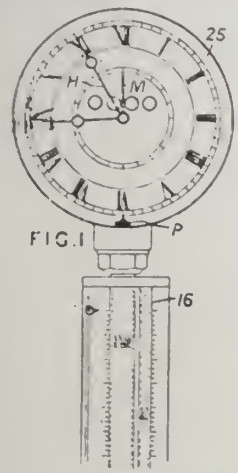


FIG. 1

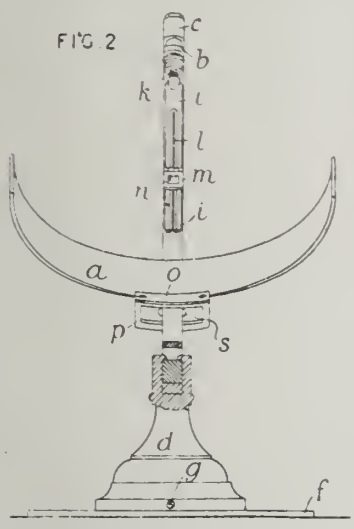
liquid level falls. The total mileage is measured by means of counting wheels visible through the apertures shown; while the rates of travel and of petrol consumption may be ascertained by comparing the movements of the distance hand M and the petrol pointer, respectively, with the movements, during the same time, of the minute hand H. A scale 25 facilitates the computation of speed from time and distance. A U-tube 16, containing liquid, furnishes an indication of the gradient.

26,819. SUNDIALS. A. F. C. Bentley, Upper Clapton, London. Dec. 10.

The equatorial arc *a* of a sundial is mounted transversely on an arc *b* pivoted to the meridian arc *c* adjustably carried by a stand *d* rotatably carried by a base-plate *f*, to which it is secured in position by screws *g*. A sector *o*, carried by a



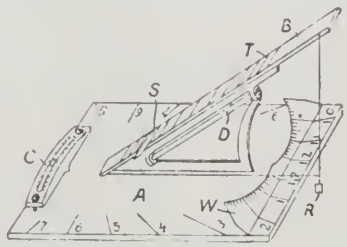


FIG. 2

bridge piece *p* on the main arc, is mounted adjacent to the equatorial arc *a* and is engraved with the minutes of equation, so that the equatorial arc *a*, which is provided with a rack operated by a pinion *s*, may be adjusted to allow for the equation of time. A line of light is formed on the equatorial arc by a slit *l* and a suitable lens *n*, mounted in a slide on a polar bar *i* with pivots *k*.

27,002. SUNDIALS. W. M. Homan, Bethlehem, Orange River Colony, South Africa. Dec. 12. (Patent of addition to No. 19,295 A.D. 1908, dated Sept. 20, 1907.)

In a sundial in which the time scale A and the gnomon B are together rotatable about an axis D parallel to the edge of the gnomon, or in which the time scale only is rotatable, when the said axis coincides with the edge of the gnomon, a suitable device such as a spirit level C, preferably provided with a scale of dates, the divisions corresponding with the equation of time, is attached to the time scale to indicate by what amount it is necessary to rotate the dial in order to adjust it to show mean time instead of solar time on a given date. The dial may also be adjusted by rotation about the axis D, to show the time at any longitude. Special means employed to erect and adjust the sundial correctly comprise an equatorial arc W fixed to the time scale, a scale of dates ST attached parallel to the edge of the gnomon, the divisions indicating the product of the tangent of the sun's declination on the given date, multiplied by the radius of the equatorial arc,

and a plumb line R, or a spirit level, to indicate the vertical plane through the edge of the gnomon. The erection is carried out as follows: The time scale and gnomon are rotated about the pivot D, and at the same time moved relatively to the main support of the sundial (not shown), until the shadow of a cross-piece S, which is attached to the date scale at the correct division, falls on the division of the arc W that indicates solor time at the moment of erection; simultaneously the division of the arc W that indicates solar noon is brought into the vertical plane passing through the edge of the gnomon. The apparatus is then clamped. In order to show mean time the dial is further rotated through the necessary amount about the axis D, and the spirit level C is adjusted until the bubble is opposite the correct date on its scale, and then fixed.

Applications for British Patents, March 29-April 2.

7,624. IMPROVEMENT IN CLOCKWORK ADVERTISING DEVICES. F. Schneider, London.

7,765. THREE-PRONGED HAIR PIN. S. H. Jepps, Newcastle-on-Tyne.

7,775. SAFETY HAT PIN. F. J. Howells, Liverpool.

7,873. IMPROVEMENTS IN CARVING FORK GUARD. G. Hemmingfield, Sheffield.

7,912. IMPROVED PROTECTOR OR GUARD FOR LADIES' HAT PINS, ETC. C. H. May, London.

D. Folsom, Rock Island, Ill., who, five years ago, organized the jewelry department in the store of Arned & Von Mauer, has resigned his position to become associated with the Topp-Parker Co., owners of "The Fair." Mr. Folsom will be financially interested in the latter concern, which is located in Davenport, Ia.

WE have recently issued a supplement to our 1904 material catalog which will be forwarded to you on application. This supplement used in connection with our 1904 catalog you will find a great help in getting correct repairs for our movements. Material for all new grades manufactured since the issue of our 1904 catalog is listed. Serial numbers showing grades of movements to 15394000 are given; table showing numbers and strengths of Hair Springs for different grades will be found a great convenience. We especially call your attention to the introduction in the supplement which explains how to get the part you want for any particular movement. A postal card request will bring one of the supplements.

THE HOROLOGICAL REVIEW

Our Civil Day.

By Daniel Arthur, in the *Scientific American*.

A FEW generations before our era the "whole known world" was only some 25,000,000 square miles in extent, instead of nearly 200,000,000 as we now know. That great observer and geographer Eratosthenes made a noble attempt about 225 B. C. to draw a map of the "world." He even used lines which looked very like parallels of latitude and circles of longitude. These lines were largely based on the speed records of travelers, and hence were not very accurate.

There were no such refinements on his maps as international date lines or time zones. His general outline of the "whole world" was about 90° wide east and west by 60° long north and south. It was all above our equator, and extended only about a quarter of the way around the earth. The mouth of the Ganges was farthest east, and what is now Ireland was farthest west. The Caspian Sea was thought to be an arm of the Northern Ocean, while the lower end of the Red Sea was about the southern limit.

Knowledge of the rest of the world grew very slowly then, as was shown by the fact that the great Strabo drew a map of the "world" 200 years later (about 25 B. C.) and made no material extension of its lines. He pushed Great Britain and Ireland farther west and made some radical changes on the northern edge of the Mediterranean, but otherwise these two maps of 200 years apart are practically the same. There is very little doubt, however, that Strabo thought the world to be round before he died. Hence the necessity for a date line was felt even at this early date.

While the spherical earth idea was passing through its hundreds of years of resistance, some radical observers started it spinning on its axis, so to speak. They were bold men, but they proved their case. This brought the date line as a necessity closer to us. It would almost seem that with a "flat disk world" converted into a stationary globe, and later into a rotating globe, the date line idea should have suggested itself at once. Not so, however; for it appears that when Magellan crossed the Atlantic from the east he passed around South America, crossed the Pacific, discovered the Philippine Islands, and went home around the lower end of Africa, thus completing a trip around the world.

This trip was made less than 400 years ago; yet when the explorers arrived at their home country they were astonished to find that they carried a date on board their ships which was a day earlier than the home date. It was soon found that no mistakes were made on the log books as to the time records, and that the home calendar was certainly correct. The explanation of this seeming impossibility was soon forthcoming, and our date line was born in fact.

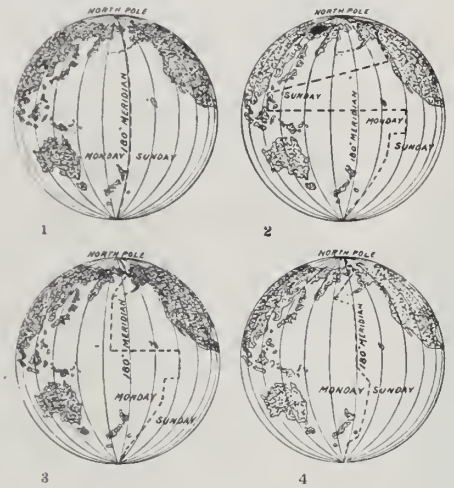

FIG. 1.

1. Theoretical date line. 2. Date line when Alaska took date of Russia and Philippines took date of Spain. 3. Date line after purchase of Alaska and Philippines took Asiatic date. 4. Present international date line.

As no one wanted the line near his home or country, it was put in the most out-of-the-way place possible, where it still stays. The 180th degree meridian is in theory where each new civil day is born, but in practice it has never been strictly adhered to. Fig. 1, diagram 4, shows its location with the deflections of practice as they now exist on the official map at Washington. This map was made by the Hydrographic Office of the United States to illustrate its replies to a set of questions sent by the writer. The map, together with the questions and the answers, will be found on a recent Pacific chart issued by the Navy Department. To describe the line, commencing at the northern end, it will be seen that the first deflection of practice is to the east, to give the tip of Siberia the same date as the rest of the Russian Empire. Then after the line passes through Bering Strait it bears to the west, crossing the true line of 180° and far enough beyond it to take in all of the Aleutian Islands to the American date, after which it turns back to 180°, where it stays until it crosses the equator a few degrees, at which point it again deflects eastwardly to give the Tonga Islands the date of Australia. The line then returns to the 180th meridian and continues on that line to the South Pole.

The foregoing is the "international date line" of practice at the present time, but in former generations the deflections were considerably greater, as, for example, the one shown in the second diagram of Fig. 1. In this date line Alaska was taken into the day of Russia, to which empire it formerly belonged. The line then took a westerly sweep of thousands of miles to take the Philippine Islands under the date as written in Spain. This latter wide deflection was afterward turned back or corrected by the action of the Governor-General of the Philippines when he decreed that Dec. 31, 1844, be reckoned as Jan. 1, 1845, to bring those islands into accord with the date of the countries east of the Cape of Good Hope. When Alaska was acquired by the United States the date line was transferred west of that territory, or into Bering Strait. These two radical changes made the line of practice look more like the third diagram in Fig. 1.

Refer to Fig. 2, which is intended to show the entrance of time on our globe. The picture illustrates a mechanical delivery of our civil day, month, year or century by means of an equatorial tape. Let us assume that the earth is stationary and that this tape enters and departs under the date line rollers as shown. If the tape had a speed of about 1,040 miles per hour and was properly marked in hours, days, months, etc., it would show just how our civil day enters the earth and progresses around it with a constant motion.

The illustration shows the front end of the 20th century as having completed 18 hours of its first day on earth, leaving only six hours of the 19th century to glide toward the line and off to no one knows where. The front end of Jan 2 will have reached the earth's time door to enter it just as Dec. 31 steps out, as it were. Then we have the 20th century all over the earth with Jan. 1 reducing its equatorial width at the rate of some 17 miles per minute and Jan 2 growing broader at the same

WALTHAM WATCHES

COLONIAL SERIES
Riverside Maximus
Enamel Dial

COLONIAL SERIES

Gold and Gold Filled Watches

These watches are a noteworthy addition to the Waltham line. They are exceptionally thin and may be had with Enamel, Silver Finish or Gilded Metal dials of artistic design. Colonial Series watches appeal to the most critical buyers. Equip your stock with these goods for Spring trade.

Colonial Series watches are to be had in five grades of movements as follows:

Riverside Maximus—23 jewels, adjusted to temperature, isochronism and five positions.

Riverside—19 jewels, adjusted to temperature and five positions.

Royal—17 jewels, adjusted to temperature and three positions.

No. 1425—17 jewels.

No. 1420—15 jewels.

All Colonial Series watches are cased and timed at the factory. They are delivered to the trade in display boxes. The retail selling price on these watches is fixed and plainly printed on the contract notice which is placed in the box with each watch before leaving the factory.

WALTHAM WATCH COMPANY
WALTHAM, MASS.

velocity. This, of course, is assuming that time is entering normally and not by the arbitrary intermittent steps that we will call the 24 way-stations of our civil day. This latter system is in successful operation in the United States and two or three other leading nations, China being one of the more recent converts to the hourly-zone system.*

Fig. 3 shows the earth with the hourly time belts or zones outlined from pole to pole. The lines drawn are 15° apart and represent the boundary lines of these zones, and not their centers. Fig. 4 is the same example as viewed from the North Star. In both illustrations the United States are outlined in approximately the correct location, so as to show the theoretical boundary lines of the hourly zones as applied to that country. Now in these two illustrations let us assume that the system has been adopted in all parts of the world. Commencing with the prime meridian at Greenwich as the center of a zone bounded by lines 7½° east and 7½° west, the completion of such a set of lines would give us just what is drawn and what our United States are actually using in theory. To illustrate mechanically the delivery of time on this plan, our equatorial tape is intermittent in its action—that is to say, it jumps 1,040 miles and then stands still for an hour, which means that on the 24th jump on any day of a given name, that particular day stays on the world (the entire world) for an exact hour.

Let us trace the front end of the 20th century by this system of progress. We again show it as having reached its 18th hour on earth as in the former illustration. That is to say, it has reached the 90th meridian west of Greenwich, or central time, but as central time covers 15° of longitude we have sent the head end of our century to 97½° west, making it arrive there half an hour too soon. We then compel it to stay there until it is a half hour late. Then it takes another jump to mountain time, which lands Jan. 1, 1900, at the 112½° west meridian, and so on. By adhering strictly to the system, let us note what happens when Jan. 1 reaches 180°. Of course, it must cover the 15° zone, the center of which is 180°, thus transferring the "international date line" to 172½° east of prime. The theoretical date line is thereby moved 7½° ahead of the 180° true line.

Before proceeding with our examination of the ragged edge of time, which local convenience demands on the hour zones or way-stations, let us glance back at the first diagram of Fig. 1 and look at the theoretical line where our civil day enters, then at the former practice in regard to Alaska and the Philippines, then at the line where these two countries changed places, as it were, and finally at the line of practice as now in use (1910). The deflections of practice which appear on this terminal station of time also appear in a constantly changing and more exaggerated form on the way-stations (hour zones). We have noticed how irregular the front end of the 20th century was when it entered the earth. Now refer to Figs. 3 and 4 and see what happened to it when it progressed around the earth as far as New York City—that is to say, when it reached 75° west (the eastern time zone).

The dotted outline of the United States enables us to see that Palm Beach, Fla., should be "ringing in" the new year and century in unison with New York City. Not so. Palm Beach is still on the 19th century calendar, and will be for another hour. The beach does not belong there, but as the railway managers voted it into central time in 1883, it is still held there by steel rails just as rigidly as the Tonga Islands are put in "to-day" by the steamship lines when they really belong in "yesterday," and as the more westerly members of the Aleutian Islands are kept in "to-day" when they should be in "to-morrow."

I once referred to these zone lines to a friend as imaginary. "Imaginary?" said he. "I will never forget the time I passed over one when going to California from New York. My appetite was running a bit ahead of time and I was impatiently waiting for the dining car to open up at 12 noon, as the time table said it would. The porter entered my car, and instead of the musical sounds of first call for luncheon on a dining car, he shouted: 'Set your watches back one hour.' If his train had reached El Paso, Tex., under similar circumstances it might have left the tracks. That is the point where the western time zone overlaps to such an extent that it actually meets an easterly deflection from the Pacific zone. The porter would have then called, 'Set your watches back two hours.'"

To persons who have not looked closely into this complicated subject, the first question that comes to their lips is, Why not keep the date line and zone lines straight in practice as well as in theory? Suppose that you live on Main St., Mainville, Me., where longitude 67½° west of Greenwich passed right through your front parlor. You will therefore set your hall clock an hour forward and let your little mantel clock stay as it is now. Very soon you would like to deflect the line enough to at least pass outside of the walls. Then you see visions of a late delivery of milk for your breakfast, and request that the line sweep in the milk depot, then the railway station, and finally that your office be kept in the same zone of practice.

Take another glance at the eastern time zone. That little bump on its edge was put there, not only to keep the line out of your parlor, but outside of the State of Maine. The mere fact that you and most of your neighbors were unaware of this deflection east of Maine is a proof that the line benders did their work well. If a very large percentage of the people of the United States knew that their zone lines were bent it would be time to bend them into some different form.

As some readers might overlook the fact that the astronomical day begins and ends at Greenwich at noon, 12 hours later than the beginning and ending of the civil or common day (the day we sleep and eat and work by), we should make it plain that all the illustrations and remarks apply to the civil one. The astronomical day is a clean-cut straight-line affair that needs no adjusting to practice. The users of this kind of a day do not try to thrust its date line aside. The observatory at Greenwich was built right on this line, and to make it more realistic a bronze table is set in stone with prime meridian engraved

*Since writing this article it has come to my notice that Chili of South America has given up local time, which was 17 minutes ahead of United States eastern zone, and, to quote the *Horological Journal*, the Chilians were enabled to live the same 17 minutes twice over. The change was accomplished by firing a gun at 12:17 A. M. on a given day and calling it midnight. This means that New York City or Washington, D. C. may cable messages to Chili without having to take note of any difference in time.

on it so that it may be seen and felt by those who visit the observatory.

Editor's Note—The author wishes us to say that as his use of 1899 in its past sense instead of current is liable to be questioned, it might be well to keep in mind that 20th century as we use it began on Jan. 1, 1901, and not 1900.

Keeping Tabs on Your Watch.

A VERY useful "Booklet of Forms and Blanks for Systematic Time Service Records of Watches and Other Timepieces" has been designed and arranged by F. M Bookwalter, Springfield, O. The booklet is bound in red leather and is of pocket size, measuring 4¼ by 6¾ inches In the tables and blanks for keeping a record of the performance of watches columns are arranged for keeping a memorandum of the date, slowness or fastness of the watch, time taken daily, daily rate, mean daily rate (gain or loss), variation from mean daily rate, mean variation of rate, etc.

The author originally conceived the booklet simply for his own private use, but further thought regarding its advantages prompted a more elaborate production. It is especially well adapted for the use of jewelers and those who carry expensive precision timepieces, watch inspectors, etc Mr. Bookwalter has been interested for a great many years in correct time service, chiefly as a diversion from the duties of an exacting business career. He is well known in horological circles, having given the city of Springfield, 30 years ago, a system of time signals similar in some respects to the present practice of the Western Union Telegraph Co. He is also the constructor of a fixed transient instrument and clock combined, keeping both sidereal and mean solar or local time.

Staking in a New Balance Staff.

THE old expression, "Make your head save your heels," might well be applied to the watchmaker's work by the paraphrase, "Make your head save your hands."

In staking in a new balance staff we sometimes find that one arm is longer, seemingly, than the other, caused by the staff shoulder riveting more on one side than the other. Now the common practice is to stretch or lengthen the short arm by means of a punch, which leaves a groove-shaped mark across the balance arm, also causing the workman the necessity of again trueing up his wheel.

When that staff has to be replaced, and should the new one rivet in evenly, we will have the stretched arm too long, and then the only recourse is to treat the other by the same process as the first, so here we have two errors resulting.

There is a simple way to overcome this difficulty. The staff is riveted in the hole in the balance arm, slightly off center, or on an eccentric. Now, by grasping the staff firmly in the lathe chuck or a good pin vise, and taking hold of the balance at the end of the arms with the thumb and finger, we can turn the balance one-quarter way round on the staff (a quarter turn usually gives the desired results), or any fractional part of a circle necessary to bring the eccentric part crosswise of the balance arm, trueing the part out of true in the segments of the balance instead of the arms There is some position of the staff, which we can find by turning and trying in the calipers, where the arms will be the same length unless one has been stretched by some workman, and the eccentric part will be in the segments of the balance or quarter ways of the arms, which can easily be trued out, with no damage resulting to the balance.

This, I think, is by far preferable to any other method, and the workman, with a little practice, will soon acquire the knack of turning his staff to the right position.

LUTHER COCHRAN.

Precautions to be Observed in Applying Oil to Watches, Etc.

THE method of distributing and applying the oil is of more importance than might be thought, and has a very marked influence on the time of going and the rate.

Oil that is very fluid may be used for the escapement and fine pivots where only a small quantity is needed and the pressure is slight; but it is not suitable in other places on account of its tendency to spread and thus to leave the rubbing surfaces.

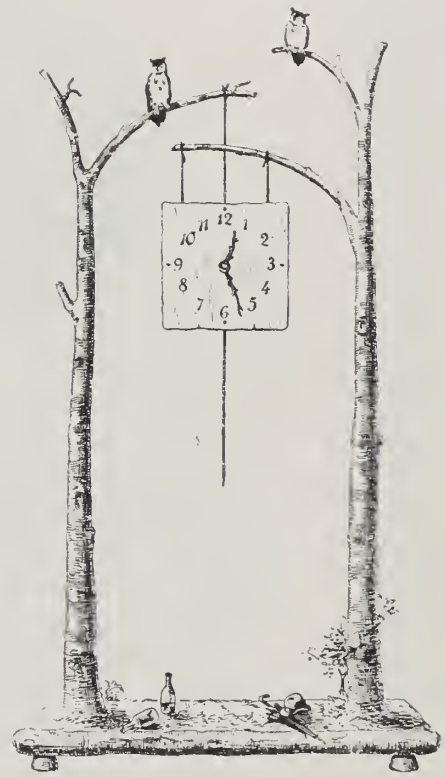
If too much oil is applied the effect is the same as if there had been too little; it runs away and only a minute quantity is left where it is wanted.

APPLICATION OF OIL.

It is not enough to apply oil to the coils of the spring; some must also be placed on the bottom of the barrel. Before putting on the cover, moisten the shoulder of the arbor-nut that comes in contact with it with oil; by doing so, when oil is applied to the pivot, after the cover is in its place, this oil will be retained at the center of the boss in the cover. Moreover, it will not then be drawn away by the finger piece, passing from this to the star-wheel.

The oil applied to the upper surface of the ratchet to reduce its friction against the cap must not be in such quantity as to spread on to the winding square. It is a good plan to round off the lower corner of this cover.

To the center wheel.—The observation made above in reference to the oil applied to the barrel cover may be repeated here.



To the escapement pivots.—When the drop of oil is introduced into the oil-cup of the balance pivot hole, insert a very fine pegwood point, so as to cause the descent of the oil; a small additional quantity may then be applied. When this precaution is not taken, it frequently happens that in inserting the balance pivot its conical shoulder draws away some of the oil, and there is a deficiency both in the hole and on the endstone.

The escape-wheel pivots require but a small quantity of oil. It often happens, however, that, owing to carelessness, the workmen applies too much, and it runs down to the pinion. The leaves will thus become greasy and stick while the pivots are running dry.

How a French Watchmaker Attracted Passersby to his Show Window.

THE clock illustrated below is a unique novelty made by M. Boulat, of Contances, Mauche, and described in *La France Horlogerè*. His own description follows:

"The man has in his body a small electro-magnet, acting on an armature which operates the arms and the legs. These members move easily, and such jerks are imparted to them as to cause the hanged man to kick and assume the most grotesque positions, executing, in the meantime, a sort of epileptic dance. To impart still more movement to the subject, there are as many as four successive contacts in the period of about four seconds, with more or less rapidity, then the hanged one resumes his natural position for 30 to 45 seconds, to recommence again his frantic kicking. The current by which he is actuated reaches

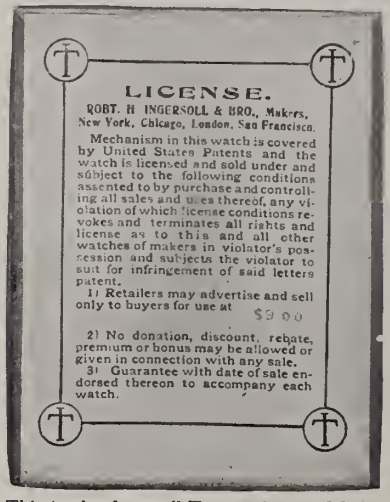
FRENCH WATCHMAKER'S ODD CLOCK.

him by the rope and the dial by means of the attachments; a ratchet, of which the number of teeth correspond to the number

POSITIONS OF THE MAGNETIZED FIGURE.

of kicks, is attached to the cannon pinion, and is also operated by an electro-magnet; a clock distributes the current.

Are we right in stating, at the beginning that there is nothing of the dance of death about this clock. The show window of M Boulat has been designated "The show window at which one lingers."



A fixed selling price on an article, maintained by both the manufacturer and the retailer, simplifies the whole question of salesmanship. It further largely eliminates the so-called useless shopping done by many customers.

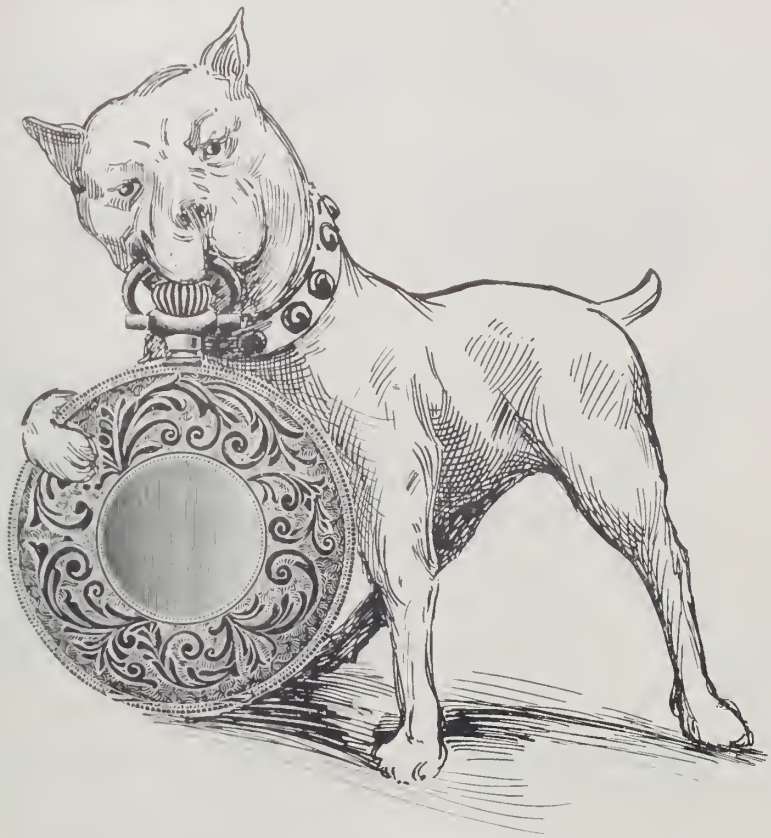
IT IS AN INEVITABLE FACT THAT ALL WATCHES HAVING A "FIXED SELLING PRICE" ARE MUCH EASIER SOLD THAN THOSE ON WHICH THE RETAIL JEWELER SETS THE PRICE."

From an article by J. P. ARCHIBALD,
President of the National Association of Retail Jewelers.

The above tag is attached to every watch that leaves our factory.

This is the Ingersoll-Trenton license label, part of every box in which the watch is sold.

A fixed selling price is not merely a help to *sales*—it adds to your *profits*, too. Your customer cannot make you reduce your price by telling you that he "can buy the same thing cheaper at Smith's" if the article you are offering is thus protected. You know it isn't so and in nine cases out of ten, you will sell him at the price asked.



Ingersoll-Trenton Watches are sold under this plan *only*. Their price protection is not merely theoretical—it does not merely cover the movement and allow the case to be sold at any price—the *complete watch* is always protected and cannot be sold by anyone at a less price than you ask.

Besides this, department stores and catalog houses are not allowed to sell these watches. They can be sold by just one class of trade and that is the *responsible jewelers*.

Isn't this *real* price protection?

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

Window Displays for the Graduation Season.

Prepared expressly for The Jewelers' Circular-Weekly.

SCHOOL days are always most pleasantly remembered, and there are few indeed who do not call to mind certain pleasant incidents associated with them. In view of this sentiment, the display illustrated herewith might appropriately be entitled "School Days." Accompanied by good newspaper advertising it ought to be a trade winner. The design includes a representation of "the little red schoolhouse," with flag fluttering in the breeze, chimney smoking, etc., etc., all of which effects may be easily and inexpensively produced.

A DISPLAY SUGGESTIVE OF "SCHOOL DAYS."

A piece of stiff cardboard may be bent to represent the school-house, pieces being cut out to depict the windows and doors. The window cut-outs should be backed with tissue paper. The door may be left partly ajar, in order to reflect the illumination of the electric lights placed in the rear.

The cotton in the chimney is darkened by means of ink. The "smoke" and the flag are made to appear realistic by allowing the electric fan, concealed behind the scroll, to blow upon them.

The floor of the window should be covered with turf, either the real thing or imitation. This greensward will make a most desirable and effective background on which to display articles suitable as graduation gifts.

A card might be placed near the display bearing the inscription "School Days, Dear Old Golden Rule Days."

Other appropriate show-window cards would be:

"The sweet girl graduate of to-day
will be the fair bride of to-morrow.
Dainty tokens of love for her."

Another Commencement Window.

Arrange the window so as to show at one side a doll, dressed appropriately for the occasion, as a girl graduate. This can be decorated with hair ornaments, rings, class pins bearing a class emblem, a watch and chatelaine pin, lavalliere, belt buckle, sleeve buttons, etc.

On the opposite side is a doll representing a boy. This may be used to display a scarf pin, class pin, watch fob, cuff buttons, etc. In the center is a large artificial or natural flower, flanked on either side by a list of jewelry that is most appropriate.

The center and entire base of the window are left to use for making a neat showing of such articles as would most readily appeal to parents or friends desiring to remember the student.

Helpful Storekeeping Hints.

(Written expressly for THE JEWELERS' CIRCULAR-WEEKLY by a practical storekeeper.)

Economizing Space.

IN smaller towns space is not always so valuable, stores as a rule being large and proportionately roomy, but in our larger cities, where floor space is costly, the proper use of it is quite a problem. Frequently people will occupy a certain spot for years, complain of being crowded, and yet a more practical man could store the same stock in a more orderly manner and still have a greater amount of spare room. It's like packing a trunk. One person can succeed in storing twice as much goods in it as another. The knack of doing those things isn't possessed by everybody. So if your store seems too small and you are puzzled how to rearrange it to economize space consult someone who is practical in such matters.

Here is a case in point:

A firm in order to "tide over" during the recent "panic year" leased half of its premises. To this concern's surprise, business increased instead of "slumping off," with the result that the reduced space was inadequate. It was impossible to dislodge the tenant, so they studied how to utilize their present space, but couldn't make much progress.

An experienced man was consulted. He asked that two large ornamental mirrors be replaced by shelving. He called attention to the fact that the shelving could be heightened three feet, and suggested that less frequently wanted goods be stored higher and a three-foot ladder be kept convenient for use. A corner previously used for rubbish was converted to better use by being filled with shelves, double-decked show cases being substituted for the old-fashioned ones in use. A large desk was disposed of, a smaller one replacing it. The

Storekeeping Department.

space saved was used for a small show case, etc.

The resultant changes gave these people more storage capacity than they had had in the original store. The entire cost of the changes would not eat up the rent received for two months, so these merchants gladly sublet to their tenant for a term of years the space which they at first regretted to part with, but they now have sufficient place for their needs and additional income from the rent. We sometimes plan and plan, but our ideas having become fixed along certain lines, it is only by getting the aid of an outsider that we can get suggestions which will rejuvenate our business.

While on the subject of fixtures I would suggest that parties buying new ones will do well to avoid fancy work. Smooth, plain-finished fixtures look richer, last longer, are easy to clean, and, if parts should be broken, cheaper to replace. Avoid odd corners and large receptacles in out-of-the-way places, for trash will surely be accumulated wherever it can be hidden or thrown.

The New Clerk.

Of course he's awkward. Who would not be, in new surroundings, especially if unfamiliar with the stock, the trade and his associates? Give him a chance, assist him to become "broken in," let him have an opportunity to develop, and give him a reasonable time to "get on his feet."

Give him an opportunity to serve some good customers. If he "bungles" one can assist him. Don't watch his every movement and make him nervous and, consequently, useless. If, after allowing him certain privileges and explaining to him the necessary details, you find he is not going to be the proper assistance, be just to yourself and to him. Release him and give the job to someone who can "catch on" to your methods and "make good," and give the other fellow an equal chance to locate where he may have possibilities.

Always remember that the first essential to a man's success is a love for his business. Another point is that during his business hours his mind should be on his business and his energies devoted to its upbuilding. Any man who does not display these two traits is not congenial to his work and should seek or be told to seek another vocation.

Tortoise Displayed in the Show Window.

A WINDOW display which attracted considerable attention in Chester, Pa., recently, was that of A. N. Peoples, a jeweler located at Market and 6th Sts. The exhibit consisted of a large turtle, the back of which is polished in order to bring out the beauty of the grain and figures. The tortoise measured two and one-half feet in length and was brought from South America by Mr. Peoples.

John W. Baker, administrator of the estate of James Baker, who was the partner in the Henkes-Baker Jewelry Co., Vincennes, Ind., has been authorized by the Probate Court to turn over the deceased's interests to J. H. Henkes for $2,727.

The "Fairness-Towards-All-Policy."

SOME of the demoralizing effects resulting from price-cutting were forcibly brought out in a recent address by F. C. Morse and reported in the *House-furnishing Review*. He said in part:

"At the present time the desired results are sought by methods differing in detail, but in the main uniform in one respect, namely, authority to any salesman in any individual transactions to disregard published prices and take the business at such price as he sees fit to make or has been authorized to make if necessary. As stated, this is unjust in that it discriminates between customers; furthermore it is essentially destructive to good salesmanship and is responsible for practically all of the ruinous prices that follow light demand and breeds contempt and ill-feeling towards competitors. * * *

"No one can analyze this proposition thoroughly free from prejudice without reaching these conclusions: First, that he cannot eliminate competition; second, that competition will sell some goods regardless of any price, hence instead of reducing the published or quoted price on individual bills to meet some reputed quotations, which in many cases is on a different character or quality of material, better pass the business. Third, in sending salesmen out with instructions to make concessions if absolutely necessary, has the effect, instead of finding out if the market is strong or weak, of tending to weaken the market by reason of the willingness to make concession.

"Confidence in the value of your own product will inspire confidence in those whom we seek to sell. The purchase of immediate needs only is the rule where fictitious values on a commodity is suspected. Fourth, adhering to published prices he will contribute the strongest factor to profitable merchandising. Fifth, absolute candor in all transactions with customers and competitors, so as to inspire their utmost confidence.

"I do not contend that the one-price house realizes more money for the same goods than their competitors, as the average prices on similar goods whether sold under a one-price policy or otherwise must be on a competitive basis, or about equal, in order to command the trade, everything else being equal. This I believe all will admit to be true and of itself proves conclusively the fallacy of making prices under cover or contrary to published prices.

"Some may ask, wherein lies the advantage to the one-price house, if, as stated, only the same average price is obtained. The advantage is first, in knowing that every customer has been treated fairly; second, the trade knowing that open orders sent will be furnished at the lowest price

THE SWEET GIRL GRADUATE AND THE AMBITIOUS BOY CHARACTERISTICALLY PORTRAYED.

brings a tremendous volume of business that in the absence of the one-price policy could be secured only at great expense by reason of the necessity of a personal interview.

Under the cut price policy frequently the salesman, sales manager and general manager are called upon to give their time and energy in the consideration of individual sales of minor importance. Apply this in your own case. No doubt you know of certain houses doing a large business who make all kinds of reductions, and others that have one price and that price is right. Which plan appeals to you? Third, the work of handling the business after secured is minimizing by reason of the uniformity of price schedules used by the entire office and sales force. Fourth, the general benefit resulting from a policy giving stability to the market which, if supported by any considerable number of distributors by selling at their published price, would be appreciated by the buyer and insure a market that would be steady and profitable twelve months in the year.

"Supply and demand will affect market conditions more or less, but a radical ad-

justment of prices to meet market conditions from time to time will never result in a stampede to unload staple goods regardless of cost of replacement.

"No reputable merchant should be willing to admit that, in order to dispose of his product, he must slaughter the price more than do his competitors, and no thoughtful merchant will long entertain the idea that his cut price will not be met by others and the temporary advantage gained, if any, is sacrificed many times in the demoralization that follows. Water will seek its own level, and the merit of the product and the house offering it will determine the concessions necessary in disposing of the goods offered. A cut price has the effect of discrediting the goods and the house offering them.

"We have seen a long period of much preaching and little performance. Talk is cheap. Hours and days, aye, months have been spent expatiating upon the failure of prices made and needless sacrifice of margins, all of which in the light of past experience has been made in more cases for the benefit of the other fellow, and were "con" talks pure and simple, the net results of which have been a failure, for the sole reason that the secret prices made by the other fellow have been the justification for applying the same methods. Why not get right ourselves? If the policy of no discrimination as between the purchaser is right the other is wrong. Let's be consistent. Don't blame a competitor for cutting his card if you are ever guilty of cutting your own.

"The size and nature of an order in many cases materially affect the cost of production, and handling, the competition and other conditions might rightly be a factor in determining the price to be made in different territory, so that in doing business under the one-price policy it matters not whether it is styled one price or selling at published price or one price on like amounts. Let the prices be an open book to competitor and customer—treat all alike.

An Educational Display.

AN instructive display shown by E. A. Whipple & Sons, Springfield, Mass., recently, was an enlarged watch movement. The model is that of a Waltham watch and it is declared that it is one of the finest pieces of workmanship ever turned out. It has a 23-jewel movement and is an exact replica of the 16-size bridge model. The watch itself is inclosed in a cylindrical glass case and rests on an octagonal base with mahogany finish. It represents the watch with the back off showing the works in operation and permitting one to follow all the movements of the watch. Although the dial has been removed from the face the hands still remain and are connected with the rest of the mechanism. In fact, the watch is complete in every detail. In this connection, also, the Waltham Watch Co. have an exhibit of the jewels used in making a watch.

In one case are the jewels in their rough state, uncut and unpolished, and in another as they are when put into a watch, polished and bored for receiving the minute rods upon which the wheels of the watch run.

The Law and the Retailer.

By Bernhard Raymond, LL.B., of the New York Bar.

(Continued from issue of April 13.)

THE firm name may be one of two kinds —it may be a fictitious name, it may be strictly a personal one. The distinction is of considerable legal significance.

Upon the dissolution of the partnership, by lapse of time or otherwise, either partner has the right to adopt the old firm name, if it was a fictitious one and can be used without leading the public to believe that the old firm still continues; but neither has the right to the use of the firm name including the individual names of any partner who did not continue with the remaining partner.

No Right to Announce Oneself as "Successor to."

A person thus continuing the business has no right to designate himself as "successor to" the old firm in the absence of an agreement giving such privilege.

But either may designate himself as "formerly of" the old firm, and such designation must be used in such manner only as will not tend to mislead or deceive the public; e. g., one's own name and the "formerly of" might be in small letters, difficult to detect, and the old firm name in very large letters. Morgan v. Schuyler, 79 N. Y. 490.

An excellent illustration is afforded in the case of Blumenthal vs. Strauss.

In that case the parties were copartners carrying on the business of importing clocks and watches on Broadway, New York City, under the firm name of Strauss, Blumenthal & Co.

The firm by agreement in writing was dissolved; Blumenthal conveying to Straus all his right, title, estate and interest in and to the assets of the firm, of any and every nature, kind and description.

Strauss subsequently formed a copartnership with one Boas and continued the business on Broadway and continued the display of the old sign of the firm on the outside of the building, and added to it another sign containing the words "Adolph Strauss & Co., successors to, etc.," and it also appeared they used the old stationery of the prior firm changing it by stamping thereon the same words.

It will be observed that nothing in the transfer in its whole scope grants in any form the right to use the retiring partner's name, or the right to declare themselves successors to the old firm. There is nothing in the facts and circumstances, considered closely and carefully, that the retiring partner—Blumenthal—designed to grant, or Strauss expected to acquire the right to assert that they were the successors to the business of the old firm, or of the members of the old firm.

In the absence of an agreement, express or implied, there is no right to so employ the name of one of the partners on dissolution, or so to assert in reference to the whole business.

And this rule was clearly laid down by the Court of Appeals in the case of Morgan *vs.* Schuyler, 79 N. Y., 490.

In the case of Morgan *vs.* Schuyler, which is a leading case on that proposition, and where a similar agreement to that entered into by Blumenthal and Strauss was involved, the Court of Appeals said:

"It was evidently not the intention of the parties that the remaining partner in conducting his business was in any manner to use the retiring partner's name, either in combination or as Morgan & Schuyler or in observance to it by advertising himself the successor to that firm; and also that it was not claimed that there was any express contract to that effect, and that none could be implied, either from the language of the agreement actually made or from any fact or circumstance connected with it."

If one partner buys out the other for the purpose of continuing the business, but nothing is expressly agreed upon in reference to the name, the sale by one of all his interest in the business, if the good will be expressly included, gives to the continuing partner the exclusive right to continue the use of the old firm name if it be a fictitious one, like "The Up-to-Date Novelty Co."; but not if it be a purely personal one containing the name of the retiring partner, except where the personal name has been made a trade-mark of the business.

The retiring partner may, however, go into business in his own name, but he must not use even his own name in such a manner as to mislead the public into believing that he is the old firm.

Continuing Partner May Acquire Right to Continue Old Firm Name.

The retiring partner may, however, by express agreement invest the continuing partner with the right to continue the former firm name, though it is a purely personal one; and the retiring partner may, in the same manner, limit his own right to resume business, or to use, or permit to be used, his own name in connection with a new business to compete with the old.

(To be continued.)

Pointers.

WHEN a man begins to blow in his money a lot of people get wind of it.

The secret of success lies in doing well what you can do and cutting out what you can't do.

Many a man's success is due to the fact that he went ahead first and made it right afterward.

The conditions of success in life are the possession of judgment, experience, initiative and character.

The more a man thinks about his work the less he thinks about himself.

Blame yourself when you fail, and you will succeed; blame some one else, and you remain a failure.

The man who doubts himself is like the chap who rowed all night with his boat tied to a stake.—*Iron Age & Hardware.*

Writing Good Advertisements No Sinecure.

From a report of an address at the Chicago A. A. by ARTHUR BRISBANE, published in a recent issue of *Printers' Ink.*

TO write advertisements is the most difficult thing in all the business of writing, because when you write an advertisement successfully you must to begin with, overcome a man's reluctance to read it. You must interest him in what interests you. I can interest people in my stuff in the papers quite easily when I write. For instance, I wrote an editorial the other day in New York. I saw that the Senators down in Washington had put up a sign in their restaurant saying that no tips must be taken by the waiters. I suggested it would be more valuable to the United States if the waiters would put up a sign in the Senate saying that no tips must be taken by the Senators. When I had my luncheon yesterday at Schlogl's a very nice young German waiter took this editorial out of his pocket and he said, "This is in the pocket of every waiter in Chicago."

It is not very difficult to write editorials that are successful. All you have to do is to tell the people about themselves, about how they feel.

If I should say to you that you have very interesting noses, you would all feel your noses and look in the glass and read my editorial, because it is your nose. See? If I try to interest you in some money-making scheme or some merchandise scheme it is difficult.

I tell employers—(I know a good many of the biggest advertisers—in fact, I have written a few advertisements myself, occasionally write one for some personal friend)—and I will tell you now, it is the hardest possible work, and it is so hard that it reminds me of an experience that I had with a friend of mine, Thomas A. Edison. He decided to give up advertising the Edison phonograph and to let it sell along in just its regular way. I told him he should go along and push it. I told him what I thought ought to be done to push this particular thing, which I consider one of the greatest benefactors in his particular line. I told him how. He sent the president of his company to see me, and this man said, "If you will write those advertisements we will take five pages and put them in the *Evening Journal.*" Now, I like to do what I can for the business department. I am perfectly aware the business department pays my salary; Hearst doesn't pay it; the men in the business office, the advertisers, the successful merchants, they have to pay it. I said, "All right, I will do that, but it is a lot of trouble, and if you print those five pages in the *Evening Journal* it will cost you $1,000 a page, which is our rate to print them, and I will charge you $1,000 a page to write them, which is reasonable." (Laughter.)

Now, I have in my desk a contract from the Edison Phonograph Co., which was signed nearly two years ago, and I have not yet written the five pages. Every time I think of it it gives me the shivers—to think of turning out really five pages of advertising copy. I rather think now I shall never write them. I am perfectly certain how it ought to be done, but to do it is very difficult. I could write you an editorial on the subject, I could interest you on Edison's personality, but when it comes down to accomplish the task that you men have to accomplish, when you have got to prepare a statement in plain English, which is more easy to write than to read, when you have to do that and make a man interested after he has finished reading, that is a very hard proposition.

There is no writing more difficult, which has greater temptation to foolish writing, than in the advertising business. A man who writes advertisements has all kinds of difficulties. First, he knows or sees the buyer. He knows he must get into that man's mind his ideas—that is the thing. Then he sees the man who employs him, the seller. Now a man may be a magnificent manufacturer of suspenders and a poor judge of writing, and when a man's whole life is wrapped up in suspenders he wants an advertising agent who will make it clear that when Alexander invaded Asia he had suspenders in his mind. That is the size of it. They want their own business glorified. They don't want it treated in a small suspender way. That is one of the difficulties of an advertising writer.

Then a great many go into advertising writing—that is evident more and more in the hiring of those who don't understand writing. You may be a very good business man, and you may understand mediums. You may do almost everything, except write a sentence in a way that a man will read and understand, and then you cannot make a success of the business. It is a very hard business.

A man who advertises a business properly is a distributor, and helps to economize money for the people. If a man can manufacture a million things and sell them, he can afford to sell them more cheaply than if he makes and sells only a thousand.

In addition to that, the man who establishes a firm advertising reputation—this is very important—establishes a guarantee of quality. If a man puts a million dollars into a factory he would not foolishly, to save a few dollars, run the risk of burning down that factory, especially if not insured. When a man has put a $1,000,000 or $10,000,000 into an advertising reputation, that is just as much of an investment, just as valuable to him, as if he had put it into bricks, mortar and machinery. When a man has established a certain line of goods, and put $1,000,000 into the advertising of that line of business, you can be perfectly sure that he will not set fire to that reputation, because it is a thing you cannot insure, and you cannot get your money back.

The old-fashioned man imagines that when he bought an advertised article he paid for the advertising. The modern man knows that is false, that the value is in the goods and it is just as cheap. Now that has not been understood, and you want the people to understand it.

Do you suppose if I went to the Pears' soap people with the proposition to make their soap for half the price and lower the quality for only one-tenth that they would take my proposition? They would say, "We have $100,000,000 invested in Pears' soap"—(I suppose they have that amount invested in one way or another, certainly $50,000,000)—"do you suppose we would do that with $50,000,000 investment, for the sake of a little economy?" That is a good thing to call to your minds. Now the intelligent man is the man who advertises in all directions. In Chicago there is one of the most intelligent advertising firms I know of—Hart, Schaffner & Marx.

Do you know what these men have done? They have not advertised their goods at all. They have advertised their quality. They have advertised not for men to buy Hart, Schaffner & Marx suits, but they have advertised to influence the retailers. They have done that very ingeniously. They have put their advertisements in *Collier's,* or the *Ladies' Home Journal,* or the *Saturday Evening Post.* The *Post,* I think, is more of a direct medium, as certainly the lady who reads the *Ladies' Home Journal* does not go out and buy several pairs of pants, waistcoats or coats.

But these people have built up a reputation. They have got us so that a man nowadays feels almost ashamed to order clothes made. They have painted such beautiful picture men in their clothes that when I looked at myself in the glass I saw that the trouble with me was that I hadn't a Hart, Schaffner & Marx suit. I spoke of Pears' soap—or, take Ivory soap. One of the biggest men in the country told me that if he were to spend $100,000,000 in advertising in competition with Ivory soap he couldn't get away any of the Ivory soap's business. They have rubbed it in and in and you can't get it out.

Now, daily newspaper advertising, morning, evening and Sunday newspapers, is the only way you can get an absolute reputation. Keep on saying it; never stop. I said to Mr. Brush, of the American Radiator Co., the other day: "Don't advertise your heating apparatus only in the Winter, but advertise it all the time. On the hottest day in Summer say, 'This is a hell of a hot day, it will be just as cold in Winter.' Make a man think about your radiators on a hot day as well as any other day. If you talk to him all Summer, by the time Winter comes he will think that you are the only radiator man in the world."

ASSORTMENT VICTORY

A Choice Selection for June Wedding Gifts in Rich Cut Glass

30 Pieces for $33 90/100 Including Package and Cartage

THE CONNOISSEUR'S HANDBOOK.

Definitions of Some Technical Terms in Gold and Silver Smithing and Ceramics Alphabetically Arranged for Easy Reference.

By Clement W. Coumbe.

(*Continued from issue of April 13.*)

Cookworthy, William. Rudler informs us that "The introduction of hard-paste porcelain into this country (England) is due to the ability and enterprise of William Cookworthy, of Plymouth." Cookworthy, being an expert chemist of that city, was inspired by some information as to the clays used by the Chinese in making porcelain to search for the materials in his own neighborhood. He found clays in both Cornwall and Devon that, upon experiment, proved adaptable to the purpose, and he, in business with Lord Camelford, took out a patent and opened a china factory in Plymouth in 1768. (See Plymouth.) The patent rights were sold, after unfruitful attempts to make a success, to Richard Champion, of Bristol (to whom refer). Until 1773 Cookworthy, at Castle Green, Bristol, continued to make china ware in connection with Champion, when the latter bought out all remaining outside interests, and William Cookworthy retired from business, dying in 1780.

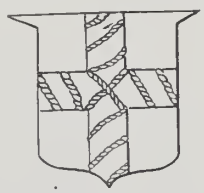
Copeland & Garret. Owned a pottery at Leeds, Yorkshire, in the XVIII. century.

Copenhagen (Denmark). "There was a fayence manufactory early in the XVIII. century, but we have no particulars of its establishment. About 1770 porcelain was made, and artists of great talent were employed who painted both porcelain and fayence."—Marryatt. The porcelain manufactory of Copenhagen "was originally established by a Frenchman named Fournier, in the time of Frederick V., 1760, near the Blue Tower. The paste was fine, and the ware mostly decorated in green; some was painted by Leipsius and Buch. The designs were pretty. The establishment rose in importance, and Fournier demanded so large a sum for his management that it was abandoned in consequence. Few authentic specimens are known, and they, being presents from the king to noblemen of his court, are said to be most beautiful. The manufactory was recommended in the year 1772 by Müller, Minister of Justice; the capital was created by shares, but in 1775 the shareholders, finding it did not answer, applied for assistance to the government, who took it into their own hands, paying the shareholders at par. It has since been continued as a government establishment, but has never paid its expenses. * * * Müller, who carried on the works until 1802, made groups and figures, which were discontinued in 1807, and few ornamental articles produced."—Marryatt. "The considerable quantity of ordinary objects delivered for consumption did not prevent the production of remarkable pieces of great ornamentation and figures in biscuit of perfect execution. The mark consists of three undulating lines."—Jacquemart.

Coperta, or *marzacotto* (It.). "The final film of lead glaze put on the later Italian majolica painting, which acted like a varnish and increased the brilliance of the colors. The practice was not followed in France."—Burton.

Coppa (It.). A cup.

Coppa nuziale (It.) Literally bridal glass. A glass formerly given as wedding presents. It usually had pictures of the wedded pair in a circle between scale work and pearl ornamentation, or symbolic or allegorical representations.



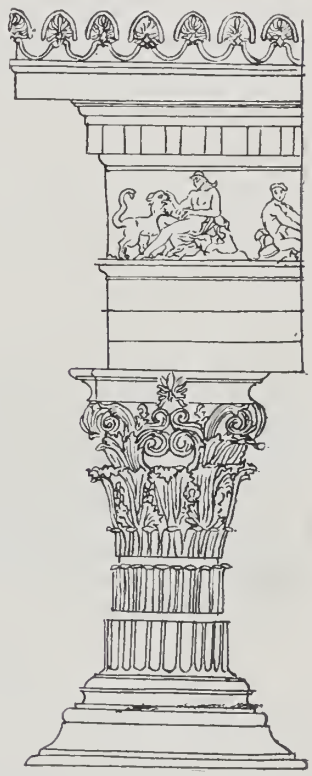
Copper. The Egyptian symbol for *copper* was ♀, which is the archemist's Venus.

Copper luster. (See *luster.*)

Coral is a Chinese symbol of longevity. (See also the Japanese Sangoju—"precious coral.") It is often depicted in Chinese porcelain.

Corded. A term used by jewelers to express the string-like decoration "usually done with wire shaped to represent the entwined strands of rope or cord."—Wilson.

Corded cross (French, *croix cordée*). "A



CROSS CORDED.

cross banded with cords."—Robson.

Corean ware. (See *Korean.*)

Corinthian order of architecture. This order was of Greek invention, but very early taken up by the Romans (second century B. C.) as admirably adapted for their love of the luxurious in decoration. This is a very rich type of architecture. Acknowledged as the finest specimen of the Greek *Corinthian order* is the Choragic Monument of Lysicrates, at Athens. A description of the capital of this superb work will best define a *Corinthian* capital. "The bell of the Corinthian capital (see engraving) is usually surrounded at the base by a row of water-plant leaves. Acanthus leaves spring from these, and out of the latter spring volutes (*cauliculi*), the larger ones of which meet at the upper corners; the smaller ones

CORINTHIAN ORDER, CHORAGIC MONUMENT OF LYSICRATES, ATHENS.

meet at the middle, and from the junction of the upper middle ones an upright *palmate* appears; rosettes are placed between each of the eight acanthus leaves. The abacus is moulded and curved in plan. The frieze is usually sculptured.

"Roman *Corinthian* are fine examples, the capitals well designed and having a grand and imposing effect. They have more mouldings than the Greek order and contain modillions (brackets) instead of the Greek *dentils.*"—Ward.

While in the Doric shaft the flutings are shallow and without intervals, being divided only by a sharp edge, the *Corinthian* shaft has deeper channelings and they are separated from one another by strips of the untouched surface. The flutes terminate above in elliptical, or semi-circular niches. The

CORNISH STONE, "or China stone, petuntze, pegmatite, cailloux. A rock composed principally of feldspar and quartz."—Janvier.

CORNISHED CROSS. Same as *cross capital* (to which refer).

CORNU, Louis. A painter-ceramist at Rouen, end of the XVIII. century.

CORONA. The Latin word *corona* (meaning *crown*) originally implied to the ancients a crown of victory. For the definition of these see under the title *crowns*. During the Middle Ages the ecclesiastical term *corona* refers to the chandelier of the church, or *corona lucis* (to which refer).

CORONA LUCIS (Lat.), sometimes termed *coronal* (crown light). "In ecclesiastical furniture the term *coronals* applied to a crown or circlet suspended from the roof or vaulting of churches, to hold tapers, lighted on solemn occasions."—Fairholt. The gold and silver smiths expended much artistic talent on these church lights (*coronae*) during the Middle Ages, and very elaborate and lovely works are still extant in the cathedrals of Aix-la-Chapelle and other Continental cities. The two *coronae* on either side in the illustration, it will be seen, are crowns pure and simple, whereas the central one serves as a chandelier, having the light suspended there-

CORONAE, FROM AN ANCIENT MANUSCRIPT.

from. We can call it a crown light or lighted crown.

CORONAL, or *coronel*. (See *coronel*.)

CORONET. "This in reality is a small crown, and strictly refers to those worn by the nobility other than sovereigns."—Milbourne. "No *coronet* under the dignity

1. PRINCE OF WALES' CORONET.

2. DUCAL CORONET.

3. MARQUIS' CORONET.

4. EARL'S CORONET.

5. VISCOUNT'S CORONET.

6. BARON'S CORONET.

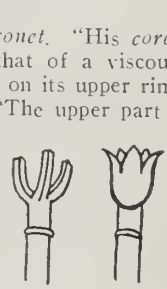
of a prince or princes of the royal blood should be adorned on the rim with precious stones or jewels."—Robson.

"In modern times English *coronets* have enclosed a velvet cap with a bullion tassel; at the present time, however, this cap, with better taste, is generally omitted."—Boutell.

Contrary to the rule given by such writers on heraldry as Robson, the present method appears to be that the rim, or circlet, of *coronets* is usually depicted as being jeweled. The illustrations here given are taken from Lodge's Peerage, which, like others, not only decorates the circlet, but *includes* the velvet cap. To Lodge also is due the credit for the following definitions.

In the Prince of Wales' *coronet* "his cap is of velvet, turned up with ermine and having a tassel of gold on the crown." (It will be noticed that Lodge's illustration, nevertheless, does not give the "tassel of gold on the crown.") "Over it is worn a *coronet* composed of a circlet of gold enriched with jewels; above its upper rim rise four *fleur-de-lis* and four crosses-pattée alternately; from them an arched diadem of gold crosses the head, and is finished at top with a ball surmounted by a cross pattée. * * * It is, in fact, the same as the imperial crown, with the difference of having but one diadem, instead of that one being crossed, as in the crown, by the second. The *coronet* appertaining to the younger sons and to the daughters of the sovereign differs from that of the Prince of Wales only by the omission of the diadem and the ball and cross which surmount it. The nephews and nieces of the crown have their *coronets* differenced by the substitution of four strawberry leaves for the four *fleur-de-lis*."

Ducal *coronet*. With the duke "his cap is of crimson velvet, lined with ermine, having a gold tassel on the top. His *coronet*, worn over the cap, is a circlet of gold enriched with jewels, and set around with eight golden strawberry leaves rising from its upper rim.



Marquis' *coronet*. "His cap and *coronet* resemble the duke's, differenced only by four of the strawberry leaves on the rim being exchanged for as many golden balls."

Earl's *coronet*. "His cap is the same as a duke's. His *coronet* is a circlet of gold enriched with jewels, from which rise eight points surmounted by as many balls of gold, and between them eight small strawberry leaves close to the upper rim of the circlet."

Viscount's *coronet*. "His cap is the same as a duke's. His *coronet* is a circlet of gold enriched with jewels, the upper rim of which is surmounted by 16 balls set close together."

Baron's *coronet*. "His *coronet* is differenced from that of a viscount by having only six balls on its upper rim."

CORONEL. "The upper part of a jousting

CORONELS.

lance, constructed to unhorse, but not to wound a knight."—Fairholt.

CORPORAL. "A white linen cloth laid on the altar, and on which the sacred Body and Blood of our Lord are consecrated."—Pugin.

CORRADI, Dominico. Son of Tommasso Corradi (died 1495). An Italian goldsmith.

CORRADI, Tommasso (*del ghirlandajo*). An Italian goldsmith during the end of the XV. century.

CORSET. As early as the XIV. century this term was applied to a breast-plate.

CORSLET. "A light body armor, as its derivative (*corse*) implies. It was chiefly worn by pikemen."—Fairholt.

(To be continued.)

Peter Lindenstruth, Pensacola, Fla., celebrated his 60th birthday anniversary April 5, with a few of his closest friends, at a dinner at the new San Carlos Hotel. The request of Mr. Lindenstruth that all be jolly because they "would not meet again so young" was generally heeded.

WORKSHOP NOTES AND QUERIES

[Answers are also solicited from our readers to the questions published on this page.]
No attention paid to communications unless accompanied by full name and address of the writer.

QUESTION No. 2561. — **Zeiodelite.** — *We use much sulphuric acid and employ stone ware, also lead vessels, in which to boil the acid. We are much troubled because the acid eats and destroys the vessels, and wish to know if there is anything better we could substitute for the ones we use.* Z. E.

ANSWER:—A new material, said to be the best so far brought out, is called zeiodelite, and is well suited for containing acids, especially jewelry dips. It consists of 42 parts of powdered stone ware or glass powder and 19 parts of sulphur. The mass is heated until the sulphur melts, when it is mixed by stirring and poured into moulds. By this means we may make slabs that can be employed to make the sulphuric acid vessels. The mixture withstands the effect of air and acid, no matter how concentrated the latter may be. It retains its solidity in boiling water and melts only at a temperature of about 248° F., and is therefore useful for various other purposes. For large linings, such as plating tanks, the slabs may be securely joined together by leaving a space of about one-quarter of an inch at the joints and filling this in with newly melted zeiodelite, which, however, should be heated to nearly 636° F. to make secure joints. Acid pickles kept in these vessels are perfectly free from lead. The cost is much less and the service much longer than could be obtained from lead vessels.

The Application of Transparent Enamels.

By WINFIELD E. DUNHAM, in the *Metal Industry*.

WITH the exception of certain lines of emblematic work, transparent enamels are to-day rapidly taking the place of opaques, especially on most all lines of ornamentation work. Jewelry manufactured of gilding metal and gold, unfortunately, cannot be successfully enameled with most of the transparent colors. Red, blue and some shades of yellow and purple work satisfactorily, but the vast majority of delicate shades so extensively used to-day fade almost into oblivion when applied on these metals.

Red enamel, unlike some of the other transparent colors, has never been manufactured as an opaque color without a decided change in its color. There are other transparent colors whose shades are fairly well duplicated in the opaque but for finish and beauty the comparison is so great that they find little room in the wide range of ornamentation work manufactured to-day.

In the process of applying these enamels to the stock of the piece and the result acquired there are always present uncertainties which confront the enameler from time to time. It may be the enamel surface appears porous or perhaps iridescent or semi-transparent, but the one great detriment to the successful finish of the enamel is the water with which it has been ground.

Enamel has been prepared for charging by being ground in various oils and proven very satisfactory, but as a general rule to-day most enamelers prefer water, especially for its economic value. Water that has been distilled by evaporation in platinum vessels is most assuredly the best and safest, as this process leaves no residue, which is the most harmful agent of the water. This residue, found chiefly in hard water, is usually carbonate of lime or magnesium; the chlorides and sulphates of lime or magnesium are soluble in water but the former never, unless the water contains carbonic acid gas (CO_2), hence it is obvious that we must have a sedimentary deposit of carbonate of lime or magnesium which will accumulate so long as the enamel is kept in water.

The effect of this residue in the enamel varies in different colors: transparent colors seem to be the most affected, and it is noticed chiefly by the pitted surface which cannot be eradicated by repeated firings or chargings. Just as an alloy finds its affinity with certain metals, transparent enamels find their chief medium in their application upon silver, no other metal used to-day in the manufacture of jewelry being as good. Silver, in order to be properly enameled with these colors, must be carefully firestained and the enameler must know when the pieces that are immersed in the solution are in just the proper condition to be enameled.

The firestain solution, in order to work satisfactorily, should contain equal parts of nitric acid and water and be heated to a temperature of 150 deg. Fahr. If the solution is worked at a much reduced temperature the results are not so good, especially if the piece to be enameled should contain soldered parts, as joints and catches, that are composed of German silver or white metal, the acid making these parts perceptibly weak. If much work is being immersed in the solution great care must be taken not to allow the solution to become saturated with nitrate of silver which sometimes tends to pit the surface. When the solution shows signs of being saturated it should be immediately precipitated with muriatic acid and a new one made. The excess of silver is easily detected by its deposit around the edge of the piece, or more generally, around the joint and catch, especially if they be made of composition of nickel.

The average jeweler, and the writer dares say, some enamelers, to-day know little of the actual meaning of the term "firestain," except believing that it is a stain taken out of the silver by means of nitric acid. This solution is correct as far as it goes, but the successful enameler must know more than that to produce repeatedly the best results with his transparent colors. The firestaining of silver consists of bringing to the surface of the silver stock the stain or oxide produced by the action of heat applied to the metal. This stain otherwise would not be produced if the metal were pure silver, but as sterling silver contains an alloy with its proportionate share of 75/1,000ths, we can readily see that the remaining 925/1,000ths does not constitute the whole.

Therefore, this stain that is brought to the surface of the metal is no other than nitrate of copper. So, by scratch-brushing off a thin film, we still have left an abundance of the alloy or copper. Red enamel may take a variety of shades after this operation, differing when the surface of the piece contains more or less copper. Red may appear almost brown on silver that has not been subjected to the firestain solution. It, therefore, more than any other color, requires greater skill in the method of firestaining, as the enameler must know, not only by the strength of the solution, but by the appearance of the metal, when it is properly prepared for red enamel. Other transparent colors, with the possible exception of flux, give good results where red may fail, but as a rule, whatever amount of firestaining that will produce a good red will work satisfactorily with most all transparent colors.

The colorer finds his greatest trouble in the coloring of silver goods that contain transparent enamel and many manufacturers are easily discouraged and loath to undertake the manufacture of enamel goods from this one standpoint. It is certain that greater care must be taken in the coloring of enamel goods than with those that are devoid of it, but the blame does not always rest with the colorer. The pieces may contain some infinitely small crack in the enamel surface that is not readily visible to the naked eye, which may be caused by pin stemming or polishing, and when the pieces are strung in the solution the enamel immediately chips out.

Such incidents as these will always accidentally happen, but when the enamel is repeatedly chipping the solution is not running right. Experienced colorers prefer a high voltage and a low action of cyanide of potassium to properly overcome this result. If the voltage be low, the duration of the time pieces are suspended in the solution working with a greater amount of cyanide, tends to chip the enamel. Enamel cannot be chipped from a metal surface except by the action of contraction or expansion, and it is, therefore, readily observed that the longer the enameled pieces are suspended in the solution, if it be hot, the more apt the enamel is to be chipped by the expansion of the metal.

The cost of repairing work that has been chipped by the action of the coloring solu-

FULCRUM OIL

WILL NOT EVAPORATE

Want us to prove it? Read this letter, sent to one of the big jobbers of the west, who were one of the first to sell Fulcrum Oil and who have sold large quantities ever since they handled it.

EDWARDS & SLOANE JEWELRY CO., CASCADE, Ia., April 7, 1910.
Kansas City, Mo.

GENTLEMEN:—The two bottles of Fulcrum Oil were received and we took one drop of the Watch oil and one drop of the kind we had been (regretfully) using before and put them on a brass plate, cleaned and put away in the sunshine under glass cover. On the second day the old oil had run all over its plate, while the Fulcrum Oil was there, where we had put it, intact. After a week the Fulcrum was still intact, while the other oil was entirely evaporated; nothing at all left. I was astonished at the result. Here are the 70 cents to pay for the two bottles.

Yours very truly,

(Signed) ERNST VOGEL.

Fulcrum Oil is the oil for you—if you don't want to do your work over the second time without pay.

tion is usually greater than re-enameling the work, as the enamel that is left intact with the metal surface oftentimes bubbles or blisters when the heat is applied. The best way of repairing such work is to immerse pieces in hydrofluoric acid until the enamel is all eaten out and re-enamel. If the depth of the compartments is lessened by stoning and polishing, the transparent colors will inevitably take a lighter shade, making the repairing very noticeable, but this is the most practicable and the cheapest way of repairing chipped enamel surfaces.

In the application of transparent enamels the die cutter and the enameler may be said to portray the garment that the master hand of nature has given them and endeavoring to reproduce in some slight extent the true coloring.

An Improved Method of Electroplating.

(Lecture delivered by AUGUSTUS ROSENBERG before the Royal Society of Arts.)

(Continued from issue of April 20.)

WITH your indulgence I might incidentally draw your attention to the way in which this very pretty experiment, although so simple and performed without the aid of any apparatus, illustrates a whole series of chemical changes; changes which can easily be demonstrated by the exercise of every one of our five senses, viz.:

(*a*) Ammonia is liberated by the decomposition of the salt—detected by the smell.

(*b*) Heat is generated—detected by touch.

(*c*) Hydrogen is generated, causing bubbles of hydrogen to fizz—detected by hearing.

(*d*) The cathode changes color owing to the deposition of nickel, and the gas bubbles generated can be also seen—detected by sight.

(*e*) The residual liquid contains magnesium sulphate—Epsom salts; as may be detected by taste. (I would suggest that you get some one else to exercise this last sense.)

The experiment, in addition to being an interesting one generally, is specially useful in practically demonstrating many properties claimed for Galvanit. As previously mentioned, a cleansing takes place concurrently with the deposition of metal, and this cleansing is not only mechanical but chemical. In this experiment, the ammonia liberated, being in a nascent state and in conjunction with the moisture present, immediately acts upon the surface treated. Similarly the radical sulphion (SO_4) performs the same office in the case of other impurities such as oxides. Thus these mixtures exercise a strong detergent action, which goes on concurrently with the deposition of the metal.

When plating in the known manner by means of an external source of current, it is necessary to keep the electrolyte in motion, to ensure uniformity in composition when a good deposit is required. This is effected by frequently stirring, by means of mechanical agitation, or by constantly blowing air into the solution, the motion in any case being sufficiently vigorous to ensure thorough mixture of the solution. Silver and some other metals require movement to be imparted to the objects upon which the deposit is being made. In some cases a burnisher travels over the deposited metal, as in the Elmore process for making copper tubes electrolytically, the burnisher constantly traversing the length of the tube backward and forwards as it slowly rotates in the bath, so that the metal is continually consolidated, compressed and brightened as it becomes deposited, and thus yields a deposit possessing in a high degree both density and solidity.

The advantages obtained by agitation of the electrolyte and the moving of the cathode, are equally well accomplished by the simple motion and rubbing in the Galvanit process.

I would remark here that the Galvanit powders can be used to deposit their respective metals on aluminium surfaces. Knowing the difficulties experienced when trying to deposit a metal on aluminium by means of an external source of current, this was an interesting and unexpected result. Another advantage to be noted in this Galvanit process, and one which is of great importance, is the depolarization of the cathode. The hydrogen film which tends to form on the surface is prevented from doing so by the friction employed.

I have previously mentioned that one of the chief difficulties which presented itself arose from the fact that one of the ingredients which must necessarily be employed is an electro-positive metal. The ingredients in the mixture therefore possess an inherent tendency to react upon one another, with the result that, in the absence of special precautions, premature decomposition of these materials ensues if certain of them are allowed to come in contact with one another at any time. Such decomposition would be caused by the presence of moisture, but it can in some cases be overcome by avoiding the use of hygroscopic materials. Since, however, in the majority of cases it is not practicable to dispense with the use of these hygroscopic materials, as I have remarked before, one method of keeping the active ingredients normally dry is by introducing an inert substance such as talc.

But I have found another method to work admirably, viz., providing a special protection for the electro-positive metal apart from the other ingredients. This is accomplished by providing it with a protective coating of an inert substance such as paraffin, resin or the like. The *modus operandi* is as follows: The electro-positive metal in its state of fine powder is immersed for a short time in a solvent containing the protective coating in solution. The metal is then withdrawn, and the solvent allowed to evaporate. By this or other suitable means there is deposited upon the particles of the electro-positive metal a coating which serves to protect it both against atmospheric influences and also against premature chemical reaction, with the other ingredients with which it is to be brought into contact. Nevertheless this coating in no wise affects the efficiency of the mixture, since it is immediately removed by the friction employed in the deposition operations, and consequently does not inhibit or interfere with the chemical reactions which take pla during that operation.

More than any other metal, perha nickel requires the utmost care, in orc to obtain an adhesive deposit. Nickel co ings are specially liable to flake off unl exceptionally well deposited. Even t thinnest films will part from the surfac which are not chemically cleaned, and th peeling necessitates the stripping of the mainder of the deposit, and the commenc ment of the work *de novo*. The objects be nickeled must not be touched with t hands during the process of plating, or, deed, until finished, as the coating, in unfinished condition, is peculiarly suscep ble to grease markings, and the stain w inevitably show after drying. Care is mo largely needed in the renickeling of o work, for it is found that the metal cann be induced to give a deposit which is any degree adherent to an old surface nickel.

In nickeling by the Galvanit process v meet with none of these difficulties. It h also been found that Galvanit can be us to redeposit nickel upon the worn portio of a previously nickel-plated surface.

Among the many applications of nick Galvanit, its use to coat the soft copper type-metal printing surfaces is of speci value. A thin film of nickel, so thin th the quality of the printing surface is n affected, will increase the hardness, an consequently, the life of the plate eno mously; a nickel-coated copper-plate wi give about four times as many impressio as one coated even in the usual way wit iron. The printer is enabled, by the use the Galvanit nickel powder, to nickel fac electrotype printing blocks (both line block and half tone) in a very few minutes, wit a film of nickel; special advantage also a taches to its use as it enables copper block to be used with a red pigment (vermillion which cannot be done without such protec tion because the unprotected copper decom poses the mercury sulphide, which is th basis of the pigment, and thus destroys it color, while at the same time the coppe tends to become brittle by the absorptio of the reduced mercury.

The Galvanit tin powder is of special us to re-tin cooking utensils, as any domesti servant can accomplish this without an more exertion than is required to scour th vessel in the usual way.

By the Galvanit process several metal can be deposited one on top of the othe *i. e.*, silver on nickel, tin on top of th nickel, copper on top of the tin, etc., withou stripping the object of the previously de posited metal.

Hitherto Galvanit has been considere solely as an electro-plating medium. would now like to draw attention to it value as a polishing agent. Since the usua method of polishing plated surfaces is b the use of abrasive or corrosive prepara tions, the plating on the articles polishe inevitably becomes thinner with each appli cation, finally wearing off altogether. O the contrary, by the use of Galvanit, simul taneously with the polishing of the plate surface the new metal is deposited, whic theoretically and actually increases it thickness and greatly prolongs its life.

BEWARE!

of the auctioneer who sends a substitute to even arrange for your sale, and then writes you that you can expect his personal attention when your sale begins. As a rule, you never see the principal.

I have recently completed a sale for Worden-Mark Co. of Dansville, N. Y., and disposed of the entire stock. The sales averaged $1,500 a day, for 10 days, and paid the concern a profit of 20%.

It is an easy matter for anyone to say nice things about himself, but it sounds better when others praise him.

Write Worden-Mark Co. and ask them concerning the results I secured.

W. E. LONGMATE

Jewelers' Auctioneer

ELMIRA, N. Y.

This reference is from a celebrated auctioneer who has an office at 8 Brisbane Building, Buffalo, N. Y.

Try me; I can make you some money and will not hurt your reputation.

My Very First Reference

Mr. Walter E. Longmate,
Elmira, N. Y.

Dear Sir:

I want you to know of my appreciation of your efforts in assisting me at the sale I held in Elmira. You have every essential qualification of a first class salesman. I can frankly say you would make a great auctioneer.

Respectfully yours,
B. H. WADE.

A NEW DEPARTURE IN ENGRAVING TOOLS

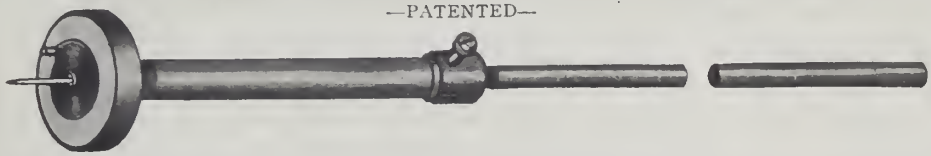
WELLS' UNIVERSAL GRAVER

Pat. March 9th, 1909.

The above cut gives a general idea of the Wells' Universal Engraving Tool. The crescent graver is held by means of a clamping device and can be adjusted quickly and securely. The crescent may be set at any angle to suit the operator, thus enabling him to engrave flat, concave and convex surfaces with perfect ease and a better control than is possible with any other kind of tool.

The length of the graver remains the same throughout the life of the tool; it is in the fullest sense UNIVERSAL owing to its uniformity of length, adjustability of angles and the facility with which it is handled. It is readily adapted to all kinds of work and inasmuch as the engraver has a superior degree of control and feel with this tool he is able to do the work more quickly and accurately than is possible with any other graver.

The tools are so constructed that when sharpening the crescents lay flat on the stone; this assures a sharp cutting angle, and as both ends of the crescent are ready for use the engraver has two angles of different degrees to suit the work he has in hand.



The three styles of crescents are (1) sharp point, (2) narrow flat, (3) wide flat. The tools are guaranteed to be perfect in temper and quality.

PRICES

A—Patent handle with one crescent graver.....	$ .75
B—Patent handle with three crescent gravers.....	1.00
C—Three patent handles with three crescent gravers.	2.00
D—Separate crescent gravers each.....	.20

THE BELKNAP ADJUSTABLE HAIR SPRING TOOL

—PATENTED—

For making alterations or adjustments of all size Hair Springs. The tool serves as a gauge and holder and will save any watchmaker many times its cost every week in making his work easier, quicker and more accurate. The tool is practical, simple and well made, and has been thoroughly tested by many of our best workmen in factories and at the bench, and all pronounce it the best tool yet produced for this purpose and say it fills a long-felt want. **PRICE $1.00.**
